International Opium Commission

SHANGHAI, 1909

Vol. I.—REPORT OF THE PROCEEDINGS

REPORT

OF THE

International Opium Commission

SHANGHAI, CHINA

February 1 to February 26, 1909

Vol. I.—REPORT OF THE PROCEEDINGS

SHANGHAI:

PRINTED AND PUBLISHED BY THE NORTH-CHINA DAILY NEWS & HERALD LTD.

1909

D

International Opium Commission

President :

THE RIGHT REVEREND CHARLES H. BRENT, D.D.
Bishop of the Philippine Islands
(Chief Commissioner of the American Delegation)

Secretary :

FRED. W. CAREY
(Associate-Delegate for China)

Assistant (and French) Secretary :

XAVIER DE LAFORCADE
(Secretary to the French Delegation)

Official Stenographer :

J. WALLIS BRINING

Clerk :

LI KWAY-YOONG
(Chinese Imperial Maritime Customs)

List of Delegations and Representatives

America, United States of.

DELEGATES:—

The Right Reverend CHARLES H. BRENT, D.D. (Chief Commissioner),
Bishop of the Philippine Islands.

HAMILTON WRIGHT, M.D.

CHARLES D. TENNEY, LL.D.,
Chinese Secretary to the American Legation, Peking.

SECRETARY:—

H. F. HAWLEY.

Austria-Hungary.

DELEGATE:—

Dr. KARL BERNAUER,
Acting Consul-General for Austria-Hungary.

China.

DELEGATES:—

His Excellency TUAN FANG (High Commissioner),
Viceroy of the Liangkiang Provinces.

His Excellency JUI CHÊNG,
Official of the Second Civil Rank,
Provincial Treasurer of Kiangsu.

His Honour TSAI NAI-HUANG,
Official of the Fourth (with Brevet of Second) Civil Rank,
Shanghai Customs Taotai.

His Honour LEW YUK-LIN,
Official of the Fourth (with Brevet of Second) Civil Rank,
Councillor of the Waiwupu and Expectant Taotai of Chihli.

Dr. HSÛ HUA-CHING,
Official of the Fourth (with Brevet of Second) Civil Rank,
President of the Army Medical College and Expectant Taotai of Chihli.

T'ANG KUO-AN,
Official of the Fifth Civil Rank,
Member of the Waiwupu.

ASSOCIATE-DELEGATES:—

- F. A. CARL,
Official of the Second Civil Rank,
Commissioner of the Imperial Maritime Customs, Newchwang.
- J. L. CHALMERS,
Official of the Third Civil Rank,
Acting Statistical Secretary, Inspectorate Staff, Imperial Maritime Customs.
- WU PAO-YEN,
Official of the Sixth (with Brevet of Fourth) Civil Rank,
Member of the Waiwupu.
- FRED. W. CAREY,
Official of the Fourth Civil Rank,
Acting Assistant Secretary, Inspectorate Staff, Imperial Maritime Customs.

France.

DELEGATES:—

- J. RATARD (Chief Commissioner),
Consul-General for France.
- H. BRENIER,
Sous-Directeur de l'Agriculture et du Commerce en Indo-Chine.
- J. CORNILLON,
Adjoint au Directeur-Général des Douanes et Régies de l'Indo-Chine.

SECRETARY:—

- XAVIER DE LAFORCADE,
Consul suppléant de France.

Germany.

DELEGATES:—

- Dr. WALTHER RÖSSLER (Chief Commissioner),
Consul-General (H.I.G.M.'s Consul at Canton).
- Dr. G. PERNITZSCH,
Referendar,
Assistant Interpreter, H.I.G.M.'s Consulate-General, Shanghai.

Great Britain.

DELEGATES:—

- The Right Honourable Sir CECIL CLEMENTI SMITH, G.C.M.G. (Chief Commissioner).
- Sir ALEXANDER HOSIE, Kt.,
H.B.M.'s Consul-General.
- WILLIAM LYON MACKENZIE KING, C.M.G.
- JAMES BENNETT BRUNYATE,
Acting Financial Secretary to the Government of India.
- ROBERT LAIDLAW, M.P.

ASSESSORS :—

WARREN D. BARNES,
Secretary for Chinese Affairs, Straits Settlements and Federated Malay States.
CECIL CLEMENTI,
Assistant Colonial Secretary, Hongkong.

Italy.

DELEGATE :—

R. FARAONE,
Acting Consul-General for Italy.

Japan.

DELEGATES :—

His Excellency TSUNEJIRO MIYAOKA (Chief Commissioner),
Councillor of Embassy, H.I.J.M.'s Diplomatic Service.

Dr. Y. TAHARA,
Director of the Imperial Hygienic Laboratory, Tokio.

Dr. T. TAKAKI,
Director of the Medical School and Chief of the Sanitary Bureau of the Government
of Formosa.

SECRETARY :—

KEIZO YOKOYAMA,
Chancellor of H.I.J.M.'s Consulate-General, Shanghai.

Netherlands.

DELEGATES :—

A. A. DE JONGH (Chief Commissioner),
Inspector-in-Chief and Head of the Opium Régies in Netherlands-India.

W. G. VAN WETTUM,
Acting Inspector of the Opium Régies in Netherlands-India.

Persia.

DELEGATE :—

M. D. RIZAEFF,
Official Agent for H.M. the Shah of Persia.

SECRETARY :—

B. A. SOMEKH.

Portugal.

DELEGATES :—

OSCAR GEORGE POTIER (Chief Commissioner),
Consul-General for Portugal at Shanghai.

Commendador C. A. R. D'ASSUMPÇÃO,
Chief of the Chinese Translation Department at Macao.

Russia.

DELEGATE :—

His Excellency Monsieur C. KLEIMENOW,
Councillor of State,
Consul-General for Russia at Shanghai.

Siam.

DELEGATES :—

The Right Honourable PHIYA SAKDISINIE (Chief Commissioner),
High Commissioner of the State of Patani.

His Honour LUANG VISUTR KOSA,
Secretary of Legation attached to the Foreign Office at Bangkok.

His Honour PHRA MANAS MANIT,
Secretary in the Ministry of Finance, Bangkok.

Report of the Proceedings

THE COMMISSION assembled for the first time at 11 a.m. on the 1st February, 1909, in the Palace Hotel at Shanghai. His Excellency Tuan Fang, Viceroy of the Liangkiang, nominated by Imperial Rescript for the purpose, welcomed the delegates in an address, which was afterwards repeated in English by Taotai Wên Ping-chung.

The translation read was as follows:—

Gentlemen.—On the 20th of September, 1906, an Imperial Edict was issued prohibiting the cultivation and use of opium throughout the Empire within the period of ten years. According to a Report from the Ministry concerned, the result of an inquiry into the question shows that up to the present progress has been made in reducing the area under cultivation of the poppy plant in the various provinces.

As a matter of fact, the area where the poppy has been cultivated in the Kiangnan portion of Kiangsu province, has been now reduced by eighty *per cent*, while it is on record that from the six provinces of Shansi, Yünnan, Fukien, Anhui, Honan and Heilungkiang, or Northern Manchuria, memorials have been presented to the Throne reporting that the cultivation of the poppy will be entirely stopped by the winter of the present year. Even more than that, the gentry and merchants of the various provinces of the Empire have everywhere started societies to exhort and assist opium smokers to get rid of the baneful habit. For instance, we have an Association in Fukien province known as the “Anti-Poison Society” which has been making considerable progress in its campaign against the drug.

Indeed, from the present outlook, together with the state of Public Opinion throughout our Empire, there are great hopes that the consumption of opium can be stopped in its entirety before the end of the prescribed limit of ten years.

To-day it is my good fortune to be present at this International Conference, having been appointed by Imperial Rescript to open the proceedings. I am convinced that the countries of the world recognize the benevolence and philanthropy which have led to the gathering of the present Conference in the interests of civilization, and I may state that the people of our whole Empire are most grateful for it. It will need more eloquence than mine to fittingly express the cordial welcome with which our country hails the inauguration of this International Opium Conference, but I may take this opportunity, first, respectfully to tender the thanks of my Government and that of the people of this Empire to the American Government for initiating the movement which has brought about this Conference, and, next, to thank the Governments of the various countries here represented for so heartily joining in it.

As the Representative of the whole Empire, I beg leave to give this Conference some of our ideas on the subject in view.

I may be permitted to express my belief that this Conference will be principally guided by feelings of reason, benevolence and philanthropy in its desire to eradicate a poison and a bane to mankind. This being universally recognized, it becomes us to put aside all prejudices of nationality and race, and be guided solely by that world-wide philanthropy and enlightenment which have brought about this International Conference. For instance, the manner in which the Governments of the countries concerned have set about to stop the consumption of opium in their colonies and dependencies such as Formosa, Annam, the Philippine Islands, Java, etc., has been to undertake the monopoly of the sale of opium therein, a procedure which China alone has not yet put into actual force. As a matter of fact, the mere prohibition of opium without the Government having the monopoly of the sale of the drug will prevent the Government from learning the number of persons suffering from the habit, nor can it put into effect any laws for the suppression of opium consumption. Mr. Leech, Councillor of the British Legation in Peking, has stated—“Whether China can completely obtain the good she seeks, without government control of opium, both native-grown and imported, is somewhat doubtful,” an opinion which gains my deep admiration for

his wisdom and far-sightedness, and merits our sincere thanks for his warm sympathy in our endeavours. What, however, is to be apprehended is that Chinese merchants importing opium may claim that such a step will be contrary to former treaties and disadvantageous to their trade, and so oppose it, thereby preventing China from putting into effect a proper control over opium and the spread of the opium prohibition throughout the country. Thus not only will it not agree with the sincere intentions first expressed by the British Government to give every assistance to China but also be a hindrance to the movement initiated by the American Government; nor will it enable the various countries represented in this Conference to show their unanimity in assisting this Conference to solve the questions before it. This is a matter to be regretted, indeed, and it is my earnest hope that this Conference will thoroughly go into this matter during its deliberations.

It was at first intended to limit the abolition of opium in the Empire to ten years, but the various provinces have been able so to reduce the cultivation of the poppy that it would seem that this cultivation may be entirely stopped within the next couple of years. Moreover the sale of prepared opium has also been rapidly reduced to over one-half, so that we may certainly be able entirely to stop the sale and consumption of the native-grown opium within the prescribed limit of ten years. With the complete stoppage of our native-grown opium it would follow that the importation of the foreign drug will also stop as a natural sequence. Such being the case the people of my country will have reason to congratulate themselves on what has gone before, and this we will owe to the assistance given by the British Government, and to the labours of the American Government in initiating the movement which brought about this Conference. On the other hand the attempts of this Government to suppress opium are hampered by existing treaties. Should a way be found by which such clauses in the treaties that restrict the freedom of my Government in its work of abolishing the consumption of the drug in the Empire may be got over, so that we may succeed in accomplishing our great and important task—fortunate indeed will it be for our Government and the people of this Empire. It is my earnest hope that this Conference will use its best endeavours to thresh out this question.

On the whole, since the main object of this Conference will be to consider the question of putting a stop to the consumption of opium, fortunate indeed will it be for the whole world if by the labours of the Conference a way be found to shorten the limit and bring about the abolition of opium at an early date. I do not think that national interests and division of races will be brought forward and produce difficulties between our countries, thereby hampering the work of opium abolition.

What is the meaning of the phrase "to seek for gain and yet fear to overcome difficulties"? The honourable gentlemen who are present this day as members of the Conference have all been selected by their respective Governments for their benevolence, philanthropy and fame. Since such is the case, I am certain that none amongst this distinguished assembly will act contrary to the benevolent and enlightened objects which have brought them together here. I will, therefore, be the first to declare to this Conference that the Government and people of my country are determined to succeed in their object and will not by any means turn aside from accomplishing the task before them.

As to the methods to be employed in accomplishing this end, the main idea will be to prohibit the cultivation of the poppy, the sale of the drug and the consumption thereof. It is only to be apprehended that in putting into effect the law for this prohibition it may conflict with certain clauses of the treaties. It is my hope that this Conference will carefully investigate the matter beforehand so that there may be no misunderstandings in the future. In this my speech I do not know whether I have been successful in gaining the approval of the honourable gentlemen of this distinguished assembly, but I am ready to receive such suggestions as may be instructive to me from this honourable assembly, whereby I shall indeed be fortunate. Therefore, I now declare this Conference open.

Immediately after the Viceroy's speech had been read, M. RATARD, Consul-General for and Senior Commissioner of the Delegation representing France, rose, and, addressing the Viceroy in French, preferred a request that French should be the official language of the Commission. He referred to a recent decision of the Waiwupu that the French tongue should be the official medium of diplomatic intercourse, and asked that, if not the language of the Commission, it should be placed on an equality with English in its deliberations.

M. KLEIMENOW, Consul-General and Delegate for Russia, stated that this proposal had his hearty support.

Monsieur Ratard's request was explained to the Viceroy by one of his Secretaries, but His Excellency appeared to be unwilling to express an opinion on the matter, and he almost immediately rose and left the room.

Following the Viceroy's departure the International Opium Commission held its first session, the public and Press being excluded.

Minutes of the First Session

1ST FEBRUARY, 1909

THE PROCEEDINGS commenced at 11.40 a.m. On the proposal of one of the Chinese delegates, the Hon. Lew Yuk-lin, which was seconded by the Right Hon. Sir Cecil Clementi Smith, Chief Commissioner of the British Delegation, the Right Reverend Bishop Brent, Chief Commissioner of the Delegation representing the United States of America, was unanimously elected President of the Commission.

Taking the Chair at 11.45 a.m., the PRESIDENT addressed the House as follows:—

Fellow Members of the International Opium Commission:—In electing me your Chairman, you have conferred an extraordinary honour on the Government which I represent. In behalf of the United States of America and also in behalf of my esteemed colleagues, I beg to thank you for this distinction. I cannot ignore the personal aspect of your action. Permit me, therefore, to express my appreciation of your willingness to select me as your Chairman. I am conscious of the fact that I am the junior in experience of many here present and I shall depend upon your counsel and aid to fulfil the functions of my office. As I interpret the position of Chairman, he is a momentary leader, and a leader is but the foremost companion. As far as in me lies, I shall strive to deal impartially and wisely with the various questions that shall arise, but I am well aware of my limitations. I recognize, however, that in any deliberative assembly there must exist between the Chair and the assembly the heartiest co-operation and desire to afford mutual help, so I shall constantly look to this honourable assemblage for that support and aid which the Chair will need. The high privilege of such a position as that in which I have just been inducted entails heavy responsibility. I dare assume only with the support of your aid the duties involved in the privilege that you have conferred upon me.

The question that brings us together—the opium question—is an extremely difficult one and I think the very first thing that all of us should do is frankly to recognize the fact and openly to admit it. It is a great problem and we can hope to reach a successful solution of it only by facing facts and facing them squarely. We must have courage, and it seems to me that two principal features of courage are sincerity and thoroughness. All great problems go through two distinct stages. The first stage is what might be termed the emotional stage; it is based largely upon sentiment and ideals that are conceived in the inner self, sometimes more independent of facts than is warranted. In the problem before us, for a long period we have been passing through this preliminary stage—what I have termed the emotional stage. The emotional stage finds expression in agitation. We have had agitation. Now I believe we are at least midway in the second or scientific stage, when men deal with ascertained fact, and on the basis of ascertained fact reach certain conclusions of a practical character that will enable those upon whom the responsibility rests to arrive at some final conclusion.

The first steps towards this International Commission were taken some time since by the Government which I have the honour of representing. The negotiations for the establishment of the Commission have covered a considerable period of time. At first it seemed wise to restrict the nations that would take part in this investigation, or Commission of Inquiry, to those which through territorial possessions, agriculture, or commerce, were actively interested in the opium question in the Far East. Since that time the scope has been considerably widened. Countries that have not the problem in its more acute form, as in the case of my own country and that of other countries similarly situated, were by mutual consent included by the Powers already interested, so that now I think we may say we are in a very real sense an International Commission. Almost at the last moment—indeed at the very last

moment—two countries without a serious opium problem of their own were included by their expressed desire, and by the ready acquiescence of all other countries that up to date had notified their willingness to take part in the inquiry. Last summer it was decided by the American Commission—and notification was sent to all other Governments concerned—to study every phase of the opium question in their own territory, including the homeland. So that, presumably, in this International Commission, as we are desirous to ascertain all facts that will enable us to come to some satisfactory conclusion, we shall agree in the desire to receive such information as is presented regarding the various aspects of the question in all the countries represented on the Commission.

It devolves upon me to pronounce with emphasis that this is a Commission, and as those who are informed—as all of you must be in matters that pertain to International affairs of this kind—a Commission is not a Conference. The idea of a Conference was suggested, but it seemed wise to choose this particular form of action rather than a Conference, because, for the present at any rate, we are not sufficiently well informed, and not sufficiently unanimous in our attitude, to have a Conference with any great hope of immediate success. Further, this Commission is a temporary Commission as distinguished from some of the permanent Commissions already in existence, and if we were to look for the source of our origin, I think we would find it in the articles of the Second Hague Conference, which provides for such International Commissions of Inquiry where points of difference on matters kindred to that which is before us arise between the Powers. So that in all our deliberations and in all our committee work, we must bear in mind that we are to confine ourselves to facts that will enable us to reach, I trust, certain unanimous resolutions and, perhaps, some recommendations of a practical, broad and wise character in connection with those resolutions. But, if I may be permitted to make a suggestion to this assembly, it seems to me that it would be extremely wise if we were to rule out of our deliberations what might be termed useless historical questions beneath which a great deal of controversy lies hidden, and which would only tend to fog the issue. The one way to reach a satisfactory solution of a grave problem is to simplify, as far as possible, the elements of that problem, and I believe that history bears me out when I say that no great question has ever been satisfactorily settled until men have come to a realization of the fact that purely side issues, and controversial matters which do not touch the main question, must be set aside and ignored. They may be of interest, but they are of no practical importance and, indeed, are impediments in the actual working out of the main question.

I feel that I am speaking not merely for myself and my colleagues on the American Commission, but for this entire distinguished assembly, when I say that we are here to do such work as will bring the utmost credit to our respective countries and the utmost benefit possible to mankind. We must study this question in its every aspect—moral, economical, and commercial, diplomatic also, if you will—and we must study it, as I have already said, with those two phases of courage which will bring us to a happy conclusion of our labours—with sincerity and thoroughness.

Nothing more remains for me to say, gentlemen, except to announce that this International Opium Commission is now organized and ready for business.

With the consent of the Commission the Chair appointed

Mr. F. W. CAREY (Associate-Delegate for China)
to be Secretary of the Commission, and

Monsieur L. DE GIETER
to be Assistant Secretary of the Commission.

The names of the members of the several delegations were read out by the Chair as follows:—

AMERICA, U. S. OF

The Right Reverend Bishop BRENT, D.D.
Dr. HAMILTON WRIGHT.
Dr. C. D. TENNEY.

AUSTRIA-HUNGARY.

Dr. KARL BERNAUER.

CHINA.

H.E. TUAN FANG, High Commissioner
 His Honour LEW YUK-LIN.
 Mr. T'ANG KUO-AN.
 Dr. HSÜ HUA-CHING.

FRANCE.

Monsieur J. RATARD.
 „ H. BRENIER.
 „ J. CORNILLON.

GERMANY.

Dr. RÖSSLER.
 Dr. G. PERNITZSCH.

GREAT BRITAIN.

The Right Hon. Sir CECIL CLEMENTI SMITH, G.C.M.G.
 Sir ALEXANDER HOSIE.
 Mr. MACKENZIE KING, C.M.G.
 Mr. JAMES BENNETT BRUNYATE.
 Mr. R. LAIDLAW, M.P.

ITALY.

Signor R. FARAONE.

JAPAN.

H.E. TSUNEJIRO MIYAOKA.
 Dr. Y. TAHARA.
 Dr. T. TAKAKI.

THE NETHERLANDS.

Mr. A. A. DE JONGH.
 Mr. W. G. VAN WETTUM.

PERSIA.

Mr. M. D. RIZAEFF.

PORTUGAL.

Senhor O. G. POTIER.
 Commendador C. A. R. D'ASSUMPÇÃO.

RUSSIA.

H.E. Monsieur C. KLEIMENOW.

SIAM.

The Right Hon. PHYA SAKDISINIE.
 His Honour LUANG VISUTR KOSA.
 His Honour PHRA MANAS MANIT.

M. RATARD moved, and M. Kleimenow seconded, that the Commission should meet for deliberation in the afternoons only. But it was eventually agreed that a Committee on Rules and Order should be nominated, to discuss the question of hours of meeting, procedure, etc.

Sir CECIL CLEMENTI SMITH proposed that, the said Committee being an important one, each delegation should nominate one member, and that the Committee should elect its own Chairman. This was carried *nem con.* The Committee on Rules and Order was then nominated as follows:—

America, U. S. of:	Dr. HAMILTON WRIGHT.
Austria-Hungary:	Dr. KARL BERNAUER.
China:	Mr. T'ANG KUO-AN.
France:	Monsieur BRENIER.
Germany:	Dr. W. RÖSSLER.
Great Britain:	Mr. R. LAIDLAW, M.P.
Italy:	Signor FARAONE.
Japan:	H.E. Monsieur MIYAOKA.
Netherlands:	Mr. A. A. DE JONGH.
Portugal:	Senhor O. G. POTIER.
Russia:	Monsieur KLEIMENOW.
Siam:	The Right Hon. PHYA SAKDISINIE.

On the proposal of Senhor Potier, seconded by Dr. Hamilton Wright, Mr. R. Laidlaw M.P., was elected Chairman of the Committee.

The Commission adjourned at 12.45 p.m.

Minutes of the Second Session

2nd FEBRUARY, 1909

THE PRESIDENT took the Chair at 2.30 p.m.

Before the business of the meeting commenced, the Right Hon. Sir CECIL CLEMENTI SMITH, addressing the Chair, asked on behalf of himself and the members of the Commission that the President's inaugural speech might be printed *verbatim*, and copies furnished to each delegate. The President acceded to this request.

The Minutes of the previous meeting of the Commission were read by the Secretary and passed.

The following statement was made by the PRESIDENT:—

“The Chair in announcing the names of accredited Commissioners yesterday felt compelled to omit those of two members of the Chinese Delegation, viz., H.E. Jui Ch'eng and His Honour Ts'ai Nai-huang who, though properly appointed by their Government, and bearing letters from the Waiwupu, had not been reported to the convening Power. Now, however, the request has gone forward that such notification be made, so that the formality necessary to place these delegates in regular standing will be forthwith observed.”

The following telegram from the President of the United States, received the same morning, was read out by the Chair:—

“I extend to the Commissioners to-day assembled my good wishes and conviction that their labours will be of the greatest importance towards the general suppression of the the opium evil throughout the world.

“THEODORE ROOSEVELT.”

A number of telegrams addressed to the Commission by various Educational and Anti-opium Societies in the provinces of Kiangsu, Fukien and Kwangtung, were read by the Secretary (*see* Appendix: Vol. I).

At the suggestion of Dr. HAMILTON WRIGHT, it was decided that in future non-urgent telegrams addressed to the Commission should not be read, but that sufficient copies should be printed and circulated for the information of the delegates.

A recess of fifteen minutes was taken for the informal consideration of the Rules drawn up by the Committee on Rules and Order, appointed the previous day. On re-assembling, the Commission accepted the following Rules, without discussion:—

- 1.—That the Chair shall be addressed as “Mr. President.”
- 2.—That no Delegate shall continue to speak until recognised by the Chair.

The next Rule presented by the Committee read as follows:—

- 3.—That each Delegation in its turn (alphabetically) shall lay a report covering its data on the opium question before the Commission as a whole, without discussion or debate; that a sub-Commission shall then be appointed by the President from names handed in by the various Delegations, and that the several reports shall be referred to the sub-Commission for discussion and report to the Commission in plenary session. The Commission shall nominate the Chairman of the sub-Commission; the sub-Commission shall appoint its secretaries and reporter.

Mr. DE JONGH moved as an amendment that the second part, commencing “that a sub-Commission shall then be appointed,” be struck out, and the following clause substituted:—

“The International Opium Commission shall as a rule sit *in pleno*; one or more sub-Commissions may be appointed when it is apparent that previous study by a limited number of experts is necessary for successfully dealing with any specific portion of the problem under consideration.”

The amendment was supported by the Right Hon. Sir CECIL CLEMENTI SMITH, who considered that the discussion of important points could not properly be left to individual members of any delegation.

After some discussion, Mr. de Jongh's amendment was put to the vote and carried (15 to 10).

A proposal by Sir Cecil Clementi Smith that the Rules should be referred back to the Committee for revision was accepted, and the Commission adjourned at 4.40 p.m. until 11 a.m., 5th February.

Minutes of the Third Session

5th FEBRUARY, 1909

THE COMMISSION assembled at 11 a.m. The PRESIDENT announced that the Minutes of the previous meeting would not be read unless called for.

Monsieur de GIETER having given notice of his intention to resign, Monsieur de Laforcade was nominated Assistant Secretary, on the proposition of Monsieur Ratard; and Mr. True was appointed official stenographer to the Commission.

A Committee of Ways and Means was appointed, with authority to defray, and at the same time devise means for meeting, all expenditure incurred by the Commission as a whole.

The PRESIDENT then addressed the House. Taking the Report of the Hague Peace Conference of 1907, he read extracts from the instructions given by the Secretary of State for the United States to the delegates representing that Government at the Conference, and spoke briefly on the object and scope of the International Commission on Opium. He reminded the delegates that they were neither Envoys Extraordinary nor Ministers Plenipotentiary; that it was clearly laid down that none of the Governments represented would be bound to accept the conclusions or to act upon the recommendations of the Commission; consequently, they

would not in any sense commit their Governments to any definite course of action by the views which they might express, individually or collectively, during the course of the enquiry. It was their duty to thoroughly examine all questions that might come before them, and in doing so to speak their minds with the utmost freedom, otherwise it would be next to impossible to arrive at any practical conclusions, and the Commission would have failed to serve any useful purpose.

The following names, having been reported to the convening Power, were formally added to the official List of duly accredited members of Delegations :—

WU PAO-YEN,	Associate-delegate for China.
F. A. CARL,	do. do. do.
J. L. CHALMERS,	do. do. do.
F. W. CAREY,	do. do. do.
C. CLEMENTI,	Assessor for Great Britain
W. D. BARNES,	do. do. do.

As Chairman of the Committee on Rules and Order, Mr. R. LAIDLAW, M.P., presented the following report :—

The Committee met from 3.30 p.m. to 5.30 p.m. on the 2nd, and from 10.00 a.m. to 12.30 p.m. on the 4th February. The following Rules were drawn up :—

It is resolved :—

- 1.—That the Chair shall be addressed as “ Mr. President.”
- 2.—That no delegate shall continue to speak until recognised by the Chair.
- 3.—That when a vote is taken each delegation shall have only one vote. In the event of a vote being equally divided, the President shall have a deciding vote.
- 4.—That immediately upon the adoption of these Rules, the President shall call for the presentation of reports concerning the various phases of the Opium question in the territories and dependencies of their respective countries from the delegations taking part in the International Opium Commission.
- 5.—That each delegation in its turn (alphabetically) shall then lay a report covering its data on the opium question before the Commission, without discussion or debate.
- 6.—That a reasonable time shall be allowed to members of the Commission generally for the examination of the reports presented.
- 7.—That whilst the Commission will as a rule sit *in pleno*, one or more Committees may be appointed for the purpose of studying the reports referred to under Rules 4, 5, 6, or any specific portion of them, when it is apparent that previous study by a limited number of experts is necessary for arriving at a conclusion regarding any problem under consideration.
- 8.—That any Committee so appointed for the detailed study of a report, or section of a report, shall, upon the termination of its labours, report the result of its examination to the Commission in plenary session, whereupon a general discussion on the report of such Committee shall be in order.
- 9.—That the number and constitution of Committees shall in every case be decided by the Commission in plenary session, but a Committee may complete its own organisation.
- 10.—That the manner of forming Committees shall be as follows: Each delegation shall hand in the name of one of its members to the President, who from amongst them will proceed to nominate the number necessary to serve on any one Committee.
- 11.—That all proposals submitted to the Commission shall be handed to the President (or Chairman of a Committee) in writing, and a copy supplied on request to each delegation.
- 12.—That the public shall not be admitted to the Commission, but that such communications regarding the progress of the general proceedings as may be deemed useful or expedient to make public shall be made to the Press by a Committee of three to be elected for that purpose.

- 13.—That the Minutes of the plenary sessions of the Commission shall give a succinct *resumé* of their deliberations, a proof copy of which shall be opportunely delivered to the members of the Commission; and the Minutes shall not be read at the beginning of a session unless specially called for. Each delegate, shall, however, have the right to request the insertion in full of his special declarations, according to the text delivered by him to the Secretary, and to make observations regarding the Minutes.
- 14.—That the English language shall be recognised as the official language of the deliberations and acts of the Commission. The Secretary shall, with the consent of the speaker himself, see that speeches delivered in any other language are summarized orally in English.
- 15.—That each delegation shall have the right to introduce a secretary of delegation to the meetings of the Commission, providing that such secretary holds a substantive post in his Government service. Exception to this rule may be made in the case of a delegation of a country having no Consular or Diplomatic representative in China; but under no circumstances will other than *bonâ-fide* secretaries be admitted. The names of secretaries to delegations shall be formally reported to the Chair.
- 16.—That except when otherwise decided by the Commission the hours of meeting of the Commission shall be from 10.30 a.m. to 12.30 p.m., and from 2 to 5 p.m., on every day of the week except Saturday and Sunday.

Mr. LAIDLAW proposed that until all the Rules had been accepted or voted upon, each delegate should vote individually.

As an amendment, Dr. HAMILTON WRIGHT moved that “the Rules be considered and voted upon in the order in which they have been submitted by the Committee, and that each rule as adopted take effect automatically.”

This led to considerable discussion, but eventually the amendment was lost, and Mr. Laidlaw’s proposal carried.

Rules 1 and 2 having already been accepted at the last Session, Rule 3 came up for discussion. Monsieur Ratard moved the addition of the words “in questions of procedure and discipline” to the Rule, which was carried as amended.

The following Rules were passed *nem dis.*:—Nos. 4, 8, 9, 11, 12, 13, and 15.

Rule 5 was accepted with the following addition, proposed by the Right Hon. Sir CECIL CLEMENTI SMITH: “It shall be within the power of the President to allow the presentation of any report to be postponed on due cause shown.”

Sir CECIL CLEMENTI SMITH moved that Rule 6 should be altered to read as follows:—

“That a copy of each report be supplied to each member of the Commission, and a reasonable time allowed to members of the Commission generally for the examination of the report presented; and that thereafter the President shall call upon the Commission to discuss any report that may be ready for investigation.”

This was passed *nem con.*

Dr. RÖSSLER moved as an amendment to Rule 7 that the words “whilst the Commission will as a rule sit *in pleno*” be deleted, and that the word “delegates” be substituted for “experts.” After a further amendment by Mr. de Jongh had been negatived, the Rule as amended by Dr. Rössler was passed.

Sir CECIL CLEMENTI SMITH proposed the following addition to Rule 10:—

“That any delegate who is not himself a member of the Committee may attend the sittings of such Committee without taking part in any of its proceedings.”

The Rule was carried with this addition.

On the motion of Monsieur RATARD, Rule 14 was altered to read as follows:—

“That both English and French shall on principle be recognised as the languages to be used in the Commission, and that steps shall be taken to ensure that the deliberations be rendered, if necessary, and the Minutes recorded in both languages.”

The Rule was accepted as altered.

With reference to Rule 16, Dr. TENNEY moved that the Commission should also sit on Saturday mornings, but the proposition was negatived when put to the vote.

As finally adopted by the Commission, the *Rules of Procedure* read as follows:—

It is resolved:—

- 1.—That the Chair shall be addressed as “Mr. President.”
- 2.—That no delegate shall continue to speak until recognised by the Chair.
- 3.—That when a vote is taken each delegation shall have only one vote. On questions of procedure or discipline, the President—in the event of a vote being equally divided—shall have a deciding vote.
- 4.—That immediately upon the adoption of these Rules, the President shall call for the presentation of reports concerning the various phases of the opium question in the territories and dependencies of their respective countries from the delegations taking part in the International Opium Commission.
- 5.—That each delegation in its turn (alphabetically) shall then lay a report covering its data on the opium question before the Commission, without discussion or debate. It shall be within the power of the President to allow the presentation of any report to be postponed on due cause shown.
- 6.—That a copy of each report shall be supplied to each member of the Commission, and a reasonable time allowed to members of the Commission generally for the examination of the report presented: and that thereafter the President shall call upon the Commission to discuss any report that may be ready for investigation.
- 7.—That one or more Committees may be appointed for the purpose of studying the reports referred to under Rules 4, 5, 6, or any specific portion of them, when it is apparent that previous study by a limited number of delegates is necessary for arriving at a conclusion regarding any problem under consideration.
- 8.—That any Committee so appointed for the detailed study of a report, or section of a report, shall, upon the termination of its labours, report the result of its examination to the Commission in plenary session, whereupon a general discussion on the report of such Committee will be in order.
- 9.—That the number and constitution of Committees shall in every case be decided by the Commission in plenary session; but a Committee may complete its own organisation.
- 10.—That the manner of forming Committee shall be as follows: Each delegation shall hand in the name of one of its members to the President, who from amongst them will proceed to nominate the number necessary to serve on any one Committee: any delegate who is not himself a member of a Committee may attend the sittings of such Committee without taking part in any of its proceedings.
- 11.—That all proposals submitted to the Commission shall be handed to the President (or Chairman of a Committee) in writing, and a copy supplied on request to each delegation.
- 12.—That the public shall not be admitted to the Commission, but that such information regarding the progress of the general proceedings as may be deemed expedient to make public shall be communicated to the Press by a Committee of three to be elected for that purpose.
- 13.—That the Minutes of the plenary sessions of the Commission shall give a succinct *résumé* of the deliberations, and that a proof copy shall be opportunely delivered to the members of the Commission; and the Minutes shall not be read at the beginning of a session unless specially called for. Each delegate, shall, however, have the right to request the insertion in full of his special declarations, according to the text delivered by him to the Secretary, and to make observations regarding the Minutes.

- 14.—That both English and French shall on principle be recognised as the languages to be used in the Commission, and that steps shall be taken to ensure that the deliberations be rendered, if necessary, and the Minutes recorded in both languages.
- 15.—That each delegation shall have the right to introduce a secretary of delegation to the meetings of the Commission, providing that such secretary holds a substantive post in his Government service. Exception to this rule may be made in the case of a delegation of a country having no Consular or Diplomatic representative in China; but under no circumstances will other than *bond-fide* secretaries be admitted. The names of secretaries to delegations shall be formally reported to the Chair.
- 16.—That, except when otherwise decided by the Commission, the hours of meeting of the Commission shall be from 10.30 a.m. to 12.30 p.m., and from 2 to 5 p.m., on every day of the week except Saturday and Sunday.

The Commission adjourned till 2 p.m. On re-assembling, the President selected three delegates to act as a Press Committee (Rule 12).

In accordance with Rules 4 and 5, the President announced that the House was ready to receive Reports from the several Delegations. Dr. HAMILTON WRIGHT, on behalf of the United States Delegation, presented a Report on the Opium Question as it affected the States, Territories, District of Columbia, and Possessions under the American flag. He summarized the data given under the following heads:—

NATIONAL.

Treaties with other Governments in regard to opium traffic.
 Tariffs under which opium is imported into the United States, its Territories and the District of Columbia.
 Excise Laws, governing the manufacture of Smoking Opium.
 Statutes that restrain American citizens from engaging in the Opium trade.
 Effect of Treaties and Tariffs on the trade in Opium.
 Opium, whence obtained.
 Smoking Opium, and the Chinese population in United States.
 Growth of the Poppy within the United States, its Territories and the District of Columbia.
 Disposition of imported Opium.
 Federal, State and Municipal Laws, governing the use of Opium and its derivatives.
 Final Destination of Opium imported into the United States ostensibly for medicinal purposes.
 Final Destination of imports of Smoking Opium.
 Recent Effect of National, State and Municipal laws bearing on Opium and its derivatives.
 Revenue derived from import and excise duties on Opium.
 Present Status of laws on Opium of various sorts.

PORTO RICO

CUBA

INTERNATIONAL.

Measures needed to make recent home Law effective.

Dr. HAMILTON WRIGHT referred to the Bill that had just been passed by Congress, which he summarized as follows:—

Sec. 1.—After April first, 1909, it shall be unlawful to import into the United States opium in any form, or any preparation or derivatives thereof, except that opium and preparations thereof other than smoking opium or opium prepared for smoking, may be imported for medicinal purposes only, under regulations which the Secretary of the Treasury is hereby authorized to prescribe, and when so imported it shall be subject to the duties which are now or may hereafter be imposed by law.

Sec. 2.—If any person shall assist in importation or receive, buy or sell prohibited opium or derivatives, such opium shall be forfeited and destroyed, and the offender shall be fined not exceeding five thousand dollars nor less than fifty dollars, or imprisoned not more than two years, or both. Possession of such opium or derivatives thereof to be deemed sufficient evidence to authorize conviction unless defendant explain possession to the satisfaction of the jury.

He said that they were justified in feeling, so far as the United States itself was concerned, that they were capable of enforcing the provisions of this bill. The Government could keep without its borders all opium that was not required for legitimate medicinal purposes. Nevertheless, it was the desire of the Government that countries immediately adjacent to the United States should take similar measures in regard to opium as they had done.

During the reading of the American Report the President vacated the Chair, which at his request was taken temporarily by the Chief Commissioner for Great Britain.

The Right Rev. Bishop BRENT presented a report on the opium question in the Philippine Islands. In the course of his remarks he stated that the chief difficulties encountered by the Government in carrying out prohibitory legislation were—

- (1) Inadequate facilities, neither sufficient money nor men being provided for the vigorous enforcement of the law: and
- (2) The ease with which opium could be smuggled. There was a constant supply of contraband opium coming into the Islands from Hongkong, Singapore and British North Borneo, and without International co-operation it would be impossible to control such smuggling.

The Right Hon. Sir CECIL CLEMENTI SMITH followed with a report explaining the Regulations and Restrictions in force with regard to Opium and Morphine in Great Britain, Australia, Hongkong, Ceylon, the Straits Settlements and Weihaiwei.

H.E. TSUNEJIRO MIYAOKA, in submitting a report on the Opium question in Japan and Formosa, said:—

“In a note which was addressed by the United States Chargé d’Affaires, July 14th, 1908, to H.I.J.M.’s Minister for Foreign Affairs it was stated that the subject which would come up for the consideration of this International Commission was being investigated by the United States Commissioners, and that as far as they were concerned the investigation related to—

- “1.—The importation of crude opium, its derivatives and *chandu* ;
- “2.—Internal consumption of crude opium, both licit and illicit ;
- “3.—Internal manufacture and use of *chandu* ;
- “4.—Manufacture of morphia and other derivatives ;
- “5.—Use of the crude drug and preparations ;
- “6.—Use of morphia and other derivatives, both licit and illicit ;
- “7.—Extent of poppy cultivation in America ;
- “8.—Possibilities of poppy cultivation ;
- “9.—Federal laws regarding the importation of opium ;
- “10.—Municipal laws governing the use of opium and its derivatives.

“It was not possible for us to pursue precisely the programme laid down, but we have followed the general outline of the investigation suggested by the United States Government. I will not trouble this Commission by reading the whole of our Report, but I will state the general principles on which it is based.

“We have divided the subject of our inquiry into Japan Proper and Formosa. The manufacture of opium for medicinal purposes is entirely in the hands of the Government. There are three chemical laboratories maintained by the Central Government—one in Tokyo, one in Osaka and one in Yokohama. These three medical laboratories are under the control of the Minister of Home Affairs. Of these three laboratories, the one in Tokyo, of which my esteemed colleague Dr. Tahara is the Director, is the only laboratory where the manufacture of opium for medicinal uses is conducted. You have here, therefore, the only man who is responsible for the production of opium for medicinal purposes in Japan.

"In Japan proper, when the medicinal uses of opium became known to us, it was our intention, if possible, to produce the opium necessary for medicinal purposes in Japan. For that purpose the cultivation of poppy was encouraged; but we soon found out that the climate did not suit the plant, and there is now very little cultivation of poppy in Japan.

"Now, as regards Formosa, the cultivation of poppy is absolutely prohibited. The government of Formosa imports the crude opium required for making smoking opium. That is strictly under the control of the Government, and in this report we have presented full statistics relating to the number of consumers, the amount of opium consumed and all other possible subjects which appear to us to be of importance, having in view the line of investigation which has been suggested by the United States."

The Chair decided that questions on matters of fact in connection with the reports presented should be deferred until sufficient time had elapsed for studying the Reports.

The Commission adjourned at 4.30 p.m.

Minutes of the Fourth Session

8th FEBRUARY, 1909

THE PRESIDENT took the Chair at 10.30 a.m. H.E. Tsunejiro Miyaoka called attention to an ambiguity in the Report on Japan: page 27. Under "Purchases and Sales," the quantities given are in Kilos, the decimal point being carried to three places.

Dr. TENNEY enquired if the Japanese Delegation intended to present any report dealing with the opium question in Corea. Monsieur Miyaoka, in reply, stated that Corea had been omitted from the Japanese Report by an oversight, but that enquiries were now being made, and the necessary information would be supplied later.

The PRESIDENT remarked that questions of the kind propounded by Dr. Tenney should be handed to the Delegation concerned in writing.

Mr. T'ANG KUO-AN presented a Report on opium for China, and dealt *seriatim* with the subjects referred to under the different headings, *e.g.*, Cultivation of Opium; Production and Consumption; Morphia; Anti-Opium Remedies; Anti-Opium Measures.

He acknowledged the shortcomings of the Memorandum, but described the difficulties that had to be contended against by his Delegation in compiling it. Owing to the absence of any proper Government machinery, it was well-nigh impossible for them to obtain reliable statistics of the area of land under cultivation, and no attempt had been made to arrive at any conclusion in that respect. Mr. T'ang explained the discrepancies that appear between the estimates of Morse and Leech, and those based on Customs Reports. With regard to the figures reported by the Board of Revenue, he stated that about 25 per cent of the total quantity of opium produced in China escaped taxation, and that the Imperial Exchequer received not more than one-third of the revenue actually collected, the remaining two-thirds being retained by the different provinces for local administrative purposes. Referring to the figures under "Consumption," he acknowledged that 50 million might be considered an under-estimate of the total adult male population of China, but that the actual number was immaterial: no manipulation of figures could alter the fact that more than 600,000 piculs of opium were consumed annually within the Empire up to the year 1906.

Speaking of morphia, Mr. T'ang said that enormous quantities of the drug were being imported clandestinely into China, and he quoted figures from the Memorandum in support of his statement. He also indicated the necessity for immediate action to curtail the spread of so-called anti-opium remedies amongst the people, as most of these nostrums contained opium in some form or other. He reviewed the progress of the anti-opium campaign in the different provinces, and the results that had attended official and public action. He described the task before them as stupendous, and declared that the Chinese people were grappling earnestly with a problem greater than any that had ever confronted a nation in the history of the world.

Mr. Tang considered that on the whole the situation in China with regard to the opium evil was distinctly encouraging, and he concluded by expressing the hope that the movement initiated by China's late Rulers in their memorable Edict of the 20th September, 1906, would be brought to a successful conclusion.

In presenting a Report for Germany (including Kiaochow), Dr. RÖSSLER said:—

"I am in the happy position to present a short report as we have not to face a serious opium problem, either in Germany or in our Far Eastern Colony. As regards the German Empire the poppy is grown for the sake of its seed which is used in bakeries, and for the production of oil; but opium is not produced from it to any extent worth mentioning. No special laws exist regarding the cultivation and the manufacture of opium. The importation of opium is duty free, no taxes of any kind are levied thereon. The right of selling opium and its derivatives for medical purposes is confined to apothecaries; for other than medical purposes it may be sold by persons holding a license, but certain conditions, of course, have to be observed. The importations have been constantly increasing since 1901 and amounted to 68,700 kg. in 1905. The principal importations were from Turkey in Asia and France. About one-fifth are re-exported, mainly to the United States of America.

"As regards Kiaochow, the cultivation of the poppy has been prohibited since the territory came under German administration. The importation of prepared opium is likewise prohibited and the sale of the drug is kept under strict control. Keepers of divans, retail dealers and private smokers have to take out licenses. The importations are small and mainly for local consumption; in 1907 they amounted to 1.43 piculs. About 2.6 per cent of the population are opium smokers. The revenue derived from opium was about 1.3 per cent of the total revenue in 1906-7."

The PRESIDENT announced that in accordance with Rule 15, the names of the following Secretaries had been formally reported to the Chair:—

America:	Mr. H. F. HAWLEY.
Japan:	Mr. KEIZO YOKOYAMA.
Persia:	Mr. B. A. SOMEKH.
France:	Mr. NAVIER DE LAFORCADE.

The Chief Commissioner of the Netherlands Delegation, Mr. A. A. DE JONGH, presented a Report concerning the Opium question in Netherlands-India, and a Memorandum on the Opium Monopoly in that Colony, together with two small boxes containing a set of samples illustrating the packing system employed. His statement is as follows:—

"In presenting the report of the Netherlands Delegation, I beg to state that it gives summary information on the opium question in Netherlands-India, under the headings which were suggested by the American Government as a practical way of dealing with the subject.

"We have not thought it advisable to bewilder the Commission with a mass of statistics, but we are ready to give such additional information as may be desired, and as is in our possession.

"Of the five Appendices to our Report, No. III, which is the Opium Monopoly Ordinance for Java, is the most important one to the Commission. It contains the rules for our Régie system, which may possibly serve as an example to other Powers who are desirous of putting the sale of opium under effective Government control.

"It may be mentioned here that the President of the Philippine Opium Commission of 1903, which studied all the opium systems in the Far East, told me that in his opinion our Java system was the very best, both for the benefit of the people and in the interests of the Treasury.

"To facilitate the study of our system, we beg to add to our report a separate Memorandum, in which are given more details than are to be found in the ordinance, and some statistics showing the cost price of monopoly *chandu*, the net profits of the Régie as compared with those under the farm system, and the decrease in the use of opium per head of the population from 1894 to 1908, being a period of fifteen years."

The Commission adjourned at 12.30 p.m. On re-assembling at 2 p.m., Monsieur MIYAOKA moved the following resolution:—

“ That as far as practicable notice of reports, questions or propositions to be submitted, and of speeches or remarks to be delivered, shall be given to the Chair in advance, in order that the latter may be in a position to announce before the adjournment of each session the order of business which is likely to engage the attention of the Commission at the following sitting.”

A short discussion followed. Sir Cecil Clementi Smith suggested that the words “ speeches or remarks ” should be left out of the resolution, and Monsieur Ratard concurred in thinking that it would be impossible to notify in advance the nature of any speeches it might be necessary to deliver. Dr. Hamilton Wright spoke in favour of the resolution, which, however, was lost on being put to the vote.

A report on the opium question as it concerns Siam was submitted by the Right Hon. PHYA SAKDISINIE, Chief Commissioner of the Siamese Delegation. He said that in Siam the manufacture and sale of opium was and had been for a long time under Government supervision. It was formerly administered by an opium farm, but since January, 1907, had been controlled directly by the Opium Régie. He stated that practically no opium was imported into Siam, except as supplies for the Government factory, and that the country itself produced no opium. The licit use of morphine and other derivatives was confined to medicinal purposes, and the illicit use of morphine, in the form of hypodermic injection, was rarely met with. The Right Hon. gentleman affirmed that the aim of his Government was to ultimately suppress the use of opium altogether; but they intended to follow a conservative policy, and not to venture on experiments that might prove disastrous to the revenue of the State without helping towards the desired end.

The Commission adjourned at 3 p.m. until Wednesday, 10th February.

[NOTE.—The official stenographer, Mr. True, was taken seriously ill on the 8th February, and the Commission was without the services of a stenographer until the 15th February.]

Minutes of the Fifth Session

10th FEBRUARY, 1909

ON the Chair being taken by the President at 10.30 a.m., Mr. J. B. BRUNYATE rose to present a report on the opium and morphine question as it concerns India and Burma. Reviewing *seriatim* the various sections of the report, he elucidated, and occasionally amplified from personal knowledge, those points which he desired to bring more particularly to the notice of the Commission.

Dealing first with the question of morphine, Mr. Brunyate stated that the morphia habit was of comparatively recent growth in India, and as soon as the attention of the Government had been attracted to the use of the drug for other than medicinal purposes steps were taken to hinder any further expansion. Its use was confined principally to the large centres of population, and it did not seem to grow in favour with such rapidity as cocaine, against which, it might be mentioned, prohibitory action had also been taken. The quantity of morphine which any one individual might legally possess—and then only for medicinal purposes—was now limited in India to 10, and in Burma to 5, grains. The possession of morphia by medical practitioners and druggists had also been regulated.

Turning to opium, Mr. Brunyate, after a preliminary reference to the activity of recent Opium Administration in India, began his analysis of the subject by an examination of the conditions of production, manufacture and trade. He distinguished between opium grown in territories under the direct control of the Government and that which is produced in those Native States which have continued to exercise the right of cultivating the poppy. In the former case, steps had been taken in the direction of reducing cultivation in anticipation of and

during the currency of the expected Agreement with China, and a more than proportionate diminution of area had already been effected. In the latter case, the action of the Government is confined to regulating exports within the permitted limits. He alluded to the difficulty of finding remunerative crops in substitution for poppy in the Malwa States and to the fact that the large stocks of opium in the hands of traders at the time that the Agreement became operative further enhanced the difficulty in dealing with the question of cultivation in that area, the existing supply being sufficient, without further production, to provide the exports for a large part of the ten-year period.

The purchase of the Bengal (*i.e.*, Patna and Benares) drug from the licensed cultivator, and its subsequent manufacture, were in the hands of the Government, and trading interests did not arise until the sale of the drug for export at Calcutta, or for consumption in India to licensed vendors. In the case of Malwa opium, a succession of important commercial interests was involved in the passage of drug from the cultivator, until it reached the hands of the large export firms in Bombay, and was thence distributed to associated firms in the Far East.

In giving the recent figures for the quantity of opium exported from India to foreign countries, Mr. Brunyate pointed out that these were no longer an index to the future dimensions of the trade, as by the Agreement which became operative from the 1st January, 1908, between His Majesty's Government and China, the total volume of exports was limited to—

61,900	chests in	1908.
56,800	„	1909.
51,700	„	1910.

It had further been agreed that, if during these three years the Chinese Government duly carried out their arrangements for diminishing the production and consumption in China itself, His Majesty's Government undertook to continue this annual diminution in the same proportion after the period in question, the restriction of the imports of Turkish, Persian and other opium into China being separately arranged for by the Chinese Government and carried out simultaneously. Thus, at the end of ten years, when the Agreement would have produced its full intended effect, the permissible export of India opium to countries other than China would stand at a fixed maximum of 16,000 chests a year.

This Agreement had been accepted by the Chinese Government in January 1908, with an expression of deep gratitude to His Majesty's Government; and the Waiwupu, after a year's experience had recently communicated to His Majesty's Minister at Peking their continued and entire satisfaction with the arrangement.

Mr. Brunyate next dealt with the questions of the Excise Administration and the Consumption of Opium in India, first sketching the main provisions of the Opium Act of 1878 by which, and the rules made thereunder, the use of the drug in India was now regulated. Summarising the general restrictions more or less uniformly applicable in all provinces, he mentioned that the sale of *smoking* preparations was absolutely prohibited (except in Burma), as also the consumption of opium in any form in a licensed opium-shop. The private possession of opium by individuals was limited in the majority of provinces to 540 grains, and in a few provinces to 900 grains, while no person (except in Burma) was allowed to possess *smoking* preparations of opium, even prepared by himself, in excess of 180 grains weight.

After mentioning that the common method of using opium in India was by swallowing the crude drug, Mr. Brunyate stated the broad facts connected with the distribution of the habit in India, and the purposes for which opium was employed in addition to its use as an indulgence. He next subjected the statistics of recorded consumption of opium in each province for a series of years to analysis, and pointed out that a large part of the increase which had occurred in the last two or three years could be definitely accounted for by the smuggling of opium into Burma, where a policy of prohibition is in force in regard to the Burman population. The total recorded annual consumption of British India, excluding Burma, now stood at the equivalent of about eight thousand chests of export opium.

Mr. Brunyate then proceeded to describe more fully the stages through which the policy of prohibition adopted by the Government in Burma had passed, and its results. The experiment, which seemed to him an exceedingly interesting one, had now extended over fifteen years and its results, as exhibited in the statistics of recorded consumption, had been an immediate and heavy fall in consumption at the outset followed by a large and rapid increase up to a few years ago. Since then the figures had shown a definite tendency to progressive decline. Smuggling, it was explained, had existed with little check in the beginning, but revised arrangements, including strict supervision over sales, and the creation of a strong preventive establishment, had subsequently led to an increased resort to licit modes of supply.

These measures, however, had still left it possible for opium to be purchased by those consumers to whom the prohibitive policy does not apply (i.e., Indians and Chinese), and to be illegally retailed by them to the excluded Burman. During the last few years this question had been seriously taken up. Measures had been adopted to ascertain the true consumption of individual consumers, and to limit their supplies to their own personal requirements. The effect of this was traceable in the decline of consumption since 1904-5. Reviewing the whole experiment, he believed that in Upper Burma the opium habit had been kept well in hand. In Lower Burma success appeared to be in sight. It remained, however, to be seen whether the further steps now being taken in the two Bengals, as well as in Burma, would effectively meet the difficulty arising from smuggling. It was necessarily difficult to produce precise statistical evidence as to the proportion of Burmans who were actually, though illegally, consumers of opium, but the jail statistics would serve to throw some light on the point. In the ten years preceding the introduction of the policy of prohibition, the average percentage of consumers among the jail population had been 20.39. In the first eight years of prohibition the average percentage fell to 16.69, the general tendency being downward though there was a slight rise in the middle of the period. In the four years which followed the improvement of the original arrangements early in 1902, the average fell to 12.8 per cent, and in 1905, the latest year for which he was able to produce the figures, it stood at 12.12.

Continuing, Mr. Brunyate referred to the important revenue derived from the use and export of opium by the Native States in Central India and Rajputana, and by the Indian Government. The bulk of the revenue derived by Native States from opium was due to the assessment, at relatively high rates, of land capable of producing the poppy. There was also a large number of miscellaneous taxes, some of which, however, yielded only small amounts. The Indian Government derived a revenue of nearly £1,000,000 a year from the use of opium within India itself, from which there must be deducted such share of the cost of the general excise establishments as might be considered attributable to the administration of opium. The total revenue derived from exports during the last two or three years, before reductions began to be effected in co-operation with China, had been about 3¾ millions sterling annually, of which a little under three millions might be regarded as due to the exports to China. The latter figure would be somewhat lower were a longer period taken in calculating the average.

Mr. Brunyate concluded his explanatory statement by quoting the words in which His Excellency the Earl of Minto, Viceroy and Governor General of India, had publicly referred to the intended co-operation with China, on its announcement in connection with the discussion of the Budget Statement of the Indian Government in March 1907:—

“At first sight I grant that China’s proposals are very alarming as to their possible effects on the Indian revenues. But I am afraid I am unable to follow the” . . . “sweeping assumption that India is about to be sacrificed for the pleasure of a few faddists. Neither do I think we are entitled to doubt the good faith of the Chinese Government as to the objects of their proposals. Papers which I have had recently before me indicate every intention on the part of China to reduce with a strong hand the consumption of opium and the growth of the poppy in her own territory. I am no opium faddist. I quite admit the hardship a proscription of opium would entail on those who use it in moderation, as many in this country do, and I am well aware of the difficulties surrounding any attempt to reduce its production. But there is no doubt throughout the whole civilized world a feeling of disgust at the demoralizing effect of the opium habit in excess. It is a feeling in which we cannot but share. We could not with any self respect refuse to assist China on the grounds of loss of revenue to India”. . . . “I admit that the task China has set herself may be greater than she can accomplish, and that we have a perfect right to require that in agreeing to the reduction of imports from India we should be satisfied of the results of China’s efforts to reduce her own internal opium production. But, notwithstanding the prospect of a heavy loss in revenue, I hope we may accept”. . . the . . . “view that, provided the transition state through which we must pass is spread over a sufficient number of years, we need apprehend no financial disaster.”

The Commission adjourned for the mid-day recess at 12.45 p.m.

On the members re-assembling at 2.15 p.m., Monsieur RATARD placed on the table a report relating to the use of opium and its derivatives in France. He quoted some figures showing the net importation of the drug into that country and the average individual consumption, and pointed out that these were not of a nature to give the least cause of anxiety to his Government. Continuing, Monsieur Ratard described the steps taken by the French

Municipal Council, since the issue of the prohibitory Edicts, to reduce opium smoking in the French Concession at Shanghai. The closing of the divans, all of which are registered and under police supervision, was deemed impracticable as long as the sale of opium continued to be permitted. To mention one of several reasons—it was considered that the danger of conflagrations in the Concession would increase in proportion to the number of individual smokers who would be driven to use opium lamps in their own homes. Consequently, the plan adopted was to increase the Municipal taxes payable by each divan (according to the number of couches on the premises) up to the point when—no profit being possible—these establishments would close of their own accord. The amount of the tax had already been doubled twice during the past two years, the result being a decrease of 5 per cent in the number of licensed establishments, and of 28 per cent in the number of couches in actual use.

Monsieur RATARD spoke in French, and his remarks were rendered into English by Monsieur BRENIER, who then proceeded to summarize briefly the data contained in a report presented by his Delegation on the opium question in French Indo-China. He said that the traffic in opium was a Government monopoly, and the importation, manufacture and sale of the drug were strictly controlled. Practically no opium was grown in French Indo-China except in those districts bordering on the Chinese frontier, and even there the production was sporadic and insignificant. Generally speaking, the soil and climatic conditions of the colony were unfavourable to poppy cultivation. Monsieur Brenier stated that the opium habit was confined almost entirely to the richer classes among both the Chinese and Annamese, and concluded his remarks by mentioning that the revenue derived from opium constituted about one-sixth of the Colonial budget.

The French report, having been laid on the table, Senhor O. G. POTIER, the senior representative for Portugal, addressed the Chair as follows:—

“Mr. President.—I have the honour to present my Memorandum concerning the opium question. I regret that this Memorandum is not quite complete: it covers mainly the opium trade of Macao. Up to the present, I have not received from my Government any information and data concerning Portugal and her Colonies. As soon as they reach me, I shall have pleasure in presenting them in an additional Memorandum.

“Beyond what is contained in the Memorandum, the Portuguese Delegation has no other remarks and important points to offer for the consideration of their honourable colleagues.

“I beg leave to hand you a resumé of our Memorandum, which is in the hands of the printer and will soon be circulated.”

The PRESIDENT expressed the hope that those reports not yet before the Commission would soon be forthcoming.

The Delegations for Austria-Hungary, Persia, and Portugal respectively informed the Chair that their reports would be ready for presentation on Friday.

Mr. DE JONGH moved the following resolution:—

“That in Article 16 of the Rules regulating procedure the words ‘2.30 to 5.30 p.m.’ be substituted for the words ‘2.00 to 5.00 p.m.’”

As an amendment, Monsieur RATARD proposed that the alteration should read 2.30 to 5.00 p.m. Mr. de Jongh withdrew his resolution in favour of Monsieur Ratard’s amendment, which on being put to the vote was accepted by the Commission.

The Delegations for China, Japan and the Netherlands promised to prepare replies to questions handed to them by Mr. R. Laidlaw, M.P.

(N.B.—*All questions and answers will be found at the end of the report of the country they concern.*)

At 3.30 p.m., the Right Hon. Sir CECIL CLEMENTI SMITH suggested an adjournment until Friday morning (12th February) in order that delegates might have time to study the reports already in their possession. This proposal meeting with approval, the Commission adjourned.

Minutes of the Sixth Session

12th FEBRUARY, 1909

THE PRESIDENT took his seat at 10.30 a.m. Dr. Karl Bernauer presented a report on opium and its use in Austria-Hungary, where the problem is not acute, and he was followed by Mr. M. D. Rizaeff, who read a brief Memorandum (prepared by the Secretary to the Persian Delegation, Mr. B. A. Somekh) dealing with the opium question as it concerns Persia, and declared his willingness to supply any further information in his power.

On behalf of the Russian delegation and himself, Signor FARAONE proposed an amendment to No. 5 of the Rules of Procedure, *vis.*:

“That after the words ‘due cause shown’ the following clause shall be added: ‘and pending such presentation the work of the Commission shall continue.’”

This resolution was adopted by the House, after which the discussion of the report on China was declared to be in order.

Sir ALEXANDER HOSIE handed some questions (*vide* Vol. II: China Report) to the Chinese Delegates relative to their report, and spoke as follows:—

“There is no Member of this Commission more in sympathy than I am with the desire and aim of the Government of China to eradicate the cultivation of the poppy and the consumption of opium in China, for it has been my lot to reside and travel for years in the chief opium-producing centres of the Empire, in Szechuan, Yünnan, and Kueichow, and to have had personal contact with the wretchedness, poverty, misery, and evil which the abuse of opium has brought to the people of these three Western provinces. I trust, therefore, that in putting some questions in regard to statements made in the Memorandum on Opium presented to this Commission by the Chinese Delegates, and in calling attention to points that appear to the British Delegation to require elucidation, I shall be exonerated from the charge of carping criticism, and that it will be understood that my sole object is to arrive at facts which are intended to assist—not to embarrass—China in carrying out the gigantic task which she has set herself to accomplish.

“Mr. T'ang, in presenting the Memorandum, disarmed serious criticism by stating that it had been impossible to procure or present returns of the acreage under poppy, or of the number of smokers. Acreage was called for by the Imperial Decree of June 26th, 1907, and by Regulations approved by Imperial Decree on the 23rd of May, 1908, the provincial authorities were called upon to direct the local authorities to make returns within six months of the area of land under poppy, for transmission to the Ministry of Finance and the Ministry of the Interior; and by the same regulations the provincial authorities were instructed to obtain from their subordinates the number of opium smokers, before the end of the year, for transmission to the same Ministries for purposes of record. The wording of the Imperial Decree in regard to acreage is as follows:—‘It is also commanded that an annual return of the land under opium cultivation be made, by way of verification and to meet the desire of the Court to relieve the people of this evil.’ Such returns have not been laid before this Commission, and the British Delegation would ask the Chinese Delegates whether they are in a position to state that Returns of Acreage and Smokers will be made for each province and duly published as official documents. Mr. T'ang might have informed the Commission with equal truth that it was impossible to furnish an official reliable return of the production of opium in China; but an attempt has been made to arrive at a rough estimate of production, and to draw a comparison between the output of 1908, and 1906, when the Imperial Decree was issued; but this rough approximation of production loses much of its value as it is admitted in the Memorandum that, as regards the inland provinces—the greatest opium-producing districts in China, where the taxation is irregular and for the most part evaded, and where public or official returns are practically unknown—the estimate is merely patchwork. Attempts have also been made to arrive at the number of smokers, and their percentages of the population and of adult males; but, based as they are on figures admittedly unreliable, the result is necessarily of inconsiderable value.

“Before, however, coming to production and consumption, I should like to draw the attention of the Commission to pages 5 and 6 of the Chinese Memorandum, where a table is given of the distribution of foreign opium, from which it is deduced that the only provinces

showing an increase in the consumption of foreign opium in 1908, as compared with 1906, are Kiangsi and Anhui. This, I think, is somewhat misleading, for as soon as opium has paid duty and likin at any port in China, and the balls have been labelled and certificated by the Customs, they may be carried by Chinese into any province in the Empire without again coming under the cognisance of the Imperial Maritime Customs; and to say, for example, that the net import of 16,996 piculs of foreign opium into the ports of *Shanghai*, *Chinkiang*, and *Nanking* was all consumed in the province of Kiangsu is altogether misleading. Certificated opium finds its way from one province to another by inland channels uncontrolled by the Imperial Maritime Customs.

“Another point to which I would call attention is the opium revenue table on page 10 of the Memorandum. What is the total revenue derived from Native opium? The duty and likin (or rather a tax collected *in lieu* of transit dues) given in the table represent merely the share of the taxation on native opium which falls to the Imperial Maritime Customs. The latter, in addition, collected and handed over to the Native Collectorates in 1906:—

	Haikuan Tls.	369,997	as	<i>Kaochüan</i>	and
	K'up'ing	„	641,864	„	<i>T'ung-shui</i>
and in 1907	K'up'ing	„	827,232	as	<i>T'ung-shui</i> .

“These are paltry sums compared with the actual sums collected, for we know that 51,827 piculs of native opium arrived at *Ichang* from Western China in 1908, and we know that this opium was liable, in addition to other provincial taxation, before or on arrival at *Ichang* to a consolidated provincial duty of 115 K'up'ing taels a picul, or a total of K'up'ing Taels 5,960,105, a sum in excess of the total revenue derived from foreign opium during the year. It may here be noted that the native opium which found its way down river from Western China to *Ichang* by this one route exceeded the net import of all foreign opium into China in 1908 by 3,430 piculs. This tax of 115 K'up'ing taels is not levied on opium produced and consumed in the provinces of Szechuan, Yünnan, and Kueichow or in Manchuria, where lighter taxation prevails, and I ask the Chinese Delegation if they are able to furnish the Commission with the total amount of the taxation of native opium in any recent year.

“I come now to the question of opium production in China, a subject which has occupied many minds for many years. At page 15 of the Memorandum presented by the Chinese Delegation, some estimates for recent years are given—by Mr. Morse for 1905, Mr. Leech for 1907, the Board of Revenue for 1906, Customs Returns for 1906, and Customs Returns for 1908. I eliminate from these Mr. Leech's estimate which, with two exceptions, is the same as Mr. Morse's whereon it was based, and the estimate of the Board of Revenue, which is admitted to be altogether unsatisfactory and untrustworthy, and has been challenged in an outspoken memorial by the Tartar General stationed at *Ning-hsia* in the province of Kansu; and I ask the Chinese Delegation when the Customs estimate for 1906 was compiled. Was it compiled in 1907, or at the end of 1908 along with the estimate for that year? There is, I think, internal evidence to show that the latter was the case, and that both estimates were compiled at one and the same time. For the moment one instance will suffice. At page 18 the province of Anhui is dealt with. The Commissioner of Customs at *Wuhu*, the only port open to foreign trade in that province, estimates the annual production of Anhui to be not less than 3,000 piculs at the present time, and he states that there has been a reduction in the area under poppy cultivation in *some* districts of from 50 to 80 per cent. The compilers of the Memorandum then say that the estimate is consequently doubled for 1906. Such reasoning to my mind is perfectly illogical, for we have been informed that the area or acreage under poppy is an unknown quantity, and a conclusion based on the alleged reduction of an unknown area is of very little value. In other cases the estimate of production in 1908 is deduced by cutting down the estimated production of 1906 by certain percentages. For example, it is stated that the production of Yünnan has been reduced since 1906 by over 50 per cent., and that, as Kueichow is under the same Viceroyalty, it is reduced by one-third. Again, although there is no connection between Yünnan and the provinces of Szechuan, Shensi and Kansu, it is argued that because Yünnan production has been curtailed by one-half the output of the other three provinces has each been reduced by one-third. It is really unnecessary to take up the time of this Commission with multiplying such cases, but it is well to point out that from deductions such as these the conclusion is drawn that there has been a curtailment of production in China to the extent of 37 per cent, in 1908 as compared with 1906. It may be so, and I sincerely hope

it is; but I am afraid that the figures on which such a conclusion is based would not satisfy any Western Statistical Society.

"In the leaflet of telegraphic reports from the various provinces, which forms a supplement to the Memorandum, it is stated that the cultivation of the poppy has been entirely suppressed in Fengtien, the southern province of Manchuria. Since when? Opium in Manchuria is a summer crop and it was cultivated in several places, especially near the Mongolian border, in 1908, so that it will be time enough to speak of the poppy having been suppressed in Fengtien when the time for sowing the crop comes round in 1909. Again, we are told in the leaflet that the cultivation of the poppy has been reduced by 60 per cent, in the province of Shantung, and that it will be totally suppressed by the end of 1909. If you will turn to page 97 you will find a telegraphic report by the Governor of Shantung to His Excellency Tuan Fang, in which it is stated that the production of opium in Shantung in 1908 was (i) for home consumption 95,679 catties and (ii) for export 52,557 catties—a total of 148,236 catties or 1,482 piculs, whereas if you will refer to the table of production on page 15 you will find that the Customs estimate of the production of the province for 1908 was 12,000 piculs, a somewhat extraordinary discrepancy; and it may be assumed that the measures necessary to abolish productions of 1,482 and 12,000 piculs would differ very materially. I do not wish to question the *bonâ fides* of the Governor of Shantung. He merely reports what was communicated to him by the Native Opium Consolidated Tax Bureau, and he gives the Statistics supplied by it. It is simply an instance illustrating the difficulties with which the High Provincial Authorities in China have to contend, and the laxity that prevails in accepting statements as facts. I might quote several other provinces through which I travelled in 1908, but I think I have said enough to show that the figures for production furnished by the Memorandum are based on by no means accurate or reliable data. The burden of most of these recent telegraphic reports is that suppression will be effected in 1909; but Chêkiang and Shensi state that they still require three years, and the Viceroy of Szechuan, who has to deal with the greatest opium-producing province in the Empire, reports that cultivation has ceased within over forty districts of the province and that the balance—some eighty more—will suppress cultivation within the prescribed limit.

"So much for production. I come now to the question of consumption. Opium smokers have not yet been registered throughout the Empire and their number is unknown; but an attempt has been made by the Chinese Delegation to arrive at a census of consumers by taking an estimated production of native opium, adding the foreign import, dividing smokers into two classes—light and heavy—and apportioning half of the estimated total amount of the drug between the two classes, each light smoker being given a daily allowance of one mace, and a heavier smoker 4 mace. This is a novel division of classes; but I much prefer the result of careful enquiries made in many provinces of China, which is that the average daily consumption of a smoker is 2 mace of prepared opium, and taking what appears to me to be the excessive estimate of 613,917 piculs of raw opium consumed in 1906, and allowing each smoker his 2 mace, the number of smokers becomes not 13,455,699 but 10,627,573 or about 2.65 of an uncounted population assumed to number 400,000,000. I do not admit, however, that the production of native opium in China in 1906 was 584,800 piculs as stated: the estimate is based on altogether insufficient data, and it might have been possible for the Chinese Delegates, knowing as the Chinese Government *should* do the provincial and Imperial revenue derived from native opium, and the rate of taxation, to arrive at some reliable approximation to the actual production, especially in view of the fact that Mr. T'ang stated, when presenting the Memorandum, that about 25 per cent of the total production in China escaped taxation. As matters stand the Customs estimates for 1906 and 1908 are so dependent one upon another that an under or over estimate in one year entirely vitiates the other. The percentages of smokers to the whole and to the adult population are undoubtedly important factors in this investigation, and there seems no good reason for deviating from the usual estimate of five persons forming a family. This would give some 160,000,000 adults to the Empire, and, assuming for the sake of argument that there were 13,455,699 smokers (as stated in the Memorandum) in China in 1906, the percentage of smokers to adults would be 8.4, and considerably less than 16 to adult males, for, while women are frequently alluded to as smokers in the reports contained in the Memorandum (and to my knowledge they are numerous in the Western provinces), they have not been taken into account when the percentage was struck. If, as I believe, my figures are as reliable, if not more so, than those given in the Memorandum the percentage of smokers to adults would be 6.64, and, taking women into account, under 13 per cent, in the case of adult males. This, of course, is assuming that the Customs estimate of 1906 is correct. In the same way the Customs estimate of production for 1908, with light and heavy classed smokers, but with five persons to the family

(a more reasonable allowance than 8), would give the percentage of smokers to population as 2.1, of smokers to adults 5.4, and in all probability less than 10 per cent, to adult males. If 2 mace per day be taken as the average allowance of a smoker the percentages would be less; but actual percentages will remain unknown quantities until China is able to produce reliable information regarding production, or better still the numbers of smokers registered under the regulations. Whether such information, if furnished, will be convincing, or whether differences of opinion as to production and consumption will remain, is immaterial to—and should not be allowed to obscure—the main issue, that opium in China is a great evil, and that the removal of the temptation is the only cure.

“I repeat that I have made these remarks in no carping spirit. They have been offered to show that we are still much in the dark regarding the actual production, consumption and reduction of opium in China, and also in the hope that criticism and analysis at this stage may do something to obviate the difficulty and possible controversy which may occur if towards the end of 1910 the Chinese Government are not in a position to demonstrate, with some approach to precision, the actual progress that has been effected. Meanwhile, in spite of the absence of any well organised uniform scheme for accomplishing the task which China has set before her, there can be no doubt that fair progress has been made in several provinces. Much still remains to be done; but the Chinese Government, whose sincerity is beyond question, have the sympathy of the British Delegation, and I trust of this Commission, in their efforts to eradicate the opium evil from the Empire.”

Mr. R. LAIDLAW, M.P., having withdrawn the question put by him at the previous sitting to the Chinese delegation, the Chair announced with regret the absence through indisposition of Mr. T'ang Kuo-an, and surmised that the Chinese delegates might in consequence require time to answer any questions put to them.

Continuing the discussion, the Right Hon. Sir C. CLEMENTI SMITH rose to comment on a statement made in the Chinese report as to the clandestine traffic in opium between Hongkong and China. He stated that the amount of smuggling that took place had for years been exaggerated, and he denied that it existed to such an extent as might be inferred from the report under discussion. The movement of opium was very strictly controlled by the Hongkong Government, and illicit traffic on a large scale was impossible.

After Monsieur RATARD and Monsieur Brenier of the French Delegation had put questions (*vide* Vol. II: China Report) to the Chinese Representative, further discussion of the Chinese Report was postponed.

H.E. TSUNEJIRO MIYAOKA informed Mr. R. Laidlaw, M.P., that replies to the questions handed to his Delegation during the previous session were in course of preparation; and Mr. de Jongh also intimated that he had telegraphed to Netherlands-India for certain information requested by Mr. Laidlaw.

Monsieur MIYAOKA then moved the following resolution:—

“That questions in respect of reports presented by the Delegations shall be submitted in writing, and that copies thereof shall be opportunely supplied to all the Delegations by the Secretary.”

Monsieur RATARD proposed to add the words “and answers” after the word “questions.” Sir C. Clementi Smith asked that the resolution might be interpreted liberally, otherwise the scope of debate would be inconveniently limited. The resolution as amended was then accepted by the House.

In reply to several enquiries, the Secretary explained that the Minutes would later be amplified and printed so as to form a fuller report of the proceedings of the Commission.

Dr. HAMILTON WRIGHT asked the British Delegation for information concerning opium and laws controlling same in New Zealand and British South Africa (for reply *vide* Vol. II: British Report).

Dr. BERNAUER suggested that information should be laid before the Commission as to the use of opium in the different foreign Concessions and Settlements in China.

Adopting a suggestion of Dr. Tenney, Monsieur RATARD moved the following resolution:—

“That the President be requested to apply on behalf of the Commission to the Senior Consul at Shanghai for information and data concerning opium in the International Settlement.”

This was agreed to by the Commission.

Dr. HAMILTON WRIGHT suggested the appointment of Committees (under Art. 7 of the Rules of Procedure) for dealing with specific portions of the various Reports with a view to the preparation of International Summaries. This suggestion was afterwards put by him into the form of resolutions, as follows:—

“That Committees, each consisting of three Delegates, be appointed to co-ordinate and report for the further consideration of the Commission as a whole—

- 1.—On Trade Statistics.
- 2.—On the question of anti-opium remedies as dealt with in the different reports.
- 3.—On the question of opium and its derivatives from a medical point of view.
- 4.—On the question of the cultivation of poppy and production of crude opium.
- 5.—On the Returns of Revenue as given in the different reports.”

Of these resolutions Nos. 1, 4 and 5 were accepted, and Nos. 2 and 3 negatived after discussion.

The Commission adjourned at 12.30 p.m. until the 15th February at 10 a.m.

Minutes of the Seventh Session

15th FEBRUARY, 1909

THE PRESIDENT called the House to order at 10.30 a.m. and announced the names of the Delegates chosen to serve on the Committees, the formation of which was resolved by the House at the last sitting.

The appointment of Mr. J. W. BRINING as official stenographer to the Commission from the 13th February was confirmed.

The Right Hon. Sir CECIL CLEMENT SMITH read a reply to a question put to the British Delegation at the previous sitting by Dr. Hamilton Wright concerning the imports and exports of morphine into the United Kingdom. Dr. Hamilton Wright said that his query had evidently been misunderstood. What he wanted to know was the final destination within the United Kingdom of *net* imports of crude opium. He would put the question in writing.

A report on the production and use of opium in Italy was next read by Signor FARAONE. He stated that there were in that country no special laws affecting opium, but strict regulations were in force for controlling the trade and sale of all remedies containing poison, any infraction thereof entailing heavy penalties.

The Chair then declared a discussion on the Netherlands Report to be in order.

The German Delegation put questions as to the class of the population in Netherlands-India consuming opium, and the average daily dose *per capita*, and Mr. Laidlaw enquired what amount of revenue was derived from opium in Java during each of the last ten years. Dr. Tenney also asked what proportion of the revenue derived from opium was disbursed in preventing smuggling (*Vide* Vol. II., Netherlands-India Report.)

H.E. Monsieur MIYAOKA, having read replies to questions put to him by the British Delegation at the previous sitting, Mr. Laidlaw asked whether the figures under the heading "Expenses of Opium Factory" comprised payments made on account of preventive service. H.E. Monsieur Miyaoka answered in the negative, stating that such expenses were included in the General Police and Customs Budget.

Mr. T'ANG KUO-AN then read replies to questions put by the British Commissioners to the Chinese Delegation. Referring to Sir Alexander Hosie's statement (*vide* Minutes of Sixth Session) he said that the sympathy expressed by the British Delegates with the efforts of the Chinese Government to restrict the cultivation of the poppy and consumption of opium in China was most highly appreciated by himself and his colleagues. Based as Sir Alexander's opinion was on actual experience of life and travel for years in the Western Provinces of China, and from personal observation, his frank admission of the evils resulting from opium smoking would certainly carry great weight with those taking part in the Commission. He was quite sure that Sir Alexander's criticisms on their Report were made in no fault-finding spirit. What China needed most was more sympathy like that so gracefully expressed by Sir Alexander Hosie. He hoped that the labours of the Commission would result in resolutions condemning the use of opium and its derivatives, except for purely medicinal purposes. Such an expression of opinion would, he was sure, act as a fresh incentive to his countrymen and spur them on in the work of suppressing poppy cultivation, and eradicating the opium vice, which was threatening the welfare of 400,000,000 people and the very existence of the Chinese nation.

Mr. T'ang also made the following statement, in reply to the observations of the Right Hon. Sir Cecil Clementi Smith at the previous sitting reflecting on the accuracy of the particulars given in the China report as to the amount of smuggling between Hongkong and China:—

"On page 4 of our Memorandum it is stated that previous to 1887 the quantity of foreign opium entering China each year by unauthorised channels amounted to about 20,000 piculs."

The Right Hon. Chief Commissioner for Great Britain thinks "the quantity has been much exaggerated. The figures given are those mentioned in Morse's Book 'The Trade and Administration of the Chinese Empire,' page 342. Mr. Morse was a careful observer, and his book is considered to be a very fair and impartial chronicle of the Chinese matters discussed therein. Moreover, his estimate is, to a large extent, justified by comparing the quantity of opium entering the Province of Kwangtung through the ports of Swatow, Canton and Pakhoi for the six years previous to 1887 and the quantity of opium entering that province through the same three ports, with the addition of Kowloon and Lappa, for the six years following 1887. The average annual importation into Kwangtung for the years 1881-6 was piculs 6,114 and for the years 1888-93 was piculs 23,246—a difference for each year of 17,132 piculs. These figures represent the amount of opium that paid duty and likin at the Custom House mentioned and do not take into consideration the amount of opium which managed to avoid the Customs. In the published Customs Records of 'Fines and Confiscations' for those years, the number of seizures made show that attempts at smuggling were of frequent occurrence. It should also be remembered that the smuggling of opium was not confined to the province of Canton alone; the Customs Records of 'Fines and Confiscations' prove that it was constantly taking place in nearly every Treaty port of China.

"The statement in the Memorandum was not meant to apply solely to Hongkong, as it was well known that opium was also smuggled in junks from Singapore, and by the crews of steamers trading with Singapore, Penang and the Indian ports. The Chinese Delegates consequently claim that the estimate of 20,000 piculs, as representing the annual amount of opium smuggled previous to the year 1887 is not an unreasonable figure, and that 5,000 piculs for the subsequent years is also not an exaggerated estimate."

Mr. T'ANG regretted that his Delegation had overlooked the questions handed in by the Chief Commissioner for France, but the required particulars would be furnished as soon as possible.

The Chief Commissioner for the Netherlands asked permission to make the following statement:—

"Now that the Delegates to the International Opium Commission have seen our report, with the Memorandum on the Régie system operative in Netherlands-India, and have heard the questions put and answers given thereon, we think it will be quite evident to them that our Government by its system is striving earnestly with the object of checking the

consumption of opium gradually and continually by all available means. In accordance with this policy, the Delegates of the Netherlands have been authorised to declare as follows:—

- 1.—That the Netherlands Government being convinced of the desirability of restricting the use of opium will never be prevented by financial considerations from taking such measures as will in its opinion genuinely effect a gradual decrease in consumption.
- 2.—That the Netherlands Government would not object to such alterations in the Régie system as might be likely, in its opinion, to check the use of opium, or to the extension of the means of preventing smuggling by land and sea.
- 3.—That in those provinces of Netherlands-India where the farm system still exists the substitution for it of the Régie system is already under consideration."

Dr. RÖSSLER called attention to a misprint in the report of the German Delegation. On the last page, under heading III Use of Opium: the words "average smokers use at last 2 *liang*" should read "average smokers use at least 0.2 *liang*."

Mr. T'ANG, referring to previous statements relative to the percentage of opium smokers in China, gave some information which he had obtained concerning the percentage of smokers to the Chinese population in the Philippine Islands. He said that of the total number of Chinese residents in the Archipelago 23 per cent were registered officially as smokers. There would be in addition a certain number who would, from one reason or another, escape official notice; so that it was fair to assume that 25 per cent of the total Chinese residents were smokers. This would corroborate the estimates made by his Delegation as to the extent of the habit in China itself, the percentages quoted being much higher than those usually given for China.

The Right Rev. Bishop BRENT, vacating the Chair (which was taken for a few minutes by Senhor Potier) made a personal and explanatory statement with reference to Mr. T'ang's observations. He said that, to prevent any misunderstanding, he thought it necessary to point out that all registered smokers in the Philippines were Chinese—natives not being allowed to take out licences. The majority of the Chinese came from Amoy, where the smoking habit was, he understood, exceedingly prevalent. Further, nearly the whole of the Chinese population consisted of adult men, and the fact of there being very few women or children would help to account for the high percentage of smokers.

These explanatory remarks were supplemented by Dr. HAMILTON WRIGHT, who said that the result of his investigations in the United States amongst the Chinese population showed that 20 per cent of the adult males were heavy smokers, and 20 per cent light smokers, making a total of 40 per cent using on an average $1\frac{1}{2}$ mace a day of prepared opium. This estimate was, perhaps, too high, but he could state with a fair amount of certainty that 30 per cent of the adult male Chinese population were addicted to the habit.

At 12.15 p.m. the House adjourned.

On re-assembling at 2.30 p.m. the Austro-Hungarian Report came up for discussion. There were no questions, but Dr. RÖSSLER asked the Austro-Hungarian Delegate to obtain information with regard to the use and sale of opium in the Austro-Hungarian Concession at Tientsin.

The Right Rev. Bishop BRENT stated that his attention had been called by the French Delegation to certain errors appearing in the report issued by the "American Commission on Opium in the Philippines"—of which he was a Member—relative to the amount of revenue derived from opium in French Indo-China. Steps would be taken to rectify these mistakes.

The Chair then announced that a discussion on the Reports presented by the German and the Persian Delegates would be in order.

Dr. HAMILTON WRIGHT intimated that he would have certain questions to put with regard to these reports at the next meeting.

Following a remark made by the Right Hon. Sir CECIL CLEMENTI SMITH, the Chair considered that it would be in order for the Committees appointed to deal with specific portions of the reports to re-open a discussion on any subject dealt with by them, should they desire to elicit further information thereon.

A suggestion by Dr. RÖSSLER that the Committee appointed to report on the revenue statistics of opium should extend their investigations to tariffs, excise and other legislation governing the importation and distribution of opium and its derivatives, was favourably received.

A discussion ensued as to the nature of the laws and conditions covering the opium trade, contained in the Treaties between the various countries represented on the Commission, the Chairman eventually suggesting that if expedient, each Delegation might obtain the desired information, or a Committee might be appointed to investigate the subject.

Dr. RÖSSLER then moved the following resolution:—

“That a Committee on existing International Agreements covering the traffic in opium be appointed.”

This was accepted by the Commission after discussion.

In answer to a question put by the Chair the American Delegation stated that their report would be in the hands of the Delegates on Friday next. It was also announced that the French Report would be ready on Friday; that proofs of the Report on India would be distributed on Wednesday; that the report on Canada would be forthcoming as soon as possible after the arrival of Mr. Mackenzie King; and that the Reports on Portugal and Siam would be ready shortly.

Dr. RÖSSLER asked the Netherlands Delegation whether a report on opium in the Netherlands itself would be laid on the table. Mr. de Jongh, replying, said that no report on the Netherlands could be presented for the present, as he had understood that the object of the Commission was to deal with the opium question in the Far East only. He might say, speaking freely, that he had never heard of any poppy growing in the Netherlands, nor of the existence of an opium problem in that country. However, he would endeavour to obtain more positive information if desired.

The PRESIDENT.—“It seems to the Chair that the House would be gratified if the Chief Commissioner for the Netherlands would obtain the necessary information, as he suggests.”

A discussion then ensued as to whether the scope of enquiry was intended originally to include other than Far Eastern countries. The Chief Commissioners for France and Portugal respectively stated that they understood that the investigations of the Commission would apply only to the Far East. Dr. Hamilton Wright declared that the United States Government had suggested the study of all phases of the opium question in each country represented on the Commission, and especially that such investigation should be carried out before the meeting of the International Commission, in order to facilitate the preliminary work of the Commission.

The Chair ended what promised to develop into a lengthy debate by suggesting that each country represented might at least obtain such information regarding the conditions at home as would enlighten the Commission, and enable it to carry the work before them to a successful issue.

The House adjourned at 3.45 p.m. until Thursday, the 18th February.

Minutes of the Eighth Session

18th FEBRUARY, 1909

ON taking the Chair at 10.30 a.m., the PRESIDENT announced the names of those Delegates whom he had selected to serve on the Committee on Treaties and International Agreements touching the opium traffic.

On behalf of the House he welcomed Mr. Mackenzie King, Representative for Canada on the British Delegation.

Mr. BRUNVATE then notified the House that he had telegraphed to India on behalf of the British Delegation for statistics of the imports of morphine and other figures, but he did not anticipate that the reply would be of such a nature as to effect the substance of the information given in the Memorandum already laid on the table.

A report on the opium question as it concerns Canada was next presented by Mr. Mackenzie King, who desired the clemency of the House for the delay occasioned by his tardy arrival.

The Chinese report again came up for discussion, but there were no questions asked.

Monsieur CORNILLON, on behalf of the Committee on Revenue Statistics, pointed out that a preliminary study of the Reports before them had shown the necessity for the adoption by the various delegations of common units of currency, weights and measures, in order that the Committee's work of preparing an International Summary might be facilitated, and he submitted the following proposition:—

- 1.—That measures of superficies, quantity and weight shall be expressed in terms of the metric system.
- 2.—That all monies shall be reduced to English currency at a fixed exchange of 25 francs to the £.
- 3.—That all statistics furnished shall cover the years 1903 to 1907, inclusive.

These suggestions met generally with the approval of the Commission, but the Committee was entrusted with the task of making whatever calculations they might involve.

After some remarks by the Chief Delegates for Portugal and Germany on the subject of exchange, the Chair declared a discussion of the British report to be in order.

Mr. T'ANG KUO-AN asked whether, according to existing Agreements made between the Chinese and British Governments, the annual reduction by 5,100 chests of opium of the total Indian export meant that a corresponding reduction of the import of Indian opium into China would be assured, irrespective of the conditions of demand in China.

Mr. BRUNVATE, replying on behalf of his Delegation, stated that the Agreement that Great Britain had entered into to reduce the annual export of opium from India meant exactly what it said, *viz.*, that Great Britain does agree to reduce exports from India by 5,100 chests annually for the next ten years. It involved no economic proposition such as suggested by the Hon. Commissioner for China.

Mr. T'ANG explained that there was some misunderstanding in the minds of the Chinese people, and his Delegation would be obliged if the Delegation for Great Britain would put their reply in writing, as his people were under the impression that the present arrangement meant a reduction of 5,100 chests on the total amount of opium annually imported into China; if they were mistaken they would like to have that impression rectified.

The Right Hon. Sir CECIL CLEMENTI SMITH observed that if any misunderstanding on this point existed amongst the Chinese, surely the correction would more properly emanate from the recognised authorities of the Chinese Empire than from his Delegation.

Dr. HAMILTON WRIGHT and Dr. TENNEY, having put several questions to the British Delegation with reference to the India report, (*q.v.*) the Persian Report came up for discussion.

H.E. Monsieur MIYAOKA handed a question to the Persian Delegate concerning the import of Persian opium into Formosa.

Mr. T'ANG KUO-AN moved the following resolution :—

“That a Committee consisting of five Delegates be appointed to consider and report on the medical aspects of the opium question, including the best methods of curing the opium habit without recourse to the drug or any of its derivatives.”

There was some discussion as to whether this resolution was in order or not, as it appeared to be in a similar form to the one moved by Dr. HAMILTON WRIGHT during the sixth Session, and negatived.

The CHAIRMAN said that, as he understood it, the present proposition was in an entirely different form from the original one, although he stood open to correction; that in the negatived resolution the scope of the enquiry was restricted to the consideration of the subject as dealt with in the reports presented by the different Delegations; whereas the present resolution had a much broader meaning. Whether the House desired or not to widen the scope of such enquiry was for it to decide.

Mr. T'ANG begged leave to explain that when the negatived resolution was proposed, both the Chairman of the Chinese Delegation and he himself were absent; consequently they had had no opportunity of expressing their views on the subject.

Continuing, he said :—

“We consider that this question is only second in importance to the suppression of opium in China. We think it would be futile for us to attempt to stop the smoking habit while we continue to use the drug in other ways such as eating it in the form of pills, etc. Therefore, if this Commission is going to justify its existence, and is bent on accomplishing results which will be at all satisfactory, it is necessary in our opinion that this matter should be thoroughly discussed. To show with what importance the question is regarded by everyone, I beg to state that His Britannic Majesty's Minister in Peking has frequently asked our Government what benefit China would derive from restricting the cultivation of opium if the opium evil in other forms (by which he meant the use of anti-opium pills, etc.) was to be allowed to spread all over the Empire.

“I therefore venture to beg this Honourable Commission to take the matter into careful consideration in order that it may not only fulfil its duty in part but in whole; for I do not think it is the intention of the Government of my country, or of any other country represented here, that we should discuss matters connected with the cultivation of the poppy only.

“On the contrary, I understand that we are here to investigate the question in every form and phase; and this idea has also been expressed by every Anti-opium Society and by the people of all civilized countries. In bringing forward my resolution, therefore, I beg most earnestly to ask for the co-operation and support of this Commission.”

Dr. TENNEY observed that he would like to endorse the views expressed by the Hon. Commissioner for China. He was of opinion that the Commission would be justly blamed if the Delegates were to separate without having presented their views on this matter. When the motion was put to the Commission on the previous occasion sufficient thought had not been given to it, and perhaps the vote taken then did not express the mature judgment of the House. If it were necessary to bring the motion before the House again, he would propose that a roll call be taken in recording the vote upon this question.

Monsieur RATARD having suggested that a written copy of the resolution be handed to each Delegation in order that they might have time to consider same, and that the vote be taken in two or three days time, Dr. TENNEY proposed that the further consideration of the resolution be the first business for the next session. This met with the approval of the House.

The Commission adjourned at noon until the 19th February at 10.30 a.m.

Minutes of the Ninth Session

19th FEBRUARY, 1909

THE SESSION opened at 10.30 a.m., the order of the day being the further consideration of Mr. T'ANG KUO-AN'S resolution of the previous day, which ran as follows:—

“That a Committee consisting of five Delegates be appointed to consider and report on the medical aspects of the opium question, including the best methods of curing the opium habit without recourse to the drug or any of its derivatives.”

The Right Hon. Sir CECIL CLEMENTI SMITH, rising to continue the discussion, said that the action which he took on behalf of the British Delegation in opposing the appointment of a Committee in the first instance was one not in the least directed against a practical enquiry on the important subject under discussion, but was based solely on the fact that he did not consider that the Commission included a sufficient number of men competent to deal with the question. He declared that no one in the Commission was more in sympathy with the object which Mr. T'ANG had in view than he and his colleagues, and he thought it would be agreed that the British Government had shown a desire to help China in dealing with the opium problem; but he considered that whatever assistance was to be given to China should at least take a practical form, and one that would be universally recognised as such.

He emphasized the fact that the Commission was not appointed with a scientific basis. He thought he was right in stating that beyond Dr. HAMILTON WRIGHT and the distinguished scientist on the Japanese Delegation there were none amongst them fitted to deal with such matters as anti-opium remedies, etc.; and it was holding that view in the strongest possible way, and yet feeling at the same time that it was a subject of great urgency which had perhaps been left on one side too long, that the British Delegation desired that some steps should be taken. He referred to the fact, that although the Chinese Government had issued regulations in which it was distinctly laid down that anti-opium pills should not consist of opium or morphia, it was well known that pills containing a large proportion of the forbidden drugs were being sold broadcast in China. He thought that were steps taken to properly carry out the regulations referred to much of the evil afflicting China would be dissipated. He added that although the question of anti-opium remedies had not come before the Governments of the Eastern Colonies to any extent, they had, nevertheless, already recognised the necessity for restricting the use of opium in that connection.

Continuing, the Right Hon. gentleman observed that the evils arising from the use of morphia had been most terrible in their effect. An Agreement which, after deplorable delay, was now in force, had, however, been recently made with China for prohibiting the movement of morphia, and he trusted it would have the effect which all persons interested in that question desired. He repeated the opinion of the British Delegation that the Commission was not formed in such a way as to admit the investigation in a practical manner of the medical phases of the opium question by any Committee that might be selected, but he thought that he might take the opportunity of suggesting to the different Delegates that the matter be brought directly and promptly under the notice of their respective Governments, who would alone be able to appoint competent Committees and to make enquiries likely to effect the object in view. It was not a question which could be settled locally, but one that should be dealt with by the great scientific Institutions of the Western and Eastern worlds. The appointment of the Committee suggested by Mr. T'ANG would hamper rather than promote any such investigation. He would, therefore, conclude by submitting to the Commission the following Amendment to the Resolution, and in the event of its adoption he would, at the proper time, ask that it might be included among the formal resolutions which would be ultimately drawn up by the Commission:—

“That, having regard to the constitution of this Commission, which has not among its Members a sufficient number to form a Committee for the investigation from the scientific point of view of anti-opium remedies and of the properties and effects of opium and its products, the Commission desires that each Delegation shall recommend these branches of the subject to its own Government for such action as that Government may think necessary.”

Dr. HAMILTON WRIGHT, after thanking the Right Hon. Chief Commissioner for Great Britain for the complimentary reference to himself, pointed out that there was on the Chinese Delegation also a medical expert, trained in the West, who, speaking from a scientific point of view, was quite competent to judge on the subject under discussion. There were, therefore, three physicians in the Commission quite capable of undertaking an investigation, though he

took the Right Hon. Chief Commissioner of the British Delegation's remarks in regard to himself with all modesty. He pointed out that, when Her late Britannic Majesty's Royal Commission was appointed, the British Government had thought it sufficient to appoint only one medical expert to the Commission; that the report of that expert had coloured to a great degree the final judgment of the Royal Commission; that on the other hand that expert's report had not proved to be satisfactory to the great majority of medical men who had taken to examine it in detail; that it was time for a later opinion based on the facts which had newly come to light; and that, without calling into question the abilities of the medical expert on the Royal Commission, there were others quite as well able to examine the question. If one expert was enough for the Royal Commission, three should be sufficient for the International Commission. One of the express objects of the Commission should be to put this medical question on a modern footing.

Mr. T'ANG KUO-AN begged permission to reply to a few of the remarks made by the Right Hon. Sir CECIL CLEMENTI SMITH. He stated that in the Regulations which China issued two years ago for the suppression of the opium habit, one of the questions dealt with was "Anti-Opium Medicines." Since that time China had been taking steps to control the sale of such medicines in the interior. For instance, at Chengtu, the capital of Szechwan, no opium medicines could be sold except by authority of the police, and in other places also the police were endeavouring to restrict the sale of opium medicines. But it was a deplorable fact that the bulk of these remedies were manufactured in, and found their way into the interior from, the Treaty Ports; China was consequently quite powerless to prevent the spread of these nostrums without the co-operation of the Treaty Powers. That was one of the reasons which led him to draw up the resolution now under consideration. Another point he wished to bring to the attention of the Delegates. Supposing there were not, in the opinion of the British Delegation, a sufficient number of men on the Commission competent to deal with this question, they were not debarred, as far as he knew, by anything in the constitution or in the rules of the Commission from seeking advice and opinion from experts outside.

Dr. RÖSSLER supported Mr. T'ANG'S resolution. He said:—"According to the correspondence exchanged between the Governments of the United States of America and the powers interested in the opium question, this Commission is expected to make a general and impartial investigation of the scientific and material conditions of the opium trade and the opium habit. I am afraid the report which we are going to submit to our Governments would be incomplete were the medical aspect of the opium question omitted.

"The medical side of the opium question is the issue of the anti-opium campaign, and for this reason every Opium Commission which has, so far, been at work, has carefully investigated this side of the question. I may be allowed to refer to the Report of the Ceylon Commission, of the Straits Commission, and of the important Royal Commission on opium in India, all of which contain valuable information of this kind.

"You all know that the medical views on this subject are not altogether unanimous. The more then would it be interesting to hear what the three physicians forming part of this Commission have to say on the subject. It is a matter of common knowledge that physicians at home have little or no experience as to the effects of opium smoking, there being no problem of this kind in Western countries. But the three physicians forming part of this Commission have gained experience in the Far East, and therefore I think we should give them an opportunity to state their opinion. For this reason I am in favour of the proposal of the Chinese Delegation."

The Amendment moved by the Right Hon. Sir CECIL CLEMENTI SMITH was then put to the vote with the following result:—

For the Amendment 7
Against the Amendment 6

The different Delegations voted as follows:—

<i>For</i>	<i>Against</i>
Great Britain	U. S. of America
France	Austria-Hungry
Netherlands	China
Persia	Germany
Portugal	Italy
Russia	Japan
Siam	

H.E. Monsieur MIYAOKA replied to questions which had been put to him at a previous Session by Mr. R. LAIDLAW, M.P., and Mr. BRUNYATE read answers to questions submitted by the American and Chinese Delegations (*vide* Reports: Vol. II.)

There being no further business before the Commission, the PRESIDENT suggested that the presentation of Resolutions might begin on Monday next (22nd February.) There would be, possibly, further discussion on some of the Reports which had not been in the hands of the Delegates long enough for study. The discussion of these Reports would be the order of the day on Monday morning. Following such discussion, it would, in the opinion of the Chair, be timely to present such Resolutions as the various Delegations might have in mind, covering the object for which the Commission was convened. He did not think it was necessary to await the reports of the different Committees before commencing the work of considering such resolutions as might be presented.

He took that opportunity of welcoming, on behalf of the House, the appearance of one of the Associate Delegates for China, Mr. J. L. CHALMERS, who had hitherto been prevented by illness from attending the meetings of the Commission.

Mr. DE JONGH, Chief Commissioner for the Netherlands, suggested that any Resolution to be submitted to the Commission should be distributed in writing beforehand, in order that the Delegates might have time to consider them.

The Chair thought that this suggestion was in conformity with the rule which had hitherto been followed, and that each Delegation ought to be provided with copies of the different resolutions by those proposing same.

Monsieur RATARD.—“If you will permit me I will state the reasons for my having voted against Mr. T'ANG'S resolution.

“I have here copies of the correspondence exchanged between the French and American Governments anent the programme of this Commission, on which was based the instructions given to our Delegation. The question was submitted to the French Government by H.E. the Ambassador of the United States at Paris on two occasions, 15th and 24th July, 1908. The communication of the 15th July enumerates the points to be dealt with by the Commission, and which the American Government suggests should be studied in advance by the Delegates of each country to be represented, as follows:—

- 1.—Importation of opium in its crude state and of its derivatives and of opium prepared for smoking (*chandu*).
- 2.—Internal consumption of raw opium.
- 3.—Manufacture and use of *chandu*.
- 4.—Manufacture of morphine and other derivatives.
- 5.—Use of the drug in its raw state.
- 6.—Preparation and use of morphia and other derivatives.
- 7.—Extent, legal and illicit, of the cultivation of the poppy (in America); possibility of its cultivation.
- 8.—Laws (Federal) relating to the use of opium and of its derivatives.

“The official reply of the French Government to H.E. the American Ambassador at Paris, dated 5th August, 1908, declares that, in conformity with the desire expressed by the United States Government, the French Government will nominate only Commissioners conversant with all questions concerning the opium trade, well informed with regard to French interests concerned thereby, and furnished with specific instructions.

“The instructions given by the French Government to the Chief Commissioner for France, after repeating the points of the programme outlined above, and remarking that the opium question is one of considerable interest to French Indo-China, whose Budget might be affected by the findings of the Commission, recommend the French Delegates not to deviate in any way from their instructions.

“The vote which the French Delegation cast just now is consequently fully justified by these remarks. No Delegation is more in sympathy with the efforts of the Chinese Government to get rid of the opium evil, and I associate myself wholly with the sentiments expressed to this effect by Sir ALEXANDER HOSIE. The scientific and medical questions connected with

opium are of such importance that I believe, like the Right Hon. Sir CECIL CLEMENTI SMITH, that it would be extremely interesting and useful were they submitted to the highest scientific and medical authorities of those countries chiefly interested. It is, however, impossible for this Delegation to exceed in any way the instructions laid down for its guidance."

H.E. TSUNEJIRO MIYAOKA—"With the permission of the Hon. gentlemen here assembled, I desire also to make an explanation of the vote which I had the honour to cast in the name of the Japanese Delegation. In a note which was addressed by H.E. Mr. O'Brien, Ambassador of the United States near the Imperial Court of Tokyo, under date May 12th, 1908, to the then Minister of Foreign Affairs, H.E. Count Hayashi, he stated:—

'The idea of the Government of the United States of America is that the Commissioners of each Government shall proceed independently and immediately . . . with a view:—

- 1.—To devise means to limit the use of opium in the possessions of that country.
- 2.—To ascertain, should there exist among the nationals of that country in the Far East a traffic in opium, the best means of suppressing such traffic.
- 3.—That the respective Delegates be in such a position that . . . they will be prepared to co-operate and to offer, jointly or severally, definite suggestions of measures tending towards the gradual suppression of opium cultivation, as well as its traffic and use within their Eastern Possessions, and which their respective Governments may be prepared to adopt. In this way the Members of the Chinese Government will be assisted in eradicating the evil from their Empire.'

"This occurs in a note, as I stated, of the Ambassador of the United States dated May 12th, 1908. The Imperial Government of Japan acceded to this proposal, implying that they were prepared to appoint a Commission which should devise some means of limiting the use of opium, the best means of suppressing the opium traffic, and the best means of gradually suppressing not only opium cultivation, but the use of opium. Knowing that all schemes and devices which have for their object the suppression of opium and the use of opium cannot be effectively discussed other than by men who have particular knowledge of the chemical properties of opium, and the effect which it has on the human constitution, the Imperial Government of Japan has deemed it proper to appoint an eminent chemist, Dr. TAHARA, and an equally prominent man of medical science, Dr. TAKAKI, who, I may add, stands at the head of affairs connected with the control of opium in Formosa. When this Delegation, therefore, was appointed by the Government of Japan, it was understood that we should be expected to enter into the question of the suppression of the use of opium, naturally involving the cure of the opium habit. The Japanese Delegation, therefore, felt constrained to vote against the Amendment submitted by the Right Hon. Sir CECIL CLEMENTI SMITH, in order that it might have an opportunity of casting its vote in favour of the original resolution presented by Mr. T'ANG."

Dr. HAMILTON WRIGHT, in the name of the United States Delegation, stated that he agreed perfectly with what had fallen from the Chief Commissioner for France in regard to the meaning of the correspondence exchanged between their respective Governments.

After Dr. TENNEY had withdrawn a proposal that the Commission should hold a Session on Saturday morning, the House adjourned at 11.40 a.m., on the motion of Monsieur Miyaoka, until Monday morning (22nd February).

Minutes of the Tenth Session

22nd FEBRUARY 1909

THE COMMISSION assembled at 10.30 a.m.

The Chair announced with regret that Signor FARAONE, the Delegate representing Italy, was ill, and unable to attend. He also expressed his regret in that the name of the Secretary of the Persian Delegation, Mr. B. A. SOMEKH, had been omitted from the official list of representatives, but the Secretary of the Commission would take steps to have this mistake rectified.

The Chief Commissioner for the Netherlands presented to the House the information which he had received by telegraph concerning opium in Holland (*vide* Netherlands Report: Vol. II).

The British and Japanese Delegations read replies to questions received from the American and British Delegations respectively. Mr. T'ANG KUO-AN, for the Chinese Delegation, also replied to three questions put during the sixth Session by the British and French Delegations. A reply to some questions submitted by the American Delegation was made by the Persian Delegate and the Chinese Delegation asked the British Delegation for certain statistics relative to the number of opium smokers in Hongkong and the Straits Settlements (for questions and answers, *vide* Vol. II: Reports).

Mr. T'ANG KUO-AN stated, that with reference to the last of his questions, his Delegation wished to take that opportunity of expressing their appreciation of the measures taken recently by the Hongkong authorities against the smuggling of opium into China, which, according to the Commissioner of Customs at Kowloon, had of late years greatly diminished.

Two questions were then handed to the French Delegation by Mr. T'ANG with reference to the quantity of opium imported into Kwangchowan.

The Right Hon. Sir CECIL CLEMENTI SMITH expressed his obligations to Mr. T'ANG for his remarks regarding the action of the Hongkong authorities. According to information in his possession the Hongkong Government was aware of all that happened to the opium which entered that port, and was quite satisfied that at the present time there was no smuggling from Hongkong into Chinese territory.

The printed reports for Portugal and for the United States were distributed, and the Chair announced that both these reports were before the House for consideration.

The Chief Commissioner for France asked that if there were any further questions to be put to him concerning the French Report they might be presented soon.

Dr. HAMILTON WRIGHT, having put a question to the British Delegation as to the amount of opium prepared for smoking shipped from Hongkong and the Straits Settlements to the Philippines, the Chair asked if any of the Committees were ready to submit Reports to the Commission.

Dr. TENNEY, on behalf of the Committee appointed to consider Treaties and International Agreements covering the traffic in opium, stated that a printed report could not be laid on the table that day, but that he would read the report. He also stated that the Committee had taken the liberty of adding to its name the words "and its derivatives."

After the report had been read, the Right Hon. Sir CECIL CLEMENTI SMITH expressed the opinion that neither he nor his colleagues ever contemplated that the Committee would extract portions of certain Treaties and Agreements, and give an interpretation as to the exact meaning of those extracts. He for one would certainly not be bold enough to do anything of the kind, and he considered it an extremely dangerous proceeding to adopt, these matters being generally left to be interpreted and explained by the Governments concerned.

It was finally decided to allow the Report to stand over until the various Delegations had had sufficient time to study it.

There being no further questions asked on the Reports in hand, the President addressed the House as follows:—

"In accordance with the statement of the Chair at the last Session, the prime object of this Commission has now been reached, and resolutions will naturally be in order. With the indulgence of the House, before proceeding to this business, the Chair would like to draw attention to certain principles and considerations of importance relative to our findings. It would appear expedient to quote what met with the approval of the

House at the outset of our proceedings,—a passage from the Report of the Second International Peace Conference relative to such Commissions and Conferences as the one we are now engaged in:—

“In the discussions upon every question it is important to remember that the object of the Conference is Agreement, and not compulsion. If such Conferences are to be made occasions for trying to force nations into positions which they consider against their interests, the Powers cannot be expected to send representatives to them. It is important also that the agreements reached shall be genuine and not reluctant. Otherwise they will inevitably fail to receive approval when submitted for the ratification of the Powers represented. Comparison of views and frank and considerate explanation and discussion may frequently resolve doubts, obviate difficulties, and lead to real agreement upon matters which at the outset have appeared insurmountable. It is not wise, however, to carry this process to the point of irritation. After reasonable discussion, if no agreement is reached, it is better to lay the subject aside, or refer it to some future Conference in the hope that intermediate consideration may dispose of the objections. Upon some questions where an agreement by only a part of the Powers represented would in itself be useful, such an agreement may be made, but it should always be with the most unreserved recognition that the other Powers withhold their concurrence with equal propriety and right.”

“I feel sure that this paragraph which I have again presented to the House, represents the mind of this entire assembly.

“Further, with your indulgence, may I say that we are at a most critical moment. The Chair himself feels weighted with responsibility, a double responsibility, a responsibility that is personal, and a responsibility on behalf of this entire House, of which he is a most unworthy leader, but nevertheless a leader most eager to fulfil the functions of his office. The results of this Commission are bound to be far-reaching, and of a two-fold character—direct and indirect. They will take shape eventually in some kind of formal action on the part of the various Governments represented, partly of a legislative and partly of a practical character that could not perhaps be justly called legislative; then, too, the results of our findings are going to be productive of sentiment, and am I not right in thinking that sentiment still rules the world? As in the past, so in the future, and in the present, sentiment is bound to be the final arbiter in all great questions, and no legislative or practical action can avail unless public opinion, rightly informed, acts spontaneously, strongly and naturally in the direction of formal, enacted law. So it is of two-fold importance that what we succeed in agreeing upon should be of a strong character, practical, and—I shall not say with a sentimental side to it, but—with a side which will tend to create wholesome sentiment wherever our findings may reach. The world, I think I am not mistaken, is looking for something definitive from this Commission, though when I say definitive I do not for a moment mean final. We are only striving to take a great problem one step forward in the course of development and progress. I think that all of us would agree that our resolutions should represent the high-water mark, up to date, on this question,—and we all represent sovereign states—so that we must demean ourselves royally. With the recollection that our responsibility is ultimately not merely to our individual nations, but to the whole family of nations and to posterity, it would seem to the Chair,—and I speak now entirely in my official position, and dispassionately, from the evidence before me,—it would seem that the material in hand is quite sufficient to enable us to reach valuable conclusions.

“It is of vital importance, as the paragraph which I have read to you states, that our findings should reach common ground as far as possible, but in all probability in reaching that common ground we will have to traverse disputed territory. Whatever disputed territory may be traversed, we will move with profound respect for the convictions of those who differ from us, and in the presentation of conclusions that may not be generally acceptable we will observe the fullest courtesy. Am I not right in saying that friends can afford to be frank to one another and that it is the privilege of friendship to differ without the bonds of friendship being severed? That is true in the realm of social life in any given nationality, and I venture to think that the day has dawned when, in the family of nations, it is equally true.

“There are two things at stake in the findings of this Commission. In the first place the whole principle of international study of disputed questions is involved. We have reached a day in the history of nations when splendid magnanimity is shown by this or that nation, which may have the full conviction that its present position is right on a given question, but which is ready to call in neighbouring nations to consider it conjointly, if the matter is in dispute. It is the desire of all mankind to promote such movements as will tend to the greatest amity between nation and nation. The principle of Commissions is still young, and it is for us to advance that principle in the public estimation, or to depreciate it. Furthermore,

in dealing with the question immediately before us, we have to consider that if we fail in worthy and practical resolutions, we shall do that which all of us would lament should the calamity happen, *viz.*, throw back this whole question into the hands of agitators and extremists. The result would be to confuse and befog the public mind, depriving it of that sentiment which, as I have said, is going to be one of the greatest factors not only in the solution of this question but of all great questions.

"I feel that I have said enough. You share my sense of responsibility and together I believe we shall worthily fulfil our duty.

"Permit me to thank the House at this juncture for the fine temper and the courteous spirit which has characterised it from the beginning, and the Chair ventures to hope that this temper will not desert us at the critical stage, but that to the end we shall prove ourselves to be friendly representatives of a Royal family of nations.

"It is for the House to decide how the various resolutions will be presented. The Chair would suggest,—though with some diffidence, the reasons for which are obvious,—that we follow the procedure which we have observed in all business brought before the House. Should this method be agreeable the resolutions will be presented by the different Delegations in their alphabetical order, the various movers presenting their resolutions with such comments as may be desirable. Discussions will take place when all the resolutions are in."

It was decided that all resolutions should be presented by the different Delegations in alphabetical order, and that no time limit should be fixed for receiving resolutions.

The House adjourned at 12.30 p.m. until 10.30 a.m. on 23rd February.

Minutes of the Eleventh Session

23rd FEBRUARY, 1909

THE PRESIDENT took the Chair at 10.30 a.m.

After the Chief Commissioner of the British Delegation had read replies to questions asked by the American and Chinese Delegations during the last sitting, Dr. RÖSSLER moved that the resolutions to be submitted to the Commission should first be discussed by a Committee, in order that unnecessary debate might be avoided. The Right Hon. Sir CECIL CLEMENTI SMITH thought that the resolutions should go to a Committee after, and not before, they had been submitted to the Commission. This view was also expressed by the Chief Commissioner for France.

On Dr. RÖSSLER's proposition being put to the House it was lost by 6 votes to 5.

The Chair then announced that resolutions would be taken in alphabetical order, *i.e.*, in the order of the various Delegations as given on the official list.

Dr. HAMILTON WRIGHT, rising to present the American resolutions, spoke as follows:—

"Mr. President and Fellow Commissioners of the International Opium Commission,—The American Delegates, after due consideration of the historical aspects of the opium question, after a complete and careful study of the literature on the general question of opium abuse throughout the world, and more particularly after a specific study of the various reports laid before this Commission, have considered and drawn up a series of resolutions which we hope may receive, along with others of similar sense, the unanimous approval of the International Opium Commission. We have, in considering and drawing up these resolutions, kept in mind the magnitude of the question we were instructed to review, and the relative values of the economic, moral, and international interests of the different Government represented in this Commission.

"It may be remembered that in one of the early despatches which led to the calling of this Commission, our Secretary of State took the following ground: That the Government of the United States had not actually engaged in the opium trade in the Far East; that it had

from early days discouraged the opium trade in the Far East through Treaties made with Far Eastern countries, and by statutes passed to make those Treaties effective, that it had by special laws endeavoured to prevent its citizens from pushing the trade on unprotected people. All this is a matter of record in our report. Our Secretary of State was of the opinion that, in view of the historical position of the United States, its Government was, perhaps, best positioned to propose that there should be called together an International Commission to study the scientific, moral, economic, political and all other sides of the opium question, and if possible for the Commission to suggest methods for its solution.

“The American Delegates can assure this International Opium Commission that our Secretary of State in calling for this Commission, sympathized with, and expressed the sympathy of the American people, for those countries which had become involved in a financial maze based on a too free production and traffic in opium. His mind and the mind of the American people was also stirred by a profound sympathy for all people who have become involved in, and thus rendered less effective in world affairs by, the abuse of opium. The American Delegation is here, and has studied the opium problem in all of its phases, in the same spirit and with the same sympathy in which the International Opium Commission was conceived and finally brought into being. We feel certain that the other Delegations to this International Commission have thought as deeply on the opium question as we have since we assembled at Shanghai: that you have thought as deeply, and with more real knowledge of the facts, as have thought that large number of able men and women who have agitated this opium question during the last fifty years; that you have thought as seriously and deeply as those statesmen will be bound to think to whom this Commission must leave the final adjustment of the problem.

“You are all, I am sure, in cordial agreement with the American Delegates that the opium problem is a difficult one, especially for China and India. We, as well as other Delegates, were gratified when, in opening the discussion on the Chinese report, Sir ALEXANDER HOSIE expressed his great appreciation of, and his sympathy for, the hardship that confronts the Chinese people and Government in dealing with their opium problem. Our Delegation would enlarge upon Sir ALEXANDER HOSIE's fine spirit, by expressing our appreciation of, and our sympathy for, the great difficulties which, we know, confront the Governments of British India, Hongkong, the Straits Settlements, French Indo-China, Siam, Portugal and the Netherlands, in dealing with the serious financial problems which have supervened on their production, and manufacture, or their trade in or use of opium. We, however, are glad to be able to congratulate our German, Austrian and Italian colleagues that, through the wisdom of their governments and the self-restraint of their peoples, their opium problem is not of a nature to be alarming. We rejoice also that, the Government of French Indo-China is so surely and steadily resolving its opium problem to final extinction.

“Yet, in spite of the sympathy and interest which our Delegation have for the difficulties, financial and other, we have concluded that the traffic in opium for other than necessary uses ought not much longer to continue, or, there will yet loom between the East and West a problem that in its magnitude and potentialities for strife will outstrip the magnitude and forces of that long since, and happily settled, slavery question. The slavery question agitated the civilised world for a century. No more emotion was expended, no greater misconception of facts occurred, no greater stubbornness of opinion was shown in the initial stage of the solution of that problem, than has been shown in the initial stages of the solution of this opium question. Before the slavery question was finally settled it well-nigh tore a continent in two. In the United States we were dominated for fifty years by discussions of the slavery question, which finally led to a horrid war,—and that in spite of the great example set us by the British Government in voluntarily freeing the slaves in her colonies, and in charging her Imperial budget with a sum which may be said to be fifteen times the sum involved in the Indian opium traffic, the opium farms of Hongkong, the Straits Settlements, Federated Malay States and Ceylon.

“During the last few years our people have watched with admiration a repetition of history. For they have seen the beginning of a determined, and they hope a final, effort by that same great nation to sacrifice a great revenue to the end that another widespread evil may cease. In watching this historical day, our people, besides cleaning its own house, have felt that the century old desire of China is about to be fulfilled. That we live in a new day in which, were he alive, the great Warren Hastings would, while enunciating the great fundamental principles which filled his mind, say somewhat differently in the matter of foreign commerce in opium. We believe that he would say, and would be endorsed by the decent opinion of mankind, that opium was not a necessary of life, that it was undesirable to increase the production of any such article, that opium was a pernicious article when regarded as an article

of luxury, an article, on the other hand, which the wisdom of Governments should carefully restrain from consumption, internally, and let us add, abroad. The day we are in is a modern and more happy day than the day of Warren Hastings. It is a day in which moves the force of another great Indian and Imperial statesman, a great philosopher also—Lord Morley. Lord Morley is not afraid to say that he did not ‘wish to speak in disparagement of the Royal Commission, but somehow or other its findings had failed to satisfy public opinion in this country, and to ease the consciences of those who had taken up the matter What was the value of medical views as to whether opium was a good thing or not, when we had the evidence of nations who knew opium at close quarters. That the Philippines Opium Commission in the passage of their report, which he hoped the House of Commons would take to heart, declared that the United States so recognized the use of opium as an evil for which no financial gain could compensate, that she would not allow her citizens to encourage it, even passively.’

“Lord Morley could further express himself on three most important points:—

“The first, concerning his insistence that China must fulfil her part of the agreement founded on her own proposals, if England is to do the same. He (Lord Morley) explained that from his point of view such insistence was intended, not as a threat to China, but rather as a help to her to hold fast to her obligation, and to go forward with its fulfilment.

“The second point concerned the action of our Government in case China should fail to carry out her own proposals—was it to be understood that the present movement for the gradual extinction of the Indian opium export should, in that case, come to an end? Lord Morley did not see that that was implied. There were two broad grounds for the present movement; one, the proposals of the Chinese Government, the other the resolution of the House of Commons on the 30th May, 1906. If the first should fail, the second did not necessarily cease to be a ground of action.

“The third point concerned a possible plea on the part of China that the process of reduction might go no more swiftly than her own first proposals contemplated. Would Lord Morley be prepared to consider such a plea if deliberately put before him by the Chinese authorities? In reply Lord Morley said that he could only refer to his statement on the 30th May, 1906, that any deliberate proposals from the Chinese Government on the subject of opium would meet with sympathetic consideration.’

“Is Great Britain to halt? Our Delegation, our people do not believe it. Great Britain will not halt if we are to credit her public opinion, her press, her present eminent Secretary of State for Indian Affairs. Our people believe that Great Britain will defend herself against the criticism of all right-minded people by replacing her opium revenue, sacrificing it mayhap, and by sacrificing dual agreements, and obsolete treaties, as she sacrifices, and sends to the scrapheap an obsolete class of battleships that are of no further use to defend her extensive interests. We live in a day when such things may be done by our great Mother Country. We live in the day of such large minded Governors-General and Statesmen as Lord Minto who declares, ‘That there is no doubt throughout the civilized world a feeling of disgust at the demoralising effect of the opium habit in excess. It is a feeling in which we cannot but share. We could not, with any self-respect, refuse to assist China on the ground of loss of revenue to India.’ And here let me express my admiration for the Honourable Member of the Indian Government who sits in the British Delegation, for placing this statement of Lord Minto’s in the record of this International Opium Commission.

“It is the day of such great lawyers and statesmen as Mr. Elihu Root, who could bring to life this International Opium Commission. It is the day of such practical churchmen and philanthropists as Bishop Brent whose mind grasped the opportune moment for suggesting the calling of this Commission. It is a day when this troublesome opium question is no longer the concern of one or two Powers, who have direct interests in the traffic and illicit use of opium,—but a day when the great Powers of the world who have kept aloof from the problem may join with those others and, out of their experience, advise on this question. It is a day, let us hope, in which moves the old happy spirit that leaped at the discovery of opium as an anodyne for those irretrievable ills from which the human mind and frame may sometimes suffer. It is a day, we venture to hope, when opium shall by the voice of this International Opium Commission be relegated and consecrated to its proper use in relieving the really sick. The American Delegation trusts that it is a day when opium shall no longer be made to descend from its high place among the gifts of nature to pander to the desires or vices of mankind.

“Personally, through this more recent and more through study of the opium question, I have seen that the abuse of opium is a sad business. It was with a feeling not far from shame that it fell to my lot to place before this Commission the unhappy state of the opium

question in the United States. I venture to place myself with those other gentlemen on the floor of this House who by their training are best able to judge of the mental and physical conditions that arise and ultimately call for the use of opium. We would agree that the need for opium often occurs. We know, as the great Sydenham said, that medicine would go limping had it not been for the discovery of the drug. We would agree, I think, that there is a constant temptation to the most enlightened members of the medical profession to the use of the opium to relieve mental and physical pain, a temptation to which the medical profession too often gives way; yet because I know these particular phases of the opium problem, all the more am I firmly convinced that opium in all of its forms is a drug to be honestly and simply used only in those stresses and strains of mental and physical life that may be said to be extreme.

“With these thoughts in our minds our Delegations has had to face an International Problem that earnestly calls for the study of questions of revenue, of treaties between various Powers on the question of opium, of dual agreements of the same nature for the control or reduction of the use of opium amongst those peoples to whom it is a familiar and ready remedy for all the minor ills that flesh and mind are heir to. There has at times been a temptation to look at the opium problem from the moral, the medical, the financial, or the historical point of view alone. But on the whole we may assert that we have resolved the opium problem in its most comprehensive sense; and that, if we had any thought that it was a problem of easy solution without the conjoint action of the different Governments here represented, we have been sobered. It is with strong convictions but in generous spirit that the American Opium Commission presents its resolutions with a hope that they may be acceptable to this Commission as a whole, with a hope that there shall speedily be recorded the first great International step in the solution of this vexatious questions, so that the East and the West may be free without further conflict of opinion to proceed to discuss those other, but minor, problems that still agitate them.”

Dr. WRIGHT, continuing, said that in introducing these resolutions their Delegation had no intention of being dogmatic. They were presented more in the shape of a skeleton, which it was hoped the wisdom and thought of the other Delegations would be able to clothe. They were couched, perhaps, in too precise language, but in drawing them up their Delegation thought it was better to have them as precise as possible, and to trust to the advice of other Delegations to soften them, or to give them a new direction, where needed.

Dr. WRIGHT then read the first of the American resolutions :

That, whereas the reports submitted to the International Opium Commission by the Delegations present recognise that opium, its alkaloids, derivatives and preparations are, or should be, confined to legitimate medical practice.

Be it Resolved, therefore, that in the judgment of the International Opium Commission a uniform effort should be made by the countries represented at once or in the near future to confine the use of opium, its alkaloids, derivatives and preparations to legitimate medical practice in their respective territories :

And be it further Resolved, that in the judgment of the International Opium Commission each Government represented is best able to determine for its own nationals, dependent or protected peoples, what shall be regarded as legitimate medical practice.

Dr. WRIGHT stated that his Delegation realised that the term *legitimate medical practice* did not mean the same in every country, and that what constituted legitimate medical practice in France, the United States, etc., would not be considered as such in India or China, where there were not a sufficient number of physicians ; so in the last paragraph, bearing on the first postulate, they had taken the view that each Government was capable of deciding itself what constituted legitimate medical practice in its own territory.

The second American resolution, as read by Dr. WRIGHT, ran as follows :—

That, whereas the reports submitted to the International Opium Commission by the Delegations present recognise that, as the result of inadequate knowledge in the past of the baneful effects of the unguarded and indiscriminate use of opium, its alkaloids, derivatives and preparations, there have arisen certain revenue problems which depend upon the production, sale and use of opium, its alkaloids, derivatives and preparations :

And further, whereas, in the judgment of the International Opium Commission these revenue problems remain and will require a certain time for solution :

Be it Resolved, therefore, that in the judgment of the International Opium Commission no Government should, as a matter of principle or necessity, continue to depend upon the production of opium, its alkaloids, derivatives and preparations for an essential part of its revenue :

And be it further Resolved, that in the judgment of the International Opium Commission such revenue problems as exist are not of a nature to baffle the Governments confronted by them; and that they should be settled as soon as possible to the end that opium, its alkaloids, derivatives and preparations should be relegated to their proper use in legitimate medical practice.

The second postulate, Dr. WRIGHT said, was based on facts gleaned from the reports. They recognised that the United States had no financial interests in the opium question except in the Philippines, where they had lost 3 per cent of revenue by prohibition, and where they had had to add considerably to the budget by preventive work, but at the same time they recognised that there were larger problems affecting some of the countries represented on the Commission. Therefore they had resolved that "these revenue problems remain and will require a certain time for solution."

Continuing, Dr. WRIGHT stated that they wanted to avoid going into details; they, of course, recognised that an export duty was a perfectly legitimate tax, but that formed a very small part of the revenue derived from opium by several of the countries represented there. The country that would be most seriously affected by the withdrawal of revenue on opium was India. They had the assurance, however, of the representative of the Indian Government that that Government was not baffled by the problem. With reference to the wording of the last paragraph of the resolution, where it was stated that such revenue problems as exist "should be settled as soon as possible," the speaker regretted that the language used was so positive; but his Delegation was perfectly willing to make any alteration that might be considered desirable.

The third American resolution was to the following effect:—

That, whereas, the reports submitted to the International Opium Commission by the Delegations present state that opium smoking is prohibited to their nationals; further, that some of the Reports submitted state that opium smoking is prohibited to protected and dependent peoples of some of the Governments here represented:

Be it Resolved, therefore, that in the judgment of the International Opium Commission, the principle of the total prohibition of the manufacture, distribution and use of smoking opium is the right principle to be applied to all people, both nationals and dependent or protected; and that no system for the manufacture, distribution or use of smoking opium should continue to exist, except for the express purpose and no other of stamping out the evil of opium smoking in the shortest possible time.

Dr. WRIGHT thought that this resolution called for no comment, and he continued to read the fourth resolution:—

That, whereas, the reports submitted to the International Opium Commission by the Delegations present, record that each Government has strict laws which are aimed directly or indirectly to prevent the smuggling of opium, its alkaloids, derivatives and preparations into their respective territories.

Be it Resolved, therefore, that in the judgment of the International Opium Commission it is the duty of all countries which continue to produce opium, its alkaloids, derivatives and preparations, to prevent at ports of departure the shipment of opium, and of its alkaloids, derivatives and preparations, to any country which prohibits the entry of opium or of its alkaloids, derivatives and preparations.

Dr. WRIGHT explained that in drawing up this resolution the American Delegation had in mind their own problem in the Philippines. He then read the fifth resolution:—

That, whereas, the reports submitted to the International Opium Commission by the Delegations present, indicate that the use of morphia, its salts and derivatives, is indissolubly bound up with the abuse of opium itself, and that their use accompanies, or sooner or later supervenes, on the use of opium itself:

Be it Resolved, therefore, that in the judgment of the International Opium Commission, strict International Agreements are needed to control the trade in, and the present or possible future abuse of, morphia and its salts and derivatives, by the people of the Governments represented in the International Opium Commission.

In drawing up this resolution, Dr. WRIGHT said, his Delegation had no other country in mind but their own. They had, perhaps, the largest morphine problem to face of any country represented on the Commission, but here again they were willing to accept any reasonable amendment.

Dr. WRIGHT then read the last two of the resolutions drawn up by his Delegation, without further comment :

That, whereas, the reports submitted to the International Opium Commission by the Delegations present indicate that though each Government represented is best able by its National Laws to control its own internal problem as regards the manufacture, importation or abuse of opium, its alkaloids, derivatives and preparations, yet that no Government represented may by its National Laws wholly solve its own opium problem without the conjoint aid of all those Governments concerned in the production and manufacture of opium, its alkaloids, derivatives and preparations :

Be it Resolved, therefore, that in the judgment of the International Opium Commission, a concerted effort should be made by each Government represented in the Commission to assist every other Government in the solution of its internal opium problem.

That, whereas, the reports submitted to the International Opium Commission by the Delegations present, directly or indirectly recognise that the foregoing resolutions cannot be made effective except by the conjoint action of the Government concerned :

Be it Resolved, therefore, that the Commission as a whole, record its sense in favour of the principle of an International Conference for the solution of the problem.

H.E. Monsieur MIYAOKA enquired of the Chair if each Delegation would be at liberty to introduce any resolution at any time during the proceedings until the final vote on all the resolutions was taken. The PRESIDENT said it was for the House to decide whether it were preferable to take up the individual resolutions which had already been presented, or to receive others that might be in hand, and to discuss them all *seriatim*. He understood that the Chinese and Netherlands Delegations were prepared to submit resolutions to the House.

Mr. TANG KUO-AN stated that the Chinese resolutions were not quite ready for distribution.

The Right Hon. Sir CECIL CLEMENTI SMITH suggested that the House should proceed to consider the resolutions presented by the American Delegation, and his proposal was accepted.

Dr. HAMILTON WRIGHT, having moved the adoption of the first American resolution, the Right Hon. Sir CECIL CLEMENTI SMITH addressed the House as follows :—

“Mr. President,—The British Delegation considers that it would be more respectful to put in a formal way before this Commission the views that it holds as regards this resolution. With your permission, therefore, I will read our opinions which have been put in formal language :—

“It has been the earnest wish of the British delegation that the labours of the Commission should result in the unanimous recommendation of measures which might have some practical effect in leading to the removal of those abuses which are found, though in varying degrees, to be connected with the use of opium. It is, therefore, with extreme regret that we find ourselves unable to give the conveners of the Commission our entire support in all the proposals which they put forward. I may say at the outset that the form of their proposals would alone make it difficult for us to accept them. Misunderstanding and misapprehension, we believe, can only result from a vote in favour of prohibition in the unqualified form in which it is presented in these resolutions. They will see in due course that we are prepared to go with them on the practical issues connected with the question of opium smoking. I should, however, be out of order in discussing the resolutions collectively. We have now to deal with the particular resolution before us, and I will state the reasons for our inability to support it.

“The resolution purports to reproduce, and the recommendation which it contains purports to follow directly from, the statements of policy which have been made by the different participating countries in the reports submitted to the Commission. We object to the resolution in the first place because it unquestionably puts an erroneous construction on some of these reports, when it lays down in its preamble that they recognise that the use of opium should be confined to medical practice. It is true that certain countries concerned in this investigation are already attempting to limit the use of opium to medicinal purposes, or have definitely arrived at the decision so to limit it. This is the case, for example, with America and Canada where a foreign form of indulgence, previously unnoticed and uncontrolled, was at length found to be gaining a hold on the white population. It is also true of China : where the practice of opium smoking has spread, uncontrolled, until the Government of the country find that it is impairing the national strength ;

where the character of the administrative machinery seems to offer no alternatives other than complete extirpation or unrestricted license; and where there is strong public support behind a policy which, without that assistance, could only end in disastrous failure.

“There are, however, other countries to whom the opium question presents itself under wholly different conditions. Either they have not accepted the view that the use of opium can or should be strictly confined to medical purposes, or, if they look forward to prohibition as the ultimate goal, they are still so far from its attainment that the proposition enunciated in the resolution could not be a practical guide to their action in the near future. By way of example I need only cite the case of India. You are all aware that regulation and not prohibition is the declared policy of the British Government in the whole mainland of India, and that the report which we have laid before you clearly establishes this distinction, and indeed strongly emphasizes it by the special attention which it devotes to the study of experiments in prohibition in Burma. Our examination of the conditions in India has not satisfied us that it would be justifiable, and has made it absolutely clear that it is altogether impracticable in the near future, to depart from this established policy. We cannot, therefore, accept the unqualified statement contained in the preamble to the resolution, or the recommendation which follows from it.

“The opium habit has been known in India for centuries. You have only to look at the statistics of consumption to-day, and compare them with the lowest estimates of consumption in China, and remember how rapid has been the extension of the production and consumption of opium in the latter country, to see that the system of regulation built up in India is in fact, in a large measure, an efficient instrument in the prevention of abuse. You have only to consider for a moment the relations between the ruling power and the subject populations of India to realise that despotic interference with a national habit, dating, as I have said, from a period long anterior to British rule, could only be justified if that habit had been the cause of extensive social degradation, of which we have no sufficient evidence, or by the assurance of strong and genuinely popular support from Indian public opinion. This general support would not be forthcoming to-day. Indeed you will yourselves have realised, from a study of our report and of the explanations with which it was introduced, that the present would be a singularly inopportune occasion for inaugurating so questionable a political experiment. I need not enlarge on the difficulties involved, but would remind you that they are not wholly, and in our opinion not even primarily, financial, except to this extent,—that we should certainly advise that further sacrifices of revenue should not be contemplated until time had been allowed for the loss of the revenue from the export trade to be made good from the growth of ordinary taxation.

“But, as I have said above, the task of prohibiting opium is in any case impracticable in the near future—with which alone we need concern ourselves. I would ask you to look at the map of India, and to recollect that the countries along our northern frontier are opium-producing states to an extent which, if not great at present, admits of expansion to meet an insistent and accessible demand—that in the heart of India we have a solid block of 200,000 square miles of native state territory, with a correspondingly extended land frontier, where, among a population of over 17 millions, the production and transit of opium are not under direct control—and that still further south opium is in general use in the great state of Hyderabad, with an area of 80,000 square miles and a population of 11 millions, a State which possesses the right to resume the cultivation of the poppy at any time after twelve months’ notice, and has only conditionally suspended the exercise of that right in order to obtain a higher revenue from an external source of supply which can be more readily taxed than scattered production within its own territories.

“I am not raising speculative difficulties. We know from actual experience in regard to these same centres of production in the past what we must expect in the future. We know too from actual experience the evils and futility of a policy which can only be maintained by the employment of enormous preventive establishments to guard an extended inland barrier. But I may take a more familiar case—one in which we can point to a candid appreciation of our difficulties by an impartial outside authority, and a generous recognition of our efforts to overcome them. I refer to Burma. You have seen how in the far simpler case of Burma, where the religious sentiments of the people and the best opinion among them are all on our side, and we are dealing with a single province isolated from the mainland of India, the problem of prohibition has resisted the efforts of the Government for a period of fifteen years, and can hardly yet be regarded as solved even by the system of minute individual scrutiny which has now been attempted. It is clear that even if the British Government were prepared to admit the equity of denying the use of opium to the peoples of India generally—to proscribe it as the source of

more extended social injury than alcohol and hemp drugs, the consumption of which they already regulate but do not prohibit—that decision could not be enforced except after a long period of preparation, during which, by perseverance with the present policy of regulation, the demand for opium as an indulgence had been gradually reduced and an effective public opinion against its use had been created. It would be difficult indeed to get as far as this, for the obstacles I have already mentioned will interpose themselves there as restriction becomes more irksome.

“It is equally clear—and I take it to be the intention of the last paragraph of the resolution to recognise—that we cannot, either by excessive restrictions or by direct prohibition, withhold from the peoples of India a drug which is one of the main household remedies on which they rely. Even if we adopted the resolution in principle we should still, and for a long time to come, be compelled to put a most liberal construction on the term ‘medical purposes’; and to entrust the distribution of the drug for such purposes to a subordinate agency, constantly exposed to strong temptation. This further opportunity for irregularity would go far to complete the undermining of a scheme of nominal prohibition.

“We should not be dealing fairly with the Commission in slurring over these difficulties and objections. We cannot advise our Government to pledge itself to a principle for which it cannot be seriously urged that the information placed before the Commission supplies any new foundation, and which would not lead directly and in the near future to any action other than that already implied by the existing policy of regulation.

“We are at one, however, with every member of this Commission in desiring in every practical way to prevent the abuse of the drug, and we believe that the acceptance of the fourth of the resolutions which we have placed on the table will tend towards this common end.

“In conclusion I can only add that we shall be unable to support the resolution brought forward by the American Delegation.”

Dr. WRIGHT.—“If the preamble to Resolution No. 1 contained the words *Legitimate medical practice or Government Regulation* would that meet the objection of the Right Hon. Commissioner for Great Britain?”

Sir CECIL CLEMENTI SMITH.—“I regret to say that we consider that this would not meet the difficulties which I have already indicated at some length in the paper which I have just read.”

Dr. RÖSSLER suggested that the words “as far as practicable” might be inserted after the word “confine” in the second paragraph of the resolution. This, he thought, might meet the objections of the British Delegation.

Sir CECIL CLEMENTI SMITH.—“To put it perfectly plainly, and to be entirely frank, the British Delegation is not able to accept the view that opium should be confined simply and solely to medical uses.”

Dr. HAMILTON WRIGHT agreed that one of the greatest difficulties which the British Indian Government would have to contend with was the definition of what constituted “legitimate medical practice,” it being impossible to apply modern western medical ethics to a great country like India.

After further discussion it was decided, on the motion of Monsieur RATARD, that the further consideration of the resolution should be postponed in order that the British and American Delegations might confer together.

Dr. HAMILTON WRIGHT moved the adoption of the second American resolution.

Speaking for his Delegation the Right Hon. Sir CECIL CLEMENTI SMITH said:—

“We are unable to accept the proposition implied in the preamble, that the revenue derived by certain countries from opium is primarily due to the unguarded and indiscriminate use of the drug. It is a commonplace of opium administration, and is abundantly clear from the reports themselves, that it is the most efficient systems of regulating the use of opium which yield the highest return in revenue.

“Nor are we prepared to give to the revenue aspect of the opium problem the prominent position which this resolution assigns to it. I think our attitude in this matter will be sufficiently clear from the observations which I have already made on the first of these resolutions.

“ Finally we can find no warrant for the sweeping statement in the last paragraph of the resolution that such revenue problems as exist are not of a nature to baffle the Governments confronted by them. If any country finds the prohibition of the use of opium to be incumbent upon it, its revenue problem will no doubt be faced and ultimately successfully faced. But we have no justification for minimising the revenue difficulties involved, or indeed, in the judgment of this delegation for intruding at all into their fiscal domain. It is not only those countries in which the use of opium prevails which derive a substantial portion of their revenue from an excise on articles the consumption of which is associated with abuse.”

Monsieur RATARD.—“ I should like to observe that as regards opium prohibition, fiscal considerations have very great weight in certain countries. But it must not be imagined that a growing revenue derived from opium means any relaxation of the policy of regulation. On the contrary the result would be reduced consumption. In such countries as Java, and French Indo-China, the fact that the tax on opium is regularly increased practically takes the drug out of the reach of the native population.”

Dr. ROSSLER suggested that the resolution under discussion should also for the present be withdrawn and reconstructed for further consideration.

Dr. HAMILTON WRIGHT said that it would have been better in his opinion if the resolution had been previously discussed by a Committee such as the Chief Commissioner for Germany had proposed, but as that could not be done he hoped that the various delegations would reserve their opinions on this resolution until later. For the present he withdrew the resolution. He then moved the adoption of the third of the American resolutions.

Sir CECIL CLEMENTI SMITH.—“ I should like to say in regard to this resolution that we accept in principle what is aimed at, and what we are prepared to do is to vote for a resolution which would recommend that each Delegation move its own Government to take measures for the gradual suppression of the practice of opium smoking in its own territories and possessions. We are of opinion that the practice of opium smoking is one which should be done away with. It is manifest to everybody, however, that you would require in different countries, where circumstances vary, different systems by which to carry out the object in view, and if it is acceptable to the Commission as a whole, then that principle is one which the British Delegation would be prepared to submit as an amendment to the resolution.”

Chief Commissioner for Japan.—“ I rise to express the opinion of the Japanese Delegation that from experience gained in Formosa the Japanese Government consider that the best way of dealing with the opium habit, i.e., the most practical way, is by gradual abolition, so that men and women addicted to the use of opium may break off their habit with least inconvenience to themselves. From experience gained, the Japanese Government is of opinion that gradual suppression is the only practical solution. Therefore, I agree with the Right Hon. Chief Commissioner for Great Britain in suggesting an amendment to Resolution No. 3 based on the principle of gradual abolition. Of course, should the American Delegation see their way to change the nature of their resolution we should be only too glad to accept it.”

Dr. HAMILTON WRIGHT, speaking on behalf of his Delegation, said that he was willing to modify the resolution to meet the wishes of the other Delegations.

The Chief Commissioner for the Netherlands.—“ I may mention that this Delegation has a resolution to offer which embodies the views expressed by the last speakers.”

The Chair expressed the opinion that the last resolution might come under the same ruling as the two previous resolutions. This suggestion was accepted, and the resolution was withdrawn for modification.

Dr. HAMILTON WRIGHT then moved the adoption of the fourth resolution.

Sir CECIL CLEMENTI SMITH suggested that the words in the second paragraph of the resolution: “ which continue to produce opium, its alkaloids, derivatives and preparations ”: should be omitted. This would put the pressure not upon one country only but upon all countries. He also ventured to suggest to the United States Delegation that the paragraph in question should read “. . . . it is the duty of all countries to adopt reasonable measures to prevent, etc.”

Dr. HAMILTON WRIGHT accepted these amendments, and the resolution in its altered form was adopted unanimously by the House.

(*Note.*—The Portugese Delegation asked permission to reserve its vote on each and all of the resolutions.)

Dr. HAMILTON WRIGHT moved the adoption of the fifth American resolution.

The Chair drew the attention of the House to the fact that a similar resolution had been drawn up by the British Delegation.

Sir CECIL CLEMENTI SMITH.—“A father generally approves of his own children, and perhaps I may be pardoned for saying that though we quite follow the points referred to in the resolution under discussion, we should prefer, and it would be more in order if I moved it as an amendment, the wording of our own resolution, with the words “to China” and “other” omitted. It would then read as follows:—

That the Commission finds that the unrestricted manufacture, sale and distribution of morphine already constitute a grave danger [to China], and that the morphine habit is already known, and shows signs of spreading, among [other] peoples in the East and elsewhere: the Commission therefore desires to urge strongly on all Governments that it is highly important that drastic measures should be taken by each Government in its own territories and possessions to control the manufacture, sale and distribution of this drug, and also of such other derivatives of opium as may appear on scientific enquiry to be liable to similar abuse and productive of like ill effects.

Dr. HAMILTON WRIGHT.—“We are quite willing to accept the resolution that has just been read in place of our own.”

Monsieur RATARD asked whether the words “the manufacture” were absolutely necessary.

Sir CECIL CLEMENTI SMITH thought that the words should be retained.

H.E. Monsieur MIYAOKA suggested that the words “among people in the East and elsewhere” should be omitted.

This was agreed to, and the resolution as amended was adopted unanimously by the House when put to the vote.

The Commission adjourned at 12.30 p.m.

On re-assembling at 2.30 p.m., Dr. HAMILTON WRIGHT moved the adoption of the sixth American resolution.

Sir CECIL CLEMENTI SMITH.—“The first portion of this proposed resolution admits that each Government represented on this Commission is best able by its National Laws to control its own internal problem as regards the manufacture, importation and abuse of opium, yet lays down that no Government is wholly able by its laws to solve its opium problem without the assistance of other Governments.

“I think I am not going in the least degree too far when I say that the United States of America has solved its own problem in a most effective way. At any rate I think that the Act of Congress recently introduced, or rather the substance of the Act which has been communicated to this Commission, shows that the United States Government is entirely qualified to deal with the internal problem of their own country.

“I do not wish to press the matter,—I only wish to take that case as an illustration of the argument which I wish to urge upon this Commission. It appears to me that we are interfering or proposing to interfere in a way which our instructions do not allow of in the matter of internal administration, and that alone, to my mind, makes it almost impossible for us to fall into line with the American Delegation.

“With regard to certain words in the second portion of the clause I, must only confess that I fail to see how you can have concerted effort made by *each* Government represented in the Commission. I do not wish to criticise the language, but no doubt that language will be severely criticised by others.

“The principle which is aimed at in this resolution is a direct interference with the internal administration of a country, which I do not think it within our power to deal with, and on that ground alone I think it would be imprudent to accept the resolution which has been introduced by the American Delegation.”

Dr. WRIGHT.—“In the preamble I do not think that we wished to express that any Delegation has the right to interfere in the internal administration of a country; but, to take our own case, we are not able and will not be able to make the law effective unless we have assistance. I think everybody recognizes that. We frankly acknowledge in this resolution that our Government cannot solve its opium problem by its own national law, and think that the other Governments ought to help us; and I think the same remark applies to other countries. We would be perfectly willing to drop the word *each* before *Government* if the British Government would vote for this resolution.”

Monsieur MIYAOKA pointed out that the resolution under discussion was very similar to the one numbered “4” that had already been adopted by the House.

Several speakers concurred with this view, and Dr. WRIGHT eventually withdrew the resolution, as the question that it was intended to deal with was sufficiently covered by the two resolutions already adopted. He then moved the consideration of the seventh American resolution.

The Right Hon. Sir CECIL CLEMENTI SMITH said that the instructions issued to the British Delegation were specific, and he felt great difficulty in going beyond them. He thought that it would be presuming on their position were they to suggest the speedy calling of an International Conference. That was a matter that should be left to the Governments concerned. Personally, he would not like to approach his Government telling them what they ought to do, and he felt that it was impossible to accept the resolution before them.

Monsieur RATARD having suggested that the resolution should be considered at some future date, Dr. HAMILTON WRIGHT withdrew the resolution on that understanding.

On behalf of the American Delegation Dr. TENNEY brought forward the following as a separate resolution:—

Be it Resolved, that in the opinion of the International Opium Commission every nation which effectively prohibits the production of opium and its derivatives in that country, except for medical purposes, should be free to prohibit the importation into its territories of opium or its derivatives, except for medical purposes.

Dr. TENNEY said: “Mr. President.—It is a fortunate thing that the deliberations of this Commission have not been disturbed by the clashing of extreme and hysterical views on one side or the other of the opium question. We have met as sensible men to study the question in a sane and sober manner. The world knows and admits that opium and morphia constitute a danger that threatens the welfare of China, and no less that of other nations.

“The various Government regulations which we have been studying, whether prohibitive except for medical purposes, or merely restrictive, are all founded upon the premise, disputed by none, that the use of opium or its derivatives constitutes a danger to every state represented here. Beyond question it is the general opinion of the world that the use of opium or morphia enfeebles the will, diminishes the efficiency, and injures the characters of the people, and measures have been taken accordingly.

“Every nation represented at this Commission, with one exception, has a free hand to take such steps as it deems necessary to safeguard its people from the injury which results from the misuse of opium. But that one nation whose hands are not free is unfortunately the one which, in its own opinion as well as in that of all competent observers, has suffered most severely from the spread of the opium habit.

“Speaking for myself, a long residence in China has caused me to feel a profound sympathy for the Chinese people. I am not blind to the faults of the Chinese social and political organization, as, I trust, I am not blind to certain faults of my own nation; but I have real confidence in the general soundness of Chinese public opinion upon moral issues clearly brought before them.

"Our colleagues of the Chinese Delegation have presented a report upon the present condition of the nation in regard to the production and misuse of opium in the Empire. That report has been in many respects unsatisfactory both to them and to us. It has been quite impossible for our fellow Commissioners of China, as they have frankly admitted, to furnish us with accurate statistics from all parts of the Empire. Instead of such statistics they have only been able to give us *estimates*, made, I believe, by fair-minded observers of various classes and nationalities. They have been unable to prove to us that the officials and people of the different provinces and sections of the Empire are *all* actuated by the *same* degree of earnestness and sincerity in carrying out the reform movement inaugurated by the Imperial Government two years ago. The Chinese report, carefully studied, also reveals the incompleteness of the control exercised by the Central Government over the provinces, a difficulty which every American can appreciate, owing to our own experience of the many difficulties in carrying on the federal system of government which has been adopted in the United States.

"But while we admit the inadequacy and incompleteness in exact statistical data of the report which the Chinese Delegation has presented to us, it is still possible to form certain definite conclusions from it. I think there can be no doubt in the mind of anyone who has carefully studied the Chinese report that these three facts are fully established :

- 1.—The Imperial Government of China is thoroughly in earnest in the anti-opium reform movement.
- 2.—There has been a remarkable growth of public sentiment in favor of the eradication of opium.
- 3.—There has been very decided and satisfactory progress made in carrying out the Imperial Edict of 1906. With few exceptions the provincial authorities have run ahead of the Edict and have reduced the poppy acreage much more rapidly than the original Edict called for.

The comity of nations calls upon us to lend a helping hand to China in the gigantic task to which she has set herself. It is not easy to divert the minds of four hundred million people from the thoughts and cares that ordinarily engross them, and centre their thoughts upon a great moral reform. Those who think that the Chinese are a phlegmatic race, not susceptible to the influence of enthusiasm and emotion, and not responsive to appeals to the moral sense, do not know the nation. The Chinese like other nations are capable of earnest endeavor and great sacrifice under the spur of an awakened conscience, and as is the case with all other peoples it is hard to keep them for a long period of time on the heights of moral heroism and self-sacrifice.

There is a tide in the affairs of men,
Which taken at the flood, leads on to fortune :
Omitted, all the voyage of their life
Is bound in shallows, and in miseries.

This wise saying of our great poet applies to those periods of moral awakening that come to all nations. It will be easier for China to rouse herself to one mighty effort to throw off the bondage of the opium habit than to persist in a long programme of gradual reform stretching over a term of years.

"The existing Treaties prevent China from exercising her right as a Sovereign Power to act for the protection of her own people. The consciousness of this limitation acts as a paralysis upon the minds of Chinese reformers. Rightly or wrongly it turns into pessimists multitudes who would otherwise be working with enthusiasm for the regeneration of their country. This I know by abundant evidence.

"Gentlemen, I wish to say clearly and deliberately that in our opinion it is a disgrace to modern civilization that such a condition should be allowed to continue.

"This resolution is not to be interpreted as a fling against Great Britain on the part of the American Delegation. Nothing is further from our thoughts. Action by all the Treaty Powers is necessarily involved if China is to enjoy her rights as a Sovereign State in dealing with the opium question. We fully appreciate the fine spirit which has been shown by the British Delegates and we hope it may be further exhibited by their supporting cordially this resolution. Such action as that which we urge would give China a fair opportunity to show that she is in earnest, that she can help herself; and if she can help herself friendly nations ought to help her. If she proves unable to help herself, then the blame rests solely on her own shoulders. If it is, as we believe, a question of duty, then this help ought to be given without haggling or demanding any *quid pro quo*. No honorable man tries to exact payment for doing what honor demands of him, or refuses to do what is right because it may cost him something. I am sure that each of us wishes his own nation to conduct its foreign policy on

the same principles that actuate the ideal man in his private relationships, and therefore we say that all the Governments of all the Treaty Powers should give China the "square deal" regardless of any possible temporary loss or inconvenience that it may cause them. Unquestionably a moral tide is now rising in China. Let us help the Chinese ship of state to take it at its flood and reach the harbor of national strength and prosperity!"

Mr. T'ANG KUO-AN.—"The Chinese Delegation, whilst supporting the resolution just put forward by the American Delegation, intend to introduce a resolution similar in effect, although couched in different terms. We will, consequently, refrain from making any remarks now, but we wish to announce officially that we endorse every word that has just been uttered by Dr. TENNEY."

Monsieur MIYAOKA.—"May I ask Mr. T'ANG whether he is prepared that action should be taken on this resolution before us? I understood him to say that the Chinese Delegation intends to submit a resolution which though differently worded, embodies the same idea."

Mr. T'ANG KUO-AN.—"As far as this resolution is concerned we are prepared to have it submitted to the Commission. Our own resolution is not of such a general character, but has special reference to China, and I do not think the two resolutions are likely to conflict with each other."

Sir CECIL CLEMENTI SMITH.—"It would be exceedingly interesting to us to know whether the Chinese Delegation is speaking with the authority of its Government, or whether it is merely expressing the personal opinion of its Members upon Dr. TENNEY'S resolution."

Mr. T'ANG KUO-AN.—"The Chinese Delegation submit that they are responsible to their Government for their actions. I do not think that, being representatives of a Sovereign Power, we should be called upon by a Member of any Delegation to state whence our authority is derived."

Sir CECIL CLEMENTI SMITH.—"Then I will go at once to the root of the matter. As far as I understand, Mr. T'ANG, on behalf of the Chinese Delegation, supports this resolution which has been submitted to the Commission by Dr. TENNEY. The effect, which, of course, would not escape Mr. T'ANG, is an entire abrogation of Treaties. Whether the Chinese Government are prepared to accept that situation I, of course, do not know, nor am I prepared to say whether any Government would accept that position but, speaking from general knowledge, I think it would be amazing to suppose that any Power would agree for one moment to the repudiation of Agreements solemnly entered into. It is only necessary to make a statement to that effect to show the absolute absurdity of the situation, and I trust that this International Opium Commission will not for one moment allow itself to agree to any form of words which will be interpreted as meaning that nations can lightly break Treaties solemnly entered into by them."

Mr. T'ANG KUO-AN.—"We had intended postponing the discussion of this point until to-morrow, but since the Right Hon. Sir CECIL CLEMENTI SMITH has brought it up, may I be allowed to say that it is not the intention of the Chinese Delegation, nor the intention of our Government, to go back upon their Treaties or Agreements, nor is it our intention to do anything or to say anything which might appear discourteous to the British Delegation: that would be farthest from our minds. However, we state here, and we have the authority of our Government for stating, that the ten years' arrangement entered into between Great Britain and China was, at the time, thought by us to be all that was required. But China did not have in mind never to bring up the subject for discussion. While I repeat, therefore, that we have no desire whatever to go back on any agreement, still we would appreciate any effort on the part of the British Delegation to further assist us by curtailing the period of importation into China; and it is with this view in mind that we have ventured to support the resolution brought forward by Dr. TENNEY. We do not come here to ask this as a matter of right. We are conscious of having entered into a compact with Great Britain to suppress opium in ten years by regular annual reduction, but, notwithstanding this agreement, we believe that we are not precluded from requesting the Powers whose Representatives are here assembled, and especially the British Delegation, to take our case into further

sympathetic consideration; and I may say that that is the spirit which has actuated us, and I believe that which actuates our Government in Peking. We have no instructions to go back on anything our Government has entered into; still our Government would appreciate any further concession which the British Government might see fit to make."

Monsieur MIYAOKA.—"Mr. T'ANG has referred to the question of the ten years' agreement concluded between Great Britain and his Government, and if I properly understood him he stated that the Chinese Government was not quite satisfied with the arrangement?"

Mr. T'ANG.—"I beg to explain further that at the time when the agreement was made between China and Great Britain our Government was satisfied for these reasons. They were satisfied to have a definite period of ten years, as that was far better than any indefinite period; and they appreciated the generous spirit by which Great Britain agreed to reduce importation of opium into China. But, at the same time as it was a tentative step, there was a doubt in the mind of our Government as to the manner in which our people would assist in carrying it out. Therefore we thought that we would be on safe ground if we accepted the ten years' period. But certain circumstances have since arisen. Our people have responded beyond our expectations. The degree of success we have attained has astounded and surprised the world; and our people are all clamouring for the suppression of the opium evil in China. I may say that since this Commission has opened its Sessions, we have received dozens of telegrams from different parts of our Empire, the gist of which has been to request us to ask the British Delegation to make further concessions by allowing us to reduce the period from ten years to a shorter period. We have not troubled this Commission by having all these telegrams read, because their purport is in every case the same. We think we are justified in asking Great Britain to meet us half-way, and therefore we come forward to-day, sooner than we expected, to ask that the British Delegation may be good enough to entertain that proposal."

Monsieur MIYAOKA.—"It appears to me that this is hardly the proper time to discuss a question pending between the British and Chinese Governments."

Sir CECIL CLEMENTI SMITH.—"It is very important that there should be no misunderstanding in this Commission upon the situation as regards Great Britain and China. I have been astounded at the words which have fallen from Mr. T'ANG. He has refused to tell us point blank whether the utterances delivered to-day have been in accordance with the instructions of his Government. He indicated that since China entered into the agreement with Great Britain the circumstances have altered; and he takes upon himself the responsibility of absolutely denying the statement which has been made from Peking, delivered only in January, which was to the effect that China was entirely satisfied with the arrangement which had been come to, and did not wish it altered."

Dr. HAMILTON WRIGHT.—"May I ask if that reply precluded the Chinese Delegation from bringing up the question and getting an expression of opinion?"

Monsieur MIYAOKA.—"It appears to me that we are drifting into an examination of a diplomatic question between China and Great Britain. My understanding of the work of this Commission is that it is to be one of investigation from a scientific and material point of view.

"In a note dated November 15th, 1907, addressed by His Excellency Mr. O'Brien, Ambassador of the United States in Tokyo, to His Excellency Count Hayashi, then H.I.J.M.'s Minister for Foreign Affairs, the proposal of the United States was thus described:—

'To conduct a joint and impartial investigation of the scientific and material conditions of the opium trade and opium habit in the Far East, which affect the possessions and direct interests of those Governments' (*i.e.*, of the Governments of Japan, Great Britain, France, Germany, The Netherlands and China) 'in that part of the world.'

"I am of opinion that the discussion which has been going on with reference to the ten years' arrangement is out of order."

Dr. TENNEY.—"I confess I have much sympathy with the view which has just been expressed that the line of discussion which has been taken up is not appropriate to the words of the resolution before you, and is entirely unnecessary. The resolution reads (Dr. TENNEY here read the resolution again).

"I confess I am surprised that this has not been cordially supported by the British Delegation and by every Delegation here. How can any right-minded man object to the principle which is embodied here! Whether it affects any agreement between Great Britain and China or not has nothing to do with it. China may be able to effectively prohibit importation of opium in ten years or she may not, but whenever she is able to furnish proof that the production of opium has been effectively prohibited, would it not be grossly unjust for any nation to insist in forcing the drug on her."

Monsieur MIYAOKA.—"I repeat that it appears to me as though we were entering into a diplomatic question. Not that I am opposed to this principle, which may be eminently just in itself, as Dr. TENNEY observes, but in view of the fact that it is one which has to be considered in the light of existing Treaty obligations, the question is whether this is the proper place in which to discuss it."

Sir CECIL CLEMENTI SMITH.—"Of course the British Delegation entirely concurs with the remarks of the Chief Commissioner for Japan. This is not the place for discussing diplomatic engagements, and we would not have drifted into such discussion had it not been that the mover, in addressing us on the resolution, stated that it only referred to China and the ten years' agreement. But, as has been said by the Chief Commissioner for Japan, this is not a subject which can be dealt with by this Commission, and I demur at once to the statement made that it will be unjust to call upon China to follow out engagements entered into by Treaty. If Treaties or Agreements are to be treated as waste paper by any one Power I might say that we could get rid of all Agreements at once."

The Chief Commissioner for France stated that in his opinion it did not fall within the province of the Commission to examine questions which were of a diplomatic order between Great Britain and China. Consequently the French Delegation were of opinion that Dr. TENNEY'S proposal was outside the scope of discussion, and dangerous besides.

Monsieur MIYAOKA.—"I beg to move that before a vote is taken on the adoption of the resolution before us a previous question be put as follows:—

'Whether the consideration of the resolution presented by Dr. Tenney for the American Delegation is within the scope of submission to this International Commission.'

Dr. TENNEY.—"I protest that this is a subterfuge."

Monsieur MIYAOKA.—"I beg to ask the Chair whether Dr. TENNEY is in order in stating that the question moved by the Japanese Delegation is a subterfuge?"

The PRESIDENT ruled Dr. TENNEY out of order, and announced that the previous question was before the House.

Monsieur MIYAOKA.—"In order that there may be no misunderstanding, I propose that, in the voting, "Aye" shall mean that the resolution is within the scope, and "No" that it is beyond the scope of submission to this Commission."

The result of the voting was as follows:—

<i>Aye.</i>	<i>No.</i>
United States.	Austria-Hungary.
China.	Netherlands.
Germany.	France.
	Great Britain.
	Japan.
	Persia.
	Portugal.
	Russia.

(The Siamese Delegation abstained from voting).

The PRESIDENT.—“In the judgment of the House the resolution is not in order in that it is outside the scope of submission to this Commission.”

The Right Hon. Sir CECIL CLEMENTI SMITH, on behalf of his Delegation, brought forward four resolutions, and moved the adoption of the first, as follows:—

That the Commission recognises the unswerving sincerity of the Government of China in their efforts to eradicate the production and consumption of opium throughout the Empire; the increasing body of public opinion among their own subjects by which those efforts are being supported; and the real, though unequal, progress already made in a task which is one of the greatest magnitude.

Dr. HAMILTON WRIGHT.—“May I ask first of all what the particular object of this resolution is?”

Sir CECIL CLEMENTI SMITH.—“We think that this Commission should let it be known to the world the view we take of the attitude of China.”

The resolution on being put to the vote was adopted unanimously.

Sir CECIL CLEMENTI SMITH then presented the second resolution, which read:—

That the representatives of China in this Commission are unfortunately not yet able to produce reliable statistical evidence of the actual extent of the diminution in the production of opium; and the Commission also apprehends that in some respects this fundamental element of the problem of prohibition may present increasing difficulties: the Commission would accordingly strongly recommend that the different Governments interested should enter into negotiations with the Government of China with a view to the initiation of more systematic methods of dealing with the question of production.

Sir CECIL CLEMENTI SMITH.—“I think it will be patent to all from the excellent speech which was made by Mr. T'ANG when he laid the report of China before us that there has not been in the past two years, since the Imperial Edict was issued, a statistical return which would enable any Government to form a definite opinion as to what has taken place in regard to the carrying out of that Edict; and I think we shall all recognise that this is a matter of importance in dealing with this question, more especially as it effects agreements with other countries, and that there should be a system introduced into China which will ensure their being official statistics upon which everybody can rely.

“The language of this resolution has been so framed, I trust, as not in any way to encroach upon the privileges which China enjoys as a sovereign Power.

“I trust it will be an expression from this Commission of the real importance of accurate statistical information, and that we think it is a proper subject for our Governments to bring to the direct notice of the Chinese Government. Without these statistics it is hardly possible for us to follow China in the task she has undertaken—a task which has been described by Mr. T'ANG himself as a gigantic one. All that we have in our minds is that we think our respective Governments can very properly urge upon China to get this information before the ten years have elapsed, and it is with that view that the British Delegation submits this resolution for adoption by the House.”

Monsieur MIYAOKA.—“As remarked by Sir ALEXANDER HOSIE, there would seem to be grave doubts whether the statistics in the Chinese report are of such a character as could be accepted by any Western Statistical Society. But if I am not greatly mistaken Mr. T'ANG clearly stated in explanation that in many cases the figures given were merely estimates, and did not claim to be statistical records. I hardly deem it proper, therefore, that we should pass judgment on the accuracy of these statistics.

“This is an International body composed of Delegates from all parts of the world,—from all continents except South America and Africa. That this Commission composed of Delegates from different countries having different traditions, different forms of administration, and different degrees of accuracy in taking statistics, that they should all combine in passing judgment upon the statistics which have been presented by the Chinese Delegates seems hardly proper. I must refrain from instituting comparisons of the reports submitted by the different Delegations, but I have no hesitation in saying that the area of investigation covered by the Chinese report was immense. China had the largest problem to report upon, and

in view of these facts I think that the Chinese Delegation is to be highly complimented on the work accomplished, and with your permission I tender them my hearty congratulations. It seems to me that it would hardly be correct to vote on a resolution which has the effect of passing judgment as to the value to be attached to the report of the Chinese Delegates."

Mr. T'ANG KUO-AN.—"The Chinese Delegation beg to thank His Excellency the Chief Commissioner for Japan for the kind words he has just spoken with reference to the difficulties they had to contend against in preparing their Report. With reference to the resolution before us, we consider it is couched in most reasonable and just terms, and we appreciate the fair manner in which the British Delegation criticises our shortcomings. No one is more sensible than we ourselves of our defects in statistical matters, but I might submit to the consideration of this honourable House that not only in China, but in India and all other countries where proper methods of land survey do not exist, the same confusion would be experienced. No one knows better than the honourable Member of the British Delegation, Sir ALEXANDER HOSIE, the confusion which exists at present in China in regard to the system of land survey, and therefore we need not dilate on the fact that it was impossible for us to produce satisfactory statistics. At the same time we do not deplore the less this chaotic state of affairs, and whether the resolution passes the House or not it shall be the duty of the Chinese Delegation to draw the attention of the Central Government to our present inadequate system for compiling of records, and it shall also be our duty to draw the attention of the Government to the fact that the lack of such proper statistics will give rise to a certain amount of difficulty when we come to adjust matters with Great Britain."

Sir CECIL CLEMENTI SMITH.—"May I rise at once to express my high appreciation of what has fallen from Mr. T'ANG. I think from what he has said that the resolution is not at all necessary. We are quite satisfied with the assurance he has given to us that his Delegation will do as proposed, and, as it is a statement which will be duly noted in the Minutes, I would ask permission to withdraw the resolution."

(Resolution withdrawn).

Sir CECIL CLEMENTI SMITH.—"As regards the next resolution, you will be aware that it is only putting into proper language the resolution which has been already adopted by this International Commission.

The resolution is:—

That as this Commission is not constituted in such manner as to undertake the investigation from a scientific point of view of anti-opium remedies and of the properties and effects of opium and its products, and deems such investigation to be of the highest importance, the Commission desires that each delegation shall recommend this branch of the subject to its own Government for such action as that Government may think necessary."

Monsieur MIYAOKA.—"The discussion which took place on the 19th instant on the resolution which was presented on the 18th instant by the Right Hon. Sir CECIL CLEMENTI SMITH,—the discussion and the vote taken on that resolution disclosed the fact that a wide divergence of views existed regarding the work which is to engage the attention of this Commission. The proposal to submit the question to an investigation from a medical point of view having being rejected, it now remains for us to determine what shall be done, and it seems to me that nothing now remains but to urge the importance of having the question examined from a scientific standpoint by our respective Governments. I therefore beg to second this alternative resolution which I hope will be unanimously carried."

Dr. HAMILTON WRIGHT.—"Our Delegation would be quite willing to vote for this resolution providing some other word could be found for 'scientific.' We think that as it stands, considering that we have two eminent scientists on the Japanese Delegation who are concerned with the opium problem, the language might be modified in some way. We still think that the work of the Commission should have included scientific investigation, although we are willing to abide by the decision arrived at on the 19th February."

Sir CECIL CLEMENTI SMITH.—"Might I point out to Dr. WRIGHT that what we say here is that this Commission is not constituted in such a manner as to undertake the investigation of this important subject. We have already heard from the French Delegation that they are precluded by their instructions from dealing with this matter from a scientific

point of view. Monsieur RATARD read his instructions which showed quite clearly that he is prevented from entering into an examination of the problem from a medical point of view. We are in exactly the same position. We have absolutely no instructions for dealing with the matter in that way. We do not for one moment imply that there are no medical men on this Commission qualified to report upon this phase of the question. What we say is that the Commission *as a Commission* is unable to deal with the question, and it is from that point of view that we have drawn up the resolution in the form in which it is now submitted."

Dr. RÖSSLER.—"I wish to make an amendment to this proposal. I move that the resolution shall be altered to read as follows:—

"That this Commission deems an investigation from the scientific point of view of anti-opium remedies, and of the properties and effects of opium and its products to be of the highest importance: the Commission therefore desires that each Delegation shall recommend this branch of the subject to its own Government for such action as that Government may think necessary."

Monsieur MIYAOKA.—"This Delegation which has two scientific men as its Members is prepared to admit that the Commission, as a whole, is not so constituted as to make an International scientific investigation possible. I am therefore prepared to vote on the original resolution. But if reference to the constitution of this Commission is to be expunged, and it is to be merely stated that this Commission deems scientific investigation to be of the highest importance, it may perhaps be better."

The Amendment was put to the vote, with the following result:—

<i>Ayes.</i>	<i>Noes.</i>
Austria-Hungary.	France.
China.	Great Britain.
Germany.	The Netherlands.
Japan.	Persia.
	Portugal.
	Russia.
	Siam.

(The United States Delegation abstained from voting).

After a suggestion by Dr. WRIGHT that the word *undertake* should be substituted by *permit* had been accepted by the mover, the original resolution was voted on with the following result:—

<i>Ayes.</i>	<i>Abstain.</i>
France.	United States.
Great Britain.	Austria-Hungary.
Japan.	China.
The Netherlands.	Germany.
Persia.	
Portugal.	
Russia.	
Siam.	

The resolution was declared carried *nem. diss.*

The following resolution originally put forward by the British Delegation, was withdrawn for re-consideration:—

That the Commission finds that the use of opium in any form otherwise than for medical purposes is held by almost every participating country to be a matter for prohibition or for careful regulation; and that each system of regulation now in force aims, as opportunity offers, at progressively increasing stringency. In view of the widely varying conditions prevailing in the different countries the Commission is unable to pronounce that any one system of regulation is decisively superior to others; but it would urge on the attention of the different Governments concerned the desirability of a re-examination of their systems of regulation in the light of the experience of other countries dealing with the same problem.

The Right Hon. Sir CECIL CLEMENTI SMITH.—"I beg to move an adjournment until 2.30 p.m. to-morrow. This will allow us time to hold the informal conference which has been proposed between my own and the American Delegation."

The motion was adopted, and the Commission adjourned at 4.40 p.m.

Minutes of the Twelfth Session

24th FEBRUARY, 1909

THE House was called to order at 2.30 p.m. The Chief Commissioner for Japan submitted a further reply to the question presented by Mr. R. LAIDLAW, M.P., during the fifth Session.

The CHAIRMAN announced that the Delegate for Russia found it impossible at the moment to present a report about the opium question as regards his country, but that it would be forthcoming later. On this there was some discussion as to the printing of the Minutes and the Reports. The PRESIDENT enquired whether it would not be possible to have them printed in Shanghai, and the SECRETARY was requested to obtain particulars as to cost, etc.

Mr. T'ANG KUO-AN asked the Japanese Delegation to inform him what was the amount of Import Duty on Morphia entering the leased territories of Kuantung. An answer was promised for the next Session.

In reply to a question from the Chief Commissioner of the Netherlands, the Portuguese Delegation declared that no further information in connection with the opium question in Timor, beyond what had been already presented in the Report on Macao, could be obtained from the Portuguese Government.

The Chair stated that the business immediately before the House was the result of the Conference between the British and the American Delegations.

The Right Hon. Sir CECIL CLEMENTI SMITH.—“The Conference suggested by our colleague the Chief Commissioner for France took place this morning, when we had a thorough exchange of views on the various points dealt with in the resolutions which have been already submitted to the Committee. I need not delay bringing before the Commission the results of our Conference, but will at once state what are the resolutions which the American Delegation and the British Delegation beg to submit for the favourable consideration of the Commission :

1.—That in view of the action taken by the Government of China in suppressing the practice of opium smoking, and by other Governments to the same end, this Commission recommends that each delegation concerned move its own Government to take measures for the gradual suppression of the practice of opium smoking in its own territories and possessions, with due regard to the varying circumstances of each country concerned.

2.—That the Commission finds that the use of opium in any form otherwise than for medical purposes is held by almost every participating country to be a matter for prohibition or for careful regulation ; and that each country in the administration of its system of regulation purports to be aiming, as opportunity offers, at progressively increasing stringency. In this connection the Commission recognizes the wide variations between the conditions prevailing in the different countries, but it would urge on the attention of the different Governments concerned the desirability of a re-examination of their systems of regulation in the light of the experience of other countries dealing with the same problem.”

Continuing, Sir CECIL CLEMENTI SMITH said “Should these resolutions meet with the approval of the Commission, I understand that the American Delegation will withdraw their first and second original resolutions, and in order that I may bring this matter before the House for discussion I beg to move the formal adoption of the first of the resolutions that I have read.”

Mr. DE JONGH.—“The Delegation for the Netherlands quite agrees with the first resolution as it now stands, but would state that they intend to put forward another resolution with a wider scope later on.”

Dr. HAMILTON WRIGHT.—“I wish to put on record that the principle adopted by our Government is the principle of total prohibition, otherwise I vote for the resolution.”

The PRESIDENT.—“The Chair would say there is no reservation whatsoever, but in giving their affirmative vote the American Delegation make the statement that they have adopted and cling to the principle of prohibition for all that appertains to the United States of America.”

The resolution was then put to the vote and adopted unanimously, the Portuguese Delegation alone reserving its vote.

Sir CECIL CLEMENTI SMITH moved the adoption of the second resolution.

Mr. T'ANG KUO-AN.—“ I would like to enquire what was in the minds of the British and American Delegations when putting in the word *almost*? It appears to me that every nation participating in this Commission holds the view that the use of opium is a matter for either prohibition, or careful regulation, and therefore I do not quite see the necessity for the word *almost*.”

Sir CECIL CLEMENTI SMITH.—“ Might I explain to the Chinese Delegate that at any rate there are two countries represented in this room which, as far as we understand, do not go as far as this resolution recommends, i.e., prohibition or careful regulation, and we have therefore thought it safer to put in the word *almost*. My friend Mr. POTIER had already reserved his vote on this matter, which indicates that Portugal is not prepared to go as far as recommended by the resolution.”

Dr. HAMILTON WRIGHT.—“ This resolution was drawn up on data presented to us in the various reports and that alone, and in accepting it we understood that there was no mental reservation in regard to any point in the resolution itself.”

The resolution was then read by the SECRETARY, and put to the vote. It was adopted unanimously: the Portuguese Delegation reserving its vote as before.

Dr. HAMILTON WRIGHT.—“ The American Delegation withdraws from final discussion before this Commission its Resolutions Nos. 1, 2, 6 and 7.”

Monsieur MIYAOKA.—“ May I ask Dr. HAMILTON WRIGHT in what stage Resolution No. 3 now stands?”

Dr. HAMILTON WRIGHT.—“ That also is withdrawn.”

The CHAIR.—“ There are before the House the resolutions put forward by the Netherlands and the Chinese Delegations. The first for consideration will be those by the Netherlands Delegation.”

MR. DE JONGH.—“ Mr. President: this morning the various Commissioners received in writing copies of our resolutions, but may I observe that after discussions between the Delegation of Great Britain and America, which I had the honour to attend this morning, I think it better to make some alteration in Resolution 1 as submitted in writing. These alterations have to be made in order to avoid the words *opium regime*. I intended to recommend that system because I think it is the best system, but I know there is some objection from the British Delegation, and to meet their opinion I think I can do no better than to make these alterations. Our first resolution now reads as follows:—

- 1.—Whereas, the total eradication of the use of opium within a few years is to be considered a high but at present an unattainable ideal,
- in order to check the use of opium much may be expected from taking systematic measures which are gradual in their effect,
- a careful practising of such measures requires the management of the opium business to be carried on in such a way that no person concerned in the management be interested in the amount of sale.

Be it Resolved:—

To recommend to the Governments of the countries where other systems prevail:—

- (a.) that it be decided in principle that the opium business in its entirety shall be managed in such a way that no person concerned in the management be interested in the amount of sale, and that the establishment of such a way of managing shall not be put off longer than the circumstances require;

- (b.) that disregarding the fact whether or no such a method has already been put in force, the following measures shall be taken at once for the purpose of restricting the use of opium :—
- (i) to make it clear to the European and native officials, who are able to influence the consumption, that Government is in earnest to check the same;
 - (ii) not to allow anybody who makes use of opium to enter upon any office in the Government Civil Service, or in the Army and Navy;
 - (iii) to impress pupils at school and grown-up people ever and anon with the evils resulting from the use of opium; in short to instruct national opinion to the purpose by every suitable means; in order to develop this anti-opium tendency, the aid should be called in of private Societies intending to promote the moral concerns of special sections of the population, should their objects and methods be found satisfactory;
 - (iv) to prohibit the sale of opium to children;
 - (v) to set forth publicly and to offer for sale at cost price any anti-opium medicine, in case a medicine should be discovered which contained neither morphia nor any other unwholesome ingredient;
 - (vi) to maintain the forbidden areas—if existing—in the present compass and if feasible to increase them;
 - (vii) to exclude special sections of the population from the use of the drug;
 - (viii) to decrease the number of places of sale and divans, and to diminish the hours during which they may remain open;
 - (ix) To enhance the retail price of opium."

Mr. de JONGH proceeded to explain the reasons which had led his Delegation to bring forward this resolution. He particularly emphasized the necessity for devising measures which should prevent any person concerned in the management of a monopoly or farm from being interested in any degree in the sale of opium.

Mr. T'ANG KUO-AN.—“In the first sentence of the preamble it is stated that the total eradication of the use of opium within a few years is a high but unattainable ideal. The Chinese Delegation does not think the word *unattainable* is proper in this connection. With regard to China we must say that the eradication of the use of opium within a few years is *not* unattainable. There are two sets of opinions with regard to this question. On one side there is such high authority as Sir ALEXANDER HOSIE, who expressed his firmest conviction when he said that China will not be able to accomplish this within ten years. We respect his opinion and we say that there is no opinion in China at present which can command a higher respect. At the same time we do not forget there is another opinion—the opinion of those who are supposed to know the conditions of China,—and that opinion is that China *can* accomplish the total suppression of the opium evil within a few years. We have therefore to judge between these two sets of opinions, both equally commanding respect and worthy of our belief. But I wish to bring to the attention of this Commission that the situation at present in China is most unique. The sentiment of the people has been stirred as it has never been stirred before during two thousand odd years of history; and as the Chairman has stated that sentiment rules the world so it rules China to-day, and we firmly believe that, where a people are convinced that a certain moral reform ought to be carried out, sentiment can overcome almost insurmountable difficulties. I daresay that two years ago, if the question had been put to Sir ALEXANDER HOSIE as to what China could accomplish in two years, he would hardly have dared to prophesy she could accomplish what she has done; and therefore considering what we have done during the last two years, what is there to prevent our accomplishing even more in the two or three years to come? The awakening sentiment in China is something astounding. The people heretofore have been slow to realise what concerns the welfare of the Empire. Now, to give an example of what we can do I have to state that we have recently received a telegram announcing that the opium divans that existed in Chengtu (China Report: page 18) have all been closed. In view of this fact I do not think we are justified in being too pessimistic, and, even supposing there was good ground to doubt the ability of China to fulfil her promises, I think we should give her the benefit of the doubt until she has proved her inability to accomplish what she has set out to do.”

Monsieur MIYAOKA.—“May I ask the Chief Commissioner for the Netherlands whether the resolution now presented by him is intended as an amendment to the first of those just adopted?”

Mr. DE JONGH.—“No, it is not meant as an amendment but as a resolution with a wider scope. Afterwards, perhaps, it would be possible to mould the two resolutions together. I think it should be the task of the Committee after all the resolutions have been adopted, to try and put them into such shape as will be acceptable, and I have no objection to changing my proposal—if necessary. It is not against the other resolution, but is meant to go in conjunction with it.”

Monsieur MIYAOKA.—“If that is the intention of the Netherlands Delegation I must confess that I find difficulty in reconciling the two for this reason, that, according to the resolution which has just been adopted regarding the gradual suppression of opium smoking in the territories of the Governments concerned, it is recommended that this Commission shall move its Government to take proper measures—in other words, to take measures which in their own judgment seem proper, after taking into consideration the various circumstances of each country concerned. But Resolution No. 1 of the Netherlands Delegation seems to lay down rules which each Government should follow, and I find it difficult to reconcile the principles upon which these two resolutions are based.”

Sir CECIL CLEMENTI SMITH.—“I desire to associate myself entirely with the remarks of the Chief Commissioner for Japan, and if he will allow me to say so I think he has struck a very serious defect in the proposal brought before the House by the Netherlands Delegation.

“The two are, as he says, incompatible, and on that ground alone we shall be unable to fall in with the Netherlands Delegation. But there are other grounds. The Netherlands Delegate wishes us, for instance, to lay down that no one connected with the opium business should be interested in the amount of sale. Now, if he will pardon me for referring to what took place at the Conference this morning, there is some misapprehension in his mind which tends towards supposing that it is absolutely impossible to be connected with the sale of opium without being interested in the price of it. In the Report of the States Commission which I mentioned this morning there is ample evidence to show that such is not necessarily the case. My friend the Chief Commissioner for the Netherlands also recommends to us in his resolution various measures which every civilised Government has already taken. Surely in 1909 it cannot be necessary to tell a Government not to appoint anyone who makes use of opium to any position in the Army or Navy. Then as to what is to be done in the schools: that everybody recognises as most important. Then again, the sale of opium to children: this has already been carried out, I should think, by every civilised country.

“With regard to the proposal to enhance the retail price of opium, is it not perfectly clear that if you enhance the price of opium beyond a certain point, the inevitable result is evil and not good? I trust, therefore, that on reconsideration my friend will not press these on the Commission, because to decline them will indicate that we are not in earnest in the steps that we have taken in this important matter. There is not a single civilised Government but is trying to do its best, and to pass such resolutions would indicate that Governments are not doing their best, and it is on that ground that not only shall I not support the motion but trust it will be thrown out by the Commission.”

Mr. DE JONGH, replying, said that he was still of opinion that some of the measures recommended in his resolution had not been generally adopted, and he was convinced that the enhancement of the retail price of opium would have a good result. He was quite willing to leave it to the House as to the form in which the resolution should be worded, but they wanted the world to know the practical work accomplished by his Government in Netherlands-India.

Dr. RÖSSLER.—“In view of the objections which have been lodged, I would like to propose that the resolution be withdrawn for the present and presented again—say perhaps—to-morrow in some form which would meet with the approval of the Delegations.”

Dr. HAMILTON WRIGHT.—“May I state that I think our Delegation are in thorough sympathy with many of the suggestions made in this resolution. As far as the United States is concerned they have been put in operation by our national laws, and it seems to me that the details here expressed might be embodied as a general principle and left to the Governments concerned to put them into operation. I think this would be more acceptable, and I propose that the resolution be embodied in the records of the Commission as expressing the views of the Netherlands Delegation. It need not then be passed in the form of a resolution.”

This proposal met with the approval of the House, and the resolution, as such, was withdrawn.

The PRESIDENT observed that by being incorporated in the Minutes, the recommendations put forward by the Chief Commissioner for the Netherlands would be of value, and could be acted on by any individual Government.

Mr. DE JONGH moved the adoption of the second Netherlands resolution, which read as follows:—

2.—Whereas, smuggling of opium counteracts the various measures taken by different Governments for the purpose of checking the use of opium,
the smuggling causes a great loss of Revenue to the Treasury,
moreover it necessitates large expenses for the purpose of preventing the evil,
it has a demoralising effect both on private people mixing up with that trade and on Custom House and Police Officers,
experience has taught that the smuggling of opium, because of its great value in a small volume, is difficult to check by the means practised up to the present time by the various Governments individually,
therefore the eradicating of the evil of smuggling should be striven after by action of the various Governments in common accord;
such International action is possible only after the opium business everywhere has been taken under Government control;

Be it Resolved:—

to recommend to the various Governments, after having established such a system that nobody concerned in its management is interested in the amount of sale, to enter into diplomatic deliberations to the purpose that henceforth the wholesale trade in opium be allowed only between the Governments of opium-producing and opium-consuming countries and be forbidden to any private person.

The PRESIDENT.—“In the understanding of the Chair that is already covered by the first resolution adopted by this House, *vis.*, the fourth of the American resolutions. Will the SECRETARY please read that resolution.”

The SECRETARY having read the resolution, the Chief Commissioner for the Netherlands expressed the opinion that it did not cover everything contained in their resolution, which he again read.

Dr. HAMILTON WRIGHT thought that as far as his Government was concerned the measures recommended in the resolution under discussion might mean a change in the Constitution.

Monsieur MIYAOKA.—“May I observe that this second resolution is also at variance with the principles on which the other resolutions are based. The other series of resolutions which we have voted on, and which have been accepted by the Commission, lay down some fundamental principles, the execution of which is left entirely to the Governments concerned. In this resolution it is recommended that the Governments shall act in a specific manner. If the Netherlands Delegation has no objection, I respectfully beg to suggest that the same course be followed with this as with the first resolution, *vis.*, that it be incorporated in the Minutes.”

The House approved of this proposal.

Mr. T'ANG KUO-AN.—“Mr. President and Gentlemen of the International Opium Commission—I beg to submit herewith, in behalf of the Commissioners for China, their resolutions on the subject which has brought together this Commission. It is a fact too well known to need comment that China, greatly to her misfortune, is more deeply interested in the outcome of this Commission than any other Power. With most of you the opium habit is one of many problems which are before your country, and not perhaps among the most important. With us, on the other hand, it is one of the most acute moral and economic questions which as a nation we have to face.

“I wish to make clear in the very beginning that we realise that at last it is a question the solution of which depends on us and on us alone. However much help we may have from others, the largest part remains to us. We must work out our own salvation. Our Government—

Imperial, provincial, and local—is aware of this, and the people, from the highest to the lowest, with a clearness which we could hardly have expected in the present condition of general education, have definitely arrived at the same conviction. I would not have you think, Sir, that China comes to this Commission in a spirit of impotence, crying to the world to rid her of a foe with which she had not the moral strength and courage to do battle. We understand the enormous difficulties; we have counted the cost; we are determined to rid ourselves of this curse. And yet, however fully we realise our own responsibility, and whatever proportion of the task of eliminating from our midst the improper use of opium is ours and ours alone, we should be blind indeed did we not take new courage and inspiration from this gathering and from the action of your respective Governments which has made this Commission possible, for there can be no doubt that international action and co-operation are essential to a successful dealing with the question. And with China in particular the question is so large and has such wide ramifications that our own efforts, however earnest and determined, have their complete success conditioned upon the co-operation of other nations. We are especially glad to meet here the representatives of Great Britain, which, next to China, is perhaps most interested in this problem. Since the days of Lord Shaftesbury, that name which illumined the pathway for so many world-wide schemes of philanthropy and reform, the delicate and difficult task of the abolition of the opium traffic has commanded the time, thought, and practical efforts of some of your greatest men. More and more will China claim, by right of her large indebtedness to them, a part in the glory of such names as Lord Morley, Sir Joseph Pease, Alexander, Broomhall, and Taylor. The labour of such as these culminated last year in that splendid action of Parliament reaffirming its conviction that the Indo-Chinese opium trade is morally indefensible, and requesting His Majesty's Government to take such steps as may be necessary for bringing it to a speedy close—an action where every consideration of prudence and convenience are buried beneath the moral aspect of the question. I doubt whether parliamentary action of any Government has ever reached a higher moral elevation. It lifts perforce all subsequent discussion of the subject into the clear air of this attitude. The manifest sympathy with which the proposals of the Government of China during the past two years for the regulation of the traffic have met with from the British Government has been one of the greatest encouragements to China in dealing with this question. The calling of this Commission by the President of the United States is but one of the many marks of disinterested friendship on the part of that Government. Moreover, the earnest and effective way in which the American Government is dealing with this question in her own borders not only offers a model to China, but insures her sympathy with us in our attempt at the solution of the same problem on an infinitely larger scale. Let me express also my appreciation of the presence of the delegates from Germany. It is from Germany pre-eminently, with her spirit of scientific exactness and research, that we have the most authoritative revelations of the effects of opium upon the human system. We know that the friendship of Germany for China puts the results of your incomparable laboratories and learned investigators at our disposal. And to Japan, our nearest neighbour and closest of kin, who has so successfully turned back the wave of disaster which has wellnigh overwhelmed us, who has even succeeded in regulating the traffic in Formosa, where it had a strong hold, to you I turn with especial confidence in your co-operation. To France and Russia, also, that duumvirate which has been the mainstay of peace in Europe for nearly a quarter of a century, we desire to express our feelings of appreciation for their sympathy in our struggle for reform. Time fails me to name each of those Powers which have expressed a willingness to co-operate with us in dealing with the opium question. I should, however, not only be recreant to my duty but should misrepresent my colleagues and my country if I did not pause to express China's deep gratitude for this unselfish interest. I wish to express also our gratification at the unanimous and spontaneous recognition on the part of other countries of the sincerity of China's intention in her recent efforts to exterminate this evil.

“In dealing with a question with so many and such far-reaching relationships, motives may easily be misinterpreted, and the fact that there has been no disposition whatever to do this augurs well for the successful outcome of the efforts of this Commission. There were not a few, to be sure, Chinese as well as foreigners, who at first doubted the ability of China to grapple successfully with this evil in her own borders. This, however, should not occasion surprise. The curse was so widespread, the difficulty of breaking the opium habit is so great, the clandestine use of the drug is so easy, and the difficulties so baffling and enormous, that it is not strange if anyone should have conceived success to be impossible. To these doubts, however, the national sentiment against opium has proven an effective answer. Of the strength, genuineness, and widespread dissemination of this sentiment there can be no question. The determined action taken by the Throne in September 1906, and the loyal co-operation

and energetic measures of such Viceroys as Their Excellencies Tuan Fang, Hsi Liang, Yang Shih-hsiang, and Hsü Shih-chang are indicative of the official attitude; but more encouraging than the determination of the Imperial or provincial authorities has been the response on the part of the people.

"Heretofore the arousing of public sentiment on any question has seemed almost an impossible thing in China. Foreign wars have been conducted and peace concluded without arousing any considerable interest from the people in large sections of the Empire. Reforms have interested a few, but only a few; or some section, but only a section. This is the first question which can be said to have aroused intense interest from one end of the country to another. All classes of people—officials, scholars, gentry, farmers, and the humblest labourers have united in the determination to see the land freed from this curse. It is in this aroused public sentiment that our greatest hope of ultimate success lies. Many have wondered how we should deal with the grave fiscal question which will be incurred by the loss of the large revenue from opium. Were not the people so thoroughly determined, this difficulty might easily block the way of the reform; but with public sentiment as it is at present, any taxes which might be suggested to or by the Honourable Commission as being necessary to make up any deficiency of revenue will be gladly submitted to if it is connected in their minds with freedom from opium. Every day of further study into the question on the part of the Chinese Commissioners—and we have not failed to face unflinchingly the difficulties—has more deeply convinced us that China can speedily and completely stamp out this evil if she has the co-operation of the other civilised Powers.

"I have said 'speedily,' Mr. President, with intention, because the experience of the past two years convinces us that under the present circumstances speed in the extermination, instead of increasing the difficulties, will minimise them. Public opinion is now at a high pitch; the determination of the people is roused to a high degree. It is a well-known fact that such an intensity is difficult to maintain over an extended period. The public mind cannot be kept centred for a long period of years upon a single reform. When a people is ready to abolish an evil, it should be done as soon as possible. Delay increases difficulties immeasurably. It has often been said, and rightly, that legislative regulation should not go too far ahead of public opinion; it may with equal truth be urged that it should not lag too far behind. Neither must the actions of the Government be different from the wishes of the people, for any such difference will have the effect of augmenting the difficulties of control, and the loss of control might entail serious discontent and disturbance, which, again, might bring about international interference and complications.

"I shall not yield to the temptation to describe the effects of opium in China. The leaders of the Chinese people look upon it as a dangerous foe to our very existence as a nation. Every instinct of self-preservation cries out against it. The past few years have brought some strange and notable apologists for opium—some strange and notable apologists for China as an opium-using country. Would that we Chinese, who are best in position to know the facts, could follow them with conviction! Would that we could dispel the sternness of the facts with this softness of speech!

"But go with me, gentlemen of this Commission, over that broad and once fair stretch of Western China, where the ravages of the curse have been most evident—the provinces of Szechwan, Yunnan, Kweichow Kansu, and Shensi,—an area comprising a large proportion of the eighteen provinces. Visit the dismal and wretched hovels, which, were it not for opium, would be happy homes; see the emaciated, depraved multitude of victims to this vice; observe the abject poverty,—and notice for the cause of it all the wide fields once covered with waving gold of ripening grain now given over to the cultivation of the poppy. Read what Lieutenant-Colonel Bruce says on Kansu: 'One blot, and that no small one, lies on the people of Western Kansu. It is that men and women are, to a fearful extent, habitual and confirmed opium smokers.' Monseigneur Otto, Catholic Bishop of Kansu, who has spent thirty years of his life in China, reckons six men out of every eight of the population as confirmed in the habit.

"The economic burden imposed upon China by the use of opium has now become almost unbearable. As is shown in our report, a conservative estimate of the annual production of native opium for 1906 is 584,800 piculs; this we may value at Tls. 220,000,000. To this must be added for imported opium Tls. 30,000,000, taking the value of the importation for 1905; this gives us a total expenditure in cash on the part of the Chinese for opium of Tls. 250,000,000. The land now given over to the production of opium, were it planted with wheat or other more useful crops, would yield an annual return of, let us say, at least Tls. 150,000,000. This sum, added to the loss of Tls. 250,000,000 mentioned above, means that the cultivation of opium costs the nation Tls. 400,000,000 a year. To estimate the loss to the

country in the earning capacity of the victims of the opium habit is more difficult. Our investigations have convinced us that there are 25 million men in China addicted to the use of opium. This number, unfortunately, includes many from among the more highly productive classes; but if we suppose their average earning capacity, were they not addicted to the habit of opium, to be one-fifth a tael a day, and that this is reduced one-quarter by their use of opium, we have here a daily loss to the nation of Tls. 1,250,000, or an annual loss of Tls. 456,250,000. If there is added to this the items which I have mentioned above, we have a total annual loss to China of Tls. 856,250,000. It is needless for me to call your attention to how ill-prepared we are as a people at the present stage of our industrial development to bear such a burden as this. No account is here taken of the capital loss involved.

"This economic loss affects not only China but all of the leading nations of the world. We live in the era of improved transportation, which means an era of increased foreign trade. Within the past 28 years the world's foreign trade has grown from Gold \$2½ *per capita* to Gold \$14. While China's trade has been backward, she has not failed to feel the impulse of this world movement. In 1867, when the Chinese Customs statistics assumed their present shape and furnished the first data for comparison with the present, the value of China's imports was less than 69½ million taels; in 1905 it was over 447,000,000 taels, an increase of more than sixfold; and yet the foreign trade of China is still lamentably small. The imports of China *per capita* are about 2s. 5d., while those of Japan are 15s. 10d.—nearly seven times as much, and of the United States about 30 times as much *per capita*. There is no part of the world in which there is a field for such an enormous extension of foreign trade as is presented to-day in China. In fact, who can estimate the influence upon the trade of the world when China comes to her own commercially and industrially? If the world sold to each Chinese as much as it does to each Japanese, it would receive 3 billion taels annually from China.

"There has been a conspiracy of causes to hamper trade of China. Our lack of adequate means of transportation, the influence of the likin tax, the comparatively small number of open ports, and other causes, might be mentioned; but it is interesting to note that already these factors are gradually passing away, leaving, however, two powerful hindrances to the growth of our foreign trade, namely, the productive inefficiency and the poverty of the Chinese people—two factors which for the present purpose we may count as one, factors which are enormously aggravated by the opium evil. The conditions surrounding China's foreign trade to-day and that of 50 years ago are essentially different: then the Chinese demanded little from abroad except opium and silver. The problem was not so much to find what the West wanted from China, as what China wanted from the West. Even cotton goods, which to-day form 44 per cent. of China's imports, were scarcely demanded at all by the Chinese people, and the trade in kerosene oil, flour, and matches, whose use has spread into almost every home of the Empire, was practically non-existent. To-day the demand for foreign goods has reached the utmost limits of the Empire, and with improved transportation might have an almost boundless expansion, had the Chinese either money or goods to give in return. The balance of trade is, however, a sad commentary upon our productive inefficiency. The excess of imports over exports during 1903 was 31 per cent., a fair average of the past few years if we except 1904 and 1905, when it reached the alarming figures of 43 per cent. and 95 per cent. respectively. The range and extent of China's wants have grown enormously; the severest drain upon her ability to satisfy those wants is the opium habit.

"Now, Sir, place in the columns of China's foreign trade what is being lost to the nation from the use of opium—only this, and nothing more. We then offer to the world a commercial prize worthy of the most strenuous endeavours of all nations. When one faces the possibilities of China's future trade, how insignificant does the value of the opium traffic seem. When this trade formed 46 per cent. of China's imports, as it did in 1867, there might have been plausible, though false, arguments in favour of protecting it; but to-day, when it forms only 7½ per cent. no such arguments can be urged. No greater commercial folly can be imagined than that of fostering what is at present 7½ per cent. of China's foreign trade at the expense of the almost infinite expansion of that trade. In fact, there can be no doubt about it, the opium traffic is *economically*, as well as morally, indefensible. Of course, there are special interests which must suffer from any such change as will come from the abolition of opium, and we may expect from those who are blind to anything larger than the loss of their immediate gain every effort to cloud the issue; but as we look at it in the mass there can be no doubt of the facts: opium is an economic loss to the world too great to be further endured. Moreover, there is another fatal influence which opium has upon trade which cannot be put into the columns of statistics. Rightly conceived, commerce is a blessing, not a curse. Queen Elizabeth well put this in her first message to the Emperor of China, when she said, 'By intercourse and traffic no loss, but rather most exceeding benefits, will redound to the princes and subjects of both kingdoms, and thus help and

enrich one another.' And she sent forth her ships, as she beautifully said, 'For the greater increase of love and commerce.' But inject into trade that which makes commerce a curse instead of a blessing, which makes it spread poverty instead of wealth in its wake, and you have not only placed an inhibition upon trade itself, but have furnished a fruitful cause of misunderstanding and prejudice.

"When we consider, therefore, how vitally and directly the trade of each one of the great commercial Powers is affected by the results of our battle with this great curse, we feel the more justified in expecting a large degree of international co-operation.

"The opium evil is in another sense a question of international import. For several decades the great Powers of the world have rightly been concerned as to the progress of reform in China. The history of the diplomacy of the past few years reveals how deeply the statesmen of the world feel the menace of an enfeebled or decadent China, and with what hopefulness they look towards China as a vigorous, modern State. This solicitude on the part of other nations is not unnatural; the relationship between nations has become so close that the cause of reform in China is of world-wide importance, and the cause of reform in China is indissolubly connected with this question of opium. As has been well stated by a foreign observer, 'Whenever any progressive wave of opinion has burst upon China, the abolition of the opium habit has been in the forepoint.' To fail therefore to take full advantage of the present anti-opium sentiment throughout the Chinese Empire, directing it and enabling it to culminate in some successful achievement, is the most effective possible blow to the reform and progressive element in China, a blow from which there can be no speedy recovery.

"And still, again, this is an international issue, because China's relationship with the rest of the world is vitally affected by it, and by relationship here I mean the larger and even more important relationship than that of foreign trade. There has been for not a few years in China a body of men who have deprecated their country's isolation, because they saw clearly its lamentable consequences. This small body of men within the past five years has multiplied more than a thousandfold. At last we see China upon the threshold of a new life and a new relationship with the rest of the world. And yet no one who has looked much into the matter can doubt that the opium habit and the opium traffic stand as a great menace to China's coming into this new relationship of friendship and understanding with the rest of the world. By every argument, therefore, which has been used to induce China to discard the old policy of exclusion, by every act of kindness by which our integrity has been preserved and our very national existence maintained during the perilous period of the past 50 years, we may invoke the co-operation of the other civilised Powers in our determination to free ourselves from the curse of opium.

"And, Sir, I may confess that it is not only as a barrier to keep us from entering into the brotherhood of the modern and progressive nations that we deprecate this curse, but also as a thing which will prevent our being worthy of this brotherhood. For while we were slow to realise our isolation and its lamentable cost, now that we do realise it I hope that I may be pardoned for saying that our endeavours to prove ourselves worthy of our new place have not been inconsiderable. A great student of world conditions has recently declared in London that 'China has made greater progress in the last five years than any other country of the world.' Another publicist has said that China has changed more in the past three years than in the preceding three thousand. Even if these statements may be open to the charge of some exaggeration, no one acquainted with the magnitude of the task which three years ago presented itself to us—a mass of 400 millions of people—to move, millenniums of entrenched social customs to change, an ignorance of the life upon which we were entering almost colossal, a lamentable lack of equipped leadership,—no one acquainted with these things, I say, can be insensible to the fact that the achievements which have been wrought, although very imperfect in themselves, are proof of a deep and widespread desire on the part of the people of China to have her take her place among the modern States. The change in our educational examination system, the modern college rising on every hand from the ashes of the long-cherished system, our young men going literally by the thousands to the ends of the earth to gain knowledge, our princes and high officials on tours of investigation in Europe and America, our beginnings in railway construction, mining and modern manufactures, and our plans for a constitutional government, can have but one interpretation. We are committed to the path of progress and reform. The day of exclusion and isolation is, we trust, in the past. We have progressives and conservatives, to be sure; but our conservatives of to-day would have been considered radicals 15 years ago. From east to west, from north to south, throughout all of our borders, we are making ready for the new life and its new responsibilities. For may I be pardoned if I confess that we have an ambition not to be altogether unworthy of our new station. This ambition is an inheritance from our fathers. We cannot deny a

degree of pride in the part which the China of their day played in the civilisation of Eastern Asia. In those days of poor transportation and comparative national isolation the influence of every land was much restricted in its scope, and yet the laws, literature, and institutions of China cast their spell over Mongolia, Manchuria, Korea, Japan, Tibet, Assam, Siam, Cochin-China, and were felt even in Burma and India. This I say with no spirit of idle boasting; I am too sensible of how unworthy we of the present China have accepted the high obligations of the past, how we have dimmed the glory of our inheritance; but I mention it to explain how great is our aspiration now to play a high part in the brotherhood of nations, a higher part in the brotherhood of nations, a higher part than can be played by men of enfeebled bodies, enslaved will, broken pride, and weakened moral character.

"China looks, therefore, to the fullest co-operation of all of the civilised Powers in her attempt to throttle the opium evil. It trusts that such restrictions of the existing treaties as may be found to hamper her efforts in dealing with this question may not be used to this end.

"And, finally, Mr. President, may I say that China joins the other Great Powers in looking upon the opium habit as a great moral issue and approves heartily of making the moral influence of opium a special feature of the Commission's inquiry. I make no apology for having dwelt upon the economic and other results of the opium traffic: such results must demand the most careful consideration; but we are not insensible of the fact that it is by none of these considerations primarily that the question is ultimately to be settled, nor is it by this standard that our actions as a Commission will be judged. Our considerations offer no place on the one hand for shallow sentiment or emotionalism, neither on the other hand any for opportunism. We shall agree that it is not right to speak of moral issues as coming under the denomination of sentiment. No investigation will command confidence which fails to take full account of the influence of opium, not only upon the resources of the country, but also of its baneful effects upon the bodies, minds and most of all the character of men; and it is in dealing with it as a moral issue that there lies the fullest hope of our success. It is as such that it has aroused the attention of the Chinese people. Read the Chinese press, hear the speeches at the anti-opium meetings, study the present anti-opium movement where you will, and you will see that its appeal is a moral and patriotic appeal. The agitation seems to prophesy a mighty revival in national righteousness, reaching into every avenue—political, social, and commercial. With all of the shortcomings of China's old educational system it had this to commend it, that it insisted upon a thorough study of the ethics of Confucius and Mencius, and the result is a large fund of moral sentiment. This is our greatest force in entering into this contest, and outside of China also one is conscious of that mighty force, greater than the world's combined navies and armies, greater than the power of all the world's gold and silver—the Christian conscience. With these forces behind us we may enter with confidence into what may be rightly called one of the greatest moral crusades of the twentieth century, for whatever laws the nations of the world may decide to adopt towards each other, we may not forget that there is a law higher than all human laws, a law greater than all economic laws, a law that transcends even the law of nature, and that is the eternal law of Heaven, which, through Confucius, says, 'Do not unto others what thou wouldst not have others do unto you,' and which, through Jesus Christ, says, 'Thou shalt love thy neighbour as thyself.'"

The resolutions submitted by the Chinese Delegation for the consideration of the International Opium Commission were as follows:—

- 1.—That the Commission recognising the earnest desire of the Government and people of China to eradicate the production and consumption of opium throughout the Empire and acknowledging that certain progress has already been made in this direction, agrees to recommend that, in order to assist China to solve the great task she is attempting as expeditiously and as effectively as possible, all the Delegates who are assembled in this Commission should urge their respective Governments to promise their co-operation and readiness to reduce the importation of opium into China *pari passu* with the reduction of the cultivation of the poppy within her own borders.
- 2.—That the International Opium Commission strongly urges all Governments possessing Concessions or Settlements in China, which have not yet taken effective action toward the closing of opium divans and opium-shops in the said Concessions and Settlements, to take steps to that end on the lines already adopted by several Governments.
- 3.—That the International Opium Commission strongly urges all Governments possessing Concessions or Settlements in China to take the necessary steps to prohibit the sale in the said Concessions or Settlements of any form of anti-opium medicine containing either opium or morphia or any of their derivatives, except on qualified medical advice.

4.—That the International Opium Commission recognizes the immense harm now being done to the people of China by the use of morphia for injecting purposes and recommends to the various Governments taking part in this Commission the urgent need of the immediate enactment of laws prohibiting the importation of, and sale of, morphia and its derivatives, or hypodermic syringes, by any of their subjects or citizens in China, except the sale to duly qualified medical practitioners for medical purposes only. The Commission also recommends that the laws enacted shall provide for the adequate punishment of such subjects or citizens contravening their stipulations, and that it be distinctly understood that the unauthorised possession of morphia and its derivatives or hypodermic syringes, is to be considered *prima facie* evidence of guilt.

On the motion of Dr. TENNEY the discussion of the Chinese resolutions was deferred until the next sitting of the House.

Sir ALEXANDER HOSIE having presented the report of the Committee appointed to investigate into the question of poppy cultivation and the production of opium, the Commission rose at 5 p.m., the next Session being fixed for 10.30 a.m. on the 25th February.

Minutes of the Thirteenth Session

25th FEBRUARY, 1909

THE business of the Commission commenced at 10.30 a.m. The PRESIDENT read a letter which he had received from the Delegate for Italy, who regretted that he was still unable through illness to attend. A communication was also read from Mr. Charles B. Towns, who had placed a formula for the cure of victims of the opium habit in the hands of the President.

Dr. TENNEY read the summary of a report submitted by the Committee on existing National Agreements covering the Opium Traffic. The Chief Commissioner for Portugal pointed out that the Agreement between Portugal and China for controlling the opium trade at Macao was not included in the Committee's report, and the Chair directed that this omission should be rectified.

The Chinese resolutions then came up for discussion.

The Right Hon. Sir CECIL CLEMENTI SMITH.—“We listened, I need hardly say, with very great interest and, I might add, admiration to the particulars delivered to us yesterday by Mr. T'ANG, and I trust I may be allowed to say a few words in connection with the first of the resolutions before us:—

“I am obliged, after the line which we have already taken on this subject, with the approval of a large majority of the House, to take exception to this resolution on the point of order: and in strictness, that being our intention I ought, perhaps, to refrain from saying more. But I believe that in the special circumstances of this renewed appeal, I shall have your permission and the indulgence of the House in adding some further observations, which I hope will soften the possible appearance of harshness in our refusal to join in a discussion which has now been raised on two occasions.

“Our position is simply this: that it is impossible for the British delegates, unless specifically instructed in that sense, to discuss with representatives of China a matter which has been the subject of diplomatic negotiations between the two countries, and still less permissible for us to acquiesce by our continued presence here in such discussion by third parties. No such instructions have been communicated to us, nor could there, in our judgment, be any reasonable expectation in any quarter that such instructions would be given, seeing that of the thirteen Powers represented here only two are directly and practically concerned in the matter with which this resolution really deals.

“I trust, therefore, that in spite of our adherence to a position from which it would be presumption for us to depart, the Chinese delegates will remain satisfied that we have not withdrawn, at this late stage of the proceedings of the Commission, from the sympathetic standpoint which we assumed at the outset and have sought to maintain throughout: and will

remember that this is the standpoint of our own Government from whom, in the inception of her great task, China obtained an immediate and spontaneous assurance of support, and afterwards, in its execution, an active practical co-operation which have counted and will count for infinitely more than any irresponsible pronouncement to which we might commit ourselves in this place."

Monsieur MIYAOKA.—"With the permission and indulgence of the Commission, I beg to express the sense of sincere satisfaction with which this Delegation has heard the most sympathetic statement from the British Delegation. I am sure that the Chinese Delegation has the entire sympathy of the various Delegations here present in the gigantic task which she has undertaken, and no statement of profound sympathy is more welcome than that from the British Delegation. I therefore beg to express the sincere satisfaction with which this Delegation has heard the declaration of the Right Hon. Sir CECIL CLEMENTI SMITH."

Mr. T'ANG.—"After the kind words which have fallen from the Right Hon. Chief Commissioner for Great Britain, the Chinese Delegation does not insist upon putting the first resolution to the vote of this House; nevertheless we wish to have it put on record that it is the desire of the Government and people of China to have the abolition of the opium evil effected as quickly as possible. It was hoped that in view of the universal sympathy manifested for China,—in view of the almost universal recognition of our earnestness and progress in this moral reform,—that the British Delegation might see their way to recommend to their Government a speedier measure for the abolition of the opium evil, thereby placing China under a still greater debt of obligation to Great Britain. Hitherto the complaint has been that China was unwilling to take up the matter of opium reform—that she was too fond of the revenue derived, and that she would not assume the leadership in starting this opium campaign; but having now assumed the leadership and striven her utmost to carry out this reform, we think that we were justified in hoping that Great Britain would not only follow us but maybe surpass the lead that China has assumed. It was with these hopes that we put forward this resolution, but we are now prepared to withdraw it under the assurance which has been expressed by the Right Hon. Commissioner for Great Britain."

Mr. T'ANG moved the adoption of the second Chinese resolution.

Monsieur RATARD rose, on behalf of the French Delegation, to enquire if the Chinese Government had issued orders for the closing of opium-shops, and not only of divans. He had to inform the Chinese Delegation that in Kuangchowwan his Government had a contract with the opium farmers which would last until the end of the year 1911: until that date it was impossible for his Government to accept any suggestion to break such contract. He suggested that the words *opium-shops* should be deleted, and the words *as soon as they may deem it advisable* inserted after the words *to that end*.

Monsieur MIYAOKA.—"In connection with the resolution which is now before us, I beg to make a statement in reference to Antung, regarding a passage which occurs in Mr. Leech's report contained in the British Parliamentary paper, China No. 1. In that report it is stated that there are any number of Japanese divans in Antung. I am very glad to be able to give categorical assurance in the presence of the various Delegations here present that every one of the opium divans, with which any Japanese subject had any connection whatever, has been strictly forbidden and closed."

Mr. T'ANG.—"In support of our Resolution No. 2, may I be allowed to make some remarks. Before doing so, however, I would like to answer the question put by the French Delegation as to whether we have closed all opium-shops as well as opium divans. The words *opium-shops* appear by mistake in the resolution and should be struck out. Our Government is well aware that so long as the opium habit has not been given up, the closing of opium-shops will be impossible, and that the closing of opium-shops must be effected concurrently with the abandonment of the opium habit. What was in the mind of the Chinese Delegation when drawing up Resolution No. 2 was to request those Governments which had opium divans in their Concessions to take speedy steps to close them, and perhaps with the permission of this House we may be permitted to advance one or two arguments in favour of our proposal. I think on a previous occasion the French Delegation was good enough to give two reasons, as propounded by the French Municipality in Shanghai, for the temporary continuance of opium

divans in the French Concession. I think that these reasons were not taken into serious consideration by this House. You will remember that these reasons were, firstly, that the closing of opium divans would force the people to smoke in their own houses, and that, as a consequence of such step, the number of opium lamps would be greatly augmented, and the danger of fires increased thereby. According to the statistics of insurance companies which we have taken the trouble to obtain, we find that the number of fires caused by the ignition of opium lamps is practically *nil*. It is well known that opium smokers use a very slow burning and entirely unflammable oil, and therefore the danger of fire from opium lamps is more imaginary than real. I need not take up any more time of this House by further statements to repudiate the pertinency of the arguments brought forward. I might, however, with the permission of the French Delegation, draw attention to the fact that in their Report, page 4, they state that on June 19th, 1907, a Government proclamation was issued forbidding the opening of opium divans throughout the territory of Annam and Tonkin, and laying down that no new divans should be authorised in Cochin-China and Cambodia. If there were valid reasons for forbidding the opening of opium divans in Tonkin it appears to me that the same reasons might apply to the French Concessions in China, unless our friends the French Delegation can adduce evidence showing the difference of conditions in Cochin-China and Tonkin from those prevailing in Shanghai. It appears to the Chinese Delegation that in considering a moral issue of this kind we ought to look facts squarely in the face, and not delude ourselves in any way; that in deciding a matter of such momentous importance, we should not allow ourselves to clog the issue by private interests. I might add that the existence and the continuance of opium divans in the French Settlement is exerting a very discouraging effect upon certain sections of our people; that the news of the fact is being conveyed by the Chinese Press to the farthest corner of our Empire. The fact that all other Governments have ordered the closing of public divans in their Concessions, whilst the French Government has reasons for continuing them for a further period is, I repeat, exerting a very discouraging affect, and we, therefore, beg their sympathetic co-operation. We appeal to their sense of international justice and fair play, and hope that our appeal will not be in vain."

Monsieur RATARD said that it was very difficult to give a complete reply to Mr. T'ANG'S statement. He wished to declare, however, that as soon as the Anti-Opium movement began in China, immediate steps had been taken by the French Municipal Council to prevent the issue of any new licences in the Concession. Moreover, the tax had been doubled, the effect being to diminish the number of couches by 30 per cent during the first year. They were determined not to tolerate the opening of more dens, in spite of the fact that more were being opened, if rumour was correct, in the Chinese city. They would completely suppress opium divans in the French Concession. They had engaged to do it, but they wished to be assured that China herself was in earnest. They were ready to take all measures which might aid China in eradicating opium, but they wished to do it thoroughly. He moved the adoption of the resolution as amended by him.

The vote resulted as follows:—

<i>For the amendment.</i>	<i>Against.</i>
France.	America.
Great Britain.	China.
Persia.	Germany.
Portugal.	Japan.
Russia.	Siam.
Netherlands.	

The Austro-Hungarian Delegation reserved its vote.

Monsieur MIYAOKA.—“I understand that the reservation of a vote is permissible only with the concurrence of the Commission as a whole.”

The CHAIRMAN.—“As the Chair understands it, a reasonable time for consideration should be given, and then if the vote is not recorded, the Chair would have to rule that the Delegate abstained from voting—but a reasonable time ought to be given, and, unless ordered otherwise in the present instance, the Chair would rule that this procedure should be observed.”

Monsieur MIYAOKA.—“I would beg to remind the Chinese Delegation that we are at a critical moment. There is danger that their resolution will be rejected by the Commission on the ground of a tie vote arising under the reserve. Considering that several of the Delegations here present would not like to place themselves in the position of opposing some particular Government which has a particular Concession, I believe that the whole difficulty would be obviated if the Chinese Delegation could see their way to accede to the amendment proposed by Monsieur RATARD.”

Mr. T'ANG.—“I beg to propose an amendment to the amendment of the French Delegation, and that is, instead of the words *as soon as they may deem it advisable* the words *as soon as possible* be substituted.”

The CHIEF COMMISSIONER FOR FRANCE.—“I am sorry that I cannot agree to the imperative tone of the words *as soon as possible*. I would also like to voice my strong objections to the sentence used by Mr. T'ANG relating to *private interests*. I consider it an insult to my Government, and would ask of the Chair whether such remark is in order?”

The PRESIDENT.—“Mr. T'ANG is not in order; he will perhaps explain the remark objected to.”

Mr. T'ANG stated that he did not mean the words *private interests* to apply to private individuals.

The PRESIDENT.—“The Chair considers that a reasonable time has been allowed the Delegate for Austria-Hungary to record his vote.”

Dr. RÖSSLER.—“I would beg to remind the House that in one of the earlier Sessions it was agreed that every proposal and amendment should be handed to each Delegation in writing for the reason that not all are able to follow alterations made in the course of debate, and I think this a reasonable method. I do not know my honourable friend's reason for withholding his vote, but I think that it is only fair that he should be allowed to do so. The Chief Commissioner for Portugal has reserved his vote on every single occasion.”

Dr. HAMILTON WRIGHT.—“I would ask the Chinese Delegation to reconsider the language in the last clause of the resolution. It is only a verbal distinction, and I do not think the Chinese Delegation have any intention of using an imperative term.”

Replying, Mr. T'ANG said that if it was the desire of the majority of the House, the Chinese Delegation was prepared to fall in with Monsieur RATARD'S suggestion, but he would like the word *possible* to take the place of *advisable*.

Monsieur RATARD having agreed to this slight change, the resolution as amended by him was again put to the vote and adopted unanimously.

Mr. T'ANG KUO-AN, moving the adoption of the third Chinese resolution, said: “In submitting this resolution I do not think that the Chinese Delegation need make a long speech. The evils arising from so-called anti-opium medicines are so well recognised that it would seem almost a waste of time to speak of them at length before this House. Everyone who has observed the conditions in China knows what a danger anti-opium pills and medicines constitute in this Empire. Every writer who has written on the opium evil mentions anti-opium medicines as a greater danger than the opium habit itself, and as I stated on a previous occasion, Sir John Jordan has on more than one occasion remarked to our Foreign Office that it would be quite futile for China to make efforts to stop the consumption of opium smoking and to allow the habit of morphia eating to continue and spread over the Empire; and he strongly urged upon our Government to see that the evil is eradicated concurrently with the abolition of the smoking habit. It would, therefore, seem superfluous for us to appeal to the co-operation of the various Delegations here in this respect. I might add, however, that while it is a deplorable fact that our Chinese people are the most interested in the manufacture and sale of these harmful medicines, the nationals of other countries also have a share in the trade. For instance, in the International Settlements in Shanghai we find British, French, Austrian and Japanese druggists, and others, selling these so-called anti-opium medicines. We have

had many of these samples analysed, and, with one notable exception, all of the samples analysed contained either opium or morphia. I may say also, and I crave the pardon of my Japanese friends for drawing attention to this fact, that a sample of pill manufactured by a Japanese firm commands the largest sale in China, and it goes to all corners of our Empire, owing to the enterprising spirit of the manufacturer. But we are most gratified to know that Japan is more than willing to assist China to drive these harmful drugs out of the market; that all China has need to do is to draw the attention of the Japanese authorities, who will at all times be prepared to lend their fullest co-operation. We therefore feel confident that this resolution will meet with the sympathy and support of this House and I need not further take up time by explanatory remarks."

Monsieur MIYAOKA.—"In presenting this statement in reference to this resolution it is necessary for me to say distinctly that the resolution as put forward has the profoundest sympathy of the Japanese Delegation. I regret, however, that the question of anti-opium medicines, manufactured by Japanese subjects and sold by Japanese merchants in China, was not brought to the attention of the Japanese Government before. In August, 1908, this Delegation was organised in Japan as a Commission to make investigations into the question of opium, morphia and other derivatives, as far as Japan was concerned. As I stated in presenting our report to you, we followed the line of investigation which was presented and laid before us by the Government of the United States. In the course of our investigations we found that there were unofficial rumours, statements from unofficial sources—travellers and others—that so-called anti-opium pills, manufactured presumably in Japan, or manufactured in Shanghai and elsewhere by Japanese subjects from morphia or other drugs imported into Japan, were finding a large sale. It was a matter of profound regret and astonishment to us that such a state of affairs remained unknown. This Commission as then organised *in toto* was very much hampered in its work, as one of its ablest members was stationed in Formosa. The work of the Commission was therefore naturally unavoidably delayed, but a thorough investigation of the archives of the Department for Foreign Affairs showed us that no official report has been received from the Japanese officials in the towns in China. They were therefore instructed to report. About the time that we were preparing to leave Japan for this Commission, reports were being received in the Foreign Office giving the details as requested. Before leaving Japan we made arrangements that all samples which might arrive were to be promptly forwarded to the Hygienic Laboratory for Home Affairs, to be carefully examined by chemists who are employed in that laboratory under the direction of Dr. Tahara, and that all the reports from the Consular Officers in China should be forwarded to us. We have thus had the opportunity of seeing all the reports, and have the satisfaction of knowing that these so-called anti-opium pills have been subjected to careful analysis at the Tokyo laboratory. We were most anxious as to when we might be able to present the result of such analysis, and Dr. Tahara has telegraphed to his subordinates in the Tokyo laboratory for the results. We have received an answer to the effect that they were nearly through with the work, but that they were not quite ready to forward to him the results of their analysis. From this you will see that, as soon as this subject was brought to the attention of the Japanese Government, they have promptly taken action to make a thorough investigation, and you need no assurance from me that the Japanese Government will do everything in its power to prohibit the sale and distribution of drugs detrimental to health in China. I would not like to place myself as in any way objecting to the most reasonable resolution put forward by China, but the point to which I beg to draw the attention of the Chinese Delegation is the fact that no communication has been made to the Japanese officials, who are well able to deal with the matter. Under such circumstances I have great doubts whether this is the proper procedure that should be followed, and I therefore hope that the Chinese Delegation will not press for a vote on this resolution."

Monsieur RATARD.—"I would like to ask the Chinese Delegation what they consider to be 'qualified medical advice'? Is anyone who represents himself to be a doctor in China a qualified medical adviser? Another matter I want to draw the attention of the Chinese Delegation to is that the sale of some of the products referred to is not prohibited by our Treaties. It would be much better for China to arrange diplomatically with regard to these products, as has been done in the case of morphia."

Mr. T'ANG.—"As a general rule we do not consider our Chinese doctors as qualified medical practitioners except those who have taken a medical course in some recognised

medical institution either abroad or in China, but those who usually set themselves up as doctors we do not regard as coming under the category of medical practitioners. The Honourable Chief Commissioner for France referred to the action that has already been taken with regard to Morphia. In reply, I beg to state that as regards morphia we have very stringent laws, in fact I may say that decapitation is the penalty for anyone caught openly selling morphia for illegitimate purposes. But there are no laws in China, nor, as far as we are aware, in foreign countries, against so-called anti-opium medicines. Of course it is a well-known fact that in the settlements in Shanghai these medicines are not sold under the head of poisons. No druggist thinks of putting a label on his box or bottle naming the ingredients of his medicines, or labelling them as poisons. It therefore goes out in the form of medicine which does not come under the operation of the law, and in order to check the spread of these drugs the Chinese Delegation is of opinion that separate legislation ought to be taken whereby these harmful drugs may be eliminated from the market. It is a well-known fact that hardly a boat goes into the interior of China but carries more or less of these packages of so-called medicines, and our country is being flooded with the poison. It is most important for China, if we are to put an effective stop to opium and its derivatives, that we should take into consideration the question of anti-opium medicines, and for this reason we have ventured to bring this resolution forward for the favourable consideration of this House."

Monsieur MIYAOKA.—"The remarks which have just been offered by Mr. T'ANG seem to me to emphasize rather than to negative the suggestion that this is a proper subject on which the Chinese Government should approach the Governments concerned through the ordinary diplomatic channels. It seems entirely out of place for this Commission to be voting upon a matter which would easily be adjusted by ordinary diplomatic process."

Dr. WRIGHT.—"I quite agree with what both the French Delegation and the Japanese Delegation have suggested, viz., that this is a subject for diplomatic negotiations, but I think it could be carried through more quickly if this Commission as a whole called the attention of the various Governments by this resolution to the facts of the case."

Monsieur MIYAOKA.—"I would beg to add that my remark does not imply that I am not going to call the attention of the Imperial Japanese Government to the matter. On the contrary, I am going to make the strongest recommendation to the Imperial Government; only my point is that, in my opinion, this is hardly a proper subject on which to take the vote of the Commission. I would respectfully suggest to the Chinese Delegation that a similar recommendation be made to the Government in Peking, suggesting this as a proper subject for diplomatic negotiations, and as far as Japan is concerned we are more than willing to make the most sympathetic allusion to this phase of the question, for we have in this Delegation one gentleman who is charged with the difficult problem of suppressing the evil in Formosa, who is fully aware that no measures for the suppression of the opium habit is productive of results unless this phase of the question be properly attended to."

Monsieur RATARD.—"We cannot interfere with legitimate trade in foreign concessions. It would not be so easy to control the sale of anti-opium medicines as the Chinese Delegation think. We are heartily with them, however, and we would like very much to see measures taken for preventing the unrestrained sale of such remedies. I beg to move as an amendment the following resolution:—

"That the International Opium Commission recommends strongly that each Delegation move its Government to enter into negotiations with the Chinese Government, with a view to effective and prompt measures being taken in the various foreign concessions and settlements in China for the prohibition of the trade and manufacture of such anti-opium medicines as contain opium or its derivatives."

Mr. T'ANG.—"I need hardly say how gratified we are with the remarks that have been made by the Chief Commissioner for Japan, but with all due respect perhaps we might be allowed to remind him that the attitude he has taken in this matter has only reference to his own country, and that is why it is the desire of the Chinese nation, as represented by our Delegation here, to secure, if possible, a unanimous expression from this House condemning the anti-opium medicines as sold in the foreign settlements and in China—to secure, I say, if possible, a general expression of disapproval from this House and the general assurance that each Delegation will urge upon its respective Government the necessity of taking measures to

prevent the manufacture and sale of these injurious medicines in their Settlements and Concessions in China. In other words, since each civilised country has its own laws and statutes against the sale of poisons and all medicines containing poisons, we do not think we are asking too much if we request each civilised power to make its laws effective in its respective Concessions and Settlements in China, that is to say, to transfer the operation of its laws as existing in its own country over to China, where the Powers enjoy extra-territorial rights for their subjects. Of course China will do her part in preventing her people from participating in this illegal traffic, but it appears to us that unless we have the practical co-operation of all the civilised Powers who are represented in the various Concessions in China, the task of eliminating the anti-opium evil will be too much for us to overcome, and ultimate success will be very doubtful, if not impossible."

Dr. WRIGHT.—"I wish to move that the question be put to the vote."

The resolution as amended by Monsieur RATARD was adopted unanimously on being put to the vote.

Mr. T'ANG moved the adoption of the fourth of the Chinese resolutions. After a desultory discussion with regard to the wording, it was decided to defer the consideration of the resolution until after the mid-day recess.

Before adjourning, the Chair reverted to the objection which had been taken by the Chief Commissioner for Germany to his ruling in connection with the reserved vote of the Austro-Hungarian Delegation. Hitherto in the reservation of a vote the House had not been put in the predicament of having its business suspended indefinitely, and under such circumstances the Chair did not consider that it would be right to allow the reservation. Technically, the objection raised by the Chief Commissioner for Germany was a sound one.

The Commission adjourned at 12.40 p.m.

On re-assembling at 2.30 p.m., the PRESIDENT declared that the business before the House was the further discussion of the fourth Chinese resolution.

Mr. T'ANG KUO-AN announced that during the interval he had held a consultation with Dr. RÖSSLER and Dr. HAMILTON WRIGHT, and that by their suggestion he now wished to move the following in the place of his original resolution :—

That the International Opium Commission recommends that each Delegation move its Government to apply its pharmacy laws to its subjects in the Consular districts, Concessions and Settlements in China.

Monsieur RATARD stated that he would have no hesitation in accepting the resolution as altered.

The resolution was then put to the vote and adopted unanimously.

On the suggestion of Dr. HAMILTON WRIGHT it was decided to appoint a Committee of three to superintend the printing of the proceedings of the Commission, after the close of the sittings. The Right Hon. Sir CECIL CLEMENTI SMITH also moved the appointment of a Committee for revising the resolutions that had been adopted. It would be necessary to modify the language in certain instances, and to finally pass the resolutions at the next meeting.

The Chair selected Dr. WRIGHT, Mr. BRUNYATE and Mr. T'ANG KUO-AN as the Committee of Revision and Sir ALEXANDER HOSIE, Monsieur BRENIER and Mr. T'ANG KUO-AN as the Printing Committee. At Mr. T'ANG'S request, Mr. J. L. CHALMERS, Associate Delegate for China, was permitted to act for him on the latter Committee.

Monsieur RATARD, on behalf of the French Delegation, made the following statement:—

“Although neither French Indo-China nor France are opium-producing countries, and although the use of opium is practically unknown in France, and has scarcely any ill-effects on the native population of her colonies, the French Delegation desires to announce before the closing of this International Opium Commission that—

- (a) As concerns French Indo-China, the Government will continue strictly to observe the measures described in the Report presented to the Commission, which have already had the effect of considerably reducing the importation of raw opium and the consumption of *chandu* :
- (b) As concerns Kuangchowwan, where the French Government is tied by a contract with the present farm until the end of the year 1911, the French Delegation consider it to be their duty towards their Chinese colleagues on the Commission to announce that it is the firm intention of the Governor-General of Indo-China to apply to the whole territory of Kuangchowwan similar measures to those which may have been effectively adopted by China at the time when the contract with the opium farm expires.”

The PRESIDENT.—“The Chair would remind the House that there are still some reports to be presented, which presumably will not be ready in time. There is still the report on Trade Statistics, report on Revenue Statistics, Tariffs, etc., and also one from the Committee on Ways and Means.”

Mr. LAIDLAW.—“On behalf of the Committee for Trade Statistics, I am sorry to say we are not quite ready. There has been a great deal of work involved in translation of figures into one common language and we don't expect the report will be ready until Saturday morning.”

Dr. WRIGHT.—“May I suggest that in that case the different reports be incorporated in the proceedings.”

A discussion then took place respecting the assessment of any expenditure over and above funds in hand, after which Dr. TENNEY moved an adjournment of the House until Saturday morning.

Sir CECIL CLEMENTI SMITH expressed the hope that the last meeting of the Commission might take place the following day.

It was eventually decided to adjourn until the following day at 2.30 p.m.

Dr. TENNEY said that he would like to tell the Delegates that he had seen demonstrations given by Mr. TOWNS in connection with his cure for opium smoking, which had previously been referred to, and that in his judgment, and in the judgment of men more competent than himself, those demonstrations were highly satisfactory. It seemed to him a matter well worth looking into.

Dr. HAMILTON WRIGHT supported the last speaker. He said that he had always opposed from a professional point of view any serious consideration of Mr. Towns' remedy until it had been made public, but now that it had been made public he had no hesitation in expressing the opinion that the remedy was an excellent one, and had successfully accomplished the cure of many patients. He concluded his remarks by inviting the experts on the Commission to meet him for the purpose of making observations in their private capacity.

Monsieur RATARD having read extracts from two letters which he had received from French officials resident in Szechwan, relative to the continued cultivation of the poppy in that province, the House adjourned at 4.30 p.m.

Minutes of the Fourteenth Session

26th FEBRUARY, 1909

The PRESIDENT took the Chair at 2.30 p.m.

The Chief Commissioner for Portugal, Senhor POTIER, addressed the House:—

“Duly authorized by my Government, I have the honour to make the following Declaration:—

“Considering that this is a Commission of study, the Portuguese Government wishes to carefully examine the text, conditions and basis of the proposals presented by the various delegates, as well as the reports and information furnished by the local Authorities of the colonies interested, with regard to the means how to render effective the desirable measures to be adopted, and therefore reserves its vote until after the Minutes of the International Commission and the documents referring to the subject have been perused, when its decision will be communicated to all the Powers represented in the Commission.”

The Chief Commissioner for the Netherlands, Mr. A. A. DE JONGH, laid on the table the following statement embodying the two resolutions offered for consideration at a previous Session:—

The Delegation for the Netherlands brings forward two resolutions, the first of which reads as follows (for text *vide* Minutes of the Twelfth Session).

“In explaining the reasons for presenting this resolution, the Chief Commissioner for the Netherlands draws the attention of the House to the first two sections of the preamble, where it is said that ‘the total eradication of the use of opium within a few years is to be considered as a high, but at present an unattainable ideal,’ and further that ‘in order to check the use of opium much may be expected from taking *systematic* measures which are *gradual* in their effect,’ and goes on as follows: ‘judging by experience gained in Netherlands-India our Delegation is of opinion that the best way of reaching that object is the establishment of an opium system, managed by officials who are not in the least interested in the amount of sale. As appears from Appendix III to the Memorandum on the Opium Régie in Netherlands-India, presented together with our report, under that system in a period of fifteen years the average annual consumption of *chandu* per head of the population in Java shows a decrease from 0.042 tahlil to 0.025 tahlil, which means a little over 40 per cent. I wish to state that this decrease took place gradually, and that therefore there is good reason to expect that it will prove to be a constant one and will go on progressively.

“The Netherlands Delegation on this ground, being proud of the Java Régie system, and also deeply convinced of its useful effect in other regards, has taken the liberty to present the above-mentioned memorandum for the purpose of putting forward the principles on which the system is based, and with the hope that the study of it may stimulate other Governments to practise it in their own territories or possessions, as soon as circumstances make it possible to do away with the prevailing systems of farming or of free retail trade in opium.

“As for the second part of the same resolution, I beg to draw the attention of the House to the circumstance that the resolutions heretofore accepted deal with the prevalence of smuggling, the checking of the morphine evil, the study of the medical side of the opium question, the re-examination of the prevailing opium revenue systems, a courteous statement in order to compliment the Government of China for what has been done in the last two years for checking the use of opium in that Empire, and lastly, a recommendation to our Governments to take measures for the gradual suppression of the practice of opium smoking.

“As yet not a single resolution has been moved to suggest definite measures on the subject which, in the diplomatic correspondence on the matter, has been put forward as the main object of our Commission, *viz.*, to devise means to limit the use of opium. By throwing back this task on the shoulders of the various Governments, our Commission does not do what is expected from it. Therefore it might greatly contribute to a practical result if a resolution were put forward recommending some definite measures to the effect above mentioned. As such measures may be considered, those which have been enumerated under the numbers I to IX of our proposed resolution, which have in part been practised in Java for many years and have, in part, been lately taken into consideration, in order to show to the world which is

waiting for practical results, that our Commission has not forgotten to give some practical hints for a satisfactory solution of the opium question, the Netherlands Delegation thinks it useful that the second part of this resolution be adopted.

"I do not think it necessary to say much about each of these measures, as all of them speak sufficiently for themselves. However, I am prepared to give any additional information that may be asked for."

The second resolution runs as follows (for text *vide* Minutes of the Twelfth Session).

"Experience has taught that the smuggling of opium (which for the reasons mentioned in the preamble is in itself a great evil), cannot be extirpated as long as opium remains an ordinary article of trade, and so goes through the hands of private wholesale dealers and of smugglers who buy it from them.

"Therefore it is most urgent that the trade in opium be withdrawn from those persons, and be limited to the Governments of opium-producing and opium-consuming countries. This measure may do an immense deal of good for the solution of the Opium problem, and therefore, in our opinion, should be recommended on this occasion to the Governments concerned, even though realisation of its principle will be possible in the future only."

Monsieur MIYAOKA read a reply to the question asked by the Chinese Delegation during the Twelfth Session, regarding the rate of import duty on morphia imported into Kuantung.

Mr. R. LAIDLAW, M.P., presented the Report of the Committee on Trade Statistics.

Monsieur MIYAOKA.—"As there is no business just for the moment, I may, perhaps avail myself of this occasion to make a reply to a question which was privately submitted to me by Dr. Tenney. I take this course because I believe the information will be of interest to the Commission as a whole. Dr. Tenney did not put it in the form of a question formally submitted before the International Opium Commission, but as a report to the effect that a large quantity of morphia is being re-exported from the port of Kobe to Korea, Manchuria and China proper; that there were large quantities of morphia which came in from abroad which were not landed,—at least no steps were taken regarding the usual formalities at the Custom House,—but that it was re-shipped from Kobe (implying that the morphia in question was for transhipment from one ship to another, or that it was landed temporarily at the Customs sheds, and placed on board out-going ships), and that the amount thus dealt with in Kobe was a very large amount.

"I have made enquiries on the subject, and am now informed that during the year 1908 there was one transhipment of morphine which corresponded with the circumstances just given. That was only one case, and the quantity was 15-lbs. That was the only occasion on which re-shipment was made. Dr. Tenney further wished for information regarding the Provisions of the Japanese Law under which such a step is possible. Art. 38 of the Customs Law (No. 61) of Japan, promulgated in March 1899, reads as follows:—

'The provisions relating to exportation apply *mutatis mutandis* in all respects to the re-exportation of goods. But this rule does not apply to the re-shipment of goods which have been temporary landed.'

Thus, all goods coming from abroad, but which have been only temporarily landed for the purpose of re-exportation, will be exempt from the provisions relating to re-exportation, and I am now informed that the only case of morphine was this one package containing 15-lb. which was exported to Chemulpo. To show you that no re-shipment or transhipment at Kobe is possible without the knowledge of the Customs officials, it is sufficient, I think, to point out to you the Provisions of Art. 12 of the same Law to which I have referred. Art. 12 provides that:

'Vessels carrying foreign goods cannot, excepting in cases where the permission of the Superintendent of the Customs has been obtained, put on board or discharge cargo until after the production of the Manifest. But this rule does not apply to passengers' hand-baggage and postal matter.'

So you will see that unless the Manifest is presented to the Customs, no vessel can unload any goods coming from abroad."

Mr. BRUNYATE, on behalf of the Committee of Revision, presented the resolutions as adopted, for final endorsement by the Commission.

[See after Minutes of Fourteenth Session.]

The Right Hon. Sir CECIL CLEMENTI SMITH moved the final adoption of the resolutions. This proposal was carried unanimously.

Sir CECIL CLEMENTI SMITH.—“I hope I am not wrong in intervening at this point but the question naturally arises: What validity by any action of this Commission should be given to the resolutions which we have now adopted? I venture to think that the proper course for us to adopt is to move that the PRESIDENT, on behalf of the Commission, do sign the resolutions as having been passed by the Commission. It seems to me that it would be more properly done thus than by getting signatures from all the members of the Commission, and I beg to move accordingly in that sense.”

This proposition also met with unanimous approval.

Sir CECIL CLEMENTI SMITH.—“We have now passed the formal resolutions which this Commission has arrived at after a somewhat long period of deliberation, but there is one resolution more—maybe more than one—which we should wish to move before separating:—

‘That a cordial vote of thanks be offered to the Right Reverend Bishop Brent for the dignity, impartiality, and ability with which he has discharged the duties of President of the International Opium Commission.’ (General applause.)

Sir CECIL CLEMENT SMITH.—“May I rise to say that that vote is passed with acclamation?”

The PRESIDENT.—“My honourable Colleagues: If, perchance, you deem that you have grounds to justify an expression of thanks to your President, he for his part has still more abundant justification for voicing his sense of appreciation to you. The spirit of co-operation and sympathy which has characterized this distinguished body from the moment I took the chair until now has never abated, and has robbed a responsibility of many anxieties and converted it into sheer privilege and honour. It is not difficult to rule, as has been my lot, over an assembly of men who, by virtue of their normal habit of life, contribute to order wherever they may be and in whatever business they may engage. That representatives of thirteen nations could so readily mould themselves into a family in the brief period of a month augurs well for the future.

“I congratulate this House not only that in the findings reached, all the resolutions put to vote were adopted *nemine contradicente*, but also that four out of the nine call for action on the part of one nation in behalf of the interests of another. The tide of sympathetic relationship between the ends of the earth is not yet at the flood, but as the history of the International Opium Commission proclaims anew, it is rising. There is the utmost frankness in the expression of conviction regarding national rights in the International relations of our day, and nations were never clearer as to what constitutes their rights, but there is also increasing considerateness for the well-being of sister nations and a gratifying readiness to make local sacrifices for the universal good. No nation, as no individual, is asked even by the loftiest altruistic code to love his neighbour *better* than, but only *as*, himself. We are progressing toward this coveted goal.

“The conclusion of our work as an International Commission has been reached. The reports of the various countries represented have been laid before the House and discussed with ability and thoroughness. After careful examination Committees have reported on Trade Statistics; the Growth of the Poppy and production of Opium; Revenue Statistics, Tariffs, Excise, etc; Treaties and International Agreements.

“In our resolutions based upon the evidence in hand we have touched various phases of the subject, though we do not pretend to have exhausted them. A complimentary resolution expressing sympathy with China in her task has been adopted; drastic measures for the suppression of the morphine habit and the gradual suppression of opium smoking, are advocated as a principle; three resolutions are aimed at correcting the abuse of opium and its derivatives in foreign Concessions and Settlements in China; in countries where opium is not prohibited other than medical purposes a revision of the existing systems of regulation is recommended

to the Governments concerned; each Delegation is urged to advise its own Government to investigate scientifically for itself the matter of anti-opium remedies, and the effect of opium and its products; International co-operation is advocated to prevent the smuggling of opium into countries where a prohibitory law prevails.

"In two instances the Commission judged itself unable to consider questions brought forward on the ground that they were beyond its province of action; the first one being that of the scientific investigation of anti-opium remedies and of the properties and effects of opium and its products, which, however, was reached in another form as just indicated; and the second, that of a resolution which involved existing International Treaties and Agreements.

"There is one phase of the subject which the casual reader of the resolutions might suppose we have not duly considered—the moral aspect. But we who have had this weighty problem under advisement know that such has not been the case. It has from time to time been on the lips of the various speakers and always, I incline to think, before the mind's eye of the whole assembly. All of us alike value character as the one indispensable possession of human life, and it is our undivided desire to take such measures as will safeguard the moral freedom of the young and undefiled, and make for the restoration of those who have lost their heritage through the evils connected with opium. I assert with confidence our sympathy has never flagged.

"But sympathy in its earlier stages differs from its later embodiment. In its youth it spends much of its force in kindly emotion; in its matured form it moves with balanced nerves and purposeful tread directly toward measures of succour and relief. Indeed science considered in its practical bearings is a developed form of sympathy. Our immediate function has been to deal with the matter before us with a view to practical aid. We were, so to speak, the physician who has come to the bedside of the sick man, not to tell him he is sick but rather to consider how he may be made whole. The man in the street cannot understand what good the biologist in his laboratory is doing to the community, though all the while he is defending people from disease. Koch or Kitasato studying germs are at the same moment precluding the possibility of the widow's tears and the orphan's desolation.

"Similarly, we have been working at the root of the matter. Behind the raw statistics and cold sentences of our deliberative language and of most of our resolutions stand the pitiable army of moral slaves, in whose behalf we have been labouring in order that they may gain the greatest of all gifts—moral freedom. We have not wasted effort in heaping epithets upon a patent evil. The calling a bad thing by a bad name with little or no argument is a powerful means of impressing the public with the conviction that they must rid themselves of it. Indeed, it is necessary to rob an evil of its good or tolerable reputation in order to destroy it. But the evil of the abuse of opium is too well-established to require of us any fresh execrations. Just as slavery reached a point when among its opponents it was no longer a mere question of morals or an academic theory but 'an actual perplexing problem continually appearing in every direction and in various forms,' so has it come to be with the evil before us, and we have, we trust, not wholly failed in carrying the problem a stage nearer its final solution. Much still remains to be done by our respective Governments and the nations which we represent. As we move out to meet our responsibility the appeal of one of the world's more recent heroes comes to us—'Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it.'"

Monsieur MIYAOKA moved a vote of thanks to the Secretaries in the following terms:—

"With your permission and the indulgence of the members of the International Commission I beg to give expression to the sense of high appreciation in which we hold the services rendered by the Secretaries. It is unnecessary for me to commend to your attention the care, and the diligence, and the energy which they have brought to bear on the execution of their onerous duties. Owing to local circumstances beyond our control, these officers were compelled to rely for assistance upon a staff which, in proportion to the volume of work involved, must be pronounced to be inadequately small. In looking back upon the work which they have already accomplished and in looking upon what is now being done and what still remains to be done, we cannot be blind to the enthusiasm with which they and the members of their staff are applying themselves to their task.

"In this connection I may also be permitted to remark that the call of various Delegations upon the good offices of the Secretaries have been both frequent and numerous. Those appeals to their assistance have been invariably responded to not only with the utmost courtesy on their part, but with that good-natured willingness which has commanded the admiration of all. I feel, therefore, confident that I am correctly interpreting the general

sentiment, when I venture to move that an expression of cordial thanks of the International Opium Commission may be tendered to the Secretaries and their staff, and that the fact may be recorded in the Minutes of our proceedings."

The Chair declared the vote carried by acclamation.

An informal discussion took place as to the advisability of making public the resolutions adopted by the Commission. Mr. T'ANG KUO-AN expressed, on behalf of his Delegation, a desire that the results arrived at should be communicated to the Press as soon as possible. He said that the whole of China was looking towards Shanghai, anxious to know the conclusions of the Commission, and he thought that, unless the House was of an entirely contrary opinion, some consideration might be shown to both the Press and the people of China. His Delegation were taking immediate steps to acquaint the Chinese Government with the substance of the resolutions that had been passed.

The PRESIDENT thought that the matter might well be left to the Press Committee, who would take into consideration what Mr. T'ANG had said.

Monsieur RATARD was of opinion that the resolutions should not be published until they had been submitted to, and had been approved of, by the various Governments represented.

SIR CECIL CLEMENTI SMITH and Monsieur MIYAOKA concurred with Monsieur RATARD'S remarks. They thought that it would be an unusual and improper course to publish the resolutions before the Governments they represented had had an opportunity of perusing them.

It was finally decided that publication of the resolutions should be deferred until authorised by the Government of each or of any country concerned.

The Chair having expressed the thanks of the Commission to the Chinese Delegation for their hospitality in arranging for the accommodation of the Commission during its sittings, announced that the business of the House was concluded, and he declared that the International Opium Commission stood adjourned *sine die*.

The proceedings terminated at 4.40 p.m.

(Signed) FRED. W. CAREY

(Signed) XAVIER DE LAFORCADE

Hon. Secretaries to the International Opium Commission.

Shanghai, 22nd March, 1909.

The following are the Resolutions as adopted, in their revised form :—

BE IT RESOLVED :

1. **That** the International Opium Commission recognises the unswerving sincerity of the Government of China in their efforts to eradicate the production and consumption of Opium throughout the Empire; the increasing body of public opinion among their own subjects by which these efforts are being supported; and the real, though unequal, progress already made in a task which is one of the greatest magnitude.

2. **That** in view of the action taken by the Government of China in suppressing the practice of Opium smoking, and by other Governments to the same end, the International Opium Commission recommends that each Delegation concerned move its own Government to take measures for the gradual suppression of the practice of Opium smoking in its own territories and possessions, with due regard to the varying circumstances of each country concerned.

3. **That** the International Opium Commission finds that the use of Opium in any form otherwise than for medical purposes is held by almost every participating country to be a matter for prohibition or for careful regulation; and that each country in the administration of its system of regulation purports to be aiming, as opportunity offers, at progressively increasing stringency. In recording these conclusions the International Opium Commission recognises the wide variations between the conditions prevailing in the different countries, but it would urge on the attention of the Governments concerned the desirability of a re-examination of their systems of regulation in the light of the experience of other countries dealing with the same problem.

4. **That** the International Opium Commission finds that each Government represented has strict laws which are aimed directly or indirectly to prevent the smuggling of Opium, its alkaloids, derivatives and preparations into their respective territories; in the judgment of the International Opium Commission it is also the duty of all countries to adopt reasonable measures to prevent at ports of departure the Shipment of Opium, its alkaloids, derivatives and preparations, to any country which prohibits the entry of any Opium, its alkaloids, derivatives and preparations.

5. **That** the International Opium Commission finds that the unrestricted manufacture, sale and distribution of Morphine already constitute a grave danger, and that the Morphine habit shows signs of spreading: the International Opium Commission, therefore, desires to urge strongly on all Governments that it is highly important that drastic measures should be taken by each Government in its own territories and possessions to control the manufacture, sale and distribution of this drug, and also of such other derivatives of Opium as may appear on scientific enquiry to be liable to similar abuse and productive of like ill effects.

6. **That** as the International Opium Commission is not constituted in such a manner as to permit the investigation from a scientific point of view of Anti-Opium remedies and of the properties and effects of Opium and its products, but deems such investigation to be of the highest importance, the International Opium Commission desires that each Delegation shall recommend this branch of the subject to its own Government for such action as that Government may think necessary.

7. **That** the International Opium Commission strongly urges all Governments possessing Concessions or Settlements in China, which have not yet taken effective action toward the closing of Opium divans in the said Concessions and Settlements, to take steps to that end, as soon as they may deem it possible, on the lines already adopted by several Governments.

8. **That** the International Opium Commission recommends strongly that each Delegation move its Government to enter into negotiations with the Chinese Government with a view to effective and prompt measures being taken in the various foreign Concessions and Settlements in China for the prohibition of the trade and manufacture of such Anti-Opium remedies as contain Opium or its derivatives.

9. **That** the International Opium Commission recommends that each Delegation move its Government to apply its pharmacy laws to its subjects in the Consular districts, Concessions and Settlements in China.

[NOTE.—*The Portuguese Delegation reserved its vote on these resolutions in every instance. With regard to the vote of the Italian Delegation, attention is called to the following correspondence.*]

SHANGHAI, 15th March, 1909.

To Signor R. FARAONE,

Delegate for Italy to the International Opium Commission.

DEAR MR. FARAONE,

In accordance with the desire expressed by the President in his letter to you of the 25th February, I now beg to send you for perusal a copy of the Minutes, and shall be glad if you will record your vote where necessary. I may draw your attention to the following:—

Page 57: 11th Session: Previous question moved by Mr. Miyaoka, during the discussion on Dr. Tenney's Resolution;

Page 60: Dr. Rössler's Amendment to the third of the Resolutions put forward by the British Delegation;

Page 60: The third of the British Resolutions;

Page 73: 12th Session: Monsieur Ratard's Amendment to the Second of the Resolutions submitted by the Chinese Delegation.

I am also enclosing a copy of the Resolutions as they were finally adopted by the Commission.

With your permission, I propose to insert this letter and your reply at the end of the Minutes for the 14th Session.

I remain, etc.

(Signed) FRED. W. CAREY,

Hon. Secretary to the International Opium Commission.

SHANGHAI, 15th March, 1909.

To THE SECRETARY of the

International Opium Commission.

DEAR MR. CAREY,

In reply to your letter of to-day's date, I beg to record my vote on the Resolutions adopted by the International Opium Commission, as follows:—

11th Session (page 57): Mr. Miyaoka's 'previous question': *No*;

11th Session (page 60): Dr. Rössler's Amendment: *Aye*;

11th Session (page 60): Original Resolution: *Aye*.

In explanation of my vote here, I may say that, it having been decided by a majority that the Commission was not so constituted as to permit the investigation from a scientific point of view of the properties and effects of opium and its products, I concur with Mr. Miyaoka's view that all that remains for us to do is to recommend that phase of the question to our respective Governments.

12th Session (page 73): Monsieur Ratard's Amendment:

With reference to this Amendment, since the Resolution as finally adopted by the Commission entirely meets my views, it is obvious that I need not now consider any previous discussion *pro* or *con*.

I agree to all other Resolutions as finally and unanimously adopted by the Commission, and I shall be glad if you will insert this correspondence in the Minutes as you suggest.

I remain, etc.,

(Signed) R. FARAONE,

Delegate for Italy to the International Opium Commission.

Commission Internationale de l'Opium.

SOMMAIRE DES PROCÈS-VERBAUX EN FRANÇAIS.

PREMIÈRE SÉANCE,

1 FÉVRIER 1909.

La Commission s'est réunie pour la première fois le 1er Février 1909, à Shanghai, dans le Palace Hotel. Son Excellence Toan Fang, viceroi des Deux Kiang, spécialement nommé par rescrit impérial, souhaite la bienvenue aux délégués dans une adresse qui fut ensuite répétée en anglais par le taotai Wan Ping-tchoung. Le vice-roi, après une référence à l'édit impérial du 20 Septembre 1906, déclare que la surface cultivée en pavot a déjà été réduite considérablement, et que la consommation de l'opium a diminué de moitié. Son Excellence exprime l'opinion, qu'il ne faudra pas, pour la suppression totale de l'opium, plus de deux ans, au lieu du délai entier de dix ans assigné. Il indique la nécessité d'un monopole du gouvernement, pour assurer le contrôle plus effectif du mouvement et de la vente de l'opium; mais il craint que l'établissement d'un pareil monopole ne soit contraire aux Traités et recommande cette question à l'attention de la Commission. Son Excellence termine en vantant les motifs de bienveillance qui ont poussé le gouvernement Americain à prendre l'initiative de cette Commission.

Son Excellence se retire à 11h.40, après une remarque de M. Ratard, premier délégué français au sujet de l'emploi de la langue française, et la séance préliminaire de la Commission commence aussitôt, le public étant exclus.

Le Taotai Ling Yu-ling, premier délégué chinois propose comme président de la Commission, le T. R. Evêque Brent, chef de la délégation Américaine. La proposition appuyée par Sir Cecil Clementi Smith, chef de la délégation britannique, est adoptée à l'unanimité.

Le T. R. Evêque Brent prend la présidence à 11h.45 du matin. Dans un discours d'ouverture, il remercie les délégués de l'avoir choisi comme président. Il s'excuse de son inexpérience et sollicite leur collaboration pour l'aider à soutenir la responsabilité de sa position. Nous allons, dit-il, avoir à nous occuper d'une question importante et difficile; il faudra, pour arriver à une heureuse issue de nos travaux, du courage et de la sincérité. Tout grand problème, d'après son opinion, passe par deux étapes: la première, de sentiment, parfois plus détachée des faits que la question ne le comporterait. La seconde scientifique, froide analyse des faits. Le problème posé devant la Commission est arrivé maintenant à cette seconde phase. Le Président appuie sur ce point qu'ils sont réunis en Commission et non en Conférence. Il propose que toutes les discussions soient débarrassées des sujets de controverse et que les questions à côté soient écartées. En conclusion, il rappelle aux délégués qu'ils sont réunis avec l'idée et l'espoir d'accomplir un travail qui vaudra le plus grand crédit à leurs pays respectifs et dont bénéficiera l'Humanité entière.

Sur la proposition du Président,

M. F. W. Carey, délégué adjoint pour la Chine est nommé Secrétaire, et M. L. De Giéter, secrétaire adjoint de la Commission.

Le Président donne lecture de la liste des membres des diverses délégations dont les noms ont été notifiés au Gouvernement Américain. Monsieur Ratard, secondé par Monsieur Kleimenow, propose alors que les réunions n'aient lieu que l'après-midi. Mais il est décidé qu'un comité sera nommé pour discuter la question des heures des séances et les autres questions de procédure et de réglementation.

Sir Cecil Clementi Smith propose que, vu l'importance de ce comité chaque délégation y soit représentée par un de ses membres, le comité choisissant lui-même son président. (adopté).

Le comité de procédure et de réglementation est alors composé comme suit :

Etats Unis d'Amérique	Dr. HAMILTON WRIGHT.
Austriche-Hongrie	Dr. KARL BRENAUER.
Chine	M. T'ANG KUO-AN.
France	M. BRENIER.
Allemagne	Dr. W. ROESSLER.
Grande-Bretagne.....	M. R. LAIDLAW, M.P.
Italie.....	M. FARAONE

Japon	M. MIYAOKA.
Pays bas	M. A. A. DE JONGH.
Portugal	M. O. G. POTIER.
Russie	M. KLEIMENOW.
Siam	M. PHVA SAKDISINIE.

Sur la proposition de M. Potier, secondée par le Dr. Hamilton Wright, M. R. Laidlaw, M.P., est élu président de ce comité.

La séance est levé à 12h.45.

DEUXIÈME SEANCE,

2 FÉVRIER 1909.

LE Président ouvre la séance à 2h.30.

Avant d'aborder les affaires inscrites à l'ordre du jour, Sir Cecil Clementi Smith, s'adressant au bureau, demande en son nom et au nom des membres de la Commission que le discours d'ouverture du Président soit imprimé in extenso et qu'il en soit fourni un exemplaire à chaque Délégué. Le Président accède à cette demande. (V. texte anglais de ce discours).

Le procès-verbal de la précédente réunion de la Commission est lu par le secrétaire et adopté.

Le Président fait la déclaration suivante :

“En proclamant hier les noms des Commissaires accrédités, le Bureau a cru devoir omettre ceux de deux membres de la délégation chinoise: S. E. Joei Tch'eng et S. E. Ts'ai-Nai-Hoang; bien qu'ils soient dûment désignés par leur Gouvernement et portent des lettres du Wai-ou-pou, leurs noms n'avaient pas été notifiés à la Puissance chargée des convocations. Maintenant, cependant, une demande a été faite pour que cette notification soit effectuée, en sorte que la formalité nécessaire pour placer ces délégués dans une position régulière sera remplie ultérieurement.”

Le Président donne lecture du télégramme suivant reçu le matin du Président des Etats Unis :

“J'exprime aux Commissaires qui sont réunis aujourd'hui mes meilleurs souhaits et ma conviction que leurs travaux seront de la plus haute importance en vue de la suppression du fléau de l'opium dans le monde entier.” Signé: Théodore Roosevelt.

Le secrétaire donne lecture de nombreux télégrammes adressés à la Commission par diverses sociétés d'éducation et de lutte contre l'opium dans les provinces du Kiangsou, Fokien, et Koangtong (La copie en est annexée au chapitre Correspondance).

Sur la proposition du Dr. Hamilton Wright il est décidé qu'à l'avenir les télégrammes ne présentant pas un caractère d'urgence adressés à la Commission, ne seront pas lus, mais qu'un nombre suffisant de copies en seront tirés et distribués aux Délégués pour leur information.

Le Comité de Procédure et de Règlementation donne lecture de son rapport et des règles proposées :

- 1) Le Président sera désigné par les termes “ M. le Président.”
- 2) Aucun Délégué ne pourra prendre la parole sans l'autorisation du Président.
- 3) Chaque Délégation à son tour (alphabétiquement) déposera un rapport contenant ses données sur la question de l'opium sur le Bureau de la Commission, sans discussion ni débat; une sous-Commission sera alors désignée parmi les noms remis au Président par les diverses Délégations, et les rapports dont il s'agit seront renvoyés à cette sous-Commission qui les discutera et fera son rapport à l'assemblée plénière. La Commission nommera le président de la sous-Commission; la sous-Commission nommera son rapporteur et ses secrétaires.

4)etc.

Les Règles 1 et 2 sont adoptées sans discussion.

M. de Jongh propose d'amender la règle 3 en supprimant la seconde partie commençant par “une sous-commission sera alors désignée” et en la remplaçant par la clause suivante: “La Commission Internationale siègera d'ordinaire en séance plénière; une ou plusieurs sous-commissions pourront être nommées quand il apparaîtra qu'une étude préliminaire par un nombre limité d'experts est nécessaire pour traiter avec succès une partie spéciale du problème posé.”

L'amendement est soutenu par Sir Cecil Clementi Smith qui considère que la discussion de points importants ne saurait être conduite d'une façon satisfaisante par aucun membre des délégations individuellement.

Après une courte discussion l'amendement de M. de Jongh est mis aux voix et voté par 15 contre 10.

La proposition, faite par Sir C. Clementi Smith, que les règles soient renvoyées au Comité pour un nouvel examen est acceptée.

La Commission s'ajourne alors au 5 février à 11 heures du matin.

TROISIÈME SÉANCE,

5 FÉVRIER 1909.

La Commission se réunit à 11 heures du matin ; le Président annonce que le procès-verbal de la séance précédente ne sera pas lu à moins de demande formelle.

M. de Giéter ayant donné sa démission, M. de Laforcade est nommé secrétaire adjoint pour le remplacer sur la proposition de M. Ratard, M. True est nommé sténographe officiel de la Commission.

Un Comité des voies et moyens est formé ; le Président nomme pour en faire partie les délégués suivants : MM. Bernauer, Faraoane, Kleimenow, Potier et Ratard ; la fonction de ce Comité sera d'autoriser toutes les dépenses supportées par la Commission dans son ensemble et d'aviser aux moyens de couvrir ces dépenses. Les communications sur ce sujet devront être adressées au président du Comité par les chefs des délégations.

Le Président, prenant le rapport de la Conférence de la Paix tenue à la Haye en 1907, lit des extraits des instructions données par le Secrétaire d'Etat américain aux délégués représentant son Gouvernement à cette Conférence. Il rappelle aux délégués qu'ils ne sont ni Envoyés extraordinaires ni Ministres plénipotentiaires ; qu'il a été clairement entendu qu'aucun des Gouvernements représentés ne serait tenu d'accepter les conclusions, ou d'agir selon les recommandations de la Commission ; qu'en conséquence les vues qu'ils pourraient exprimer individuellement ou collectivement, pendant le cours de cette enquête, n'obligeraient en rien leurs Gouvernements. C'est leur devoir d'examiner à fond toute question qui sera présentée devant eux, et, ce faisant d'exprimer leur opinion en toute liberté ; autrement il serait presque impossible d'arriver à aucune solution pratique et la Commission resterait sans utilité.

Les noms suivants ayant été notifiés à la Puissance chargée des convocations sont ajoutés à la liste officielle des membres dûment accrédités des Délégations :

WU-PAO-YEN	délégué adjoint pour la Chine	
F. A. CARL	do.	do.
J. L. CHALMERS	do.	do.
F. W. CAREY	do.	do.
C. CLEMENTI	assesseur pour la Grande-Bretagne	
W. D. DARNES	do.	do.

Le Comité de réglementation et de procédure a fait distribuer le texte de règles qu'il a revues et qui sont maintenant ainsi conçues :

- 1.—Le président sera désigné par les termes: M. le Président
- 2.—Aucun délégué ne pourra prendre la parole sans l'autorisation du président.
- 3.—En cas de vote, chaque délégation n'aura qu'une voix. En cas de partage égal des voix, le Président aura une voix décisive.
- 4.—Immédiatement après l'adoption des présentes règles, le Président invitera les délégations prenant part à la Commission internationale de l'opium, à présenter leurs rapports concernant les divers aspects de la question de l'opium dans les territoires et dépendances de leurs pays respectifs.
- 5.—Chaque délégation par ordre alphabétique déposera alors devant la Commission sans discussion ni débat un rapport contenant ses données sur la question de l'opium.
- 6.—Un temps suffisant sera accordé aux membres de la Commission en général, pour l'examen des rapports présentés.
- 7.—Bien que la Commission doive en général siéger in pleno, un ou plusieurs Comités pourront être nommées en vue d'étudier les rapports dont il est question aux articles 4, 5 et 6, ou toute partie spécifiée de ceux-ci, lorsqu'il apparaîtra qu'une étude préliminaire par un nombre limité d'experts est nécessaire pour arriver à une conclusion au sujet d'un problème posé.

8.—Tout comité ainsi nommé pour l'étude détaillée d'un rapport ou d'une partie de rapport devra, à la fin de ses travaux, exposer le résultat de son examen à la Commission en séance plénière et la discussion du rapport de ce comité sera alors mise à l'ordre du jour.

9.—Le nombre et la constitution des Comités seront décidés en tout cas par la Commission en séance plénière, mais chaque Comité sera autorisé à compléter sa propre organisation.

10.—Les Comités seront formés de la façon suivante :

Chaque délégation remettra le nom d'un de ses membres au Président qui, parmi ces noms, choisira le nombre nécessaire pour former chacun des Comités.

11.—Toute proposition soumise à la Commission devra être remise par écrit au Président de la Commission (ou du Comité) et la copie en sera fournie sur demande à chaque Délégation.

12.—Le public ne sera pas admis aux séances de la Commission, mais les communications regardant la marche générale des travaux qu'il paraîtra utile ou expédient de rendre publiques seront faites à la Presse par un Comité de trois membres élu à cet effet.

13.—Les procès-verbaux des séances plénières de la Commission donneront un résumé succinct des délibérations; une épreuve en sera distribuée en temps opportun aux membres de la Commission; les procès-verbaux ne seront pas lus au commencement des séances, à moins qu'il n'en soit fait expressément la demande. Chaque délégué aura cependant le droit de demander l'insertion en entier de ses déclarations spéciales conformément au texte qu'il en délivrera au Secrétaire, et de faire des observations au sujet des procès-verbaux.

14.—La langue anglaise sera reconnue comme la langue officielle de la Commission. Le secrétaire, avec le consentement de l'orateur, veillera à ce que tout discours prononcé dans une autre langue soit résumé oralement en anglais.

15.—Chaque Délégation aura le droit de se faire assister pendant les séances de la Commission par un "secrétaire de délégation" pourvu que ce secrétaire exerce des fonctions réelles au service de son gouvernement. Exception pourra être faite à cette règle pour les Délégations des pays n'ayant pas en Chine de représentants Diplomatiques ou Consulaires; mais en aucun cas il ne sera admis de secrétaire qui ne soit bonâ fide. Les noms des secrétaires de délégations devront être notifiés au Bureau.

16.—Sauf décision contraire de la Commission les séances auront lieu de 10h. 30 à midi 30 et de deux heures à cinq heures de l'après midi, tous les jours excepté les samedis et dimanches.

M. Laidlaw (Président du Comité) en présentant ce nouveau texte, propose que, jusqu'à ce que ces règles aient été acceptées ou votées chaque délégué conserve son droit de vote individuel.

Comme amendement à cette proposition le Dr. Hamilton Wright propose que "les règles soient prises en considération et votées dans l'ordre du rapport présenté par le Comité, et que chaque règle entre en application aussitôt adoptée." Après une longue discussion la proposition de M. Laidlaw est adoptée.

Les règles 1 et 2 ayant déjà été acceptées à la séance précédente, la règle 3 vient en discussion. M. Ratard propose d'ajouter les mots "en matière de procédure et de discipline" et la règle, ainsi amendée, est adoptée.

Les règles suivantes sont adoptées sans discussion: nos. 3, 4, 11, 12, 13, et 15.

La règle 5 est acceptée avec l'addition suivante proposée par Sir C. Clementi Smith: "Le Président pourra, pour des motifs reconnus valables autoriser un délai dans la remise desdits rapports."

Sir C. Clementi Smith propose que la règle 6 soit altérée et lue comme suit: "Un exemplaire de chaque rapport sera fourni à chaque membre de la Commission et un temps suffisant sera donné aux membres de la Commission en général pour l'examen de ce rapport; par la suite le Président invitera la Commission à discuter tout rapport qui se trouvera prêt pour l'enquête" (adopté sans discussion).

M. Roessler propose comme amendement à la règle 7 que les mots "bien que la Commission doive en général siéger in pleno" soient supprimés et que le mot "experts" soit remplacé par "délégués." Après avoir repoussé un nouvel amendement proposé par M. de Jongh la Commission adopte la règle, amendée selon la proposition de M. Roessler.

Sir C. Clementi Smith propose l'addition suivante à la règle 10: "tout délégué qui n'est pas membre lui-même d'un Comité pourra assister aux séances de ce Comité sans prendre part à ses délibérations." La règle est adoptée avec cette addition.

Sur la proposition de M. Ratard la règle 14 est altérée et doit se lire ainsi d'après le texte adopté: "L'anglais et le français seront reconnus en principe comme langues de la Commission et les mesures seront prises pour que les délibérations soient traduites, si nécessaire, et que les procès-verbaux soient rédigés dans les deux langues."

En ce qui concerne la règle 16 le Dr. Tenney propose que la Commission siége les samedis matin, mais la proposition, mise aux voix, est repoussée.

La Commission s'ajourne alors à deux heures de l'après-midi.

L'ensemble des Règles adoptées après cette discussion forme le texte suivant :

- 1.—Le président sera désigné par les termes : M. le Président.
- 2.—Aucun délégué ne pourra prendre la parole sans l'autorisation du président.
- 3.—En cas de vote, chaque délégation n'aura qu'une voix. Pour les questions de procédure et de discipline, en cas de partage égal des voix, le Président aura une voix décisive.
- 4.—Immédiatement après l'adoption des présentes règles, le Président invitera les Délégations prenant part à la Commission internationale de l'opium, à présenter leurs rapports concernant les divers aspects de la question de l'opium dans les territoires et dépendances de leurs pays respectifs.
- 5.—Chaque Délégation par ordre alphabétique déposera alors devant la Commission sans discussion ni débat un rapport contenant ses données sur la question de l'opium. Le Président pourra, pour motifs reconnus valables, autoriser un délai dans la remise desdits rapports.
- 6.—Un exemplaire de chaque rapport sera fourni à chaque membre de la Commission et un temps suffisant sera accordé aux membres de la Commission en général, pour l'examen de ce rapport : par la suite, le Président invitera la Commission à discuter tout rapport qui se trouvera prêt pour l'enquête.
- 7.—Un ou plusieurs Comités pourront être nommés en vue d'étudier les rapports dont il est question aux articles 4, 5 et 6, ou toute partie spécifié de ceux-ci, lorsqu'il apparaîtra qu'une étude préliminaire par un nombre limité de délégués est nécessaire pour arriver à une conclusion au sujet d'un problème posé.
- 8.—Tout comité ainsi nommé pour l'étude détaillée d'un rapport ou d'une partie de rapport devra, à la fin de ses travaux, exposer le résultat de son examen à la Commission en séance plénière et la discussion du rapport de ce comité sera alors mise à l'ordre du jour.
- 9.—Le nombre et la constitution des Comités seront décidés en tout cas par la Commission en séance plénière, mais chaque Comité sera autorisé à compléter sa propre organisation.
- 10.—Les Comités seront formés de la façon suivante :—Chaque Délégation remettra le nom d'un de ses membres au Président qui, parmi ces noms, choisira le nombre nécessaire pour former chacun des Comités ; tout délégué qui n'est pas membre lui-même d'un Comité pourra assister aux séances de ce Comité sans prendre part à ses délibérations.
- 11.—Toute proposition soumise à la Commission devra être remise par écrit au Président de la Commission (ou du Comité) et la copie en sera fournie sur demande à chaque Délégation.
- 12.—Le public ne sera pas admis aux séances de la Commission, mais les communications regardant la marche générale des travaux qu'il paraîtra utile ou expédient de rendre publiques seront faites à la Presse par un Comité de trois membres élu à cet effet.
- 13.—Les procès-verbaux des séances plénières de la Commission donneront un résumé succinct des délibérations ; une épreuve en sera distribuée en temps opportun aux membres de la Commission ; les procès-verbaux ne seront pas lus au commencement des séances, à moins qu'il n'en soit fait expressément la demande. Chaque délégué aura cependant le droit de demander l'insertion en entier de ses déclarations spéciales conformément au texte qu'il en délivrera au Secrétaire, et de faire des observations au sujet des procès-verbaux.
- 14.—L'anglais et le français seront reconnus en principe comme langues de la Commission, et les mesures seront prises pour que les délibérations soient traduites, si nécessaire, et que les procès-verbaux soient rédigés dans les deux langues.
- 15.—Chaque Délégation aura le droit de se faire assister pendant les séances de la Commission par un "secrétaire de délégation" pourvu que ce secrétaire exerce des fonctions réelles au service de son Gouvernement. Exception pourra être faite à cette règle pour les Délégations des pays n'ayant pas en Chine de représentants Diplomatiques ou Consulaires ; mais en aucun cas il ne sera admis de secrétaire qui ne soit "bonâ fide." Les noms des secrétaires de délégations devront être notifiés au Bureau.
- 16.—Sauf décision contraire de la Commission les séances auront lieu de 10h. 30 à midi 30 et de deux heures à cinq heures de l'après midi, tous les jours excepté les samedis et dimanches.

A la reprise les délégués suivants sont désignés par le Président pour faire partie du Comité de Presse : Sir A. Hosie, Dr. Takaki, et M. Brenier.

La délégation des Etats-Unis présente alors son rapport en conformité des règles 4 et 5 ; le Président cède temporairement son fauteuil à Sir C. Clementi Smith. Le Dr. H. Wright lit un sommaire du rapport pour les Etats-Unis et le district de Columbia. Le T. R. Evêque Brent lit ensuite son rapport sur la question de l'opium aux Philippines.

Sir C. Clementi Smith donne lecture des rapports pour la Grande Bretagne, l'Australie, Hong-kong, Ceylon, les Etablissements du Détroit et Wei-Hai-Wei.

M. Tsunejiro Miyaoka présente les rapports pour le Japon et Formose. Il est décidé que les questions de fait relatives à ces rapports seront posées seulement après que ceux-ci auront pu être étudiés suffisamment, et la séance est levée à 4h. 30. de l'après-midi.

QUATRIÈME SÉANCE,

8 FÉVRIER 1909.

Le Président monte à son fauteuil à 10 h 30 du matin. M. Miyaoka appelle l'attention sur une ambiguïté dans le rapport sur le Japon, à la page 27, à l'article achats et ventes. Les quantités sont, dit-il, données en kilogrammes avec trois chiffres décimaux.

Le Dr. Tenney demande si la Délégation japonaise a l'intention de présenter un rapport sur la question de l'opium en Corée. M. Miyaoka répond que la Corée a été omise du rapport par mégarde mais qu'une enquête se poursuit actuellement et que les renseignements nécessaires seront donnés ultérieurement. (V. rapport japonais, in Fine.)

Le Président fait remarquer que les questions du genre de celle que vient de poser le Dr. Tenney doivent être remises par écrit au Président.

M. Tang-kouo-an présente un rapport sur l'opium en Chine et dans un discours durant près d'une heure et demie traite verbalement des sujets compris sous différentes rubriques : culture de l'opium ; production ; consommation ; morphine ; remèdes contre l'opium ; mesures contre l'opium. Il explique les contradictions qui apparaissent entre les estimations de Morse, de Leech, des douanes. En ce qui concerne les chiffres donnés par le bureau des Finances il déclare qu'environ 25% de l'opium produit en Chine échappe à l'impôt et qu'un tiers seulement des taxes perçues revient au Trésor Impérial, les deux autres tiers étant retenus par les différentes Provinces pour des besoins d'administration locale. Au sujet des chiffres donnés pour la consommation, il reconnaît que l'estimation à 50 millions de la population adulte mâle peut être considérée comme inférieure à la réalité, mais le nombre exact importe peu : aucune interprétation des statistiques ne saurait changer le fait que plus de 600,000 piculs d'opium ont été consommés annuellement jusqu'en 1909.

M. Tang considère que, dans l'ensemble, la situation de la Chine au point de vue du fléau de l'opium est réellement encourageante, et il conclut en exprimant l'espoir que le mouvement dont les regrettés Souverains de la Chine ont pris l'initiative par le mémorable édit du 20 septembre 1906 se terminera par un plein succès.

Le Dr. Roessler présente ensuite le rapport pour l'Allemagne, y compris Kiao-tchéou, en notant que fort heureusement le problème de l'opium n'est grave ni en Allemagne ni à Kiao-tchéou.

Le Président annonce que l'Amérique, le Japon, la Perse, la France et la Chine ont notifié au Bureau les noms de leurs "Secrétaires de délégation" conformément à l'art. 15 du Règlement de Procédure.

M. de Jongh donne alors lecture d'un memorandum concernant le Monopole de l'opium aux Indes Néerlandaises.

La Commission s'ajourne à midi 30.

A la reprise de la séance à deux heures du soir M. Miyaoka propose la résolution suivante :

"Autant que possible avis préalable des rapports, questions ou propositions à soumettre et des discours ou remarques à faire sera donné au Président de façon à mettre celui-ci en mesure d'annoncer avant la fin de chaque séance quel ordre d'affaires la Commission aura à traiter dans sa prochaine séance."

Pendant la courte discussion qui suit Sir Cecil Clementi Smith suggère que les mots "discours et remarques" soient retranchés de cette résolution ; M. Ratard pense de même qu'il est impossible de savoir à l'avance la nature des discours que l'on peut-être amené à prononcer. Le Dr. Hamilton Wright parle en faveur de la résolution qui, mise aux voix, est repoussée.

A trois heures, après avoir écouté un rapport sur la question de l'opium au Siam, présenté par Phya Sakdisinie, la Commission se sépare en renvoyant la prochaine séance au mercredi 10 février.

CINQUIÈME SÉANCE,

10 FÉVRIER 1909.

A dix heures trente, le Président monte à son fauteuil et ouvre la séance.

M. J. B. Brunyate présente un rapport sur l'opium et la morphine aux Indes Anglaises et en Birmanie, en donnant verbalement ses commentaires sur les points les plus importants.

Parlant d'abord de la Morphine, M. Brunyate déclare que sa diffusion, toute récente aux Indes, et moins rapide que celle de la cocaïne, a été arrêtée, aussitôt que le Gouvernement en a eu connaissance, par des mesures réglementaires très sévères. Chaque individu ne peut posséder légalement que 10 grains de morphine aux Indes et 5 grains en Birmanie. Les médecins et les pharmaciens eux-mêmes ne peuvent posséder la drogue qu'en se soumettant à des règlements très stricts.

Passant ensuite à l'opium, M. Brunyate fait une distinction fondamentale entre celui qui est produit dans les territoires soumis au contrôle direct du Gouvernement et celui qui est produit dans ceux des Etats Indigènes qui ont conservé le droit de cultiver le pavot. Pour le premier, le Gouvernement peut prendre et a déjà pris des mesures restreignant la culture; pour le second, son action se borne à maintenir l'exportation dans les limites permises. La difficulté dans les Etats de Malwa est de trouver une culture rémunérative à substituer à l'opium, et cela dans un délai très rapproché, car les stocks accumulés suffisent à fournir les quantités nécessaires à l'exportation, sans production nouvelle, pendant la majeure partie de la période de 10 ans prévue par l'arrangement conclu avec la Chine.

De plus, l'opium du Bengale (Patna et Bénarès) est acheté aux cultivateurs pourvus de licences par le Gouvernement qui se charge aussi de la préparation de la drogue; il n'y a donc pas d'intérêts commerciaux privés jusqu'au moment de la vente à Calcutta pour l'exportation ou pour la consommation dans les Indes. En ce qui concerne l'opium de Malwa, au contraire, de grands intérêts commerciaux sont en jeu depuis le moment où la drogue sort des mains du cultivateur jusqu'à celui où il est concentré entre les mains de quelques grandes maisons de Bombay qui en font ensuite la distribution dans tout l'Extrême-Orient.

M. Brunyate fait remarquer ensuite que les chiffres donnés pour l'exportation ne doivent pas faire préjuger de l'avenir puisque l'Arrangement du 1er janvier 1908 avec la Chine prévoit, dans l'exportation vers cette contrée une diminution de 5.100 caisses par an pendant trois ans et même pendant 10 ans si le Gouvernement chinois arrive lui-même à diminuer dans la même proportion la production locale et l'importation de l'opium turc et persan. A la fin de ces 10 années l'exportation de l'opium indien vers d'autres pays que la Chine resterait limitée à 16.000 caisses par an. Cet Arrangement a été accepté avec reconnaissance par le Gouvernement chinois qui, après une année d'expérience, vient d'en exprimer toute sa satisfaction au Ministre de Grande-Bretagne à Pékin.

M. Brunyate donne ensuite le sommaire des mesures prises pour contrôler et réglementer la possession et la consommation individuelle de l'opium depuis et y compris l'Opium act de 1878. L'opium est généralement avalé à l'état cru plutôt que fumé aux Indes; il est aussi employé dans certaines cérémonies comme un accessoire indispensable.

Après avoir analysé les statistiques de la consommation et montré les raisons de l'augmentation apparente des deux ou trois dernières années (contrebande à destination de la Birmanie où une politique prohibitive avait été inaugurée en ce qui concerne les Birmans) M. Brunyate décrit les étapes de la politique prohibitive adoptée par le Gouvernement de Birmanie et les résultats obtenus. Rapide diminution, puis augmentation plus rapide encore de la consommation jusqu'à ces dernières années où la tendance est décidément à la diminution grâce aux mesures prises pour déterminer la consommation réelle de chaque consommateur et pour limiter à leurs besoins personnels les quantités qui peuvent leur être délivrées. Les statistiques des prisons indiquent d'une façon approximative la proportion des Birmans qui ont conservé, malgré la prohibition, l'habitude de l'opium: cette proportion décroît surtout depuis 1902, époque à laquelle ont été prises les mesures ci-dessus indiquées.

M. Brunyate indique ensuite l'importance des revenus tirés de l'opium, pour certains Etats Indigènes d'abord et pour le Gouvernement de l'Inde lui-même. Ce dernier tire de l'opium environ £1.000.000 pour la consommation intérieure et £3.750.000 pour l'exportation; de ce chiffre un peu moins de £3.000.000 sont dues à l'exportation vers la Chine.

En terminant, M. Brunyate cite les paroles prononcées par S.E. le Comte de Minto, Vice-Roi des Indes, au cours de la discussion du budget des Indes, au sujet de l'Arrangement, alors en projet, avec la Chine:

“ . . . Nous ne saurions, sous prétexte de perte de recettes, refuser d'aider la Chine. J'admets que la Chine s'est attelée à une tâche qui risque d'être au-dessus de ses forces, et que, en acceptant la réduction des importations provenant des Indes, nous avons parfaitement le droit de demander une preuve satisfaisante que la Chine a, de son côté, réduit sa production intérieure d'opium. Mais, malgré la perspective d'une grande perte de recettes, j'espère que nous pouvons accepter cette vue que, pourvu que la période de transition s'étende sur un nombre suffisant d'années, nous n'avons pas à appréhender un désastre financier.”

La séance est levée à midi 45 et reprise à 2h 15 de l'après-midi.

M. Ratard donne lecture en français d'un rapport sur l'importation de l'opium et de ses dérivés en France. M. Brenier donne la traduction anglaise de ce document; il en résulte que les statistiques officielles démontrent le peu d'importance du problème de l'opium en ce qui concerne la France proprement dite.

M. Ratard fait ensuite quelques remarques sur les mesures restrictives adoptées par le Conseil d'Administration Municipale de la Concession française pour supprimer l'opiomanie à la suite de la promulgation des Edits contre l'opium. Il fut considéré comme peu pratique de fermer les fumeries, toutes enregistrées officiellement, aussi longtemps que la vente de la drogue ne serait pas interdite, car,

entre autres considérations, les dangers d'incendie augmenteraient en proportion du nombre des fumeurs faisant usage de lampes dans leurs propres maisons. En conséquence le plan adopté fut d'augmenter annuellement les taxes payables par les fumeries enregistrées (d'après le nombre de lits) de façon à amener la fermeture automatique de ces établissements en diminuant leurs bénéfices. La taxe a déjà été doublée deux fois en deux années, le résultat étant une diminution de 5% dans le nombre des établissements et de 25% dans le nombre des lits utilisés.

M. Brenier dépose ensuite un rapport sur la question de l'opium en Indochine française et donne un court résumé des points qui y sont traités. Il mentionne que l'importation de la manufacture et la vente de l'opium sont l'objet d'un monopole d'Etat. Il n'y a pratiquement pas de culture de pavot en Indochine excepté dans les districts de la frontière chinoise dont la production est même insignifiante. En général le sol et les conditions locales du Tonkin sont peu favorables à cette culture. La consommation est presque exclusivement bornée aux riches classes annamites ou chinoise. Le revenu tiré de l'opium constitue $\frac{1}{6}$ du budget de la Colonie.

Un rapport sur la question de l'opium à Macao est présenté ensuite par M. G. O. Potier qui promet de fournir en outre, aussitôt qu'il les aura reçues, les informations concernant le Portugal lui-même et ses autres Colonies.

M. Jongh propose la résolution suivante; que "Dans l'article 16 du Règlement de procédure les "mots 2h 30 à 5 heures soient substitués aux mots 2h à 5 heures."

La proposition soutenue par M. Ratard est adoptée à l'unanimité des Délégations moins une.

A 3h 30 Sir C. Clementi Smith propose un ajournement jusqu'au vendredi 12 février afin de permettre aux délégations d'étudier les rapports qu'elles ont reçus.

La Commission ayant approuvé cette suggestion, M. Laidlaw pose aux Délégations japonaise, chinoise et néerlandaise plusieurs questions auxquelles il sera répondu ultérieurement et la séance est levée.

N.B.—Les questions posées au cours de séances et les réponses qui leur ont été données sont reproduites à la suite de chacun des Rapports qu'elles concernent dans le Vol. II.

SIXIÈME SÉANCE,

12 FÉVRIER 1909.

Le Président ouvre la séance à 10h. 30 du matin.

M. Bernauer, Délégué de l'Autriche-Hongrie, donne lecture d'un rapport concernant la question de l'opium et de la morphine dans cette contrée, où le problème ne s'est jamais posé avec beaucoup d'acuité.

M. Rizaëff présente ensuite un rapport sur l'opium en Perse. La culture, la production et l'exportation ont une certaine importance dans ce pays, mais les fumeurs, peu nombreux, sont recrutés presque exclusivement dans les basses classes de la population, et ne jouissent que d'une médiocre considération. Il ne paraît pas que l'on doive redouter une grande extension de l'opiomanie en Perse.

M. Faraone propose alors en son nom et au nom de la Délégation russe d'amender l'article 5 du règlement de procédure en ajoutant in fine les mots "En attendant le dépôt de ceux-ci la Commission pourra alors passer outre et continuer ses travaux."

Cette proposition est adoptée.

L'ordre du jour appelle la discussion du rapport de la Délégation chinoise.

Sir Alexander Hosie, dans un discours dont le texte est publié in extenso dans le corps des minutes anglaises (V. la première partie de ce volume), présente ses observations sur ce rapport.

Il se déclare tout d'abord en parfaite sympathie avec le gouvernement chinois dans ses efforts pour supprimer la culture du pavot et la consommation de l'opium dans son Empire, et exprime l'espoir que les critiques faites par lui ne seront pas attribuées à un esprit de dénigrement mais bien à son désir d'assister la Chine dans sa tâche en aidant, dans la mesure de ses forces, à faire la lumière sur certains points restés obscurs.

M. T'ang a, dit-il, désarmé les critiques en avouant qu'il n'a pas été possible de se procurer des statistiques sérieuses et complètes de l'étendue des surfaces cultivées en pavot ou du nombre des fumeurs, malgré les ordres contenus à ce sujet dans le décret Impérial du 26 juin 1907 et dans le règlement du 23 mai 1908. Il aurait pu avec tout autant de raison faire une déclaration semblable en ce qui concerne la production d'opium; là, cependant, une tentative a été faite pour fournir des chiffres comparatifs entre 1906 et 1908; mais l'estimation donnée perd beaucoup de sa valeur si l'on admet, avec le Rapport lui-même, que pour les provinces de l'intérieur, celles qui produisent le plus d'opium, elle n'est qu'un travail

morcelé. Les efforts pour donner le nombre des fumeurs et sa proportion avec la population d'adultes mâles, basés sur des chiffres absolument incertains, ne peuvent donner également qu'un résultat sans valeur.

Avant de passer à la production et à la consommation, l'orateur critique les tableaux donnés aux pages 5 et 6 du Memorandum chinois, d'où résulterait que les seules provinces où la consommation de l'opium étranger aurait augmenté en 1908 seraient le Kiangsi et le Nganhouei ; une fois entré en Chine l'opium peut fort bien avoir passé d'une province à l'autre sans que ces mouvements aient pu être contrôlés par les Douanes Maritimes Impériales.

Les chiffres très bas donnés à la page 10 du memorandum comme représentant le revenu tiré de l'opium chinois pourraient conduire à de graves erreurs d'interprétation car ils n'indiquent que la taxation sur cette drogue effectuée par les soins des Douanes Maritimes Impériales, et nous savons que rien qu'à Ichang il est perçu sur l'opium descendant de la Haute Vallée du Yangtsé un total de 5.960.105 kouping taëls, soit plus que les recettes totales sur l'opium importé de l'étranger pendant la même année. La Délégation Chinoise peut-elle fournir à la Commission le chiffre total de la taxation sur l'opium indigène pendant une des dernières années ?

En ce qui concerne la production, les estimations données comme rapportées par les Douanes en 1906 et 1908 paraissent bien avoir été compilées à une seule et même époque, à la fin de 1908 ; et l'on ne saurait attacher grande valeur au raisonnement par lequel on nous affirme qu'il y a eu une réduction, dans une proportion déterminée, des surfaces cultivées, alors que l'étendue de ces surfaces reste inconnue. C'est par de pareils raisonnements que l'on arrive à déclarer que la production de l'opium chinois a été diminuée de 37% entre 1906 et 1908. Sir A. Hosie doute que ces conclusions paraissent satisfaisantes à aucune Société de Statistiques occidentale.

Dans les extraits de Télégrammes annexés au Rapport, il est dit que la culture de l'opium a été entièrement supprimée dans le Fengtien. Or le pavot, en Mandchourie, se cultive l'été ; il sera donc temps, après l'époque des semailles, de dire si la culture est supprimée pour l'année 1909. Pour le Shantung le chiffre de la production donné par le Gouverneur est de 1.482 piculs et celui que donne la Douane est de 12.000 ; on peut croire que les mesures nécessaires pour abolir la production seraient différentes dans l'un ou l'autre cas. Les chiffres donnés tant sur la production que sur la réduction de celle-ci dans le Rapport chinois ne sauraient donc être pris comme une base sérieuse.

Sir A. Hosie critique enfin les estimations données par le même Rapport au sujet du nombre des fumeurs et de leur proportion en regard de la population mâle adulte et démontre l'impossibilité de se fier aux chiffres donnés. Quoi qu'il en soit, dit-il, le fait reste établi et ne doit pas être perdu de vue que l'opium est un fléau pour la Chine et que le seul moyen d'en guérir est de supprimer la tentation.

Terminant son discours, il répète que ses observations ne procèdent nullement d'un esprit de dénigrement, et reconnaît qu'un certain progrès a déjà été atteint dans plusieurs provinces. Beaucoup reste à faire mais le Gouvernement Chinois, dont la sincérité ne fait pas question, peut être assuré qu'il a toute la sympathie de la Délégation Britannique et de la Commission dans ses efforts pour supprimer le fléau de l'opium.

Sir A. Hosie, pose des questions écrites précises, au sujet de la surface actuellement cultivée en pavot, du nombre des fumeurs dans les différentes provinces, etc. (Cf. Vol. II, à la suite du Rapport Chinois).

M. Laidlaw retire alors les questions déjà posées par lui à la Délégation Chinoise, et qui se confondent avec les nouvelles questions plus nettes de Sir A. Hosie.

Sir C. Clementi Smith s'élève contre l'exagération de certaines estimations concernant la contrebande d'opium entre Hongkong et la Chine maintenant ou avant la création des nouveaux postes des Douanes Impériales.

M. Ratard et M. Brenier posent deux questions relatives aux taxes de likin sur l'opium, et au nom des districts du Szechouen où la culture de l'opium aurait cessé.

Un des Délégués Chinois n'ayant pu assister à la séance à cause d'une indisposition les réponses aux questions et remarques ci-dessus est remise à plus tard.

M. Miyaoka et de Jongh, et Sir C. Clementi Smith déclarent qu'ils ont demandé télégraphiquement les informations nécessaires en vue de répondre aux questions qui leur ont été posées.

M. Miyaoka propose que "désormais les questions relatives aux rapports soient posées par écrit et que copie en soit fournie aux Délégations par les secrétaires." M. Ratard demande que les "réponses" soient faites et communiquées de la même manière. Ces propositions sont adoptées, étant bien entendu, sur l'observation faite par Sir C. Clementi Smith, que le Président aura le pouvoir de ne faire appliquer cette règle que dans la mesure où elle ne sera pas de nature à retarder d'une façon exagérée les travaux de la Commission, et lorsqu'il lui paraîtra que le compte rendu sténographique serait insuffisant.

Il est décidé que la discussion du rapport de la Délégation néerlandaise sera mise à l'ordre du jour de la prochaine séance.

Le Dr. H. Wright exprime le désir que la Délégation Britannique fournisse des informations au sujet de l'opium et de la réglementation relative à sa consommation en Nouvelle-Zélande et dans l'Afrique du Sud.

M. Bernauer demande que des rapports soient fournis au sujet des Concessions et settlements étrangers en Chine. Il est entendu que le Président écrira au Doyen du Corps Consulaire de Shanghai en vue d'obtenir des informations sur la question de l'opium dans le Settlement International; pour les autres Concessions en Chine, après une discussion animée la proposition est retirée provisoirement.

Sur la proposition du Dr. Hamilton Wright il est décidé de nommer :

1/ Un Comité de trois membres chargé de coordonner les statistiques du commerce de l'opium contenues dans les différents rapports soumis à la Commission et d'établir un rapport international sur ce sujet.

2/ Un Comité de trois membres chargé de coordonner les renseignements relatifs à la culture du pavot et à la production de l'opium cru contenus dans les différents rapports soumis à la Commission et d'établir un rapport international à ce sujet.

3/ Un Comité de trois membres chargé de coordonner les statistiques des revenus tirés de l'opium contenues dans les différents rapports soumis à la Commission et d'établir un rapport international à ce sujet.

La formation, également proposée par le Dr. H. Wright, de Comités chargés d'étudier les questions de l'opium au point de vue médical et des remèdes contre l'opiomanie, est repoussée après discussion, la Commission estimant qu'elle ne comprend pas un nombre suffisant d'experts en ces matières.

La séance est levée à midi 30 et renvoyée au lundi 15 février.

SEPTIÈME SÉANCE,

15 FÉVRIER 1909

La séance est ouverte à 10h 30 du matin.

Le Président donne lecture des désignations faites pour les Comités dont la formation a été décidée à la séance précédente. (Cf. liste des Comités au début de ce volume).

Sir Cecil Clementi Smith répond à une question posée verbalement à la Délégation Britannique, au cours de la séance précédente, par le Dr. Hamilton Wright au sujet de l'importation et de l'exportation de la morphine dans le Royaume-Uni. Le Dr. H. Wright dit que sa question n'a pas été comprise exactement. Ce qu'il désire savoir, c'est la destination finale de l'importation nette de morphine dans le Royaume-Uni; il remettra la question par écrit.

Un rapport sur la production et l'usage de l'opium en Italie est lu ensuite par M. Faraone. Il déclare qu'il n'y a pas de loi spéciale sur l'opium dans ce pays mais qu'une réglementation très stricte est en vigueur pour le commerce des "remèdes contenant des poisons," toute infraction étant sévèrement punie; l'opium est compris sous cette rubrique générale.

Le Président déclare ouverte la discussion du rapport néerlandais.

Le texte de diverses questions est soumis à la Délégation Néerlandaise par MM. Roessler, Laidlaw, et le Dr. Tenney. M. de Jongh fournit aussitôt les réponses à ces questions (V. à la suite du rapport néerlandais, au Vol. II.)

M. Miyaoka ayant lu les réponses aux questions qui lui avaient été posées par la Délégation Britannique à la séance précédente, M. Laidlaw demande si les chiffres donnés sous la rubrique "dépenses de l'usine d'opium" comprennent les paiements faits pour le compte des services destinés à combattre la contrebande. M. Miyaoka répond que ces dépenses sont comprises au budget général de la Police et des Douanes.

M. T'ang-kouo-an lit les réponses aux questions posées par la Délégation Britannique aux Commissaires chinois. (V. Vol. II, à la suite du rapport chinois).

Se référant au discours de Sir A. Hosie (voir 6^e séance) il dit que ses collègues et lui apprécient hautement les sentiments exprimés par la Délégation Britannique à l'égard des efforts accomplis contre l'opium par le Gouvernement Impérial. Basée comme elle l'est sur son expérience de la vie, sur ses voyages répétés dans les provinces occidentales de la Chine, et sur ses observations personnelles, l'opinion de Sir A. Hosie, admettant franchement les malheurs résultant de l'opiomanie, aura certainement le plus grand poids auprès de la Commission. Il est convaincu que les critiques faites sur le memorandum chinois par Sir A. Hosie ne procèdent pas d'un esprit de chicane. La Chine a besoin de beaucoup de sympathies comme celles qu'a exprimées Sir A. Hosie. Il espère que les travaux de la Commission aboutiront à des résolutions condamnant l'usage de l'opium et de ses dérivés sauf pour un usage strictement médical.

L'expression de cette opinion agira, il en a l'assurance, comme un nouvel éperon pour encourager ses concitoyens dans l'oeuvre de la suppression de l'opiomanie dont l'invasion menace le bonheur de 400 millions d'hommes et l'existence même de la Chine en tant que nation.

M. T'ang fait aussi la déclaration suivante en réponse aux observations faites à la dernière séance par Sir C. Clementi Smith au sujet de l'exactitude des indications données dans le rapport chinois sur la contrebande entre Hongkong et la Chine :

A la page 4 de notre memorandum il est dit qu' "avant 1887, la quantité d'opium introduite en Chine chaque année en dehors des voies légales s'élevait à 20.000 piculs." Sir C. Clementi Smith pense que cette estimation est exagérée. Les chiffres donnés sont ceux de Morse dans son livre "Trade and administration of the Chinese Empire" page 342. M. Morse était un observateur consciencieux et son livre est considéré comme une histoire impartiale des questions chinoises qui y sont traitées. De plus son estimation est, en grande partie, justifiée par la comparaison entre les quantités d'opium entrées dans le Kouang-toung par les ports de Soua-tao, Canton et Pakhoi pendant les six années avant 1887 et les quantités entrées dans la même province par les mêmes ports, en y ajoutant Kowloon et Lappa, pendant les six années suivant 1887.

L'importation annuelle dans le Kouang-toung pendant les années 1881-1886 a été de 6,114 piculs et pendant les années 1888-1893 de 23,246 piculs, soit 17,132 piculs de différence. Ces chiffres représentent la quantité d'opium qui a payé les droits d'entrée et de Likin aux bureaux des douanes indiqués, sans faire entrer en ligne de compte tout ce qui a pu éviter les Douanes. Dans les "rapports des Douanes sur les amendes et confiscations" publiés pour les mêmes années le nombre de saisies effectuées montre la fréquence des tentatives de contrebande. On doit aussi se rappeler que la contrebande de l'opium n'était pas limitée au Kouang-toung, mais s'étendait plus ou moins, d'après les mêmes rapports des douanes, à presque tous les "ports ouverts" de Chine. Les chiffres donnés par le memorandum ne s'appliquent pas seulement à Hongkong, car on sait que la contrebande d'opium se faisait aussi de Singapour, par jonques, et par les équipages des vapeurs touchant à Singapour, à Penang et aux ports de l'Inde.

En conséquence les Délégués chinois ne croient pas exagérer en estimant la contrebande de l'opium à 20,000 piculs avant 1887 et à 5,000 piculs depuis cette année.

Les questions posées par la Délégation Française avaient échappé aux yeux de la Délégation Chinoise.

H. T'ang exprime ses regrets à ce sujet et dit que les renseignements demandés seront fournis le plus tôt possible.

Le premier délégué Néerlandais fait ensuite la déclaration suivante :

"Maintenant que les Délégués à la Commission Internationale de l'Opium ont pris connaissance de notre rapport, et de notre memorandum sur le système de la Régie adopté aux Indes Néerlandaises ; après les questions posées par eux et les réponses données par nous ; nous pensons qu'ils sont convaincus que l'objet poursuivi par notre système, le but que nous nous efforçons d'atteindre, est d'arrêter la consommation de l'opium, graduellement mais continuellement, et par tous les moyens en notre pouvoir.

"En conformité de cette politique les délégués des Pays-Bas sont autorisés à déclarer que :

"1/ Leur Gouvernement, convaincu qu'il est désirable de supprimer l'usage de l'opium, ne se laissera jamais arrêter par des considérations financières lorsqu'il y aura lieu de prendre telles mesures qui, dans son opinion, seraient de nature à amener une diminution graduelle de cet usage ;

"2/ Leur Gouvernement n'aurait pas d'objections à apporter au système de la Régie tels changements qu'il considérerait être de nature à combattre l'usage de l'opium et à étendre les moyens d'empêcher la contrebande par terre ou par mer ;

"3/ Dans les provinces où existe encore le système d'affermage, la substitution de la Régie à ce système est d'ores et déjà à l'étude."

Lo Dr. Roessler appelle l'attention sur une faute d'impression dans le rapport sur Kiaochéou. A la dernière page, chapitre 3, les mots "Average smokers use at least 2 liang" doivent se lire "average smokers . . . at least 0.2 liang." Le Dr. Hamilton Wright remet par écrit deux questions posées par lui à la Délégation Britannique au sujet de l'importation de l'opium cru en Grande-Bretagne, et de l'usage de l'opium dans l'Afrique du Sud. (V. à la suite du rapport britannique, V. II.) M. T'ang, se référant aux déclarations antérieures sur le pourcentage des fumeurs d'opium en Chine, rapporte des informations qu'il a obtenues sur le pourcentage des fumeurs parmi la population chinoise des Philippines. Il dit que 23% des résidents Chinois de cet archipel sont fumeurs enregistrés ; en plus un certain nombre ont pu, pour une raison ou pour une autre, échapper à l'enregistrement ; on peut donc estimer que 25% des Chinois résidents aux Philippines sont fumeurs. Ceci à l'appui des estimations données par sa Délégation sur l'étendue de l'opiomanie en Chine, les pourcentages cités étant beaucoup plus élevés que ceux qu'on admet habituellement pour la Chine.

Le T. R. Evêque Brent, quittant la Présidence (assumée pendant quelques minutes par M. Potier) fait une déclaration personnelle et explicative en réponse à l'observation ci-dessus de M. T'ang. Pour prévenir toute erreur d'appréciation, dit-il, il croit nécessaire de remarquer que tous les fumeurs enregistrés aux Philippines sont Chinois, les indigènes n'étant pas autorisés à prendre des licences. La majorité des Chinois viennent d'Amoy, où, croit-il, l'habitude de fumer l'opium est très répandue.

Enfin presque toute la population Chinoise est composée d'adultes mâles, et le fait qu'il y a très peu de femmes ou d'enfants explique le haut pourcentage de fumeurs.

Ces remarques sont complétées par le Dr. H. Wright qui dit que le résultat de ses recherches parmi la population Chinoise aux Etats-Unis est que 20% des adultes mâles sont grands fumeurs et 20% petits fumeurs, soit au total 40% usant en moyenne 1½ mace d'opium préparé par jour. Cette estimation est peut-être un peu élevée mais il peut déclarer avec une certitude presque absolue que 30% des Chinois adultes mâles sont adonnés à l'opium aux Etats-Unis.

A midi 15 la séance est levée.

A la reprise, à 2h. 30 le rapport austro-hongrois est mis en discussion. Aucune question n'est posée mais le Dr. Roessler demande seulement au Délégué Austro-Hongrois de fournir quelques renseignements sur l'usage et la vente de l'opium dans la concession autrichienne de Tientsin.

Le T. R. Evêque Brent déclare que la Délégation Française a attiré son attention sur quelques erreurs, dans le rapport publié par la "Commission Américaine de l'opium aux Philippines," dont il était membre, au sujet des recettes tirées de l'opium par Indo-Chine. Les mesures seront prises, dit-il, pour corriger ces fautes.

L'ordre du jour appelle ensuite la discussion des rapports allemand et persan. Le Dr. H. Wright aura certaines questions à poser sur ces rapports à la prochaine séance.

A la suite d'une remarque faite par Sir C. Clementi Smith, le Président admet que les Comités nommés pour étudier des parties spéciales des rapports pourront rouvrir la discussion à propos des sujets qui leur sont soumis si de nouveaux renseignements leur paraissent utiles.

La Commission accepte une suggestion du Dr. Roessler tendant à ce que le Comité désigné pour faire un rapport sur les questions de Revenus de l'opium étende ses recherches aux tarifs de douane et autres impôts frappant l'opium.

Une discussion s'élève ensuite au sujet des stipulations relatives à l'opium contenues dans les Traités signés entre les divers pays représentés; le Président indique que chaque Délégation pourrait, si cela paraît utile, obtenir les renseignements nécessaires sur ces stipulations, ou qu'un Comité pourrait être nommé pour étudier la question.

Le Dr. Roessler propose alors la résolution suivante :
"Qu'un Comité soit nommé pour réunir les accords internationaux existant au sujet de l'opium."

Après discussion cette proposition est adoptée.

Le Dr. Roessler demande aux Délégués Néerlandais s'ils déposeront un rapport sur l'opium aux Pays-Bas proprement dits. M. de Jongh répond par la négative, mais il n'existe, à sa connaissance aucune culture de pavot dans cette contrée. Cependant si on le désire, il s'efforcera d'obtenir des renseignements plus précis.

Une discussion s'élève alors sur le point de savoir si, originairement, l'enquête devait s'étendre à d'autres contrées que l'Extrême-Orient. Les premiers Délégués de France et de Portugal déclarent qu'ils ont compris que les recherches de la Commission se borneraient à l'Extrême-Orient. Le Dr. H. Wright déclare de son côté que le Gouvernement américain avait proposé l'étude de toutes les phases de la question de l'opium dans chacun des pays représentés et suggéré que les recherches soient faites avant la réunion de la Commission de façon à faciliter le travail de celle-ci.

Le Président met fin au débat en indiquant que chaque pays représenté pourra obtenir, sur l'opium dans la métropole, des renseignements suffisants pour éclairer la Commission et la mettre en mesure de mener ses travaux à bonne fin.

La Commission s'ajourne alors au jeudi 18 février; l'ordre du jour de cette séance sera :

- 1.—Présentation du rapport sur le Canada (s'il est prêt);
- 2.—Continuation de la discussion du rapport chinois;
- 3.—Discussion des rapports sur la Grande Bretagne et ses Possessions;

HUITIÈME SÉANCE,

18 FÉVRIER 1909.

EN ouvrant la séance à 10h. 30 du matin le Président proclame les noms des Délégués désignés pour faire partie du Comité sur les Traités et les Accords Internationaux existant au sujet du trafic de l'opium. (Cf. liste des Comités, au début de ce Volume.)

M. Brunyate annonce qu'il a demandé télégraphiquement au Gouvernement des Indes les derniers chiffres concernant la morphine, mais il ne croit pas que la réponse doive affecter beaucoup les statistiques données par lui dans son rapport.

M. Mackenzie King, à qui le Président souhaite d'abord la bienvenue, présente son rapport sur la question de l'opium au Canada en s'excusant de son arrivée tardive.

La discussion du rapport chinois est ensuite à l'ordre du jour mais aucune nouvelle question n'est posée.

M. Cornillon, au nom du Comité de statistique des Revenus indique qu'une étude préliminaire des Rapports a déjà fait paraître la nécessité que toutes les Délégations adoptent des unités communes de monnaies, de poids et de mesures afin de faciliter la réduction du rapport International, et il soumet les propositions suivantes:

1.—Que les superficies, quantités et poids soient exprimés d'après le système métrique en hectares et kilogrammes.

2.—Que toutes les monnaies soient réduites en monnaie anglaise au change de 25 francs la £.

3.—Que l'étude des statistiques soit bornée à cinq années, 1903 à 1907 inclus, ce qui sera suffisant pour qu'une opinion générale puisse se former.

Ces propositions rencontrent l'approbation générale de l'assemblée, mais les calculs qu'elles peuvent entraîner sont confiés aux soins du Comité. Après une remarque du Premier Délégué du Portugal sur le change à adopter, l'ordre du jour appelle la discussion du rapport sur la Grande-Bretagne et ses Possessions.

M. T'ang-kouo-an, le Dr. Tenney et M. H. Wright posent quelques questions relatives à la portée de l'accord Anglo-Chinois et à la culture, à l'exportation de l'opium dans les Etats Indigènes de l'Inde. M. Brunyate donne des réponses verbales provisoires en se réservant de les fournir par écrit à la prochaine séance. (Cf. Vol. II. à la suite du rapport sur l'Inde).

M. Miyaoka pose une question à la Délégation Persane au sujet de l'importation à Formose de l'opium de Perse. (Cf. Vol. II. à la suite du rapport sur la Perse).

M. T'ang-kouo-an propose la résolution suivante :

“Qu'un Comité de 5 membres soit nommé pour étudier les aspects médicaux de la question de l'opium y compris les meilleures méthodes de guérir l'opiomanie sans recourir à l'opium ou à aucun de ses dérivés.”

Une discussion s'élève sur la recevabilité de cette motion qui semble se présenter comme semblable à celle qui a déjà été proposée par le Dr. H. Wright à la sixième séance et repoussée.

Le Président dit qu'à son avis la présente proposition revêt une forme entièrement différente de la précédente; dans la résolution repoussée la portée de l'enquête était réduite à l'étude du sujet d'après les rapports déposés seulement, tandis que la résolution actuellement proposée est conçue sur un plan beaucoup plus large; c'est à l'assemblée de décider si elle entend ou non procéder à cette enquête plus étendue.

M. T'ang explique que, lorsque la proposition repoussée avait été proposée, le Premier Délégué Chinois et lui-même étaient absents, et, par conséquent, n'ont pas pu exprimer leurs vues sur la question.

“Dans notre esprit, dit-il, cette question ne le cède en importance qu'à celle de la suppression même de l'opium en Chine; nous pensons qu'il serait vain d'essayer d'enrayer l'habitude de fumer si nous devons continuer à absorber le poison sous d'autres formes, en pilules par exemple. C'est pourquoi, si cette Commission veut justifier son existence, et si elle désire arriver à des résultats satisfaisants il est nécessaire, à notre avis, que cette question soit discutée à fond. Pour montrer quelle importance y est attachée par tout le monde, on me permettra de rappeler que le Ministre de Sa Majesté Britannique à Pékin a souvent demandé à notre Gouvernement quel avantage la Chine trouverait à restreindre la culture de l'opium si, sous d'autres formes (et par là il entendait l'usage de pilules contre l'opium etc.) le fléau de l'opium devait continuer à s'étendre sans obstacle dans l'Empire.”

“Je prie donc cette honorable Commission de considérer la question avec soin afin qu'elle puisse remplir son devoir tout entier et non pas seulement en partie; je ne crois pas en effet que l'intention de mon Gouvernement ni celle d'aucun autre Gouvernement ici représenté soit que nous bornions nos discussions aux matières relatives à la culture de l'opium.”

“Au contraire je crois que nous sommes ici pour retourner la question sous toutes ses faces; et c'est aussi l'idée exprimée par les Sociétés contre l'opium et par l'opinion publique dans tous les pays civilisés. En présentant ma résolution je demande donc instamment l'aide et la coopération de cette Commission.”

Le Dr. Tenney déclare qu'il partage les vues exprimées par le Délégué Chinois. Il pense que la Commission serait blâmée à juste titre si elle se séparait sans présenter ses vues sur la question. Lorsque la proposition soumise précédemment à la Commission a été repoussée elle n'a pas été pesée suffisamment peut-être et il est possible que le vote n'ait pas été l'expression d'un jugement mûri de l'Assemblée. S'il est nécessaire de soumettre de nouveau la motion à l'Assemblée il propose qu'il soit procédé au vote par appel nominal.

M. Ratard suggère qu'une copie de la résolution soit remise à chaque Délégation afin d'en permettre l'étude, et que l'on ne passe au vote que dans deux ou trois jours. Dr. Tenney propose que la question soit mise en tête de l'ordre du jour pour la prochaine séance (adopté). A midi la séance est levée et renvoyée au 10 février.

NEUVIÈME SÉANCE,

19 FÉVRIER 1909.

LA séance est ouverte à 10h.30 du matin ; l'ordre du jour appelle la discussion de la résolution présenté par M. T'ang-kouo-an à la séance précédente et ainsi conçue :

“Un comité de cinq membres sera nommé pour étudier et faire un rapport sur les aspects médicaux de la question de l'opium y compris les meilleures méthodes de guérir l'opiomanie sans avoir recours à la drogue ou à aucun de ses dérivés.”

Sir C. Clementi Smith, se levant pour continuer la discussion, dit que l'attitude qu'il prend au nom de la Délégation Britannique en s'opposant à la nomination d'un Comité médical n'est en aucune façon dirigée contre une enquête pratique sur ce sujet dont il reconnaît l'importance ; elle est basée simplement sur le fait qu'il ne considère pas la Commission comme comprenant un nombre suffisant d'hommes compétents pour traiter cette question. Il déclare que personne, dans la Commission, ne peut sympathiser avec l'objet poursuivi par M. T'ang plus que lui et ses collègues, et il pense qu'on reconnaîtra que le Gouvernement Britannique a prouvé son désir d'aider la Chine à résoudre le problème de l'opium ; mais il considère que toute assistance accordée à la Chine doit revêtir une allure pratique et qui puisse être universellement reconnue comme telle.

Il insiste sur ce fait que la Commission n'a pas été formée sur une base scientifique. Il ne croit pas se tromper en disant que, sauf le Dr. H. Wright et le savant distingué qui fait partie de la Délégation Japonaise, il n'y a parmi les membres présents personne qui soit qualifié pour traiter des sujets comme les remèdes contre l'opium, etc. ; c'est en s'attachant fortement à ce point de vue, et parce qu'elle sent en même temps que la question présente une grande urgence et qu'elle a été laissée trop longtemps de côté, que la Délégation Britannique désire que des mesures soient prises sans retard. Bien que le Gouvernement Chinois ait publié des règlements stipulant expressément que les pilules contre l'opium ne devront pas contenir d'opium ou de morphine, c'est un fait bien connu que des pilules contenant une large proportion des drogues prohibées sont vendues sur une large échelle en Chine. Sir C. Clementi Smith pense que, si des mesures étaient prises pour mettre effectivement en vigueur ces règlements, une grande partie des maux affectant la Chine seraient supprimés. Il ajoute que, bien que la question des remèdes contre l'opium ne se soit pas posée avec une grande ampleur encore pour les Gouvernements des colonies orientales, ceux-ci, néanmoins, ont déjà reconnu la nécessité de restreindre l'usage de l'opium sous cette forme.

Continuant son discours l'orateur observe que les maux produits par l'usage de la morphine ont eu des effets terribles. Un accord, bientôt en vigueur, a cependant été fait récemment avec la Chine pour arrêter la diffusion de la morphine, et il espère avec confiance que cet accord aura l'effet désiré par tous les intéressés. Il répète que la Délégation Britannique ne trouve pas la Commission composée de façon à admettre qu'un Comité puisse être choisi, parmi ses membres, capable de mener une enquête d'une manière pratique au sujet des aspects médicaux de la question de l'opium ; mais il pense pouvoir saisir l'occasion présente de suggérer aux différents Délégués que ce sujet soit signalé directement et rapidement à leurs Gouvernements respectifs qui, seuls, sont en mesure de nommer des Comités compétents et de procéder aux recherches utiles en vue d'atteindre le but poursuivi. Ce n'est pas une question qu'on puisse régler localement mais qui doit être traitée par les plus Hautes Institutions Scientifiques des deux Mondes. La nomination du Comité préconisé par M. T'ang générerait plutôt qu'elle n'avancerait l'enquête nécessaire. C'est pourquoi il termine son discours en soumettant à la Commission l'amendement suivant ; si celui-ci est adopté il demandera, en temps utile, qu'il soit inséré parmi les Résolutions formelles adoptées par la Commission en fin de session :

“Eu égard à la constitution de cette Commission qui, parmi ses membres, ne comprend pas un nombre suffisant d'hommes compétents pour former un Comité d'enquête, à un point de vue scientifique, sur les remèdes contre l'opium et sur les propriétés et les effets de l'opium et de ses produits, la Commission désire que chaque Délégation recommande cette branche du sujet à son Gouvernement pour que celui-ci prenne telles mesures qu'il croira nécessaire à cet égard.”

Le Dr. H. Wright, après avoir remercié Sir C. Clementi Smith des compliments personnels à lui adressés, fait remarquer qu'il y a, dans la Délégation Chinoise, un expert médical, ayant fait des études occidentales et qui, au point de vue scientifique, est parfaitement compétent. Il y a donc dans la Commission trois médecins capables d'entreprendre l'enquête proposée. La Commission Royale Britannique ne comprenait qu'un expert médical dont le rapport a beaucoup influencé le jugement final de ladite Commission, mais ne paraît pas avoir satisfait la majorité des médecins qui l'ont examiné en détail. Il serait temps qu'une autre opinion, basée sur des faits récemment connus puisse être exprimée, et, sans mettre en cause les capacités de l'expert médical ci-dessus désigné, d'autres peuvent être aussi bien que lui à même d'examiner la question. Si un expert a suffi à la Commission Royale, trois peuvent sans doute satisfaire la Commission Internationale.

En adoptant la proposition de M. T'ang on atteindra l'un des buts de cette Commission qui doit être de reprendre la question médicale sur un pied plus moderne.

H. T'ang-kouo-an demande la permission de répondre à quelques-unes des remarques de Sir C. Clementi Smith.

Il déclare que dans les règlements publiés par la Chine il y a deux ans pour la suppression de l'opiomanie une des questions traitées était les "remèdes contre l'opium." Depuis lors la Chine a pris des mesures pour contrôler la vente de ces remèdes dans l'intérieur. Par exemple à Tchentou, capitale du Szechouen, aucun remède contre l'opium ne peut être vendu sans l'autorisation de la police, et, dans d'autres endroits, la Police s'efforce de restreindre la vente de ces remèdes. Mais, et c'est un fait déplorable, la masse de ces remèdes est fabriquée et introduite dans l'intérieur par les Ports à Traités; la Chine, pour ce motif, est impuissante à empêcher la diffusion de ces drogues de charlatans sans la coopération des Puissances à Traités. C'est une des raisons qui l'ont décidé à rédiger la Résolution actuellement à l'examen.

De plus, en supposant qu'il n'y a pas, comme le pense la Délégation Britannique, un nombre suffisant d'experts dans la Commission pour traiter la question, rien n'empêche, à sa connaissance, soit dans la constitution, soit dans les règles de la Commission, que celle-ci ne prenne l'avis d'experts du dehors.

Le Dr. Rössler soutient la proposition de M. T'ang dans les termes suivants :

"D'après la correspondance échangée entre le Gouvernement des Etats-Unis et les Puissances intéressées dans la question de l'opium, cette Commission doit faire une enquête générale et impartiale sur les conditions scientifiques et matérielles du commerce de l'opium et de l'opiomanie. Je craindrais que le rapport que nous soumettrons à nos Gouvernements soit incomplet si nous omettions l'aspect médical de la question de l'opium."

"Le côté médical de la question de l'opium est au début de la campagne contre l'opium et, pour cette raison, toutes les Commissions de l'opium qui ont fonctionné jusqu'à ce jour ont fait une enquête soigneuse sur ce côté de la question. On me permettra, à ce sujet, de citer les rapports des Commissions de Ceylan, des Etablissements des Détroits et de la Commission Royale sur l'opium aux Indes, qui contiennent tous des informations précieuses de cette nature."

"Vous n'ignorez pas que les médecins n'ont pas sur ce sujet une opinion unanime. Il serait d'autant plus intéressant d'entendre ce que les trois éminents médecins qui font partie de cette Commission peuvent avoir à dire sur ce sujet. On sait que les médecins de nos métropoles ont peu ou pas d'expérience en ce qui concerne les effets de l'opium fumé car il n'y a pas de problème de ce genre dans les Pays occidentaux. Au contraire les trois médecins faisant partie de cette Commission ont acquis leur expérience dans l'Extrême-Orient; c'est pourquoi je pense que nous devons leur donner l'occasion de déclarer leurs opinions. Pour ces raisons je suis en faveur de la Proposition de la Délégation Chinoise."

L'amendement de Sir C. Clementi Smith est alors mis aux voix et adopté par 7 voix contre 6 :

Pour l'amendement :

Grande-Bretagne
France
Pays-Bas
Perse
Portugal
Russie
Siam

Contre l'amendement :

Etats-Unis d'Amerique
Autriche-Hongrie
Chine
Allemagne
Italie
Japon

M. Miyaoka répond ensuite aux questions qui lui ont été soumises par M. Laidlaw, et M. Brunyate à celles que lui ont posées les Délégations Américaine et Chinoise. (V. ces réponses à la suite des rapports japonais et britannique, dans le Volume II).

Le Président suggère que la présentation de résolutions pourrait commencer lundi prochain (22 février). S'il y avait quelque point nouveau à discuter sur les Rapports distribués depuis peu, leur discussion serait à l'ordre du jour de lundi matin et l'assemblée pourrait, ensuite, passer à la présentation de résolutions sur les objets soumis à la Commission. Il ne croit pas nécessaire d'attendre les rapports des Comités avant de prendre en considération les résolutions qui pourraient être présentées.

M. de Jongh, Premier Délégué des Pays-Bas, propose que toute résolution soit distribuée par écrit avant d'être soumise à la Commission afin que les Délégués aient le temps de les étudier.

Le Président reconnaît que cette procédure est conforme aux règles adoptées et appliquées jusqu'à ce jour.

M. Ratard donne dans les termes suivants une explication spontanée du vote de la Délégation française sur la proposition de M. T'ang repoussée tout à l'heure par l'adoption de l'amendement de Sir C. Clementi Smith.

“ Si vous le permettez j'exposerai les raisons pour lesquelles j'ai voté contre la proposition de M. T'ang.

“ J'ai sous les yeux la correspondance échangée entre les Gouvernements français et Américain au sujet du programme de cette Commission, correspondance sur laquelle ont été basées les instructions données à notre Délégation. La question a été soumise au Gouvernement français par S.E. l'Ambassadeur des États-Unis à Paris à deux reprises : les 15 et 24 juillet 1908.

“ La communication du 15 juillet donne l'énumération suivante des points que la Conférence aura à traiter, et que le Gouvernement Américain invite chaque Pays représenté à faire étudier d'avance par ses Délégués :

- “ 1.—Importation de l'opium à l'état cru, de ses dérivés et du chandoo ;
- “ 2.—Consommation intérieure de l'opium cru ;
- “ 3.—Fabrication et usage du chandoo ;
- “ 4.—Fabrication et la morphine et autres dérivés ;
- “ 5.—Usage de la drogue à l'état cru ;
- “ 6.—Préparation et usage de la morphine et autres dérivés ;
- “ 7.—Extension licite et illicite de la culture du pavot (en Amérique); possibilité de sa culture ;
- “ 8.—Lois (fédérales) relatives à l'usage de l'opium et de ses dérivés.

“ La réponse officielle du Gouvernement Français à S.E. l'Ambassadeur des États-Unis à Paris, datée du 5 août 1908, déclare que, conformément au désir exprimé par le Gouvernement Américain, le Gouvernement de la République ne désignera *que* des Commissaires *au fait* de toutes les questions soulevées par le *commerce* de l'opium, documentés sur les intérêts français qu'il touche, et munis d'instructions *limitatives*.

“ Les instructions données par le Gouvernement français au chef de la Délégation française, après avoir rappelé les points du programme limitatif ci-dessus, indiquaient que la question de l'opium présentait un intérêt considérable pour l'Indochine dont les Finances peuvent être affectées par les travaux de la Commission, et recommandaient aux Commissaires français de ne s'écarter en aucun point de leurs instructions limitatives.

“ Le vote que la Délégation française a exprimé tout à l'heure est donc pleinement justifié par ces citations ; aucune délégation ne ressent plus de sympathie que nous pour les efforts du Gouvernement Chinois pour se débarrasser du fléau de l'opium et je m'associe pleinement aux sentiments exprimés à cet égard par Sir Alexander Hosie ; les questions scientifiques et médicales soulevées par l'opium sont d'une importance telle que je crois, comme Sir C. Clementi Smith, qu'il serait très intéressant et très utile de les soumettre aux plus hautes autorités scientifiques et médicales des Pays intéressés dans la question de l'opium. Cette Délégation était cependant dans l'impossibilité de dévier en quoi que ce soit des instructions qu'elle a reçues.”

Le Dr. Hamilton Wright, au nom de la Délégation Américaine, déclare qu'il est parfaitement d'accord avec M. Ratard sur le sens de la correspondance échangée entre les Gouvernements Américain et Français.

M. Miyaoka explique, de son côté, dans les termes suivants, les raisons pour lesquelles il a voté contre l'amendement présenté par Sir C. Clementi Smith :

“ Avec la permission de l'assemblée j'ai l'honneur de donner l'explication du vote que j'ai émis au nom de la Délégation Japonaise. Dans une note adressée par S.E. M. O'Brien, Ambassadeur des États-Unis près la Cour Impériale de Tokyo en date du 12 mai 1908, à S. E. le Comte Hayashi, alors Ministre des Affaires Étrangères, il est dit :

“ L'idée du Gouvernement des États-Unis d'Amérique est que les Commissaires de chaque Gouvernement procéderont indépendamment et immédiatement . . . dans le but ;

“ (1) de rechercher les moyens de diminuer l'usage de l'opium dans les possessions de ce pays ;

“ (2) d'assurer, s'il existe un trafic de l'opium parmi les nationaux de ce pays dans l'Extrême-Orient, les meilleurs moyens de supprimer ce trafic ;

“ (3) que les Délégués respectifs soient, lorsqu'ils se réuniront à Shanghai au mois de janvier (février), en position de coopérer et de présenter, conjointement ou séparément, des suggestions définies de mesures tendant à la suppression graduelle de la culture de l'opium, aussi bien que de son trafic et de son usage, dans leurs possessions extrême-orientales, et que leurs Gouvernements respectifs seraient prêts à adopter. De cette façon les membres du Gouvernement Chinois seront aidés à déraciner le mal dans leur Empire.”

“ Ceci, comme je l'ai dit, se trouve dans une note de l'Ambassadeur des États-Unis datée du 12 mai 1908. Le Gouvernement Impérial du Japon accéda à cette proposition impliquant qu'il était prêt à nommer une Commission qui rechercherait des moyens de limiter l'usage de l'opium, les meilleurs

“ moyens de supprimer le trafic de cet article, et les meilleurs moyens de supprimer graduellement non seulement la culture mais aussi l'usage de l'opium. Sachant que les plans et systèmes qui ont pour objet la suppression de l'opium et de son usage ne peuvent être efficacement discutés que par des hommes qui ont une connaissance particulière des propriétés chimiques de l'opium et des effets qu'il a sur la constitution de l'homme, le Gouvernement Impérial du Japon a cru bon de choisir comme Délégués un chimiste éminent, le Dr. Tahara, et un médecin également éminent, le Dr. Takaki, lequel, ajouterai-je, est, à Formose, à la tête de tout ce qui regarde le contrôle de l'opium. Donc, lorsque cette Délégation a été nommée par le Gouvernement du Japon, il était entendu que nous devions aborder la question de la suppression de l'opium, y compris naturellement la guérison de l'opiomanie. La Délégation japonaise a, pour ces motifs, cru devoir voter contre l'amendement proposé par Sir C. Clementi Smith, afin d'avoir l'occasion de donner sa voix à la résolution proposée par M. T'ang.”

Le Dr. Tenney retire une proposition tendant à siéger samedi et la Commission accepte la motion d'ajournement à lundi (22 février) proposée par M. Miyaoka.

A 11 h. 40 la séance est levée.

(Au cours de la séance le Président, au nom de l'Assemblée, souhaite la bienvenue à M. Chalmers, associé à la Délégation chinoise, qu'une maladie avait jusqu'à présent empêché d'assister aux séances de la Commission).

DIXÈME SÉANCE

22 FÉVRIER 1909

Le séance est ouverte à 10 h. 30 du matin.

Le Président annonce, en exprimant ses regrets, que le Délégué de l'Italie est souffrant et ne peut assister à la séance. Il exprime également ses regrets de ce que le nom du Secrétaire de la Délégation Persane a été omis sur la liste officielle des représentants. Le secrétaire de la Commission prendra, dit-il, les mesures nécessaires pour corriger cette erreur. Le nom de M. B. A. Somekh sera inscrit dans le compte-rendu imprimé des séances. (Cf. liste des Délégations en tête de ce Volume).

Le premier Délégué des Pays-Bas donne les informations qu'il a reçues télégraphiquement sur l'opium en Hollande. (Cf. Vol. II, rapport sur la Hollande).

Les Délégations Britannique et Japonaise donnent lecture de réponses aux questions qu'elles ont reçues respectivement des Délégations Américaine et Britannique. M. T'ang-kouo-an, au nom de la Délégation Chinoise répond à trois questions posées par les Délégations Britannique et Française au cours de la sixième séance.

Une réponse aux questions posées par la Délégation Américaine est donnée par la Délégation Persane et la Délégation Chinoise demande à la Délégation Britannique de fournir certaines statistiques concernant le nombre des fumeurs d'opium à Hongkong et dans les Etablissements des Détroits. (V. ces questions et réponses à la suite des rapports qu'elles concernent au Vol. II).

M. T'ang-kouo-an, se référant à ces dernières questions, déclare que sa Délégation saisit cette occasion d'exprimer combien elle apprécie les mesures récemment prises par les autorités de Hongkong contre la contrebande de l'opium vers la Chine, laquelle, d'après le commissaire des Douanes à Kowloon, a beaucoup diminué depuis les dernières années.

Deux questions sont soumises par M. T'ang-kouo-an à la Délégation Française au sujet de la quantité d'opium importée à Kouan-tchéou-ouan. (V. Vol. II à la suite du rapport français).

Sir C. Clementi Smith exprime ses remerciements à M. T'ang pour ses remarques au sujet de l'action des autorités de Hongkong. D'après les informations qu'il possède le Gouvernement de Hongkong est au courant de tout ce que devient l'opium introduit dans ce Port et a de bonnes raisons de croire qu'il n'existe actuellement aucune contrebande de Hongkong vers le territoire Chinois.

Les rapports imprimés du Portugal et des Etats-Unis sont distribués et le Président annonce que la discussion de ces rapports sera à l'ordre du jour.

Le premier Délégué de France demande que, s'il y a d'autres questions à poser sur le rapport français, elles soient présentées sans délai.

Le Dr. H. Wright ayant posé une question à la Délégation Britannique sur la quantité d'opium à fumer embarquée à Hongkong ou dans les Etablissements des Détroits pour les Philippines, le Président demande si quelque Comité est prêt à soumettre son rapport à la Commission.

Le Dr. Tenney, au nom du Comité des Traités et Accords Internationaux existant sur le trafic de l'opium déclare que le rapport, non imprimé, ne peut pas encore être déposé, mais qu'il peut le lire; il ajoute que le Comité a pris la liberté d'ajouter à son nom les mots "et de ses dérivés."

Après la lecture de ce rapport Sir C. Clementi Smith exprime l'opinion que ni lui ni ses collègues n'ont jamais prévu que le Comité ferait des extraits de certains Traités ou Accords et donnerait son interprétation de la signification exacte de ces extraits. Lui, en tout cas, n'oserait pas faire quoi que ce soit de ce genre et il considère cela comme un procédé extrêmement dangereux, ces questions étant généralement laissées à l'interprétation des Gouvernements intéressés.

Finalement il est décidé de laisser le rapport en l'état jusqu'à ce que les diverses Délégations aient eu le temps de l'étudier.

Aucune autre question n'étant présentée, le T. R. Evêque Brent constate que la Commission a atteint son premier objet et déclare que la présentation de résolutions sera maintenant à l'ordre du jour. Avant de passer à ce genre de travail il attire l'attention de l'Assemblée sur certaines considérations et certaines principes qui lui paraissent importants dans cette occurrence. Il cite un passage du Rapport sur la seconde Conférence de la Haye au sujet des Conférences et Commissions semblables à celle qui est actuellement réunie à Shanghai; il est rappelé, dans cet extrait, que le but des Conférences et des Commissions est d'arriver à un accord et non à une contrainte; que l'accord doit être réel et non apparent seulement; et qu'il est préférable de laisser un sujet temporairement de côté, de le renvoyer à une Conférence ultérieure, plutôt que d'en arriver à irriter l'une ou l'autre des Puissances représentées.

Convaincu que ces principes sont ceux de la Commission, le Président insiste sur la responsabilité qu'elle encourt, ainsi que lui, personnellement, comme son chef. Les résultats de cette Commission seront directs et indirects; directs en ce qu'ils sont appelés à prendre éventuellement la forme de lois dans les divers pays représentés; indirects en ce qu'ils produiront leur impression sur l'opinion publique en faisant naître des sentiments, arbitres suprêmes dans toutes les grandes questions. Le monde attend de cette Commission quelque chose de définitif, sinon de final, et la Commission a devant elle une matière suffisante pour qu'elle puisse arriver à des conclusions précieuses.

Il est probable qu'avant d'arriver à l'entente il y aura à traverser l'épreuve de la discussion, mais le Président espère avec confiance que chacun gardera le respect des convictions d'autrui et observera la plus parfaite courtoisie.

Des résultats de cette Commission, dépendent deux grandes questions; d'abord le principe même de l'étude internationale de questions controversées, car l'institution des Commissions Internationales est encore récente, et, selon les résultats donnés par celle-ci, il peut gagner ou perdre dans l'estime publique. Ensuite, si la Commission n'arrive pas à des résultats pratiques et appréciables, la question de l'opium risque de retomber aux mains des agitateurs et des extrémistes pour la plus grande confusion de l'opinion publique.

Le Président est convaincu que l'Assemblée est consciente de sa responsabilité et espère qu'elle remplira noblement son devoir.

Il la remercie de la courtoisie et de la dignité qui a caractérisé ses travaux sans qu'il ait eu à intervenir pour maintenir l'ordre, et espère que jusqu'à la fin ces qualités continueront à prévaloir au sein de la Commission.

Il suggère enfin que, suivant la méthode suivie jusqu'à ce jour les résolutions soient présentées par les différentes Délégations dans l'ordre alphabétique des Pays qu'elles représentent, la discussion ne venant qu'après le dépôt de toutes les résolutions.

Il est décidé de procéder ainsi, mais sans fixer aucune limite de temps pour le dépôt des résolutions.

La séance est levée et la prochaine réunion remise au 23 février à 10h 30 du matin.

PROCÈS-VERBAL DE LA ONZIÈME SÉANCE,

23 FÉVRIER 1909

LA séance est ouverte à 10 h. 30 du matin.

Après lecture par le premier Délégué Britannique de réponses (Cf. Vol. II) aux questions qui lui ont été posées par les Délégations Américaine et Chinoise, le Dr. Rössler propose que les résolutions à soumettre à la Commission soient préalablement discutées par un Comité afin d'éviter des débats inutiles. Sir C. Clementi Smith pense que les résolutions doivent être renvoyées à un Comité après leur adoption et non avant d'avoir été soumises à la Commission. Le Premier Délégué de France partage ce point de vue.

Mise aux voix la proposition du Dr. Rössler est écartée par 6 contre 5.

La Commission se trouve à ce moment en présence des textes suivants distribués d'avance aux différentes Délégations :

(a) Résolutions proposées par les Délégués Américains et basées sur l'étude des différents rapports présentés par les diverses Délégations à la Commission Internationale de l'opium.

1.—Considérant que les rapports soumis à la Commission de l'Opium par les Délégations des Puissances reconnaissent que l'opium, ses alcaloïdes, préparations et dérivés sont ou devraient être réservés aux usages légitimes de la médecine ;

Pour ces motifs la Commission Internationale de l'Opium est d'avis qu'un effort commun devrait être fait par les pays représentés en vue de confiner immédiatement ou dans un avenir prochain, l'opium, ses alcaloïdes, préparations et dérivés aux usages légitimes de la médecine ;

De plus la Commission Internationale de l'Opium est d'avis que chaque Gouvernement représenté est le mieux qualifié pour déterminer, en ce qui concerne ses nationaux respectifs et les peuples dépendants ou protégés, ce qui doit être considéré comme usage médical légitime.

2.—Considérant que les rapports soumis à la Commission Internationale de l'Opium par les Délégations reconnaissent que, par suite d'une connaissance insuffisante des effets désastreux qu'entraîne l'usage immodéré et inconsidéré de l'opium, de ses alcaloïdes, préparations et dérivés, et faute d'une opinion Internationale commune sur la question générale de l'opium en ce qui concerne la production et le libre usage de l'opium, de ses alcaloïdes, préparations et dérivés, certains problèmes budgétaires dépendent étroitement et principalement de la production, de la vente et de l'usage de l'opium, de ses alcaloïdes préparations et dérivés ;

Pour ces motifs, la Commission Internationale de l'opium reconnaît que ces problèmes budgétaires existent encore et que leur solution demandera un certain temps ;

Elle est d'avis cependant qu'aucun Gouvernement, ne devrait soit par principe soit par nécessité, continuer à dépendre étroitement et principalement de la production de l'opium, de ses alcaloïdes, préparations et dérivés, comme faisant partie essentielle de ses recettes ;

Elle est encore d'avis que les problèmes budgétaires, tels qu'ils existent, ne sont pas de nature à déjouer les efforts des Gouvernements qui doivent les résoudre ; et qu'une solution devrait être donnée aussitôt que possible en vue de réléguer l'opium, ses alcaloïdes, préparations et dérivés à leurs usages propres, et légitimes, en matière médicale.

3.—Considérant que les rapports soumis à la Commission Internationale de l'opium par les Délégations déclarent qu'il est défendu à leurs nationaux de fumer l'opium ; considérant en outre que quelques-uns desdits rapports déclarent que la même prohibition s'étend aux peuples dépendants ou protégés de certains Gouvernements représentés ;

Pour ces motifs, la Commission Internationale de l'opium est d'avis que le principe de la prohibition totale de la fabrication, de la distribution et de l'usage de l'opium à fumer est le vrai principe qui doit être appliqué à tous les peuples, aussi bien dépendants ou protégés que nationaux ; et qu'aucun système pour la fabrication, la distribution ou l'usage de l'opium à fumer ne devrait continuer à exister si ce n'est dans le but expresse et unique de supprimer au plus tôt les maux qu'entraîne l'habitude de fumer l'opium.

4.—Considérant que les rapports soumis à la Commission Internationale de l'Opium par les Délégations rappellent que chacun de leurs Gouvernements a des lois strictes dont le but direct ou indirect est d'empêcher sur leurs territoires respectifs l'entrée en contrebande de l'opium, de ses alcaloïdes, préparations et dérivés.

Pour ces motifs la Commission Internationale de l'Opium est d'avis que c'est un devoir pour tous les Pays qui continuent à produire l'opium, ses alcaloïdes, préparations et dérivés, d'empêcher aux ports de sortie l'embarquement d'aucun alcaloïde, préparation ou dérivé de l'opium à destination d'un pays qui interdit l'entrée sur son territoire desdits alcaloïdes, préparations ou dérivés de l'opium.

5.—Considérant que les rapports soumis à la Commission Internationale de l'Opium par les Délégations indiquent que l'abus de la morphine, de ses sels et dérivés, est indissolublement lié à l'abus de l'opium lui-même, et que leur usage accompagne, et, tôt ou tard, dépasse l'usage de l'opium lui-même ;

Pour ces motifs, la Commission Internationale de l'Opium est d'avis que des Accords Internationaux très stricts sont nécessaires pour contrôler la fabrication, le commerce et l'abus présent ou futur de la morphine, de ses sels et dérivés par les ressortissants des Gouvernements représentés à la Commission Internationale de l'Opium.

6.—Considérant que les rapports soumis à la Commission Internationale de l'Opium par les Délégations indiquent que, bien que chaque Gouvernement représenté soit le mieux qualifié pour régler par ses lois nationales les problèmes intérieurs soulevés par la fabrication, l'importation ou l'abus de l'opium, de ses alcaloïdes, préparations et dérivés, cependant aucun desdits Gouvernements représentés ne peut résoudre complètement ses problèmes intérieurs de l'opium sans l'aide de tous les Gouvernements intéressés dans la production et la fabrication de l'opium, de ses alcaloïdes, préparations et dérivés ;

Pour ces motifs la Commission Internationale de l'Opium est d'avis que des efforts concertés doivent être faits par les Gouvernements représentés à la Commission Internationale de l'Opium en vue de s'assister mutuellement pour la solution de leurs problèmes intérieurs respectifs soulevés par l'opium.

7.—Considérant que les rapports soumis à la Commission Internationale de l'Opium par les Délégations reconnaissent directement ou indirectement que les résolutions ci-dessus ne peuvent devenir effectives que par l'action combinée des Gouvernements intéressés ;

Pour ces motifs il est décidé que la Commission Internationale de l'Opium dans son ensemble, et chaque Délégation en ce qui concerne son Gouvernement, recommande la convocation aussi rapide que possible d'une Conférence Internationale chargée de négocier une Convention définitive basée sur les conclusions de la Commission Internationale de l'Opium et sur les résolutions qu'elle aura adoptées.

(b) Résolution séparée proposée par la Délégation Américaine.

Considérant que l'un des objets formels de la Commission Internationale de l'Opium est d'encourager la Chine dans ses efforts pour débarrasser l'Empire de l'abus de l'opium, de ses alcaloïdes préparations et dérivés ;

La Commission Internationale de l'Opium est d'avis que toutes les nations ayant des traités avec la Chine ont le devoir de notifier au Gouvernement Chinois qu'elles consentiront à la prohibition complète de l'importation de l'opium, de ses alcaloïdes, préparations et dérivés aussitôt que la Chine aura prouvé d'une façon satisfaisante que la prohibition de la culture du pavot en Chine est devenue effective ; et que, cette preuve étant fournie, tout traité, stipulation ou accord spécial qui pourrait gêner la libre action de la Chine vis-à-vis de l'opium étranger devrait être abrogé.

(c) Résolutions proposées par la Délégation Britannique.

1.—La Commission reconnaît la sincérité inébranlable du Gouvernement Chinois dans ses efforts pour déraciner la production et la consommation de l'opium à travers l'Empire ; l'importance croissante de la partie de l'opinion publique qui, parmi ses ressortissants, fait corps pour soutenir ces efforts ; et le progrès, réel bien qu'inégal, déjà accompli dans une tâche qui est d'une ampleur immense.

2.—Les représentants de la Chine à cette Commission sont malheureusement hors d'état de fournir des preuves statistiques sûres témoignant de la portée actuelle de la diminution obtenue dans la production ; et la Commission redoute qu'à certains égards cet élément fondamental du problème de la prohibition ne présente de plus en plus de difficultés ; en conséquence la Commission recommande fortement aux Gouvernements intéressés d'entrer en négociations avec le Gouvernement Chinois en vue d'inaugurer des méthodes plus systématiques de traiter la question de la production.

3.—La Commission trouve que le manque de restrictions à la fabrication, à la vente et à la distribution de la morphine constitue d'ores et déjà un grave danger pour la Chine, et que la morphinomanie, tend à se répandre parmi les autres peuples de l'Extrême-Orient et ailleurs : la Commission, en conséquence désire insister fortement auprès de tous les Gouvernements sur l'importance que présenterait l'établissement de mesures draconiennes par chaque Gouvernement sur son propre territoire et dans ses possessions pour contrôler la fabrication, la vente et la distribution de cette drogue ainsi que des autres dérivés de l'opium qu'une enquête scientifique pourrait signaler comme susceptibles d'abus semblables et d'effets similaires à ceux de l'opium.

4.—La Commission trouve que l'usage de l'opium sous quelque forme que ce soit autre que l'usage médical est considéré par presque tous les pays représentés comme devant être prohibé ou soigneusement réglementé : et que chacun des systèmes de réglementation actuellement appliqués a pour but, selon les occasions, d'augmenter progressivement les restrictions. Considérant la grande diversité des conditions prévalant dans les différentes contrées, la Commission n'est pas en mesure de prononcer que l'un quelconque des systèmes de réglementation est décidément supérieur aux autres ; mais elle attire l'attention des Gouvernements intéressés sur l'opportunité d'un nouvel examen de leurs systèmes de réglementation à la lumière de l'expérience des autres pays ayant à traiter les mêmes problèmes.

5.—La Commission, telle qu'elle est constituée, ne saurait entreprendre l'enquête à un point de vue scientifique sur les remèdes contre l'opium et sur les propriétés et les effets de l'opium et de ses produits ; mais elle considère qu'une enquête de ce genre aurait la plus haute importance et désire en

conséquence que chaque Délégation recommande cette branche du sujet à son Gouvernement pour que celui-ci prenne telles mesures qu'il croira nécessaire à cet égard.

Le Président annonce que les Résolutions seront présentées dans l'ordre alphabétique de la liste officielle des Délégations.

Le Dr. Hamilton Wright se lève alors pour présenter à la Commission les Résolutions rédigées par la Délégation Américaine, en exprimant l'espoir qu'elles rencontreront l'approbation unanime de la Commission. Elles ont été conçues dans le même esprit qui a animé le Gouvernement Américain lorsqu'il a entrepris de convoquer cette Commission, esprit de sympathie aussi bien pour les peuples qui ont à faire face à des problèmes financiers soulevés par l'opium que pour ceux qui se trouvent handicapés dans la lutte des affaires commerciales par l'usage et l'abus de cette drogue. Toutes les Délégations avant et surtout depuis leur arrivée à Shanghai ont étudié profondément la question de l'opium et, l'orateur n'en doute pas, toutes ont pu se rendre compte de la difficulté du problème, surtout en ce qui concerne la Chine et l'Inde. Il étend sa sympathie non seulement à la Chine, pour les malheurs que l'opium cause à sa population, mais, poussant plus loin que Sir A. Hosie, aux Gouvernements de l'Inde anglaise, de Hong-Kong, des Etablissements des Détroits, de l'Indochine française, du Siam, du Portugal et des Pays-Bas, qui ont à traiter de graves problèmes financiers résultant de la production, de la fabrication ou du commerce de l'opium dans ces pays.

Cependant, dit-il, la Délégation Américaine a conclu à l'abolition du trafic de l'opium qu'elle considère comme aussi nécessaire qu'a pu l'être autrefois l'abolition du trafic des esclaves. La situation n'est pas sans offrir quelque analogie avec celle qui existait à propos de la traite des noirs, et c'est avec admiration que l'on voit de nouveau la même grande nation se préparer à sacrifier un gros revenu dans le but de faire cesser un grand mal. Le temps de Warren Hastings n'est plus et maintenant un autre grand homme d'Etat, grand philosophe aussi, Lord Morley ne craint pas de dire qu'il n'est pas entièrement d'accord avec la Commission Royale de l'Opium aux Indes, et de recommander à la Chambre des Communes les conclusions de la Commission des Philippines, déclarant que l'usage de l'opium est un mal tel qu'aucun bénéfice financier ne saurait le compenser ; et le même homme d'Etat insiste sur ce point que la Grande-Bretagne, tout en entraînant la Chine à exécuter ses engagements, ne doit pas faire dépendre uniquement de là l'extinction graduelle du commerce de l'opium, et qu'elle doit être prête à accueillir toute proposition du Gouvernement chinois tendant à abrégier le délai dans lequel cette suppression sera effectuée.

La Grande-Bretagne ne s'arrêtera pas, continue le Dr. Hamilton Wright, dans la voie qu'elle a adoptée, et saura sacrifier s'il le faut ses arrangements particuliers et ses traités désuets comme elle sacrifie ses navires démodés. A l'époque actuelle, la question de l'opium n'est plus une affaire entre deux Puissances qui y sont directement intéressées mais une affaire à laquelle peuvent et doivent prendre part aussi les Puissances qui ont pu éviter ce problème dans leurs frontières.

A l'époque actuelle, espérons-le, et par la voix de cette Commission Internationale, l'opium sera relégué et confiné à ses usages propres et légitimes, et ne descendra plus de la place qu'il occupe comme un don de la nature destiné à apaiser la souffrance pour retomber au rang d'un aliment des vices de l'humanité.

Personnellement, le Dr. Hamilton Wright a pu se rendre compte de la difficulté qu'éprouvent même les médecins dument qualifiés à ne pas céder à la tentation, trop fréquente, de recourir à l'opium pour endormir la douleur physique ou mentale de leurs malades ; et il est pour cette raison plus convaincu encore que l'opium, sous toutes ses formes, ne doit être employé que dans les cas extrêmes.

C'est dans cet esprit que la Délégation Américaine a étudié le problème international qui soulève des questions de revenus, de traités entre différentes Puissances sur la question de l'opium et d'Arrangements particuliers entre deux Puissances pour le contrôle et la réduction de l'usage de l'opium parmi ces peuples qui considèrent l'opium comme un remède toujours prêt pour toutes leurs petites peines physiques ou morales. Elle n'a pas voulu se borner au point de vue médical ou moral ou financier ou historique, mais a tenté d'embrasser le problème sous toutes ses formes et elle présente ses Résolutions avec l'espoir qu'elles pourront être acceptées par la Commission dans son ensemble et que bientôt pourra être enregistré le premier pas International fait vers la solution de cette question de l'opium.

Le Dr. Hamilton Wright donne lecture ensuite des Résolutions proposées par sa Délégation en les commentant et en expliquant à propos de chacune les motifs qui la recommandent à la Commission.

M. Miyaoka s'enquiert auprès du Président si chaque Délégation sera libre d'introduire aucune résolution à quelque moment que ce soit pendant le cours des travaux jusqu'au vote final des Résolutions. Le Président dit que c'est à l'assemblée de décider s'il lui paraît préférable de recevoir les Résolutions déjà déposées ou d'accepter la présentation de toutes celles qui pourraient être prêtes et de les discuter *seriatim*. Il croit savoir que les Résolutions Chinoises ne sont pas encore prêtes à être distribuées. Sir C. Clementi Smith suggère que l'Assemblée procède à l'examen des Résolutions proposées par la Délégation Américaine sans plus tarder, et cette proposition est acceptée.

Le Dr. Hamilton Wright propose alors l'adoption de la première Résolution Américaine ;

Au nom de la Délégation Britannique Sir C. Clementi Smith expose les raisons pour lesquelles il lui est impossible de donner son concours à cette proposition : d'abord elle interprète d'une façon erronée certains des Rapports présentés à la Commission lorsqu'elle dit, dans son préambule, que ces Rapports reconnaissent que l'usage de l'opium doit être limité aux pratiques médicales ; cela est vrai pour certains des Pays représentés, les Etats-Unis et le Canada, la Chine même où le caractère particulier de la machine administrative ne semble pas laisser d'alternative possible entre la prohibition totale et la licence sans restriction. Mais dans d'autres pays la question se présente sous un aspect totalement différent : ou bien ils n'admettent pas que l'opium doive être confiné dans ses usages médicaux, ou, s'ils l'admettent, c'est comme un but très éloigné et non comme un guide pratique de leur action dans un avenir rapproché ; tel est le cas de l'Inde où la politique déclarée est la réglementation et non la prohibition, sauf en Birmanie où une expérience de la prohibition est actuellement tentée. L'habitude de l'opium est répandue dans l'Inde depuis des siècles, mais il suffit de comparer ses statistiques avec l'extension rapide prise en Chine par la culture du pavot pour s'assurer que le système de réglementation adopté dans l'Inde a été efficace pour prévenir les abus. Des mesures despotiques dans ce pays ne se justifiaient que si l'habitude de l'opium avait causé une dégradation sociale étendue, ce dont nous n'avons pas la preuve, ou si l'opinion publique devenait favorable. Les difficultés ne seraient pas seulement, ni même surtout financières, mais plutôt politiques. Il suffit de mentionner que tout le long de la frontière septentrionale et dans le cœur même de l'Inde se trouvent des Etats indépendants ou protégés qui conservent le droit de produire, et tourneraient bien vite aux demandes des opiomanes si la prohibition était adoptée par le Gouvernement de l'Inde. Le passé répond du présent et de l'avenir à ce point de vue. En Birmanie même, avec le soutien de la meilleure et de la plus grande partie de l'opinion publique la prohibition a été tenue en échec pendant plus de 15 années et peut à peine être regardée comme établie définitivement à l'heure actuelle. Si le Gouvernement se décidait à prohiber l'opium, comme plus dangereux que l'alcool ou le chanvre dont il règle déjà la consommation, il est clair que ce ne pourrait être qu'après une longue période de préparation par la poursuite persévérante de la politique de réglementation.

Il est également clair, ajoute l'orateur, que le Gouvernement de l'Inde ne saurait priver les indigènes d'une drogue qui fait le fond de toute leur médication : même si la Résolution était acceptée il faudrait pendant longtemps encore donner l'interprétation la plus étendue aux termes "usage médical légitime," ce qui rendrait la prohibition purement nominale.

Pour ces raisons la Délégation Britannique ne croit pas pouvoir recommander à son Gouvernement l'adoption du principe de la prohibition, auquel les informations présentées à cette Commission n'apportent aucun appui nouveau. Elle est d'accord avec la Commission pour employer tous les moyens pratiques d'empêcher les abus de l'opium, mais croit que ce but sera atteint par l'adoption de la quatrième des Résolutions proposées par la Délégation Britannique.

Le Dr. Hamilton Wright et le Dr. Roessler suggèrent alors quelques changements de mots dans la rédaction de la Résolution, mais Sir C. Clementi Smith déclare qu'il ne peut pas accepter, sous aucune forme, une déclaration du principe que l'opium doit être confiné simplement et seulement aux usages de la médecine, car son Gouvernement ne partage nullement ce point de vue. Le Dr. Hamilton Wright reconnaît qu'une des plus grandes difficultés que le Gouvernement de l'Inde rencontrerait serait la définition de ce qui constitue "l'usage légitime de la médecine" car il est impossible d'appliquer le critérium médical de l'Occident à un grand pays colonial comme l'Inde. Après discussion plus étendue il est décidé sur l'initiative de M. Ratard que la prise en considération de la Résolution en question sera remise à plus tard de façon à permettre la recherche d'un terrain d'entente entre les Délégations Américaine et Britannique, par une conférence préalable et privée entre les intéressés.

Le Dr. Hamilton Wright propose l'adoption de la seconde des Résolutions américaines. Au nom de sa Délégation Sir C. Clementi Smith indique qu'il ne lui est pas possible d'accepter cette proposition dans son préambule, car ce n'est pas par suite de l'ignorance des effets désastreux qu'entraîne l'usage immodéré et inconsidéré de l'opium que sont nés les problèmes budgétaires auxquels il est fait allusion. Chacun sait au contraire que les plus gros revenus sont procurés par les systèmes de réglementation les plus efficaces. De plus, le premier Délégué de Grande-Bretagne ne voit pas pourquoi la Commission chercherait à dissimuler la gravité de ces problèmes budgétaires, ni comment elle peut songer à empiéter sur le domaine fiscal d'aucune nation.

Monsieur Ratard fait remarquer que les considérations fiscales ont un grand poids dans certains pays. A Java et dans l'Indochine française par exemple, l'accroissement des recettes signifie en réalité que l'opium est taxé si lourdement qu'il est mis hors de la portée des populations indigènes. Sur la suggestion du Dr. Roessler la discussion de cette résolution est remise à plus tard.

La troisième Résolution Américaine est également retirée après discussion pour être modifiée. Le Dr. Hamilton Wright lit ensuite la quatrième Résolution qui après discussion est adoptée avec quelques modifications.

La cinquième Résolution Américaine est également retirée en faveur d'une de celles qui sont présentées par la Délégation britannique (no. 3), laquelle est adoptée avec quelques légères altérations qui lui donnent une portée plus générale.

Le séance est levée à midi 30.

A la reprise à 2h. 30 la sixième résolution américaine, qui venait en discussion est retirée comme se confondant avec celle (no. 4), qui a été d'abord adoptée. dans sa nouvelle forme. La septième résolution est également retirée provisoirement.

Le Dr. Tenney se lève alors pour proposer l'adoption de la résolution séparée présentée par la Délégation Américaine, et dont le texte, modifié depuis le matin, est maintenant le suivant :

“La Commission Internationale est d'avis que toute nation qui prohibe effectivement la production de l'opium et de ses dérivés sur son propre territoire devrait être libre de prohiber l'importation sur ses territoires de l'opium ou de ses dérivés, excepté pour l'usage médical.”

A l'appui de cette proposition le Dr. Tenney prononce un discours, insistant sur la situation particulière de la Chine, seule nation qui n'ait pas les mains libres lorsqu'il s'agit de défendre ses populations contre le fléau de l'opium. On peut avoir confiance cependant dans l'excellence de l'opinion publique chinoise en ce qui concerne les problèmes moraux clairement posés devant elle.

Il est vrai, et la Délégation chinoise l'admet aussi bien que les autres, que le Rapport présenté par elle est incomplet et ne fournit que des estimations très approximatives, mais trois faits restent établis solidement : Le Gouvernement Impérial a pris à coeur le mouvement de réforme anti-opium ; il y a eu en faveur de cette campagne un mouvement d'opinion remarquable ; et des progrès très satisfaisants ont déjà été accomplis depuis l'Edit Impérial de 1906. Il faut que cette Commission tende la main aux Chinois et leur donne toute l'assistance possible ; il sera plus facile à la Chine de faire un effort énergique et rapide que de se maintenir pendant une longue période dans les hauteurs de l'héroïsme moral et du sacrifice. Il faut donc qu'elle profite du mouvement actuel pour se débarrasser d'un seul coup du fléau de l'opium.

Ceci, insiste le Dr. Tenney, n'est nullement dirigé contre la Grande-Bretagne ; le consentement de toutes les Puissances à Traités est nécessaire pour permettre à la Chine d'agir en toute souveraineté dans cette question de l'opium. Le Résolution proposée donnerait à la Chine une belle occasion de montrer qu'elle est vraiment désireuse d'aboutir et qu'elle est capable de s'aider elle-même. Et si elle n'est pas capable de s'aider elle-même, alors le blâme en retombera uniquement sur elle. C'est un devoir pour toutes les nations de l'aider dans cette conjoncture, et par conséquent il n'y a pas lieu de demander des compensations.

M. T'ang-kouo-an, en soutenant cette Résolution, déclare son adhésion absolue à toutes les paroles du Dr. Tenney. Au cours de la discussion celui-ci indique que sa Résolution est destinée à remplacer celle qui avait été distribuée auparavant. Le Premier Délégué de Grande-Bretagne considère que l'effet de cette Résolution serait une entière abrogation des Traités et il exprime sa confiance dans la Commission pour repousser toute déclaration qui impliquerait que les Nations peuvent rompre les Accords qu'elles ont solennellement adoptés. M. T'ang-kouo-an déclare que l'intention du Gouvernement Chinois n'est nullement de répudier aucun Accord signé par lui, mais qu'il apprécierait toute nouvelle concession que le Gouvernement Britannique croirait pouvoir consentir. Après quelque discussion M. Miyaoka exprime l'opinion que la Commission est en train de se lancer dans l'examen d'une question qui a le caractère diplomatique entre la Chine et la Grande-Bretagne, et que toute discussion sur un sujet de cette nature dépasse la compétence de la Commission. Cette opinion est partagée par le Premier Délégué de France. M. Miyaoka pose alors la question préalable suivante :

“La prise en considération de la Résolution du Dr. Tenney est-elle dans les limites de la compétence de la Commission ?”

L'assemblée répond négativement et écarte ainsi la Résolution.

Les Résolutions britanniques viennent alors en discussion. La première est adoptée à l'unanimité. La seconde est retirée après une intervention de M. Miyaoka, faisant l'éloge de la manière dont la Délégation chinoise a accompli la tâche ardue de préparer un Memorandum sur la question de l'opium, et provoquant ainsi de la part de M. T'ang une promesse d'inciter son Gouvernement à inaugurer des méthodes plus systématiques d'étudier la question de la production de l'opium. La troisième a déjà été adoptée comme amendement à une des propositions américaines. La discussion de la Résolution 4 est remise à plus tard. En ce qui concerne la suivante, Sir C. Clementi Smith explique que c'est la même qui a déjà été adoptée par la Commission dans sa Neuvième séance. M. Miyaoka déclare qu'il donne son appui à cette Résolution qui lui paraît la seule alternative laissée en dehors de l'enquête sur l'opium au point de vue médical qui a été repoussée. Après quelque discussion à laquelle prennent part le Dr. H. Wright et le Dr. Roessler, ce dernier en proposant un amendement qui est repoussé au vote, la Résolution est adoptée avec une seule modification, la substitution du mot “permettre” au mot “entreprendre.”

La discussion des Résolutions chinoises dont le texte vient d'être distribué est remise à plus tard et la séance est levée à 4h., 40.

DOUZIÈME SÉANCE,

25 FÉVRIER 1909.

La séance est ouverte à 2h. 30 de l'après-midi.

Le Premier Délégué du Japon fournit une nouvelle réponse à la question posée par M. Laidlaw, M.P. au cours de la cinquième séance.

Le Président annonce que le Délégué de Russie se trouve dans l'impossibilité de fournir un rapport actuellement sur la question de l'opium dans son pays, mais espère que les renseignements nécessaires lui arriveront ultérieurement. Une discussion s'élève alors sur la publication des procès-verbaux et rapports. Le Président demande s'il ne serait pas possible de les imprimer à Shanghai, et le Secrétaire est invité à s'informer du prix et autres conditions de publication.

M. T'ang-kouo-an s'enquiert auprès de la Délégation japonaise du montant du droit d'importation imposé à la morphine entrant dans le "Territoire à bail" de Kuangtoug. La réponse est promise pour la prochaine séance. Répliquant à une question du Premier Délégué néerlandais, la Délégation Portugaise déclare qu'elle n'est pas en mesure de fournir en plus de son rapport sur Macao des informations sur la question de l'opium à Timor.

Les deux résolutions suivantes sont alors soumises à la Commission par les Délégations américaine et britannique conjointement.

1.—En vue de l'action exercée par le Gouvernement Chinois pour supprimer la pratique de fumer l'opium et par d'autres Gouvernements dans le même but, la Commission Internationale de l'opium recommande que chaque Délégation intéressée incite son Gouvernement à prendre des mesures pour la suppression graduelle de la pratique de fumer l'opium dans ses Territoires et Possessions en tenant compte des circonstances variables pour chaque Pays intéressé.

2.—La Commission Internationale de l'opium trouve que l'usage de l'opium, sous quelque forme que ce soit, autre que l'usage médical, est considéré par presque tous les Pays représentés comme devant être prohibé ou soigneusement réglementé; et que chaque Pays dans l'administration de son système de Réglementation entend avoir pour but, selon les circonstances, d'augmenter progressivement les restrictions. En formulant ces conclusions la Commission Internationale de l'opium reconnaît la grande diversité des conditions prévalant dans les différentes contrées, mais elle attire l'attention des Gouvernements intéressés sur l'opportunité d'un nouvel examen de leur système de réglementation à la lumière de l'expérience des autres Pays qui ont à traiter les mêmes problèmes.

Le Premier Délégué des Pays-Das déclare que, tout en acceptant la première de ces Résolutions telle qu'elle est, sa Délégation a l'intention de présenter une résolution similaire mais plus compréhensive. La Première résolution est alors mise aux voix et adoptée à l'unanimité, la Délégation Portugaise réservant seule son vote.

Sir C. Clementi Smith propose ensuite l'adoption de la seconde résolution dont il donne lecture et qui est votée dans les mêmes conditions que la première.

Le Dr. Hamilton Wright annonce que la Délégation Américaine retire définitivement les résolutions qu'elle a originairement proposées sous les Nos. 1, 2, 5, 6, et 7.

M. de Jongh présente alors les résolutions proposées par la Délégation Néerlandaise, ainsi conçues :

I.——Considérant que la suppression totale de l'usage de l'opium dans un délai de quelques années doit être considérée comme un idéal élevé mais impossible à atteindre pour le moment ;
qu'en vue de combattre l'usage de l'opium on peut attendre beaucoup de mesures prises systématiquement et ayant un effet graduel ;

qu'une pratique soignée de pareilles mesures ne se conçoit que si la direction des affaires d'opium est conservée en mains propres (du Gouvernement) de façon qu'aucun individu n'ait intérêt, à augmenter la vente de la drogue ;

qu'un tel système a sur beaucoup d'autres un grand avantage qui le rend recommandable, c'est qu'il garantit contre la diffusion de l'habitude de fumer dans les districts où cette habitude est encore inconnue.

Il est résolu de recommander aux Gouvernements des Pays où des systèmes différents sont en vigueur :—

(a) qu'il soit décidé en principe que tout ce qui regarde l'opium dans leur ressort sera dirigé par l'Etat et que l'établissement de ce système ne sera pas retardé plus longtemps que les circonstances ne l'exigeront ;

(b) que, sans s'occuper de savoir si le Contrôle direct du Gouvernement a déjà été mis en vigueur ou non, les mesures suivantes soient prises immédiatement pour restreindre l'usage de l'opium.

(1). faire bien comprendre aux fonctionnaires européens ou indigènes qui sont capables d'avoir une influence sur la consommation que le Gouvernement est résolu à combattre celle-ci;

(2). ne pas permettre à qui que ce soit faisant usage de l'opium de servir dans l'administration civile, militaire ou maritime.

(3). imprimer dans l'esprit des enfants à l'école et des adultes partout et toujours les maux résultant de l'usage de l'opium; en un mot instruire l'opinion publique à ce sujet par tous les moyens; afin de développer la tendance contraire à l'opium, faire appel à l'aide de sociétés privées ayant en vue d'améliorer la moralité de parties spéciales de la population, et dont le but et les méthodes paraîtront satisfaisantes;

(4). Prohiber la vente de l'opium aux enfants;

(5). Donner toute publicité, y compris la vente à prix coutant, à tout remède contre l'opium au cas ou un tel remède se répandrait à l'étranger qui ne contienne ni morphine ni aucun ingrédient malsain;

(6). Maintenir s'il en existe, dans leur étendue actuelle, et si possible augmenter les surfaces soumises à la défense, en combinant ou non avec le système de donner des licences aux fumeurs habituels;

(7). Exclure de l'usage de la drogue des sections spéciales de la population.

(8). Diminuer le nombre des débits et fumeries, et diminuer le nombre d'heures pendant lesquelles ils peuvent rester ouverts;

(9). Relever les prix de l'opium au détail.

II.—— Considérant que la contrebande de l'opium va à l'encontre des mesures variées prises par les divers Gouvernements en vue de combattre l'usage de l'opium;

que la contrebande cause de grandes pertes aux Trésors, et de plus nécessite de grandes dépenses pour la combattre;

qu'elle a un effet démoralisant à la fois sur les individus qui se livrent à ce commerce et sur les officiers de Douanes et de Police;

que l'expérience enseigne que la contrebande de l'opium, à cause de la grande valeur de ce produit sous un petit volume, est extrêmement difficile à combattre par les moyens employés jusqu'à ce jour individuellement par les divers Gouvernements;

qu'il y a lieu en conséquence de s'efforcer de supprimer la contrebande par une action concertée des divers Gouvernements;

et qu'une pareille action internationale n'est possible qu'après que dans tous les Pays l'opium aura été pris en mains propres (des Gouvernements);

Il est résolu :

de recommander aux divers Gouvernements, après qu'ils auront établi un système de contrôle direct de l'opium, d'entrer en négociations, par la voie diplomatique, dans le but que par la suite le Commerce en gros de l'opium ne soit permis qu'entre les Gouvernements de pays producteurs et consommateurs d'opium, et soit défendu à toute personne privée.

M. de Jongh propose l'adoption de la première de ces Résolutions. Le Premier Délégué du Japon demande si la Délégation Néerlandaise considère cette résolution comme un amendement à celles qui viennent d'être présentées par les deux Délégations Américaine et Britannique réunies et adoptées par la Commission. M. de Jongh répond que, dans son esprit, ce n'est pas un amendement, mais une résolution basée sur des principes plus larges; cependant il serait peut-être possible de les comprendre dans un texte unique. A l'avis de la Délégation Japonaise les deux résolutions sont incompatibles, et telle est aussi l'opinion du Premier Délégué de la Grande-Bretagne qui critique les différentes dispositions de la proposition néerlandaise, toutes inutiles ou inopportunes à son avis. Le Dr. Hamilton Wright propose que la Résolution en question soit retirée de la discussion, et soit rapportée sous forme de Déclaration de la Délégation néerlandaise au procès-verbal. Elle aurait sous cette forme à peu près le même effet que si elle était adoptée comme Résolution par la Commission. Cette suggestion, acceptée par M. de Jongh, est approuvée par l'assemblée.

M. de Jongh propose alors l'adoption de sa seconde résolution. Une nouvelle discussion s'ensuit, les dispositions de ce texte paraissant inacceptables à certains tandis que leur utilité est reconnue par d'autres Délégations. Finalement il est entendu que, de même que pour la première, il y aurait lieu d'incorporer cette résolution dans le procès-verbal sous forme de déclaration.

La Délégation chinoise présente à la Commission quatre Résolutions. En les soumettant à l'Assemblée dans leur ensemble, M. T'ang Kouo-an prononce un discours éloquent où il expose le point de vue chinois sur la question de l'opium.

Pour la Chine le problème de l'opium est une des questions économiques et morales les plus aigues qu'elle ait à traiter actuellement en tant que nation. Elle sait que la solution dépend d'elle principalement et a mesuré toutes les difficultés, calculé le prix; elle s'est déterminée à se débarrasser du fléau de l'opium coûte que coûte; elle n'oublie pas cependant qu'une collaboration internationale est essentielle au succès.

La Délégation Chinoise est heureuse de constater la présence des Délégués de la Grande-Bretagne, le pays qui avec la Chine a le plus grand intérêt dans la question de l'opium, et qui a accueilli avec tant de sympathie les propositions chinoises depuis deux années; la présence des Délégués de l'Amérique, ce pays qui a donné en convoquant cette réunion une si grande marque d'amitié désintéressée; de ceux de l'Allemagne, de la France, de la Russie, à l'action desquelles la Chine se plaît à rendre hommage ainsi qu'aux autres contrées qui ont bien voulu se faire représenter. La Chine est heureuse de se sentir entourée de toutes ces sympathies et se sent assurée de la coopération internationale qui lui est nécessaire.

On pourrait douter que la Chine soit capable de prendre en main elle-même le problème de l'opium, mais l'action déterminée du Gouvernement et des Hauts Fonctionnaires est soutenue par le sentiment public qui a été remué jusque dans ses fondements. Avec l'appui de ce sentiment la question financière elle-même, qui était susceptible de neutraliser les efforts tentés, paraît pouvoir être résolue facilement car le peuple acceptera sans difficulté les taxes de remplacement nécessaires.

Il faut pourtant se hâter, car il est difficile de garder au sentiment public toute son intensité pendant une période étendue. Quand un peuple est préparé à abolir un mal, le remède doit être apporté sans aucun retard. Tout délai augmente les difficultés.

Entrer dans la description des effets de l'opium en Chine est inutile. Les chefs du peuple chinois regardent cette drogue comme un ennemi dangereux de la nation, et la plus grande partie des dix-huit Provinces en est infestée. Dans le Kansou, l'Evêque Catholique, Mgr. Otto admet que six hommes sur huit sont confirmés dans l'habitude de l'opium!

La Chine se voit imposer par l'opium un fardeau économique qu'elle ne peut plus supporter. Elle dépense pour la drogue une somme que l'on peut évaluer à Tls. 250.000.000; la culture du pavot la prive du bénéfice d'autres cultures qui rapporteraient au bas mot Tls. 150.000.000, soit déjà une perte annuelle de Tls. 400.000.000 et si l'on y ajoute la perte subie sous forme de diminution de productivité des fumeurs on peut admettre que l'opium coûte plus de Tls. 800.000.000 par an à la Chine. Ces pertes n'affectent pas seulement la Chine mais encore toutes les principales nations du monde, car au premier rang des causes qui retardent l'essor du commerce de la Chine avec les Puissances étrangères se trouve la pauvreté et le rendement inférieur de la population chinoise, deux facteurs qui n'en font qu'un seul en réalité, et qui sont terriblement aggravés par le fléau de l'opium. Revenue à un état normal et développant son commerce dans la même proportion que le Japon a pu le faire, la Chine devrait importer plus de 3 milliards de taëls de produits étrangers chaque année au lieu des 450 millions qu'elle absorbe actuellement. En regard de ce développement presque illimité, que doit peser la valeur présente du commerce de l'opium? Ce serait une folie commerciale que de maintenir ce trafic qui forme à peine 7½% du commerce extérieur chinois aux dépens de l'expansion future de ce commerce extérieur. C'est pourquoi la Délégation Chinoise se croit justifiée en comptant sur la plus large coopération internationale.

Il ne faut pas oublier non plus que, si l'on manque de tirer tout le parti possible du mouvement d'opinion actuel on portera un coup peut-être irrémédiable à l'élément réformiste et progressiste chinois, et qu'on retardera d'autant l'essor de cette contrée, essor dont les autres nations sont appelées à tirer un si grand bénéfice.

N'est-il pas évident aussi que l'opiomanie fait beaucoup pour retarder l'entrée de la Chine dans le Concert des Nations, et pour l'empêcher même de se sentir digne de faire partie de cette grande famille internationale? La Chine est entrée dans la voie des réformes et du progrès; elle se prépare à sa vie et à ses responsabilités nouvelles, et a l'ambition d'arriver à tenir parmi les nations une place digne de celle qu'elle a occupée dans l'histoire lorsqu'elle a répandu sa civilisation au delà de ses frontières dans la Mongolie, la Mandchourie, la Corée, le Japon, le Thibet, le Siam, la Cochinchine et même dans la Birmanie et dans l'Inde.

La Chine espère donc la coopération la plus complète de tous les pays civilisés dans ses efforts pour se débarrasser de l'opium, et elle compte que toute restriction, existant dans les Traités, qui serait de nature à gêner ces efforts, ne sera pas invoquée par les intéressés, fussent quelques intérêts privés en souffrir.

Enfin la Chine, comme les autres Puissances, considère la question de l'opium comme une question morale surtout, et c'est à ce point de vue que la campagne contre cette drogue a obtenu d'attirer et retenir l'attention du peuple chinois; la campagne anti-opium a été morale et patriotique; l'agitation semble être le prélude d'une puissante résurrection politique, sociale et commerciale; avec tous les défauts de son éducation la Chine a gardé un grand fonds de sentiment et de morale tiré de l'étude de Confucius et de Mencius. C'est sa grande force quand elle aborde un problème aussi compliqué, et cette force se double, à l'extérieur, d'une autre grande force de même nature, la conscience chrétienne. C'est avec cet appui que l'on peut entreprendre cette immense croisade morale du XXe siècle.

Après ce discours de M. T'ang, le Dr. Tenney propose que la discussion des Résolutions chinoises soit remise à la prochaine séance, ce qui est adopté sans difficulté.

Sir A. Hosie présente le rapport du Comité nommé pour réunir les éléments parsemés dans les divers Rapports sur la culture du pavot et la production de l'opium, après quoi la Commission lève la séance en fixant la prochaine réunion au 25 février, à 10h. 30.

TREIZIÈME SÉANCE,

25 FÉVRIER 1909.

La séance est ouverte à 10h.30 du matin.

Le Président donne lecture d'une lettre reçue du Délégué italien qui regrette de ne pouvoir assister à la séance pour cause de maladie, ainsi que d'une communication de M. Charles B. Towns qui dépose entre ses mains une formule pour guérir les opiomanes.

Le Dr. Tenney lit le sommaire du rapport, corrigé depuis la dixième séance, composé par le Comité sur les Accords et Traités Internationaux existant au sujet du trafic de l'opium. Le Premier Délégué du Portugal fait remarquer que ce rapport laisse de côté l'accord sino-portugais relatif au commerce et à la contrebande de l'opium à Macao ; le Président invite le Comité à tenir compte de cette observation dans la rédaction définitive de son rapport.

L'ordre du jour appelle alors la discussion des résolutions chinoises dont le texte, est ainsi conçu :

1.—La Commission, reconnaissant l'ardeur du Gouvernement et du peuple chinois dans leur désir de déraciner la production et la consommation de l'opium à travers l'Empire, et admettant qu'un certain progrès a déjà été accompli dans cette direction, est d'accord pour recommander que, en vue d'aider la Chine à résoudre aussi rapidement et aussi efficacement que possible la tâche immense qu'elle a entreprise, tous les Délégués assemblés dans cette Commission pousseront leurs Gouvernements respectifs à promettre leur coopération et à se déclarer prêts à réduire l'importation de l'opium en Chine *pari passu* avec la réduction de la culture du pavot dans les limites de cette contrée.

2.—La Commission Internationale de l'opium recommande vivement à tous les Gouvernements possédant des Concessions ou Settlements en Chine qui n'ont pas encore agi effectivement pour la fermeture de toutes les fumeries et de tous les débits d'opium dans lesdits Settlements et Concessions, de prendre dans ce but des mesures similaires à celles qui ont déjà été adoptées par plusieurs Gouvernements.

3.—La Commission Internationale de l'opium recommande fortement à tous les Gouvernements possédant des Concessions ou Settlements en Chine de prendre les mesures nécessaires pour prohiber dans lesdits Settlements ou Concessions la vente, sous quelque forme que ce soit, de remèdes contre l'opium contenant de l'opium, de la morphine ou aucun de leurs dérivés.

4.—La Commission Internationale de l'opium reconnaît les maux immenses actuellement causés à la population chinoise par l'usage des injections de morphine et signale aux différents Gouvernements prenant part à la Commission le besoin urgent de faire immédiatement des lois prohibant l'importation et la vente de la morphine et dérivés ainsi que des seringues hypodermiques à tous leurs sujets ou citoyens en Chine, à l'exception de la vente à des praticiens dûment qualifiés et pour un usage exclusivement médical. La Commission recommande également que les dites lois, lorsqu'elles seront passées, prévoient la punition adéquate de toute contravention à leurs stipulations par lesdits sujets ou citoyens, et qu'il soit bien compris que la possession, sans autorisation, de morphine, de ses dérivés ou de seringues hypodermiques sera considérée *prima facie* comme une preuve suffisante de culpabilité.

M. T'ang propose d'abord l'adoption de la première de ces Résolutions.

Sir C. Clementi Smith fait une déclaration pour exprimer ses regrets de ne pouvoir soutenir une résolution qui, de toute évidence lui paraît sortir des attributions de la Commission, et ajoute que la Délégation britannique ne retire rien de la sympathie qu'elle a exprimée dès le début ; il pense que l'aide et la coopération active fournie à la Chine par la Grande-Bretagne comptera infiniment plus que n'importe quelle déclaration irresponsable à laquelle sa Délégation pourrait se laisser entraîner.

M. Miyaoka exprime sa satisfaction très sincère pour la déclaration sympathique du premier Délégué Britannique dont la Chine saura, croit-il apprécier le prix.

M. T'ang-kouo-an dit que la délégation chinoise n'insiste pas pour la mise aux voix de la première de ses résolutions, mais exprime le désir de la voir incorporée dans le rapport de la Commission comme exprimant les vues de la Délégation chinoise et du peuple chinois.

M. T'ang propose alors l'adoption de la seconde Résolution rédigée par la Délégation Chinoise.

M. Ratard, Premier Délégué de France, demande si l'intention de la Délégation Chinoise est bien de demander la fermeture des débits en même temps que des fumeries d'opium. Jusqu'à présent il avait cru le contraire. D'autre part il ajoute que le contrat pour Kouan-tcheou-ouan est obligatoire jusqu'en 1911 et que le Gouvernement français ne peut songer à le rompre. Il suggère donc que les mots "et de tous les débits" soient supprimés, et que les mots "aussitôt qu'ils le jugeront utile" soient ajoutés après les mots "de prendre dans ce but."

M. Miyaoka saisit l'occasion de cette discussion pour déclarer que contrairement à un passage du rapport de Leech, il n'existe plus aucune fumerie japonaise d'opium à Antoung.

M. T'ang, répondant à M. Ratard, admet la suppression des mots "et de tous les débits" car l'opinion du Gouvernement Chinois est bien que les débits ne pourront être fermés que concurremment avec l'abandon de l'habitude de fumer. Il considère que les dangers d'incendie, auxquels M. Ratard a fait allusion dans sa première déclaration sur l'opium dans la Concession française de Shanghai, ne sauraient être un argument sérieux pour maintenir les fumeries, car les statistiques des Compagnies d'assurance démontrent que le nombre des incendies dus aux lampes des fumeurs à domicile est pratiquement nul. L'existence de fumeries sur la Concession française exerce une action décourageante sur les Chinois qui en sont informés par la Presse jusqu'aux confins de l'Empire. Il fait un pressant appel au sentiment de la justice internationale chez les Français et espère qu'ils ne refuseront pas de fermer les fumeries dans la Concession.

M. Ratard répond que des mesures ont été prises dès la publication de l'Édit Impérial, et qu'elles ont déjà eu un certain résultat. La Concession française est décidée à fermer les fumeries aussitôt qu'elle aura la preuve que la Chine a réellement fermé les siennes.

Il est procédé alors à un vote par appel nominal sur l'amendement proposé par M. Ratard, le résultat étant six voix pour et cinq voix contre, le Délégué d'Autriche-Hongrie déclarant réserver son vote. Une discussion s'élève alors sur la possibilité de maintenir cette réserve qui arrête la discussion, et sur le temps qu'elle pourra durer. Pour résoudre cette difficulté, M. Miyaoka demande à la Délégation Chinoise de faire quelque concession afin d'entrer dans les vues de M. Ratard. M. T'ang propose alors de modifier l'amendement de M. Ratard en substituant les mots "aussitôt que possible" aux mots "aussitôt qu'ils le jugeront utile," et exprime l'espoir que la France ne se laissera pas arrêter par des considérations d'intérêt privé.

M. Ratard déclare ne pouvoir accepter les mots "aussitôt que possible" dont le sens est trop impératif; il proteste énergiquement contre l'allusion offensante faite par M. T'ang à des "intérêts privés," affirmant que des considérations de cet ordre n'entrent absolument pour rien dans les motifs de la politique suivie par la Concession française à propos des fumeries d'opium. Le Président déclare que ces paroles de M. T'ang doivent être retirées, et M. T'ang explique qu'il n'a pas voulu dire que l'intérêt personnel d'aucun individu pourrait être pris en considération, mais bien l'intérêt privé de la Concession au point de vue de ses recettes budgétaires.

Sur une nouvelle intervention du Dr. Roessler et du Dr. Hamilton Wright, M. T'ang accepte l'amendement de M. Ratard, en substituant le mot "possible" au mot "utile."

Cet amendement, avec cette nouvelle rédaction: "aussitôt qu'ils le jugeront possible" est mis aux voix et adopté alors à l'unanimité.

M. T'ang propose ensuite l'adoption de la troisième Résolution Chinoise en redisant que les soit-disant pilules contre l'opium, qui contiennent de l'opium, de la morphine ou tout autre dérivé de l'opium, se répandent avec une rapidité inquiétante, et que plusieurs nationalités étrangères prennent une très grande part à ce commerce, spécialement le Japon.

M. Miyaoka déclare que cette Résolution a la sympathie de la Délégation Japonaise, mais regrette que l'existence de fabriques japonaises et d'un commerce japonais des pilules en question n'ait pas été signalée plus tôt au Gouvernement Japonais. Au cours de l'enquête faite par sa Délégation ce sujet a attiré son attention et des analyses sont faites actuellement à Tokio. Mais, comme aucune communication n'a été faite à cet égard aux fonctionnaires Japonais résidant en Chine, et qui étaient tout désignés pour être saisis de la question, M. Miyaoka ne croit pas pouvoir appuyer la Résolution dont il s'agit, et espère que la Délégation Chinoise voudra bien la retirer.

En réponse à une demande de M. Ratard, M. T'ang reconnaît que les docteurs et médecins chinois n'ayant pas fait d'études occidentales ne peuvent pas être considérés comme des praticiens qualifiés pour ordonner ou non l'usage de la morphine.

M. Ratard pense que le sujet de la Résolution serait mieux traité par la voie diplomatique qu'au sein de cette Commission. M. Miyaoka, le Dr. Hamilton Wright partagent cet avis, mais ce dernier pense que l'adoption d'une Résolution relative aux pilules contre l'opium ne pourra que hâter la négociation. M. T'ang insiste sur ce point que les pilules ne sont encore visées par aucune loi ni aucun traité, au contraire de l'opium et de la morphine. Le premier Délégué de France pense qu'il est difficile d'intervenir dans ce commerce; en France une pareille intervention ne peut être autorisée que par une loi, et même un Traité, signé à ce sujet, devrait être soumis au Parlement pour sa ratification. Il propose, comme amendement que la Résolution soit rédigée dans les termes suivants:

"La Commission recommande fortement que chaque Délégation incite son Gouvernement à entrer en négociations avec le Gouvernement chinois dans le but que des mesures promptes et effectives soient prises dans les diverses Concessions ou Settlements pour prohiber le commerce et la fabrication de remèdes contre l'opium qui contiendraient de l'opium ou aucun de ses dérivés."

Cette nouvelle rédaction, acceptée par la Délégation chinoise est adoptée à l'unanimité.
La séance est levée à 12h.30.

A la reprise, à 2h.30 l'ordre du jour appelle la discussion de la quatrième résolution chinoise. Dans sa forme originelle, elle n'avait pas paru acceptable à la majorité des Délégations et, sur la suggestion des Délégués américains, elle est présentée après modifications et ainsi conçue :

“La Commission recommande fortement que chaque Délégation incite son Gouvernement à appliquer ses lois sur la pharmacie à ses sujets dans les districts consulaires, Concessions ou Settlements en Chine.”

Ainsi amendée cette résolution est acceptée à l'unanimité. (N. B. La Délégation portugaise a réservé son vote dans toutes ces décisions. Le vote de la Délégation italienne n'a pas été donné, M. Faraone étant absent.)

Le Premier Délégué de la France lit des extraits de deux lettres qu'il a reçues du Szechouen d'après lesquelles la culture du pavot continue dans cette province comme par le passé. Il lit ensuite la déclaration suivante :

“Bien que ni l'Indo-Chine française ni la France ne soient des pays producteurs d'opium et que l'usage de l'opium, pratiquement inconnu en France, ne fasse en Indo-Chine pour ainsi dire aucun ravage dans les populations indigènes.

“La Délégation tient à déclarer avant la clôture des travaux de la Commission Internationale de l'Opium.

“(1) Qu'en ce qui concerne l'Indo-Chine française l'administration française continuera à tenir fermement la main à l'observation des prescriptions exposées dans la note qui a été présentée à la Commission et dont l'effet a été déjà de réduire dans une très notable proportion les importations de l'opium brut et la consommation du chandoo.

“(2) Qu'en ce qui concerne Quang-tcheou-wan où le Gouvernement français est lié par un contrat avec la Ferme existante jusqu'à la fin de l'année 1911, les Délégués français croient de leur devoir vis-à-vis de leurs Collègues chinois d'être ici les interprètes de la ferme intention de M. le Gouverneur Général d'appliquer dans tout le Territoire de Quang-tcheou-wan des dispositions analogues à celles qui seraient effectivement prises par la Chine au moment de l'expiration de notre contrat.”

Il est décidé que les rapports non encore présentés par les divers Comités seront insérés dans le Rapport final de la Commission et les décisions nécessaires sont prises au sujet de l'exécution de ce travail. Un Comité spécial est désigné pour arrêter les derniers détails à ce sujet. Un autre Comité est également désigné pour revoir le texte des Résolutions adoptées et en présenter une rédaction définitive.

Le séance est levée à 4h.30 du soir.

QUATORZIÈME SÉANCE,

26 FÉVRIER 1909.

La séance est ouverte à 2h.30 de l'après-midi.

Le Premier Délégué du Portugal, dûment autorisé par son Gouvernement, fait la déclaration suivante :

“Considérant que ceci est une Commission d'études, le Gouvernement Portugais désire examiner avec soin le texte, les conditions et la base des propositions présentées par les différents Délégués, aussi bien que les rapports fournis par les autorités locales de ces colonies intéressées en ce qui concerne les moyens de rendre effectives les mesures désirables qui seraient adoptées, et pour ces raisons réserve sa délibération jusqu'à ce que les procès-verbaux de la Commission Internationale et les documents relatifs au sujet aient été étudiés, après quoi il communiquera sa décision à toutes les Puissances représentées à la Commission.”

Le Premier Délégué des Pays-Bas, conformément à la décision prise à la douzième séance, dépose la Déclaration suivante dans laquelle sont incorporées les Résolutions proposées originellement à l'Assemblée :

“La Délégation Néerlandaise a proposé deux Résolutions ; la première est ainsi conçue ;

..... Considérant que la suppression totale de l'usage de l'opium dans un délai de quelques années doit être considérée comme un idéal élevé mais impossible à atteindre pour le moment ;

qu'en vue de combattre l'usage de l'opium on peut attendre beaucoup de mesures prises systématiquement et ayant un effet graduel ;

qu'une pratique soigneuse de pareilles mesures ne se conçoit que si la direction des affaires d'opium est conservée en mains propres (du Gouvernement) de façon qu'aucun individu n'ait intérêt, à augmenter la vente de la drogue ;

Il est résolu de recommander aux Gouvernements des Pays où des systèmes différents sont en vigueur :—

(a) qu'il soit décidé en principe que tout ce qui regarde l'opium dans leur ressort sera dirigé par l'Etat et que l'établissement de ce système ne sera pas retardé plus longtemps que les circonstances ne l'exigeront :

(b) que, sans s'occuper de savoir si le Contrôle direct du Gouvernement a déjà été mis en vigueur ou non, les mesures suivantes soient prises immédiatement pour restreindre l'usage de l'opium.

(1) faire bien comprendre aux fonctionnaires européens ou indigènes qui sont capables d'avoir une influence sur la consommation que le Gouvernement est résolu à combattre celle-ci ;

(2) ne pas permettre à qui que ce soit faisant usage de l'opium de servir dans l'administration civile, militaire ou maritime.

(3) imprimer dans l'esprit des enfants à l'école et des adultes partout et toujours les maux résultant de l'usage de l'opium ; en un mot instruire l'opinion publique à ce sujet par tous les moyens ; afin de développer la tendance contraire à l'opium, faire appel à l'aide de sociétés privées, ayant en vue d'améliorer la moralité de parties spéciales de la population, et dont le but et les méthodes paraîtront satisfaisantes ;

(4) Prohiber la vente de l'opium aux enfants ;

(5) Donner toute publicité, y compris la vente à prix coutant, à tout remède contre l'opium au cas où un tel remède se répandrait à l'étranger qui ne contienne ni morphine ni aucun ingrédient malsain ;

(6) Maintenir s'il en existe, dans leur étendue actuelle, et si possible augmenter les surfaces soumises à la défense, en combinant ou non avec le système de donner des licences aux fumeurs habituels.

(7) Exclure de l'usage de la drogue des sections spéciales de la population.

(8) Diminuer le nombre des débits et fumeries, et diminuer le nombre d'heures pendant lesquelles ils peuvent rester ouverts ;

(9) Relever les prix de l'opium au détail.

“En expliquant ses raisons pour présenter cette Résolution, le Premier Délégué des Pays-Bas attire l'attention de l'Assemblée sur les deux premières sections du préambule où il est dit que “la suppression totale de l'usage de l'opium dans un délai de quelques années doit être considérée comme un idéal élevé mais impossible à atteindre pour le moment,” et plus loin que “en vue de combattre l'usage de l'opium on peut attendre beaucoup de mesures prises *systématiquement* et ayant un effet *graduel*” ; il continue son discours ainsi : “jugeant d'après l'expérience acquise aux Indes Néerlandaises, notre Délégation est d'avis que la meilleure manière d'atteindre cet objet est l'établissement d'un système d'opium dirigé par des fonctionnaires qui ne sont aucunement intéressés dans le montant des ventes. Comme il est montré dans l'appendice III au memorandum sur la Régie de l'opium aux Indes Néerlandaises, présenté en même temps que notre Rapport, sous ce système, pendant une période de quinze années, la consommation moyenne annuelle de chandoo par tête d'habitant à Java est tombée de 0.042 tahlil à 0.025 tahlil, soit une diminution d'un peu plus de 40%. Je rappelle que cette diminution a eu lieu graduellement et que par conséquent il y a de bonnes raisons de croire qu'elle sera durable et se développera progressivement.

“La Délégation Néerlandaise, basée sur ces faits, fière du système de la Régie de Java et profondément convaincue de son utilité à d'autres égards, a pris la liberté de présenter le memorandum précité dans le but d'exposer les principes sur lesquels ce système est basé, et avec l'espoir que l'étude de ce memorandum pourrait inciter d'autres Gouvernements à pratiquer le même système dans leurs territoires et possessions aussitôt que les circonstances leur permettraient de supprimer les systèmes de ferme ou de libre commerce de l'opium.

“En ce qui concerne la seconde partie de cette Résolution, j'ai l'honneur d'attirer l'attention de l'Assemblée sur ce fait que les Résolutions adoptées jusqu'à présent s'occupent de la contrebande, de la morphinomanie, de l'étude du côté médical de la question de l'opium, de l'opportunité de réexaminer les systèmes en vigueur de recettes d'opium, de complimenter le Gouvernement Chinois pour ce qui a été fait pendant les deux dernières années en vue de combattre l'usage de l'opium dans son Empire, et enfin d'une recommandation à nos Gouvernements les invitant à prendre des mesures pour la suppression graduelle de la pratique de fumer l'opium.

“Jusqu'à présent aucune Résolution n'a été proposée pour suggérer des mesures définies sur le sujet qui, dans la correspondance diplomatique était indiqué comme l'objet principal de notre Commission : *chercher les moyens de limiter l'usage de l'opium*. En rejetant cette tâche sur les épaules des différents Gouvernements, notre Commission ne fait pas ce qu'on attend d'elle. C'est pourquoi ce sera peut-être contribuer grandement à un résultat pratique que de présenter une Résolution recommandant des mesures définies à cet effet. On peut considérer comme rentrant dans cette catégorie de mesures celles qui ont été énumérées sous les numéros 1 à 9 de notre Résolution proposée, et qui, en partie ont déjà été appliquées à Java depuis de longues années, en partie ont été récemment prises en considération, afin de montrer au monde, qui attend des résultats pratiques, que notre Commission n'a pas négligé de donner quelques avis pratiques pour une solution satisfaisante de la question de l'opium. C'est pourquoi la Délégation Néerlandaise croit utile que la seconde partie de cette Résolution soit adoptée.

“Je ne crois pas nécessaire d'en dire plus long à propos de ces mesures qui s'expliquent d'elles mêmes. Je suis prêt cependant à donner toute information complémentaire qui serait demandée.”

“La seconde Résolution est ainsi conçue :

“Considérant que la contrebande de l'opium va à l'encontre des mesures variées prises par les divers Gouvernements en vue de combattre l'usage de l'opium ;

que la contrebande cause de grandes pertes aux Trésors, et de plus nécessite de grandes dépenses pour la combattre ;

qu'elle a un effet démoralisant à la fois sur les individus qui se livrent à ce commerce et sur les officiers de Douanes et de Police ;

que l'expérience enseigne que la contrebande de l'opium, a cause de la grande valeur de ce produit sous un petit volume, est extrêmement difficile à combattre par les moyens employés jusqu'à ce jour individuellement par les divers Gouvernements ;

qu'il y a lieu en conséquence de s'efforcer de supprimer la contrebande par une action concertée des divers Gouvernements ;

et qu'une pareille action internationale n'est possible qu'après que dans tous les Pays l'opium aura été pris en mains propres (des Gouvernements) ;

Il est résolu :

de recommander aux divers Gouvernements, après qu'ils auront établi un système de contrôle direct de l'opium, d'entrer en négociations, par la voie diplomatique, dans le but que par la suite le Commerce en gros de l'opium ne sera permis qu'entre les Gouvernements de pays producteurs et consommateurs d'opium, et sera défendu à toute personne privée.

"Au sujet de cette Résolution le Premier Délégué des Pays-Bas dit que son objet est de marquer le désir de supprimer la contrebande de l'opium en prohibant le commerce de la drogue entre particuliers, ce qui toutefois n'est possible qu'après que la direction du Monopole de l'opium aura été prise par chaque Gouvernement intéressé en mains propres.

"L'expérience a enseigné que la contrebande de l'opium (qui, pour les raisons exposées dans le préambule, est un grand mal en elle-même) ne peut pas être complètement extirpée aussi longtemps que l'opium reste un article ordinaire de commerce et par conséquent passe par les mains de négociants en gros particuliers et de là aux mains des contrebandiers qui achètent la marchandise.

"En conséquence il est urgent que le commerce de l'opium soit retiré des mains de ces personnes et confié exclusivement aux Gouvernements des Pays producteurs ou consommateurs. Cette mesure peut faire un bien immense pour la solution du problème de l'opium, et par conséquent, à notre avis, elle doit, dans cette occasion, être recommandée aux Gouvernements intéressés, même si la réalisation de son principe ne doit être possible que dans l'avenir."

M. Miyaoka lit une réponse à la question posée par la Délégation chinoise au cours de la séance précédents. Il répond aussi à une question que le Dr. Tenney lui avait posée en particulier au sujet de la morphine réexportée du port de Kobé (Cf. à la suite des rapports)

M. Laidlaw dépose le Rapport du "Comité sur les statistiques de commerce." Le Comité de Revision soumet alors les résolutions à l'approbation finale de la Commission. Après un léger changement dans l'ordre de leur présentation elles sont dument adoptées.

Sur la proposition de Sir C. Clementi Smith il est décidé que le texte des Résolutions sera signé par le Président au nom de la Commission.

En félicitant chaleureusement le Président de l'heureuse issue des travaux de la Commission, Sir C. Clementi Smith propose la résolution suivante, adoptée par acclamation :

"La Commission présente ses remerciements cordiaux au T. R. Evêque Brent pour la dignité, l'impartialité et l'habileté avec lesquelles il s'est acquitté de ses devoirs de Président de la Commission Internationale de l'Opium."

Répondant à cette manifestation, le Président remercie l'Assemblée de la dignité et de la courtoisie qu'elle n'a cessé de montrer pendant tout le cours des débats. Sa tâche dit-il a été très facile car dans cette période de moins d'un mois, il semble que les représentants de 13 nationalités différentes se soient coulés dans le moule d'une grande famille. C'est là un bon signe pour l'avenir.

Il félicite l'Assemblée non seulement de ce que ses Résolutions ont été prises à l'unanimité, mais aussi de ce que quatre d'entre elles invitent une nation particulière à agir dans l'intérêt d'une autre nation, ce qui montre jusqu'où va présentement la sympathie des relations entre les Nations des deux mondes. Les Nations sont plus que jamais conscientes de leurs droits souverains, mais elles ont de plus en plus de considération pour le bien-être des Nations voisines, et sont prêtes à faire des sacrifices locaux pour le bien universel.

Le Président rappelle le travail accompli par la Commission : dépôt et discussion des Rapports de chaque Pays, rédaction de Rapports Internationaux sur plusieurs sujets particuliers, adoption de Résolutions.

Ces dernières touchent aux différents aspects de la question de l'opium, sans que le sujet soit cependant épuisé. En deux circonstances la Commission s'est déclarée incompétente : elle a repoussé la proposition de faire elle-même une enquête scientifique, et refusé de toucher aux Traités Internationaux existant.

On pourrait croire que la Commission a négligé l'aspect moral de la question de l'opium. Il n'en est rien, car ce point de vue, parfois exprimé, a toujours été présent à l'esprit de tous les Délégués. Mais la sympathie de la Commission pour les victimes de l'opium ne n'est pas contenté d'être purement émotionnelle ; elle s'est manifestée d'une façon plus virile sous forme de mesures pratiques pour secourir ces victimes. De même que le biologiste en son laboratoire travaille pour le bien de l'humanité, ainsi, derrière les statistiques revêches et les froides expressions des délibérations et des Résolutions de la Commission, se retrouvait la pensée de la pitoyable armée d'esclaves moraux pour le bien desquels la Commission travaillait.

Il reste encore beaucoup à faire après la dissolution de cette Commission, mais, le Président en exprime la confiance, c'est déjà beaucoup d'avoir déterminé ce qui est bien, ce qui est le droit, car le droit porte en lui-même une force qui le fait triompher en définitive.

M. Miyaoka propose un vote de remerciements aux Secrétaires dans les termes suivants :

“Avec votre permission et l'indulgence des membres de la Commission Internationale, j'ai l'honneur d'exprimer ici combien nous apprécions les services rendus par les Secrétaires. Je n'ai pas besoin d'appeler votre attention sur le soin, la diligence et l'énergie qu'ils ont déployés dans l'accomplissement de leur lourde charge. En raison de circonstances locales, auxquelles nous ne pouvions rien, ils ont dû se contenter de l'aide d'un personnel qu'on ne peut, en regard du travail qui leur incombait, hésiter à déclarer trop peu nombreux. En considérant ce qu'ils ont déjà fait et ce qu'il leur reste à faire comme ce qu'ils accomplissent à l'heure actuelle, nous ne pouvons pas rester aveugles à l'entrain qu'ils ont apporté, ainsi que leur personnel à l'accomplissement de leur tâche.

A cet égard il me sera permis de remarquer aussi que les appels faits par les Diverses Délégations aux bons offices des Secrétaires ont été fréquents et nombreux. Ces appels à leur assistance ont été invariablement reçus non seulement avec la plus parfaite courtoisie de leur part, mais aussi avec cet empressement naturel qui a commandé l'admiration de chacun. Je suis donc persuadé que j'interprète exactement le sentiment général en proposant que des remerciements cordiaux soient offerts par la Commission Internationale de l'Opium à ses Secrétaires et à leur personnel, et que ce vote soit consigné dans les procès-verbaux de nos séances.”

Le Président constate que cette proposition est adoptée par acclamations.

Une discussion s'élève sur l'opportunité de rendre publiques, en les communiquant à la Presse, les Résolutions adoptées par la Commission. Finalement il est décidé que la publication sera retardée jusqu'à ce qu'elle ait été autorisée par le Gouvernement de chaque pays ou de l'un des Pays intéressés.

Après avoir exprimé au nom de la Commission ses remerciements à la Délégation chinoise pour l'hospitalité qu'elle a offerte à la Commission en aménageant la salle de réunion, le Président annonce que les travaux de la Commission sont terminés et déclare l'assemblée ajournée *sine die*.

(Signé) FRED. W. CAREY,

(Signé) XAVIER DE LAFORCADE,

Secrétaires.

*TEXTE DES RÉSOLUTIONS ADOPTÉ DANS LA SÉANCE
FINALE.*

1. **La** Commission reconnaît la sincérité inébranlable du Gouvernement Chinois dans ses efforts pour déraciner la production et la consommation de l'opium à travers l'Empire ; l'importance croissante de la partie de l'opinion publique qui, parmi ses ressortissants, fait corps pour soutenir ces efforts ; et le progrès, réel bien qu'inégal, déjà accompli dans une tâche qui est d'une ampleur immense.

2. **En** vue de l'action exercée par le Gouvernement Chinois pour supprimer la pratique de fumer l'opium et par d'autres Gouvernements dans le même but, la Commission Internationale de l'opium recommande que chaque Délégation intéressée incite son Gouvernement à prendre des mesures pour la suppression graduelle de la pratique de fumer l'opium dans ses Territoires et Possessions en tenant compte des circonstances variables pour chaque Pays intéressé.

3. **La** Commission Internationale de l'Opium trouve que l'usage de l'opium, sous quelque forme que ce soit, autre que l'usage médical, est considéré par presque tous les Pays représentés comme devant être prohibé ou soigneusement réglementé ; et que chaque Pays, dans l'administration de son système de Règlementation, entend avoir pour but, selon les circonstances, d'augmenter progressivement les restrictions. En formulant ces conclusions la Commission Internationale de l'opium reconnaît la grande diversité des conditions prévalant dans les différentes contrées, mais elle attire l'attention des Gouvernements intéressés sur l'opportunité d'un nouvel examen de leur système de règlementation à la lumière de l'expérience des autres Pays qui ont à traiter le même problème.

4. **La** Commission Internationale de l'opium trouve que chacun des Gouvernements représentés a des lois strictes dont le but direct ou indirect est d'empêcher sur leurs territoires respectifs l'entrée en contrebande de l'opium, de ses alcaloïdes, préparations et dérivés ; dans l'opinion de la Commission Internationale de l'Opium, c'est aussi un devoir pour tous les Pays d'adopter des mesures raisonnables en vue d'empêcher, aux ports de sortie, l'embarquement d'opium, de ses alcaloïdes, préparations et dérivés, à destination d'un Pays qui interdit l'entrée sur son territoire de l'opium, de ses alcaloïdes, préparations ou dérivés.

5. **La** Commission Internationale de l'opium trouve que le manque de restrictions à la fabrication, à la vente et à la distribution de la morphine constitue d'ores et déjà un grave danger et que la morphinomanie tend à se répandre : la Commission, en conséquence désire insister fortement auprès de tous les Gouvernements sur l'importance que présenterait l'adoption de mesures draconiennes par chaque Gouvernement sur son propre Territoire et dans ses Possessions pour contrôler la fabrication, la vente et la distribution de cette drogue ainsi que des autres dérivés de l'opium qu'une enquête scientifique pourrait signaler comme susceptibles d'abus semblables et de mauvais effets similaires à ceux de l'opium.

6. **La** Commission Internationale de l'Opium n'est pas constituée de façon à permettre d'entreprendre une enquête à un point de vue scientifique sur les remèdes contre l'opium et sur les propriétés et les effets de l'opium et de ses produits, mais considère qu'une enquête de ce genre serait de la plus haute importance ; elle désire en conséquence que chaque Délégation recommande cette branche du sujet à son Gouvernement pour que celui-ci prenne telles mesures qu'il croira nécessaire à cet égard.

7. **La** Commission Internationale de l'Opium recommande vivement à tous les Gouvernements, possédant des Concessions ou Settlements en Chine, qui n'ont pas encore agi effectivement pour la fermeture immédiate de toutes les fumeries d'opium dans lesdits Settlements et Concessions, de prendre dans ce but aussitôt qu'ils le jugeront possible des mesures similaires à celles qui ont déjà été adoptées par plusieurs Gouvernements.

8. **La** Commission Internationale de l'opium recommande fortement que chaque Délégation incite son Gouvernement à entrer en négociations avec le Gouvernement Chinois dans le but que des mesures promptes et effectives soient prises dans les diverses Concessions ou Settlements en Chine pour prohiber le commerce et la fabrication de remèdes contre l'opium qui contiendraient de l'opium, ou aucun de ses dérivés.

9. **La** Commission Internationale de l'Opium recommande que chaque Délégation incite son Gouvernement à appliquer ses lois sur la Pharmacie à ses sujets dans les districts consulaires, Concessions et Settlements en Chine.

America, United States of.

February 5th, 1909.

MR. PRESIDENT:

The American Opium Commission presents its Report on the Opium Question as it affects our States, Territories and the District of Columbia and the Possessions under our flag.

We propose to deploy our data under the following heads:—

NATIONAL.

TREATIES, with other Governments engaging us in regard to opium traffic.

TARIFFS, under which we import opium into the United States, its Territories and the District of Columbia.

EXCISE LAWS, governing the manufacture of Smoking Opium.

STATUTES, that restrain our citizens from engaging in the Opium trade.

EFFECT, of our Treaties and Tariffs on our trade in Opium.

OUR OPIUM, and where we get it.

SMOKING OPIUM, and our Chinese population.

GROWTH, of the Poppy within the United States, its Territories and the District of Columbia.

DISPOSITION, of our imported Opium.

FEDERAL LAWS, governing the use of Opium and its derivatives.

STATE LAWS, governing the use of Opium and its derivatives.

MUNICIPAL LAWS, governing the use of Opium and its derivatives.

FINAL DESTINATION, of our Opium imported ostensibly for medicinal purposes.

FINAL DESTINATION, of our imports of Smoking Opium.

RECENT EFFECT, of our National, State and Municipal laws bearing on Opium and its derivatives.

REVENUE, derived from import and excise duties on Opium.

PRESENT STATUS, of our laws on Opium of various sorts.

PORTO RICO.

CUBA.

INTERNATIONAL, needs to make our recent law effective.

THE PHILIPPINES.

TREATIES.

Our country has two treaties with China that engage us in regard to opium and its derivatives:

CHINA.

(1) The "Immigration and Commercial Treaties between the United States and China" of 1880. Article II of the "Commercial Treaty" stipulates that:

“The Governments of China and of the United States mutually agree and undertake that Chinese subjects shall not be permitted to import opium into any of the ports of the United States; and citizens of the United States shall not be permitted to import opium into any of the open ports of China, to transport it from one open port to any other open port, or to buy and sell opium in any of the open ports of China. This absolute prohibition, which extends to vessels owned by the citizens or subjects of either power, to foreign vessels employed by them, or to vessels owned by the citizens or subjects of either power, and employed by other persons for the transportation of opium, shall be enforced by appropriate legislation on the part of China and the United States; and the benefits of the favored nation clause in existing treaties shall not be claimed by the citizens or subjects of either power as against the provisions of this article.

It will be seen from this Article II of the “Commercial Treaty” of 1880, that the two Governments concerned undertook without any limitation or qualification whatever, to forbid the importation of opium into the United States by Chinese subjects; the importation by American citizens of opium into any of the open ports of China, or its transportation from one open port to another, or the buying or selling of opium in any such open ports, etc. When this Article was negotiated it was recognized by both parties that it would be necessary for the United States in Congress assembled to pass a statute providing for the trial and punishment of its citizens offending against the provisions of this treaty. In 1887 Article II of the Treaty of 1880 was made effective when Congress passed the following statute:—

AN ACT TO PROVIDE FOR THE EXECUTION OF THE PROVISIONS OF ARTICLE TWO OF THE TREATY CONCLUDED BETWEEN THE UNITED STATES OF AMERICA AND THE EMPEROR OF CHINA ON THE SEVENTEENTH DAY OF NOVEMBER, EIGHTEEN HUNDRED AND EIGHTY, AND PROCLAIMED BY THE PRESIDENT OF THE UNITED STATES ON THE FIFTH DAY OF OCTOBER, EIGHTEEN HUNDRED AND EIGHTY-ONE

(Act of February 23rd, 1887, ch., 210, 24 Stat. L. 409.)

- (Sec. 1) (Importation of opium by Chinese prohibited.) That the importation of opium into any of the ports of the United States by any subject of the Emperor of China is hereby prohibited. Every person guilty of a violation of the preceding provision shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine of not more than five hundred dollars nor less than fifty dollars, or by imprisonment for a period of not more than six months nor less than thirty days, or by both such fine and imprisonment, in the discretion of the court. (24 Stat. L. 409.)
- (Sec. 2) (Forfeiture.) That every package containing opium, either in whole or in part imported into the United States by any subject of the Emperor of China, shall be deemed forfeited to the United States; and proceedings for the declaration and consequences of such forfeiture may be instituted in the courts of the United States as in other cases of the violation of the laws relating to other illegal importations. (24 Stat. L. 409.)
- “Sec. 3. (Citizens of United States prohibited from traffic in opium in China—punishment—jurisdiction—forfeiture.) That no citizen of the United States shall import opium into any of the open ports of China, nor transport the same from one open port to any other open port, or buy or sell opium in any of such open ports of China, nor shall any vessel owned by citizens of the United States, or any vessel, whether foreign or otherwise, employed by any citizen of the United States, or owned by any citizen of the United States, either in whole or in part, and employed by persons not citizens of the United States, take or carry opium into any of such open ports of China, or transport the same from one open port to any other open port, or be engaged in any traffic therein between or in such open ports or any of them. Citizens of the United States offending against the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be punished by a fine not exceeding five hundred dollars nor less than fifty dollars, or by both such punishments, in the discretion of the court. Consular courts of the United States in China, concurrently with any district court of the United States in the district in which any offender may be found, shall have jurisdiction to hear, try, and determine all cases arising under the foregoing provisions of this section, subject to the general regulations provided by law. Every package of opium or package containing opium, either in whole or in part, brought, taken, or transported, trafficked, or dealt in contrary to the provisions of this

section, shall be forfeited to the United States, for the benefit of the Emperor of China; and such forfeiture, and the declaration and consequences thereof, shall be made, had, determined, and executed by the proper authorities of the United States exercising judicial powers within the Empire of China. (24 Stat. L. 409.)”

Article II of the Treaty of 1880 and the statute passed in conformity with it, still remain in force.

The last treaty with China in which opium or its derivatives is mentioned is the “Treaty as to Commercial Relations,” concluded October 8th, 1903, and proclaimed January 13th, 1904. Article XVI of that treaty is as follows:

“The Government of the United States consents to the prohibition by the Government of China of the importation into China of morphia and of instruments for its injection, excepting morphia and instruments for its injection imported for medical purposes, on payment of tariff duty, and under regulations to be framed by China which shall effectually restrict the use of such import to the said purposes. This prohibition shall be uniformly applied to such importation from all countries. The Chinese Government undertakes to adopt at once measures to prevent the manufacture in China of morphia and of instruments for its injection.”

All Powers have adhered to the morphia clause in this “Commercial Treaty” and it went into effect January 1st of the current year.

KOREA.

We have one other treaty with a Foreign Power covering opium, namely, with Korea. In our first treaty with Korea a “Treaty of Peace, Amity, Commerce and Navigation,” concluded May 22nd, 1882, and proclaimed June 4th, 1883, it was stipulated in Article VII:

“The Governments of the United States and of Chosen mutually agree and undertake that subjects of Chosen shall not be permitted to import opium into any of the ports of the United States, and citizens of the United States shall not be permitted to import opium into any of the open ports of Chosen, to transport it from one open port to another open port, or to traffic in it in Chosen. This absolute prohibition which extends to vessels owned by the citizens or subjects of either Power, to foreign vessels employed by them, and to vessels owned by the citizens or subjects of either Power and employed by other persons for the transportation of opium, shall be enforced by appropriate legislation on the part of the United States and of Chosen, and offenders against it shall be severely punished.”

TARIFF LAWS ON OPIUM TO 1861.

THEREAFTER ON CRUDE OPIUM FOR MEDICINAL PURPOSES.

Mr. President, we think we can more readily explain our tariff laws governing the importation of opium if the International Commission has before it a table compiled by our Commission.

This table is concise as to our importation of different forms of opium and morphia, and the various duties imposed on all of them. It also presents features which will be referred to later.

It will be seen by this table that our first tariff record of the importation of opium of any sort was in 1840. Before 1840 there is no mention in our tariff laws of opium or its derivatives or preparations. Opium, its derivatives, and preparations, were up to 1840 admitted under the general title of “Drugs, chemicals, etc.” In 1840, however, the attention of our Congress was engaged to the large amount of opium then passing into the country, and it was discovered that, coincident with the influx of Chinese coolies to our Pacific Coast, a large amount of opium was entering the country. Opium was therefore (in 1840) taken out of the schedule of “Drugs and chemicals” and placed in a schedule of its own, and was put on the free list. No distinction was made at this time between crude opium imported ostensibly for medicinal purposes, morphia and its salts, and smoking opium.

It will be seen by the Table that, up to the enactment of our tariff of 1842, a considerable amount of opium entered the country. By the tariff of 1842, an *ad valorem* tax of 15 cents per pound was imposed and, in anticipation of it, it will be seen that in the year 1841, 135,000 pounds of opium entered the country. This large importation would appear to have been a speculative attempt to escape the 15 cts. per pound duty that was to be imposed the following year.

In 1846 a new tariff law came into operation. Opium was made to pay 20 per cent *ad valorem* and, as in 1841, so in 1850, in anticipation of the imposition of a higher *ad valorem* duty, there was again a speculative importation of a large amount of opium: 116,390 pounds. It will be seen by the Table that, in the following years, 1851 and 1852, our importations fell off considerably. No doubt there was enough opium in the country to satisfy both licit and illicit needs.

So far as we can learn, the only object in imposing these *ad valorem* duties on opium was revenue needs.

It was found, however, by 1861 that it was no longer possible to collect an *ad valorem* rate on opium, for shippers were willing to make invoices to please buyers. A specific duty of \$1.00 per pound was therefore placed on opium.

In the tariff of 1861 the distinction of crude opium, smoking opium and morphia or its salts was first made.

In our tariff laws of 1862 crude opium was taxed \$2.00 a pound, and in 1864, \$2.50 a pound. Undoubtedly this was primarily to produce an increased war revenue, our Civil War being waged at that period.

In our tariff of 1870 a reduction of the duty on opium was made from \$2.50 to 1.00 a pound. That was but an expression of the general reduction in our tariff after the Civil War.

In 1894 opium was put on the free list, but in our last tariff of 1897, it was again taxed \$1.00 a pound.

TARIFF LAWS ON SMOKING OPIUM.

It will be noticed in the Table that by 1859 our imports of opium had reached an immense figure. It was discovered about the fifties that a large percentage of the opium imported in previous years was not crude opium imported for medicinal purposes, but largely consisted of smoking opium imported into San Francisco and other Pacific ports with the primary intention of supplying the Chinese.

In our tariff of 1861 smoking opium was therefore removed from the opium schedule and placed in a schedule by itself, and taxed as opium prepared for smoking. A large *ad valorem* duty was placed upon this smoking opium. We shall explain later, when we come to speak of the effect of our tariff laws on importations of opium, that the importations varied considerably, due to the fact that smoking opium could not stand the high tax imposed.

Our people and Congress, realizing the iniquity of opium smoking, in the tariff laws of 1864 put a 100 per cent *ad valorem* duty on smoking opium; hoping thereby to keep it out of the country. This method, however, of taxing an undesirable commodity out of the country, proved to be a failure. The only result was smuggling on an enormous scale, the enterprises being led by Chinese and by many of our "undesirable citizens." Reports from our various Collectors of Customs proved that smoking opium could not bear a tax of more than \$6.00 per pound, and in our tariff law of 1870 a \$6.00 per pound duty was placed on it.

During the discussion of our next two tariffs there was a popular demand for the exclusion of smoking opium from our tariff schedules. This was largely due (1) to the fact that we had negotiated the treaty of 1880 with China, which prohibited Chinese in the United States from importing opium; and (2) because the American people began to realize that the habit of opium smoking was spreading from the Chinese to our own American people.

Ten dollars and then twelve dollars per pound was imposed upon smoking opium; but here the old difficulty arose. It was again found that it could not bear a tariff of ten or twelve dollars a pound, and as the Table will show, though there was a considerable reduction in the amount of smoking opium entered at our Customs Houses, quite as much again or more was smuggled into the country.

Finally, in our so-called "McKinley Tariff" of 1897 after much correspondence with our Collectors of Customs, the tax on smoking opium was reduced to \$6.00 per pound, and there it has remained until to-day.

MORPHIA AND ITS SALTS.

We need not go into detail in regard to the tariff on morphia and its salts. It will be sufficient to state that the amounts shown in the Table as imported were not beyond the medicinal needs of our country up to the time, about 1890, when our manufacturers began to manufacture morphia profitably. Since then practically no morphia has entered the United States. The drugs classified as "Morphia or its Salts" are the rarer and more recently precipitated derivatives of opium, such as "heroin" and "codeine"; so that our importations of morphia and its salts are negligible.

LAST TARIFF COVERING OPIUM, MORPHIA, ET CETERA.

The following is the last tariff law covering the importation of various forms of opium, approved July 24, 1897:—

“Section 43. Opium, crude or unmanufactured, and not adulterated, containing nine per centum and over of morphia, one dollar per pound; morphia or morphine, sulphate of, and all alkaloids or salts of opium, one dollar per ounce; aqueous extract of opium, for medicinal uses, and tincture thereof, as laudanum, and other liquid preparations of opium, not specially provided for in this Act, forty per centum ad valorem; opium containing less than nine per centum of morphia, and opium prepared for smoking, six dollars per pound; but opium prepared for smoking and other preparations of opium deposited in bonded warehouses shall not be removed therefrom without payment of duties, and such duties shall not be refunded.”

EXCISE LAWS.

We have but one Internal Revenue Law that covers opium, a law that was approved October 1st, 1890. It is as follows:—

- “Sec. 36. That an internal revenue tax of ten dollars per pound shall be levied and collected upon all opium manufactured in the United States for smoking purposes; and no person shall engage in the manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue.
- “Sec. 37. That every manufacturer of such opium shall file with the collector of internal revenue of the district in which his manufactory is located such notices, inventories, and bonds, shall keep such books and render such returns of material and products, shall put up such signs and affix such number to his factory, and conduct his business under such surveillance of officers and agents as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may by regulation, require. But the bond required of such manufacturer shall be with sureties satisfactory to the collector of internal revenue and in a penal sum of not less than five thousand dollars; and the sum of said bond may be increased from time to time and additional sureties required at the discretion of the collector and under instructions of the Commissioner of Internal Revenue.
- “Sec. 38. That all prepared smoking opium imported into the United States shall, before removal from the custom house, be duly stamped in such manner as to denote that the duty thereon has been paid; and that all opium manufactured in the United States for smoking purposes, before being removed from the place of manufacture, whether for consumption or storage, shall be duly stamped in such permanent manner as to denote the payment of the internal revenue tax thereon.
- “Sec. 39. That the provisions of existing laws governing the engraving, issue, sale, accountability, effacement, cancellation and destruction of stamps relating to tobacco and snuff, as far as applicable, are hereby made to apply to stamps provided for by the preceding section.
- “Sec. 40. That a penalty of not more than one thousand dollars, or imprisonment not more than one year, or both, in the discretion of the court, shall be imposed for each and every violation of the preceding sections of this act relating to opium by any person or persons; and all prepared smoking opium wherever found within the United States without stamps required by this act shall be forfeited.”

It will be seen by this law that an internal revenue tax of \$10.00 per pound was imposed on smoking opium manufactured in the United States, its Territories and the District of Columbia, and that the manufacture was restricted to citizens of the United States.

We are glad to be able to state that no citizen has taken advantage of this law, and that not a pound of smoking opium has been licitly manufactured within the United States since the beginning of our government.

STATUTES IN RESTRAINT OF OPIUM TRAFFIC.

We have one other law besides that which made the American-Chinese Treaty effective, which imposes restrictions on our citizens as to the opium trade, namely:

“AN ACT TO PREVENT THE SALE OF FIREARMS, OPIUM, AND INTOXICATING LIQUORS IN CERTAIN ISLANDS OF THE PACIFIC.

(Act of Feb. 14, 1902, ch. 18, 32 Stat. L. 33.)

- “Sec. 1. (Sale of arms and intoxicants to Pacific Islands aborigines forbidden.) That any person subject to the authority of the United States who shall give, sell, or otherwise supply any arms, ammunition, explosive substance, intoxicating liquor, *or opium* to any aboriginal native of any of the Pacific islands lying within the twentieth parallel of north latitude and the fortieth parallel of south latitude and the one hundred and twentieth meridian of longitude west and one hundred and twentieth meridian of longitude east of Greenwich, not being in the possession or under the protection of any civilized power, shall be punishable by imprisonment not exceeding three months, with or without hard labor, or a fine not exceeding fifty dollars, or both. And in addition to such punishment all articles of a similar nature to those in respect to which an offense has been committed found in the possession of the offender may be declared forfeited. (32 Stat. L. 33.)
- “Sec. 2. (Medical use excepted.) That if it shall appear to the court that such *opium*, wine, or spirits have been given *bonâ fide* for medical purposes it shall be lawful for the court to dismiss the charge. (32 Stat. L. 33.)
- “Sec. 3. (Deemed an offense on high seas.) That all offenses against this Act committed on any of said islands or on the waters, rocks, or keys adjacent thereto shall be deemed committed on the high seas on board a merchant ship or vessel belonging to the United States, and the courts of the United States shall have jurisdiction accordingly. (32 Stat. L. 33.)”

So much for our Treaties and Federal Statutes covering the opium question.

EFFECT OF OUR TREATIES, TARIFF, STATUTES, ETC.

What has been the effect of our Treaties and Tariff laws on the imports and exports of opium and its derivatives? The Table will show it at a glance.

First as to Gum or Crude Opium for Medicinal purposes.

It will be seen that since 1840, in ten-year periods, there has been a large and progressive increase in our importations of this form of opium. Be it under a small *ad valorem* tax or a high specific tax, or be it on the free list, our imports of crude opium have grown.

Between 1840 and 1841 the imports are largely estimated. But I have it from our Collectors of Customs that we can add another 20 per cent. to the importations of that decade.

There is nothing to be remarked on the importations of the second decade from 1850 to 1859.

In the third decade from 1860 to 1869, we may say that our imports for that decade are estimated. The first four years of this decennium marked our Civil War and our Federal statistics do not record the opium that entered the Southern ports during those years. Undoubtedly the amount was large and would considerably swell the total of 1,103,054 pounds for the decade we are reviewing.

From 1870 to the present time, our statistics for crude opium may be accepted as representing the amount of opium that actually entered the country. They are net figures, for but little crude opium is re-exported from the United States.

Now, Mr. President and Fellow Commissioners, if we turn for a moment to the right hand columns of the Table, it will be seen that we have tabulated our population according to decades,—Chinese in one and all others in another column. The percent increase of population, per decade, has been reckoned, and the percent increase per decennary in our importations of crude opium.

PROPORTIONATE INCREASE IN IMPORTS OF CRUDE OPIUM.

Our importations of crude opium have not grown *pari passu* with our growth in population. We think it will be seen at once that this is so. In 1860 our total population increased 34 per cent. over the previous decade, while our importation of crude opium increased only 12.6 per cent. It should, perhaps, be 25 per cent. rather than 12.6 per cent., because, as the Commission will see, only light importations were recorded due to the close of the Southern ports from 1861 to 1865.

In the next decade our population increased 22 per cent. and our importations of crude opium 74.6 per cent.

In 1880 the proportionate increase in our population was 30 per cent.; of crude opium 70.5 per cent.

In 1890, there was a 26 per cent. increase in population as against 56 per cent. increase in the imports of crude opium.

PROPORTIONATE INCREASE IN IMPORTS OF SMOKING OPIUM.

Now, Mr. President and Fellow Commissioners, as to the question of our importation of smoking opium.

As I stated in reviewing our tariff laws, we may add a considerable amount of smoking opium to the figures that are in the Table. It will be interesting now to see the proportionate rate of increase in our importations of smoking opium as compared with the proportionate increase in our Chinese and total population.

In 1860, it will be observed we had a Chinese population of slightly over 34,000. By 1870 that population had doubled, and as against 22 per cent. increase in our total population over that recorded in the previous census, we had an 88 per cent. increase in our importations of smoking opium. This, let us remind you, takes no account of the large quantities that we know were smuggled, but only of the importations recorded in the Table as having been legally entered at our Customs stations.

Ten years later (1880) we get to a period in our history when the agitation began against the immigration of Chinese coolies. Our Immigration Treaty with China was negotiated in 1880.

The Table will show that since then our Chinese population has remained practically stationary. The increase recorded since then shows not an increased immigration into the United States, but a Chinese population that accrued to us as a result of the purchase of Alaska and the annexation of Hawaii. In spite of the fact, however, that our Chinese population remained practically stationary, we find in 1900 a 26 per cent. increase in our total population and in the Table 7.6 per cent. increase in our importations of smoking opium. It might appear from the Table, if not carefully examined, that we had a decided fall in the percentage of increase in smoking opium at this census period. But it will be noticed that it was at this period that we had what was considered a prohibitive tariff on smoking opium,—\$10.00 and \$12.00 a pound. The legalized importations fell off considerably, but we are informed by our Treasury Department that we may add to the figures from 1885 to 1896 at least 75 per cent as representing the amount of smoking opium smuggled into the country. The proportionate increase of smoking opium in 1900 should therefore more properly read 76 per cent rather than 7.6 per cent. With this explanation we propose to let the figures stand as in the Table.

By 1900 our percentage of increase in population over our population as shown in the census of 1890 was 21 per cent. as against 32 per cent. increase in our importation of smoking opium.

To review this phase of the subject hastily: In every census period we have had a per cent., increase in our importation of smoking opium, largely in excess of the per cent., increase in our population, and this in spite of the fact that our Chinese population has been practically stationary for thirty years.

WHERE DOES OUR OPIUM ORIGINATE?

We may state in passing to another phase of our opium question, that our crude opium imported ostensibly for medicinal purposes comes to us directly or indirectly from Smyrna and a few other Levantine ports. On the other hand, our smoking opium comes principally from Macao, and in some quantity from Hongkong.

It may be asked why, in view of our Treaty of 1880 with China forbidding citizens of the United States to engage in the opium trade in China and forbidding Chinese subjects to import smoking opium or manufacture it in the United States, we have continued to import smoking opium. We are informed that at the time this treaty was negotiated our State Department hoped that no American citizen would engage in the importation of smoking opium. Unfortunately, this has not been the case and up to to-day it has been the practice of American firms in San Francisco to import this smoking opium in their own names and than promptly hand it over to the real importers, certain Chinese firms on our Pacific Coast.

SMOKING OPIUM AND OUR CHINESE POPULATION.

Mr. President, it may be thought, in view of the fact that we have made a comparison between our present increase in importations of smoking opium and our Chinese population that the use of smoking opium is wholly confined to the Chinese element in our population. This is not so, however.

From a careful inquiry made in all the large Chinese communities in the United States, we have the following estimates as to the percentage of Chinese who smoke opium.

OPIUM SMOKED IN THE UNITED STATES BY CHINESE.

(2 mace per diem=73 taels per annum=6 lbs. per annum.)

Heavy Smokers: (2 mace) 6 lbs. per annum, Total No. of heavy smokers 17,700=15 per cent.

Light Smokers: ($\frac{1}{2}$ mace) $1\frac{1}{2}$ lbs. per annum, Total No. of light smokers 23,600=20 per cent.

Social Smokers: 1 oz. per annum, Total No. of social smokers 11,800=10 per cent.

Non-Smokers: 50 per cent.

Total Chinese Population 118,000.

Average Importation of Opium for 8 years: per annum 151,944 lbs.

Heavy Smokers (15 per cent.) 17,700 of heavy smokers

at 6 lbs. per annum: 106,200 lbs.

Light Smokers (20 per cent.) 23,600 of light smokers

at $1\frac{1}{2}$ lbs. per annum: 35,400 lbs.

Social Smokers (10 per cent.) 11,800 of social smokers

at 1 oz. per annum: 738 lbs.

Total 142,338 lbs. 142,338 lbs.

9,606 lbs.

That is, from 10 to 20 per cent. of our Chinese are habitual smokers and we may accept 2 mace per day as the average amount consumed by these habitués. Taking an average of 15 per cent. of heavy smokers at two mace a day, we would have as shown by the above table, 17,700 Chinese smoking 6 pounds of opium per annum, a total of 106,200 pounds.

Light smokers, that is those who smoke when from illness they feel the need of it, say once a day or twice a week, would consume an average amount of about half a mace a day. 20 per cent. of light smokers would give us 23,600 Chinese in this class. That would account for a per annum, per capita consumption of $1\frac{1}{2}$ pounds, or a total of 35,400 pounds of smoking opium.

It developed in the course of our inquiry that amongst the Chinese population there is another class of smoker. We have classified this third class as the "Social Smoker," and we are quite within the case if we state that they represent 10 per cent. of our total Chinese population. A liberal estimate for each individual in this class is one ounce per annum. Chinese in this class confine their smoking to holidays and to ceremonial occasions, and smoke as a matter of courtesy only. This class represents say 10 per cent. of our Chinese population, a total of 11,800 Chinese who smoke one ounce of opium per annum, or a total of 738 pounds per annum. These smokers of different classes account for 142,338 pounds of the 152,944 pounds of our average importations for the past eight years.

This leaves 9,606 pounds of smoking opium not accounted for, and to it we must add an estimated, but large amount surreptitiously manufactured in the United States, and the larger amount known to be smuggled annually. Not to depend on the figures of our Commission in the matter of this smuggled opium, it might be well to bring in the evidence of a fellow Commissioner who represents a great daughter nation of Great Britain in this International Commission.

The Hon. Mackenzie King found in the course of his investigation of the opium question in Canada that in the coast cities of Vancouver, Victoria and New Westminster, there were at least seven factories carrying on an extensive business in the manufacture of smoking opium. He stated in his published report that it was estimated that the annual gross receipts of these combined concerns amounted for the year 1907 to between \$600,000 and \$650,000. Crude opium, he found, was imported from India in cocoanut shells, and was then manufactured into smoking opium; that these factories were owned and these manufactures carried on by Chinese; and that it was asserted by the owners of these establishments that all of the opium manufactured is consumed in Canada by Chinese and white people; but he himself concluded that there is strong reason for believing that much of what is produced at the present time is smuggled into China and the coast cities of the United States.

We will not at this moment enter into the question as to what becomes of the smoking opium imported and smuggled into our country and not consumed by the Chinese.

GROWTH OF POPPY.

Before dwelling on the disposition of the vast amount of opium which we import, it may be well to state that within the United States itself we have no growth of the poppy that need be seriously considered, except in one State. The poppy in the State of California is quite extensively grown for its seed; the seed, of course, being used by our Syrian and other semi-Oriental population as a food, and the oil expressed from the seed used to adulterate other oils. Except in a few instances where physicians have experimentally endeavored to grow the poppy for opium, none of our people have been engaged in the growth for that purpose.

However, our Agricultural Department has within the last few years grown the poppy, the object in view being to ascertain the practicability of obtaining from the dried capsule walls, morphia, codeine and other alkaloids now obtained from opium; and they have succeeded. The total amount grown last year covered six acres and yielded 9,600 pounds of dried capsules.

DISPOSITION OF OUR IMPORTED OPIUM.

What becomes of the vast amount of crude and smoking opium imported into the United States? First, to explain how we arrived at the facts that we are about to lay before the Commission.

Under our Federal system of Government we are at an advantage in getting out data of this sort. Our Government Departments cover in their operation the entire country, and working together they may collect and collate all data on any problem that affects us. In addition to them and subordinate to them there are our State Governments covering part of the statistical ground already covered by our Federal Departments, and in addition covering that part of any field of inquiry not covered by our Federal Departments of Government. So that, in this opium inquiry, we had intersecting Federal and State channels all pouring their data into our office at the State Department.

In addition to tapping all Federal and State sources of information, we had the benefit of the experience and advice of over twelve hundred of our most learned physicians and surgeons; the views of the heads of our American Medical Association and the heads of its State branches; of the heads of our Association of American Physicians and of the Association of American Surgeons. But in many ways the most important guides to our securing facts were those gentlemen who have been engaged in opium brokerage, or in the manufacture and distribution of opium derivatives such as morphia, and products such as laudanum.

The social side of the opium problem was investigated by personal inquiry of those who throughout the country were best able to inform us. We do not think that a stone was left unturned that might conceal a fact of which this International Commission ought to know.

Our Commission wishes to acknowledge the frankness that met all of its inquiries, and the fine spirit that animated all organizations and individuals in communicating to us information and trade statistics.

FEDERAL LAWS.

On the 1st of January, 1907, there was put into effect our "National Food and Drugs Act," passed June 30th, 1906.

The only part of that law which affects our present subject is Section 2, which states:

"That the introduction into any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia, or from any foreign country, or *shipment to any foreign country* of any article of food or drugs which is adulterated or misbranded, within the meaning of this act, is hereby prohibited";

And then the Act goes on to define adulterated and misbranded drugs, and states fines, punishments, etc.

In regard to adulteration; Section 7 states:

"That for the purposes of this act an article shall be deemed to be adulterated:

"In case of drugs": (and this includes opium)

"First. If, when a drug is sold under or by a name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality, or purity, as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation. *Provided*, that no drug defined in the United States Pharmacopoeia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box or other container thereof although the standard may differ from that determined by the test laid down in the United States Pharmacopoeia or National Formulary."

In regard to misbranding, Section 8 of the Act states as follows:

"That the term 'misbranded' as used herein, shall apply to all drugs, or articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

"That for the purposes of this Act an article shall also be deemed to be misbranded:

"In the case of drugs:

"First. If it be an imitation of or offered for sale under the name of another article.

"Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any . . . morphine, opium, . . . heroin, . . . or any derivative or preparation of any such substances contained therein."

Without going into details, it will be sufficient to state that since the National Food and Drugs Act was passed, all of our States have remodelled or passed "State Food and Drug Acts" based on the provisions of the National Act.

STATE LAWS.

Some states have gone farther in the regulation of the sale of drugs. In addition to this Federal law, all but three states in our Union have State laws governing the sale of poisons and governing the sale and use of smoking opium. We will present those portions of the Massachusetts State Law as an illustration of what obtains in other states. The Massachusetts law may be taken to represent all such State laws:

"Sec. 42. Whoever opens or maintains a place to be resorted to by other persons, in which opium or any of its preparations is sold or given away to be smoked at such place, whoever at such place sells or gives away opium or any of its preparations to be there smoked or otherwise used and whoever visits or resorts to any such place for the purpose of smoking opium or any of its preparations shall be punished by a fine of not more than five hundred dollars or by imprisonment for not more than six months, or by both such fine and imprisonment.

"Sec. 43. If a person makes oath before a police, district or municipal court or trial justice that he believes or has probable cause to believe that any place, house, building or tenement within the jurisdiction of such court or justice is used or resorted to for the purpose of smoking opium or any of its preparations, or for the purpose of selling or giving away opium or any of its preparations to be smoked at such place, house, building or tenement, and that persons resort thereto for such purposes, such court or trial justice, whether the names of the persons last mentioned are known or unknown to the complainant, shall, if satisfied that there is probable cause therefor, issue a warrant commanding the sheriff or his deputy or any constable or police officer to enter such place, house, building or tenement and there to arrest the keepers thereof, and all persons there present, whether smoking or not, if the implements for smoking opium or any of its preparations are there found, and seize all the opium or preparations thereof and all the implements for smoking the same and all the furniture, fixtures and other personal property there found, and to keep said persons, opium, preparations thereof, implements, furniture, fixtures and property so that they may be produced before a court or magistrate, to be dealt with according to law. Whoever is found so present or so smoking shall be punished by a fine of not more than one hundred dollars for each offence. The provisions of sections three to eight, inclusive, of chapter 217 relative to articles seized under clause eleven of section one of said chapter shall apply to all opium, preparations thereof, implements, furniture, fixtures and property so seized.

"Sec. 44. An officer who makes a search under the provisions of the preceding section shall not be permitted to use any evidence of any crime, except that of opium smoking, which he may discover, in making further prosecutions against the persons whose premises are searched.

"CHAPTER 213, REVISED LAWS OF MASSACHUSETTS.

"Sec. 2. Whoever sells arsenic (arsenious acid), atropia or any of its salts, chloral hydrate, chloroform, cotton root and its fluid extract, corrosive sublimate, cyanide of potassium, Donovan's solution, ergot and its fluid extract, Fowler's solution, laudanum, McMunn's elixir, morphia or any of its salts, oil of pennyroyal, oil of savin, oil of tansy, opium, Paris green, Parson's vermin exterminator, phosphorus, prussic acid, 'rough on rats,' strychnia, or any of its salts, tarter emetic, tincture of aconite, tincture of belladonna, tincture of digitalis, tincture of nox vomica, tincture of veratrum viride, or cabolic acid, without the written prescription of a physician, shall affix to the bottle, box or wrapper containing the article sold a label of red paper upon which shall be printed in large black letters the name and place of business of the vendor and the words Poison and Antidote, and the label shall also contain the name of an antidote, if any, for the poison sold. He shall also keep a record of the name and quantity of the article sold and of the name and residence of the person or persons to whom it was delivered, which shall be made before the article is delivered and shall at all times be open to inspection by the officers of the district police and by the police authorities, and officers of cities and towns; but no sale of cocaine or its salts shall be made except upon the prescription of a physician. Whoever neglects to affix such label to such bottle, box or wrapper before delivery thereof to the purchaser or whoever neglects to keep or refuses to show to said officers such record or whoever purchases any of said poisons and gives a false or fictitious name to the vendor shall be punished by a fine of not more than fifty dollars. The provisions of this section shall not apply to sales by wholesale dealers or manufacturing chemists, to retail dealers, or to a general merchant who sells Paris green, London purple or other arsenical poisons in unbroken packages containing not less than one-quarter of a pound, for the sole purpose of destroying potato bugs or other insects upon plants, vines, or trees except that he shall record each sale and label each package sold, as above provided."

The following are the New York statutes relating to the use of opium and its derivatives:—

"Sec. 405 of the Penal Code of the State of New York, 'REGULATIONS AS TO PRESCRIPTIONS OF OPIUM AND MORPHINE.' A person who, except on written or verbal order of a physician, refills more than once prescriptions containing opium, morphine or preparations of either, in which the dose of opium exceeds one-fourth grain or morphine one-twentieth grain is guilty of a misdemeanor.

"Sec. 218 of the Public Health Law. 'PRESCRIPTION OF OPIUM, MORPHINE, COCAINE AND CHLORAL.' No pharmacist, druggist, apothecary or other person shall refill more than once, prescriptions containing opium or morphine or preparations of either of them or cocaine or chloral, in which the dose of opium shall exceed one-quarter of a grain, or of morphine one-twentieth of a grain, or of cocaine one-half of a grain, or of chloral ten grains, except upon the written order of a physician.

"Sec. 402 of the Penal Code: 'SELLING POISON WITHOUT LABELLING AND RECORDING THE SALE.' It shall be unlawful for any person to sell at retail or furnish any of the poisons named in the schedules hereinafter set forth, without affixing or causing to be affixed to the bottle, box, vessel or package, a label containing the name of the article and the word 'Poison' distinctly shown, with the name and place of business of the seller all printed in red ink, together with the name of such poisons printed or written thereupon in plain, legible characters, which schedules are as follows, to wit:

"SCHEDULE A.

"Arsenic, cyanide of potassium, hydrocyanic acid, cocaine, morphine, strychnia and all other poisonous alkaloids and their salts, oil of bitter almonds containing hydrocyanic acid, *opium and its preparations, except paregoric and such others as contain less than two grains of opium to the ounce.*"

"Sec. 388 of the Penal Code: 'PERMITTING BUILDINGS TO BE USED FOR NUISANCE, ETC.' A person who,

"1. Lets, or permits to be used, a building, or a portion of a building, knowing that it is intended to be used for committing or maintaining a public nuisance, or

“ 2. Opens or mainains a place where opium, or any of its preparations, is smoked by other persons, or

“ 3. At such place sells or gives away any opium, or its said preparations, to be there smoked or otherwise used, or

“ 4. Visits or resorts to any such place for the purpose of smoking opium or its said preparations ; is guilty of a misdemeanor.”

THE FOLLOWING IS A
LAW OF ONE OF OUR SOUTHERN STATES.

NARCOTIC BILL OF GEORGIA.

AN ACT TO PROVIDE AGAINST THE EVILS RESULTING FROM THE TRAFFIC IN CERTAIN
NARCOTIC DRUGS AND TO REGULATE THE SALE THEREOF.

- Sec. 1. Be it enacted by the General Assembly of the State of Georgia, That it shall be unlawful for any person, firm or corporation to sell, furnish or give away any cocaine, alpha or beta eucaine, opium, morphine, heroin, chloral hydrate or any salt or compound of any of the foregoing substances, or any perparation or compound containing any of the foregoing substances, or their salts, or compounds, except upon the original written orders or prescription of a lawfully authorized practitioner of medicine, dentistry or veterinary medicine, which order or prescription shall be dated and shall contain the name of the person for whom prescribed, or if ordered by a practitioner of veterinary medicine, shall state the kind of animal for which ordered, and shall be signed by the person given the prescription or order. Such written order or prescription shall be permanently retained on file by the person, firm or corporation who shall compound or dispense the articles ordered or prescribed, and it shall not be again compounded or dispensed except upon the written order of the prescriber for each and every subsequent compounding or dispensing. No copy or duplicate of such written order or prescription shall be made or delivered to any person, but the original shall at all times be open to inspection by the prescriber and properly authorized officers of the law. Provided, however, that the above provisions shall not apply to preparations containing not more than four grains of opium, or not more than one grain of morphine, or not more than one-fourth grain of heroin, or not more than one-eighth grain of alpha or beta eucaine, or not more than twenty grains of chloral hydrate in one fluid ounce, or if, a solid preparation, in one avoirdupois ounce. Provided, also, that the above provisions shall not apply to preparations containing opium and recommended and sold in good faith for diarrhoea and cholera, each bottle or package of which is accompanied by specific directions for use, and a caution against habitual use, nor to powder of ipecac and opium, commonly known as Dover's Powders, nor to liniments or ointments plainly labelled "For External Use Only." And provided further, That the above provisions shall not apply to sales at wholesale by jobbers, wholesalers and manufacturers, to retail druggists or qualified physicians or to each other, nor to sales at retail by retail druggists to regular practitioners of medicine, dentistry or veterinary medicine, nor to sales made to manufacturers of proprietary or pharmaceutical preparations for use in the manufacture of such preparations, nor to sales to hospitals, colleges, scientific or public institutions.
- Sec. 2. It shall be unlawful for any practitioner of medicine, dentistry or veterinary medicine to furnish to or to prescribe for the use of any habitual user of the same any cocaine, heroin, alpha or beta eucaine, opium, morphine, chloral hydrate or any salt or compound of any of the foregoing substances, or any preparation containing any of the foregoing substances or their salts or compounds, and it shall also be unlawful for any practitioner of dentistry to prescribe any of the foregoing substances for any person not under his treatment in the regular practice of his profession, or for any practitioner of veterinary medicine to prescribe any of the foregoing substances for the use of any human being. Provided, however, that the provisions of this Section shall not be construed to prevent any lawfully authorized practitioner of medicine from furnishing or prescribing in good faith for the use of any habitual user of any narcotic drugs, who is under his professional care, such substances as he may deem necessary for their treatment, when such prescriptions are not given or substances furnished for the purpose of evading the purposes of this Act.

- Sec. 3. Any person who shall violate any of the provisions of this Act shall be deemed guilty of a misdemeanor, and upon conviction shall be punished as prescribed in Section 1039 of Volume Three of the Code of 1895. It shall be the duty under this Act of Judges of the Superior Court in this State at every regular term thereof to charge all regular impanelled grand juries to diligently inquire into and investigate all cases of the violation of the provisions of this Act, and to make a true presentment of all persons guilty of such violation. It shall be the duty of the Board of Pharmacy to cause the prosecution of all persons, violating the provisions of this Act. No prosecution shall be brought for the sale of any proprietary or patent medicines containing any of the drugs or preparations herein before mentioned until the Board of Pharmacy shall certify that such medicine contains any of the said drugs or preparations in excess of the maximum percentage herein before mentioned.
- Sec. 4. In any proceedings under the provisions of this Act the charge may be brought against any or all of the members of a partnership or against the directors or executive officers of a corporation, or against the agent of any person, partnership or corporation.
- Sec. 5. All laws and parts of laws in conflict with this Act are hereby repealed.

MUNICIPAL LAWS.

In addition to these State laws, every large city in our union has police regulations governing the sale and use of smoking opium and in many instances of all the better known poisons.

AN ACT TO REGULATE THE PRACTICE OF PHARMACY AND THE SALE OF POISONS IN THE DISTRICT OF COLUMBIA, AND FOR OTHER PURPOSES.

(Approved May 7, 1906. Public—No. 148.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be unlawful for any person not licensed as a pharmacist within the meaning of this Act to conduct or manage any pharmacy, drug or chemical store, apothecary shop, or other place of business for the retailing, compounding, or dispensing of any drugs, chemicals, or poisons, or for the compounding of physicians' prescriptions, or to keep exposed for sale, at retail, any drugs, chemicals, or poisons, except as hereinafter provided; or, except as hereinafter provided, for any person not licensed as a pharmacist within the meaning of this Act to compound, dispense, or sell, at retail, any drug, chemical, poison, or pharmaceutical preparation upon the prescription of a physician, or otherwise, or to compound physicians' prescriptions, except as an aid to and under the proper supervision of a pharmacist licensed under this Act. And it shall be unlawful for any owner or manager of a pharmacy, drug store, or other place of business to cause or permit any person other than a licensed pharmacist to compound, dispense, or sell, at retail, any drug, medicine, or poison, except as an aid to and under the proper supervision of a licensed pharmacist: *Provided,* That nothing in this section shall be construed to interfere with any legally registered practitioner of medicine, dentistry, or veterinary surgery in the compounding of his own prescriptions, or to prevent him from supplying to his patients such medicines as he may deem proper; nor with the exclusively wholesale business of any dealer who shall be licensed as a pharmacist, or who shall keep in his employ at least one person who is so licensed, except as hereinafter provided; nor with the sale by others than pharmacists of poisonous substances sold exclusively for use in the arts, or as insecticides, when such substances are sold in unbroken packages bearing labels having plainly printed upon them the name of the contents, the word "poison," when practicable the name of at least one suitable antidote, and the name and address of the vendor: *Provided further,* That such person, firm, or corporation has obtained a permit from the board of supervisors in medicine and pharmacy, which grants the right and privilege to make such sales, such permit to be issued for a period of three years, and that each sale of such substance be registered as required of a licensed pharmacist, and it shall be unlawful for any person under the age of twenty-one years to sell such substances, and in no case shall the sale be made to a person under eighteen years of age except upon the written order of a person known or believed to be an adult: *And provided further,* That persons other than registered pharmacists may sell household ammonia and concentrated lye, in sealed containers plainly labelled, so as to indicate the nature of the contents, with the word

"poison," and with a statement of two or more antidotes to be used in case of poisoning and may sell bicarbonate of soda, borax, cream of tartar, olive oil, sal ammoniac, sal soda; and persons other than registered pharmacists may, furthermore, sell in original sealed containers, properly labeled, such compounds as are commonly known as "patent" or "proprietary" medicines, except those the sale of which is regulated by the provisions of sections eleven and thirteen of this Act.

- Sec. 2. That every person now registered as a pharmacist in the District of Columbia, under an Act to regulate the practice of pharmacy in the District of Columbia, approved June fifteenth, eighteen hundred and seventy-eight, shall be entitled to be licensed under this Act without examination or payment of fee, provided that he make application therefor on or before the thirty-first day of December next ensuing after the passage of this Act. Any person registered as aforesaid shall, until said date, by virtue of such registration be entitled to all the rights, privileges, and immunities to which pharmacists licensed under this Act are entitled, and be subject to all the obligations and duties of such licentiates.
- Sec. 3. That every person not registered under an Act to regulate the practice of pharmacy in the District of Columbia, approved June fifteenth, eighteen hundred and seventy-eight, who shall desire to be licensed as a pharmacist shall file with the board of supervisors in medicine and pharmacy an application, duly verified under oath, setting forth the name and age of the applicant, the place or places at which he pursued, and the time spent in the study of pharmacy, the experience which the applicant has had in compounding physicians' prescriptions under the direction of a licensed pharmacist, and the name and location of the school or college of pharmacy, if any, of which he is a graduate, and shall submit evidence sufficient to show to the satisfaction of said board that he is of good moral character and not addicted to the use of alcoholic liquors or narcotic drugs so as to render him unfit to practice pharmacy; and said applicant shall appear at a time and place designated by the board of supervisors aforesaid and submit to an examination by the board of pharmaceutical examiners as to his qualifications for license as a pharmacist: *Provided*, That applicants shall be not less than twenty-one years of age, and shall have had at least four years' experience in the practice of pharmacy or shall have served three years under the instruction of a regular licensed pharmacist, and any applicant who has been graduated from a school or college of pharmacy recognized by said board as in good standing shall be entitled to examination upon presentation of his diploma: *Provided further*, That any applicant intending to limit his practice to compounding and dispensing homeopathic remedies and prescriptions may be licensed, if otherwise qualified. Any applicant intending to compound and dispense homeopathic remedies and prescriptions shall so state in his application for license as a pharmacist, and it shall thereupon become the duty of the board of supervisors aforesaid to appoint a committee of three, physicians or pharmacists, or both, adherents to the homeopathic system of medical practice, to examine said applicant in homeopathic materia medica and pharmacy, and to report the result thereof to said board. Every such applicant, however, shall be subjected in all respects to the same examinations by the board of pharmaceutical examiners as are applicants generally, except that an applicant intending to limit his practice to the compounding and dispensing of homeopathic remedies and prescriptions shall not be examined by said board of pharmaceutical examiners in materia medica and pharmacy. But the license issued to any applicant after a limited examination as aforesaid shall permit him to compound or dispense homeopathic remedies and prescriptions only. No person shall compound or dispense homeopathic remedies or prescriptions who has not been licensed so to do, nor shall any person who has been licensed to compound and dispense homeopathic remedies and prescriptions alone compound or dispense other remedies or prescriptions, except "patent" or "proprietary" remedies in original packages.
- Sec. 4. That if the applicant for license as a pharmacist has complied with the requirements of either of the two preceding sections, the board of supervisors in medicine and pharmacy shall issue to him a license which shall entitle him to practice pharmacy in the District of Columbia, subject to the provisions of this Act.
- Sec. 5. That the board of supervisors in medicine and pharmacy shall issue licenses to practice pharmacy in the District of Columbia without examination, or after limited examination, as said board may determine, to such persons as have been legally registered or licensed as pharmacists in States, Territories, or foreign countries: *Provided*, That the applicant for such license present satisfactory evidence of qualifications equal to those required of

licentiates examined under this Act, and that he was registered or licensed after examination in such State, Territory, or foreign country not less than one year prior to the date of application; that the standard of competence required in such State, Territory, or foreign country is not lower than that required in the District of Columbia, and that such State, Territory, or foreign country accords similar recognition to licentiates of the District of Columbia, all of which shall be determinable by the board of supervisors aforesaid. Applicants for license under this section shall forward with their application a fee of ten dollars.

Sec. 6. That the license of any person to practice pharmacy in the District of Columbia may be revoked if such person be found to have obtained such license by fraud; or to be addicted to the use of any narcotic or stimulant, or to be suffering from physical or mental disease, in such manner and to such an extent as to render it expedient that in the interests of the public his license be cancelled; or to be of an immoral character; or if such person be convicted in any court of competent jurisdiction of any offense involving moral turpitude. It shall be the duty of the major and superintendent of police of said District to investigate any case in which it is discovered by him, or made to appear to his satisfaction, that any license issued under the provisions of this Act is revocable and to report the result of such investigation to the board of supervisors in medicine and pharmacy, which board shall, after full hearing, if in their judgment the facts warrant it, revoke such license.

Sec. 7. That in the month of November of each year every licensed dealer in poisons for use in the arts or as insecticides, whose permit has been issued not less than three years prior to the first day of such month, shall apply to the board of supervisors in medicine and pharmacy for the renewal of such permit. And said board is hereby authorized, upon the payment of such fees as are hereinafter provided, to renew such permit in the month of November for a period of three years from the thirty-first day of October immediately preceding the date thereof. And every permit not renewed within the month of November as aforesaid shall be void and of no effect unless and until renewed. Any license, permit, or renewal obtained through fraud, or by any false or fraudulent representation, shall be void and of no effect. No person shall make any false or fraudulent representation for the purpose of procuring a license, permit, or renewal thereof, either for himself or for another.

Every license to practice pharmacy, and every permit to sell poisons, for use in the arts or as insecticides, and every current renewal of such permit shall be conspicuously displayed by the person to whom the same has been issued in the pharmacy, drug store, or place of business, if any, of which the said person is the owner or manager.

Sec. 8. That there shall be in and for the District of Columbia a board of pharmaceutical examiners, consisting of five licensed pharmacists, appointed by the Commissioners of said District, each of whom shall have been for the five years immediately preceding, and shall be during the term of his appointment, actively engaged in the practice of pharmacy in said District. All appointments shall be made in such manner that the term of office of one examiner shall expire on the thirtieth day of June of each year, but every examiner shall hold office after the expiration of the term for which he has been formally appointed until his successor has been appointed and qualified. No appointee shall enter upon the discharge of his duties until he has taken oath fairly and impartially to perform the same. Said Commissioners may remove, after full hearing, any member of said board for neglect of duty or other just cause.

That annually the board of pharmaceutical examiners shall organize by the election of a president and a secretary, both of whom shall be members of said board, who shall hold office for one year and until their successors shall have been elected and qualified. Said board shall hold meetings for the examination of candidates and for the discharge of such other business as may come before it, commencing on the second Thursdays in January, April, July, and October of each year and at such other times as the board of supervisors in medicine and pharmacy shall direct; and said board of pharmaceutical examiners shall examine all applicants for license to practice pharmacy certified to it for that purpose by the board of supervisors in medicine and pharmacy, and shall report the results of such examination to said board of supervisors as speedily as practicable.

Sec. 9. That from and after the passage of this Act the board of medical supervisors of the District of Columbia shall be known as the board of supervisors in medicine and pharmacy of the District of Columbia; and the president of the board of pharmaceutical

examiners shall be *ex officio* a member of said board of supervisors in addition to the members now provided for by law; and said board of pharmaceutical examiners shall bear in all respects the same relations to the board of supervisors aforesaid as each of the boards of medical examiners of said District now bears to the board of medical supervisors thereof; and said board of supervisors shall have all such rights, powers, and duties with respect to the examination of applicants for license as pharmacists and with reference to the issue of licenses to practice pharmacy and of permits to sell poisons for use in the arts or as insecticides as said board now has with reference to the examination of applicants for license to practice medicine, surgery, and midwifery, and with reference to the issue of licenses to such persons, except in so far as may be inconsistent with the provisions of this Act. Said board shall elect from its membership a secretary and treasurer, respectively. The treasurer of said board shall give such bond for the proper performance of his duties as the Commissioners of the District of Columbia shall deem proper and shall render to said Commissioners accounts of his receipts and disbursements from time to time as said Commissioners shall direct. All licenses issued by said board of supervisors shall be countersigned by the president of the examining board by which the candidate was examined. Said board of supervisors shall keep records of its proceedings, and such records shall be *prima facie* evidence of all matters contained therein in all courts in the District of Columbia. Said board of supervisors shall, in the month of July of each year, make to the Commissioners of the District of Columbia a written report of its proceedings, of its receipts and disbursements, and of all licenses and permits issued. All records, funds, and other property in the possession of the commissioners of pharmacy of the District of Columbia at the time of the passage of this Act shall be delivered to such officer, or officers of the board of supervisors in medicine and pharmacy as may be designated by said board. And such funds may be used for the payment of such necessary expenses as said board of supervisors may incur in the execution of the provisions of this Act during the twelve months immediately following the passage thereof, and any balance which remains on hand at the expiration of that time shall be deposited with the collector of taxes in said District and by him deposited in the Treasury of the United States to the credit of the District of Columbia.

Sec. 10. That applicants for license to practice pharmacy and for permits to sell poisons for use in the arts or as insecticides shall pay the following fees: For examination for license as pharmacist, ten dollars; for a permit for the sale of poisons for use in the arts or as insecticides, one dollar, and for each renewal thereof, fifty cents.

And hereafter all fees for licenses to practice medicine and surgery and all fees aforesaid shall be paid to the treasurer of the board of supervisors in medicine and pharmacy of the District of Columbia before any applicant may be admitted to examination and before any license or permit, or any renewal thereof, may be issued by the said board. And all expenses of said board and of the boards of examiners incident to the execution of the provisions of this Act and of an Act to regulate the practice of medicine and surgery, to license physicians and surgeons, and to punish persons violating the provisions thereof in the District of Columbia, approved June third, eighteen hundred and ninety-six, shall be paid from the fees collected by the board of supervisors aforesaid. If any balance remain on hand on the thirtieth day of June of any year the members of said board appointed as such shall be paid therefrom such reasonable amounts as the Commissioners of the District of Columbia may determine. And the balance then in hand, or so much thereof as said board of supervisors may deem proper, shall be divided among the several boards of examiners in proportion to the number of candidates examined by each, each member of such board of examiners to receive such part of the entire amount paid to that board as that board itself may determine.

Sec. 11. That it shall be unlawful for any person, by himself, or by his servant or agent, or as the servant or agent of any other person, or of any firm or corporation, to sell, furnish, or give away any cocaine, salts of cocaine, or preparation containing cocaine or salts of cocaine; morphine, salts of morphine, or preparation containing morphine or salts of morphine; or any opium, or preparation containing opium; or any chloral hydrate, or preparation containing chloral hydrate, except upon the original written order or prescription of a lawfully authorized practitioner of medicine, dentistry, or veterinary medicine, which order or prescription shall be dated and shall contain the name of the person for whom prescribed or, if ordered by a practitioner of veterinary medicine, shall state the kind of animal for which ordered, and shall be signed by the person giving the order or prescription. Such order or prescription shall be, for a period of three years, retained on

file by the person, firm, or corporation who compounds or dispenses the article ordered or prescribed, and it shall not be compounded or dispensed after the first time, except upon the written order of the original prescriber: *Provided*, That the above provisions shall not apply to preparations containing not more than two grains of opium, or not more than one-quarter grain of morphine, or not more than one-quarter grain of cocaine, or not more than two grains of chloral hydrate in the fluid ounce, or, if a solid preparation, in one avoirdupois ounce. The above provisions shall not apply to preparations sold in good faith for diarrhoea and cholera, each bottle or package of which is accompanied by specific directions for use and caution against habitual use, nor to liniments or ointments sold in good faith as such when plainly labelled "for external use only," nor to powder of ipecac and opium, commonly known as Dover's powder, when sold in quantities not exceeding twenty grains: *Provided further*, That the above provisions shall not apply to sales at wholesale by jobbers, manufacturers, and retail druggists, hospitals, and scientific or public institutions.

Sec. 12. That no physician in the District of Columbia, knowing, or when he might by reasonable inquiry know, that any person is addicted to the use of cocaine, morphine, opium, or chloral hydrate, shall furnish to or for the use of such person, or prescribe for such person, the drug aforesaid, to the use of which such person is addicted, or any compound thereof, or any preparation containing the same, except as it may be necessary to furnish or prescribe such drug, compound, or preparation aforesaid for the cure of drug addiction aforesaid, or for the treatment of disease, injury, or deformity: *Provided*, That no physician shall be convicted under the provisions of this section who shows to the satisfaction of the court before which he is tried that, having exercised due diligence and acting in good faith, he furnished or prescribed such drug, compound, or preparation aforesaid believing the same to be necessary for the cure of drug addiction aforesaid, or for the treatment of disease, injury, or deformity, and for no other purpose whatsoever. No dentist shall furnish or prescribe any drug, compound, or preparation aforesaid to, or for the use of, any person not under his treatment in the regular course of his professional work, nor in any case otherwise than may be required by such work. No practitioner of veterinary medicine shall furnish or prescribe any drug, compound, or preparation aforesaid for the use of any human being, or when he has reasonable ground for believing that the drug, compound, or preparation aforesaid is desired or intended for the use of any human being: *Provided further*, That nothing in this section contained shall be construed to give to dentists or to practitioners of veterinary medicine the right to furnish or prescribe any drug, compound, or preparation whatsoever otherwise than as is usual and customary in the practice of dentistry and veterinary medicine, respectively.

Sec. 13. That it shall be unlawful for any person to sell or deliver to any other person any of the following described substances, or any poisonous compound, combination, or preparation thereof, to wit: The compounds of and salts of antimony, arsenic, barium, chromium, copper, gold, lead, mercury, silver, and zinc; the caustic hydrates of sodium and potassium, solution or water of ammonia, methyl alcohol, paregoric, the concentrated mineral acids, oxalic and hydrocyanic acids and their salts, yellow phosphorus, Paris green, carbolic acid, the essential oils of almonds, pennyroyal, tansy, rue, and savin; croton oil, creosote, chloroform, cantharides, or aconite, belladonna, bitter almonds, colchicum, cotton root, cocculus indicus, conium, cannabis indica, digitalis, ergot, hyosyamus, ignatia, lobelia, nux vomica, physostigma, phytolacca, strophanthus, stramonium, veratrum viride, or any of the poisonous alkaloids or alkaloidal salts derived from the foregoing, or any other poisonous alkaloids or their salts, or any other virulent poison, except in the manner following, and, moreover, if the applicant be less than eighteen years of age, except upon the written order of a person known or believed to be an adult.

It shall first be learned, by due inquiry, that the person to whom delivery is about to be made is aware of the poisonous character of the substance, and that it is desired for a lawful purpose, and the box, bottle, or other package shall be plainly labelled with the name of the substance, the word "poison," the name of at least one suitable antidote when practicable, and the name and address of the person, firm, or corporation dispensing the substance. And before delivery be made of any of the foregoing substances, excepting solution or water of ammonia, and sulphate of copper, there shall be recorded in a book kept for that purpose the name of the article, the quantity delivered, the purpose for which it is to be used, the date of delivery, the name and address of the person for whom it is procured, and the name of the individual personally dispensing the same; and said book shall be preserved by the owner thereof for at least three years after the date of

the last entry therein. The foregoing provisions shall not apply to articles dispensed upon the order of persons believed by the dispenser to be lawfully authorized practitioners of medicine, dentistry, or veterinary surgery: *Provided*, That when a physician writes upon his prescription a request that it be marked or labelled "poison," the pharmacist shall, in the case of liquids, place the same in a colored glass, roughened bottle, of the kind commonly known in trade as a "poison bottle," and, in the case of dry substances, he shall place a poison label upon the container. The record of sale and delivery above mentioned shall not be required of manufacturers and wholesalers who shall sell any of the foregoing substances at wholesale to licensed pharmacists, but the box, bottle, or other package containing such substance, when sold at wholesale, shall be properly labelled with the name of the substance, the word "poison," and the name and address of the manufacturer or wholesaler: *Provided further*, That it shall not be necessary, in sales either at wholesale or at retail, to place a poison label upon, nor to record the delivery of, the sulphide of antimony, or the oxide or carbonate of zinc, or of colors ground in oil and intended for use as paints, or calomel, or of paregoric when sold in quantities not over two fluid ounces; nor, in the case of preparations containing any of the substances named in this section, when a single box, bottle, or other package, or when the bulk of one-half fluid ounce, or the weight of one-half avoirdupois ounce, does not contain more than an adult medicinal dose of such substance; nor in the case of liniments or ointments, sold in good faith as such, when plainly labeled "for external use only"; nor in the case of preparations put up and sold in the form of pills, tablets, or lozenges, containing any of the substances enumerated in this section and intended, for internal use, when the dose recommended does not contain more than one-fourth of an adult medicinal dose of such substance.

For the purpose of this and of every other section of this Act no box, bottle, or other package shall be regarded as having been labelled "poison" unless the word "poison" appears conspicuously thereon, printed in plain, uncondensed Gothic letters in red ink.

- Sec. 14. That no person seeking to procure in the District of Columbia any substance the sale of which is regulated by the provisions of this Act shall make any fraudulent representations so as to evade or defeat the restrictions herein imposed.
- Sec. 15. That every proprietor or manager of a drug store or pharmacy shall keep in his place of business a suitable book or file, in which shall be preserved, for a period of not less than three years, the original of every prescription compounded or dispensed at such store or pharmacy, or a copy of such prescription, except when the preservation of the original is required by section eleven of this Act. Upon request, the proprietor or manager of such store shall furnish to the prescribing physician, or to the person for whom such prescription was compounded or dispensed, a true and correct copy thereof. Any prescription required by section eleven of this Act, and any prescription for, or register of sales of, substances mentioned in section thirteen of this Act shall at all times be open to inspection by duly authorized officers of the law. No person shall, in the District of Columbia, compound or dispense any drug or drugs, or deliver the same to any other person, without marking on the container there of the name of the drug or drugs contained therein, or directions for using the same.
- Sec. 16. That it shall be unlawful for any person to sell or offer for sale by peddling, or to offer for sale from house to house, or to offer for sale by public outcry, or by vending in the street, any drug, medicine, or chemical, or any compound or combination thereof, or any implement, appliance, or other agency for the treatment of disease, injury, or deformity. That, except as may be otherwise authorized by law, no person shall throw, cast, deposit, drop, scatter, or leave, or cause to be thrown, cast, deposited, dropped, scattered, or left, any drug, medicine, or chemical, or any compound or combination thereof, upon any public highway or place, or, without the consent of the owner or occupant thereof, upon any premises in the District of Columbia.
- Sec. 17. That it shall be unlawful for any person not legally licensed as a pharmacist to take, use, or exhibit the title of pharmacist, or licensed or registered pharmacist, or the title of druggist or apothecary, or any other title or description of like import.
- Sec. 18. That all persons licensed under this Act as pharmacists, and actively engaged in the practice of their profession, shall be exempt from jury duty in all courts of the District of Columbia.
- Sec. 19. That any person violating any of the provisions of this Act shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not

exceeding two hundred dollars or by imprisonment not exceeding six months, or by both such fine and imprisonment, in the discretion of the court, and if the offense be continuing in its character, each week or part of a week during which it continues shall constitute a separate and distinct offense. And it shall be the duty of the major and superintendent of police of the District of Columbia and of the corporation counsel of said District to enforce the provisions of this Act.

Sec. 20. That all Acts and parts of Acts inconsistent with the provisions of this Act be, and the same are hereby, repealed. Approved, May 7, 1906.

GENERAL STATEMENT.

First, it should be remembered that we do not produce opium of any kind in our States, Territories or the District of Columbia.

Manufacturers of morphine are generally of the belief that from 70 to 80 per cent. of the crude opium imported is absorbed in the manufacture of morphine, and that from 50 to 75 per cent. of such morphine so manufactured is used illicitly. The rest of our crude opium is manufactured into other medical preparations, such as laudanum, abstracts, Dover's Powder, etc.

This means that at least 400,000 pounds of our annual importations of opium are manufactured into morphine, and find users and abusers in our States, Territories and the District of Columbia.

Of smoking opium we have already calculated the amount used by the Chinese.

Physicians are unanimous in their opinion that the use of opium and its derivatives is much less in the profession of medicine than it was ten years ago. They are also of the opinion that we import very much more crude opium than can be legitimately used medicinally. The lowest estimate that we have is that 50,000 pounds would suffice for the licit needs of the American people; the highest 100,000 pounds.

DISTRIBUTION.

What becomes of the excess of crude opium over and above the amount used for legitimate medicinal purposes?

We have reports from every State, Territory and the District of Columbia.

We might confine our statement in regard to this matter to a few of our larger and more populous States and Cities, but as this might lead to a misconception of the States and Cities named, it will perhaps be better to average the data we have from a large number of our more populous States and Cities.

Before going on in this matter, we might state that in the case of our college and university students there is no use of opium in any shape or form. The question of the illicit use of opium or its derivatives is unknown throughout our whole body of colleges and universities.

With regard to the larger question of the general distribution and final destination of opium, its derivatives and preparations, statements from twenty-five States would show that an average of 5.62 per cent of prisoners who enter our large jails and states prisons, are addicted to the opium habit in some one of its forms; and that of the general criminal population 15.48 per cent are addicts.

Of our unfortunate women and their hangers-on we get an average of 21.6 as the percentage of habitués, in an average of twenty-five States and their large Cities.

In the medical profession in this same territory, we have estimates that as large a percentage as 10 are addicted to the opium habit in one of its forms; the average for twenty-five States and Cities being 2.06 per cent. Trained nurses throughout this same territory are addicted at the rate of 1.32 per cent.

In other professions we get an average in the twenty-five States of 0.684 per cent., and amongst our adults generally (that is, including all our adult population outside of those already enumerated), 0.18 per cent.

Of course these average percentages apply wholly to our adult population; that should be clearly understood.

Since the passage of our National Pure Food Law, and the State and City Laws modelled upon it, there has been an average reduction of 40 per cent. in the sale of proprietary medicines containing opiates.

We have, unfortunately, to state that in some of the twenty-five States enumerated, there has been an enormous growth of the morphine habit, especially in the rural communities where the sterility in social life has driven the elderly members of these communities to this habit. A large percentage of this class have become addicted to the morphine habit largely as the result of a sincere objection to the use of alcohol in any of its forms.

These average percentages apply to all forms of opium abuse. Under the following heading we propose to particularize more fully the use of smoking opium amongst our American population in our States, the District of Columbia and the Territories.

DISTRIBUTION OF SMOKING OPIUM.

On this important matter we have some very definite figures.

We have already estimated the amount of this form of opium used by the Chinese. This leaves us to account for at least 9,000 pounds that we definitely know is not used by them, in addition to the large amount smuggled into the country or surreptitiously manufactured from crude Turkish opium.

We have estimates from the police departments, from physicians, from warders of jails, from opium habitués themselves, from educated and intelligent Chinese, and from other reliable sources, that there are from 3,000 to 15,000 opium smokers amongst the American white and negro population of one of our largest cities. We think we are perfectly safe in taking 5,000 as the number in this city. Basing our data on the law of averages, and applying it to other large centers of population (and we have data as regards these large centers which is our warrant), we are very certain that there are from 100,000 to 150,000 opium smokers in our American white and colored population.

ARMY AND NAVY.

Among the personnel of our Army and Navy there is not the slightest evidence that the use of opium or its derivatives has been introduced except for purely medicinal purposes.

THE EFFECT OF NATIONAL AND STATE LEGISLATION.

Before our "National Food and Drugs Act" went into operation over two years ago there was a large sale throughout the United States of proprietary medicines containing opiates. Since that law went into effect, we learn from inquiries made, and from the examination of sales books of manufacturing druggists that the sale of proprietary medicines containing opiates has decreased from 15 per cent in some states to 75 per cent and even 80 per cent in other states. This reduction is due not only to the effect of the "National Food and Drugs Act" but to the "State Pure Food and Drugs Acts" modelled upon it. In addition to the new "State Pure Food Laws," several states have laws that ban proprietary medicines if they contain opiates or poisons at all.

REVENUE.

Under the heading of "Duty Total," an examination of the Table appended to our Report will show at a glance the amount of revenue that our Federal Government has derived from import duties on the various forms of opium and its derivatives. Taking the average of the last eight years, from 1900 to 1907, it has been \$1,425,134. Our total revenue from all sources for the fiscal year ending June 30th, 1907, was \$663,140,334. The proportion of our opium revenue represents only one-fifth of one per cent of our total revenue.

PRESENT STATUS AS REGARDS LEGISLATION.

A new era has dawned in the United States since this Commission has been gathering. A few days ago our Congress, in response to the new light thrown on our home opium question has passed a bill of which the following is a summary :

Sec. 1. After April first, 1909, it shall be unlawful to import into the United States opium in any form, or any preparation or derivatives thereof, except that opium and preparations

thereof other than smoking opium or opium prepared for smoking, may be imported for medicinal purposes only, under regulations which the Secretary of the Treasury is hereby authorized to prescribe, and when so imported it shall be subject to the duties which are now or may hereafter be imposed by law.

Sec. 2. If any person shall assist in importation or receive, buy or sell prohibited opium or derivatives, such opium shall be forfeited and destroyed, and the offender shall be fined not exceeding five thousand dollars nor less than fifty dollars, or imprisoned not more than two years, or both. Possession of such opium or derivatives thereof to be deemed sufficient evidence to authorize conviction unless defendant explain possession to the satisfaction of the jury.

It will be seen by this bill that the only opium that can now be imported into the United States is opium for medical purposes and we have no doubt that the Secretary of the Treasury will draw up such rules and regulations under this bill as will effectually prevent any other form of opium entering the country, or the entrance of an abnormal amount of opium for medicinal purposes.

Any possible growth of the poppy will also be effectually regulated and we have reason to hope that our people and our Government are now in line with the best thought in regard to the immorality of the use of opium except as a drug for purely medicinal purposes.

PORTO RICO.

The following table shows the amount and varieties of opium imported into Porto Rico since that island came under the United States Government. The position of Porto Rico in regard to our governmental system is still vague, and its statistics do not appear in the Table covering opium importations into the United States, the District of Columbia and the Territories.

IMPORTS OF OPIUM INTO PORTO RICO DURING THE FISCAL YEARS 1899-1908.

Fiscal Year	Crude Opium		Opium prepared for Smoking		Total	
	Pounds	\$	Pounds	\$	Pounds	\$
* 1899	†	†	†	†	9	47

† July 1, 1899 to April 30, 1900. Civil Government established in Porto Rico May 1, 1900.

° Figures not yet available.

CUBA.

We also submit a table on the importations of opium into Cuba during the fiscal years from 1899 to 1908; that is, since our close relations with Cuba following the Spanish-American War.

The figures cover not only the years when we were administering the Government but in the interregnum when Cuba was under its own republican government. The figures for 1907 and 1908 are not yet available.

IMPORTS OF OPIUM INTO CUBA DURING THE FISCAL YEARS 1899-1908.

Fiscal Year	Total		IMPORTED FROM							
			United States		United Kingdom		Turkey		Other Countries	
			Pounds	\$	Pounds	\$	Pounds	\$	Pounds	\$

† July 1, 1901 to May 19, 1902, on which latter date American Occupation ceased in Cuba.

° Figures for 1907 and 1908 have not yet been published by the Cuban Republic.

INTERNATIONAL NEEDS.

We are justified in feeling, so far as the United States itself is concerned, that we are capable of enforcing the provisions of the Bill just passed. Our Government can keep without its borders all opium that we do not legitimately need. Nevertheless it is the desire of our Government that the countries immediately bordering upon us should take the same stand in regard to opium as we have now done. With the passage of the Canadian Anti-opium Bill last July we had an effective guarantee from our cousins to the North that not from Canada would come into our own country a commodity that we wished to exclude or control except for the beneficent purpose to which it was originally applied.

In all our International history we have endeavored, so far as the opium question is concerned, to "Do unto others as we would be done," and we believe that in the future, as the result of the deliberations of this Commission, all nations will apply this Golden Rule to one another.

Presented by Dr. Hamilton Wright.

THE PHILIPPINE ISLANDS.

The Philippine Islands ceded by Spain to the United States in 1898.

Total population 7,635,426.

Chinese population 55,000.*

The Chinese Exclusion Act was applied to the Philippines in 1902 and has since been rigorously enforced.

OPIUM TRAFFIC PRIOR TO 1898.

From 1843 to 1898 opium was farmed out by the Government. There are but few available statistics for this period. The revenue rose from (Mex.) \$81,532.60 in 1863 to (Mex.) \$250,463.20 for the first half of 1897. Smoking was confined by law to the Chinese but the law was not strictly enforced and an increasing number of natives contracted the habit.

There has never been any growth of the poppy in the Islands, nor has there been any export of opium to other countries. The chief sources of supply of imports have been Singapore and Hongkong.

*These figures are the estimate of the Bureau of Internal Revenue of the Philippine Islands. The Immigration records give the number as 49,000.

PERIOD FROM 1898-1901.

During the transition period between the American occupation and the establishment of Civil Government, the importation of opium was placed under the provisions of the Dingley Tariff of the U.S.A. which called for a duty of \$1.00 per pound on the crude commodity and \$6.00 per pound on opium prepared for smoking.

During this period there was no organized attempt made to control the use of the drug. The imports were:

	POUNDS	VALUE	DUTY
1899	91,823	\$255,310	†\$64,586
1900	155,672	477,027	132,392

PERIOD FROM 1901 TO 1905.

By the Tariff Revision Law of 1901 a duty of \$3.00 per kilo* for crude opium and \$3.50 for manufactured was imposed. During this period the import rose to 268,128 pounds in 1905. The highest figure reached was 285,443 pounds in 1902. There was an epidemic of cholera this year and opium vendors used the opportunity to increase the sale of opium among Filipinos as an antidote or cure for the disease. In 1903 there were one hundred and ninety opium shops in Manila alone where opium was sold and used. At this time a bill was framed and considered in the Philippine Commission for getting control of the traffic and regulating the use of the drug. Discussion ensuing upon its public presentation eventuated in the appointment of a Committee to investigate the use of opium and the traffic therein, and the rules, ordinances and laws regulating such use and traffic in various countries in the Orient before determining the best kind of law for reducing and restraining the use among the Filipinos. This Committee presented its Report in June 1904. (*Report of the Committee appointed by the Philippine Commission to investigate the Use of Opium and the Traffic therein.*) It advocated:

- (1) Immediate Government Monopoly, to become
- (2) Prohibition, except for medical purposes after three years or, if at the expiry of this period it seemed expedient, a longer time of preparation.
- (3) A system of individual licenses until prohibition was made law.
- (4) Making salaried Government officials the sole vendors or dispensers.
- (5) (a) An educational campaign among the young; (b) Treatment for victims of the opium habit; (c) Punishment, deportation if necessary, of incorrigible offenders.

PERIOD FROM 1905 TO 8 MARCH, 1906.

On the 3rd of March, 1905, in the Philippine Tariff Revision Act, the duty on crude opium was increased by Congress to \$4.00 per kilo, and on prepared opium to \$5.00 per kilo. It was further enacted that the Philippine Government should have the power to prohibit the importation and sale of opium, or to adopt such measures as might be required for the suppression of the evils resulting from the sale and use of the drug; and that after the 1st of March, 1908, there should be a law prohibiting all importation except for medicinal purposes only. The Philippine Government did not feel that it could carry out all the details of the propositions made by the Investigating Committee. Congress by the Act just referred to precluded the possibility of an extension of time in preparation for prohibitory measures.

PERIOD FROM 8 MARCH, 1906, TO 1 MARCH, 1908.

A high license system was inaugurated as a temporary expedient (Act No. 1461 of the Philippine Commission) on the 8th of March, 1906, placing the administration of the law in the hands of the Bureau of Internal Revenue. This law became effective the 1st of April. By its provisions only adult male Chinese were permitted to use opium, and then on the expressed condition that they took out a habitual user's license. About 12,700 licenses were issued, though a conservative estimate of Chinese smokers placed the number at more than 20,000. Filipinos and foreigners were not eligible for licenses. As the normal import exceeded on an average ten tons per annum, obviously there were many users among those not eligible for licenses, as well as Chinese who secured opium from secret sources, or otherwise evaded the law.

†United States Currency is meant unless otherwise stated.

*1 kilo—2.204 pounds.

Under this Act all opium in hand at the time of its passage was required to be declared and opium afterwards imported had to be stored or withdrawn under Government surveillance; wholesale and retail dealers, being placed under bonds, had to pay an annual license tax of \$500 and \$100 respectively; an internal revenue tax was levied of \$1.25 per kilo* on crude and of \$3.75 per kilo† on prepared opium; severe penalties were provided for the transgression of the law; monies accruing from the license and internal revenue tax were to constitute a special fund for an anti-opium educational campaign, hospital treatment for victims of the drug, the payment of informers, and school purposes.

During this period the imports fell from 268,128 pounds in 1905 to 150,292 pounds in 1906.

In order to prepare as far as possible for the prohibitory law, Act 1761 was passed by the Philippine Commission on the 12th of October, 1907. The provisions of this Act allowed of the continuance of licenses with a monthly permit increasing in price until the date of the prohibitory period four months later. A decreasing amount each month could be sold to the licensee. The sale of opium was placed under most rigorous Government supervision which required that Internal Revenue officers be constantly on duty in opium dispensaries. The internal revenue tax was increased each month by 20 per cent of the original tax. Special effort was made to induce opium addicts to take hospital treatment. When the prohibitory law came into effect it was estimated that not more than 5,000 persons were using opium.

PERIOD BEGINNING 1 MARCH, 1908.

A strict prohibitory law came into effect on this date, since which the importation of opium has been 38 pounds. All importation of opium and its derivatives is made through the Government.

Smoking still continues but it is estimated that it has been reduced from 50 to 60 per cent. The fact that contraband opium has sold at the rate of \$90* per pound†—(one case was reported where the rate per pound touched \$125‡) indicates that a large portion of the smoking population is protected from the drug owing to its inability to purchase so expensive a luxury. The poorer people are those who most need protection for not only have they the least stamina but they smoke dross, the cheaper, but most vicious form of the drug. There is no morphia abuse in the Philippine Islands and consequently but little effort to smuggle.

Our chief difficulties thus far are two in number:

(1) Inadequate facilities. Neither sufficient money nor men are provided for the vigorous enforcement of the law. The Filipino officials at best only afford passive aid. The Customs officers and the Internal Revenue Agents who are Americans are meeting the situation with moderate effectiveness and hopefulness.

(2) The ease with which opium is smuggled makes it impossible to cut off the supply without international co-operation. There is a constant supply of contraband opium introduced at different points in the Islands from Hongkong, Singapore and British North Borneo. Our coast line is so extended—approximately 1,500 miles in Mindanao and the Sulu Archipelago alone—that, without an expense beyond the power of the Government to incur, the territory could not be properly policed by revenue cutters and similar agencies. Two efficient employees of the Government closed a recent report in the following words: "It suggests itself to our minds that if a perfect arrangement be made with the neighboring governments whereby our Government could station officials at various points of the East for the purpose of checking and reporting the movements of opium there would very soon result a firm grasp and control of smuggling. We think the suggestion on its face is plain. We are grappling in darkness with an unknown quantity of opium floating in the East and which is ready to spurt into the Philippine Islands at any time, like a flow of quicksilver; this in direct defeat of our" endeavor, and "in partial defeat of the Customs law and the opium law."

Two important facts should be noted. Under our prohibitory legislation: (1st) An additional outlay is required by our Government. (2nd) Our revenue is seriously decreased.

* \$619.87 per picul or 1033 taels.

† \$206.62 per picul or 344 taels.

* About 200 taels per catty.

† Of course the sales were in small quantities but the figures indicate the incentive to smuggle.

‡ About 277 taels per catty.

As has already been stated, conditions being as they are, it would tax the Insular Treasury beyond its capacity to organize and maintain an effective service against contraband opium. Even with such facilities as we are employing additional expense is incurred, and this at a moment when our exchequer is least able to bear it. The revenue from opium for the last complete fiscal year (1907)* prior to prohibition amounted to \$600,417.85 out of a total revenue of \$17,445,489.49, being $3\frac{1}{2}$ per cent. of the total revenue. This fact is presented as indicating the strength of the conviction of the Government regarding the necessity of the legislation enacted.

Presented by Bishop Brent.

STATISTICAL TABLES.

I.

Revenue derived by the Government of the Philippine Islands from contract for the sale of opium during the years 1890 to 1897.

	<i>Mexican dollars.</i>
1890	\$440,675.15
1891	460,409.28
1892	746,470.58
1893	545,223.84
1894	568,933.24
1895	562,044.02
1896	542,808.88
†1897	250,463.20

Value of opium imported into the Philippine Islands during the years 1863 to 1867 and 1890 to 1894.

	<i>Mexican dollars.</i>	
1863	\$ 81,532.50	
1864	97,500.00	
1865	141,427.50	Opium classified as such.
1866	133,115.00	
1867	133,907.50	
	<hr/>	
	\$587,492.50	

From China and Singapore only the returns for 1890-94 were as follows:—

	<i>Mexican dollars.</i>	
1890	\$495,437.00	Opium classified as chemical
1891	90,851.00	and pharmaceutical products
1892	14,415.00	under the tariff of 1874, and
1893	14,280.00	among vegetable products
1894	13,830.00	under the tariff of 1891.
	<hr/>	
	\$628,813.00	

N.B.—Opium data furnished by the Division of Archives, Executives Bureau, Manila, P. I.

† The import for this year was more than 100,000 pounds less than that for 1905, though the revenue was more than \$230,000 greater. The explanation is contained in the fact that in 1906 the system of licenses and the imposition of an internal revenue tax greatly augmented the revenue already increased by the Tariff Revision of 3rd of March, 1905.

* First and second quarters only.

II.

Quantity and value of imports of opium into the Philippine Islands and customs duty thereon during the years 1899 to 1908, also internal-revenue tax collected on opium during years 1906, 1907 and 1908.

APPENDIX A.

AN ACT FOR THE PURPOSE OF RESTRICTING THE SALE AND SUPPRESSING THE EVIL RESULTING FROM THE SALE AND USE OF OPIUM UNTIL MARCH FIRST, NINETEEN HUNDRED AND EIGHT, WHEN ITS IMPORTATION OR USE FOR ANY BUT MEDICINAL PURPOSES IS FORBIDDEN BY ACT OF CONGRESS.

By authority of the United States, be it enacted by the Philippine Commission, that :

- Sec. 1. Opium within the meaning of this Act shall embrace every kind, class, and character of opium, whether crude, prepared, or refuse, and all narcotic preparations thereof or therefrom, and all morphine or alkaloids of opium and all preparations in which opium, morphine, or any alkaloid of opium enters as an ingredient, together with all opium leaves and wrappings of opium leaves, whether such leaves or wrappers are prepared for use or not.
- Sec. 2. Upon the presentation by any Chinese person of a written application, duly verified by his oath before an officer entitled to administer oaths, and reciting that he habitually smokes, chews, swallows, or injects opium in any of its forms, or is otherwise addicted to the use of opium or of any of its narcotic principles, it shall be the duty of the treasurer of the municipality or the treasurer of the township or settlement in which said application is presented, or if presented in the city of Manila, then of the Collector of Internal Revenue, upon the payment to him of five pesos by the applicant, to register such Chinese person as a confirmed user of opium and to issue to him a certificate stating that he is addicted to the use of opium, the manner and form of its use, and the quantity of the drug consumed by him by the day, week, or month. The certificates so issued shall be printed in quadruplicate and shall be consecutively numbered. One of the quadruplicate shall be retained by the officer issuing the same, one shall be forwarded forthwith to the treasurer of the province in which said municipality, township, or settlement is located, one shall be forwarded to the Collector of Internal Revenue, and one shall be delivered to the person registered. All such certificates shall be accounted for as cash at the rate of five pesos for each certificate. Spoiled or mutilated certificates not issued must be retained and turned in with the accounts of the responsible officer at the proper time.

* Report of Collector of Customs, 1908.

† Bureau of Internal Revenue figures.

‡ Opium imported during the first half fiscal year 1909—38 pounds.

- Sec. 3. Any person who makes or uses a false or counterfeit certificate, or other official document used in the enforcement of this Act, or who with intent to defraud has in his possession any false, counterfeit, restored, or altered certificate, or other official document used in the enforcement of this Act, or who alters the written or printed figures or letters upon such certificate, or other official document used in the enforcement of this Act, or who procures the commission of any such offense by another, or who cooperates or assists in the commission of any such offense, shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding two years, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 4. (a) Except when prescribed as a medicine by a duly licensed and practicing physician, it shall be unlawful for any person to smoke, chew, swallow, inject, or otherwise consume or use opium in any of its forms unless such person has been duly registered as provided in section two hereof and has secured the certificate therein prescribed. Except when prescribed as a medicine by a duly licensed and practicing physician, no registered confirmed user of opium shall smoke, chew, swallow, inject, or otherwise use or consume opium except in his own residence.
- (b) Any person violating the provisions of this section shall be punished by a fine not exceeding two hundred pesos, or by imprisonment for a period not exceeding six months, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 5. (a) It shall be unlawful to sell, transfer, give, or deliver opium in any of its forms to any person unless such person is a duly licensed physician, pharmacist, or second-class pharmacist, or is a duly licensed wholesale dealer or retail dealer in opium, or is duly registered as a confirmed user of opium as prescribed in section two hereof who presents his certificate as such at the time of the sale, transfer, gift, or delivery to him of opium in any of its forms: *Provided, however,* That opium in all of its forms may be sold, transferred, or delivered to scientific bureaus of the Government and to hospitals, on permit from the Collector of Internal Revenue. Duly licensed physicians may prescribe and administer opium as a medicine, and pharmacists and second-class pharmacists may sell, transfer, give, or deliver opium as a medicinal preparation on the prescription of a duly licensed and practicing physician, under such regulations as may be prescribed by the Collector of Internal Revenue and approved by the head of the proper Department.
- (b) Any person violating the provisions of this section shall be punished by a fine not exceeding one thousand pesos, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.
- (c) Any physician who habitually prescribes opium for his patients when the physical condition of said patients does not require the use of opium shall have his license to practice medicine revoked by the Board of Medical Examiners for the Philippine Islands after due notice and hearing by said Board, and shall be punished by a court of competent jurisdiction by a fine of not less than two hundred and fifty pesos nor more than one thousand pesos, or by imprisonment for a period not less than six months nor more than one year, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 6. (a) Every person other than a licensed pharmacist or second-class pharmacist who imports, cooks, or prepares opium or prepares any narcotic extract from opium, or who after its reception modifies or changes the form of any opium received by him, or who sells or offers to sell opium in any of its forms in quantities of one kilo. or more, or who for himself or on commission sells or offers to sell opium to another, for resale, shall be deemed to be a wholesale dealer for the purposes of this Act.
- (b) Every person other than a licensed pharmacist or a second-class pharmacist, or a wholesale dealer in opium, who sells opium in any of its forms, or who deals or traffics therein, shall be deemed to be a retail dealer in opium for the purposes of this Act: *Provided,* That persons engaged in selling or offering for sale, or giving away or bartering opium in such manner, and in such quantities, as to bring them within the definition of wholesale dealers and who also sell or offer for sale, or barter or give away, opium in such manner and in such quantities as to bring them within the definition of retail dealers shall be subject to both the wholesale and the retail dealer's license tax as prescribed by this Act.
- Sec. 7. (a) It shall be unlawful for any person not a duly registered confirmed user of opium, a licensed physician, pharmacist, second-class pharmacist, wholesale dealer or retail dealer in opium, to have in his possession opium in any of its forms except on a permit from the Collector of Internal Revenue, or as a medicine prescribed by a duly licensed and practicing physician.

(*b*) Any person violating the provisions of this section shall be punished by a fine not exceeding five hundred pesos, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.

Sec. 8. Every wholesale dealer and every retail dealer in opium shall keep and maintain on the outside of his place of business, so that the same may be seen and easily read by the public, a sign setting forth in plain, large letters the name or firm designation of such wholesale dealer or retail dealer, and the words "Licensed wholesale dealer in opium," or "Licensed retail dealer in opium," as the case may be. For a failure to keep and maintain such sign conspicuously displayed as herein provided, or for a violation of any of the provisions of this Act, the Collector of Internal Revenue, or his duly authorized representative, may cancel the license issued to such wholesale dealer or retail dealer, and such wholesale dealer or retail dealer shall not be entitled to the return of any money paid by him for such license.

Sec. 9. (*a*) Within ten days after this Act shall go into effect every wholesale dealer and every retail dealer in opium, and every licensed pharmacist and second-class pharmacist, shall report in writing to the treasurer of the province in which his place of business is located, or if located in the city of Manila, then to the Collector of Internal Revenue, the kind, quantity, and quality of all opium in his possession or under his control, and the then existing market value of the same and a definite description of the place in which the same is kept, held, or stored.

(*b*) Any person failing to make true report of the opium in his possession or under his control as prescribed in this section shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court; and all opium not reported by such person shall be seized, forfeited, and sold as prescribed by this Act.

Sec. 10. (*a*) All imported opium immediately after its release from the custom-house, and all opium owned, held, controlled, possessed, prepared, or manufactured by any wholesale dealer in opium, shall be stored by the wholesale dealer in some building or place duly approved by the Collector of Internal Revenue, or his duly authorized representative, and neither the whole nor any part of the opium so stored shall be removed from such building or place except in accordance with regulations prescribed by the Collector of Internal Revenue and approved by the head of the proper Department, or on a permit from the Collector of Internal Revenue, or his duly authorized representative. Opium stored or withdrawn in any manner other than that prescribed in this Act, or by regulations of the Collector of Internal Revenue, approved by the head of the proper department, shall be seized and confiscated.

(*b*) Any person violating the provisions of this section shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court.

Sec. 11. (*a*) Every wholesale dealer and every retail dealer in opium shall keep a book in which he shall enter, in Spanish or English, the full quantity of opium on hand at the time of giving the notice prescribed by section nine and of all opium thereafter received by him from every source, the date on which the same was received, the person or firm from whom received, the kind received, the price paid or to be paid therefor, the date and hour of each and every sale made by him, the quantity and kind of opium sold, the name and address of the purchaser, the quantity and kind of opium transferred on permit, the date of such transfer, the name and address of the person to whom transferred, together with the number of the permit for withdrawal or removal, and such other information as may be prescribed by the Collector of Internal Revenue.

(*b*) Any wholesale dealer or retail dealer in opium who shall fail to keep the book and make true entries therein, as prescribed by this section, shall be punished by a fine not exceeding five thousand pesos or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court.

Sec. 12. Should an inspection of the opium on hand or an examination of the books of any wholesale dealer or retail dealer in opium disclose a greater or less quantity of opium than the difference between the receipts of opium and the sales, transfers, or withdrawals justifies, such wholesale dealer or retail dealer shall pay to the Government of the Philippine Islands as a penalty double the value of any deficiency or excess that may

exist, and all opium and other property on the premises on which the opium business is carried on and conducted shall be subject to seizure and shall be forfeited and sold as prescribed by this Act: *Provided*, That the wholesale dealer or retail dealer may be relieved in whole or in part from the penalties and forfeiture provided in this section whenever in the opinion of the Collector of Internal Revenue, with the approval of the proper Department, such relief is just and equitable.

- Sec. 13. Every wholesale dealer and every retail dealer in opium shall give each purchaser of opium a certificate of sale, written in English or Spanish, duly prepared and signed by the dealer, reciting the sale, name and address of the purchaser, kind, and quantity of opium sold, price paid, and such other information as shall be prescribed by the Collector of Internal Revenue, and for every failure, neglect, or refusal to deliver the certificate herein provided for, such wholesale dealer or retail dealer shall be punished by a fine not exceeding five hundred pesos, or by imprisonment for a period not exceeding six months, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 14. The books and stock of opium of wholesale dealers and retail dealers in opium, or pharmacists or second-class pharmacists, shall be subject to inspection at any time by the Collector of Internal Revenue or his duly authorized representative, and any wholesale dealer or retail dealer in opium, or pharmacist or second-class pharmacist, failing, refusing, or neglecting to allow such inspection immediately upon demand made by the Collector of Internal Revenue, or his duly authorized representative, shall be punished by a fine not exceeding one thousand pesos, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 15. (a) No person shall import, cook, or prepare opium, or engage in the business of purchasing or selling opium or of dealing or trafficking therein, unless he shall have first secured from the Collector of Internal Revenue, or his duly authorized representative, a license to transact such business and shall have paid the license tax prescribed by this Act. Crude opium shall not be sold to any person who is not a duly licensed wholesale dealer: *Provided*, That duly licensed pharmacists and second-class pharmacists may import, buy, sell, and prepare opium for medicinal purposes without securing the license prescribed by this section, under such regulations as the Collector of Internal Revenue may prescribe, with the approval of the head of the proper Department.
- (b) Any person violating the provisions of this section shall be punished by a fine of not less than five hundred pesos or more than two thousand pesos, or by imprisonment for a period of not more than one year, or by both such fine and imprisonment, in the discretion of the court.
- Sec. 16. Before any license is issued to any wholesale dealer in opium, the Collector of Internal Revenue, or his duly authorized representative, shall require that such wholesale dealer shall execute to the Government of the Philippine Islands a good and sufficient bond in the sum of ten thousand pesos, duly approved by the Collector of Internal Revenue, and conditioned that said wholesale dealer will well and truly pay the internal-revenue taxes, fines, and penalties imposed by this Act; that he will not withdraw or remove any opium from the place in which it is lawfully kept or stored except as prescribed by this Act, or by regulations of the Collector of Internal Revenue, approved by the head of the proper Department; and that he will well and truly comply with the provisions of this Act and perform all the duties by it required of him to be performed.
- Sec. 17. Every wholesale dealer in opium shall pay to the Collector of Internal Revenue, or his duly authorized representative, an annual license tax of one thousand pesos, and every retail dealer in opium shall pay an annual license tax of two hundred pesos, which tax shall become due and payable on the first day of January of each year or on commencing business as a wholesale dealer or retail dealer in opium. In case any wholesale dealer or retail dealer in opium begins business after the first day of January, he shall pay that proportion of the license tax which the unexpired portion of the calendar year bears to the whole year: *Provided, however*, That the sum paid for the license shall not be less than that required for three months: *And provided further*, That the license tax may be paid in quarterly instalments on the first day of January, the first day of April, the first day of July, and the first day of October: *And provided further*, That no wholesale or retail license shall be issued to any person authorizing him to peddle opium, or to sell opium in any locality outside of a store duly registered, and that any person so found peddling or trafficking in opium in the streets or dwelling places, or market places, of any city, or in the country, or in the waters of the Philippine Islands, shall be punished by

a fine not exceeding one thousand pesos, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court; and in addition all of the stock of opium found in the possession of any such peddler shall be confiscated to the Insular Government.

Sec. 18. Persons doing business as co-partners in any one place shall be required to pay but one license tax. Should a wholesale dealer or retail dealer in opium engage in the business of manufacturing opium or dealing therein in more than one place, he shall pay the prescribed license tax for each place in which he carries on business: *Provided, however,* That if the business of manufacturing opium or of dealing therein at wholesale or retail is transferred to a place other than that for which the license was issued, the Collector of Internal Revenue, or his duly authorized representative, may transfer the license to the new place of business, and in such case no additional license tax shall be exacted: *And provided further,* That when any person to whom a license is issued dies during the term of the license, the surviving spouse, children, executor, administrator, or other legal representative, of such person may, without the payment of an additional tax, carry on, for the rest of the term covered by the license, the business for which the license was issued.

Sec. 19. Unless otherwise provided by this Act, the payment and collection of all taxes and of all judgments and moneys recovered and received for taxes, costs, forfeitures, and penalties imposed by this Act and the accounting therefore shall be made as prescribed by Act Numbered Eleven hundred and eighty-nine and the regulations of the Collector of Internal Revenue, and in the manner and form provided for the payment and collection of taxes imposed by said Act.

Sec. 20. (a) Before imported crude opium or imported prepared opium in any of its forms shall be released from the custom-house, there shall be paid thereon an internal-revenue tax as follows: On crude opium, two pesos and fifty centavos a kilo., net weight, and on prepared opium seven pesos and fifty centavos a kilo., net weight. This tax shall be paid to the collector of customs, under regulations prescribed by the Collector of Internal Revenue, with the approval of the head of the proper department.

Before any crude opium which is in the Philippine Islands at the time this Act shall become effective is cooked or prepared for sale or for human consumption or use, every wholesale dealer shall pay on such crude opium to the Collector of Internal Revenue, or his duly authorized representative, an internal-revenue tax of two pesos and fifty centavos per kilo., net weight. On opium cooked or prepared in the Philippine Islands for sale or for human consumption or use, every wholesale dealer shall pay on the removal or withdrawal of such opium from the place in which it is lawfully kept or stored, to the Collector of Internal Revenue, or his duly authorized representative, an internal-revenue tax of five pesos on each kilo., net weight. The burden of proving that the internal-revenue tax hereby imposed has been paid is imposed on the wholesale dealer: *Provided, however,* That no tax shall be paid on opium removed or withdrawn for exportation and actually exported and not relanded in the Philippine Islands.

All opium in the possession, or under the control, or subject to the order or disposition of any retail dealer at the time this Act becomes effective on which the internal-revenue tax provided by this Act has not been paid by a wholesale dealer, shall be subject to such tax and said retail dealer shall pay on such opium before manufacture, sale, consumption, or use thereof, an internal-revenue tax, as follows: Crude opium, two pesos and fifty centavos for each kilo, net weight; cooked or prepared opium, or opium prepared for human consumption or use, five pesos for each kilo, net weight. The burden of proving that such internal-revenue tax has been duly paid is hereby imposed on the retail dealer. Net weight shall be determined by the customs rules and regulations covering the importation of opium into the Philippine Islands.

Before any opium is withdrawn or removed from the place in which it is lawfully kept or stored, as provided by this Act, it shall be marked, branded, or otherwise identified in the manner prescribed by the Collector of Internal Revenue and approved by the head of the proper department.

(b) Any wholesale dealer or retail dealer in opium failing, refusing, or neglecting to pay the internal-revenue tax as prescribed by this section, or who shall fail, refuse, or neglect to mark, brand, or otherwise identify opium as required by this section, shall be punished by a fine of not less than five hundred pesos nor more than five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and

imprisonment, in the discretion of the court; and all goods on which such tax is due and not paid as required by this Act shall be subject to seizure and shall be forfeited and sold as prescribed by this Act.

- Sec. 21. In case of the seizure of any property for the violation of the provisions of this Act, the Collector of Internal Revenue, or his duly authorized representative, shall publish a notice of such seizure once a week for three successive weeks in some newspaper of general circulation devoted to the publication of general news and published in the province in which the seizure was made, or if the seizure was made in the city of Manila, then in some newspaper published in said city. If there be no newspaper published in the province in which the seizure was made, then such notice may be published in any newspaper in the Islands devoted to the publication of general news. The notice shall describe the property seized and state the time, cause, and place of seizure, and shall require any person claiming such property to appear and file his claim within twenty days after the first publication of such notice.
- Sec. 22. Any person claiming seized property shall file his claim thereto as prescribed in the notice provided for in the preceding section, and shall deposit with the Collector of Internal Revenue, or his duly authorized representative, a bond executed to the Government of the Philippine Islands in the sum of five hundred pesos, duly approved by said Collector of Internal Revenue, or his duly authorized representative, and conditioned that the claimant will pay all costs and expenses of proceedings for forfeiture and sale of the property in case forfeiture and sale thereof is adjudged by a court of competent jurisdiction. On the filing of such a bond, the Collector of Internal Revenue, or his duly authorized representative, shall transmit the claim and a copy of the notice of seizure to the Attorney-General, who shall commence proceedings for the forfeiture and sale of the seized property described in the notice mentioned in the preceding section.
- Sec. 23. In case no claim is filed for the property within the time specified in the notice, or in case the claimant refuses to furnish the bond prescribed by the section immediately preceding, the Collector of Internal Revenue, or his duly authorized representative, shall give notice of the sale of such property by publishing such notice in the manner prescribed for the publication of the notice of seizure. Such notice shall set forth the date, hour, and place of sale, and the first publication of such notice shall be made at least ten days before the sale and shall be made in each issue of the paper in which published until and including the date of sale, provided such paper is published on said date. On the date and at the hour and place specified in the notice the Collector of Internal Revenue, or his duly authorized representative, shall sell the property seized, at public auction, and for the proceeds of the sale he shall account as for other funds received by him in his official capacity.
- Sec. 24. The books, blank forms, certificates, and registers necessary to carry out the provisions of this Act shall be prepared by the Collector of Internal Revenue, printed by the Bureau of Printing, and furnished to wholesale dealers and retail dealers in opium at the cost of printing plus ten per cent.
- Sec. 25. The Collector of Internal Revenue shall prepare and distribute regulations, directions, and instructions, not in conflict with the provisions of this Act, pertaining to the assessment, collection, and payment of the internal-revenue tax prescribed by this Act; and such regulations, directions, and instructions, whether general or special in character, shall have the force and effect of law when approved by the head of the proper Department.
- Sec. 26. The Collector of Internal Revenue, with the approval of the head of the proper Department, may compromise any civil or other case arising under the provisions of this Act instead of commencing or prosecuting suit thereon, and, with the consent of the head of the proper Department, he may compromise such case if action has been begun thereon.
- Sec. 27. The registration tax required to be paid by this Act shall be covered into the treasury of the municipality, township, or settlement in which collected, or if collected in the city of Manila, then into the Insular Treasury, and shall be deposited and disposed of as are all other deposits to the general fund of said municipalities, townships, settlements, or city of Manila, as the case may be.

The license tax and the internal-revenue tax required to be paid by this Act shall be covered into the Insular Treasury and shall constitute a special fund to be devoted solely to the following purposes:

First. The printing and dissemination among the people of information as to the evils resulting from the use of opium;

Second. The payment of the reasonable expenses, in some reputable hospital, of those desiring to cure themselves of the opium habit;

Third. The payment of the expenses of such Filipino students as may be sent by the Insular Government to the United States for education;

Fourth. The payment of salaries of Filipinos who have been appointed Insular teachers;

Fifth. The construction of schoolhouses and school buildings in the various municipalities of the Islands: *Provided*, That twenty-five per centum of all fines imposed by reason of violations of this Act shall be paid to the person who furnished the original evidence, and substantiated it, which led to the detection of the offense and the imposition of the fine. The name of the informer shall be specified in the judgment of the court when conviction is had in the court.

Sec. 28. This Act shall continue in effect until March first, nineteen hundred and eight, after which time it is made unlawful to import into the Philippine Islands opium, in whatever form, except by the Government, and for medicinal purposes only, by virtue of paragraph eighty of the Act of Congress approved March third, nineteen hundred and five, entitled "An Act to revise and amend the tariff laws of the Philippine Islands, and for other purposes."

Sec. 29. This Act shall take effect on April first, nineteen hundred and six. Enacted, March 8, 1906.

APPENDIX B.

AN ACT GRADUALLY TO RESTRICT AND REGULATE THE SALE AND USE OF OPIUM PENDING THE ULTIMATE PROHIBITION OF THE IMPORTATION OF OPIUM INTO THE PHILIPPINE ISLANDS IN WHATEVER FORM EXCEPT FOR MEDICINAL PURPOSES AS PROVIDED BY THE ACT OF CONGRESS APPROVED MARCH THIRD, NINETEEN HUNDRED AND FIVE, AND PROHIBITING ANY PERSON FROM HAVING THE POSSESSION OF OPIUM, COCAINE, OR ALPHA OR BETA EUCAINE IN ANY OF THEIR SEVERAL FORMS, OR ANY DERIVATIVE OR PREPARATION OF ANY OF SUCH DRUGS OR SUBSTANCES, EXCEPT FOR MEDICINAL PURPOSES, AND TO REPEAL ACT NUMBERED FOURTEEN HUNDRED AND SIXTY-ONE AND OTHER PURPOSES.

By authority of the United States, be it enacted by the Philippine Commission, that :

Sec. 1. Opium within the meaning of this Act shall embrace every kind, class, and character of opium, whether crude, prepared, or refuse, and all narcotic preparations thereof or therefrom, and all morphine or alkaloids of opium and all preparations in which opium, morphine, or any alkaloid of opium enters as an ingredient, together with all opium leaves and wrappings of opium leaves, whether such leaves or wrappings are prepared for use or not.

Sec. 2. Upon the presentation by any Chinese person of a written application, duly verified by his oath before an officer entitled to administer oaths, and reciting that he habitually smokes, chews, swallows, or injects opium, or is otherwise addicted to the use of opium, stating the quantity of opium consumed daily, it shall be the duty of the treasurer of the municipality or the treasurer of the township or settlement in which said application is presented, or if presented in the city of Manila then of the Collector of Internal Revenue, upon the payment to such official by the applicant of the fee herein prescribed, to register such Chinese person as a confirmed user of opium and to issue to him a certificate stating that he is addicted to the use of opium, the manner and form of its use and the quantity of the drug which he shall be permitted to consume per day. The certificates so issued shall be printed in quadruplicate and shall be consecutively numbered. One of the quadruplicates shall be retained by the officer issuing the same, one shall be forwarded forthwith to the treasurer of the province in which said municipality, township, or settlement is located, one shall be forwarded to the Collector of Internal Revenue, and

one shall be delivered to the person registered. Beginning with the certificates for the month of November, nineteen hundred and seven, the Collector of Internal Revenue shall reduce each month the quantity which shall be permitted to be consumed by each registered confirmed user of opium by an amount equal to fifteen per centum of the quantity allowed on the original certificate issued under this law. The fee to be charged for confirmed users' certificates provided for in this section shall be as follows: Certificates for the period from the date of taking effect of this Act until the end of October, nineteen hundred and seven, one peso; for the month of November, nineteen hundred and seven, two pesos and fifty centavos; for the month of December, nineteen hundred and seven, five pesos; for the month of January, nineteen hundred and eight, seven pesos and fifty centavos; for the month of February, nineteen hundred and eight, ten pesos. No certificates shall be honored by a dispensator of opium hereinafter mentioned except when presented by the owner during the month for which issued. All such certificates shall be accounted for as cash at the face value thereof. Spoiled or mutilated certificates not issued shall be retained and turned in with the accounts of the responsible officer at the proper time.

Sec. 3. Any person who makes or uses a false or counterfeit certificate or other official document used in the enforcement of this Act, or who with intent to defraud has in his possession any false, counterfeit restored, or altered certificate or other official document used in the enforcement of this Act, or who alters the written or printed figures or letters upon such certificate or other official document used in the enforcement of this act, or who procures the commission of any such offense by another, or who coöperates or assists in the commission of any such offense, or who lends or delivers his certificate to another, shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding two years, or by both such fine and imprisonment, in the discretion of the court.

Sec. 4. (a) Except when prescribed as a medicine by a duly licensed and practising physician, it shall be unlawful for any person to smoke, chew, swallow, inject, or otherwise consume or use opium unless such person has been duly registered as provided in section two hereof and has secured the certificate therein provided. Except when prescribed as a medicine by a duly licensed and practising physician, no registered confirmed user of opium shall smoke, chew, swallow, inject, or otherwise use or consume opium except in a duly licensed opium dispensary hereinafter provided for.

(b) Any person violating the provision of this section shall be punished by a fine not exceeding two hundred pesos, or by imprisonment for a period not exceeding six months, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That in case of the commission of a second offense under the provisions of this section the person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may by order of the court be deported.

Sec. 5. (a) It shall be unlawful to sell, transfer, give, or deliver opium to any person except to a duly licensed and practising physician, pharmacist, or second-class pharmacist, or a duly licensed dispensator of opium, or duly registered confirmed user of opium in a licensed opium dispensary for consumption therein only, and in accordance with the provisions of this Act: *Provided, however*, That the transfer of ownership of opium, but not delivery thereof, may be made to licensed wholesale dealers in opium: *And provided further*, That opium may be sold, transferred, or delivered to Government Bureaus or officers duly authorized by the Governor-General to receive it, and to hospitals on permit from the Collector of Internal Revenue. Duly licensed physicians may prescribe and administer opium as a medicine, and pharmacists and second-class pharmacists may sell, transfer, give, or deliver opium as a medicinal preparation on the prescription of a duly licensed and practising physician under such regulations as may be prescribed by the Collector of Internal Revenue and approved by the Secretary of Finance and Justice.

(b) Any person violating the provisions of the preceding sub-section shall be punished by a fine not exceeding one thousand pesos, or by imprisonment, for a period not exceeding one year, or by both such fine and imprisonment in the discretion of the court: *Provided*, That in case of the commission of a second offense under the provisions of this section, the person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may by order of the court be deported.

(c) Any physician who prescribes opium for his patients when the physical condition of said patients does not require the use of opium shall have his license to practice medicine revoked by the Board of Medical Examiners for the Philippine Islands after due notice and hearing by said Board, and shall be punished by a fine of not less than two hundred and fifty pesos nor more than one thousand pesos, or by imprisonment for a period of not less than six months nor more than one year, or by both such fine and imprisonment, in the discretion of the court.

Sec. 6. (a) Every person other than a licensed pharmacist or second-class pharmacist who imports, cooks, or prepares opium, or prepares any narcotic extract from opium, or who modifies or changes the form of any opium, or who sells or offers to sell opium in quantities of one kilo. or more, or who for himself or on commission sells or offers to sell opium to another for resale, shall be deemed to be a wholesale dealer for the purposes of this Act.

(b) The keeping of licensed opium dispensaries, not to exceed such number in any one city, municipality, township, or settlement, as may be prescribed by the Collector of Internal Revenue with the approval of the Secretary of Finance and Justice, is hereby authorized.

(c) Opium dispensaries for the purposes of this Act shall be divided into three classes, as follows:

First class. To be kept open twenty-four hours per day or so long as the proprietor may desire.

Second class. To be kept open not over sixteen hours per day.

Third class. To be kept open not over eight hours per day.

The hours during which an opium dispensary may be kept open shall be continuous.

(d) Every opium dispensary shall be in the joint custody of an internal revenue officer and the proprietor thereof. It shall be kept securely locked when not open to users and shall at no time be unlocked, opened, or remain opened unless in the presence of an internal revenue officer.

Sec. 7. (a) Except upon the prescription of a duly licensed and practising physician or upon lawful permit of the Collector of Internal Revenue it shall be unlawful for any person not a duly licensed and practising physician, pharmacist, second-class pharmacist, licensed dispensator of opium, or a duly registered user of opium, when using the same in a licensed opium dispensary only and in such quantities as may be stated in his certificate, to have in his possession opium, or any pipes, hypodermic syringes, or other apparatus or paraphernalia to be used for smoking, injecting, or using opium in any manner.

(b) Any person violating the provisions of this section shall be punished by a fine not exceeding five hundred pesos or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That all opium, pipes, and other opium apparatus and paraphernalia found in the possession of any person not authorized to have same shall be seized and forfeited to the Government.

Sec. 8. Every dispensator of opium shall keep and maintain on the outside of his place of business, so that the same may be seen and easily read by the public, a sign setting forth in plain, large letters the name or firm designation and the words "Licensed opium dispensary of the 'first,' 'second,' or 'third,' class," as the case may be. For a failure to keep and maintain such sign conspicuously displayed as herein provided, or for a violation of any of the provisions of this Act, the Collector of Internal Revenue, or his duly authorized representative, may cancel the license issued to such dispensator of opium, and such dispensator of opium shall not be entitled to the return of any money paid by him for such license.

Sec. 9. (a) Within ten days after this Act shall go into effect every person having opium in his possession, except a duly licensed and practising physician, licensed pharmacist or second-class pharmacist, Bureaus or officers of the Government authorized by law or by the Governor-General to have possession of the same, shall deliver to the treasurer of the province in which the opium is located, or if located in the city of Manila then to the Collector of Internal Revenue, all opium in his possession or under his control, and the official to whom the opium is so delivered shall issue receipt for same, store the opium in a

safe place, and report to the Collector of Internal Revenue immediately the name of the person making delivery, the quantity and kind delivered, and such further information as may by regulation of the Collector of Internal Revenue be required. Opium so delivered shall not be released except on permit of the Collector of Internal Revenue.

(b) Reasonable charges to cover actual expense of storage and care of opium may be imposed by the Collector of Internal Revenue.

(c) Any person failing to deliver the opium in his possession or under his control as prescribed in this section shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court; and all opium not so delivered by such person shall be seized, forfeited, and sold as prescribed by this Act.

Sec. 10. All imported opium shall be delivered by the customs authorities, after payment of all proper duties, taxes, and charges thereon, to the Collector of Internal Revenue or to his duly authorized representative only, for storage in a place to be approved by the Collector of Internal Revenue, and neither the whole nor any part of the opium so stored shall be removed from such building or place except to an opium dispensary, or for export, in accordance with regulations prescribed by the Collector of Internal Revenue and approved by the Secretary of Finance and Justice, or on a permit from the Internal Revenue. Opium stored or withdrawn in any manner other than that prescribed by this Act, or by regulations of the Collector of Internal Revenue made hereunder and approved by the Secretary of Finance and Justice, shall be seized and confiscated.

Sec. 11. (a) Every dispensator of opium, pharmacist, and second-class pharmacist shall keep a book in which he shall enter, in Spanish and English, the full quantity of opium received by him from every source, the date on which the same was received, the person from whom received, and the authorization for its receipt, the kind received, the price thereof, the date and hour of each and every sale or delivery made by him, the quantity and kind of opium sold or delivered by him, the name and authorization of the person purchasing or receiving the same, the quantity and kind of opium transferred on permit, the date of such transfer, the name and address of the person to whom transferred, together with the number of the permit for withdrawal or removal, and such other information as may be prescribed by the Collector of Internal Revenue.

Every pharmacist and second-class pharmacist shall likewise make, and keep a similar record in regard to all cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances received, sold, delivered, or transferred by him. Pharmacists and second-class pharmacists may, on proper permit to be obtained from the Collector of Internal Revenue, or his duly authorized agent, transfer opium, cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, to other pharmacists and second-class pharmacists.

(b) Any dispensator of opium or licensed pharmacist or second-class pharmacist who shall fail to keep the book and make true entries therein, as prescribed by this section, shall be punished by a fine not exceeding five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court, and the license of such pharmacist or second-class pharmacist, shall be revoked by the Board of Pharmaceutical Examiners for the Philippine Islands after due notice and hearing.

Sec. 12. Should any dispensator of opium, pharmacist, or second-class pharmacist fail to make and keep the record book prescribed in the next preceding section of this Act, or should an inspection of the opium, cocaine, alpha or beta eucaine or any derivative or preparation of such drugs or substances on hand, or should an examination of the books of any dispensator of opium, pharmacist, or second-class pharmacist, disclose a greater or less quantity of such articles than the difference between the receipts of such articles and the sales, transfers, or withdrawals thereof, respectively, should justify, then said dispensator, pharmacist, or second-class pharmacist, as the case may be, shall pay the Government of the Philippine Islands, as a penalty, double the value of any deficiency or excess that may exist, and all opium and opium pipes, hypodermic syringes, and apparatus or paraphernalia for smoking or using opium which are found on the premises on which the opium business is carried on and conducted shall be seized and forfeited: *Provided*, That the dispensator may be relieved in whole or in part from the penalties, seizure, and forfeiture provided in this section whenever in the opinion of the Collector of Internal Revenue, with the approval of the Secretary of Finance and Justice, such relief is just and equitable.

Sec. 13. It shall be unlawful for any dispensator of opium to sell or give opium to any person except to a duly registered user or on permit from the Collector of Internal Revenue.

Each sale, gift, or delivery of opium to a duly registered user shall be entered on the back of his certificate or on an official slip for that purpose attached to the certificate by an internal revenue officer showing the date and hour of sale, gift, or delivery and the amount sold, given, or delivered, and it shall be unlawful for a dispensator to sell, give, or deliver to a registered user of opium in a greater quantity than that stated on his certificate as one day's allowance or the difference between that stated as one day's allowance and the amount noted on the back of the certificate as having been sold, given, or delivered to him that day, or for a dispensator of opium to sell, give, or deliver to a registered user of opium any opium when the entry on his certificate shows that he has been furnished his full allowance for that day.

Any person violating the provisions of this section shall be punished by a fine of not less than five hundred pesos and not more than five thousand pesos, or by imprisonment for not more than two years, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That in case of the commission of a second offense under the provisions of this section the person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may by order of the court be deported.

Sec. 14. The books and stock of opium of dispensators of opium or of pharmacists or second-class pharmacists shall be subject to inspection at any time by the Collector of Internal Revenue, or his duly authorized representative, and any dispensator of opium or pharmacist or second-class pharmacist failing, refusing, or neglecting to allow such inspection immediately upon demand made by the Collector of Internal Revenue, or his duly authorized representative, shall be punished by a fine not exceeding one thousand pesos, or by imprisonment for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court.

Sec. 15. (a). No person shall import, cook, or prepare opium, or engage in the business of purchasing or selling opium or of dealing or trafficking therein, unless he shall have first secured from the Collector of Internal Revenue a license to transact such business and shall have paid the license tax prescribed by this Act. Crude opium shall not be sold to any person who is not a duly licensed wholesale dealer, and then only subject to all the provisions of section five: *Provided*, That duly licensed pharmacists and second-class pharmacists may import, buy, sell, and prepare, opium for medicinal purposes, without securing the license prescribed by this section, under such regulations as the Secretary of Finance and Justice may prescribe on the recommendation of the Director of Health and the Collector of Internal Revenue.

(b) Any person violating the provisions of this section shall be punished by a fine of not less than five hundred pesos nor more than two thousand pesos, or by imprisonment for a period not more than one year, or by both such fine and imprisonment, in the discretion of the court.

Sec. 16. Before any license is issued to any wholesale dealer in opium, or to any dispensator of opium, the Collector of Internal Revenue shall require that such wholesale dealer or dispensator of opium shall execute to the Government of the Philippine Islands a good and sufficient bond in the sum of ten thousand pesos, duly approved by the Collector of Internal Revenue, and conditioned that said wholesale dealer or dispensator of opium will well and truly pay the internal-revenue taxes, fines and penalties imposed by this Act; that he will not withdraw or remove any opium from the place in which it is lawfully kept or stored except as prescribed by this Act, or by regulations of the Collector of Internal Revenue made hereunder and approved by the Secretary of Finance and Justice; and that he will well and truly comply with the provisions of this Act and perform all the duties by it required of him to be performed.

Sec. 17. Every wholesale dealer in opium shall pay to the Collector of Internal Revenue a monthly license tax of one hundred pesos, and every dispensator of opium shall pay a monthly license tax in the following amounts: For a first-class opium dispensary, two hundred and fifty pesos; for a second-class opium dispensary, one hundred and seventy-five pesos; and for a third-class opium dispensary, one hundred pesos, which taxes shall be paid in advance. In case any wholesale dealer or dispensator of opium begins business after the first day of a month, he shall pay for the whole month: *Provided, however*, That this

shall not apply to the month of October, nineteen hundred and seven, for which month he shall pay one-half of the amount hereinbefore prescribed: *And provided further*, That no license shall be issued to any person authorizing him to sell opium outside of a licensed opium dispensary, and that any person, except a duly licensed and practising physician or a pharmacist or second-class pharmacist, selling, giving, furnishing, or otherwise disposing of opium outside of a licensed opium dispensary, shall be punished by a fine not exceeding one thousand pesos, or by imprisonment, for a period not exceeding one year, or by both such fine and imprisonment, in the discretion of the court; and in addition all of the stock of opium found in the possession of any such person shall be seized and forfeited.

Sec. 18. Persons doing business as copartners in any one place shall be required to pay but one license tax. Should a dispensator of opium engage in business in more than one place, he shall pay the prescribed license tax for each place in which he carries on business: *Provided, however*, That if the business of a dispensator or of a wholesale dealer in opium is transferred to a place other than that for which the license was issued, the Collector of Internal Revenue may transfer the license to the new place of business, and in such case no additional license tax shall be exacted: *And provided further*, That when any person to whom a license is issued dies during the term of the license, his heirs, executors, administrators, or other legal representative, may, without the payment of an additional tax, carry on, for the rest of the term covered by the license, the business for which the license was issued.

Sec. 19. Unless otherwise provided by this Act, the payment and collection of all taxes and of all judgments and moneys recovered and received for taxes, costs, forfeitures, and penalties imposed by this Act and the accounting therefor shall be made as prescribed by Act Numbered eleven hundred and eighty-nine, as amended, and the regulations of the Collector of Internal Revenue issued thereunder.

Sec. 20. (a) Before any imported opium shall be released from the custom-house there shall be paid thereon an internal-revenue tax as follows: On crude opium, two pesos and fifty centavos a kilo., net weight; and on prepared opium, seven pesos and fifty centavos a kilo., net weight. Beginning with the first day of November, nineteen hundred and seven, the internal-revenue tax on imported opium shall be increased each month by an amount equal to twenty per centum of the original tax imposed herein until March first, nineteen hundred and eight, on and after which date the said tax on opium permitted to be imported by the Act of Congress of March third, nineteen hundred and five, shall be as follows: On crude opium, five pesos a kilo., net weight; and on prepared opium, fifteen pesos a kilo., net weight. The date of payment of this tax shall for the purpose of this section be considered the date of importation. This tax shall be paid to the Collector of Customs, under regulations prescribed by the Collector of Internal Revenue, with the approval of the Secretary of Finance and Justice.

On all opium cooked or prepared in the Philippine Islands every wholesale dealer shall pay to the Collector of Internal Revenue at the time of such cooking or preparation an additional internal-revenue tax of five pesos on each kilo., net weight, of such cooked or prepared opium. Beginning with the first day of November, nineteen hundred and seven, the internal-revenue tax on opium cooked or prepared in the Philippine Islands shall be increased each month by an amount equal to twenty per centum of the original tax imposed herein. The burden of proving that the internal-revenue tax hereby imposed has been paid shall be upon the wholesale dealer.

Net weight shall be determined by the customs laws and regulations covering the importation of opium into the Philippine Islands.

Before any opium is withdrawn or removed from the place in which it is kept or stored, as prescribed by this Act, it shall be marked, branded, or otherwise identified in the manner prescribed by the Collector of Internal Revenue and approved by the Secretary of Finance and Justice.

(b) The cooking or preparation of opium, or the changing of its form in any manner, except for medicinal purposes by duly licensed and practising physicians, pharmacists, and second-class pharmacists, shall be done only under the supervision of the Collector of Internal Revenue, or his duly authorized representative, in a place to be designated and provided by the Collector of Internal Revenue, and all cooking or preparation of opium, or the changing of its form, shall in any case be subject to the inspection of the Collector of Internal Revenue.

Opium so prepared shall be immediately returned to the place of storage as provided for by this Act and shall not be released except in the manner provided herein.

The Collector of Internal Revenue is hereby authorized to make provision for the storage and preparation of opium, and to charge reasonable fees for such storage and place of preparation and for services rendered in connection with the records and the preparation of opium. Such charges shall constitute a lien upon the opium, which can be removed only by payment of all charges due.

(c) Any dealer in opium failing, refusing, or neglecting to pay the internal-revenue tax as prescribed by this section, or who shall fail, refuse, or neglect to mark, brand, or otherwise identify opium as required by this section, or who shall in any other manner violate the provisions of this section, shall be punished by a fine of not less than five hundred pesos nor more than five thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court; and all goods on which such tax is due and not paid as required by this Act shall be seized and forfeited.

- Sec. 21. In case of the seizure of any property for the violation of any provision of this Act, the Collector of Internal Revenue shall publish a notice of such seizure once a week for three successive weeks in some newspaper of general circulation devoted to the publication of general news and published in the province in which the seizure was made, or if the seizure was made in the city of Manila, then in some newspaper published in said city. If there be no newspaper published in the province in which the seizure was made, then such notice may be published in any newspaper in the Islands devoted to the publication of general news. The notice shall describe the property seized and state the time, cause, and place of seizure, and shall require any person claiming such property to appear and file his claim within twenty days after the first publication of such notice.
- Sec. 22. Any person claiming such seized property shall file his claim thereto as prescribed in the notice provided for in the preceding section, and shall deposit with the Collector of Internal Revenue a bond executed to the Government of the Philippine Islands in the sum of five hundred pesos, duly approved by said Collector of Internal Revenue, and conditioned that the claimant will pay all costs and expenses of forfeiture and sale of the property in case forfeiture and sale thereof are adjudged. On the filing of such a bond the Collector of Internal Revenue shall proceed against such seized property in the same manner as is prescribed by Act Numbered eleven hundred and eighty-nine, as amended, for the forfeiture and sale of property seized thereunder.
- Sec. 23. The books, blank forms, certificates, and registers necessary to carry out the provisions of this Act shall be prepared by the Collector of Internal Revenue and furnished to wholesale dealers and dispensators of opium at cost plus ten per centum.
- Sec. 24. The Collector of Internal Revenue is hereby authorized and empowered to prepare and distribute regulations, directions, and instructions for the carrying out of the provisions of this Act; and such regulations, directions and instructions, not inconsistent with this Act, whether general or specific in character, shall have the force and effect of law when approved by the Secretary of Finance and Justice.
- Sec. 25. The Collector of Internal Revenue, with the approval of the Secretary of Finance and Justice, may compromise any civil or other case arising under the provisions of this Act instead of commencing or prosecuting suit thereon, and, with the consent of the Secretary of Finance and Justice, he may compromise such case after action has been begun thereon.
- Sec. 26. The registration tax required to be paid by this Act shall be covered into the treasury of the municipality, township, or settlement in which collected, or if collected in the city of Manila then into the Insular Treasury to the credit of said city, and shall be deposited and disposed of as are all other deposits to the general fund of said municipalities, township, settlements, or city of Manila, as the case may be.

The license tax and the internal-revenue tax required to be paid by this Act, except license taxes upon wholesale dealers and opium dispensaries, shall be covered into the Insular Treasury and shall constitute a special fund to be devoted solely to the following purposes:

First. The printing and dissemination among the people of information as to the evils resulting from the use of opium;

Second. The payment of the reasonable expenses, in some reputable hospital, of those desiring to cure themselves of the opium habit ;

Third. The payment of salaries of Filipinos who have been appointed Insular teachers;

Fourth. The construction of schoolhouses and school buildings in the various municipalities of the Islands; *Provided*, That twenty-five per centum of all fines imposed by reason of violations of this Act shall be paid to the person who furnished the original evidence, properly substantiated, which led to the detection of the offense and the imposition of the fine. The name of the informer shall be specified in the judgment of the court when conviction is had in a court: *Provided*, That in all cases in which no fine is imposed but where the sentence is one for imprisonment or deportation, or when compromise is effected as provided in section twenty-five hereof, there shall be paid to the informer an amount approved by the Secretary of Finance and Justice, not exceeding one thousand pesos in any one case, and said moneys are hereby appropriated for the purposes of this section and shall be expended therefor on the approval of the Governor-General.

Sec. 27. The license taxes on wholesale dealers and opium dispensaries and storage charges and fees for services rendered as provided for herein shall constitute a special fund, which is hereby made available for expenditure in the temporary employment of special internal-revenue officers, renting of buildings, furnishing supplies, and for such other purposes as may be necessary in the carrying out of the provisions of this Act, and said moneys are hereby appropriated for the purposes of this section and shall be expended therefor on the approval of the Governor-General.

Sec. 28. No person shall inhale, snuff, chew, swallow, inject, or otherwise use or permit to be used in or on his body any cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, except upon the prescription of a duly licensed and practising physician or except as otherwise specially provided in this Act.

Sec. 29. The possession of any opium pipe, hypodermic syringe, apparatus, instrument, or paraphernalia for using or smoking opium or any hypodermic syringe for using cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, or any other apparatus or instrument especially designed for using any of said drugs or substances in or on the human body, shall be deemed *prima facie* evidence that the person in possession of such opium pipe, hypodermic syringe, apparatus, instrument, paraphernalia, or articles, has used some one of such prohibited drugs or substances, or the drug or substance for the use of which such apparatus, instrument, and paraphernalia are especially designed, without the prescription of a duly licensed and practising physician, unless such prescription is produced by such person.

Sec. 30. On and after March first, nineteen hundred and eight, it shall be unlawful for any person to hold or to have in his possession or under his control or subject to his disposition any opium, cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances: *Provided, however*, That Government Bureaus or officers of the Government duly authorized by law or designated in writing by the Governor-General may have, hold, and dispose of any such drugs or substances in accordance with law: *And provided further*, That duly licensed and practising physicians, pharmacists, and second-class pharmacists, or persons holding and having such drugs and substances on the prescription of a duly licensed and practising physician, may have, hold, possess, and dispose of such drugs and substances for medicinal purposes only: *And provided further*, That on and after March first, nineteen hundred and eight, whenever opium, cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, is found on, about, in the possession of, or under the control of, any unauthorized person, such opium, cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, shall be seized and forfeited to the Insular Government.

Sec. 31. Any unauthorized person owning, carrying, holding, having, controlling, having possession of, or knowingly having on his premises, any opium, cocaine, alpha or beta eucaine, or any derivative or preparation of such drugs or substances, on and after March first, nineteen hundred and eight, shall be punished by a fine not exceeding ten thousand pesos, or by imprisonment for a period not exceeding five years, or by both such fine and imprisonment, in the discretion of the court: *Provided, however*, That in the case of the commission of a second offense under the provisions of this section, any person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may, by order of the court, be deported.

Compiled by

THE UNITED STATES OPIUM COMMISSION

CHARLES H. BRENT, *Chairman*

HAMILTON WRIGHT

CHARLES D. TENNEY

3rd December, 1908.

Sec. 32. On and after March first, nineteen hundred and eight, it shall be unlawful for any person in the Philippine Islands to inhale, smoke, chew, swallow, inject, or otherwise use or permit to be used in or on his body any opium, except for medicinal purposes, and then only upon prescription of a duly licensed and practising physician.

Any person violating any of the provisions of this section shall be punished by a fine not exceeding ten thousand pesos, or by imprisonment for not exceeding five years, or by both such fine and imprisonment, in the discretion of the court: *Provided, however,* That in the case of the commission of a second offense under the provisions of this section, any person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may, by order of the court, be deported.

Sec. 33. Act Numbered fourteen hundred and sixty-one, entitled "An Act for the purpose of restricting the sale and suppressing the evil resulting from the sale and use of opium until March first, nineteen hundred and eight, when its importation or use for any but medicinal purposes is forbidden by Act of Congress," is hereby repealed.

Sec. 34. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An Act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

Sec. 35. This Act shall take effect on October seventeenth, nineteen hundred and seven.

Enacted, October 10, 1907.

APPENDIX C.

The following is the Act of Congress of March 3rd, 1905, on which the Philippine legislation was based:—

"AN ACT TO REVISE AND AMEND THE TARIFF LAWS OF THE PHILIPPINE ISLANDS,
AND FOR OTHER PURPOSES.

Sec. 11. (Rates on imports.)

Class III.—Substances employed in pharmacy and chemical industries, and products composed of these substances.

80. Opium:

(a) Crude, N. W., kilo., four dollars;

(b) The same manufactured or prepared for smoking or other purposes, N. W., kilo., five dollars. *Provided, however,* That the Philippine Commission or any subsequent Philippine legislature shall have the power to enact legislation to prohibit absolutely the importation or sale of opium, or to limit or restrict its importation and sale, or adopt such other measures as may be required for the suppression of the evils resulting from the sale and use of the drug: *And provided further,* That after March first, nineteen hundred and eight, it shall be unlawful to import into the Philippine Islands opium, in whatever form, except by the Government, and for medicinal purposes only, and at no time shall it be lawful to sell opium to any native of the Philippine Islands except for medicinal purposes. (33 Stat. L. 944.)"

Austria and Hungary.

Opium not being produced either in Austria or in Hungary, no opium is exported from the Dual Monarchy.

On account of the small imports of opium into Austria-Hungary the official statistics do not show the exact quantity of imported opium; the yearly import of opium is estimated to vary between 1,400 and 2,000 kilogrammes; the average yearly consumption is therefore about 0.05 grammes per head of the total population. Nearly the whole of the imported opium is shipped from Constantinople to Trieste.

The import of opium derivatives is not important. Kodëin is imported from Germany and about 700-1,000 kilogrammes morphine is imported from England every year.

The import duty for opium and its derivatives is Kronen 36 or about £1 12s. for one hundred kilogrammes.

Opium, morphine and its derivatives are used for medical purposes only.

In the territory of the Austro-Hungarian Monarchy opium for smoking purposes is not manufactured.

The cultivation of poppy is insignificant and the poppy produced in Austria-Hungary is not fit for the production of opium.

The same restrictions are in force for the trade with opium and its derivatives as for the trade with poisons.

According to the Austrian Regulation dated 21st April, 1876 the box or bottle which contains poison has to be distinctly labelled with the word "Poison" and under § 361 Penal Code any person who sells poisons, in contravention to the existing rules and regulations for the trade of poisons, is liable to a penalty of 10 Kronen to 100 Kronen—10s. to £8—or of prison of one day to eight days.

In Hungary similar laws and regulations are in force.

China.

I.—HISTORICAL NOTE ON OPIUM.

(Extracted from various sources.)

PREVIOUS to the Tang dynasty (A.D. 618) the poppy was apparently unknown to the Chinese botanists and physicians. The first mention in literature is in the "Supplementary Herbalist" of CHEN TSANG-CHI, an author writing in the first half of the eighth century, who quotes from an earlier lost writer, SUNG YANG-TZŭ a statement that "The poppy has four petals, white or red. . . . The seeds are in a bag (capsule described), . . . being like those of millet." At this time the Arabs had been trading with China for a full century. The second reference is in the "Book on the Culture of Trees," by KUO TO-TO, a writer of the latter part of the eighth century living in the inland province of Shensi. The poet YUNG TAO, a resident of Szechwan in the closing years of the Tang dynasty (ended 906), wrote a poem describing the poppy growing in the plains near his home.

In the "Herbalist's Treasury," composed by order of the Emperor by a commission of nine in 973, is a reference to the medicinal use of the poppy: "Its seeds have healing power. When men . . . they may be benefited by mixing these seeds with bamboo juice boiled into gruel, and taking the mixture." About the same period the poet SU TUNG-PO says, in one of his poems: "The boy may prepare for you the broth of the poppy." His brother, SU CHÊ, wrote "A Poem on the Cultivation of the Medicinal Plant Poppy," in which he says: "I built a house on the west of the city. . . . The gardener came to me to say 'The poppy is a good plant to have.' . . . Its seeds are like autumn millet; when ground, they yield a sap like cow's milk; when boiled, they become a drink fit for Buddha."

In the Herbalist of SU SUNG, prepared by order of the Emperor about the year 1057, it is stated that "The poppy is found everywhere. . . . There are two kinds, one with red flowers, one with white. . . . When the capsules have become dry and yellow, they may be plucked. . . . In cases of nausea it will be found serviceable to administer a decoction of poppy seeds made in the following way. . . ."

A medical writer, LIN HUNG, probably of the twelfth century, makes the first reference

NOTE.

As a rough guide, it may be mentioned that the Haikwan tael was in 1907 equivalent—

in English money, 10		3s. 3d.,
„ America „ „	Gold	\$0.79,
„ French „ „	Francs	4.09,
„ German „ „	Marks	3.33,
„ Indian „ „	Rupees	2.42,
„ Japanese „ „	Yen	1.58,
„ Mexican Dollars, „		\$1.51,

at the average Sight Exchange on London, New York, Paris, Berlin, Calcutta, Japan, and Hongkong respectively.

100 Haikwan taels are approximately equal to 111.40 Shanghai taels or 150 Mexican dollars.

TABLE OF CHINESE WEIGHTS.

1 TAEI (<i>Liang</i>)	= 583.3 grains (1½ oz. avoirdupois).
	= 37.783 grammes.
16 Taels = 1 CATTY (<i>Chin</i>)	= 1½ lb. avoirdupois.
	= 604.53 grammes.
100 Catties = 1 PICUL (<i>Tan</i>)	= 133½ lb. avoirdupois.
	= 60.453 kilogrammes.

to the use of the capsules, which contain the juice from which opium is prepared. He directs that the entire poppy head be taken, washed, and the juice pressed out and filtered, and then boiled and afterwards steamed; the residue may then be taken out and "made up into cakes shaped like a fish." The result of this process is opium, mixed with the impurity of the vegetable substance of the capsule. Three other writers of the same period, YANG SHIH-YING, WANG CHIU, and WANG SHIH, refer explicitly to the merits of the poppy capsule in curing dysentery. Three writers on medical subjects of the thirteenth century, LIU HO-KIEN, LI KAO, and WEI I-LIN, and one of the fourteenth century, CHU CHÊN-HÈNG, also described the mode of preparing the "fish-cake" paste from the capsule and its use in the pharmacopœia. The last-named states: "It is used also for diarrhœa and dysentery accompanied by local inflammation; though its effects are quick, great care must be taken in using it, because it kills like a knife."

The first reference to scoring the fresh capsule *in situ* to obtain the inspissated juice, which by manipulation becomes opium, is in the writings of WANG HI, who died in 1488. He says: "Opium is produced in Arabia from poppies with red flowers . . . after the flower has faded the capsule while still fresh is pricked for the juice." WANG HI was Governor for 20 years of the province of Kansu, where he would come in contact with Mahommedans, from whom he could learn of Arab arts and industries. In the "Eastern Treasury of Medicine," a Korean work of the same period, is given an exact account of the method of scoring the capsule, gathering the exuded sap, and drying it in the sun, much as practised to-day; and there can be little doubt that the preparation of opium was introduced into China through Arab channels by the end of the fifteenth century. The "Introduction to Medicine" of LI TING, in the middle of the sixteenth century, gives an exact account of the method of preparing opium, under the name *a-fu-yung*. The Arabs, in taking the Greek name ($\delta\pi\iota\omicron\nu$), transformed it into *afyun*. In China the provinces along the coast have transliterated the name opium into *ya-pien*, by which the drug is generally known; but in the inland province of Yunnan, where the Mahomedan influence has always been strong, and the Mahomedan population predominated up to the Panthay rebellion (1867) and the resultant massacres, opium of indigenous production is to this day referred to in official documents, tax receipts, etc., as *fu-yung*, which, except as a truncated form of *a-fu-yung*, is unintelligible in Chinese.

The poppy has therefore been known in China for at least 12 centuries, its medicinal use for nine centuries, and that the medicinal properties lay in the capsule for six centuries. The art of extracting opium from the capsule has been practised for four centuries—for its medicinal properties only and long before the vice of smoking the drug was introduced. Tobacco smoking was introduced by the Spanish at the beginning of the seventeenth century, and the smoking of opium mixed with tobacco, through the Dutch, in the middle of the seventeenth century. There is no record to show when opium was first smoked by itself, but it is thought to have originated about the end of the eighteenth century, and to have coincided with the issue of the Edict in 1796 prohibiting the importation of all opium. Foreign opium was first imported from Goa by the Portuguese in the beginning of the eighteenth century, and the first prohibiting Edict against opium smoking was issued by the Emperor YUNG CHÈNG in 1729, enacting severe penalties on the sale of opium and the opening of opium-smoking divans, and from this time on the sale of opium for the purpose of smoking became a criminal offence. In 1729 the arrivals of foreign opium were but 200 chests, but a constant increase followed each year, and by 1790 the importation had reached the figure of over 4,000 chests. In 1796 an Edict formally prohibiting the importation of all opium was issued, and in 1800 this prohibitory Edict was issued anew. From that date all trade in opium became contraband. Instead of diminishing, the trade flourished in spite of the prohibition, and by the year 1820 the importation amounted to 5,000 chests. By 1830 it had increased to 16,877 chests, by 1838 to 20,619 chests, by 1850 to 50,000 chests, and in 1858 to 70,000 chests. In November of the last-mentioned year the trade was legalised by China and a tariff rate of *Hk. Tls.* 30 per picul on opium was chargeable thereafter. While there can be little doubt that this legalisation of the opium traffic was contrary to the wishes of the Imperial Family and the enlightened classes in China, the country was then in the throes of the greatest rebellion ever experienced in its history and revenue was badly needed. It was recognised that as the contraband trade continued in spite of the Imperial disfavour, it would be best to legalise it as the choice of two evils, and this was accordingly done.

The next step in the history of opium is found in the Chefoo Convention of 1876, by which the British Government accepted in principle a proposal that inland taxation (*likin*) on the drug should be collected simultaneously with the import duty, *i.e.*, by the Imperial, and not the provincial, authorities. This was made effective by an Additional Article signed on 18th July, 1885, by which the amount of *likin* was settled at *Hk. Tls.* 80 per picul, making, with the import duty, a total of *Hk. Tls.* 110 per picul, which the Chinese Government now collects.

II.—FOREIGN OPIUM.

(a.) TOTAL NET IMPORTATIONS FOR THE YEARS 1863 TO 1908.

THE appended table gives the quantities of foreign opium imported through the various Imperial Maritime Custom Houses throughout China for the years 1863 to 1908. In 1863 the amount was 50,087 piculs; in 1867 the quantity had risen to 60,948 piculs; in 1873, to 65,797 piculs; and in 1879, to 82,927 piculs—the largest importation of any year given in the table. In 1883 the quantity decreased to 68,168 piculs, to rise again to 82,612 piculs in 1888—only 315 piculs short of the record year. Five years later (1893) it decreased once more to 68,108 piculs, or 60 piculs short of the importation of 10 years before (1883). In 1898 the figure was 49,752 piculs, and in 1903 it had risen again to 58,457 piculs. For 1908 the quantity declined to 48,397 piculs. The following shows the average annual importations:—

1863 to 1870	56,226	<i>Piculs.</i>
1871 „ 1880	68,765	„
1881 „ 1890	72,012	„
1891 „ 1900	58,726	„
1901 „ 1908	52,809	„

Previous to 1887 it is estimated that the quantity of foreign opium entering China each year by unauthorised channels amounted to about 20,000 piculs. In that year the Kowloon and Lappa Customs were opened and stations established around Hongkong and Macao, to keep a check on the junk trade, with the result that opium smuggling was reduced by at least 15,000 piculs yearly. For the Canton delta alone the average annual importation for the six years before the opening of Kowloon and Lappa was 1,265 piculs, whilst for the five years following their opening it rose to 15,207 piculs. Since 1887, therefore, the amount of smuggling in the foreign drug may be considered as about 5,000 piculs annually; consequently, to obtain a more correct idea of the actual arrivals of foreign opium in China, 20,000 piculs should be added to each year's importation (given in the table) prior to 1887, and 5,000 for each year's since that date. The importation for 1908 compared with that for 1907 shows a decrease of 6,187 piculs, or a little over 11 per cent. The decrease in demand between the years 1888-1906 is attributed generally to the replacement of the foreign by the native drug.

(b.) DISTRIBUTION.

The following table, compiled from the Customs returns, gives the distribution (net importations from all sources) of foreign opium in the various Customs districts in the five years 1904 to 1908:—

This table shows that in 1908 the three northern provinces of China—Manchuria, Chihli, and Shantung—consumed 423 piculs of foreign opium, against 1,007 piculs in 1906; Kiangsu consumed 16,996 piculs, against 19,384 piculs; and Chekiang, 2,604 piculs, against 3,164 piculs. The southern coast provinces of Fukien and Kwangtung took 24,459 piculs, against 26,825 piculs. The total for the coast provinces is 44,482 piculs in 1908 and 50,380 piculs in 1906, a decrease of 5,898 piculs. Of the Yangtze provinces, Hupeh consumed 239 piculs, against 363 piculs; Hunan, 139 piculs, against 248 piculs; Kiangsi, 1,494 piculs, against 1,459 piculs; and Anhwei, 2,042 piculs, against 1,633 piculs. The total for the Yangtze provinces is 3,914 piculs for 1908, against 3,703 piculs in 1906, an increase of 211 piculs. Of the inland provinces, Szechwan took no foreign opium, against 1 picul in 1906, and Kwangsi took 1 picul, against 33 piculs in 1906. No other inland province consumes the foreign drug. The decrease for the inland provinces was 32 piculs. The total decrease since the Anti-Opium Edict of September 1906 has therefore been 5,720 piculs, or 10½ per cent. The only provinces showing an increase in the consumption of foreign opium are Kiangsi (35 piculs) and Anhwei (409 piculs).

(c.) VARIETIES IMPORTED.

The following table, compiled from the Customs returns, gives the kinds of foreign opium imported at the treaty ports during the past five years:—

DESCRIPTION.	1904.	1905.	1906.	1907.	1908.
	<i>Piculs.</i>	<i>Piculs.</i>	<i>Piculs.</i>	<i>Piculs.</i>	<i>Piculs.</i>

Patna.....	19,947	22,901	25,478	24,129	20,575
Benares.....	9,612	11,294	13,475	11,568	10,818
Other kinds, chiefly Persian.....	3,095	1,691	796	1,493	1,313
TOTAL.....	54,752	51,920	54,117	54,584	48,397

In 1863 Chinese consumers preferred the Malwa to the Bengal variety, and the ratio of consumption was as 7 to 3. In 1873 the ratio was reduced as 8 to 5, and in 1879 almost equal proportions of each kind were used. From that time on the Bengal variety has been given the preference by Chinese smokers, and for the past four years the amount imported has about doubled the figures for Malwa. Consumers who are accustomed to smoke the foreign drug never change to the native article, unless forced to do so from pecuniary motives. The average net weight per chest of opium imported is as follows:—

Malwa	100 catties.
Patna	120 „
Benares	120 „
Other kinds, chiefly Persian	100 „

The net weight per ball is as follows:—

Malwa	8 to 10 ounces (Chinese).
Patna	46 „ 50 „ „
Benares	46 „ 50 „ „
Other kinds, chiefly Persian	Uncertain.*

(d.) PRICES, WHOLESALE AND RETAIL.

The table on page 8, compiled from the Shanghai Customs returns for the years 1868 to 1908, gives values of the different kinds of foreign opium imported. As Shanghai may be taken as the basis for values throughout China (other ports calculate prices on the cost of transportation from Shanghai), no attempt is made to give values ruling elsewhere.

* The size of the balls of Turkey and Persian opium vary so much that it is impossible to give weight.

1908.....	711	724	698	987

The Shanghai wholesale prices for the various kinds of foreign opium at present are:—

Malwa	<i>Sh. Tls.</i> 980 per chest.
Patna	" 996 "
Benares	" 996 "
Persian	" 820 "

The present retail prices for raw opium are:—

Malwa	<i>Sh. Tls.</i> 10.50 per catty.
Patna	" 26 per ball.
Benares	" 26 "
Persian	" 9 per catty.

The present retail price for the first quality of the prepared drug as sold locally is 80 dollar cents per Chinese ounce (*liang*), and this is said to be made up in the following proportions:—

60 per cent.	Benares or Patna.
10 ,,	Malwa.
20 ,,	native opium.
10 ,,	opium dross.

The proportion of prepared opium yielded by the several kinds of foreign opium is said to be as follows:—

Malwa	gives 60 per cent.
Patna	,, 54 ,,
Benares	,, 54 ,,
Persian	,, (figures unobtainable).

The second quality of the prepared article is sold for \$0.65 an ounce, and is made up of native opium mixed with opium dross. The third quality sells for from \$0.50 to \$0.55 per ounce, and is composed of native opium and dross—adulterated with sesamum-seed cake. Wealthy smokers, who are particular as to the quality of their opium, generally buy the raw material and prepare it themselves.

The smallest quantity sold in the opium dens of Shanghai is 3 candareens weight (17 grains avoirdupois), costing 38 cash (about 3 Mexican cents), and this gives about two pipes, the quantity of prepared opium required for one pipe being estimated at from 1 to 2 candareens. The yield of dross, or ashes, varies with the class of bowl used, but ranges from 40 to 70 per cent., and the amount of prepared opium that can be extracted from the dross itself averages about 55 per cent.

* Collected in lieu of inland dues.

III.—NATIVE OPIUM.

(a.) METHOD OF CULTIVATION.

OPIUM has for many years been the principal and most profitable product of the western provinces of China. Its cultivation does not interfere with the production of rice, for the poppy there is a winter crop, sown usually in late autumn, after the rice harvest, and gathered before the ground is needed again for rice in the spring. Moreover, it thrives on sloping ground generally unsuitable for rice.

Though cultivated chiefly for local consumption in the provinces of Kansu, Shensi, Shansi, Szechwan, Yunnan, and Kweichow, the amount available for export is considerable. Where conditions admit, it is grown for sale or barter by the aboriginal tribes, who form a considerable proportion of the population in these provinces; but, generally speaking, these people are but little addicted to the vice.

After the summer and early autumn crops have been harvested the land is ploughed and cleaned, roots are burnt, ashes spread, and the ground sown during the ninth and tenth moons (Szechwan) with poppy seeds, in drills or holes some 18 inches apart. No special attention is given to the selection of seeds, but it is said that the white poppy produces a stronger and superior quality of opium, and the kind with red or variegated flowers a larger quantity.

The poppy is a gross feeder, quickly exhausting the fertility of the soil, and liberal dressings of liquid manure are required to ensure a full crop, so that wherever the soil is poor the poppy is grown near towns and cities capable of supplying the necessary fertiliser. In Kweichow and Shensi, however, valleys in remote districts where such manuring is impossible are frequently given up entirely to the poppy, and in Yunnan, where the white and red flowers may be seen covering the hillsides far from any of the big centres of population, some rotation of crops is practised, opium being produced from the same ground only once in every three years.

When the plants are a few inches high, they are thinned out and earthed up, and some attention is thenceforth given to weeding and occasional stirring of the soil about the roots. The poppy blooms in the second moon (Szechwan). When the capsules begin to form, the plants receive frequent dressings of manure. During the third and fourth moons, as soon as the petals begin to fall, light vertical incisions are made in the capsules at sundown, and the sap that exudes during the night is collected in the morning. Mild, moist weather, with night dew, seems most favourable for the running sap. Dry weather diminishes the flow of the juice, and heavy rains wash away what has exuded during the night.

In North China, and especially in Manchuria, opium is a summer crop. The poppy is generally sown during the third and fourth moons, and reaches maturity by the seventh moon. There the climate, with its short, hot summer months, seems generally favourable to its cultivation; but the crops nevertheless vary greatly, requiring a combination of favourable conditions to ensure success—a late frost or too heavy rains at critical periods seriously injuring the harvest. There the incisions in the capsules are made horizontally, not vertically, and the sap as it exudes is collected at once, and not allowed to stand overnight, as is the practice throughout Western China.

The collection of sap continues for some 10 to 20 days, the plants being revived by fertilisation during this period, and the capsules retapped until exhausted. One pod, if of prime quality, will produce about 1 mace (58 grains avoirdupois) weight of crude opium, and inferior plants, about half that quantity. The yield of raw opium per *mou* (about one-sixth of an English acre) varies from 32 taels (2 catties) to 80 taels (5 catties), according to soil and cultivation, but 56 taels (3½ catties) may be taken as an average (Szechwan).

The farmer expects to realise about 120 cash per tael weight for his raw product, which would be 6,720 cash per *mou*. In addition, he gets 2,750 cash for the seeds and dry poppy plants. The former on being crushed yield an inferior sort of cooking oil, and the latter can be used for fuel and fodder. This brings the gross return per *mou* to 9,470 cash. Allowing for the cost of extra labour and fertilisers, it may be stated that the profit to the farmer on land under poppy cultivation is three to four times that which it would be with any other crop; but it must be remembered that opium is an uncertain harvest and a bad year means a big loss to the growers.

The farmer disposes of his product to one or other of the many hundreds of collectors, who, as agents for the large opium dealers, range the province (Szechwan) for the purpose. A certain amount of skilled labour is understood to be necessary before the opium in its then

crude state is ready for the market. Before it appears in the form of balls, each weighing from 32 to 36 taels, there is a loss by evaporation of from 30 to 40 per cent.

The raw opium of commerce can scarcely be found in an absolutely pure state. It is extensively adulterated, sometimes by the cultivator, but more usually by the wholesale dealers who prepare it for the market. Amongst the ingredients said to be mixed with opium the most frequently mentioned are glue, beancurd, eggs, sesamum-seed cake, boiled apples, and burnt sugar.

The following extracts from the reports of the Commissioners of Customs give an idea of the interchange of native opium between the various provinces of China :—

MANCHURIA.—*Newchwang* states that importations vary according to the outturn of Manchurian crops. The average annual importations through the Maritime Customs for 10 years has been 176 piculs, and through the Native Customs the average for seven years has been about 1,050 piculs, mostly Manchurian opium from Kirin and Heilungkiang. *Antung* states that two-thirds of imported opium in that district are from Shensi, but gives no figures.

CHIHLI.—*Tientsin* estimates, roughly, that in 1906 one-third of the opium consumed in the province was obtained from without, coming principally from Shansi and Honan, but also from Manchuria, Yunnan, and Szechwan; and the estimated annual consumption being given as 15,000 to 20,000 piculs, the annual importations from other provinces would therefore be 5,000 to 6,700 piculs.

SHANTUNG.—*Chefoo* gives no estimate of importations, but states that until recently the supplies of native opium *at that port* came from Western Shantung, Szechwan, and Manchuria. During 1908, however, the home production has been largely supplemented by Shansi opium, while the Szechwan and Manchurian kinds are now rarely seen. *Kiaochow* states that the native opium consumed in the province is nearly all locally produced, it being estimated that only one-tenth comes from Shansi (Hinganfu).

KIANGSU.—At *Shanghai* the gross importations through the Foreign Customs in 1907 (inclusive of Kiangsu opium) amounted to 10,550 piculs, of which less than half was retained for district use. The average annual quantity arriving under native control is estimated at 13,200 piculs, and of this, assuming a proportionate re-exportation, some 6,400 piculs remained in the district, giving a total of some 11,500 piculs. Of the arrivals through the Customs, it is stated that 69 per cent. is from Szechwan, 15 per cent. from Yunnan, and 16 per cent. from Kiangsu; and, applying the proportion throughout, it would appear that 9,660 piculs entered the province through Shanghai, of which 7,935 piculs were Szechwan and 1,725 piculs Yunnan opium. *Nanking* estimates that "something like 10,000 piculs" of native opium are introduced annually into Kiangsu from other provinces. Besides Szechwan and Yunnan, the drug comes also from Honan, Anhwei, and Southern Shantung.

CHEKIANG.—*Ningpo* and *Hangchow* together report 981 piculs as imported in three quarters of 1908. No estimate for province.

FUKIEN.—*Foochow* reports arrivals *viâ* Shanghai, in three quarters of 1908, of 817 piculs, mainly Szechwan drug, and states that there is *no overland importation*. *Amoy* states that in 1907 there were 1,082 piculs imported—half Szechwan and half Yunnan,—mainly through Shanghai, and that little, if any, opium from other provinces is used in the rural districts.

KWANGTUNG.—*Canton* reports arrivals through the Customs, in three quarters of 1908, of 2,150 piculs, of which 80 per cent. was Szechwan, 15 per cent. Yunnan, and 5 per cent. Kiangsu opium. *Swatow* reports 2,100 piculs *viâ* Shanghai in three quarters of 1908, of which 1,892 piculs were Szechwan drug. A certain quantity also comes overland from Kiangsi and Hunan. *Kongmoon* reports some 30 piculs a year from Kweichow and Yunnan *viâ* Wuchow. *Pakhoi* also receives an unknown quantity overland from Kweichow and Yunnan. *Kiungchow* states that arrivals are now only by steamer from Swatow, and amounted, in 11 months of 1908, to 1,085 piculs, of which 143 piculs were Yunnan, 901 piculs Szechwan, and 41 piculs Kiangsu, opium.

HUPEH.—*Hankow* states that the province is supplied from Szechwan, Yunnan, Honan, Shensi, and Kiangsu—chiefly from the first two. No estimate of total importations into the province. *Ichang* gives a total of 2,821 piculs as the net importations for 17 years—1892 to 1908—through the Customs, an average of 166 piculs a year. Of late years, however, importation through the Customs have dwindled to almost nothing. Through the

likin offices it is estimated with comparative certainty that the annual importation averages 170 piculs. The bulk of the opium consumed in Ichang is smuggled. The total quantity of opium, practically all from Szechwan and Yunnan, arriving at Ichang from up river in 1908, by likin junks and chartered junks, was 51,827 piculs, showing an increase of 12,285 piculs as compared with the figures for 1907. The greater part of this opium had been carried down river by steamer and likin junk before the end of the year. Some 7,000 piculs are stated to have passed overland to Shasi in 1907 by overland routes, chiefly *viâ* Shihnanfu. [Judging the proportions of Yunnan and Szechwan opium annually imported at Ichang by chartered junk from Chungking from 1892 to 1907, and applying the proportion for 1907 to the whole arrivals by chartered and likin junks in 1908—51,827 piculs,—it would appear that of this total 11,920 piculs were Yunnan opium and 39,907 piculs Szechwan opium.] *Shasi* states that, as nearly as can be ascertained, 14,000 piculs of opium were imported during 1908, the opium being of Yunnan and Szechwan origin, with some from Kweichow, and arriving in native junks. Overland arrivals not referred to.

HUNAN.—*Yochow* gives an estimate, made in 1901, that 10,000 piculs annually were imported into the province from Szechwan, Yunnan, and Kweichow, while 10,000 piculs more passed through on the way to Kiangsi, Kwangsi, and Kwangtung. The imported drug is mainly the Kweichow kind, which is cheaper than the others.

KIANGSI.—*Kiukiang* states that 12,000 piculs a year are said to be imported at Kiukiang from Szechwan and Kweichow.

ANHWEI.—*Wuhu* gives as an approximate estimate of native drug arriving in the province annually: Kiangsu opium, 400 piculs; Shensi opium, 400 piculs; Szechwan opium, 2,000 piculs; and Yunnan opium, 150 piculs.

HONAN.—*Hankow* states that in the Siangcheng district, in the centre of Honan, no outside opium is imported, though it is believed that in the southern districts the drug is received from Szechwan and Shansi.

SHANSI.—No reliable statement.

SHENSI.—*Chungking* estimates importations into Shensi at 1,500 piculs a year. Out of 25 *post offices* in Shensi which have furnished statements, five mention Kansu opium as arriving in the province, and from one place (Shangchow) it is reported that several thousand piculs arrive in the province from Shansi yearly.

KANSU.—*Chungking* estimates importations at 1,000 piculs a year.

SZECHWAN.—*Chungking* estimates the importations from other provinces at 7,000 piculs. Although Yunnan opium enjoys a superior reputation and is smoked by the wealthy, dealers give only a total of 1,500 piculs as coming to Suifu, the chief *entrepôt* of the Yunnan trade, and admit that the so-called Yunnan opium sold and exported in Szechwan contains but 30 per cent. of that drug mixed with superior local opium. Some Kweichow opium enters by the Yungning, P'ingt'an, and Ch'i Rivers, and a little is heard of as coming from Shensi, but, the four provinces having such a redundancy, there can be little profitable interchange. From the *Wanh sien* report it is gathered that all the opium consumed is of local growth.

KWEICHOW.—*Chungking* estimates importations at 2,000 piculs a year.

YUNNAN.—*Mengtsz* states that the small quantity of opium which entered the province from Kweichow and Szechwan is sent to the Tonkin market. About 690 piculs of Kweichow opium arrives yearly at Mengtsz for Tonkin, and in 1907 for the first time, owing to the scarcity of Yunnan drug, some 300 piculs of Szechwan opium arrived *en route* for Tonkin.

KWANGSI.—*Wuchow* states that the likin office had cognizance during the 33rd year of KUANG HSÜ (1907) of 5,651 piculs of opium imported, as follows: from Yunnan, 971 piculs; from Kweichow, 4,519 piculs; and from Szechwan, 161 piculs,—in all, 5,651 piculs; and that of this total 976 piculs passed into Kwangtung *viâ* Wuchow, while a good deal more may have gone into Southern Kwangtung. This leaves out of account the opium smuggled in for provincial consumption. *Nanning* states that in 12 months ending October 1908 440 piculs arrived at Nanning from Yunnan and 1,440 piculs from Kweichow, without reckoning what was smuggled. These figures show large reductions as compared with those of the year or two preceding.

(b.) TOTAL PRODUCTION.

The total production for all China during the year 1906 is roughly estimated to have been in the neighbourhood of 584,800 piculs, and for the year 1908—two years after the promulgation of the Anti-Opium Edict—the output is roughly estimated to have been about 367,250 piculs, which shows a decrease in production of a little over 37 per cent. This decrease is ascribed partly to the restrictions enforced by the officials against the cultivation of the poppy and partly to the ever-growing public opinion, which is more and more condemning the habit of opium smoking as being both disreputable and unpatriotic.

(c.) PRODUCTION PER PROVINCE.

The foregoing table shows the estimated production for each province. The second column gives MORSE'S estimate of 1905; the third, LEECH'S estimate of November 1907, forwarded from the British Legation at Peking to the British Foreign Office; the fourth column gives the Peking Board of Revenue's return for the 32nd year of KUANG HSÜ, *i.e.*, 1906; and the fifth and sixth columns an estimate for the years 1906 and 1908 culled and joined together from reports sent forward by the Commissioners of Customs at the various treaty ports of China. These reports are based on the personal investigations of the writers and assistance derived from inland postal officers, missionaries, and Chinese merchants, as well as an occasional recourse to official sources. It is acknowledged that accurate statistics about opium are most difficult to obtain in China, and it must therefore be understood that the figures given are in many cases only approximate and the result of sifting the scraps of information received here and there and the putting of "two and two together" in the minds of the framers of the estimates. This is more especially true in regard to the estimates for the inland provinces—the greatest opium-producing districts in China,—where the taxation is irregular and, for the

greater part, evaded, and where public or official returns are practically unknown. When, in addition, the percentage of an uncounted population, who locally consume the opium, is a matter of conjecture, the most carefully made computation may be easily controverted.

The following notes explain how the figures of production per province are arrived at:—

MANCHURIA.—The *Nvzchwang* Commissioner, assuming the population of the three provinces—Fengtien, Kirin, and Heilungkiang—to be 10,000,000 inhabitants, estimates the number of opium smokers at 2 per cent. of the total, *i.e.*, 200,000 consumers. The quantity of raw opium per smoker annually he takes at 4 catties, which gives a consumption for the province of 8,000 piculs yearly. Before the Anti-Opium Edict of 1906 the number of smokers was 50 per cent. greater, as since then there has been a decrease of one out of every three consumers. The local consumption was therefore at that time about 12,000 piculs yearly, to which should be added the amount exported, some 3,000 piculs, making a total output of 15,000 piculs. The export of opium from Manchuria has now practically ceased.

CHIHLI.—MORSE, in his book, "The Trade and Administration of the Chinese Empire," says that the opium produced in this province is probably 10,000 piculs per year, certainly, 5,000 piculs. The *Tientsin* Commissioner estimates that two-thirds of the opium consumed in the province is grown locally, and the total consumption before the Anti-Opium Edict was reported to be between 15,000 and 20,000 piculs yearly. Taking the mean, 18,000 piculs, gives some 12,000 piculs produced locally. Since the Edict the decrease in the number of smokers is said to vary from 20 to 50 per cent. Working on a safe average— $33\frac{1}{3}$ per cent.—the local outturn at the end of 1908 is about 8,000 piculs.

SHANTUNG.—In his report the Commissioner of Customs at *Chefoo* states that opium is extensively cultivated in the south-western and southern portions of the province, and that the area under cultivation in the spring of the year (1908) is reported to have been 100,000 acres, *viz.*, 600,000 *mou*. No estimate of the outturn is given; but assuming the average yield as 2 catties per *mou*, the same as for Manchuria, the total production should accordingly have been in the neighbourhood of 12,000 piculs. The Commissioner of Customs at *Kiaochow* reports that replies to letters of inquiry regarding production in the province give decreases in the area under cultivation during the last two years ranging from 40 to 70 per cent. It is therefore assumed that the decrease in the total land given to opium growing shows, since the Anti-Opium Edict, a falling off of fully $33\frac{1}{3}$ per cent. This makes an annual production previous to 1906 of 18,000 piculs.

KIANGSU.—The Commissioners of Customs at both *Chinkiang* and *Nanking* estimate that the annual production of opium in Kiangsu varies from 10,000 to 20,000 piculs, the latter amount representing a full crop; and the Chinkiang Commissioner states that for 1908, owing to restrictive measures and dry weather, the crop was reduced to 2,800 piculs, but the Nanking Commissioner estimates the quantity at 5,000 piculs. The *Shanghai* Commissioner quotes a letter from a Catholic priest to the effect that in certain districts in the north of the province the land under poppy cultivation some 10 years ago aggregated as much as 40 per cent. of the agricultural area; but during the past three years this proportion has much diminished, and for 1908 it was only 5 per cent.

CHEKIANG.—The estimates of the opium production in this province in 1901 gave the crop as amounting to 14,000 piculs, and the Commissioners of Customs at *Ningpo* and *Wenchow* estimate that the crop for 1908 was in the neighbourhood of 9,000 piculs. It is grown chiefly in the Taichow and Wenchow districts.

FUKIEN.—The *Foochow* Commissioner gives no estimate of the annual production, but simply says it has been large. The *Amoy* Commissioner estimates that \$2,000,000 worth of opium, at \$500 per picul = 4,000 piculs, is grown annually in the Amoy districts, and adding another 1,000 piculs for other districts, the outturn is some 5,000 piculs. In the spring of 1908 the Anti-Opium Society claimed that, owing to its efforts, the production of opium in the province had been reduced by 50 per cent.; so for 1908 the figure is put down at 3,000 piculs.

KWANGTUNG.—The Commissioner at *Swatow* reports that opium was formerly grown in eight districts, that the cultivation has been entirely stopped in five districts and reduced 75 per cent. in two, and that there has been little or no reduction in one. The *Canton* Commissioner reports that the poppy cultivation has practically ceased. MORSE gives 500 piculs as the annual production, and in consideration of what is stated above, the production for 1908 is estimated at not more than 200 piculs.

HUNAN.—The Commissioner at *Changsha* reports that the soil of Hunan is not suitable for poppy growing, though in a few districts a small amount is grown for private consumption only, none being for sale. An estimate made at *Yochow* in 1901 gives the production of the province at 1,000 piculs. That amount is accepted as the estimate for 1906 and cut in half for 1908.

HUPEH.—The Commissioner of Customs at *Hankow* states that the cultivation of opium in the eastern portion of the province is inconsiderable, the soil generally not being suitable to its growth. One district, however, seven years ago produced from 900 to 1,600 piculs a year, while to-day both native and foreign sources report that very little, if any, land is given over to the cultivation of the poppy. Another district is reported to have formerly grown some opium, but of late years it has diminished very much in quantity. The eastern half may have therefore some years back produced in the neighbourhood of 1,500 piculs annually. The *Ichang* Commissioner reports that he estimates the annual output of opium in that part of Hupeh as 1,500 piculs; but he is also informed that the area under cultivation is steadily decreasing.

KIANGSI.—The *Kiukiang* Commissioner states that very little opium is grown in the province. In some places, however, it is grown in gardens for private use.

ANHWEI.—The *Wuhu* Commissioner estimates the annual production to be not less than 3,000 piculs at the present time. He states that since the Anti-Opium Edict there has been a reduction in the area under cultivation in some districts of from 50 to 80 per cent. His estimate is consequently doubled for 1906.

HONAN and SHANSI.—No estimates are available. There can be little doubt, however, that the production in 1906 amounted, at the very least, to 15,000 piculs for Honan and 30,000 piculs for Shansi, as the Board of Revenue's return gives 5,283 and 9,666 piculs respectively for these two provinces. These figures are reduced one-third for 1908.

SHENSI.—The *Chungking* Commissioner states that before the famine of 1873 Shensi is said to have supplied 30 per cent. of the native opium in China, and he estimates the annual production as 50,000 piculs.

KANSU.—The *Chungking* Commissioner says opium is cultivated everywhere in the Kansu province, the drug being of superior quality and flavour, and estimates the annual production to be 34,000 piculs.

SZECHWAN.—The *Chungking* Commissioner also reports that the poppy for many years has been the principal and most profitable product of Szechwan, and estimates the quantity produced annually to be 238,000 piculs. While giving statistics showing an enormous decrease in the number of smoking divans in both *Chengtü* and *Chungking* (*Chengtü*, over 7,000 in 1904 and less than 100 in 1908; *Chungking*, over 1,600 in 1906 and 85 registered houses in 1908), and stating that "The logic of the prohibitory Edict of September 1906 appealed strongly to the common sense of the people, and they are proving amenable to the enforcing regulations of the provincial officials," he gives no estimate of the decrease in the smoking habit. As the province of Yunnan reports a decrease since 1906 of fully 50 per cent. in the production of opium, the inference to be drawn is that Shensi, Kansu, and Szechwan, have likewise reduced their output. The estimates for 1908 have consequently been reduced, roughly, one-third of the figures for 1906.

YUNNAN.—The *Mengtsz* Commissioner estimates that the total production of opium in Yunnan two years ago amounted to 78,000 piculs, and that it has been reduced by not less than 50 per cent. since the promulgation of the Anti-Opium Edict in September 1906. This gives a total production for 1908 of 39,000 piculs.

KWEICHOW.—The *Chungking* Commissioner states that opium is produced throughout the province. The *Miaotzü* tribes grow it extensively, but smoke little. He estimates the production to be 48,000 piculs annually. Kweichow is under the jurisdiction of the energetic Yunnan Viceroy; but being farther away from head-quarters, the 1908 estimate of production is reduced by one-third only instead of by one-half as in the case of the sister province.

KWANGSI.—The *Wuchow* Commissioner states that opium is grown in minute quantities in certain districts; and the *Nanning* Commissioner reports that the production, never large, has been reduced in recent years to zero. For 1906 the production is put down at 500 piculs and for 1908 at 150 piculs.

NEW TERRITORY.—The production for 1906 is placed at 500 piculs, and that for 1908 at 300 piculs.

(d.) COMPARISON WITH FOREIGN OPIUM.

Opium as it appears on the market is not ready for use until it has been subjected to a boiling process, and all extraneous matter filtered from it, when it is known as prepared opium. The percentage of the drug in this prepared state yielded by the various kinds of raw opium is as follows:—

Malwa	60	per cent.
Patna	53 to 55	„
Benares	53 „ 55	„
Native	62 „ 65	„

Patna and Benares opium is covered with a thick husk, the weight of which is included in the above figures, so that the yield is less than in the case of Malwa, which has no similar covering. Generally speaking, a ball of Patna or Benares opium, weighing on an average 3 catties (48 ounces), will give 26 to 29 ounces of prepared opium.

A rather remarkable exception to the above average is provided in the case of opium grown in Manchuria, 1 ounce of the first quality of which will yield, it is stated (Newchwang), as much as 8½ mace of prepared opium. In addition, it is averred, a further 7 mace of good opium can be obtained by reboiling 1 ounce of the first quality dross. 1 ounce of medium quality of the raw Manchurian drug gives 7 mace, and of third quality 5 mace, of prepared opium.

It is usual everywhere to add a certain proportion of dross to raw opium before boiling it down. At Hangchow as much as 50 to 60 ounces weight of the dross are added to every 100 ounces of the raw product; but the actual quantity varies considerably according to place and circumstances. At Shanghai first quality prepared opium is said to be made up as follows:—

Benares or Patna	60	per cent.
Malwa	10	„
Native	20	„
Dross	10	„

Second-class quality is understood to be prepared entirely from native opium and dross in the proportion of 40 per cent. of the former and 60 per cent. of the latter, whilst lower qualities are adulterated with sesamum-seed cake, burnt sugar, etc. The amount of dross yielded by the various qualities of prepared opium varies, as a rule, from 40 to 70 per cent.

The relative strength of Chinese and Indian opium is generally conceded to be in the proportion of 75 to 100, which means that 4 mace of native opium are required to produce the same effect as 3 mace of the Indian variety. In a recent number of "La Revue," a writer—a practical chemist—compares the harmful and other qualities of Indian and Chinese opium, taking the Benares as an example on the one side and opium grown in China on the other. The harmful constituent, and that which gives opium the specific qualities sought for by smokers, is, of course, the alkaloid morphine, of which, he says, the Benares variety contains about 7 per cent. He continues: "Chinese opium contains, however, another alkaloid known as thébaine, the action of which is directly contrary to that of morphine in the ratio of 25 to 1." Assuming this analysis to be correct, opium which contained these two alkaloids in proper proportions would be practically innocuous. "Opium grown in China contains as much as 0.06 per cent. of thébaine, and but 5 to 6 per cent. morphine," and thus may be said to be less harmful than the Indian product. But this single experiment, whilst interesting, can scarcely be considered conclusive. The varieties of native opium appear to differ, and an analysis of Manchurian opium, for instance, might give altogether different results to that of the kind "grown in China" referred to by the writer of the article in question. The subject seems, however, worthy of further research.

(e.) PRICES, WHOLESALE AND RETAIL.

During the past 12 months the price of native opium has risen in a very striking manner all over China. The reasons given for this are (i) diminished supply due to reduced cultivation, and (ii) increased demand, confirmed smokers laying in supplies for the future.

Newchwang gives *Hk.Ts.* 960 per picul as the present wholesale price of Manchurian opium. The Kansu and Shantung varieties can be bought there for *Hk.Ts.* 533 a picul.

At *Tientsin* the local product, which is of poor quality, is retailed at \$0.70 to \$0.60 per ounce (*liang*).

At *Kiaochow* the movement and sale of opium are under official control. The price of raw opium is given as \$0.45 to \$0.88 per ounce, according to quality. Prepared opium, consisting of Indian and native varieties mixed in certain fixed proportions, is retailed at the following rates per ounce: 1st quality, \$1.50; 2nd quality, \$1.25; 3rd quality, \$1.

The market price of raw opium at *Chinkiang* is now *Tls.* 544 per picul; in 1907 it was *Tls.* 352 only.

Ningpo reports that the price of raw opium has risen lately from \$4 to \$8 a catty, and *Hangchow* gives the following rates:—

Chekiang opium	\$850 to \$890 per picul.
Yunnan „	871 „
Szechwan „	858 „
Kiangsu „	884 „
Shensi „	836 „

At *Amoy* wholesale prices for the raw product are as follows:—

Fukien opium	\$500 per picul.
Yunnan „	810 „
Szechwan „	800 „

Native raw opium realises *Tls.* 544 a picul at *Canton*, and when prepared it is retailed at *Tls.* 0.60 an ounce.

The price of Yunnan raw opium per picul at *Hankow* is *Tls.* 672, and of Szechwan, *Tls.* 544. In its prepared state the former is sold at \$1.10 per ounce, other varieties costing only \$0.95.

At *Shasi* \$928 is paid per picul for Yunnan opium, and \$800 and \$672 for the Szechwan and Kweichow varieties respectively.

In *Shansi* poppy juice realises from 100 to 200 cash an ounce; and the price of the raw product in *Shensi* is stated to be from *Tls.* 180 to *Tls.* 200, according to consistency and quality.

The cultivator in *Szechwan* expects to get 120 cash for every ounce of his raw drug when he disposes of it to the middleman.

At *Mengtsz* the present price of raw opium per picul is \$560 to \$608.

The price of Kweichow opium at Anshun, in *Kweichow*, is *Tls.* 3 or \$4.17 a catty. Conveyed to Chingyuan, in Kwangsi, it realises *Tls.* 5, or \$6.95, a catty. At Chingyuan the sale of opium is a Government monopoly, and prepared opium is retailed at *Tls.* 0.60 or \$0.84 an ounce, *i.e.*, \$13.44 per catty.

The following table gives the Customs returns values of native opium at *Shanghai* for the years 1869 to 1908:—

*Appeared in Trade Returns as "Opium, other Provinces."

IV.—CONSUMPTION OF OPIUM.

If to the figures showing the total production of home-grown opium we add the amount imported from India and elsewhere, and deduct what is exported to neighbouring countries, *e.g.*, Burma, Tonkin, etc., we arrive at the quantity consumed within the Empire. The total production of native opium for 1906 is estimated as 584,800 piculs, reduced in 1908 to 367,250 piculs. Thus we have:—

	1906.	1908.
	<i>Piculs.</i>	<i>Piculs.</i>
Native opium	584,800	367,250
Foreign opium	54,117	48,397
Total	638,917	415,647
Less estimated exports	25,000	18,000
Quantity consumed in China	613,917	397,647

These figures, it is true, are merely approximate; but they are based on reports received from observers in 16 of the 18 provinces of China proper, and may be regarded as an impartial attempt to estimate the quantities of opium produced and consumed during the years 1906 and 1908 respectively.

Dealing now with the different provinces.

MANCHURIA.—The proportion of smokers throughout Manchuria is estimated (*Newchwang*) to be 2 per cent. of the total—or about 10 per cent. of the adult male—population. In some parts of the province the proportion is very much larger than in others. *Antung*, for example, returns an estimated average of 20 per cent., that is, one in five of the population, and at many other places the proportion is calculated to be from 10 to 20 per cent.

CHIHLI.—Between 20 and 30 per cent. of the adult male population of Chihli are calculated by the Tientsin Commissioner to smoke opium.

SHANTUNG.—The *Chefoo* Commissioner thinks that one-third of the adult male population of his district are addicted to the vice; whilst the number of smokers at *Kiaochow* is roughly estimated at 2,200 out of a total population of 44,400, or 5 per cent.

KIANGSU.—Reports from Kiangsu vary somewhat; but missionaries in touch with the people concur in believing that in rich communities in the neighbourhood of *Shanghai* as much as 20 per cent. of the population smoke, whilst among the peasantry the proportion is not more than 4 to 5 per cent. The *Chinkiang* Commissioner is of opinion that in cities about 10 per cent. of the men and 1 or 2 per cent. of the women smoke, but that among the country people not more than 1 or 2 per cent. of the men use opium, and none of the women; whilst a report from *Nanking*, based on observation made by missionaries, states that only 5 per cent. of the adult population are considered to be consumers, as compared with nearly 20 per cent. previous to the issue of the prohibitory Edict and proclamations.

CHEKIANG.—The Commissioner of Customs at *Hangchow* considers that 5 per cent. of the total population of Chekiang are addicted to the opium habit, but that it is on the decline. In the vicinity of *Ningpo* the number of smokers is thought to be nearly 2 per cent. of the total—or from 6 to 8 per cent. of the adult male—population; whilst for the *Wenchow* and *Chuchow* prefectures, where a good deal of opium is grown, the proportion of *habitues* is given as 20 per cent. of the adult male population in urban and 10 per cent. in the country districts.

FUKIEN.—In and around *Amoy* 25 per cent. of the population are slaves to the pipe, though the number of smokers is believed to be diminishing. The proportion in other places is not so heavy. Information received from the *Ch'uanchow* prefecture is to the effect that in the cities and large villages between 2 and 3 per cent. of the people smoke opium, and in rural districts probably not more than 1 per cent.; and a resident of the *Yungch'un* prefecture reports: "About one-tenth of the male adult population in this region smoke opium, swallow, or inject morphia." The Commissioner of Customs at *Foochow* writes: "Estimates vary very greatly as to the percentage of the population who use opium. The Anti-Opium Society has recently taken a census with a view to the registration and licensing of smokers, and by this means has arrived at the following estimate:—

"1. Members of the gentry, teachers and students in Government schools, civil and military officials who still smoke but are under orders to stop within six months	1 ½ per cent.
"2. People of the broader classes, who have owned to being smokers 1	"
"3. Those who have no opportunity, or are afraid to smoke, and who are swallowing opium or morphine pills	1 ½ "
"TOTAL	<u>4 per cent.</u>

"But there can be no doubt that an estimate arrived at in such a way must fall very far below the mark. For so long as opium is so readily obtainable as it is, and doubtless will continue to be for a long time to come, the average smoker will probably refuse, from one motive or other, to admit that he is addicted to a habit which is legally forbidden to the vast army of office holders and office seekers, and which has become the object of popular denunciation and widespread fear and dislike amidst all classes." The report continues: "A native observer, who has made inquiries of retail opium dealers and others, gives it as his opinion that about 20 per cent. of the adult population use opium more or less. Classifying the consumers according to standing or occupation, he estimates the percentage as follows: officials, 5 per cent.; yainên people, 20 per cent.; gentry, 10 per cent.; soldiers, 2 per cent.; merchants, 10 per cent.; shopkeepers, 5 per cent.; farmers, 10 per cent.; carpenters, 20 per cent.; masons, 25 per cent.; chair coolies, 80 per cent." There exists, of course, some foundation for these figures, but it is admitted that the estimate is little better than guesswork.

KWANGTUNG.—Formerly, says a *Canton* report, 33 per cent. of the adult male population smoked opium; now not more than 10 per cent. do so. The Commissioner of Customs at *Kongmoon* gives about 2 ½ per cent. as the proportion of opium smokers in that district. He considers that consumption is decreasing, and observes that moderate smokers are giving up the habit. *Samshui* reports that less than 10 per cent. of the population smoke, and that the proportion is constantly declining. The *Pakhoi* Commissioner is of opinion that "as many people use opium in China as whisky in England," and thinks the consumption in his district is not sensibly diminishing. By comparing all the figures obtainable, the Commissioner of Customs at *Swatow* arrives at the conclusion that the proportion of smokers is 25 to 30 per cent. of the population in the larger centres, and about 5 per cent. of the country people.

HUNAN.—According to reports from *Changsha*, the proportion of confirmed smokers in Hunan is not more than 1½ per cent. of the total population; but there are *occasional* smokers, say, 40 to 50 per cent. of the adult male population. The Commissioner of Customs at *Yochow* observes that the estimates given vary considerably. Where opium is produced the proportion of smokers to the population is very high—the Chinese say 20 per cent., and the missionaries 40 per cent. Workmen apparently smoke most, next are the small traders and shopkeepers, then come merchants, and last on the list are the farmers. Less than 5 per cent. of those that indulge belong to the gentler sex.

HUPEH.—Basing his opinion on local observations, the *Hankow* Commissioner thinks that a low average of the proportion of smokers to the total population in that part of the Empire is 20 per cent., whilst a *Siangyangfu* correspondent puts the percentage at “15 for the smaller towns and villages, and anything from 45 to 60 for the big cities.” Hupeh is, it would seem, a veritable hotbed of the vice, for the prevalence of smoking amongst all classes is further borne out by a report from *Shasi*, which says: “About 22 per cent. of the total population are opium smokers, amongst whom are many young women.” The *Ichang* Commissioner estimates the number of habitual smokers in Ichang itself as one-third of the total adult male population; but he thinks the habit, on the whole, is decreasing. The medical officer of that port states that in the cases which come to him for treatment at the hospital not less than 50 per cent. of the men indulge in opium.

KIANGSI.—“Before the Anti-Opium Edict,” reports the Commissioner of Customs at *Kiukiang*, “40 per cent. of the adult male population smoked opium. Of these, 30 per cent. (mostly poor people) have given up the habit, 30 per cent. have substituted the drug in some other form, and 40 per cent. still smoke in their own homes.”

ANHWEI.—Widely divergent estimates were given to the *Wuhu* Commissioner in reply to many inquiries made by him regarding the percentage of the population that smoke, but he inclines to the belief that about five out of ten adults in the province of Anhwei use opium in one form or another. He adds that owing to the high price of foreign opium about 70 per cent. of those who smoke use the native drug. The consumption of opium has undoubtedly decreased amongst the middle and poorer classes, but only a very few of the well-to-do have given up the habit.

HONAN.—For Honan the proportion of smokers in the total population is given as 15 per cent. for cities, 5 per cent. for market towns, and 2 per cent. for villages.

SHANSI.—No information has come to hand with regard to the consumption of opium in Shansi, but as the province produces a considerable quantity of the drug, the percentage of smokers may be assumed to be proportionately heavy.

SHENSI, KANSU, and KWEICHOW.—The *Chungking* Commissioner is of opinion that 20 per cent. of the adult population of Shensi consume 2 mace of prepared opium a day. He also estimates that 12 per cent. of the adult population of Szechwan, Kweichow, and Kansu respectively smoke a similar amount, and he adds that these estimates, both as regards percentage and quantity, are lower than any supplied in answer to exhaustive inquiries. “Women,” he says, “smoke as habitually as men, and youths of 18, especially in Shensi and Kansu, are frequently smokers.” Referring more especially to Szechwan, the home of opium, the same report says: “Replies received to the query ‘What percentage of the population smoke?’—from officials, gentry, missionaries, and the people—range from 20 to 75 per cent., with an average of 34 per cent. An official estimate supplied after due consideration gives 30 to 40 per hundred of the adult population.”

YUNNAN.—The *Mengtsz* Commissioner estimates that two years ago, before the promulgation and enforcement of the Imperial Edict, 50 per cent. of the adult male and 10 per cent. of the female population were addicted to the opium-smoking habit; but since then drastic measures have been taken, at the instance of the Viceroy, by the officials in most of the large centres to suppress the vice. These efforts have been so far successful that 45 per cent. of the smoking population are said to have given up the habit completely, 15 per cent. have been nearly cured, and 40 per cent. continue to use the drug. In 1901 the Commissioner of Customs at *Szema* calculated that 50 per cent. of the total adult population of the province were more or less regular smokers, and stated that missionaries many years resident in the province usually place the percentage at a much higher figure, the number of men and women using the drug in many districts being almost incredible. Writing from Szema in October

1908, the Commissioner of Customs reports that a house-to-house visitation in the town and suburbs had just been completed by the officials, who supplied him with the following figures:—

Number of male opium smokers	529
Number of female opium smokers	83

This represents, roughly, 26 per cent. of the adult male and 4 per cent. of the adult female population.

In his report from *Tengyueh* the Commissioner says that he is informed that three-tenths of the total population are addicted to the vice; but public opinion against the habit is making itself felt, and the demand for opium is diminishing.

KWANGSI.—The *Wuchow* Commissioner thinks that 33 per cent. of the adult male population of Kwangsi use the pipe with more or less regularity, and to an extent limited more by individual means than by actual craving for the drug. The percentage of smokers in the villages is much greater than in the cities, and there are more smokers in the northern and western prefectures than in the remainder of the province. In some parts the proportion is said to be as high as 50 and even 60 per cent. of the male population; but at Wuchow it is believed to be now not more than 20 per cent. As to races, it is said that the proportion of smokers is about 20 per cent. among the Cantonese, 5 per cent. among the Hakkas, 30 to 40 per cent. among the semi-civilised “Ch’uang-ku,” and only 1 to 2 per cent. among the Yao tribes.

Whilst attempting no estimates for the whole of Kwangsi, the Commissioner of Customs at *Nanning* supplies some interesting information as to the number of smokers at that one centre. He writes: “According to the latest census, which was taken in 1907, the population of the city of Nanning consists of 22,911 males and 14,971 females. The garrison, amounting to 1,000 soldiers, should be added to the male figures, thus making 23,911, from which 2,500 children should be deducted. Children do not smoke, and the number of women who do so is altogether insignificant The net result of careful inquiry pursued in many directions and by various methods gives the number of smokers in Nanning at 4,000, that is, 10 per cent. of the population, or 18 per cent. of the males. Certainly the percentage is a very high one, and certainly, too, the lowest that can be given. I gave the figures to one who has had a pretty extensive acquaintance with smokers here and asked him how he would classify the smokers. His classification is as follows:—

- “ 400 in whom the vice is most deeply seated;
- “ 1,200 who smoke regularly and continuously, and are definitely committed to the vice;
- “ 600 who have acquired the desire, but who do not yet indulge to marked excess;
- “ 1,800 who smoke in moderation, or only casually and irregularly.

“The course of the inquiry revealed more particularly the shopkeeping class and that section of the population given to sedentary pursuits as most prone to the evil.”

The conclusion that one draws from these reports is that opium smoking is not a practice of the comparatively few, but of a very large proportion of the population, and that it permeates all classes of the community throughout the Empire. In some districts the pipe claims most devotees amongst the well-to-do; in others—Foochow, for example—the lower classes are conspicuously affected. That the percentage of smokers in the west is so great is due partly to the extensive cultivation there of the poppy many decades before it became diffused throughout China; but the depressing climate, and the existence of a strong Mahomedan element in the population, to whom opium offers a solace during the long religious fasts and interdicted use of alcohol, may also be cited as contributory causes for the spread of the habit.

The proportion of smokers is usually greater in the cities than in the villages, but in one or two provinces where much opium is produced the reverse seems to be the case. But the impression left on one’s mind by a perusal of the various reports is that there exists a preponderating number of irregular or casual smokers, who only “hit the pipe” (to use an expressive Americanism) when circumstances allow, which is equivalent to saying, when they can *afford* to do so.

This question of means is an important one, and it should be taken into consideration in any attempt to estimate the number of smokers in a population from any known consumption of the drug. It is exceedingly easy to assume, for example, that each *habitué* consumes 2 mace weight of prepared opium *per diem*; but the cost of that quantity of the drug would be prohibitive in the case of many thousands of smokers amongst the lower

classes, who by continuous labour only manage to gain a bare subsistence. At Shanghai the lowest quantity of prepared opium of the very poorest quality retailed is 3 candareens weight, which costs 38 cash—a trifle more than 3 cents, and this quantity affords sufficient for—at the most—three pipes. Another important factor that is not sufficiently allowed for in such calculations is the extent to which opium is adulterated. Even the best quality of the prepared article sold in Shanghai contains 10 per cent. of dross, that is, opium which has already passed through the pipe.

In view of the fact that the individual consumption appears to range from one or two pipes to as much as 1 ounce and even more *per diem*, the proportion of smokers to the population is exceedingly difficult to determine. The ordinary smoker of the shopkeeper class usually sets aside \$0.10 a day as the price of his indulgence, which is equivalent to saying that he consumes no more than 1 mace weight of prepared opium daily. A man who got through as much as 4 mace a day would be regarded as a confirmed and heavy smoker. It seems probable, therefore, that an estimate based on the hypothesis that half the total of the opium consumed is used by smokers who do not exceed 1 mace a day, while the other half is used by smokers consuming 4 mace a day, would nearly approximate to the actual facts. Proceeding on these lines, and allowing for the practice of adulterating the drug, we arrive at the following results—assuming that the figures quoted at the commencement of this article are approximately correct:—

Consumption of raw opium, 1906	613,917	<i>Piculs</i>
Allowing a loss of 40 per cent., this will be		
equivalent to prepared opium	368,350	,,
Add one-third for dross and adulteration, <i>i.e.</i>	122,783	,,
TOTAL	491,133	<i>Piculs</i>
One-half of this total divided by the daily rate for		
heavy smokers, <i>i.e.</i> , 4 mace, gives	2,691,140	
One-half at the rate of 1 mace daily gives	10,764,559	
TOTAL NUMBER OF SMOKERS.	13,455,699	

The population usually assigned to China is 400 millions, of which it is fair to suppose that 50 millions are adult males. The proportion of smokers to the total population at the end of 1906 was, therefore, according to this estimate, a little over $3\frac{1}{3}$ per cent., and to the number of adult males 27 per cent. During the past two years the consumption is believed to have diminished by about one-third.

(b.) CLANDESTINE TRAFFIC IN MORPHIA.

That the clandestine importation of morphia is undoubtedly increasing to an enormous and alarming extent there can be no possible doubt, and the difficulties of controlling this illicit traffic is referred to in many of the reports received. Considerable impetus seems to have been lent to the trade in morphia by the action of the officials in carrying out the prohibitory Edicts, and by the anti-opium movement generally. The comparative cheapness of the drug, the facility with which it can be obtained, and the ease with which it may be administered—outbidding opium as it does on all three points,—constitute a very serious danger to the people, especially to the lower classes. So easily indeed is it imported on the person and surreptitiously disposed of, that, failing the adoption of special measures for its restriction, the smuggling of morphia may be expected to flourish. Its use subcutaneously is not yet to be found everywhere, and in the more distant provinces even the name of the drug is unknown; but there are strong reasons for fearing that morphia and instruments for its application are insidiously making their way into the very heart of the Empire. By reason of their cheapness the products of Japan have a virtual monopoly in Manchuria and along the lower part of the Yangtze Valley; in the southern provinces they have to compete, it seems, with morphia and instruments manufactured in America, Great Britain, and on the continent of Europe.

Passages from the various reports dealing with this important question are given below. Attention is specially called to one aspect of the trade, referred to by the Swatow Commissioner, viz., the percentage of emigrants addicted to the morphia habit, as it implies a possibility of the vice being spread by them to other countries.

MANCHURIA.—At *Newchwang*, although the Customs statistics show practically no arrivals, morphia is being sold by Japanese hawkers and druggists, either openly or under such euphemistic names as *chih-shui-yao* (致睡藥) or *chih-tung-yao* (止痛藥). Chinese shops are forbidden to deal in the drug under penalty of two years imprisonment with hard labour. The use of morphia is on the increase. For this the anti-opium crusade is partly responsible. Many smokers honestly desirous of breaking off the habit have been deluded into believing that morphia would free them from the yoke; others, intimidated or hampered by official restrictions, have merely substituted one vice for the other; whilst many coolies resort to it on the ground of economy and convenience, \$1 worth going as far as \$3 worth of opium.

Japan is stated to be the chief source of supply, and the Japanese to be mainly responsible for its sale in Manchuria. The high tariff duty of *Hk.Tls.* 3 per ounce hinders open importation, but smuggling is comparatively easy. In particular, the traffic across the extensive Korean frontier is reported by the *Antung* Commissioner to be very large. As proof of this he mentions that one Japanese merchant at *Antung* openly retails morphia in quantities of from one to 100 bottles, containing one-eighth of an ounce each. The price, roughly, is *Yen* 7 an ounce; but the wholesale price in Japan is about *Yen* 4.80 an ounce, to which must be added Customs duty, *Hk.Tls.* 3, or *Yen* 3.90, and cost of carriage! The retail price at *Newchwang*, as given by a Japanese druggist, is \$1.05 for a small bottle, containing about one-eighth of an ounce. European morphia is stated to be just double these rates.

In the interior of Manchuria the use of the drug is not generally known, but, having in mind the quantities of morphia pouring into the coast ports, one may surmise that this happy ignorance will not long continue. The *Antung* report states “that there arrived at *Shin Wiju* by parcel post during the three months of August, September, and October 1908, 498 ounces of morphia consigned to Japanese merchants in *Antung* . . . and 213 ounces for *Shin Wiju* merchants.” The Commissioner is unable to say positively that all these consignments were smuggled across the river into *Antung*, but investigations point to that conclusion.

Instruments for the subcutaneous injection of the drug can be purchased from Japanese druggists for from \$1.50 to \$2 a set.

CHIHLI.—The Commissioner of Customs at *Tientsin* reports that the subcutaneous injection of morphia is not generally prevalent in the province, but that in the few cases observed by missionaries the needles were of Japanese make.

SHANTUNG.—According to a report from *Chefoo*, morphine is said to be unknown in that district, whether as a substitute for opium or as a cure for smoking. None is imported into the province, and there are no means of ascertaining to what extent it is used in the various remedies sold. No morphia is openly imported into *Kiaochow*.

KIANGSU.—The following figures are adduced by the *Shanghai* Commissioner as proving that considerable quantities must be smuggled into the port:—

Home cost of morphia per lb.	<i>Hk.Tls.</i> 37.60
Import duty per lb.	„ 48.00
	85.60
TOTAL VALUE (excluding freight or postage)	<i>Hk.Tls.</i> 85.60

Yet the market price is *only Hk.Tls. 64 per lb.* Since the beginning of the anti-opium campaign, morphia has become the one remedy for curing the opium habit—with inevitable and disastrous results. “The coolie class pay as little as 14 cash for an injection, of sufficient strength to satisfy the ordinary consumer”: whereas the least quantity of opium retailed costs 38 cash. The syringes met with are usually of Japanese make. There are some Chinese needles copied from a foreign model, and terrible wounds are sometimes the consequence of the use of non-sterilised needles by the morphinomaniac. Morphine and hypodermic syringes are hawked all over the country by petty Japanese traders. Large stocks are kept in smugglers’ private houses, and gradually disposed of to small Chinese medicine shops. Glass syringes cost \$50 a dozen; those made of hornware cost \$20 a dozen; while a native-made variety is obtainable at \$5 a dozen.

With regard to the sources of supply, a writer in the “*London and China Express*” of the 3rd July 1908 says: “By those who know, morphia can be bought in any quantity. It apparently comes in great quantities from the Austrian firm of MELINDROT, but some also is sent by German, English, and Scottish manufacturers.” And again: “Orders for 1,000-lb. weight have been given in one transaction. . . . This smuggling is wholesale, while Chinese returning from Borneo, Java, Malaya, and Siam in a large number of cases bring morphia back as savings to China.” Dr. W. H. JEFFERYS, editor of the “*China Medical Journal*,” writes: “The real fire business is conducted by Japanese largely—almost entirely,—although I know of at least one Shanghai British firm which sells morphine to Chinese in quantity and without prescription. . . . I believe that Korea is the centre of the most active doings in this respect.”

Morphine is so easily concealed, owing to its small bulk, that in spite of very energetic measures in searching vessels and suspicious-looking persons the result at Shanghai has been almost *nil*.

The *Soochow* Commissioner remarks that morphia has but few devotees in that district. It is used to a certain extent by the coolie class, and from the nature of the marks on their arms it would appear that very crude instruments, probably of native manufacture, are employed.

At *Chinkiang* morphia is not much used, and its import and sale are both clandestine.

Nanking reports similarly that morphia is not appreciably in favour there. Some smuggling goes on, but not much.

CHEKIANG.—The morphia that finds its way to *Hangchow* is all from Shanghai, and usually smuggled. It is not used as a solution for injecting, but in the form of pills. In most places in the neighbourhood of *Ningpo* it appears to be unknown. Where it is found, it is invariably smuggled from Shanghai by local carriers. In the *Wenchow* district morphia is not in general use.

FUKIEN.—Prior to 1902, and the increase of duty on morphia, the recorded importation at *Foochow* averaged 2,700 ounces per annum. During the following three years only 8 ounces were imported, and since 1905 none whatever has been declared at the Customs. There is reason to believe that large quantities are smuggled in along the coast in junks from Formosa and into the open ports by steamers from Hongkong. The consumption of the drug is reported to be just as great as ever. Upwards of 30 medicine shops at Foochow deal openly in morphia, and some of these are believed to carry stocks of as much as 1,000 ounces. Most of the bottles bear the labels of British firms. Instruments for subcutaneous injection are also found, but are not in great demand.

The Commissioner of Customs at *Amoy* states that morphia is not manufactured locally. It comes chiefly from Germany, Japan, and Great Britain, and is all smuggled. 3 ounces only were declared at the Customs in 1908, as against 16,776 ounces in 1900. It can be bought in the Yungchun prefecture, where it is a terrible curse, from at least eight dealers, at \$8 an ounce. Instruments for injecting are made there of bamboo, pewter, or glass, and cost 20 cents or so each. The points of these locally-made syringes are very crude. It is estimated that 70 per cent. of the morphia sold is used for subcutaneous injection purposes, and the remainder for anti-opium remedies.

Amoy also reports that during the first nine months of 1908 cocaine hydrochlorate, to the extent of *Hk. Tls.* 21,000 worth, appeared—nearly all through the German post office. A good deal of morphia and cocaine brought into Amoy is smuggled out again to the Straits and Burma, as it is supposed that steamers from Amoy trading to those places will not be suspected of carrying such articles. Thus, lately, at Singapore 448 bottles of cocaine and 298 packets of morphia (weighing 50-lb.), were seized from the s.s. *Hongmoh*, running from Amoy and Swatow to that port.

KWANGTUNG.—Morphia can be bought at *Swatow* from respectable Chinese medicine and other shops for \$6.80 an ounce, and hypodermic syringes at 90 cents to \$1 each. The drug is mostly smuggled in by passengers, and the sources of supply are given as Japan, America, and Europe. The subcutaneous use of morphia is not so general in Swatow, it is said, as a few years ago; it has, however, been replaced by the habit of taking morphia pills—a vicious practice, said to be increasing largely. All reports received by the Swatow Commissioner from inland districts are unanimous in declaring that no morphia is used; but medical officers of the port assert that in every batch of emigrants examined by them there are about 10 per cent. who bear the marks of hypodermic needles.

Morphia is imported clandestinely at *Canton*, and may be purchased at most druggists, but the quantity consumed is not ascertainable. It is mainly used and sold by native shops dealing in European medicines and anti-opium remedies.

HUNAN.—At *Changsha* morphia is said to be practically unobtainable, but hypodermic syringes can be purchased at \$3.50 each from the native shops dealing in foreign drugs. The *Yochow* Commissioner states that very little morphia enters Hunan, but what does is supposed to be Japanese, imported under the guise of quinine, etc.

HUPEH.—Licit importations of morphia into *Hankow* are small, and generally for foreign drug stores or hospitals. "But it is known," says the Commissioner, "that the drug is smuggled in from Japan in no inconsiderable quantity." It can be obtained comparatively easily by those who want it, and the practice of subcutaneous injection is considered to be on the increase. "The drug mostly found here (in the form of morphia hydrochloride) comes from Japan in small 1-drachm bottles of cheap-looking glass, and is valued—before payment of duty—at \$1.50 or so per ounce." Its retail price is given as \$9 per ounce. The profits to be made by smuggling morphia are so great as to be well worth the slight risk of detection run. "Instruments for use when injecting the drug . . . now come mostly from Japan," many bearing the name of the manufacturing firm in Osaka. The cost of a set of instruments varies from \$2 to \$5. Drug and instruments are no longer sold openly, but it is only a question of "knowing the ropes" to obtain both easily. In all the cities and towns on either side of the Han River the people are largely addicted to opium smoking, being, in fact, the best customers of the Hankow dealers; but at Hanchwanhsien the morphia habit is also very prevalent, and the drug can be obtained on the streets.

Further up the Yangtze, at *Shasi*, morphia, said to be of Japanese manufacture, is imported surreptitiously and in apparently no small quantities. It is made up in packets of 10 grains, and is for sale at the opium shops at the rate of 1 cent a grain. Its use hypodermically is not common, though syringes made in Japan are for sale at the medicine shops at 3,000 cash per set.

Morphia is apparently not known at *Ichang*, except as entering into the composition of anti-opium remedies.

KIANGSI.—The *Kiukiang* Commissioner thinks that the subcutaneous injection of morphia has not yet been introduced into Kiangsi. But in the form of powder and pills morphine and other alkaloids of opium are being largely substituted for that drug. Cigarettes are also impregnated, he says, with some preparation of opium, and freely indulged in.

ANHWEI.—No reliable information can be obtained as to the extent to which morphia is used in Anhwei, but the *Wuhu* Commissioner says that there is no disguising the fact that it is sold secretly by those who smuggle it into the port from Shanghai. This applies also to hypodermic syringes, which, like morphia, are easily concealed. Only those who are personally known to the dealers can obtain the drug or syringes. The drug is retailed at \$0.07 a candareen, and a syringe set costs \$2.50. The medical officer of the port thinks, from his own observation, that the number of those who use morphia hypodermically is on the decrease.

HONAN.—It would appear that very few of the people of Honan know anything about morphia for injection purposes, though enormous quantities of the pills containing the drug are sold.

To the western and more distant inland provinces of China, *e.g.*, Shansi, Shensi, Kansu, Kweichow, Yunnan, and Szechwan, morphia has not yet seemingly found its way. In Kwangsi it is "known in name only to readers of Canton newspapers," and there is no present demand for either drug or instruments.

LIST OF SAMPLES OF ANTI-OPIUM PILLS.

NAME OF PILLS.	VALUE.	SELLER.	PLACE OF ORIGIN.	REMARKS.
Shên-p'ien	\$0.60 per tin...	Hu Te T'ai.....	Shanghai..	Contains morphia. A dose of three tablets corresponds to 3 grains = 1 mace of opium.
Ou-chia-yüan	\$0.10 per bottle	Kuang Ho Tung	Canton....	{ Contain morphia. The label gives no prescription, only the name of the Canton apothecary.
P'ing-ho-wan				
I-li-chin-tan	\$0.50 ,,	Hua Te T'ai.....	Shanghai..	Said to be made in Chefoo. Morphia pills. One pill to be taken at a time. Price high! Therefore high proportion of morphia!
Wên-ming-wan	\$1 ,,	Jui Chun	Shanghai.. (Japan.)	Made in Japan. 10 pills correspond to 1 mace of opium; nine pills to be taken after five days, etc.
Ssü-ko-ts'ao	\$0.20 per pkge.	Hua Te T'ai.....	(?Japan.)	Saturated with solution of morphia. One packet corresponds to 1 mace of opium. Gradually to be taken less.
Tzû-hsin-wan	\$0.03 ,,	Jui Chun	Shanghai..	Eight pills correspond to 1 mace of opium. After seven days seven pills to be taken, and so on; weekly one less.
Ya-chih-nai-wan.....	\$1 per box.....	Fu Shun T'ai ...	Japan.....	Shows morphine reaction. One box corresponds to 1 mace of opium.
Li-ch'iang-wan	\$0.03 per pkge.	,, ,, ...	(?Japan.)	15 pills correspond to 1 mace of opium.
I-shou-chin-tan	\$0.10 ,,	,, ,, ...	Szechwan.	10 pills correspond to 1 mace of opium, and 18 pills to 2 mace.
Ning-shên-wan	4 cash per piece	Tung Yü Ho	Contains morphia. Inscription on label insignificant.

VI.—ANTI-OPIUM REMEDIES.

NOT less important than the spread of the morphia habit is the manner in which the so-called anti-opium remedies are gaining a hold on the people. The consensus of opinion from the provinces is that nearly all these nostrums—chiefly pills—contain opium in some form or other; and so great is the consumption that opium eating is clearly in danger of becoming a regular substitute for opium smoking, one vice thus disappearing only to make room for another equally deleterious in its effects.

The following are a few extracts from reports received, dealing with this subject. In almost all, concern is expressed at the extension of the evil.

NEWCHIWANG (MANCHURIA).

Anti-opium remedies of various kinds are freely sold. Here again the Japanese take the lead, although some of the Shanghai nostrums make a good second. All of them probably contain morphia.

TIENTSIN (CHIHLI).

Reports from all sides agree that these so-called remedies, containing morphia, or more frequently opium, are used to an enormous and increasing extent, and that they are a greater curse to the people than opium itself. The pills can be purchased of any trader, and their source of supply is said to be, largely, foreign chemists of Tientsin. A large quantity is also probably smuggled in through this port.

KIAOCHOW (SHANTUNG).

Most of the pills imported come from Shanghai. An attempt is being made to analyse them, with the view of discovering how much morphine they contain. The result will be reported later.

SHANGHAI (KIANGSU).

Dr. R. H. COX gives the following information: "All effective remedies contain opium or its derivatives, *e.g.*, morphia, the quantity of morphia varying from one-fourth to one-eighth of a grain to each drachm of opium smoked. . . . Since the recent Edicts, a remedy known as 'Peking Tea' has been largely used by Peking officials. It seems to be ordinary black tea impregnated with morphia. It is taken as an infusion three times daily, and at the end of a fortnight it is replaced by a syrup made of opium ash. The prescriptions of foreign doctors vary very little: opium or morphia, with belladonna to counteract its ill effects, and nux vomica and quinine as tonics, given generally in the form of a pill."

NANKING (KIANGSU).

Several kinds of medicines containing morphine—so-called anti-opium remedies in the shape of pills, draughts, cakes, and other preparations imported from Japan—are sold openly in the numerous druggists shops in the principal cities.

NINGPO (CHEKIANG).

Morphia is said to appear in all the anti-opium preparations in the market; but the fact is not made apparent in any one of the advertisements concerning these nostrums. The directions say nothing about gradually decreasing the dose, and give no hint that smokers attempting to cure the opium habit may enslave themselves, by taking pills that contain morphia, to a habit more harmful than the one they wish to throw off.

HANGCHOW (CHEKIANG).

Morphia is not used here in the form of powder or in solution for injection, but is sold in the form of pills as an anti-opium medicine. These pills are made locally to some extent, but the greater number are manufactured in Shanghai.

AMOY (FUKIEN).

Any pills manufactured to remove the craving (opium smoking) may certainly be regarded as containing morphine or one of the alkaloids of opium.

SWATOW (KWANGTUNG).

The anti-opium pills prepared by . . . shop, which enjoy a high reputation for efficacy in Swatow, have been tested by the Customs medical officer, and found to give a slight morphia or meconic acid reaction, proving the presence of opium or its derivatives.

CANTON (KWANGTUNG).

There are different kinds of opium remedies: the average quantity of morphine used in each tael weight of such medicines is about 0.01 tael.

YOCHOW (HUNAN).

Remedies of all sorts are in great demand; only experience and education will teach their unreliability. Mission doctors say that no remedy will cure without firm determination on the part of the patient, medicine alone being of no avail. Given the will, even opium containing remedies may effect cures; without it, the "pill" habit will supersede the opium habit, and the last state will be no better than the first.

HANKOW (HUPEH).

Anti-opium pills containing a small percentage of morphia, and of Japanese origin, are imported at Hankow. Native-made pills, containing opium, opium dross, treacle, etc., are exported in considerable quantities, and are valued on export at *Tls.* 150 a picul.

From Siangyang a correspondent writes: "Any amount of anti-opium pills, of all sizes, names, and colours, are for sale. All contain raw opium or opium ashes, flour, treacle, and native drugs."

ICHANG (HUPEH).

Anti-opium pills contain a minute quantity of morphine, as well as of a drug called codeine, which is also an alkaloid extract of opium. 15 per cent. of the pills come from Japan, the remainder from Hankow, Shanghai, and Canton.

KIUKIANG (KIANGSI).

The Customs medical officer took great pains to elicit reliable information concerning the opium habit generally, and to verify facts for himself as much as possible. He obtained samples of so-called anti-opium remedies, both foreign and Chinese, but they all appeared to contain too much of the drug to be the genuine cure they claim to be. Several men who have taken these pills in good faith, and with the firm intention of curing themselves of the habit, have derived no benefit after giving them a fair trial, and have found the effect, in some cases, worse than smoking. That these so-called anti-opium remedies are only a substitute for the pipe is well known to all Chinese. Many drug stores, foreign and Chinese, are doing a lucrative business by the sale of these remedies.

WUHU (ANHWEI).

Anti-opium pills are sold and largely purchased by the poorer classes in order to satisfy the craving for the drug, as they contain either opium or morphia. The officials frequently test samples of anti-opium remedies, and thus check to a certain extent the open sale of those containing opium or morphia.

SIANGCHENG AND JUCHOW (HONAN).

Multitudes are said to be sustaining themselves on anti-opium pills containing morphia

TUNGKWAN AND SIANFU (SHENSI).

A proclamation issued during the 9th moon orders smokers to register themselves, and adds that smokers have been effectively cured in other places by anti-opium pills, which are now on the market for sale at very cheap rates.

SININGFU (KANSU).

Anti-opium pills are stated to be in great demand.

KWEICHOW, SZECHWAN, AND SHANSI.

Reports from these provinces make no reference to anti-opium remedies.

MENGTSZ (YUNNAN).

Anti-opium remedies are being distributed gratis at Yunnanfu by the officials.

WUCHOW (KWANGSI).

Anti-opium pills come from Canton, Kweilin, and Japan. It is said that some are made of opium dross and that some contain prepared opium.

The following list gives the names of the remedies most frequently mentioned :—

Japanese Remedies :

Ya-chih-nai-wan (亞支奶丸).
Ya-êrh-wan (亞爾丸).
Dr. EDEN'S gold and silver coated anti-opium pills.

Shanghai Pills :

Shên-p'ien (參片).
I-li-chin-tan (一粒金丹).
Wên-ming-wan (文明丸).
P'ing-ho-wan (平和丸).

Canton Pills :

Ou-chia-yüan (區家園).

Remedies of which the origin is not stated :

Ssü-ko-ts'ao (晒喝草).
Tzū-hsin-wan (自新丸).
Li-ch'iang-wan (立強丸).
I-shou-chin-tan (益壽金丹).
Ning-shên-wan (寧神丸).

Other Remedies :

O-lang-ts'ao (鵝郎草) or Chung-hsing-ling-ts'ao (中興靈草), also called
Yang-nai (羊奶), a kind of grass.
Lu-so-kao (蘇蘆膏).

VII.—ANTI-OPIUM MEASURES.

IN order to show how the crusade against the opium habit is being conducted all over the Chinese Empire, translations of certain Imperial Edicts (Appendix A), Government Regulations (Appendix B), and Provincial Proclamations (Appendix C), are appended. These have been selected from a mass of similar documents and could be multiplied *ad infinitum*; but in giving the proclamations of one province it practically means giving the proclamations for all China, as everywhere they resemble each other both in style and phraseology. In addition to translations of proclamations issued for the Fukien province (Foochow), a summary of those issued at Ningpo (Chekiang province) and at Tengyueh, in the far-away province of Yunnan, are added. There are also included some Memorials and Telegrams from the provinces *re* poppy cultivation and measures taken to suppress the same.

VIII.—EXTRACTS FROM THE REPORTS OF THE COMMISSIONERS OF CUSTOMS *RE* RESULTS OF THE ANTI-OPIUM MOVEMENTS.

MANCHURIA.—*Newchwang* reports: "The official measures taken in closing all opium dens, thereby lessening the temptation to indulge, and the growing public opinion, which is more and more condemning the habit, have undoubtedly had a deterring effect. Confirmed smokers now seek the privacy of their own rooms and conceal as much as possible the vice they are indulging in. This fact in itself is a very favourable indication of the public feeling against the habit, and the younger generation, no longer seeing examples of their elders smoking, are subjected to much less temptation than formerly. It is stated that during the past 18 months there has been a decrease of fully one-third in the number of opium smokers."

Antung reports: "From each source of information comes the report that the smoking habit is diminishing, worded in varying degrees from 'perhaps a little' to 'much diminished'. The Commissioner adds that Mr. Acting Vice-Consul RUSSEL'S statements under this heading have a valuable interest: "In the month of March of this year I travelled through Antung,

K'uantien, Huaijen, Tunghua, and Linchiang districts and also through Hsingchingting and Fenghuangting, I found that public opinion was generally favourable to the anti-opium movement. Opium smokers now as a rule indulge in the habit surreptitiously and as if they recognised that there is a certain moral and social stigma attaching to the habit. I did not see any opium dens open, but on one or two occasions noticed opium being smoked in the more remote country inns."

CHIHILI.—*Tientsin* reports: "It seems to be generally agreed that the number of smokers and the area devoted to poppy cultivation are decreasing, and it is admitted that the decrease is due almost entirely to the Opium Edict and official pressure; but whereas in some districts the local officials have taken stern measures to put a stop to both consumption and growth of opium, in others the thought of the loss of revenue that will follow the curtailment of poppy cultivation has been too strong, and little attention has been paid to the Edicts. The main hope for the future would appear to be that under official pressure the growing of opium may be entirely suppressed in a few years, and that the younger generation may learn the evils of the habit and have the opportunities for indulging in it curtailed."

SHANTUNG.—*Chefoo* reports: "Undoubtedly the number of smokers has greatly decreased, particularly amongst those who were formerly the worst victims of the habit—the educated class. It is said that only those retain the habit who cannot give it up (a considerable number it must be admitted), and none take to it for the first time. To the Imperial Edict of 1906 belongs, of course, the whole credit of initiating this reaction on the part of the intelligent section of the nation against a habit which had come to be regarded as part of the established order. But its force and duration must be ascribed to the prevailing temper and spirit of the people and the press, eager to revolt against abuses, real and imaginary, of all kinds."

Kiaochow reports: "The number of smokers amongst the respectable resident population has decreased since the issue of the Imperial Edict. Smoking is no longer considered right or proper, and there is a general consensus of opinion amongst them that it must be stopped and will be stopped as soon as the growth of the poppy is suppressed."

KIANGSU.—*Shanghai* reports: "Since the Edict was promulgated against the poppy cultivation and opium habit, the effect produced has been to create an active movement on the part of the officials, civil and military, who have constantly exerted themselves by issuing proclamations embodying the Imperial Orders. The gentry, with the co-operation of the new student element, have also been very energetic in their efforts to exercise good moral influence on the public mind. Pamphlets that opium smoking tends to deteriorate the race have not been spared by the anti-opium leagues and societies. Opium apparatus has been burnt publicly."

Nanking reports: "The habit seems to be decreasing. This is due to the effect produced by the anti-opium Edicts and official pressure, and to the moral influence exercised by well-thinking newspapers and pamphlets. Such publications profusely distributed impress the minds of the readers—

"*The moral effect* of the use of opium, which is of the most pernicious kind, which tends to paralyse the moral sentiment and prostrate the will.

"*The physical effect* which impoverishes, often leads to crime and family feuds, causes untrustworthiness leading to loss of place and confidence, and lazy habits leading to financial embarrassment and beggary.

"There is a praiseworthy effort made on the part of some confirmed smokers to get rid of the evil practice, and the closing of the opium dens has proved very inconvenient to the consumers and lessened their number. The younger generation is almost free of the habit, and the future looks hopeful. The high authorities of the capital came to the conclusion that a Government monopoly of the trade in opium was the only remedy to save the people from degradation and ruin, and hoped, by having the full control in their hands, to diminish gradually the use of the drug. Unfortunately, the scheme of the Government had to be abandoned for political reasons, and the question now remains how will China extricate herself from the pitiable situation and eradicate from her soil the curse inflicted on her teeming millions? The problem seems too arduous to be solved by the Chinese alone."

CHEKIANG.—*Ningpo* reports: "The smoking habit is undoubtedly on the decrease. In many places a strong public opinion supports the proclamations issued against opium smoking, and numbers of those who had recently formed the habit have thrown it off. The effect of the

Anti-Opium Edict is seen in the closed opium dens and restricted areas used for poppy cultivation. The results obtained vary in proportion to the energy displayed by local officials and gentry, and is largely influenced in different localities by the extent to which poppy growing has become an established industry, and the hold the smoking habit has obtained on the people at large. In Taichow, for instance, where young people in their teens are addicted to the pipe and where farmers depend greatly upon the opium crop, little has been accomplished in the way of reform."

Hangchow reports: "In this district the Edicts have undoubtedly produced some effect, but chiefly indirectly. In a few places they have produced a direct effect, *i.e.*, have been enforced by the officials. Mainly, however, the Edicts have been used by the gentry and merchants, who have in places called on the officials to enforce some of the regulations of the Edicts. In Hangchow city and neighbourhood the officials have done little, beyond closing (nominally at least) all the smoking dens and slightly reducing the number of shops selling boiled opium. From Kashing it is reported that before 1906 it was the custom among all classes to discuss business in opium divans; this is now not done. It is also said in that city that it is now considered 'bad form' to offer opium to guests."

FUKIEN—*Foochow* reports: "It is beyond all doubt that the increase in the ranks of opium smokers has been practically checked by the combined influence of the Imperial Edict and popular will. Opium smoking is no longer a fashionable pastime—a rakish habit which youth felt urged to acquire. It is now regarded as 'bad form,' and is distinctly out of favour with young men. All opium-smoking establishments have been closed; overt smoking at least has been suppressed in restaurants, inns, drinking houses, and brothels; and in private houses, as well as business places, the opium pipe is no longer kept in the reception room or offered to visitors. That many light smokers have succeeded in ridding themselves of the habit is unquestionable; but it must be feared that the greater part of the vast army of confirmed smokers will lack the will power to break it off, and that many in their pathetic efforts to find a cure are deluded by unscrupulous vendors of remedies containing morphia, and thus become the victim of this even more deleterious form of the drug. In the attainment of these results the influence, vigilance, and unremitting efforts of the Anti-Opium Society have been of inestimable value. The society has many prominent and influential men among its members; it has branches in almost every town and even in many villages; it is greatly trusted by the authorities in carrying out anti-opium measures, and it has, in the main, made good use of its influence. Small hospitals have been established by the society for the free treatment of opium smokers, and already, in March last, the society could report that over 2,300 persons had stopped smoking through the help of their hospitals alone."

Amoy reports: "Over 25 per cent. of the total population in and around Amoy are reported to smoke, though the habit is said to be diminishing owing to Anti-Opium Edicts which, backed up by direct official action, have caused—(a) opium dens to be closed; (b) hotels and brothels to be prohibited from furnishing customers with the drug; and (c) an Anti-Opium Association to be established, which is said to have relieved many people of the craving."

KWANGTUNG—*Swatow* reports: "In Swatow itself the practice of opium smoking is discredited and is no longer indulged in in public. It is said that many smokers have already reformed and many more are breaking off a habit which has fallen into disrepute. In 14 out of 19 districts in this prefecture smokers are decreasing considerably, which seems to be due as much to their own efforts and the influence of local Anti-Opium Societies as to official pressure. In the remaining five districts smokers are decreasing very slowly, or not at all, in spite of proclamations, which, however, are not seriously enforced."

Canton reports: "The effects of the Anti-Opium Edict are as follows: (1) all opium dens have been closed up, and the consumption of prepared opium suddenly diminished by 50 per cent.; (2) prior to the prohibition, implements for opium smoking could at any time be got in restaurants, shops, and both foreign and Chinese vessels; now this practice is at an end, which has largely contributed to decrease the number of opium smokers; (3) all officials, military and civil, as well as official servants, have been trying ardently to knock down the evil habit; and (4) all young men not having acquired the habit are afraid of doing so, and many old smokers show a strong desire to diminish their allowance."

Samshui reports: "The smoking habit is diminishing constantly. The Anti-Opium Edicts have certainly had a moral effect, but the diminution of the habit should mostly be attributed to the energy of the officials in carrying out instructions."

Kongmoon reports: "Opium smoking is gradually diminishing, especially among the better classes. It is estimated by the Anti-Opium Societies that some 30 per cent. of the opium smokers in this district have given up the habit, which good result is to be attributed more to moral influence than to official action or pressure. At present, among the better classes, it is considered degrading to be known as an opium smoker, and serious efforts are being made to lessen the evil."

HUNAN—*Changsha* reports: "The opium habit is greatly decreasing in Changsha, perhaps by as much as 20 per cent., such results having primarily been brought about by the Imperial Edicts, which have been taken seriously by the Hunan Governor, who, besides closing all opium shops, has given the anti-opium movement his strong support. All officials, and all those vast numbers who hang on to and get their living from or through officials, have been obliged to at least outwardly forego or modify indulgence in the habit. The so-called opium dens have been wiped out completely, and neither I nor my agents have been able to discover a single one in Changsha."

Yochow reports: "The Imperial Edicts have undoubtedly been the means of creating a strong public opinion against the use of the drug. Officials are removed from office for continuing to smoke, dens are nominally closed, and the evils of the habit are set out by the newspapers. There seems to be no doubt in the minds of the people that the Government is sincere in its avowed intention of putting down the practice; but it is only to be expected that the orders are not always given effect to by all the officials, and that the new regulations are often evaded."

HUPEH—*Hankow* reports: "There is no evidence of any popular feeling against the smoking habit such as has been so pronounced in other provinces, and until quite recently no steps were taken by the authorities to carry out the Opium Edicts; but in the principal cities measures more or less successful have lately been adopted to close the dens. These measures are, however, confined to the cities, and in the country districts the Edicts are a dead letter."

Shasi reports: "Evidence has been sought for, but none can be brought forward, to show that the opium habit has decreased among either the official class or the people. Personal observation helps to substantiate the fact. On every side in the streets and purlieus of Shasi the opium couch with its lamps will be found in the houses of the rich as well as in the hovels of the poor. The man who smoked opium last year continues to smoke it. No pressure has been brought to bear on him to cause him to forego the habit."

Ichang reports: "On the 10th September (1908) the opium shops in Ichang were closed by the officials, but the consumption of the drug still continues. Since the issue of the Imperial Decree forbidding the use of opium, a good many smokers have given up the habit; but amongst the lower classes there has been no abatement, owing to there being no moral influence brought to bear on them. The interest of a very large section of the Ichang community being so much bound up in the growth, sale, brokerage, and shipment of opium, it is vain to expect a sudden change. In other places in the province, however, the people are bestirring themselves to combat the evil."

KIANGSI.—*Kiukiang* reports: "Since the Anti-Opium Edicts were issued opium smoking has certainly decreased, but it is difficult to state how far this is due to either direct or indirect official pressure or to moral influence. A considerable number have had to give it up owing to the increased cost. A large number have always had a great desire from a moral standpoint to give up the habit, but have not had the strength of mind to do so without some incentive. The Edicts have supplied this incentive. While the smoking habit is diminishing, the amount of opium sold during the year has increased. This is said to be due to the fact that well-to-do people have bought more than they consumed, fearing it might be difficult to obtain the drug in the near future."

ANHWEI.—*Wuhu* reports: "That the consumption of opium has decreased since the Anti-Opium Edict of September 1906 there is little doubt, but to what extent cannot be stated with even approximate accuracy. The decrease appears to be only among the middle and poorer classes, while among the well-to-do there has been no appreciable falling off. It should here be noted that the importation of foreign opium into Wuhu during 1907 showed a large increase over the figures of the two previous years, but this fact does not necessarily indicate an increasing consumption, it being well known that wealthy smokers have been laying in large private stocks for future use; some of them are said to be burying it, in view of further and more stringent legislation. Although all opium dens have long ago been closed in Wuhu

small shops have been opened (not publicly) where opium can be smoked. Only those who are personally acquainted with the owners are admitted, strangers having to be guaranteed before gaining entrance. In most of the country districts opium shops and dens appear still to be open, the officials evidently being more concerned in suppressing the traffic in the larger towns and cities. It is difficult to form an opinion as to what is bringing about the diminution in smoking, but it is believed to be attributed to no small extent to the influence of those of the officials and gentry who have at heart the real welfare of the people."

HONAN.—*Hankow* reports: "Several correspondents state that the smoking habit is decidedly on the decrease, and of late more rigorous measures have been taken to enforce prohibition."

SHENSI, KANSU, SZECHWAN, KWEICHOW.—*Chungking* reports: "The measures taken by the provincial officials in the four provinces point to an honest determination to suppress the cultivation of the poppy, and a confiscation of the land producing it is threatened if their exhortation be ignored. Its suppression is only a question of time.

"Reports received from postal employés scattered through the provinces of Kansu and Shensi are rather conflicting. In places where the officials themselves are opposed to opium restrictive measures have been put into force with promising results; in other parts the Anti-Opium Edicts have produced no effect. The information received may be summarised as follows: In 12 of the reports it is stated that the officials and a large proportion of the population have broken off the habit, and the area devoted to poppy cultivation is being much reduced. Eight reports from other districts assert that the smoking habit is not diminishing, owing chiefly to the apathy of the local officials. Three other reports are of a neutral nature. On the whole it may be said that whilst prohibition is moving more slowly in these two provinces, something is certainly being done, and so far the results may be considered encouraging."

YUNNAN.—*Mengtsz* reports: "Since the promulgation of the Anti-Opium Edict in 1906 the total production of opium has been reduced by not less than 50 per cent. Much has been done by the Viceroy to suppress the smoking habit, and drastic measures have been taken to prevent the cultivation and sale of the drug on the market. Places far away from the direct eye of the Viceroy move in the suppression movement according to the energy and ability of the local officials. The efforts of the Viceroy have succeeded, inasmuch as 45 per cent. of the smoking population are said to have given up the habit completely, 15 per cent. have been nearly cured, and 40 per cent. still smoke. It is admitted by everybody, and it seems beyond doubt, that the Viceroy is in earnest about the abolition of opium in his province and that he has obtained very favourable results within a comparatively short period."

Tengyueh reports: "Since the publication of the opium Edict and the circulation of the regulations concerned, the smoking habit has appreciably diminished and the demand for opium has declined. Public opinion against the vice seems to be gradually making itself felt here, and the local official action, too, has been generally correct. The influence of the native press is also apparent in this remote part of the Empire, and all things considered the results to date are upon the whole encouraging. It is evident that the Viceroy is taking a very active and enlightened interest in the question, and that the ultimate success of the anti-opium movement in this province will be mainly due to him. At the same time it may be doubted whether events will completely justify the somewhat precipitate action taken, and it will be a matter for congratulation if friction is avoided."

Szema reports: "It is thought that little or no land in this province will be placed under poppy this year; but in case such cultivation should be attempted, the authorities are deputing officers to make tours of inspection with a view to enforcing the Viceroy's mandate. The anti-opium campaign has been very actively conducted at Szema by the officials since July 1907. All opium resorts have been closed and opium smoking has much diminished. It is thought that 80 per cent. of the smokers are making strenuous efforts to overcome the habit from a personal recognition of the evils accruing from the vice. The remaining 20 per cent., who comprise the old and the diseased, will, it is suspected, continue to use the drug surreptitiously."

KWANGSI.—*Wuchow* reports: "In the villages where newspapers are never seen and proclamations never read, but little is yet known of the crusade against opium smoking, and therefore no change is as yet apparent. But in the cities where prohibitory notifications have been issued and where the people, stimulated by the reading of newspapers, have established societies for the curing of opium smoking, there is undoubtedly a tendency towards diminution among old smokers, who, for fear or for shame, curtail or conceal their habit. The younger generation, checked by parents and Magistrate, refrain from becoming smokers. The fact that

smokers in the cities have to take out licences has sufficed to cause a decrease among such smokers as possess a regard for public opinion, and as far as those who care not for the *qu'en dira-t-on* or who fear not the Magistrate's threats, the increased price of the drug will force a diminution of smokers."

Nanning reports: "Speaking very broadly the people who were addicted to smoking pursue the unbroken tenor of their way apparently untouched and unmoved. Does this mean that the Anti-Opium Decrees have been fulminated in vain? Far from it! They have on the one hand achieved some very definite results, and on the other hand have created, away in these remote parts, a feeling of uneasiness and inquietude, such as would be produced had like Decrees been addressed by a Western potentate against any analogous pernicious habit of his subjects. Many who smoked only occasionally or who smoked very moderately discover a disposition to abstain altogether. There is not a particle of doubt that officials are awake to the importance of being up and doing. The Governor, a young and active man of enlarged views, recognises the need of energetic action, and during the current year has deprived of rank more than 10 officials on the ground of their having failed to take adequate steps to overcome the vice. All opium divans in the city were closed in April last year (1907). Teachers and pupils in the public schools are forbidden to smoke. It is an open secret, however, that several of the teachers indulge in private; but it is credibly stated that there is no contravention of the regulations on the part of any of the scholars. As to the garrison, there has been a good deal of smoking in that quarter, and it is not an unusual thing for an officer to make surprise visits with the object of apprehending offenders. In the course of the current year quite a number of 'braves,' detected flagrantly in the act, have been dismissed from the colours. The prohibition is rigorously and strenuously enforced in respect of the new regiment, which is being formed and trained on modern lines."

APPENDICES.

APPENDIX A.—No. 1.

IMPERIAL DECREE: DATED 20TH SEPTEMBER, 1906.

SINCE the restrictions against the use of opium were removed the poison of this drug has practically permeated the whole of China. The opium smoker wastes time and neglects work, ruins his health, and impoverishes his family, and the poverty and weakness which for the past few decades have been daily increasing amongst us are undoubtedly attributable to this cause. To speak of this arouses Our indignation, and, at a moment when We are striving to strengthen the Empire, it behoves Us to admonish the people, that all may realise the necessity of freeing themselves from these coils, and thus pass from sickness into health.

It is hereby commanded that within a period of 10 years the evils arising from foreign and native opium be equally and completely eradicated. Let the Government Council (Chêng-wu Ch'u) frame such measures as may be suitable and necessary for strictly forbidding the consumption of the drug and the cultivation of the poppy, and let them submit their proposals for Our approval.

APPENDIX A.—No. 2.

IMPERIAL DECREE: DATED 7TH FEBRUARY, 1907.

A MEMORIAL has been received from the Board of the Interior devising general arrangements for the prohibition of opium; and whereas opium is injurious to the public health, We have already issued an Edict commanding every province to fix a limit of time for its strict prohibition. The Board having now recommended in their Memorial the extension of branch Anti-Opium Societies, and that the opium dens throughout the provinces should be uniformly closed and prohibited as laid down in the new regulations, it is hereby commanded that all Tartar Generals, Viceroys, and Governors shall take part, with their subordinates, in conscientiously carrying out these steps. But strict as must be the prohibition against smoking, it is

even more necessary to forbid the cultivation of the poppy, in order to sweep away the source of evil. The responsibility is therefore placed upon all Tartar Generals, Viceroys, and Governors to see to it that cultivation is diminished annually, as prescribed by the regulations submitted to Us, and that within the maximum term of 10 years the supply of foreign and native opium is completely cut off. There must be no laxity or disregard for this beneficial measure, which the Throne so ardently desires.

APPENDIX A.—No. 3.

IMPERIAL EDICT: DATED 26TH JUNE, 1907.

OPIUM is in the highest degree detrimental to the people. In an Edict of last year prohibiting the use of it the Council of Government were commanded to frame regulations and to direct all *yamens* throughout the country to put a stop to it.

In the third month of this year a further Edict was issued, commanding that general instructions be given to act in strict accordance with the regulations, which had been submitted to the Throne, alike in respect of the cultivation, sale, and consumption of opium.

The welfare of the people is a matter of great concern to the Court, and this is a matter which must positively be put through. The Governor of Peking and the Tartar Generals, Viceroys, and Governors of the provinces are commanded to issue strict instructions to their subordinates to put the prohibition into actual effect, to make it a matter of familiar knowledge in men's houses, to get completely rid of the evil. The Maritime Customs should keep a strict watch on the foreign opium which is imported, and the places in the interior which cultivate native opium must annually decrease the amount cultivated, in accordance with the dates sanctioned. It is further commanded that the relative merits of officials in this respect must be recognised. If the instructions are zealously carried out by an official in his own jurisdiction, it is permitted to memorialise the Throne, asking for some encouragement to be shown him. If an official merely keeps up appearances and, while outwardly obeying, secretly disregards these commands, he is to be denounced by name for punishment.

It is also commanded that an annual return of the land under opium cultivation be made, by way of verification and to meet the desire of the Court to relieve the people of this evil.

APPENDIX B.—No. 1.

REGULATIONS PROHIBITING OPIUM SMOKING, COMPILED BY THE GOVERNMENT COUNCIL.

ARTICLE I.

To limit the cultivation of the poppy is the way to eradicate the evil. The poppy obstructs agriculture, and its effect is very bad. In China, in the provinces of Szechwan, Shensi, Kansu, Yunnan, Kweichow, Shansi, and Kianghuai, the poppy is widely cultivated, and even in other provinces there are places where poppy cultivation is largely pursued. Now it is decided to prohibit and root out the habit of smoking opium within 10 years. It is therefore necessary to limit the cultivation of the poppy so as to effect the prohibition. Viceroys and Governors of provinces have to instruct the Magistrates of departments and districts to report upon, after registering, the actual area of land used for cultivation of poppy. Unless land has been hitherto used in the cultivation of the poppy, it is not to be used for that purpose in future. For the land already being cultivated with the poppy special title-deeds must be obtained. Of the land at present in use for the cultivation of the poppy, one-ninth must be annually withdrawn from cultivation, and, if land is suitable, other crops are to be cultivated thereon. Magistrates of departments and districts are to pay surprise visits, in order to ascertain whether there is any violation of this regulation.

By this means the cultivation of the poppy will be exterminated in nine years.

Any person violating the rule will forfeit his land, and any person ceasing to grow the poppy and adopting some other crop before the time required in the Decree shall be considered as meriting special reward.

ARTICLE 2.

The issuing of certificates will prevent the possibility of new smokers. The bad habit of opium smoking has now been indulged in for such a long time. About three-tenths or four-tenths of the natives smoke opium. Therefore we must be lenient to those who have already acquired the habit, but must be strict for the future. First of all, all the officials and gentry and licentiates shall be prohibited to smoke opium, so as to show example to the common people. Those who smoke opium, without distinction, whether he be an official, one of the gentry, or a servant, shall report the fact at the local yamên. If the place of their living is remote from the local yamên, they may report themselves to the police bureau or to the gentry of that place, who will collect such applications and send the same to the local yamên. The local officials will then issue a proclamation ordering them to fill up a form with their names, age, residence, profession, and the amount of opium each smokes per day; such forms will be ordered to be sent in at a fixed date, according to the distance of the residence from the yamên. After the forms have been collected at the yamên a list will be compiled, and one copy of the same will be handed over to the higher yamên, and certificates will be issued under the official seal. Such certificates will be of two kinds: one for those who are over 60 years of age and the other for those who are under 60 years of age. Those who receive the second kind of certificate are not allowed to receive the certificate of the first kind when they reach 60. In the certificate the name, age, native address, amount of daily consumption of opium, as well as the date of the issue of the certificate, are mentioned, to certify that they are allowed to buy opium. If there are any who, having no certificate, buy opium secretly, such persons will be duly punished. Once a registration has been made and certificate been issued, no future application will be allowed.

ARTICLE 3.

By ordering gradual reduction of the amount of smoking opium, a cure of such habit may be effected. Those who are over 60 years old are treated leniently, because of their age; but those who are below 60 and have received a certificate of the second kind are ordered to reduce the amount of smoking annually either by two-tenths or three-tenths, and to determine the date of ceasing to smoke opium. Those who cease to smoke and obtain the guarantee of their neighbours will be presented to the local officials, who will also inquire into the case, and then the name will be erased from the book of registration and the certificate will be returned to the officials. A list of such withdrawals will be sent to the higher yamên for record. The date of prohibition of opium is quite lenient, and, therefore, if there is anyone who does not give up the practice within term, such person shall be severely punished. If there is anyone who has a certificate of the second class and does not stop smoking, if he be an official, he will be cashiered; if he be a licentiate, his title will be taken away; and if he be an unofficial person, his name will be registered. These names will be sent up to the higher yamên to be placed on record, their names and ages will be put up in the street, and their residence will be made public, and no honorary positions will be given to them. They are not allowed to be reckoned as equals of the general public.

ARTICLE 4.

By closing the opium-shops, the source of the evil can be cleared away. Until the terms for the date of prohibition come it is impossible to close the shops where opium is sold. However, there are opium-shops where are many lamps for smoking opium, and many youngsters are induced to come there and gather together with many bad characters. Therefore such shops shall be closed by local authorities within six months, and the owners shall be ordered to change their occupations. If they do not close their shops in time, these shops shall be officially closed by sealing the door. The restaurants and bars shall not keep opium for the use of their customers, and the guests shall not be allowed to bring in any opium pipe in order to smoke opium in these places. If there are any who violate the rule, they shall be severely punished. Those who sell opium pipes, opium lamps, or other utensils for opium smokers shall be prohibited from selling these goods after six months, or they shall be severely punished. The taxes on opium lamps shall not be collected three months after date.

ARTICLE 5.

By registering each shop where opium is sold, the exact number of them can be known. Though the shops where opium is sold cannot be closed at once, yet they can be gradually closed and no new shops be allowed to be opened henceforth. In every city, town, or village the shops where opium or opium dross is sold are to be investigated by the local officials, and

their numbers shall be duly registered and kept on record. Certificates shall be issued, which certificates will be reckoned as permits to follow that business, and no more new shops shall be allowed to be opened. These shops shall show the certificates whenever they buy their merchandise, or they are not allowed to sell the same. These shops shall report upon the quantity of opium and opium dross they sell at the end of each year, and report the same to the local officials, who will keep the same on record. After calculating the total amount of opium and opium dross consumed in a district, annually, the proportion of annual reduction necessary for the abolition of opium smoking in 10 years shall be calculated. Any surplus at the end of that time shall be destroyed and double its value forfeited as a fine.

ARTICLE 6.

The government shall manufacture medicine to cure the bad habit. There are many prescriptions for curing the habit of smoking opium, and each province shall select the best medical students to undertake research for the best cure suited to the circumstances of each province. Such cures shall be made in pills, and shall in no case contain opium or morphia. After being manufactured, such pills will be distributed to each prefecture, sub-prefecture, department, and district at reasonable prices, and then these will be handed over to the charitable societies or medicine shops, where the cure will be sold at cost price. Whenever they are any poor people who cannot afford to buy the medicine, the cure may be given to them gratis. It is also granted to local gentry to manufacture the cure in accordance with the official prescription, so as to have the cure distributed as widely as possible. If there is anyone who will distribute the cure for charity's sake, and if such cure has the proper effect, the local officials shall give him reward.

ARTICLE 7.

The establishment of Anti-Opium Societies is a worthy proceeding. Lately, many persons cured have voluntarily organised an Anti-Opium Society, and have endeavoured to eradicate bad habits. This is really praiseworthy. Therefore the Viceroys and Governors of provinces shall instruct the local officials, with the local gentry, to organise Anti-Opium Societies, and to endeavour to stop the opium-smoking habit in the locality. Then prohibitions will surely have better effect. Such society shall be purely for the anti-opium smoking, and the society shall not discuss any other matters, such as political questions bearing on topical affairs or local administration, or any similar matter.

ARTICLE 8.

The local officials are relied upon to use their utmost endeavour to carry into effect these regulations, and with the effective support of the local gentry there should be no difficulty in carrying out the prohibition. The Tartar Generals, the Viceroys, and the Governors of provinces shall make up a list of people who smoke opium, and those who cease to smoke, annually, and the number of pills which are used as cure, together with the number of Anti-Opium Societies. These lists, when compared, will easily give the comparative results of each province, by which the responsible officials will be either rewarded or reprovved accordingly. The annual statistics shall be sent to the Government Council, where they will be duly dealt with. In the city of Peking the police authorities, officers of gendarmerie, and the officials of the city are held responsible. If in any district opium smoking is stamped out before the expiry of the 10 years limit, the officials of that district should be duly rewarded. The petty officials are to be warned to have no irregularities in reducing the area in which the poppy is cultivated, in issuing certificates for opium shops and shops where opium and opium dross are sold, or in dealing with those who smoke opium. Any such irregularity will be followed by severe punishment, and any who receive bribes will be punished on a charge of the crime of fraud.

ARTICLE 9.

The officials are strictly prohibited from smoking opium, so as to set example to others. The prohibition within 10 years is for the general public. The officials shall be examples to common people, and, therefore, they shall stop such bad habits before the general public; and such prohibitions shall be strictly enforced upon the officials, and the punishments upon them shall be more severe. From now all officials, without distinction of rank, metropolitan or provincial, military or civil, who are over 60 and suffering from opium-smoking habits, are exempted from the prohibition just as are the common people, for they are too far gone for cure. However, those who have not reached 60 years of age, princes, dukes, men of title, high metropolitan officials, Tartar Generals, Viceroys, Governors, Deputy Lieutenant Military

Governors, the Provincial Commanders-in-Chief, as well as Brigadier Generals, being all officials who are well treated by the Throne and high in rank and position, are not allowed to conceal their affairs, and if they smoke opium, they shall report themselves and the dates when they should stop the same. During the cure of the habit these officials shall not retire from their official duties. Moreover, they shall not be allowed to take opium under the pretence of illness longer than the terms promised. The rest of the officials in metropolitan or provincial service, either military or civil, substantive or expectant, shall report themselves to their principal officials in regard to these matters, and they shall cease to smoke within six months, at the end of which time they will be examined. If there are any who cannot be cured in time, they shall give reasons; and if they are hereditary, they shall retire, and if they be ordinary officials, they will retire with original titles retained. If any conceal their actual conditions, such officials shall be impeached and be summarily cashiered as a warning to others. If there are any who are misreported by higher officials, they may memorialise and the case will be tried accordingly. Those who are professors and students of ordinary schools and colleges, or of military or naval schools and colleges, are also hereby ordered to cease smoking within six months from date.

ARTICLE 10.

The prohibition of the import of foreign opium is one of the ways to root out the source of opium smoking. The prohibition of cultivation of the poppy and of the opium-smoking habit is within the jurisdiction of the internal administrations. Foreign opium, however, concerns Foreign Powers. The Wai-wu Pu is hereby instructed to negotiate with the British Minister to Peking to enter into a convention to prohibit the importation of opium gradually within a certain term of years, so as to stop such importations before the term for the prohibition of opium smoking. Opium is imported from Persia, Annam, Dutch Colonies, and other places besides India, and the Wai-wu Pu shall also open negotiations with the Ministers of these Treaty Powers. In case of a Power where there is no treaty, China can prohibit the importation by her own laws. The Tartar Generals, Lieutenant Generals, Viceroy, and Governors shall order the Commissioners of Customs to find a way to stop such importation from the frontiers either by water or by land. It is also known that morphia is injected, and the habit is worse than opium smoking. It is mentioned in Article XI in the Anglo-Chinese Commercial Treaty, and in Article 16 of the American Chinese Commercial Treaty, that except for medical purposes no morphia shall be imported to China, and it is also strictly prohibited to sell or manufacture morphia or syringes for injecting the same by Chinese or foreign shops, so as to stop the bad habit.

These Regulations shall be promulgated by the local civil and military officials in cities, towns, and villages for the information of the general public.

APPENDIX B.—No. 2.

MEMORIAL BY THE MINISTRY OF THE INTERIOR PROPOSING REGULATIONS FOR STRICT SUPERVISION OVER ANTI-OPIUM MEASURES AND FOR CAREFUL INVESTIGATION INTO THE DEGREE OF SUCCESS ATTAINED THEREBY.

On the 20th day, 2nd moon (22nd March) the Grand Secretariat received the following Imperial Edict:—

“We are in receipt of the Memorial of the Wai-wu Pu setting forth the arrangements made with the Foreign Powers for the suppression of opium and suggesting measures for raising revenue to make up the loss of opium duties.

“Since the consumption of opium has become general, it has played disastrous havoc among the people. Those who are addicted to opium smoking waste their money and property shorten their lives, become habitually idle, and neglect their work. Moreover, numerous cases of suicide by taking opium occur in the provinces every year. It is also the cause of much theft and litigation. It violates nature's productive principal and is much to be deplored.

“It furthermore weakens the people of our ancient Empire and wrecks their ambitions, rendering the work of national regeneration almost hopeless.

“Recently the officials, gentry, *litterati*, and people have been awakened to the danger of this vice and have formed societies to aid the people to get rid of it. Even smokers reproach themselves and resolve to get rid of it.

"Even foreign philanthropists have organised societies to preach against the opium traffic and its cultivation, besides prescribing cures for the craving. They deeply deplore the fact that China is not rid of opium. How much more, then, should those who are personally injured by opium smoking vigorously determine to eradicate the evil habit?"

"Since the issuance of the Imperial Edict promulgating the Anti-Opium Regulations and fixing 10 years as the limit of time for carrying out opium suppression, the British Government has agreed to the reduction of opium importation year by year, and other friendly Powers have also assured Us of their support. This has given Us much satisfaction. Great Britain has not put the reduction of opium import into operation, and it is agreed that it shall be experimentally carried out for three years. If substantial decrease in the plantation and consumption of native opium in China should be observable at the expiry of this period, then the import would be further reduced.

"Unless we try our best to suppress opium smoking and cultivation, three years will ere long have elapsed and we shall have accomplished nothing in return for the good intentions of the friendly nations or the pains taken by the foreign philanthropists in the matter. This opportunity once lost will not return, and should we allow ourselves to be for ever hindered with this curse, we shall not be able to stand as a nation. In thinking of this, how ashamed and discomforted should we the whole nation feel, and how much ought we to blame ourselves.

"Let the Ministry of the Interior and the Ministry of Finance formulate without delay regulations for supervising anti-opium measures and investigating the successful results in carrying out such measures. Our consent to put them into general practice should then be obtained.

"At the same time let Viceroy and Governors of the different provinces direct their subordinates to carry out the anti-opium measures as memorialised by the Council of State Affairs and sanctioned by Imperial Decree, and report on the actual steps taken to reduce plantation and smoking. A statistical report of this reduction should be sent Us at the end of each year. The Ministry of Finance will consider means as to find the money to make up for the opium duties.

"As this is a matter affecting the strength or weakness of the nation and the longevity of its people, let all officials, metropolitan and provincial, together unite to carry it out effectively in spite of all difficulties, in order that opium may be entirely suppressed within the fixed limit of time."

With reference to the above Edict, the Memorialists Ministry would observe that the success of the prohibition depends on the strictness of the rules and regulations and proper supervision of their enforcement. In order to prevent all malpractices such as deception and subterfuge, it would be necessary to draw up minute regulations for the supervision of opium suppression and for ascertaining the degree of success attained.

It is most important at the beginning of opium suppression to ascertain the area in *mou* under cultivation and to arrange for its reduction at intervals, as this affects the root of the matter. To ascertain the number of smokers, close all opium dens, and restrict the traffic should then immediately follow.

This Ministry will draw up regulations as above mentioned for Imperial sanction and for adoption by the Viceroy and Governors of all the provinces, who are to report results to the Ministry. They should also study local conditions with the view of curtailing the period in which to enforce total prohibition.

The rewards for success attained in opium suppression as mentioned in the regulations are merely broad ideas, the details being left to the Ministry of Civil Office, who will decide on a uniform scale. Any high official smoking opium shall be dealt with by the Anti-Opium Commissioners.

The above is submitted by the Ministry of the Interior, in which the Ministry of Finance joins.

The following regulations in 23 Articles are submitted for approval. (Approved by Decree on the 24th day, 4th moon, 34th year of KUANG HSÜ (23rd May, 1908.)

SECTION I.—REDUCTION OF PLANTATION.

ART. 1.—All the provincial authorities shall direct the local officials to ascertain and make returns within six months of the area in *mou* of land on which poppy is planted in their jurisdiction, with the name of owner and the amount of crop, and submit them to their Viceroy and Governors for transmission to the Ministry of Finance and Ministry of Interior to be kept for reference.

ART. 2.—The limit of 10 years in which to enforce prohibition is reckoned from the 32nd year of KUANG HSÜ. The reduction of plantation in the provinces should be carried out according to the regulations of the Council of State Affairs approved by the Throne. No land on which poppy has hitherto not grown shall be allowed to be planted with poppy. The amount of land which has hitherto grown poppy shall annually be reduced by one-eighth, based on the returned figures for the 34th year of KUANG HSÜ. The plantation of poppy should be eradicated by the 41st year of KUANG HSÜ. Reports from time to time should be made to the Ministry, giving particulars of the land on which, instead of poppy, something else has been planted.

ART. 3.—The provincial authorities should print licenses permitting plantation of poppy, to be given to planters by the local officials, and to be renewed every year. All clandestine plantation without licenses shall be interdicted. Planters on applying for a license shall pay a fee of 150 cash per *mou*, in addition to which nothing extra should be exacted.

SECTION II.—OPIUM FARMS.

ART. 4.—Since a farm duty on native opium has been instituted, opium farms have been established in Anhwei, Honan, Shansi, and other provinces. Their licenses are granted by the sub-office of the Opium Duty Bureau, in conjunction with the local authorities, without charge. They are responsible for the payment of duty on all opium. All retail shops must purchase and planters must sell their opium through them or the transaction will be illegal. Stores must also collect opium through the farms, and are not permitted to do so direct from the villages.

The farms will enter into books the quantities of opium collected from the villages, and present the books from time to time to the Bureau's sub-offices for inspection. On any customer buying opium for transportation elsewhere the required duty will be paid through the farm.

All provinces should establish these farms, and the Duty Bureau's sub-offices should issue to the farms printed books, in which should be entered daily the quantity of opium dealt in in catties and taels, with the dealers names. These books are to be submitted to the Bureau's sub-offices for returns to be compiled and submitted at the end of the year to the Director General of the opium farm, to enable him to compile a general and concise table, showing the reduction in the native opium traffic every year, and present it to the Ministries concerned to be placed on record.

With regard to the opium in the provinces of Szechwan, Yunnan, Kweichow, New Dominions, and Manchuria, which are not under the control of the Farm Duty Collectorate, the Viceroys or Governors in the respective provinces should follow the same plan. Stores collecting opium should also be given a license free by the sub-office of the Opium Duty Bureau and the local officials, as proof to enable them to collect the opium through the farm. Without a license, they should not be permitted to do so, and any violation when discovered should be fined.

SECTION III.—OPIUM SHOPS.

ART. 5.—Orders should be given by all provinces to the local officials to ascertain throughout their jurisdiction the number of opium shops existing, with their addresses, amount of capital, and names of owners, and to make returns within six months for submission to their respective Viceroys or Governors to be presented to the Ministries for record. No more new shops of this nature are allowed to be opened.

ART. 6.—The provincial authorities should print licenses for dealing in opium, to be given to retail opium shops by the local authorities, and to be renewed every year. Any retail shop opened without a license shall be prohibited. On application for such license, opium shops are divided into three classes—1st, 2nd, and 3rd—according to their amount of capital. Capital of \$10,000 or over to be 1st class, and to pay an annual fee of \$6; under \$10,000 and over \$5,000 to be 2nd class, to pay an annual fee of \$4; and under \$5,000 to be 3rd class, to pay an annual fee of \$2. No other exactions of any amount should be made.

ART. 7.—All retail opium-shops shall report monthly to the *yamên* concerned the actual quantity sold. They shall neither falsely report this quantity nor sell to any person not licensed. The *yamên* concerned will at the end of the year compile returns and submit them to the Viceroys and Governors, who will transmit them to the Ministries for record.

ART. 8.—A time shall be fixed for the retail opium shops to engage themselves in other trades, which they should undertake gradually in place of the opium business, so as to entirely supplant it within the limited period.

SECTION IV.—OPIUM HOUSES.

ART. 9.—In the 32nd year of KUANG HSÜ the Council of State Affairs obtained Imperial sanction that all public opium houses should be closed by the local authorities in six months and they should be made to take up other business. Any remaining houses or tea-shops, restaurants, and brothels having opium divans should be prohibited on heavy fines.

SECTION V.—OPIUM PARAPHERNALIA.

ART. 10.—The Council of State Affairs obtained Imperial sanction to close all shops making opium paraphernalia in six months. This period having expired, the Viceroys and Governors should order all their subordinates to strictly enforce the prohibition.

SECTION VI.—SMOKING.

ART. 11.—The provincial authorities should give general orders to their subordinates to ascertain correctly, within a fixed time, the number of smokers in their jurisdiction, with their names, addresses, and age, and submit them at the end of the year to their Viceroys and Governors for transmission to the Ministries for record purposes.

ART. 12.—The provincial authorities should print licenses for purchase of opium, to be issued to smokers and renewed yearly. All smoking without license shall be prohibited. Smokers on application for a license shall state truly the quantity they smoke a day, which is to be stated in the license. They are only allowed to buy the fixed amount or less, but no more, so that within the limited time their smoking may be broken off.

SECTION VII.—CURING THE OPIUM HABIT.

ART. 13.—The provincial authorities shall give general orders to the local authorities to establish official Anti-Opium Institutes, which will prepare medicines according to the foreign and Chinese prescriptions issued by the Ministry of the Interior, and send them to druggists and philanthropic institutions for sale at cost price. Poor people who are unable to pay for them will be supplied free. If any one conversant with therapeutics make up any other good medicine for curing the smoking habit, such prescription and medicine should be presented to the Viceroy or Governor of the province, who will transmit them to the Ministry of the Interior for examination.

ART. 14.—All local officials should instruct reputable gentry and merchants in their jurisdictions to organise Anti-Opium Associations and to publish pamphlets and magazines in simple language to exhort people to break off opium smoking. These publications should not interfere with politics or subjects outside of their province.

ART. 15.—All local officials should take steps to examine the medicines at all druggists in their respective jurisdictions and prohibit the sale of any of them found containing morphia. The sale of morphia surreptitiously is also to be prohibited.

SECTION VIII.—DETERMINATION OF SUCCESS.

ART. 16.—All local officials who do not fail to submit the returns called for by these regulations shall, after every three years, be recommended to be referred to the Ministry for consideration of a reward.

ART. 17.—All local officials who are found to have carried out the prohibitions set out in these regulations within due time shall be recommended by the Viceroys or Governors concerned to the Throne, to be referred to the Ministry for consideration of a reward.

ART. 18.—All local officials who are found to have reduced the area of plantation of poppy in their district, the shops dealing in opium, or the number of smokers by 30 per cent. or over in a year, without any attending trouble, shall be recommended by their Viceroys or Governors to the Throne, to be referred to the Ministry for favourable consideration of a reward.

ART. 19.—All local officials who fail to submit returns as called for by these regulations in due time shall be referred to the Ministry for determination of a penalty, and for misrepresentation in the returns, for a severe penalty.

ART. 20.—All local officials who fail in enforcing prohibition of the various matters set out in these regulations within due time shall be referred to the Ministry for determination of a penalty, and for falsely representing that they have done so, shall be referred for a severe penalty, so also with superiors who connive at the offence.

ART. 21.—All local officials who fail to reduce in their respective districts the area of plantation of poppy, the number of shops dealing in opium, and the number of smokers by one-eighth, in any one year, shall be referred to the Ministry for determination of a severe penalty.

SECTION IX.—SUPPLEMENTARY.

ART. 22.—These regulations shall be adopted in conjunction with the regulations by the Council of State Affairs and sanctioned by the Throne. All the Viceroys and Governors may consider the requirements of local circumstances and obtain approval of the Throne to detail regulations in regard to operation.

ART. 23.—Reports of the amounts of license fees fixed under these regulations shall be regularly submitted to the Ministry, so that the moneys may be appropriated for expenses in connexion with the opium prohibition. No other sums besides these fees shall be allowed to be exacted. If future circumstances warrant an increase in the fees, the Ministry of Finance and the Ministry of the Interior will jointly memorialise the Throne on the matter.

APPENDIX B.—NO. 3.

MEMORIAL FROM THE MINISTERS APPOINTED FOR THE SUPPRESSION OF OPIUM FORWARDING TEN PROPOSED SUPERVISORY REGULATIONS FOR THE PROHIBITION OF OPIUM SMOKING.

IN obedience to the Edict of the 7th day, 3rd moon, 34th year of KUANG HSÜ, declaring that a strict surveillance over the prohibition of opium smoking is necessary, public houses are therefore to be established wherein opium smokers may break off their habit within three months, under the regular supervision of inspectors.

The great harm that opium has done to our Empire has lasted a long time, but to-day there must be a turning point. With this in view, a Decree was recently issued commanding your Ministers to establish institutes for the entire suppression of opium smoking in the capital, as an example for the whole Empire to follow.

In order to effect a complete eradication of the opium evil, cultivation of the poppy must be discouraged, while in the breaking off of the smoking habit, officials should take the lead, so as to set a good example for the people to follow.

Having received such great favours from Your Majesties, your Ministers cannot but use their best endeavours to supervise the prohibition of opium, regardless of resentment or complaint, with the hope that the eradication of opium may be effected at an early date, if not at once, thereby mitigating Your Majesties anxiety. The appended 10 regulations have been drawn up for Your Majesties approval.

Rescript dated the 10th day, 4th moon, 34th year approves of same.

1. *Special Surveillance to be enforced.*—All high officials in the capital of the second rank and upwards, and all high officials of the provinces above the rank of Commissioners, who have received such favours from their Majesties, should show a good example to their subordinates. Those who are accustomed to opium smoking ought to have long ago broken off their habit in obedience to the Imperial commands. Since a second order has been issued, all are required, whether they have got rid of the habit entirely or not, to report themselves, and if anyone deceives the Throne, he also deceives himself. Should anyone be discovered to have falsely reported himself, a strict inquiry will be instituted against him, and the offender will be severely punished.

In the capital the inspectors are to prepare a list, within one month after receipt of the order, of all the opium smokers, while in the various provinces the Viceroys, Governors, etc., are to find out, within two months after receipt of the order, the number of opium smokers and also of those who have given up the habit, which lists are to be sent to your Ministers. Whoever is suspected of smoking will be called upon to undergo a test whenever deemed necessary.

2. *Surveillance to be strictly carried out.*—Whoever has given up the smoking habit cannot be sure that he has already done so until he has been tested by a doctor. He is therefore required by the inspector to go to the opium refuge and remain there for not less than 3 to 5 days nor more than 6 to 7 days, where he is provided with food, etc. He is to be under strict supervision, so that whether he has really broken off his habit or not can be easily detected. A certificate will be given as soon as anyone has really broken off his smoking habit, so that he may return to his duties again; but those who are not entirely rid of the habit are required to remain. Should any inspector be found conniving at opium smoking, he shall be severely dealt with, as well as the offender; but those who diligently attend to their duties, without showing the least favouritism, will be promoted as an encouragement.

3. *Institutes for Inspection to be established in all Provinces.*—In supervising the suppression of opium smoking concerted action should be taken, as better result comes from uniformity of operation. It is therefore suggested that the Viceroy and Governors of all the provinces be written to and a copy of these Regulations sent them, with an order that institutes be established and reliable officers appointed over them for the inspection of opium smokers.

Civil and military officials, both substantive or expectant, shall be under the supervision of the inspectors in charge of the institutes. Whenever there are suspicions against any official, his case should be carefully looked into, and should he not be able to get rid of his habit of smoking within the fixed limit of time, or should he have no intention of doing so, he is to be reported for impeachment, and no favour whatever is to be shown him. All cases are to be referred to your Ministers for investigation. Should any provinces be found without any institutes for the prohibition of opium smoking, your Ministers will report such negligence as soon as the matter comes under their cognizance.

4. *Supervision to be carried out at fixed periods.*—Should officials who are sent by their superiors to the institutes show suspicion of smoking, the inspector must compel them to come to the institute for examination within 10 days, if in the capital, and if in the provinces the time shall be fixed according to the distance from the institute. Failing in their attendance at the fixed period, they shall be suspended from duty pending sentence from the capital.

5. *Distribution of Forms in which Particulars shall be filled.*—Printed forms will be issued by the head institutes to the various yamêns in the provinces for them to fill in the particulars without any misrepresentations. As an example for others, your Ministers, as well as the officials of the institutes in the capital, have filled in all the particulars in these forms, which they have already submitted to the Grand Council for transmission. All the high officials of the various yamêns in the capital, as well as all high officials in the provinces above the rank of Taotai, shall fill in these forms within one month after receipt of same, which are to be returned to the head institute for reference. Failing to send in these forms within the time fixed, they will be reported for impeachment, and should any official be guilty of evasion or of non-compliance, he shall be reported for cashierment according to his rank.

6. *Suggestion for prohibiting the Cultivation of Poppy under severe Penalties.*—Your Ministers have received Imperial commands to establish institutes for the suppression of opium smoking, but prohibition of the cultivation of poppy is even more urgent, which measure must be enforced throughout the country in order to make the reform complete. Besides the measures taken by your Ministers for the inspection of all officials, with a view of making them get rid of their habit, your Ministers request that an Edict be again issued enjoining the Viceroy and Governors of all the provinces to carry out the 10 regulations which have been approved, and also put a stop to the cultivation of poppy, in order to effect its complete eradication. Inquiry shall be made as to the quantity of opium produced within their jurisdiction, and whether its cultivation is to be reduced gradually in several years or altogether at once. Honest and impartial gentries shall be appointed to go round exhorting the people to discontinue the cultivation of opium. Such work must not be placed in the hands of yamên runners, for in waging such a crusade against opium we must take care not to entail any trouble on the people. Besides the cultivation of grain in lieu of opium, the cultivation of other commodities, such as tea, mulberry, wood oil, varnish, etc., shall be encouraged, so as to make up the loss in their income. Viceroy and Governors of all provinces shall be called upon from time to time to instruct their local authorities to carry out the above reforms with their whole heart, so as to achieve real success.

7. *All Anti-Opium Medicines to be prepared in consultation with the Ministry of the Interior.*—The present Edict commanding the establishment of institutes calls for the inspection of officials. Opium smoking, however, cannot be broken off exclusively by doctors without

the help of anti-opium medicines. As hospitals have been established by the Ministry of the Interior both in the capital and the provinces, anti-opium medicines can be prepared by the hospital doctors for general distribution. Other anti-opium medicines will be prepared from time to time for distribution in the most economical way.

8. *Discrimination between the Officials and Commoners.*—All officials in the capital and provinces shall be under the charge of your Ministers as far as regards inspection of opium smoking, while the suppression of opium will be carried out by the Ministry of the Interior among the people in the capital. In the case of the gentry and people in the provinces, the suppression of opium will be conducted by the Ministry of the Interior in concert with the Viceroys and Governors of the various provinces.

9. *Bond to be required.*—All officials, other than those already holding substantive posts, are, on being appointed to office, required to offer a bond, guaranteed by their colleagues, that they are not opium smokers. Such officials cannot mutually guarantee each other, to prevent fraud.

10. *Rewards to be issued to Anti-Opium Institutes.*—The names of all promoters of Anti-Opium Institutes, and doctors who are interested in the suppression of opium in the various provinces, are to be reported for record. Those in charge of institutes where a large number of persons have been cured of their smoking habit are to be reported by the Viceroys for the bestowal of brevet ranks, honorific titles, medals, etc., as rewards, but such rewards must conform with the regulations of the Ministry of Appointments.

APPENDIX B.—NO. 4.

REGULATIONS ISSUED BY THE MINISTRY OF THE INTERIOR IN REGARD TO LICENSES FOR PURCHASING OPIUM.

I.—These regulations are based on what has been memorialised to the Throne, and before anyone is permitted to purchase opium (prepared or raw) printed licenses are to be first obtained.

II.—Opium licenses are divided into two kinds, raw and prepared opium licenses, which are to be renewed every three months.

III.—Opium smokers are to apply personally for the license from the nearest station not later than—, after which date no licenses will be granted.

IV.—After the date of issuing the licenses, anyone who purchases prepared or raw, opium must present the license.

V.—When applying for a license, one has to give the following particulars: name, age, family home, business address, and the quantity of opium taken daily. Failing to give full information, no license will be granted.

VI.—When getting a license for prepared or raw opium, it is necessary to pay a license fee, calculated on the quantity taken daily, *e.g.*—

For 5 candareens	5 cents.
„ 10 „	10 „

Above the quantity of 1 mace, the rate will be charged in due proportion.

VII.—Those who are not habitual smokers are not to pretend to be such with the view of obtaining a license for the buying of opium for others.

VIII.—Holders of a license should observe the following details:—

1. When buying opium, it is compulsory to carry the license.
2. On every occasion of purchasing, the license should be handed to the shopkeeper for recording the quantity bought, and stamped by a chop of said shop.

3. From the date of issuing license, smokers should reduce yearly at least one-eighth of the quantity they take daily.
4. At the expiration of the license the holder must bring it to the station concerned to be renewed.
5. The license holder may, at his option, purchase opium for several days or for one month, but the quantity can in no case exceed what is allowed for three months.
6. The license will not have any retrospective value for getting opium.
7. Those who obtain a license for buying prepared opium are not allowed to buy raw opium, and *vice versa*. It cannot be altered, even at the time of renewing the license.
8. If opium dross is taken in exchange for prepared opium, it is necessary to present a license, in which the quantity obtained therewith is to be entered.

IX.—In spite of having obtained a license, it is forbidden to place opium-smoking appliances in drinking houses, brothels, etc., and holders are not allowed to smoke in such quarters.

X.—With the exception of those staying in hotels, strangers who arrive in the capital can at any time report themselves to the station concerned, and a license will be issued after inquiries made prove them to be satisfactory.

XI.—Travellers who are residing in hotels can purchase opium after obtaining a license from the station concerned.

XII.—Hotel-keepers should inform strangers of the regulations and apply for a license for them.

XIII.—Licenses for travellers hold good for one month, and the fee charged will be calculated on the same basis as the foregoing table.

XIV.—Licenses for travellers will serve for purchasing prepared opium only.

XV.—Travellers who apply for a license should observe the following :—

1. Anyone applying for a traveller's license should provide a statement giving his name, age, family home, and the quantity of opium taken daily, verified by the chop of the hotel. Without a chop, licenses will not be issued.
2. When a traveller arrives at a late hour, he is allowed to smoke until the next day, to enable him to have time to apply for a license. Anyone who obtains no license on the next day after his arrival will be fined and punished.
2. When a traveller leaves the capital, the hotel-keeper should present his license to the station concerned for cancellation.
4. When leaving the capital, should a traveller want to get opium for use on his journey, the quantity allowed will in no case exceed that for three days.

XVI.—If a license has been lost, a duplicate may be obtained from the station concerned. The original one will then be cancelled.

XVII.—After the death of a holder the license should be handed, by his relatives or others, to the station concerned for cancellation.

XVIII.—Anyone who breaks Regulations VIII (paragraphs 2, 5, 6, and 7) and XV (paragraphs 2 and 3) shall be punished with imprisonment not exceeding five days and not less than one day, or fined not exceeding \$5 or less than \$1. He who breaks Regulations VII, XIV, and XVII shall be punished with 10 days or not less than five days imprisonment, or fined not exceeding \$10 or less than \$5. Any violation of Regulation IX will cause the hotel-keeper and the smoker to be fined \$30.

*[Continuation of Regulations adopted by the Ministry of the Interior
in regard to Licenses for purchasing Opium.]*

REGULATIONS FOR DEALERS IN PREPARED AND RAW OPIUM.

1.—The object of these regulations is to place a limit on the sale of prepared and raw opium.

2.—Dealers in prepared or raw opium should apply for a license of the kind to be dealt with, and this license should be renewed once a year. No opium-shop will be allowed to open without first obtaining a license. Dealers when applying for a license should give these particulars: name of the shop and proprietor, address, amount of capital, sale of raw opium (or both prepared and raw), and the actual balance in stock.

3.—Dealers in prepared or raw opium who apply for a license have to pay a yearly fee, which is calculated on the amount of their capital:—

Capital above \$10,000	Fee, \$6
" " \$ 5,000	" \$4
" under "	" \$2

4.—Dealers are not allowed to do other business beside selling opium.

5.—Dealers who have changed their business will be given three months time to get rid of their balance of stock before having their license withdrawn and cancelled.

6.—Dealers whose capital is under *Tls.* 1,000 are to have their business closed and to take up another trade.

7.—No new opium-shops are allowed to be opened. Existing shops are not to change names and addresses. Those who have their business closed should hand in their license for cancellation, without the option of handing it over to successors.

8.—Dealers should report to the central station the quantity of foreign or native opium they import into Peking.

9.—Foreign or native opium, when sold in wholesale or retail to customers, should be accompanied by a certificate, the form of which will be issued by the central station. The counterfoils are to be presented for inspection once a month. Foreign or native opium transported without certificates will be treated as smuggled articles.

10.—Smokers are provided with a license, attached to which a record of the quantity of opium purchased is to be kept up to date by the seller.

11.—Beside keeping up the record attached to the license, shopkeepers are to prepare a journal for inspection.

12.—After filling in the quantity sold on the record form of the license, shopkeepers have to affix their chops on the same.

13.—Shopkeepers shall be fined and punished for any of the irregularities mentioned below:—

Selling opium to anyone without a license; taking no notice of the quantity he should buy; or neglecting the duty of keeping up the record.

14.—No opium is to be sold to anyone whose license has expired, or to one who has already obtained his full fixed supply.

15.—When opium ash is to be taken to be exchanged for opium, the quantity supplied should also be filled in the remarks column of the license. Without a license, opium ash is not to be accepted for exchange.

16.—Dealers should make a monthly return of opium purchased and sold for the archives of the central station.

17.—A list of the market prices of different kinds of raw and prepared opium should be posted up at the counter of the shop for the information of the public.

18.—Opium pipes are not allowed to be kept in dealers shops. Shopmen who are addicted to the opium habit, and have even obtained a license, are forbidden to smoke in their opium shops.

APPENDIX B.—No. 5.

PROPOSAL BY THE MINISTRY OF FINANCE TO INVESTIGATE THE ACTUAL CONDITION
OF THE SUPPRESSION OF OPIUM CULTIVATION.

SOME time ago the Ministry of Finance received a communication from KO FÊNG-SHIH, Commissioner of the Native Opium Consolidated Tax, inquiring as to when the branch tax offices in the provinces may be abolished. The Ministry has replied that this matter will depend upon the degree of success attained by the various provinces in the suppression of opium. In the provinces of Kiangsi, Anhwei, Honan, Shantung, and Shansi it has been decided that no opium shall be cultivated next year. Those who have already planted their winter crops may, however, reap them next spring. In the fear that some among the people, in their desire for gain, may continue clandestinely to plant the poppy, it is necessary that in the 3rd and 4th months of next year, when the crops have come up, the matter shall be investigated everywhere in order to ascertain its real condition. It is proposed by the Ministry, therefore, that when the time arrives *it will appoint special officials to travel through the various districts for the purpose of inspection.* If any local officials are found indifferent in the matter of opium suppression, they, together with the superior authorities, shall be handed to the Ministry concerned for the determination of penalties, in accordance with the fixed regulations. On the other hand, those officials who have thoroughly carried out the orders for opium suppression shall be recommended for the bestowal of rewards, as an encouragement to others. The question whether the branch tax offices in the provinces shall be abolished or not will be decided after the receipt of the report from the special officials to be appointed to tour the provinces for the purpose of investigation.

APPENDIX B.—No. 6.

MEMORIAL FROM THE GOVERNMENT COUNCIL REPORTING ON A PROPOSAL BY
VICEROY HSI LIANG FOR THE PROMPT TOTAL SUPPRESSION OF OPIUM.

ON the 3rd day of the 3rd month copy of a Memorial from Viceroy HSI LIANG, of the Yun-Kwei provinces, advocating the total suppression of opium within a short period, was handed to us by the Grand Council, with the Imperial command that we should consider and report on the same.

According to the memorialist HSI LIANG, after his arrival in Yunnan, he forthwith issued instructions to his subordinates to carry out our measures of opium suppression, and these measures, except in the remote districts near the borders, were to a large extent successful. He also states that in the opinion of the people the limit of time allowed for total suppression is too long. He recommends that, taking advantage of the present opportunity, when the popular mind is so eager for reform, the time limit should be greatly reduced, so that smokers shall cease the habit and farmers shall stop growing native opium by the end of this year. At the same time, the sale of opium will also not be permitted after this year, so that beginning from the first of next year there will be no more smoking, sale, or cultivation of opium throughout the whole country.

With reference to the above we beg to observe that, owing to the great importance which our Government attaches to the question of opium suppression, Edicts of the most stringent character have been repeatedly issued against smokers. The object of fixing the limit of time at 10 years has regard to the difference of local conditions and the varying progress of the people, the idea being to avoid undue severity and to manifest the clemency of the Government. Nevertheless, it is set forth most clearly in the first and eighth articles of the adopted regulations, that wherever local officials succeed in totally suppressing opium within the 10 years limit, they shall receive a reward; so that the wish on the part of the Government for a prompt suppression of opium is known to all, and should be carried out accordingly. In the matter of reducing the area of poppy plantation, instructions have been repeatedly sent to the various provinces to have this carried out and submit returns to the Ministry concerned; but although a year has since elapsed, only a few provinces have submitted reports. In view of the great extent of China's territory, it is inevitable that many localities should be given over to poppy cultivation, and unless strict investigation be made as to the actual reduction of

production, it would be vain to hope for eradication of the evil. Instructions should therefore be sent to the high authorities of all the provinces that they carry out the regulations proposed by the Government Council, and approved by the Throne, by ordering the officials under their jurisdiction to conduct a personal inspection of the localities devoted to poppy plantation. In those localities where opium production is prevalent, the elders should warn the people as to the seriousness of the situation and order them to plant grain in lieu of opium. This matter, however, should be carried out by exhortation as well as by prohibition. After returns of the reduction of production have been made out and submitted, the high authorities of each province should send officers annually to verify the returns, and rewards or penalties should be given to the local officials in accordance with their merit. At the same time, returns are to be sent to the Ministry concerned for facility of reference. An understanding has been made that the importation of foreign opium is to be gradually decreased for three years, and if at the expiry of this period China has made substantial progress in reducing the production and consumption of opium, the importation will be further decreased. This is, therefore, of the greatest importance, and it will depend on the results to be accomplished by the different provinces.

The province of Yunnan being noted for its earnestness in the matter of opium suppression, it is natural to expect that it will not require 10 years for its accomplishment. This matter, however, rests entirely with the Viceroy of that province.

Rescript dated the 22nd day, 4th moon, 34th year of KUANG HSÜ approves of the above.

APPENDIX B.—No. 7.

MEMORIAL BY THE BOARD OF LAWS AND THE IMPERIAL COMMISSIONERS FOR LAW REFORM REPORTING ON A MEMORIAL BY THE GOVERNOR OF KIANGSU RECOMMENDING THE ENACTMENT OF SPECIAL PENAL LAWS AGAINST THE SALE OF MORPHIA.

(Extract from the Official Gazette of 30th July, 1906.)

ON the 14th December, 1907 a Memorial was submitted by CH'EN *chih-t'ai* Governor of Kiangsu, in which he proposed that special laws should be laid down providing for the punishment of those convicted of selling morphia or of manufacturing needles for its injection. In accordance with the Imperial Rescript, "Let the proper department consider the matter and report," the Memorial was referred to the Board of Laws.

The Memorial of the Governor was as follows:—

"Morphia contains poisonous substances fatal to human life, but foreigners use it in compounding medicines for treating certain diseases, and its use has now spread to China, where it is taken by injection to satisfy the craving for opium. Its effects are very similar to those produced by opium, but whilst there is more chance of curing the opium habit, when recourse has once been had to morphia its use cannot be abandoned, and as time goes on, and more injections are constantly made, the whole body finally becomes corrupted and death ensues. In view of the fact that this drug is still more pernicious than opium, clauses were inserted in the commercial treaties with Great Britain and America prohibiting its importation except under special Customs permit and for medical purposes, and the 10th Article of the Rules for the Prohibition of Opium, submitted to the Throne by the Government Council last year, provided that instructions should be sent to Customs authorities to call attention to this treaty provision, and that shopkeepers, whether native or foreign, should be strictly prohibited from manufacturing morphia or instruments for its injection.

"Unfortunately there are still unprincipled persons who, in their greed for gain, delude people into using morphia, and as all the opium saloons have been closed owing to the enforcement of the prohibition of opium, and the poorer people cannot procure the utensils for opium smoking, when they find that they can satisfy their craving with morphia at a fraction of the cost there are few with sufficient strength of mind to resist doing so. This being the case in Kiangsu the same conditions are probably to be found in other provinces, and it therefore appears advisable that special laws should be provided so that one man's punishment may act as a deterrent to a hundred others.

"By law it is an offence punishable with decapitation to manufacture or cause others to manufacture poisons dangerous to human life, and further, if a man be poisoned, the seller, if aware of the purpose for which the poison was bought, is liable to the same penalty as the murderer. Now if a person manufactures morphia, which is poisonous in its effects, and sells it to another to satisfy his craving for opium, if the latter finally dies through inability to abandon

the use of morphia, the case is really similar to that of a man who manufactures poison for the purpose of committing murder. The law formerly in existence against opium provided for the death penalty, and as morphia is much more dangerous than opium the death penalty in accordance with the law against the manufacture of poisons would not be excessive. As, however, the object of its manufacture is not murder but gain, and as, too, the victims of the craving voluntarily bring their death upon themselves, the conditions are somewhat different, and I would therefore venture to suggest the Board of Laws should be directed to consult with the Commissioners for Law Reform with a view to drawing up special enactment on the subject."

We were instructed by Imperial Decree to report on this Memorial, and have the honour to observe, in the first place, that morphia is a natural salt, forming the essential constituent of opium, from which it is extracted by chemical processes and made into medicines for treating diseases. It possesses the property of producing sleep, whence its name morphia, from Morpheus, the god of sleep, is derived, and its effects are still more powerful than those of opium.

Last year an Imperial Decree was issued ordering the entire abolition of opium, and the regulations prepared by the Government Council contained a provision that arrangements should be made for the prohibition of the import of foreign opium, so that the evil might be cut off at the source. It was also provided that as morphia and the instruments for its injection were still more injurious than opium, full effect should be given to the 11th Article of the British Commercial Treaty and the 16th of the American Treaty, and instructions be given to the Customs to prohibit the importation of any morphia not covered by a special permit and imported for medical purposes. Shopkeepers, whether native or foreign, should also be strictly forbidden to manufacture morphia or instruments for its injection, so that this evil might be completely eradicated.

These regulations were sanctioned by the Throne and circulated, but in spite of the stringent nature of this prohibition, it appears that there are still unprincipled persons who delude people into using morphia, and the trade has not been entirely suspended. The prohibition of opium is now being enforced; opium saloons have been closed; and the poorer classes having no other means of allaying their craving have recourse to morphia, being attracted thereto in the first place by its cheapness. As time goes on their consumption of morphia constantly increases and they cannot abandon its use, their system becomes full of the poison, and in the end their bodies become covered with sores from the injecting needles and their health is ruined. Seeing that the evils of morphia are so difficult to avoid even now before opium has been entirely eradicated, after the abolition of opium it is to be feared there will be still greater danger of falling a victim thereto, and we shall merely shift from Scylla to Charybdis.

The Governor's suggestion that a special enactment against morphia, founded on the law against the manufacture of poisons, should be laid down, springs from an earnest desire to extirpate the evil and preserve the lives of the people. The original law against the manufacture of poisons provided that whether any person was actually killed or not the maker was liable to decapitation, the punishment being thus more severe than in the case of ordinary homicide, on the ground that this class of criminal made murder their trade. Now in the case of those persons manufacturing instruments for the injection of morphia and selling them to people for the purpose of satisfying their craving for opium, the maker is on the same footing as a person manufacturing poisons, but as his object is merely gain, and not murder, and as, moreover, the victims of the craving bring about their own death, the conditions are, as the Governor has pointed out, somewhat different, and justice requires that the law should be made slightly less severe.

As regards the sale of morphia by shops, the Customs should be directed to enforce the provisions of the British and American treaties prohibiting the import of morphia except under special permit for medical purposes, and a punishment must be fixed for any evil-disposed persons in the interior who may conspire to carry on an illicit trade in the drug. A person who knowingly sells poison is liable to the same punishment as the actual murderer, and a person who sells morphia, knowing its poisonous properties, should therefore be liable to the same punishment as the man who manufactures the instruments of its injections. Again, under the now obsolete law against opium, the person preparing and the person selling the drug were liable to the same punishment—strangulation,—and therefore, although the death penalty need not be decreed either against the person making instruments for the injection of morphia or the person selling the drug, the two classes of offenders should be treated as being on the same footing.

After careful deliberation we venture to recommend that those convicted of manufacturing instruments for the injection of morphia should be sentenced in accordance with the law against the manufacture of poisons, the punishment being reduced from decapitation to banishment to the most remote and unhealthy regions of the Empire; those convicted of selling morphia except under a special Customs permit being liable to the same punishment in accordance with the law against knowingly selling poisons, and their shops will also be confiscated.

We would also pray that instructions be sent to the Customs authorities to enforce the treaty provisions and put a stop to smuggling, so that the evil may be cut off at its root, and when definite regulations have been laid down we trust that the people will reverently obey them and that the prohibition of opium may then become really effective.

On receipt of Imperial sanction the Board will issue the necessary instructions to the Governor of Kiangsu, as well as the high authorities of other provinces, the Revenue Council, the High Court of Justice, and the Governor of Peking.

This Memorial has been drafted by the Board of Laws after consultation with the Imperial Commissioners for Law Reform, and the delay in submitting it has been due to the time required for exchanging correspondence on the subject.

On the 16th July the following Imperial Decree was issued: "Approved."

APPENDIX C.—NO. 1.

PROCLAMATION ISSUED BY THE ACTING PREFECT OF FOOCHOW: DATED KUANG

HSÜ, 32ND YEAR, 11TH MOON, 29TH DAY.

OPIUM has been imported into China for several hundred years, since the middle of the Ming dynasty. At first it was used for curing sickness; now, inversely, it has become the cause of sickness. Formerly only foreign opium was sold in China; now there is the native article also. Its poison is spread amongst our 400,000,000 people, and its malign influence amongst the 21 provinces. First it devours the property of the individual, then it affects the race, and finally it will destroy the whole country.

Sympathising with the miserable condition to which our people have been reduced, the Throne has increased the duties on opium, in the hope that such increase might hinder the consumption; and now an Imperial Decree has been issued fixing a date for the entire prohibition of opium smoking. This will mean that a loss of revenue to the extent of several million dollars a year will be incurred for the welfare of the people. Both Eastern and Western countries will bear this loss, which fact ought to encourage our people.

Now those who wish to better themselves are willing enough to stop smoking opium, but the more ignorant are entirely overcome by the vice. The fault lies entirely with the opium divans, which entice men to smoke and are pits for their destruction.

Let us consider the reason why people become opium smokers. At first they accompany their friends to the divans, and play with the vice in their leisure hours; but they soon become habitual smokers. Truly we have but little wisdom in contracting a habit that will trouble us as long as we live. The poisonous effect of opium being so obvious, why will not the people bestir themselves? We repeat that the fault lies with the opium dens, and unless they are closed it will be exceedingly difficult to prevent opium smoking.

Acting in accordance with the Anti-Opium Regulations received from the Board concerned, the authorities in Chihli, Shanghai, and some other places have already ordered all the opium divans in their jurisdiction to close within a period of six months. I, the Prefect, hope that my people will, in the matter of opium, loyally obey the wishes of the Throne, in order that the eradication of the vice may be brought about.

Besides issuing instructions to the Fu-fang T'ing, the Bureau of Police, and the Anti-Opium Society to forbid the opening of opium dens, I have now to direct the owners of all divans inside and outside the city to find other means of obtaining a livelihood. After the issue of this no additional divans may be established, and all dens are to be closed before the end of the 3rd moon of next year. If the dens are not closed by that date, or if opium lamps are secretly lit, the owners will be punished and their properties confiscated. Owners of shops used for the purpose of opium smoking after that time will be fined and their shops confiscated. Restaurants and brothels burning lamps for the convenience of their guests, whilst not in the same category as dens proper, ought to stop the practice before the end of the year, otherwise the owners will also be liable to punishment.

We hope this prohibition will have the necessary effect. If our words fail to have a good result, action will follow.

APPENDIX C.—No. 2.

PROCLAMATION ISSUED BY THE TARTAR GENERAL OF FUKIEN: DATED KUANG HSÜ,
33RD YEAR, 2ND MOON, 9TH DAY.

OPIUM, since it was introduced into China, has become one of the principal causes of our weakness. In consequence the Throne has determined, for the strengthening of our country, to put an end to opium smoking within 10 years. Those having the habit ought therefore to awake and heal themselves. We have received from the Chêng-wu Ch'ü Anti-Opium Regulations consisting of 10 Articles, which have been handed to the Provincial Treasurer, for publication in the various districts of this province, and all people must obey these directions.

We further understand that the reason why opium smoking is so prevalent amongst the people is that they are attracted to the opium dens; also, those who wish to give up the habit cannot obtain the proper antidotes. The General Commercial Association of Shanghai has lately submitted to the Board of Agriculture for approval a list of anti-opium medicines, with drawings of the grasses required for making them, and a copy has been transmitted by the said Board to this province. As it indicates clearly the manner of taking these medicines and of breaking off this pernicious habit, we have now to publish it for general information, with the hope that those of our people addicted to the vice may free themselves from it at an early date. All opium divans inside and outside the city walls and in the various departments and districts of the province are to be closed by the end of the 3rd moon of this year, and no additional dens must be opened. Anyone disregarding these instructions will be severely punished by the local officials and their divans sealed. House-owners who continue to allow their property to be used as opium divans will be liable to a fine.

APPENDIX C.—No. 3.

PROCLAMATION ISSUED CONJOINTLY BY PREFECT CHANG AND SUB-PREFECT YAO, OF
FOOCHOW, THE MINHSIEN YÜAN, AND THE HOUKWAN MAGISTRATE CH'ËN: DATED
KUANG HSÜ, 33RD YEAR, 3RD MOON.

We have now to jointly instruct you owners of opium dens that opium has caused us great harm for several hundreds of years, and it is impossible for us to count how many of our people have lost their property and their lives, all for the sake of opium smoking. The Imperial Decree of the 7th moon of last year prohibiting the smoking of opium was welcomed by the whole world. During the 10th moon of the same year we also received from the Chêng-wu Ch'ü regulations for the suppression of opium, consisting of 10 Articles, one of which ordains that all opium divans should be closed within six months, and proclamations were issued by our several superiors ordering all divans to be closed by the 30th day of the 3rd moon. In doing this they were only following Imperial instructions, which forbid the smoking of opium.

As the date on which all opium dens are to be closed is now drawing near, we have now to instruct the owners of all such establishment inside and outside the city walls, and in the various villages, that in addition to being a deadly poison opium causes us to lose a great deal of money, and that the date for closing of all divans having once been fixed it can never be extended. It will consequently be best for you to find your livelihood by other means. If you are unable to do this owing to loss of capital or outstanding accounts, we advise you to seek a suitable shop for the sale of opium in accordance with the regulations proposed by the Ts'ai Chêng Chü, for you will not be allowed to deal in opium at your original shop, or merely change your hong name.

All opium divans, large and small, are to be closed before the 30th day of the 3rd moon, and any persons having their places open on the 1st day of the 4th moon or secretly setting out lamps will be severely punished and their shops sealed. House-owners letting their premises as opium shops should request their tenants to close within a few days, otherwise we shall take necessary action, etc.

APPENDIX C.—No. 4.

JOINT PROCLAMATION ISSUED BY THE PROVINCIAL JUDGE, THE FINANCIAL BUREAU, AND THE CENTRAL POLICE STATION OF FUKIEN: DATED KUANG HSÜ, 33RD YEAR, 3RD MOON, 26TH DAY.

PROCLAMATION is hereby given that since opium has been imported into our country it has been the cause of much waste of money and a source of weakness to our race. An Imperial Decree was issued last year forbidding the smoking of opium. Proclamations have also been respectively issued by the Viceroy, Provincial Judge, Prefect, Sub-Prefect, and Magistrates to the effect that all opium dens are to be closed by the end of the 3rd moon, and an Anti-Opium Society has been formed by the local gentry for the distribution of anti-opium medicines to the public. Although the higher class of people, who know that the Imperial Decree must be obeyed and the habit of smoking opium broken off, have one after another stopped their opium smoking during the last few months, those who smoke opium on account of sickness can hardly stop doing so at once. We have therefore decided, in consultation with the members of the Anti-Opium Society, that, although all opium dens ought to be closed at the appointed time, a certain number of opium shops should be allowed to exist, in order that those who have not yet stopped their opium smoking may obtain the drug from them. As this is a measure we are compelled to take, it is necessary to draw up regulations for the guidance of such shops.

The regulations given by the Financial Bureau for such opium shops are as follows:—

1. That all opium dens are to be closed by the end of the 3rd moon, after which time people are allowed to establish only opium shops for a period of three years and on the expiration of that period such opium shops also are to be closed.
2. That no opium shop is allowed to be opened in a place where an opium den has formerly been established; should it be found out by the Financial Bureau or the members of the Anti-Opium Society that an opium shop is established in an old opium den, the shop will be sealed by the Magistrate and its owner punished.
3. That if an opium shop is to be established, the name and address of the shop and the name of its owner should be five days previously reported to the Financial Bureau for registration and license; if not, the shop will be sealed by the Magistrate.
4. That the license given to the opium shop by the Financial Bureau should be examined quarterly and changed yearly.
5. That the opium shop is only allowed to be established in a conspicuous place for the sale of opium only, and is not allowed to have any room for smoking opium; should anyone disobey the above he will be severely punished and his shop sealed.
6. That the tax on opium originally levied by the Financial Bureau is to be separately paid by the opium shops.
7. That should any opium shop be established, it should be reported to the Financial Bureau for registration before the end of the 5th moon.
8. That all opium shops are to be inspected by the police officers and the deputies of the Anti-Opium Society from time to time, who will ascertain if there are any opium lamps on the premises.
9. That the opium shop is only allowed to sell opium, but is not allowed to boil opium for others.
10. That when an opium shop is removed or closed, it should three days previously be reported to the Financial Bureau, Central Police Station, and the Anti-Opium Society, for a change of license; and if not, the shop will be sealed.

Should any of the opium shops disobey the above regulations, the owner and the assistants of the shop will be punished accordingly as soon as the matter has been reported to us by any other shop; and all properties of the shop will be confiscated and the proceeds handed to the man who reports the matter, as a reward.

APPENDIX C.—No. 5.

PROCLAMATION ISSUED BY HIS EXCELLENCY CHU, SUPERINTENDENT OF POLICE STATIONS AND PROVINCIAL JUDGE OF FUKIEN: DATED KUANG HSÜ, 33rd YEAR, 3rd MOON, 26th DAY.

SINCE opium was first imported into China it has done great harm to the country. We have been instructed by our superiors to issue instructions for all opium divans inside and outside the city, as well as in the various districts of the province, to be closed at the end of the 3rd moon. Proclamations to this effect have already been issued by us, and all police stations inside the city and at Nantai have been directed to instruct all opium dens in their respective jurisdictions to close their establishments by the appointed time, and to inform those concerned that if they disregard these orders they will be punished. The area of this provincial capital is very extensive, and the opium divans numerous. The time for closing such divans is now approaching, and we fear that some of them will only make pretence of closing and still carry on their business inside. Should any of the dens do this, the owners of the houses or any of the public may report the matter to the nearest police station. If on investigation the report is found to be true, the dens will be immediately sealed and the proprietors punished. If the owners of houses do not report the misconduct of their tenant to us their shops will be confiscated; those who do so report will be liberally rewarded.

Besides instructing all the branch police stations to carry out these orders, I am issuing this proclamation hoping that all the proprietors of opium dens and refuse shops will obey and close their premises by the end of the 3rd moon, and turn to some other business. If they still dare to set out lamps clandestinely after the time limit has expired, or the house owners protect them, they will be arrested and punished and their premises sealed. When once they are detected or reported on no mercy will be shown them. Let this be obeyed.

APPENDIX C.—No. 6.

PROCLAMATION ISSUED BY HIS EXCELLENCY CHU, PROVINCIAL JUDGE, SUPERINTENDENT OF POLICE OF THE PROVINCE OF FUKIEN, IN THE MATTER OF OPIUM SUPPRESSION: DATED KUANG HSÜ, 33RD YEAR, 5TH MOON, 8TH DAY.

THE effects of the opium evil will impoverish a family, weaken the whole race, and cause people to waste their time. At present the Government is trying to strengthen the country and will suppress opium smoking within a period of 10 years. Therefore I hope the people who are already addicted to opium smoking will reform and try to abandon the vice. The habit of opium smoking is mostly contracted in the opium dens. Therefore the previous Acting Viceroy has sent me a proclamation and a number of regulations to be posted up, and has ordered all opium dens and opium dross shops, both within and without the walls of the provincial capital and in other districts of the provinces, to close their business at the end of the 3rd moon. The time for such closing has arrived, so it is the duty of the proprietors of the opium dens and opium dross shops in all districts of the province to close their business in obedience to the Viceroy's order and find their livelihood by some other means. It is difficult to prevent all the opium dens which are situated far away from the provincial capital from setting out lamps privately, though outwardly they appear to be obeying the order. Therefore we again instruct the different local authorities to arrest and punish such offenders and to seal up their premises. House owners who allow their houses to be used as opium dens will be fined.

Besides instructing the various Magistrates to inspect the different places, I now issue this proclamation, hoping that all the opium dens and opium dross shops will obey the order to close up and revert to some other trade. If they are found still doing business privately they will be punished and their premises sealed.

APPENDIX C.—No. 7.

PROCLAMATION ISSUED BY THE PROVINCIAL JUDGE OF FOOCHOW IN THE MATTER OF OPIUM SUPPRESSION: DATED KUANG HSÜ, 33RD YEAR, 6TH MOON, 5TH DAY.

THE importation of opium into China has done great harm to the people. I received instructions some time ago to order the closing of all opium dens and opium dross shops before the end of the 3rd moon.

On investigation, though the various opium shops and opium dross shops have obeyed and closed their shops within the limited time, yet I hear that the different sedan chair shops in the city still set out lamps and retail opium to a number of men to smoke, under the pretext that it is for their own use. If the report is true, they are violating the prohibition. I therefore again order all the sedan chair shops to stop this practice by the end of the 11th moon—a limit of six months from the 1st of the 6th moon,—after which no one will be allowed to smoke. Ever within the prescribed time they are only allowed to smoke themselves and not to retail surreptitiously to a great number of men. This is aimed at ending the cause and eradicating the opium evil. Besides giving orders to the different police stations to issue special proclamations and to constantly inspect such places, I now issue this proclamation to prohibit such practice within the above specified time.

I therefore hope all the sedan chair shops in the city will obey and break off their smoking practice at the prescribed time, and not set out lamps or allow smoking again. If anyone is found to disobey this order, or has been petitioned against, he is to be arrested and punished without mercy.

APPENDIX C.—No. 8.

PROCLAMATION CONJOINTLY ISSUED BY YÜAN, THE ACTING MAGISTRATE OF THE MIN DISTRICT; CHANG, THE PREFECT OF FOOCHOW; CH'ËN, THE ACTING MAGISTRATE OF HOUKWANHSIEN: DATED KUANG HSÜ, 33RD YEAR, 8TH MOON.

SINCE the closing of the opium dens a number of lawless smokers have been found smoking in temples and in boats. A proclamation forbidding such practice has already been issued. We have now again heard of a number of law-breakers setting up divans and lamps and smoking in private families, making very little difference from the former opium dens to be found in almost every city and village. Besides making private investigations for the purpose of arresting and punishing such law-breakers when found, we now again issue this proclamation, hoping all classes of the people will realise the infinite benefit to be derived from the suppression of the opium habit, and not remain ignorant as hitherto and suffer punishment therefor.

After this proclamation every offender should reform.

Tipaos and house owners should exercise special vigilance to see that their houses are not converted into opium dens. If such practices are again detected, we will first seal and confiscate the house, and then punish without mercy such Tipaos and house owners who fail to report such cases as if they were smokers and the proprietors of such opium dens. We have repeatedly issued proclamations to this effect, so we think sufficient warning has been given.

APPENDIX C.—No. 9.

PROCLAMATION ISSUED BY HIS HONOUR KU, THE MAGISTRATE OF HOUKWAN DISTRICT, FUKIEN: DATED KUANG HSÜ, 33RD YEAR, 10TH MOON, 23RD DAY.

OPIUM has done a great deal of harm to China. It has wasted her money, enfeebled her subjects, and degenerated the race. One of our ancient Ministers, LIN WËN-CHUNG, tried to suppress opium, but to our sorrow he failed; but we are fortunate in seeing our misfortune now disappearing, and happiness is dawning just like one awaking from a long sleep.

Successive Imperial Decrees and official exhortations have been promulgated to you, and I do not know how you are going to exert yourselves in suppressing this poisonous drug.

I hear that a number of men have reformed and are cured of their habit, but there are also a number of men privately selling opium and setting up lamps in private families and enticing men to smoke. To such class of people suppression is only a name. Are those classes of people insensible to honour and shame? Are they wood that they should not be affected by such exhortations? After much consideration, I came to the conclusion that they are the uneducated class and strangers to self-honour. They thought that they could deceive the Magistrate, who is far away from them, forgetting that they cannot deceive their immediate relatives—fathers, brothers, etc. So if such family members will advise and stop them at the beginning, I think they can be easily persuaded. If they still dare to disregard the family advice, the case should be reported to me, and I will use all kinds of methods to arrest such men and punish them. If the village elders and family fathers can work conjointly with the officials, I cannot see that there should be any difficulty in stamping out the evil. If the village elders and family fathers can found a society and entirely suppress opium smoking in their own village, I should think it would be also to their advantage. I know that the method of resting such responsibility on them is generally used.

Therefore I will also use this method. In future, when anyone is detected by the members of the Anti-Opium Society opening opium dens and retailing opium without a license, I will at once make the elders, etc., hand the man over to me for punishment.

Besides writing to the Committee of the Anti-Opium Society to make strict investigations, I now issue this proclamation, hoping that the village elders, etc., will obey and carry out my wishes.

APPENDIX C.—No. 10.

PROCLAMATION ISSUED BY THE FOOCHOW TAOTAI IN THE MATTER OF INCREASING THE OPIUM TAX: DATED KUANG HSÜ, 33RD YEAR, 11TH MOON.

OPIUM is a very poisonous drug. Successive Decrees have been received, ordering the suppression of opium. Foochow has proved to be the first in closing the opium dens. Though the various opium dens both within and without the city have been closed, the number of opium retailing shops is yet great. If their number is not strictly controlled, I am afraid it will be difficult to foretell the day of entire suppression. Therefore, in order that I may carry out the orders of the Throne and relieve the sufferings of the people, I have consulted with the local gentry on the matter. The result is that it has been decided to send out deputies to clearly investigate the position of the present 214 shops, to forbid any future addition to those already established, and to impose an additional tax of 300 cash on every ounce (*liang*) of opium from the 6th of 1st moon, 34th year of KUANG HSÜ.

I will further select some officials to go round with books to the different shops with the Committee of the Anti-Opium Society to ask the different proprietors to undertake to write in the said books the amount of tax they have to pay. The least amount they may enter shall not be under the present tax on 2 ounces of opium. An official will collect the amounts so promised when they are due. A list of the money collected will be posted in front of the Bureau of Finance, Central Police Station, and its branches for the information of the public and to discourage frauds. If any shops are found to report less than the amount actually sold, they will be severely punished. In short, the present additional tax is not intended to impoverish the people, but to give some hindrance to smokers in the way of raising the cost of their vice. Such an obstacle to the sellers and buyers may gradually rouse them to reform and lead to the entire suppression of this harmful drug.

I therefore issue this proclamation hoping that all opium-shop proprietors will obey.

APPENDIX C.—No. 11.

PROCLAMATION ISSUED CONJOINTLY BY YÜAN, THE ACTING DISTRICT MAGISTRATE OF MIN DISTRICT, AND CH'ÊN, THE ACTING DISTRICT MAGISTRATE OF HOUKWAN: DATED KUANG HSÜ, 34TH YEAR.

THE poisonous effect of opium has circulated everywhere. Though the different opium dens in the city and country were closed and business stopped in obedience to orders, I yet hear upon inquiry that a number of lawless country people dare to hide themselves in country private families, temples, monasteries, and boats, and there they set up lamps and entice

a number of people to smoke; and we really felt very angry to see such ignorance. Besides holding the village elders, inspectors, monks in monasteries and temples, and the respective Tipaos responsible, we now issue this proclamation conjointly, hoping that all classes of people will note that the present opium prohibition was ordered by Imperial Decree: we must therefore try to remove the root of poison. There is no reason why they should obey outwardly and disobey privately, so as to throw themselves into the arms of justice. Therefore after this proclamation, if any man is found setting out lamps or being petitioned against to that effect, in private families, temples and monasteries, or in boats, enticing a number of men to smoke, he will be arrested and severely punished.

If house owners, monks of monasteries, and boatmen are discovered to be accessories to such practices and fail to report same to the authorities, they will also be arrested and punished and their premises sealed. Tipaos who fail to report what they know about these matters will also be punished.

APPENDIX C.—No. 12.

PROCLAMATION ISSUED BY HIS EXCELLENCY CHU, THE PROVINCIAL JUDGE AND THE SUPERINTENDENT OF THE POLICE OF FUKIEN: DATED KUANG HSÜ, 34TH YEAR, 3RD MOON, 29TH DAY.

FOLLOWING the receipt of the Imperial Decree concerning the suppression of opium, the various opium dens and opium dross shops were closed under orders from this office last year. The restaurants, brothels, etc., were also prohibited from furnishing lamps for their visitors. But among the vast number of smokers residing in this capital, there may be some people still arranging utensils for smoking in their own house, presumably for themselves, but in reality making a good profit from them. I have therefore suggested a set of regulations to the Viceroy for the purpose of obtaining a list of smokers. As my suggestions have been approved, I now issue this proclamation hoping that all classes of people will give their true name, age, address, occupation, and daily consumption to the police inspectors and members of the Anti-Opium Society, who will make a proper list of such smokers for the purpose of future investigation, and will also distribute licenses to such smokers.

The purpose of the said registration is to prevent fresh smokers and to exhort confirmed smokers to break off the habit.

If a smoker is found to report less than he actually consumes, or falsely that he is a non-smoker, I will at once treat him as a violator of this order and liable to punishment or fine.

APPENDIX C.—No. 13.

PROCLAMATION ISSUED BY THE VICEROY OF FUKIEN IN THE MATTER OF PROHIBITING POPPY CULTIVATION: DATED KUANG HSÜ, 34TH YEAR, 6TH MOON, 23RD DAY.

THE cultivation of opium has done great harm to the soil. I regret to say our nation has been reduced to a state of weakness and poverty, due greatly to the excessive cultivation of poppy and to the unusual number of opium smokers.

Since the 8th moon of the 32nd year of KUANG HSÜ orders were repeatedly received that poppy cultivation must first be reduced gradually, and cease entirely at the end of nine years, in accordance with the approved regulations drawn up by the Chêng-wu Ch'ü. The above order has already been made known to you in the form of a proclamation.

At present the Board of Foreign Affairs has obtained the consent of the different foreign Ministers to reduce the importation of opium for a trial period of three years, beginning from this year, and to commence further negotiations at the end of three years after seeing the actual reduction in cultivation and smoking made by China herself.

Even the different foreign nations show a great sympathy in our movement; why should the Chinese themselves, who are directly affected by the harm, not feel concerned and do away with the evil entirely?

Furthermore, if more land is devoted to poppy cultivation, less land is devoted to cereals. Consequently, in case of necessity we are affected by the price of food and the shortness of supply; so in order to prevent such hardship all opium-cultivated fields should be planted with other crops. The original order for reduction gives a time limit of nine years, so the present cultivated area should be 20 per cent. less than formerly, as it is two years since the issuing of that order. Whether that order was obeyed or not, no report has been received from the District Magistrates. I now learn that the cultivation in the province of Yunnan and Kiangsu, etc., where the greatest amount of opium is produced, will be entirely prohibited within this year. The province of Fukien should also imitate such an example, and it is a much quicker way to prohibit such cultivation in one year than to gradually reduce it in nine years. Therefore the poppies that were planted last year may be harvested this year. After the present crop, no further planting is to be made. The land must be sown with some cereal. Henceforth no more poppy-cultivated land is to be permitted in the whole Fukien province, and the farmers are further commanded to throw away their seeds so that no trace of the plant will remain. At a certain time I will despatch officials to make investigations together with the District Magistrates. If anybody is found cultivating the poppy, his land will be confiscated and the plants destroyed.

Besides instructing the different districts, prefects, etc., to strictly prohibit such cultivation, I now issue this proclamation, hoping it will be obeyed by all classes of people.

APPENDIX C.—NO. 14.

SUMMARY OF VARIOUS PROCLAMATIONS ISSUED AT TENGYUEH, YUNNAN.

No. 1 (25th July, 1907).—Proclamation of Tengyueh Magistrate, notifying the instructions of the Viceroy HSI LIANG that all officials are to give up smoking at once (the instructions of the previous Viceroy having been disregarded), and that immediate returns are to be forwarded of the acreage under poppy, the number of persons engaged in the cultivation, and the measures proposed.

No. 2 (7th August, 1907).—Proclamation of the Provincial Treasurer, Provincial Judge, Commissioner of Education, and the Taotais of the Shan Hou Chü, notifying the rules of a Provincial Anti-Opium Association which has been formed by the order of the Viceroy HSI LIANG.

[The first four rules are not notified, being concerned with the Association itself.]

RULE 5.—INVESTIGATIONS.

1°. A complete list of smokers in the city and suburbs to be made within a month. The smokers will obtain medicines from the Association, or buy those approved by it and cure themselves. The young and strong to be given six months and the old and weak one year.

2°. In country places the duty of reporting smokers will rest with the T'uan Chang, who will be responsible for all concealment.

3°. Existing dealers in prepared opium in the city will be required by the police to take out licenses within half a month, and at the end of a year will close. No new shops to be opened.

4°. Dealers in remedies will submit their remedies to the inspection of the Association and will not be allowed to sell without a certificate of the Association.

5°. All smokers who have given up the habit to be reported periodically.

RULE 6.—CURE.

1°. A hospital to be attached to the head office, in which smokers without homes will be received, 20 at a time, and for a period of 20 days. Cost of food to be paid by patients.

2°. Those who, the number being complete, cannot be admitted to hospital may, in accordance with Rule 5, 1°, register their names and receive medicines and medical attendance.

RULE 7.—LIMITS OF TIME.

1°. Registers of civil and military officials who smoke will be made by the Provincial Treasurer and the Ying-wu Ch'u respectively, and all, in accordance with previous instructions, and whether much or little addicted to the habit, will be required to abandon it by the end of the 6th moon of this year. Those who fail to do so will be reported to the Governor and Treasurer and will then be given an extension to the end of the 8th moon. If still unreformed, they will again be reported and punished. If over 60 years of age they will be dealt with leniently, but must retire from the public service.

2°. In the Education Department investigation will rest with the Education Commissioner, and in mercantile circles with the guilds, and lists are to be returned to the head office within a month. Smokers to be allowed six months to cure themselves, after which, if uncured, they will be ineligible for any educational office, will not be allowed to open any business, and will not be recognised as members of any companies or associations.

3°. People of the lower class being difficult to supervise, opium divans will be required to close in six months from the establishment of the Association.

RULE 8.—PROHIBITION.

1°. In the vicinity of the provincial capital the Magistrate will call for a return of the people growing opium, with the acreage cultivated and the quantity expected to be reaped by each in the present year, and report to the head office. The Magistrate will also by proclamation admonish growers to reduce the quantity grown year by year, and after three years cultivation will be forbidden altogether. In outlying magistracies the procedure to be similar.

2°. In the suppression of poppy planting the local authorities will confine themselves in the first year to injunction, in the second they will forbid it, and in the third they may forcibly put a stop to it.

3°. The sale of opium-smoking implements to cease, as before ordered, by the end of the 6th moon, and such implements to be considered as contraband after that date and destroyed wherever found.

RULE 9.—REWARDS AND PENALTIES.

1°. Local officials and gentry who establish societies and in six months or a year succeed in completely suppressing the evil will be recommended for rewards.

2°. All who offend against the rules laid down by the Association will be punished as misdemeanants.

No. 3 (7th September 1907).—Proclamation in colloquial by the Viceroy of Yunnan, HSI LIANG, earnestly and forcibly pointing out the destructive effects of opium smoking and foot-binding.

No. 4 (13th September 1907).—Proclamation of Tengyueh Magistrate, notifying the chief of the 10 regulations of the Government Council, prescribing forms for reporting smokers, and adding recipes for anti-opium remedies.

No. 5 (8th October 1907).—Instruction from Tengyueh Magistrate to local officers, calling for complete lists of inhabitants showing the number of smokers and non-smokers, and of poppy cultivators, with acreage, as required by the Viceroy.

No. 6 (18th October 1907).—Joint proclamation of Chungking and Künmin Prefects, warning opium divan keepers that soldiers will be sent to arrest all who have not closed.

No. 7 (9th September 1907).—Instruction from the Viceroy to the Tengyueh Magistrate, ordering him to post the Viceroy's colloquial proclamation against opium-smoking and foot-binding throughout his district, and to report the date on which the copies of the proclamation have been received and the places at which they have been posted.

No. 8 (no date).—Telegram from head office of Anti-Opium Association, requesting that it be applied to at once for various remedies named, including *A-chih-nai*.

No. 9 (11th November 1907).—Proclamation of Tengyueh Magistrate, notifying that all divan keepers having agreed to adopt other callings, the public are required (1) to pay their debts to the said divans, and (2) to refrain from further buying at the divans.

No. 10 (3rd April 1908).—Short proclamation by Tengyueh Magistrate, *re* closing of divans and licensing of smokers.

No. 11 (3rd April 1908).—Tengyueh Magistrate notifies that the Viceroy will soon send deputies to inquire into the carrying out of regulations, and that if it be found that smokers have not been reported or that divans are not all closed the local officers will be held responsible.

No. 12 (no date).—Proclamation by Tengyueh Magistrate against the extortion of fees for smokers licenses.

No. 13 (13th May 1908).—Proclamation by Tengyueh Magistrate, stating that evasions of the law regarding the closing of divans and the registration of smokers have come to his knowledge, and that such evasions will be severely punished.

No. 14 (3rd March 1908).—Memorial to the Throne by Viceroy HSI LIANG, praying that the term for the abolition of opium be shortened, and that after the end of the current year it be forbidden to smoke opium, to grow opium, or to deal in opium and opium-smoking accessories.

No. 15 (17th July 1908).—Viceroy's instruction to the Tengyueh Magistrate to post the proclamation, of which copies have been sent to him, and to report the date of receipt and of posting and the places in which posted.

No. 16 (no date).—Telegram from Viceroy to local officials, calling on them to carry out the new instructions to the letter. Hereafter there must be no poppy planters. From the beginning of next year there must be no opium smokers, and no merchants who store, buy, or sell opium. If these instructions are disobeyed, the offenders will be severely punished immediately on detection, and the local officials responsible will be rigorously dealt with.

No. 17 (no date).—Proclamation by Viceroy in six character lines, to the same effect as No. 16.

No. 18 (no date).—General order by the Viceroy, who states that the Government Council has reported in favour of his proposals for immediate and complete prohibition. Therefore after the autumn of this year the poppy is no more to be planted on any land. Smokers, of whatever age or sex, must one and all abandon the pipe by the end of the year. Dealers in crude or prepared opium must by the end of the year dispose of stocks outside the province, retaining not the smallest quantity. After the first day of next year if any plant opium they will meet with immediate punishment, and the land, whether of large or small extent and whether owned or only rented by the planter, will be summarily confiscated; and if dealers retain stocks, they will be punished in addition to the confiscation of their stocks. Officials in whose jurisdiction planting or dealing in or smoking opium is allowed to continue after the time fixed will be impeached and punished without mercy, while the Viceroy will certainly recommend to the Throne those who carry out instructions so that not a vestige of opium or a single smoker can be found under their rule. Measures taken and progress made are to be reported, as also the date of the receipt of these instructions.

No. 19 (no date).—Viceroy confirms the decision of the Fumin Magistrate in the case of a tea shop which has kept a divan against regulations. The offender to be bamboosed and put in the cangue, the landlord to be deprived of his rank, and the house to be confiscated and sold for the benefit of the anti-opium funds.

APPENDIX C.—No. 15.

REGULATIONS FOR THE CONTROL OF THE BUYING AND SELLING OF PREPARED
OPIUM IN THE PROVINCE OF FUKIEN.

HAVING completed their inquiry and registration of all the opium smokers in the provincial city of Foochow, the Chu To Hsi (an Anti-Opium Society) has drawn up some regulations which have been approved by the Provincial Judge and by him ordered to be observed by all concerned.

1.—The regulation providing for the buying and selling of prepared opium under a pass only must not be allowed to become a dead letter. Hence all the opium smokers as well as dealers are to observe the following rules from the 26th day of the 12th moon:—

- 1°. No opium smoker will be allowed to purchase prepared opium without a pass, nor may any shop sell opium without first inspecting the pass.
- 2°. When buying opium during the regular hours, the pass shall be handed to the shop and the shopkeeper shall stamp it with the date when the opium is sold.
- 3°. Each pass contains 90 spaces for as many dates, and at the end of every three months the pass shall be sent in to the Chu To Hsi in exchange for a new one. Failing to have it exchanged at the expiration of the period, the pass shall no longer be valid.
- 4°. When a buyer wishes to purchase opium under a pass for several days or a month in advance, he is allowed to do so, but it shall not exceed the number of days as indicated by vacant spaces in the pass.
- 5°. Should anyone be found buying opium without a pass, or should any shop sell opium without inspecting the pass, he is liable to a fine of not more than \$10 and not less than \$5, or to hard labour for not more than 10 days and not less than five days.

2.—Opium smokers shall be required to pay dues on opium which they keep for their own use. When they happen to possess a large stock of opium, they must report its exact weight to the Opium Tax Office, by whom a tax at the rate of 300 cash per ounce shall be levied on the net weight of the opium as weighed by the said office. After the smoker shall have finished smoking this opium, as calculated by his usual daily quota of consumption, he shall be allowed to buy more opium from the opium shops with a pass.

3.—All places or depôts for the preparation of boiled opium shall be registered for the purpose of inspection, and every shop selling opium may have a place for preparing opium annexed thereto. To prevent fraud, all opium shops are required to report to the police station in their district or to the Chu To Hsi, for purposes of identification, their opium-cooking rooms, and should any such place be found not corresponding with what is reported, the case shall be dealt with as one of unauthorised preparing of opium.

4.—The rule for the inflicting of a fine is made with a view to preventing the secret keeping of opium or the clandestine preparation of opium. Opium smokers shall truly report the quantity of opium they have in stock and pay the prescribed dues. They shall not be allowed to have any opium prepared by themselves. Infringement of this rule will entail confiscation of the opium and a heavy fine besides.

5.—A reward will be given for information leading to the discovery of opium clandestinely kept. A reward will also be given to anyone who supplies information leading to the discovery of any place illegally used for the preparation of opium. Half of the price realised on the sale of opium confiscated will be given to the informant, and the other half to the Government. The name of the informant shall not be made known, in order to save him from trouble.

APPENDIX C.—No. 16.

DESPATCH FROM THE SZECHWAN VICEROY TO THE PROVINCIAL JUDGE, ORDERING THE ISSUE OF INSTRUCTIONS TO HIS VARIOUS SUBORDINATES TO SHORTEN THE TIME LIMIT FOR REDUCING POPPY CULTIVATION, AND TO PROHIBIT ENTIRELY ANY FUTURE PLANTING IN THE VARIOUS FAMINE DISTRICTS.

(Undated, but known to have been issued in the summer of 1908.)

I NOW address you on the question of the reduction of poppy cultivation. Since His Majesty's approval of the various regulations submitted by the Min-chuan Pu, orders have been issued to the different provinces to investigate and shorten the time limit of poppy cultivation in accordance with local conditions. Yunnan has memorialised the Throne

promising to suppress the entire poppy cultivation there within a year. As this method is going to be followed by other provinces, I am afraid the time limit will soon come only to find the evil here not entirely eradicated, a fact which may lead to great complications in our foreign relations and to the payment of a heavy indemnity. On investigation I find more opium is grown in this province than elsewhere. In some districts there are tens of thousands of *mou* and in others thousands of *mou* of land under poppy cultivation.

If we reduce them little by little, the growers will pay very little attention, to say nothing of the insignificant amount reduced. If growers continue to cultivate them privately, or the investigators mistook the plant for some cereal, it would never be possible to stamp out cultivation entirely. There are places in various districts which have been rendered unproductive by prolonged drought or excess of rain and floods. Such places, if they were originally poppy fields, should be ordered to plant cereals, so that more food will be raised in the province and famine be less severe in time of scarcity.

I trust that you will at once start to make investigations and to keep a list of such famine-stricken lands or fields having a poor harvest this year, and to prohibit them from being sown with poppy seeds, if they were previously poppy fields, and they are further forbidden from sowing poppy seeds in future. Such fields should be ordered to plant beans, wheat, or other cereals, or any kind of useful trees.

The non-famine-stricken lands should be ordered to reduce cultivation by one-half and, if circumstances will permit, to entirely cease cultivation by next year. In short, the earlier the poppy cultivation finishes the earlier it will be possible to reap cereals, etc., from such fields, and less of the people's money will be wasted.

The different District Magistrates should be instructed to issue proclamations to the planters, and to organise methods of investigation in order to prevent fraud and private cultivation. Any diligent Magistrate who can exhort the people to cease the entire cultivation within this or next year without inflicting undue hardship on them will be recommended to the Throne for reward in accordance with the area of such cultivated lands under his jurisdiction; while those who fail to carry out this order energetically and to send genuine reports will be dismissed when detected or petitioned against.

Besides instructing the Agricultural and the Police Departments, I now write to you, trusting you will at once investigate and instruct the different District Magistrates to prepare a detailed report of the scheme to be used within 50 days dating from the arrival of this despatch

APPENDIX C.—No. 17.

SUMMARY OF PROCLAMATIONS ISSUED AT NINGPO.

PLACE.	DATE OF ISSUE.	BY WHOM ISSUED.	SUBJECT.
YUYAO.....	KUANG HSÜ, 33rd year, 9th moon.	Magistrate.....	Opium prohibition; farmers exhorted to raise cotton, grain, or pulse in place of poppy.
„	KUANG HSÜ, 34th year, 7th moon.	„	Cultivation of poppy prohibited; farmers warned not to yield to the temptation of high prices.
„	KUANG HSÜ, 34th year, 8th moon.	„	Referring to the Imperial Decree on the subject of gradual decrease in importation of opium and of the prohibition against smoking by officials, the people are enjoined to cease cultivating the poppy.
NINGHAI.....	(No date)	„	Cultivation of poppy prohibited; disobedience will be punished by confiscation of land.
„	„	„	Repeating the injunctions of the last proclamation.
SHANGYU.....	„	„	Evils of opium smoking; opium dens to be confiscated and smoking appliances destroyed whenever found; monks who are smokers to be ejected from monasteries.
SHAOHING.....	KUANG HSÜ, 34th year, 2nd moon.	Prefect.....	Official employes allowed three months in which to break off opium habit; failure to entail dismissal.

SUMMARY OF PROCLAMATIONS ISSUED AT NINGPO.—(contd.)

PLACE.	DATE OF ISSUE.	BY WHOM ISSUED.	SUBJECT.
HUICHI.....	KUANG HSÜ, 34th year, 8th moon.	Magistrate.....	Area of poppy fields having been ascertained, farmers are warned that confiscation of ground will result if cultivation of poppy is continued.
CHUCHOW.....	KUANG HSÜ, 34th year, 9th moon.	Superintendent of Police.	Houses in which opium smokers are entertained with the pipe liable to confiscation. Proprietors and smokers will both be dealt with according to law.
"	"	Police Station.....	Same as last.
SHIHPU.....	KUANG HSÜ, 34th year, 3rd moon.	Sub-Prefect.....	Opium dens not closed within a fortnight will be confiscated and the keepers prosecuted.
TAICHOW.....	KUANG HSÜ, 34th year, 6th moon.	Prefect.....	Five regulations to bring about the cessation of poppy cultivation in due time:— <ol style="list-style-type: none"> 1. Magistrates assisted by local committees and tipao are to ascertain the area and location of poppy fields and to report within a fortnight to the Prefect. 2. The local committees and tipao are to dissuade farmers from extending cultivation of the poppy and are to report to the local Magistrate those who disregard their representations. 3. Successful committees and tipao will be rewarded; the negligent will be otherwise dealt with. 4. Weiyüan furnished with particulars of reported fields will make tours of inspection in winter to check illicit cultivation. 5. Illicit cultivation that escapes the notice of weiyüan may be reported by private individuals, who will be rewarded, or the poppies may be rooted up by them without incurring legal penalty.
HUANGYEN..	KUANG HSÜ, 34th year, 9th moon.	Magistrate.....	The instructions of the Taichow Prefect's proclamation made known and obedience enjoined.
HAIMEN	(No date).....	Commander of Tai- chow forces.	Opium dens closed; private houses not to be used as opium dens; military patrol to make tours of inspection.
TINGHAI.....	KUANG HSÜ, 34th year, 8th moon.	Sub-Prefect.....	Farmers required to cultivate grain instead of poppy next year; non-compliance will entail severe penalties and confiscation of fields.
"	KUANG HSÜ, 34th year, 9th moon.	"	Houses rented to opium-den keepers liable to confiscation. Sub-Prefect will make tours of inspection in person by night and day.
HSIANGSHAN...	KUANG HSÜ, 34th year, 8th moon.	Magistrate.....	Cultivation of poppy prohibited; opium dens closed; opium shops to be registered and licensed; anti-opium dispensaries established. The numerous smokers at Shihpu are warned to throw off the habit and enter the hospital established by the Chamber of Commerce; if they fail of a cure after three months treatment they will lose their rights as citizens to have a voice in public affairs.
TZEKI.....	KUANG HSÜ, 33rd year, 5th moon.	"	Opium dens closed; tax on opium lamps discontinued; shops to cease selling pipes and other opium-smoking appliances by the end of the 6th moon; shops selling opium to be licensed and to reduce sales annually; opium tax continued.

For the compilation of the above report information has been collected from travellers and from postal employés in various inland places, as well as from native merchants through members of the Chinese staff; official sources of information have not been available.

APPENDIX C.—No. 18.

PROCLAMATION BY VICEROY HSÜ AND GOVERNOR TANG :
12TH NOVEMBER, 1908.

OUR people have gradually become more enlightened during the past few years. None of them would not detest the evil of smoking opium whenever opium is mentioned, but many persons are still addicted to the evil habit. The reason is not far to seek. It is due to the cultivation of the poppy, which has not been entirely abolished. As a rule, the planters think only of the profit to be derived from it. Why should it be so? Why should you, who have fields to plant, plant the very thing which does harm to other people?

If you will think over the matter carefully, you will then understand the reason why opium must be strictly prohibited and why our Government, with its exchequer nearly empty at a time when money is needed to pay for Boxer indemnity and to carry on the work of reform, foregoes the large amount of opium revenue. It is because of the great havoc wrought on our people by opium.

Opium is a chief staple of China's imports from the British territory. The British Government has willingly consented to reduce gradually its import into China until totally abolished within a certain prescribed period. If the foreign opium has ceased to find its way into China, and at the same time the native opium continues to be grown as before, will this not be a matter for foreigners to laugh at us? It will also furnish the neighbouring Powers an evidence of our inability to abolish opium.

As regards yourselves, it can never be said that without planting poppy you have no other means of getting your living. Before the opium was brought into China you certainly were never in a position to be without sufficient clothing and food. And is there anyone of you at the present time, without planting the poppy, who suffers from hunger and cold?

We have received instructions from the Ministry of Finance to the effect that, in accordance with the Opium Memorial, the cultivation of opium must be strictly prohibited in the Fengtien province after next summer.

In addition to the present proclamation, instructions have been issued to the various Magistrates with orders to enforce the prohibition. It is hoped that all of you will remember that the fields now planted with poppy must be planted with grain after next summer. As it is feared that you may not fully understand the opium prohibition and opium evil, so we will not shirk our duty in earnestly admonishing you beforehand: you are not to regard the present notification as a mere paper. It is hoped that all of you will advise each other not to tread again the forbidden path, and that you will not disobey the prohibition order.

When the time arrives we will send competent officials to go round and make strict investigation *re* poppy fields. If any new poppy be planted, the field will be confiscated and its owner punished in accordance with the opium regulation. After the issue of this proclamation the prohibition will be strictly enforced and no leniency will be shown to the offenders.

APPENDIX C.—No. 19.

MEMORIAL FROM YÜAN SHU-HSÜN, GOVERNOR OF SHANTUNG, DENOUNCING A NUMBER OF
OFFICIALS FOR THEIR NON-COMPLIANCE WITH THE ANTI-OPIUM REGULATIONS, AND
RECOMMENDING THEIR DEGRADATION AND CASHIERMENT.

ACCORDING to the Memorial of YÜAN SHU-HSÜN, Sub-Perfect TSAI SSÜ-YUNG, Magistrate KUNG TUN-JÊN, and three others have not yet got rid of the opium habit, and their reputation is not enviable. Expectant Prefect MU WU-KAI and 17 other officials in various capacities are still deep in the opium habit, and are most ingenious in concealing their vice. All these officials are to cashiered without exception.

HUANG NAI-HAN and LIU PANG-YEN, while acting as inspecting officers to detect opium smokers, have been guilty of intentionally trying to hoodwink their superiors, and they should be dismissed from office, never to be employed again. Expectant Prefect TANG SHIH-HSUN and 10 others, who are unenergetic in the discharge of their duties on account of their opium habit, should be relieved of office. Expectant Prefect HSIA CHIN-SHÊN and two others, who have contracted the opium habit and are devoid of ambition, are ordered to vacate their posts and return home.

The above Memorial was approved by the Prince Regent, December 1908.

APPENDIX C.—No. 20.

PROPOSED REGULATIONS OF THE ANTI-OPIUM HEAD BUREAU OF CHIHLI CONCERNING MEASURES TO BE TAKEN FOR THE EVENTUAL SUPPRESSION OF THE USE OF OPIUM.

THE Anti-Opium Bureau considering the measures to be taken pursuant to the proposed regulations already submitted to and approved by the Throne, have made the following conditions:—

1.—No opium shop shall be allowed to open without a license, and in case of any illegal opening of such shop it shall be immediately sealed and its property confiscated. Upon any shop being found to have been newly opened under cover of a license it shall also be forced to close up, but its property shall not be confiscated. The license will be valid within the period of one year, at the expiration of which it shall be renewed. The fees payable monthly for each license will be invariably \$6 for the first class establishment, \$4 for the second class, and \$2 for the third class.

2.—From the commencement of the operation of the Tientsin Anti-Opium Head Bureau, on the 25th of the 1st moon, all opium shops shall within one month apply for a license. Any shops taking license in the 2nd moon shall be required also to pay the fees for the 1st moon from which its payment is to commence. Though the operations of local branch bureaus in the various sub-prefectures and districts may be tardy, as a measure against dilatoriness and other irregularities the payment of monthly fees should commence from the month its operation comes into effect, and not from the month when the application for license is made.

3.—Opium shops are distinguished by three classes. Any shops having in the first instance obtained the third class licenses, and desiring to substitute them for the first or second class, shall be required to make good the payment of the first or second class fees commencing from the month of its operation, but not from the month when such application is made, so as to stop the irregularities.

4.—Every license before it is issued must be properly stamped with a chop, showing that the fee for the commencing month has been paid, and another bearing the inscriptions that in case of non-payment for 20 days after it is due the holder of the license is liable to a fine not exceeding twice the amount of the fee.

5.—Opium smokers are not allowed to purchase any opium without having obtained a license. Failing to do so, the purchaser, as well as the seller, is liable to a fine not exceeding fifty times the value of the opium thus illegally purchased, or he shall be called upon to undertake heavy labours as his punishment if he is unable to pay the fine. The license is not transferable. In case of any smoker being found to be holding for his own use another's license, the offender, as well as the rightful holder of the license, is liable to a fine not exceeding twenty times the value of the opium he uses, or he will have to undertake hard labour for his punishment.

6.—The licenses for opium smokers are classified into *A* and *B* license. *A* is for those who are above 60 years of age, and who, being too far advanced in years and too feeble to speedily give up the habit, are not obliged to do so; but they must not keep up their habit after the expiration of the period allowed for the suppression of opium. License *B* is for those under 60 years of age who are obliged to reduce the use of opium to a degree of 20 or 30 per cent. and in the course of time before the expiration of the limited period to give it up entirely. Those who have taken license *B* are not allowed to apply for license *A* in exchange when they come to the age of 60.

7.—The smokers licenses shall be issued quarterly. Before being issued, they shall be first stamped by this Bureau, numbered and divided into two classes, *A* and *B*, by chop, and into four quarters, as spring, summer, autumn, and winter (by chops also), so that there will be no confusion. If any smoker who has already got his first quarter's license comes to get the second quarter's license on or after the 15th of the 3rd month, the first quarter's license shall be endorsed "Not to be used for the second quarter and to be returned for cancellation in the third quarter." For the third and fourth quarters the procedure shall be the same. If any smoker comes to get a second quarter's license on or after the first of the 4th month, the first quarter's license shall be demanded back by this Bureau and cancelled.

8.—As the smokers license is issued quarterly, so subscriptions shall be paid quarterly. Should any smoker come at the middle or the end of the quarter to buy that quarter's license

he shall pay that quarter's whole subscription without deduction. If it happens that the year has an intercalary moon, the smoker shall be allowed to buy one month's opium more than usual, but the subscription for that quarter which has the intercalary moon shall be no more than an ordinary quarter.

9.—In selling licenses to the smokers of districts, sub-prefectures, or prefectures other than those of the provincial capital, the Magistrate, the Sub-Prefect, or the Prefect should write clearly the quantity of opium which the purchaser daily smokes on the middle of the official stamp which is affixed to the license, in order to avoid any possible alteration.

10.—The local opium dealer of the third class wishing to buy opium from the opium shop of the first or second class shall show his certificate and opium bill to this Bureau, which will give him a warrant permitting him to buy opium from the shop. This warrant is used for the purpose of recording the exact amount of opium sold in the market, and is supplied free of charge.

11.—For the convenience of the outport opium merchant who comes to Tientsin to buy opium before he has received the license, a kind of outside dealer's license is issued to him. This kind of license is entrusted to the opium sellers of the first and second classes to be given to those who are outsiders only. To prevent the local smoker from assuming to be an outsider and getting the benefit thereof, the merchant who buys less than *Tls.* 360 worth of opium shall pay the license fee the same as a local smoker, *e.g.*, for every *Tls.* 18 worth of opium he shall pay 10 cents as license fee; for more than *Tls.* 18 worth he shall pay 20 cents; for more than *Tls.* 36 worth, 30 cents; and so on. Should any outsider buy more than *Tls.* 360 worth of opium he will be treated differently from the local smoker, and need not pay any license fee.

12.—The outsider's license shall be issued only temporarily. When all the smokers and dealers in other prefectures, sub-prefectures, and districts have got their licenses, this kind of license shall be cancelled.

13.—When the opium dealer gives out the outsider's license (which is in triplicate) to any non-resident merchant, he should first put down the date, the number, the quantity of opium, and the names of himself and the merchant on each part of the license. The merchant should then bring the license to this Bureau, which will register and stamp it with a chop especially provided for such purpose. After that, the holder is permitted to buy opium from the shop. Failing compliance herewith, or if the number or quantity on the license does not tally with the counterfoil, the merchant will be punished severely upon detection by the inspector or police.

14.—The outsider's license should bear a stamp declaring "No fee charged if the opium purchased is worth over *Tls.* 360," in order to prevent the opium dealer getting any license fee from the outsider.

15.—A kind of transient smokers license is issued especially for travellers in the hotels, but these licenses are non-available outside of the hotels. Small inns in which persons have no luggage and pay only 1 or 2 cents for their lodging are not permitted to get this kind of license for their customers; but hotels conducted on a large scale and keeping account books which can be inspected are allowed to make use of this kind of license, subject to certain regulations.

16.—The transient smokers licenses are bound in book form of two kinds, one containing 100 and the other 50 forms. The former are for the larger and the latter the smaller hotels.

In issuing transient smokers licenses the location of the hotel should be written on the cover of each book of tickets to avoid confusion.

17.—Every hotel-keeper applying for transient smokers licenses should get a shop to furnish security.

18.—Hotel-keepers, when paying in the fees for the transient smokers licenses to this Bureau, should bring a pass book, in which the Bureau will enter the amount received and put its stamp thereon, to save trouble of giving receipts. Hotel-keepers coming to get transient smokers licenses should give a receipt to the Department Bureau for future reference.

19.—On delivering the counterfoils and fees of the transient smokers licenses, the hotel-keeper should state the number of licenses sold and the amount of copper coins received.

20.—Hotel-keepers should receive 5 per cent. commission on the licenses sold.

21.—When issuing transient smokers licenses, the Bureau should first examine the municipal license of the shop which furnishes the security, as well as the municipal license of the hotel.

22.—There shall be a fixed time for issuing licenses to the local smokers. Beyond the fixed time no purchasing of licenses will be allowed. Anyone, however, who returns from outside and applies beyond the time limit may get the license if he can provide a bond; but the fee for the same shall be double the regular rate.

23.—After the issue of the various licenses every quarter, all the names, addresses, number of the smokers, and quantity of opium sold should be recorded in a book, which is to be kept for reference for the next quarter.

24.—Those who take out smokers licenses are not allowed to smoke in hotels, restaurants, or brothels, but at home.

25.—The accountants and employés of hotels, restaurants, or brothels are allowed to purchase smokers licenses for themselves, if they have got the habit of smoking, but they are not permitted to let others smoke.

26.—Smokers shall buy their license from the office where they got it before.

27.—The opium dealer's license is good for one year, but its fee shall be paid monthly.

28.—As the number of smokers is uncertain, and some of them are living far from the office, from five to ten days grace are allowed them for changing their licenses; but the dealers must get their licenses on or before the fixed date.

29.—Since the Police Department assists the Anti-Opium Bureau in its exercise of supervision, half the fines, if any, shall be retained by this Bureau and the other half go to reward that department.

APPENDIX C.—No. 21.

PROPOSED REGULATIONS OF THE ANTI-OPIUM BUREAU OF CHIH LI FOR INVESTIGATING THE OPIUM SMOKING HABIT OF OFFICIALS.

1.—THIS Bureau proposes to establish an institute for discovering whether officials are opium smokers or not. All officials who are opium smokers, upon the fact being ascertained, shall be required to come to this Bureau to undergo a test. Taotai WANG HSUEH-TSENG having been appointed director of this Bureau, the responsibility of investigation is devolved on him, and he must carry out his duties faithfully.

2.—Provincial officials of the higher ranks, both civil and military, shall be examined by officers appointed by the Viceroy, and their certificates of non-smoking shall be deposited in the yamen of the Viceroy. Whether records of their cases are to be kept in this Bureau or not shall depend upon the decision of the highest provincial authorities.

3.—Officials, holding either substantive or acting posts, shall be examined by their superior officers as to whether they are smokers or not. If not a smoker, he must file a certificate signed by himself to that effect, and this must be supplemented by another certificate of endorsement from his superior officer. If any favouritism is shown by shielding any offender, upon this being discovered the matter will be reported to the high authorities, and the offending official will be required to come to this Bureau for undergoing a test, and the officer shielding him shall be given serious black marks.

4.—Officials of expectant rank in Government service shall be examined by the director or co-director of their respective departments as to whether they are opium smokers or not. Smokers will be removed from their posts, while each non-smoker will be required to submit a certificate of non-smoking signed by himself, in addition to another certificate of endorsement signed by the director or co-director. Should a smoker be allowed to smoke through the

favouritism of his superior officer, upon the case being reported to this Bureau and duly verified the informing official will be rewarded with meritorious marks, while the question of punishment for the negligent director or co-director will be considered.

5.—Officials of expectant rank and not in Government service must also each submit a certificate of non-smoking. If anyone cannot submit such a certificate he shall not be given any post. Besides submitting his own certificate, each one must hand in an additional certificate signed by a high official of his own province, for the purpose of verification. This Bureau will also appoint reliable Prefects, Sub-Prefects, and Departmental Magistrates to direct the making of inquiries among the expectant officials of their respective provinces. If any favouritism is shown, upon the same being reported and the case duly verified the offending smoking official will never be taken into the Government service, while the official of the same province as the culprit who was his endorser, and the official whose duty it was to find out smokers, will both be given serious black marks.

APPENDIX C.—NO. 22.

MEMORIAL FROM VICEROY TUAN FANG REPORTING ON THE SHORTAGE OF REVENUE DERIVED FROM THE LIKIN ON NATIVE OPIUM.

ACCORDING to a report by the director of the Consolidated Likin Bureau at Hsüchow, the amount of native opium production has, in consequence of Imperial instructions which were duly circulated throughout the various districts, considerably decreased this year. In addition to this, a number of people who had clandestinely planted the poppy, but were afraid afterwards of detection and punishment, uprooted their crops and planted grain in their stead. Besides, many of those who had planted their poppy and duly reported same had their crops considerably damaged by drought. In consequence the total production for all the districts was lessened by over 30 per cent. This fact was established by the reports of all those officers who had been sent to investigate the matter.

As a result of the shortage of the opium crops, the quantity of new opium put on the market has been small and its price abnormally high. Dealers have had perforce to go elsewhere to purchase their opium. All this has resulted in the loss of considerable revenue to the Consolidated Likin Bureau, which has been further accentuated by the facilities for smuggling opium into Shantung, Honan, and Anhwei, which three provinces are conterminous with the districts of Hsüchow. Most stringent preventive measures have been taken against this smuggling, but it is most difficult to adopt totally effective steps.

Rescript dated 25th day, 11th moon, 34th year of KUANG HSÜ (18th December): "Noted."

APPENDIX C.—NO. 23.

ANTI-OPIUM MEASURES IN CHEKIANG.

RECENTLY instructions from His Excellency TSËNG, Governor of Chekiang, were sent to the various Prefects of his province, to be passed on to all the Magistrates of the districts. These instructions state that owing to the comparative cheapness of native-grown opium and the ready facilities for procuring same, the number of those who smoke and cultivate the drug has increased. It is now proposed to enter into an official register the particulars of all land under poppy cultivation, and this registration must be completed within one month after receipt of instructions. After the returns have been submitted for examination, the farmers will be required to plant other things instead, and by the 4th moon of next year plantation of poppy must entirely cease. When the returns have been received by the Governor's yamên, he will appoint officers to make a tour of inspection for the purpose of verification and to prevent fraud. Those who smoke opium, whether they be gentry, merchants, students, or commoners, must be found out and their names registered as opium smokers. Anyone wishing to rid himself of the habit must do so within one or two years, and after he has done so he must present a certificate signed conjointly by the elders of his clan or the directors of his business. He may then petition the local authorities to have his name deleted from the register of opium smokers.

But if even after two years a smoker should still be found addicted to the habit, he will always be regarded as an opium *habitué*, and be treated differently from the general class of people.

APPENDIX C.—No. 24.

TELEGRAM FROM THE GOVERNOR OF SHENSI.

HIS Excellency ÊN SHOU, Governor of Shensi, telegraphs as follows regarding the condition of the opium problem in Shensi:—

In 1905, 530,991 *mu* of land were under poppy cultivation in Shensi; in 1906, 537,617 *mu*; in 1907, owing to the inauguration of the Native Opium Consolidated Tax, when no likin was paid, no record was kept; in 1908, 356,374 *mu*. The above returns were reported to the Board concerned and are on record. Regarding the number of opium smokers, returns have only been received from 40 odd districts, while 48 more districts have yet to send in their reports. No figures can, therefore, be given for this. There are in Shensi seven prefectures and five independent sub-prefectures, with a total population of 9,000,000. Taking the head prefecture as example, it is found that over half of its 900,000 inhabitants are habitual smokers. Since the issuance of the strict Anti-Opium Edicts, over 106,500 smokers have given up their habit. At this rate, there is no doubt that opium suppression can be successfully carried out within the ten-year period. The conditions of the opium problem in Kansu are similar, and the officials there are also most earnest in the matter.

APPENDIX C.—No. 25.

MEMORIAL FROM HSI LIANG, VICEROY OF YUN-KWEI, REPORTING ON THE SUPPRESSION OF NATIVE OPIUM AND THE ABOLITION OF OPIUM LIKIN.

IN a former Memorial the writer proposed that smoking and production of opium might be totally suppressed at the end of the current year, and the dealers in raw and prepared opium be compelled to export the balance of their stock at the end of the year and take up other business or trade. During the past months the officials have been carrying out opium suppression with sincerity, and the people, repenting of their error, are obeying with earnestness. In consequence, at the end of this year all the native opium will have been exported from the province of Yunnan, and the Opium Likin Collectorate will be closed. A proposal is submitted by the officials of the Consolidated Likin Collectorate of Yunnan that, from the 1st day, 1st moon, 1st year of HSÜAN T'UNG, all the stations in the province shall cease collecting likin on native opium, and if any further stock is found after that date still unexported, the same shall be confiscated and destroyed, in order that the province may be entirely rid of opium.

The above proposals are fully approved by the memorialist.

The loss of the opium likin, amounting from *Tls.* 400,000 to *Tls.* 500,000, on which the expenditures of Yunnan have hitherto so largely depended, however, should be taken into consideration. If the loss is to be made good simply by the extra tax on salt, a large deficit will be inevitable. The officials of the Consolidated Likin Collectorate should therefore take the general situation into consideration and devise other measures for recouping the loss.

Referred to the Ministry of Finance by Decree dated 25th day, 11th moon, 34th year of KUANG HSÜ (18th December 1908).

APPENDIX C.—No. 26.

THE OPIUM QUESTION IN SHANTUNG.

HIS Excellency YÜAN SHU-HSÜN, Governor of Shantung, reports telegraphically as follows to His Excellency Viceroy TUAN FANG, regarding the present condition of the opium question in Shantung:—

In the provincial capital an institute for testing opium-smoking officials has been established. Already over 1,100 officials have been tested as to their smoking habits. Opium-cure institutes have been established in all the districts of the province, and in one district alone over 10 such institutes have been established. The number of opium-cure institutes thus far established and reported is 193, but this number is being increased. Those who have already been cured in these institutes number 49,573. Following the practice adopted in Chihli, opium

smokers are required to take out a license before they can purchase opium. The exact figures of the number of smokers cannot yet be obtained, owing to the shortness of time since the anti-opium movement went into operation. According to the statistics of the Native Opium Consolidated Tax Bureau, in the 33rd year of KUANG HSÜ Shantung produced for home consumption 242,105 catties of opium, and in the first 10 months of the 34th year, 95,679 catties, thus showing a reduction of 60 per cent. In the 33rd year the native production for export was 72,730 catties, and in the first 10 months of the 34th year, 52,557 catties, making a reduction of 30 per cent. Again, in the 33rd year, native opium imported into Shantung was 6,816 catties, and in the first 10 months, 585 catties, making a reduction of 90 per cent. All these diminished quantities of consumption is a clear proof of the reduced number of opium smokers. But the ultimate success of the anti-opium movement depends upon the suppression of the home production of opium. Instructions were issued, therefore, that the plantation of opium must entirely cease within this year, with the exception of those who had planted their opium late, who would be allowed to reap their crops next spring. In the prefecture of Wuting no opium has ever been cultivated. In the Taian prefecture opium plantation has entirely ceased. In 16 of the sub-prefectures and 11 of the districts of Tsinan opium cultivation has been entirely suppressed. The same is true of the 10 sub-prefectures and nine of the districts of Tengchow; also of 10 of the sub-prefectures and seven of the districts of Tungchang; also of the same number of sub-prefectures and the same number of districts in Yenchow. In the above-named four prefectures the majority of the districts have already ceased opium cultivation. The reduction of area under opium cultivation is 60 or 70 per cent. In a few of the worst districts which are noted for the opium industry reduction has been effected to 20 per cent.

After next spring it is confidently expected that opium plantation will practically disappear throughout the entire province.

APPENDIX C.—No. 27.

TELEGRAM FROM THE GOVERNOR OF CHEKIANG TO THE GRAND COUNCIL REQUESTING
THE LATTER TO MEMORIALISE THE THRONE.

ALTHOUGH the 10 years period allowed for the total suppression of opium is ample for its purpose, still steps must be devised to bring about success in their proper order. The prohibition of opium cultivation is much harder than the suppression of the opium habit. According to the plans proposed by the Ministry of Finance for the suppression of opium cultivation, each province must investigate into its own conditions and adopt uniform measures for the entire province or separate measures for each district. In the province of Chekiang the two prefectures of Tai and Wan, the two sub-prefectures of Yuwan and Tinghai, the district of Shangshan, where Ningpo is situated, and also the Yuyao district, in which is Shaohing, are the centres for opium cultivation. Since the suppression movement was started cultivation in the district of Shangshan has entirely ceased, and in the other districts it is gradually decreasing. At the present moment it is estimated that a reduction of 30 to 40 per cent. has been effected. People growing poppy were persuaded to plant cereals in their place, and as soon as they find this to be as profitable, poppy cultivation will automatically cease. Judging from present prospects, it will not require 10 years before the cultivation of opium will have totally disappeared. It is proposed that in the 1st year of HSÜAN T'UNG an attempt shall be made at the suppression of poppy cultivation throughout the province, and that in the 3rd year the said cultivation must absolutely cease. During the remaining four years steps will be taken to find out if there are poppy crops still growing clandestinely, and to do whatever else may be necessary to bring about a complete abolition of the opium problem.

Dated 13th January 1909.

APPENDIX C.—No. 28.

TELEGRAM FROM THE GOVERNOR OF SHANGTUNG TO THE VICEROY AT NANKING.

YOUR message of the 2nd inst. to hand. The remarks made by the British Commissioners concerning this province perhaps refer to the condition of affairs 10 months ago. Since then suppression of opium cultivation has been energetically carried out, and as far as has been reported, the whole poppy area has been taken up by other crops, with the exception of two

districts. There are districts which have not yet reported, and orders have been sent to their officials to be energetic in suppressing cultivation. A table is prepared, and will be forwarded, showing the area of land under poppy before and the area that is to be planted with cereals in their place, in accordance with the prepared schedule. This plan will be duly carried into operation the coming spring, and in the 2nd moon officials will be sent to investigate the real condition more closely. Should any districts be found to be still disobeying orders, the officials will be impeached and cashiered, according to the degree of their culpability.

Dated 25th January 1909.

APPENDIX C.—No. 29.

TELEGRAM FROM THE VICEROY OF SZECHWAN TO THE VICEROY AT NANKING.

YOUR message of the 2nd inst. is received. Forty odd districts in this province have been reported as being entirely free of opium cultivation last year. Every effort is being put forward to suppress cultivation. Strict orders have again been sent out to investigate the poppy areas thoroughly. This province has been noted for opium cultivation, but to say that there is still as much opium grown throughout the province as formerly is erroneous.

Dated 25th January 1909.

APPENDIX C.—No. 30.

TELEGRAM FROM THE GOVERNOR OF HONAN TO THE VICEROY AT NANKING.

YOUR message of the 2nd inst. is to hand. My last report referred to the suppression of opium cultivation, and not reduction. Capable officials have been sent out to the different districts to investigate carefully this matter in conjunction with the local officials. Efforts will not stop short of uprooting all the crops. The planting of poppy is a matter which can be seen and heard of and cannot be concealed. The Indian merchants are trying to make difficulties for us by their criticism, but I beg you will state the true facts to them.

Dated 30th January 1909.

APPENDIX C.—No. 31.

PROGRESS OF THE OPIUM WAR IN FUKIEN.

1st. In the 32nd year of KUANG HSÜ, the 11th month and 29th day, a proclamation was issued that after a period of six months from date all opium dens in the city of Foochow must be closed.

At this time there were over 820 opium dens in the city and immediate suburbs. As the time drew near for the going into effect of this proclamation every effort was put forth to influence the officials to give a further extension of the time or to wink at the violation of the order, but on the 4th month and 1st of the month in the following year, the order was put into effect and all opium dens were closed and have remained closed from that time.

2nd. KUANG HSÜ 33rd, 2nd month, 9th day, the Viceroy issued a proclamation establishing opium hospitals, to aid those who desired to break off the habit. Arrangements were made whereby those who were poor could have the benefit of these hospitals free of expense save for their food.

At this time there were six of these hospitals opened in Foochow, while other places in vicinity also established such hospitals.

3rd. On the 26th of the 2nd month, 33rd year of KUANG HSÜ, a proclamation was issued establishing certain places where opium could be bought by those who were unable to immediately break off the habit and a limit of three years was fixed for the complete closing out of these places. No place of sale was allowed to be opened where opium was smoked.

At first there opened 430 of these places where opium was allowed to be sold. In the 12th month of that year officials were appointed to examine into these places of sale and a tax of 30 cents per ounce was levied upon the opium with the result that the number of places of sale were reduced to 214. This number has since been reduced to 155.

4th. 29th of the 3rd month, 33rd year of KUANG HSÜ, an Edict was issued that anyone found guilty of inviting a friend to smoke opium with him should be considered as opening an opium den and his property should be confiscated and he severely punished. 452 families have been punished and 17 shops have been closed under this regulation. The effect of the prohibition was that opium smoking must become solitary and not in company with others. This proclamation is also effective and is enforced.

5th. Immediately following the above proclamation was another, to the effect that any person detected in selling or using opium in violation of the above proclamations should have his property taken from him and sold. He should not be allowed to hold the property even for legitimate purposes.

6th. 8th of the 5th month, 33rd year, an Edict was issued that all opium dens in the province should be closed in the same manner as those in Foochow had been. This proclamation is being enforced where the authorities at Foochow have the knowledge, but in spite of their efforts there are many opium dens still running full blast in outlying districts, though they are steadily being closed.

7th. In the 8th month, 33rd year, a proclamation was issued forbidding coolies from smoking opium in their stands or in company.

8th. 21st of the 8th month, 33rd year, a proclamation was issued forbidding those who were smokers from going on board boats where they might be out of the way of the officers, or of using temples for their purposes, a heavy penalty was placed upon the violation of this order and the owners of the boats or priests of the temples were held responsible.

9th. 4th of 12th month, 33rd year, a proclamation was issued exhorting all heads of the salt establishments and all people to break off the habit.

10th. The Anti-Opium Societies had already appointed committees in all parts of the city, whose business it was to use every means in their power to detect the illicit use or sale of opium, and they were very much hampered in their work by lack of authority, until the 29th of the 3rd month of the 34th year of KUANG HSÜ, when an Edict was issued giving these committees full authority to enter any place for examination and placing at their disposal officers to enforce their demands for admittance or to make arrests where ordered by such committees. These committees have been busy every night and have accomplished much in enforcing the above decrees. At times they have been attacked and some of them severely beaten, but nothing has deterred them from their purpose. They are still warring nightly.

11th. About this time the Anti-Opium Societies were authorized to make a careful canvass of the city with intent to determine the number of opium smokers and their location. At this time each house was marked as either having an opium smoker within or as being clear, and a close record was kept. Each opium smoker was furnished with a certificate giving his name, age, residence, business and the amount of opium he consumed in a day. Fraudulent statements in this matter on the part of the parties were punished by imprisonment or heavy fines. In this way a fairly correct record was secured of those who were using opium, and of the amount consumed each day and by each person.

12th. Many proclamations were issued along the above line and are summed up in the following conditions for the sale and use of opium, as set forth in a proclamation issued 24th of the 10th month of this year:—

(a) These certificates shall be in triplicate, one form to be deposited in the hands of the proper official, one form to be deposited with the Anti-Opium Society, and one form to be left in the hands of the opium user.

(b) Without this certificate, it shall be impossible to buy opium; without this certificate before him, the licensed opium salesman is forbidden to sell opium under any condition.

(c) There shall be a blank space on each certificate for the entry of the daily amount of opium used and the salesman must stamp the amount into the blank as the daily sales are made. The amount each may buy as a limit, daily, is stated in the face of the certificate, this amount may not be exceeded.

(*d*) This certificate is issued for only three months, after which it must be renewed.

(*e*) In case the person cannot come daily to buy, he may buy the supply once per month, but cannot exceed the daily allowance for the month.

(*f*) In case opium is sold without the presentation of this certificate the salesman shall be fined \$30 for each offense. The purchaser shall be fined or imprisoned.

(*g*) After the first three months, upon the renewal of the certificate it must be for a less amount each time.

(*h*) The licensed salesman must regularly report the amount of opium sold and make the proper returns in cash for the same including the tax of 30 cents per ounce.

(*i*) The place of preparation of opium for sale and its sale must be fixed and cannot be changed from place to place. This is to avoid fraud.

A heavy penalty is placed upon the violation of these regulations. These regulations are being well enforced. A reward is offered for any information which will lead to the conviction of any who may secretly engage in the opium business in violation of the above.

PROCLAMATION AGAINST CULTIVATION OF POPPY.

Whereas the Viceroy of the Fukien Province has received instructions from the Imperial Government at Peking, authorizing him within the present year to entirely prohibit the cultivation of the poppy, it is now ordered that all ground formerly given to the cultivation of this plant be hereafter devoted to other uses. If anyone is reported to have violated this injunction and is found guilty, not only shall the opium plants be destroyed, but the land also shall be confiscated.

Fearing that some of the remote country places may not have seen the notices that have been published in the papers, we therefore are issuing this proclamation and posting it everywhere, that all may be informed regarding these regulations. We hope that all the people will take notice and thus avoid incurring the punishment that will surely be visited upon all offenders.

Issued by the

“FUKIEN ANTI-OPIUM SOCIETY”

In the seventh month, KUANG HSÜ, 34th year.

In the carrying out of this proclamation against the growing of poppy the Government is very strict, and the poppy has been practically given up in the whole province. One may travel for days and in any direction without seeing a single poppy plant. This is the report of missionaries who are penetrating into all sections of the province. Fukien practically has no poppy growing, as a result of the proclamation and its strenuous enforcement.

The above are practically the proclamations and somewhat of the statement of their contents. These proclamations are being generally enforced at least about Foochow. Below are some of things which have been accomplished by the Anti-Opium Societies up to date.

WORK OF ANTI-OPIUM SOCIETIES.

The Anti-Opium Societies have put out 56 letters and documents at different times urging the people to give up the opium habit and striving to create a sentiment against opium.

Among other things this Society has put forth three illustrated reports of their work and circulated them largely. They are now at work on the fourth.

In the hospitals for breaking off the opium habit much has been done and five out of the six hospitals report 4,414 persons as having been discharged cured of the opium habit.

There are seven headquarters for the committees appointed to nightly inspect certain territories for violations of the laws. Outside of Foochow City there are 61 Branch Associations actively at work.

In addition to this all officials are compelled to appear before a regularly appointed official for examination as to whether he is an opium user

There have been eight burnings of opium and opium fixtures amounting as follows:—

Pipes	4,433
Pipe bowls.....	4,482
Lamps.....	3,693
Boxes	3,497
Plates	3,620
Needles	8,971
Cooking vessels, large.....	427
" " small.....	87
Opium destroyed.....	oz. 3,138
Opium deposits from pipes	" 577

At first there were 6,585 certificates in use. Of this number 483 have been taken up leaving but 6,102 certificates now in force.

EXTRACTS FROM TELEGRAPHIC REPORTS TO HIS EXCELLENCY VICEROY TUAN FANG,
GIVING LATEST RESULTS IN THE PROVINCES *RE* OPIUM CULTIVATION.

MANCHURIA:—

Fengtien.—The cultivation of the poppy has been entirely suppressed.

Kirin.—Cultivation already reduced by 25 per cent., and will be totally suppressed by end of 1909.

Heilungkiang.—Cultivation slightly reduced, but will be totally suppressed by end of 1909.

CHIHILI.—Cultivation has been reduced by one-third, and will be totally suppressed in 1909.

SHANTUNG.—Cultivation reduced by 60 per cent., and to be totally suppressed by end of 1909.

KIANGSU.—Cultivation already reduced by 70 per cent.; the remaining 30 per cent. will be entirely suppressed by the spring of 1909.

CHEKIANG.—Cultivation reduced 30 per cent., and to be totally suppressed within three years.

FUKIEN.—Cultivation in the spring of 1908 showed a reduction of 20 per cent. After the crop for that year had been gathered no more poppy was allowed to be planted; consequently, cultivation totally suppressed by end of 1908.

KWANGTUNG.—Never produced much opium, and what little was formerly grown is now entirely suppressed.

HUPEH.—Cultivation reduced 25 per cent.; will be totally suppressed in 1909.

HUNAN.—Cultivation reduced by 60 per cent.; will be totally suppressed in 1909.

KIANGSI.—Cultivation, never large; will be totally suppressed in 1909.

ANHWEI.—Cultivation is being energetically reduced, and will be totally suppressed in 1909.

HONAN.—Cultivation reduced 65 per cent., and will be totally suppressed in 1909.

SHANSI.—Cultivation reduced 48 per cent. From the beginning of 1909 no poppy will be allowed to be planted.

SHENSI.—Cultivation reduced 34 per cent., and to be totally suppressed in three years time.

KANSU.—Cultivation reduced 45 per cent. It is proposed to suppress the cultivation within a year's time.

SZETCHWAN.—Over 40 districts have already totally ceased cultivating the poppy, and the balance of the districts will suppress cultivation within the prescribed limit.

KWEICHOW.—The cultivation has been reduced 40 per cent.

YUNNAN.—The cultivation has been reduced 80 per cent., and will have totally ceased at the beginning of 1909.

KWANGSI.—The cultivation of the poppy, never large, ceased entirely in 1907.

NEW TERRITORY.—The cultivation, never large, has decreased by 20 per cent.

QUESTIONS PUT TO THE CHINESE DELEGATION (SIXTH SESSION).

I.—BY THE BRITISH DELEGATION.

1.—Can the Chinese Delegation state whether trustworthy returns of the acreage under poppy and of opium smokers in each province will be compiled and, if so, when they will be made public in official documents?

2.—Is the Table of distribution on pages 5 and 6 of the Memorandum an accurate statement of the distribution and consumption of foreign opium in the provinces of China?

3.—Can the Chinese Delegates state or ascertain for the information of this Commission the total amount of revenue, Imperial and Provincial, derived from native opium in 1906 and 1908?

4.—Do the Chinese Delegates consider that the Returns given in the Memorial of the Board of Revenue approved by Imperial Rescript on October 4, 1908 are a trustworthy estimate of opium production in China?

5.—When was the Imperial Maritime Customs Return of Opium Production in China for 1906 compiled?

6.—In Article 2 of the Regulations prohibiting opium smoking framed under the Imperial Decree of September 20, 1906 (see page 49 of the Chinese Memorandum), it is stated that “about three-tenths or four-tenths of the natives smoke opium.” On page 28 the proportion of smokers to the total population at the end of 1906 is given as a little over $3\frac{1}{3}$ per cent. and is said to have diminished during the past two years by about one-third. Which estimate do the Chinese Delegates expect the Commission to accept?

7.—Can the Chinese Delegates furnish a return of the retail prices of prepared opium showing prices in pence (English) and weight in grains (English) at the following ports:—

Canton, Swatow, Amoy, Foochow, Ningpo, Shanghai, Pakhoi, and Hoihow.

II.—BY THE FRENCH DELEGATION.

1.—How is it that, leaving decimal numbers aside, the figures for likin collection on native opium, page 10, are so low, compared with those under the heading “Duty on Native Opium”?

2.—What are the names of the 40 districts referred to in the telegram from Szechwan to H.E. Viceroy TUAN FANG, as having already totally ceased cultivating the poppy?

REPLIES TO QUESTIONS OF THE BRITISH DELEGATION.

February 15th, 1908.

1.—In reply to the question of the British Delegation whether trustworthy returns of the acreage under poppy and of opium smokers in each province will be compiled, and, if so, when they will be made public, we beg to state that no definite date can be fixed for the compilation of trustworthy returns, owing to the enormous difficulties involved in obtaining such returns under existing circumstances. It is too well-known that under the present system of local and provincial administration, there is neither proper Government machinery for the compilation of statistics nor proper survey and land records out of which statistics can be compiled. A number of the provinces have attempted to make such returns, but for the reasons given above, the Chinese Delegates do not consider them of much real value. In regard to the number of opium smokers in each province, the remarks given above as to the difficulties of obtaining trustworthy returns of the acreage are equally applicable here, and only estimates can be given which we have done according to the best of our ability in our Memorandum on Opium. For our shortcomings in these respects, we can only repeat that we crave the indulgence of not only the British Delegation, but of all the Delegations of this Honourable Commission.

2.—The table of distribution given on pages 5 and 6 of the Memorandum is an accurate statement of the distribution of foreign opium as far as is known to the Imperial Maritime

Customs. It is an accurate record of the importations at the Custom Houses in the provinces mentioned, but whether the opium actually imported is really consumed in the provinces under which it appears in the table is as difficult to affirm as it is to deny. While a portion of the opium in any given province might filter into one of the neighbouring provinces, opium from neighbouring provinces might just as well filter back into the first-named province. On general principles, therefore, the distribution shown in the table can be accepted as the nearest possible approach to accuracy.

3.—The Chinese Delegates regret that they cannot give the actual revenue, Imperial and Provincial, derived from native opium for the years 1906 and 1908, but they are of the firm belief that the revenue of neither year much exceeded, in round numbers, the sum of *Kuping Tls.* 25,000,000 and the reasons for this belief are arrived at in the following manner:—

Taking the estimated production for 1906, 584,800 piculs, and deducting 25 per cent. of the output (assumed to escape all taxation) there remains a balance of 438,600 piculs, on which we may base our calculations. Of this balance only such opium circulating between certain provinces is liable to the Consolidated Tax of *Kuping Tls.* 115 per picul. For the year in question, the tax being inaugurated only in the fourth Chinese month (May), we put down the quantity paying the Consolidated Tax as not more than 100,000 piculs, which gives a revenue of *Kuping Tls.* 11,500,000. In the provinces of Szechwan, Yunnan, and Kweichow and in the three provinces of Manchuria the old system of taxing opium was retained and this was also the case for the first third of the year in *all* the provinces. We feel perfectly safe in saying the average rate of taxation according to the old system was not over *Kuping Tls.* 40 per picul and the remaining 338,600 piculs at that rate give a revenue of *Kuping Tls.* 13,544,000—making a total for 1906 of *Kuping Tls.* 23,044,000. For 1908 the estimated production was 367,250 piculs and deducting 25 per cent. there remains a balance of 275,438 piculs, on which we may base our calculations. Of this balance the highest possible figure to assume would be 150,000 piculs, as paying the consolidated tax of *Kuping Tls.* 115 per picul, and that quantity gives a revenue of *Kuping Tls.* 17,250,000. The remaining 125,438 piculs, owing to a general increase in the rates collected in the provinces not belonging to the Consolidated Tax Arrangement, may be said to have averaged *Kuping Tls.* 60 per picul instead of *Tls.* 40 in 1906, and the revenue from this source was in the neighbourhood of *Tls.* 7,526,280, making a total of *Kuping Tls.* 24,776,280 for the year 1908. The Chinese Delegates, therefore, submit to the Honourable Members of the International Opium Commission that in their opinion the loss in revenue to the Chinese Government, should the cultivation of the poppy be entirely stopped, will not exceed the sum of *Tls.* 25,000,000 yearly. This amount distributed amongst the 400,000,000 of Chinese people means an increased taxation of only $6\frac{1}{4}$ candareens, or less than fourpence *per capita*. This, considering the beneficial results that will surely follow, is not a great sacrifice for either the Government or the people to undertake, both of which are ready and eager for the trial.

4.—This question was practically answered in Mr. TONG KUO-AN'S opening speech on the 8th of February, when presenting China's report. The answer is as follows:—"With regard to the figures reported by the Board of Revenue, he stated that about 25 per cent. of the total quantity of opium produced in China escaped taxation, and that the Imperial Exchequer received not more than one-third of the revenue actually collected, the remaining two-thirds being retained by the different provinces for local administrative purposes."

5.—The Estimate (please note that it does not profess to be a Return) of the production of native opium in China for the year 1906, page 15 of the Memorandum, was based on reports from the Commissioners of Customs made during the autumn of 1908. The notes given on pages 16, 17, 18, and 19, of the Memorandum try to explain how the figures of the production per province are arrived at. The Memorandum duly acknowledges that accurate statistics about opium are most difficult to obtain in China, and the estimate for 1906, and 1908 as well, can only be considered an attempt on the part of foreigners, who have had considerable experience of Chinese affairs and have lived many years in the Empire, to come as near as possible to the probable production of native opium in China. However, the most carefully drawn-up estimates in any country in the world can be easily controverted by those who wish to do so, and in China, where for long ages no reliable system of keeping statistics has been followed, we unfortunately have practically nothing but Estimates to rely upon.

6.—The British Delegates, after quoting an extract from Article 2 of the Regulations prohibiting opium smoking, framed under the Imperial Decree of September 20, 1906, to the

effect that "about three-tenths or four-tenths of the natives smoke opium," compare it with the percentage of smokers to the total population, i.e., $3\frac{1}{3}$ per cent., as given in the Memorandum (page 28), and ask which Estimate do the Chinese Delegates expect the Commissioners to accept. The Chinese Delegates wish to reply as follows:—

The Regulations referred to, it must be remembered, were drawn up in the beginning of the Anti-Opium Crusade, and undoubtedly the writers had in mind the adult population only of China. No one could credit that the Chinese officials concerned, even as inexperienced as they are known to be when dealing with figures, ever intended the round numbers given should also apply to the 240,000,000 of children the Empire is supposed to contain. Were such an assumption possible, then after excluding children, the three-tenths mentioned would mean 75 per cent. of the adults in China were smokers, while four-tenths would mean that every adult in the whole Empire was addicted to the habit. The Chinese Delegates must ask the Commission, therefore, not to lay too much stress on the three-tenths and four-tenths mentioned, although the conditions prevailing in some of the western provinces, where even the most reputable foreign travellers have estimated a very high percentage of smokers, might be said almost to justify the round numbers used. The Chinese Delegates trust, therefore, that the Commission will accept the estimate given in the Memorandum, which was purposely put down at the lowest possible figure. If we accept the eleven-year record of the daily consumption of opium per smoker given in the Japanese Report on Formosa (page 63) as a reliable figure (the consumers of the drug in Formosa being mostly Chinese, it is quite justifiable to assume that this average is equally applicable to smokers in China itself), the one mace average of prepared opium per day applied to the quantity of opium mentioned on page 28 of the Chinese Memorandum will increase the number of smokers from 13,455,699 to 21,529,118, which makes over $5\frac{1}{3}$ per cent. of the total population, instead of $3\frac{1}{3}$ per cent. given previously. The percentage of smokers to the total population of Formosa is stated by the Japanese report (page 48) as being 3.91, and it ought to be taken into consideration by this Commission that statistics from such a source are the most reliable ones that it is possible to gather, Japan being noted the world over for her admirable system of collecting data. The new number of smokers worked out on the Formosa average of the daily consumption gives a total of, roughly speaking, $13\frac{1}{2}$ per cent. of the total adult population of China, taking Sir Alexander Hosie's estimate that 2 out of 5 persons may be considered as adults. Going further with this new figure and accepting 13 out of every hundred smokers to be women (Japanese Report, page 47) we find there are

18,730,333 males, and
2,798,785 females

smoking opium in China. Again dividing the adult population of the Empire into two parts for males and females we find over $23\frac{1}{3}$ per cent. of the total male population, and almost $3\frac{1}{2}$ per cent. of the total female population were addicted in 1906—before the Anti-Opium Edict was issued—to the vice of opium smoking, a really alarming figure and one which exonerates the seeming exaggeration of the 2nd Article of the Regulations brought into question by the British Delegates.

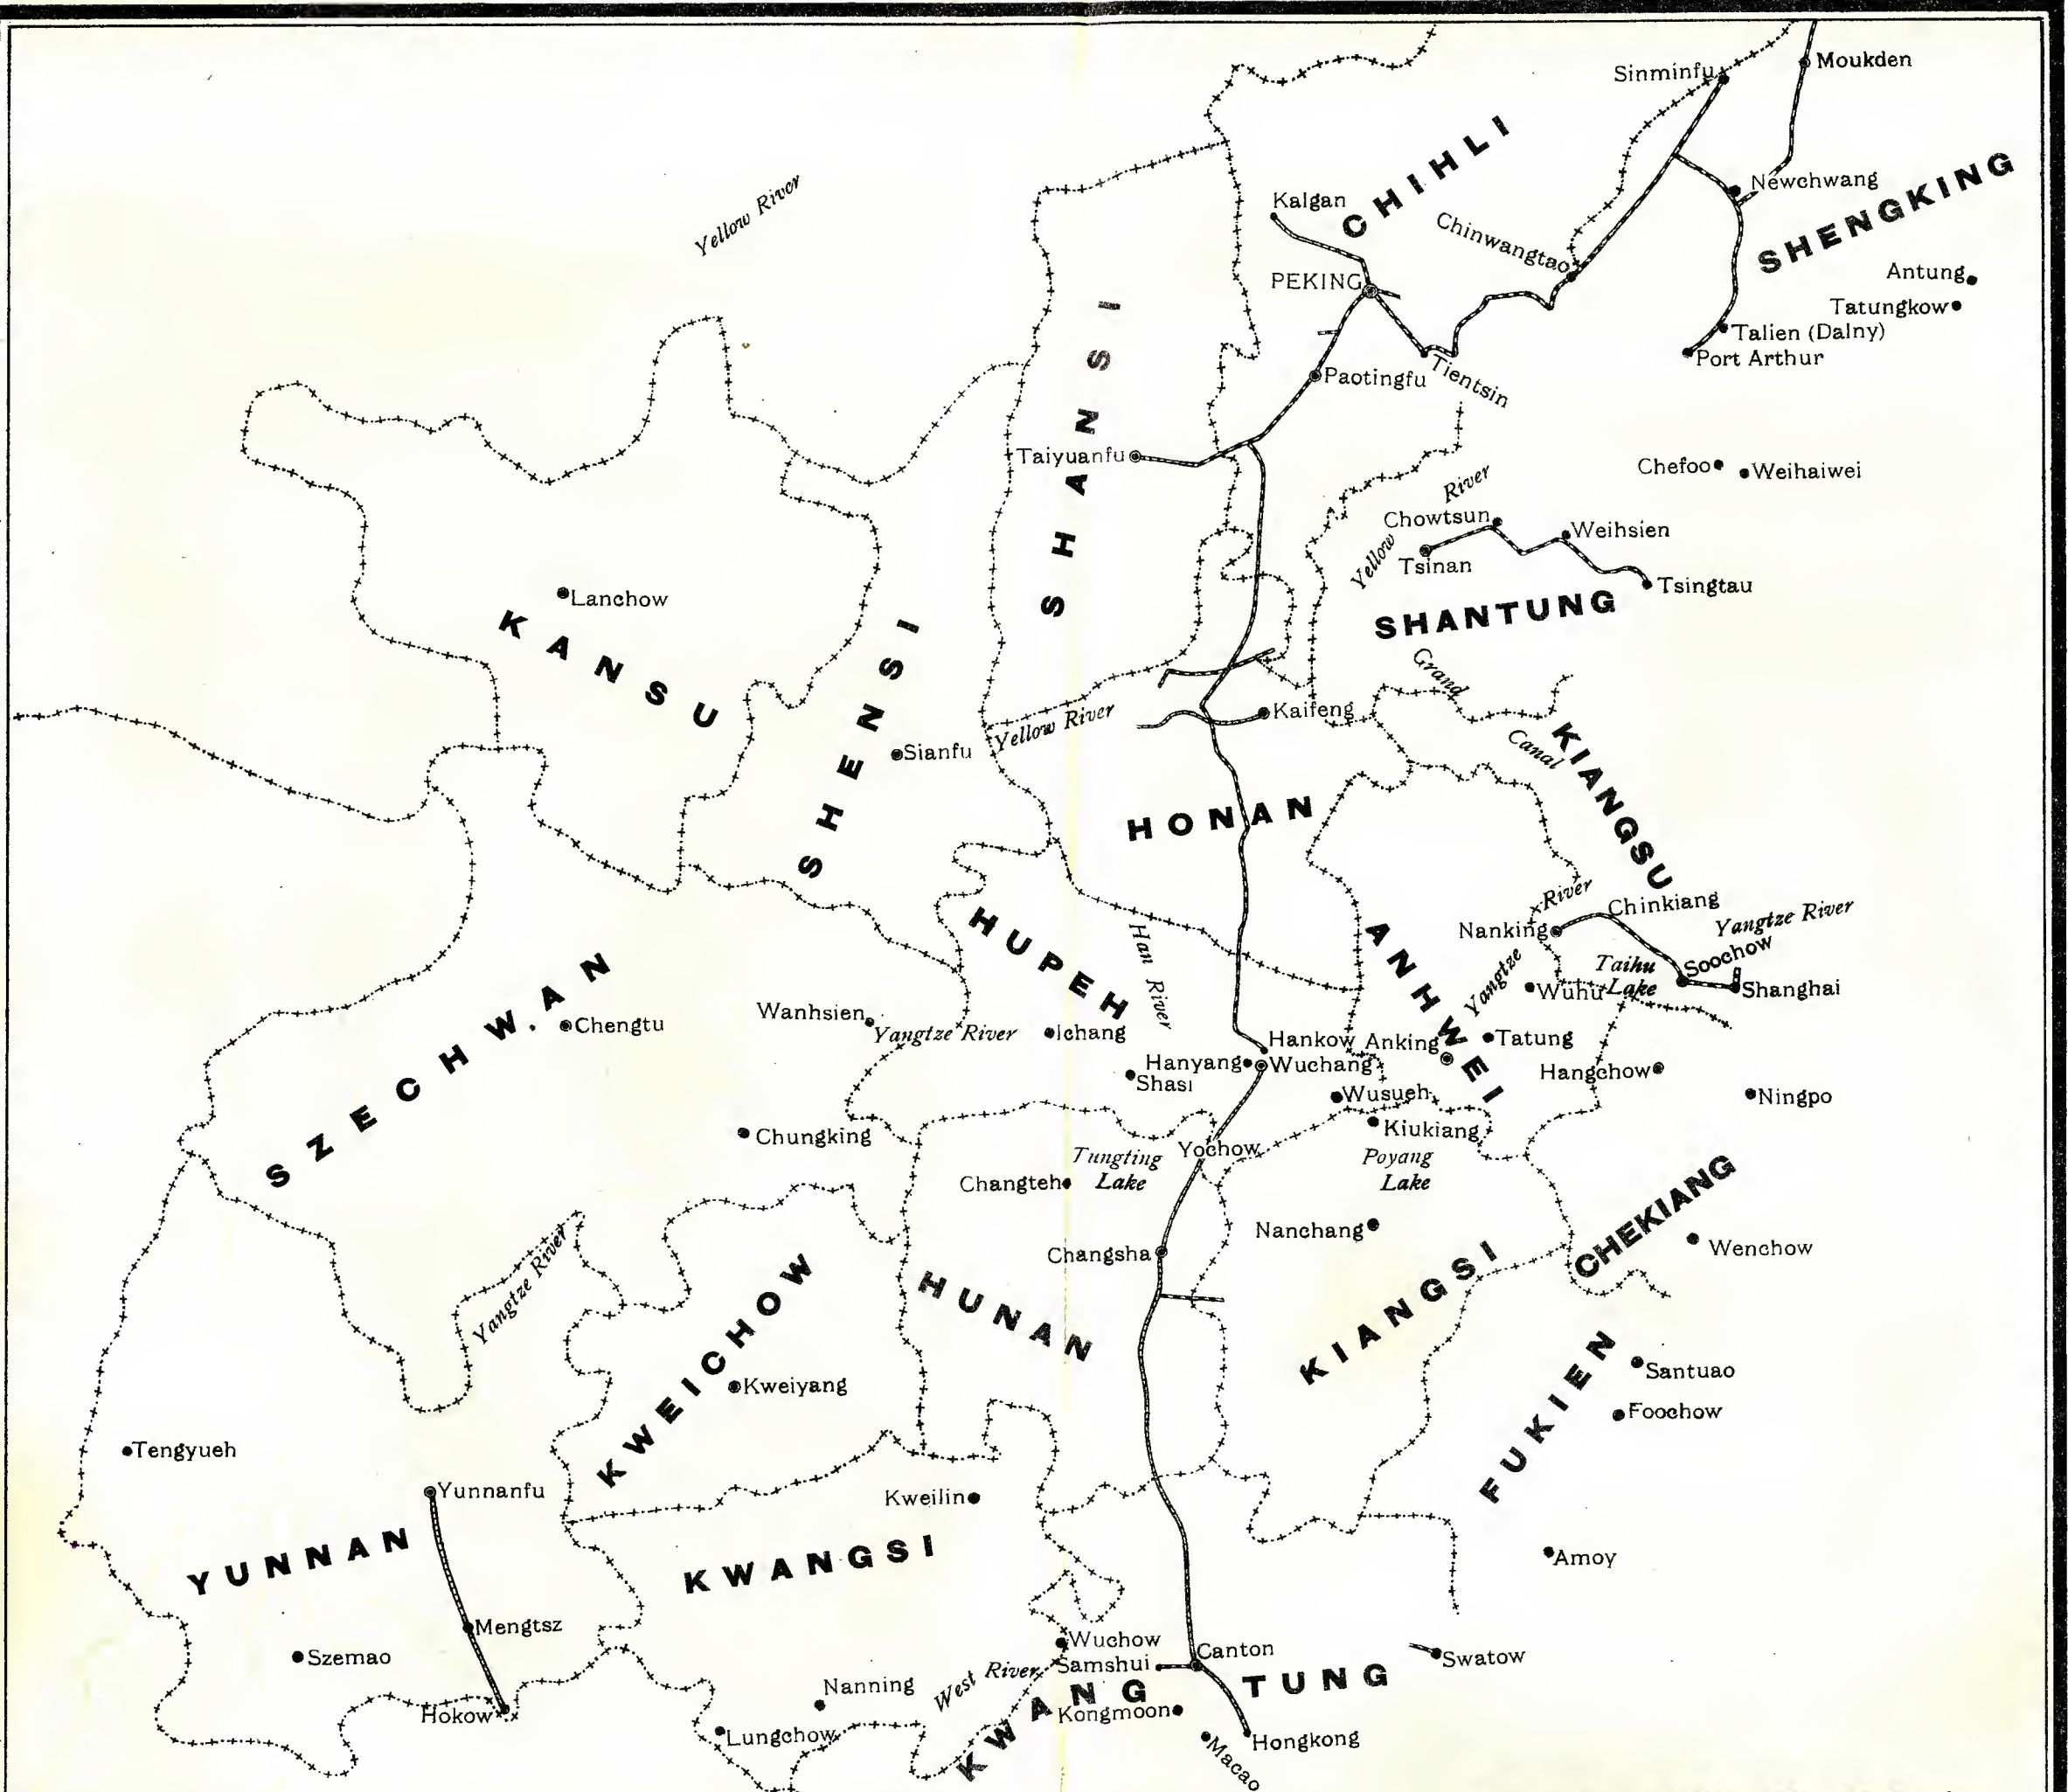

7.—The Return asked for cannot be supplied at once, but the Imperial Maritime Customs will collect the desired information as soon as possible and the result will be communicated to the Commission later on.

REPLIES TO QUESTIONS PUT BY THE FRENCH DELEGATION TO THE CHINESE
DELEGATION (SIXTH SESSION).

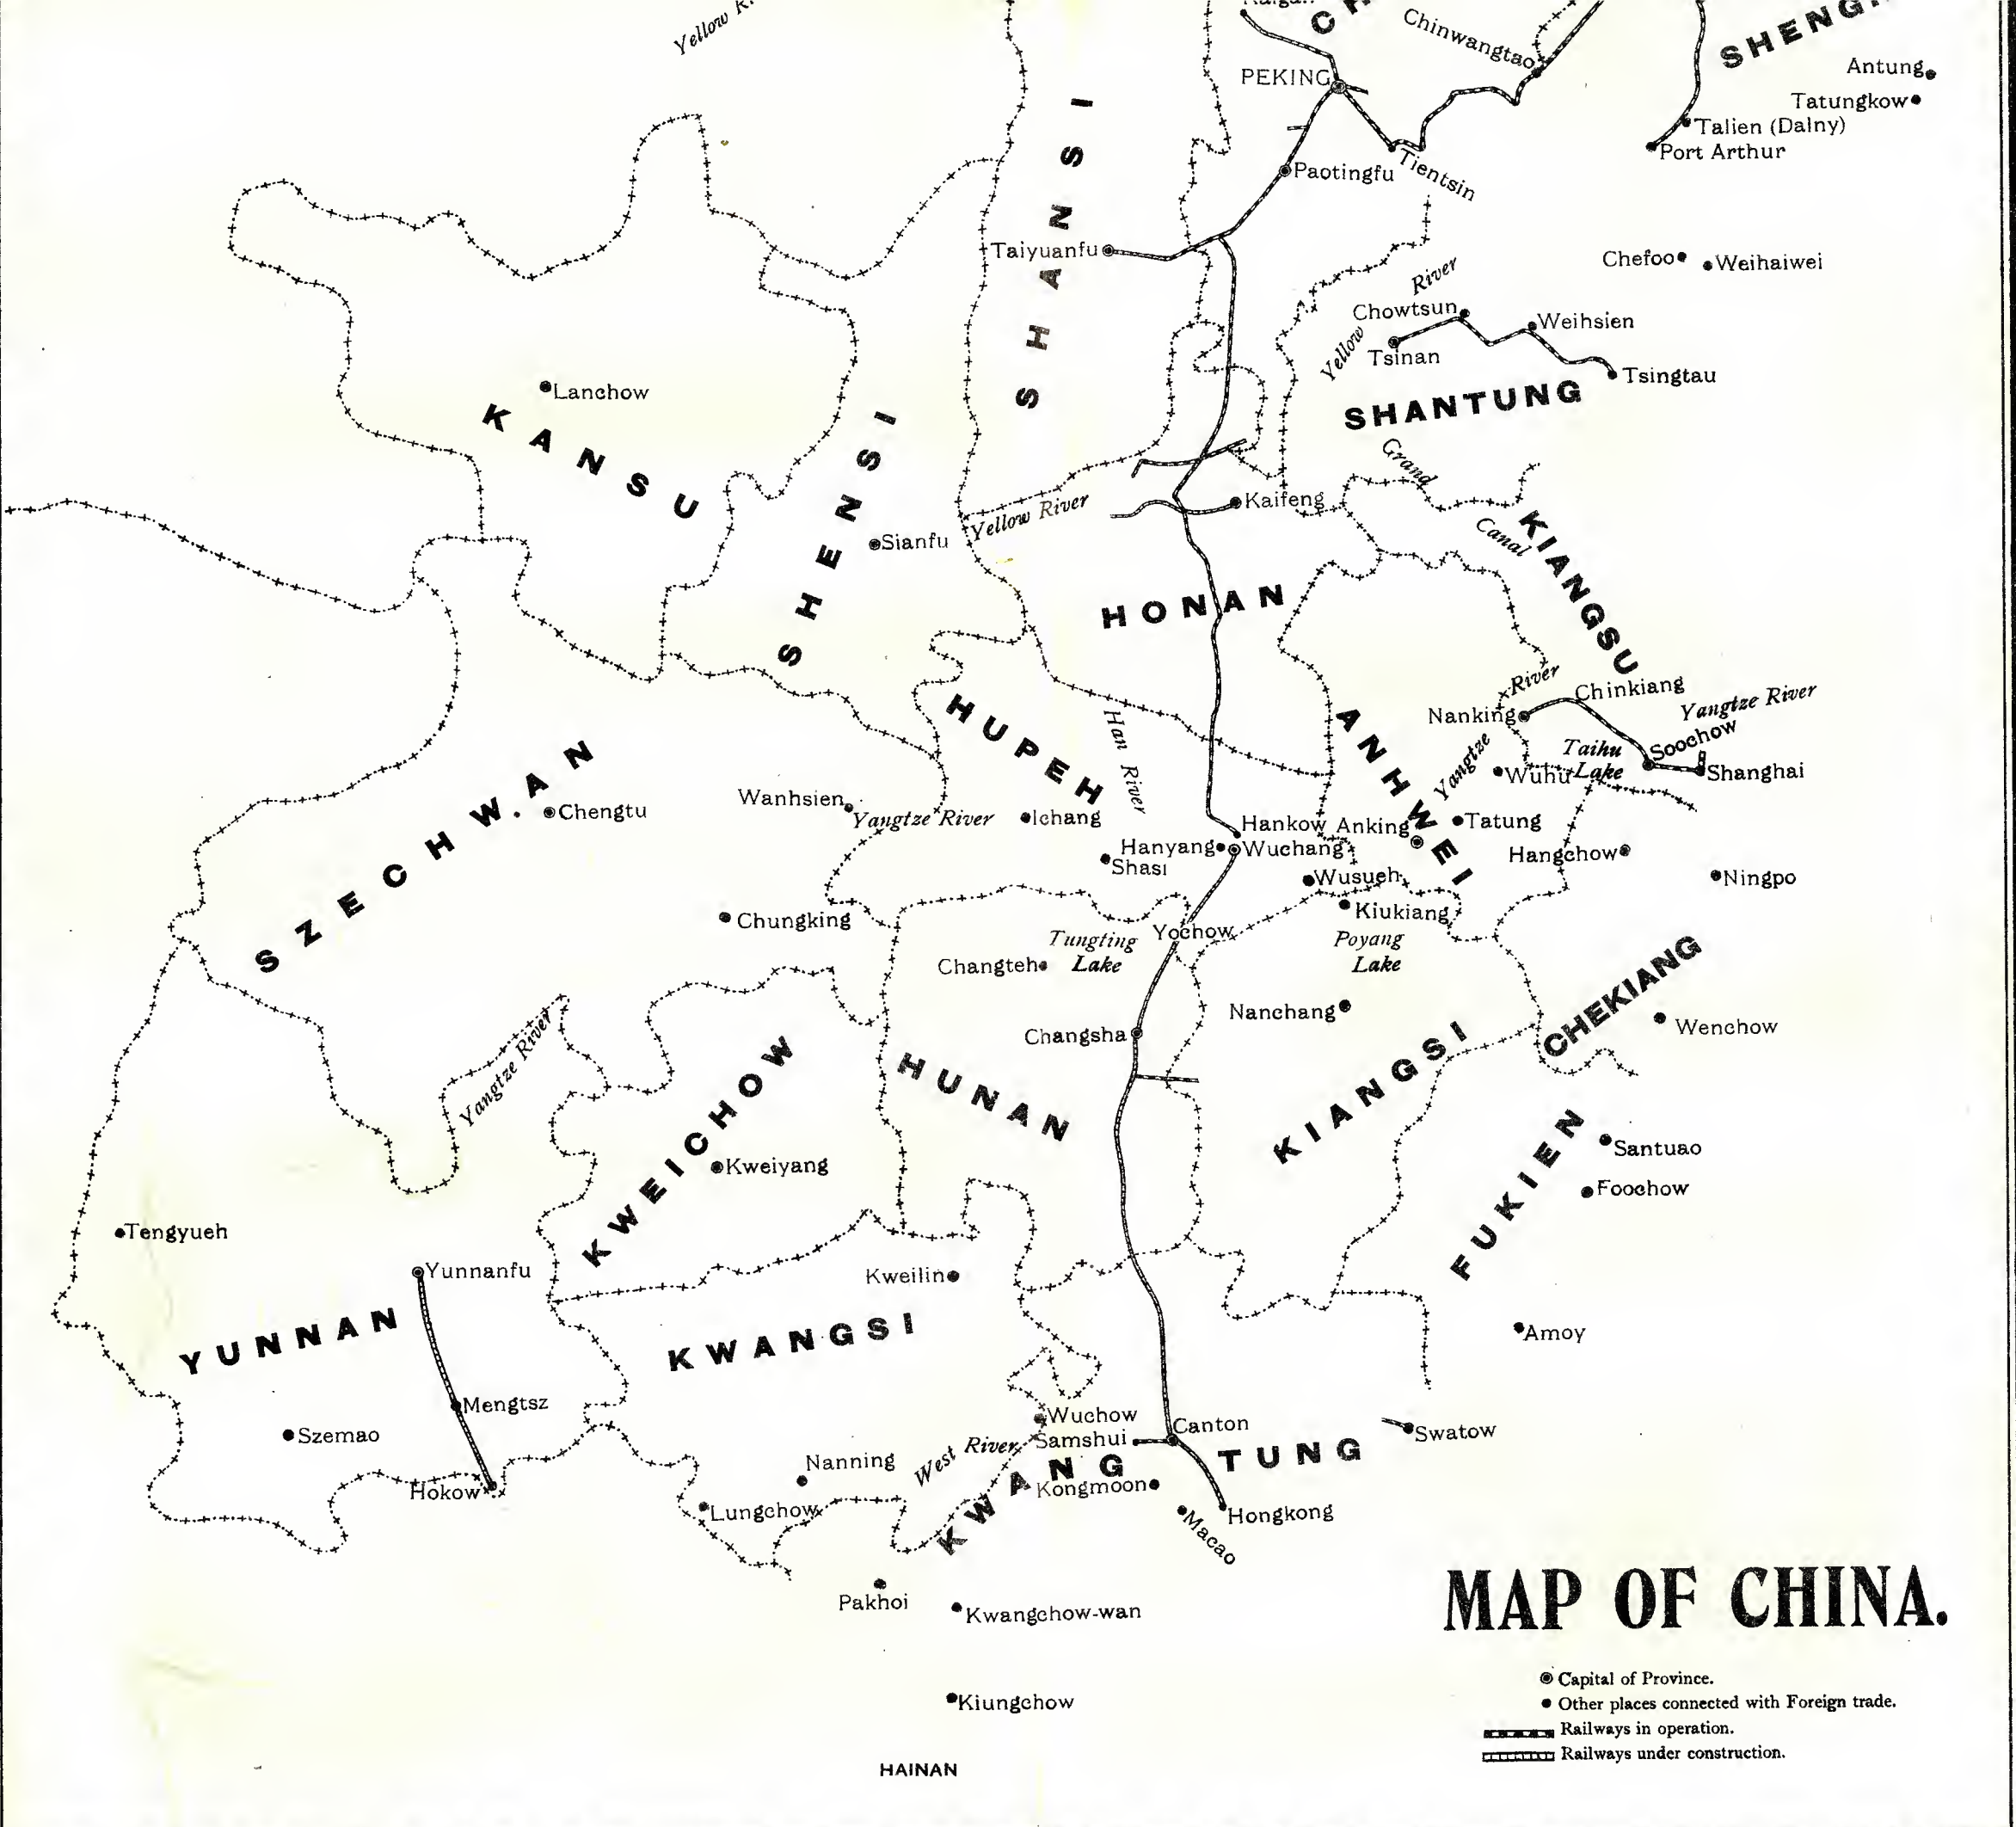

1.—The figures of the likin collection on native opium on page 10 represent only the small fraction collected by the Maritime Customs from such native opium as, when passing through the Customs, cannot produce proof of payment of Inland Dues. These figures bear no relation to the "Duty on Native Opium" in the column immediately preceding, which consists mainly of Export Duties at Chungking and Mengtsz, and which, before the introduction of the *Kaochuan* regulations in 1906, included also arrival duty at Ichang on opium from up-river.

The collection of *Kaochuan* and *Tungshui* on behalf of the Collectorate, mainly at Ichang, for the three years 1906-1908, is not shown on page 10, and was as follows:—

1906.....	<i>Kaochuan</i> , <i>Hk.Tls.</i>	369,996,960
„	<i>Tungshui</i> , <i>Kp.Tls.</i>	641,864,661
1907.....	„ „	827,232,080
1908.....	„ „	1,979,146,766

(a) Newly boiled opium is cheaper.

(b) The \$1 variety is mixed with Persian and native opium.

France et Indo-Chine.

LA QUESTION DE L'OPIMUM ET DE LA MORPHINE EN FRANCE

I

CULTURE ET COMMERCE DE L'OPIMUM.

(Opium brut et Chandoo)

L'opium n'est importé en France que sous la forme d'opium brut destiné aux usages pharmaceutiques.

La culture du pavot n'a lieu en France que pour extraire l'huile (huile d'oeillette). Les essais entrepris pour en tirer l'opium n'ont jamais réussi, le prix de revient étant trop élevé. Le dernier essai remonte à 1862 et avait été négatif comme les précédents.

Il entrerait (car une législation récente dont il va être question plus loin, va rendre cette importation extrêmement difficile en en faisant un délit sévèrement puni), il entrerait donc en quantité incontrôlable, mais certainement très peu importante, un peu d'opium préparé (chandoo) provenant surtout d'Indo-Chine et destiné aux quelques fumeries secrètes de Paris et de quelques grands ports ou à l'usage de quelques très rares fumeurs.

Les statistiques officielles des Douanes Françaises fournissent les chiffres suivants à l'importation, pour les quatre dernières années dont nous avons le relevé :

1904.....	137,232	Kilogs d'opium brut.
1905.....	159,480	do.
1906.....	269,071	do.
1907.....	114,101	do.

On remarquera la diminution en 1907, avant même les mesures restrictives dont il va être rendu compte.

Mais sur ces quantités il a été ré-exporté.

1904.....	128,211	Kilogs d'opium brut.
1905.....	150,408	do.
1906.....	254,415	do.
1907.....	108,803	do.

Les quantités réellement mises en consommation en France n'ont donc été que de :

1904.....	9,021	Kilogs d'opium brut.
1905.....	9,072	do.
1906.....	14,654	do.
1907.....	5,298	do.

soit en moyenne 9,100 Kilogs par an.

Les 9/10 de l'opium brut importé proviennent de la Turquie qui ne livre, on peut le dire, que de l'opium médical.

La population de la France étant de 39 millions d'habitants, le chiffre moyen ci-dessus mettrait à la disposition de chaque habitant, par an, environ 0gr, 23 d'opium brut, réduits, en 1907 à 0gr, 136.

II

IMPORTATION ET COMMERCE DE LA MORPHINE ET DES AUTRES DERIVÉS DE L'OPIMUM

Ces produits ne sont pas relevés spécialement dans nos statistiques, ce qui prouve que leur importation officielle est très peu considérable, il n'en est même pas exporté ni ré-exporté non plus en quantités appréciables.

Quant à la fabrication intérieure de la morphine et des autres alcaloïdes extraits de l'opium—en prenant le chiffre moyen ci-dessus de 9,100 kilogs d'opium brut restant à la disposition de la consommation intérieure française, et en tenant compte que l'opium de Syrie (principale provenance) contient en moyenne 12% de morphine, la quantité de cet alcaloïde mise actuellement à la disposition de 39 millions d'habitants serait de 1,081 Kilogrammes—soit 0gr, 027 par tête. On peut donc dire que sauf de très rares exceptions sur lesquelles notre tendance nationale à la fanfaronade même dans le vice, exagérée encore par les journaux, insiste bien à tort, la morphinomanie est un mal en somme très peu répandu en France.

III

REGLEMENTATION DU COMMERCE DE L'OPIMUM ET DE LA MORPHINE.

Les annexes No. 17 et 18 donnent les textes relatifs au commerce de la morphine et de l'opium, soit en France, soit en Indo-Chine. Il suffit de s'y reporter.

En ce qui concerne la morphine et tous les alcaloïdes extraits de l'opium, ils sont assimilés aux substances vénéneuses et réglementés par la loi du 19 juillet 1845, l'ordonnance du 29 octobre 1846 et le Décret du 8 juillet 1850.

En ce qui concerne l'opium, le décret tout récent du 1 octobre 1908 (reproduit in-extenso) entoure l'importation et la vente de l'opium, en France de formalités si minutieuses, permettant d'en suivre et d'en surveiller l'emploi, que tout danger de le voir servir à d'autres usages qu'à des usages médicaux paraît écarté :

“La cession à d'autres qu'à des fabricants en gros ou à des pharmaciens, est interdite. La pénalité prévue pour toute infraction, quelle qu'elle soit, au nouveau règlement est très sévère : amende 100 à 3,000 francs et emprisonnement de six jours à deux mois.”

Indo-Chine.

L'ordre suivi dans l'exposé ci-dessous est celui du *programme des délibérations de la conférence*, tel qu'il a été établi dans une note remise, le 15 juillet 1908, à M. le Ministre des Affaires Etrangères par l'Amassadeur des Etats-Unis d'Amérique à Paris.

Il a été ajouté un dernier paragraphe rendant compte des mesures prises, depuis l'année dernière, pour la suppression progressive de l'usage de l'opium en Indo-Chine, et de leur effet.

I°

IMPORTATION DE L'OPIMUM A L'ETAT CRU, DE SES DÉRIVÉS ET DU CHANDOO.

L'opium ne peut être importé dans l'Indo-Chine française que par l'Administration des Douanes et Régies qui ne l'achète qu'à l'état cru. Le tableau A. ci-joint (pièce annexe No. 1) donne le détail de ces achats depuis 1903 par catégories (Bénarès et Yunnan, les deux seules sortes achetées). Il en résulte que ces achats ont passé de 251.771 kilogs. (4,168 piculs)⁽¹⁾ en 1903 à 137,929 kilogs (2,283 piculs) en 1907, soit une baisse de 113,742 kilogs. (1,883 piculs), ou 45%.

Si, pour les dix premiers mois de 1908, les achats ont un peu augmenté (166,957 kilogs.) 2,764 piculs, cela tient à ce que l'Administration a dû constituer des approvisionnements un peu plus forts en vue des difficultés de ravitaillement qui vont se présenter, pour l'opium du Yunnan, surtout à partir de 1909.

Il faut tenir compte en outre d'une contrebande impossible à réprimer avec notre énorme frontière commune avec la Chine, pays producteur d'opium, impossible également à estimer exactement, mais qui ne dépasse probablement pas de 20 à 25,000^k (331 à 414 piculs) au Tonkin, le pays le plus exposé, et qui doit y avoir diminué depuis 1907, pour des raisons qui seront exposées plus loin.

II°

CONSOMMATION INTÉRIEURE DE L'OPIMUM CRU.

Il résulte du *Tableau B*, ci-annexé (pièce annexe No. 2), et des divers Tableaux C¹, C², C³, etc. (pièces annexes Nos 3, 4, 5, 6, & 7), que la vente intérieure de l'opium *brut* (ou cru) a passé de 6,305^k (environ 100 piculs) en 1903 à 3,316^k (environ 50 piculs) en 1907, soit une baisse d'environ 50%. Pour les 9 premiers mois de 1908, les ventes n'ont pas dépassé 1,500^k (environ 25 piculs). Ces ventes n'ont lieu qu'au Tonkin et sont destinées aux régions frontalières où les populations montagnardes, décimées par les fièvres dans les bas fonds, absorbent quelquefois l'opium sous forme de pilules.

(1) picul=60 kgs. 453.

III^o

FABRICATION ET USAGE DU CHANDOO.

Le *chandoo* fait l'objet, en Indo-Chine, d'un monopole exclusif de fabrication par l'Administration des Douanes et Régies dans sa bouillierie de Saïgon (voir plus loin VI^o). Il est inutile de s'étendre sur le mode de fabrication employé, les manipulations étant bien connues. Celles qui sont suivies à la bouillierie de Saïgon donnent un produit d'excellente qualité, qui est très apprécié des fumeurs, tout en étant entouré des meilleures garanties. Un pharmacien-chimiste est attaché à la Manufacture.

La teneur en *morphine* de l'opium varie de 6 à 7, 50% pour le Bénarès et de 7, 60 à 9% pour le Yunnan.

Nous croyons devoir attirer ici l'attention sur la sévérité du régime concernant le *aross*, ce résidu si nuisible à la santé des fumeurs pauvres. L'arrêté du 10 Décembre 1903 (articles 4, 5 & 6) interdit sa circulation (dès qu'elle dépasse 20 grammes*) sa vente ou sa cession, à moins d'autorisation spéciale qui, en fait, n'est jamais accordée. Des peines sévères sont prévues pour toute infraction à ces prescriptions.

Les ventes officielles d'opium préparé (*chandoo*) ont passé de 122,941^k (2,035 piculs) en 1903 à 91,768^k (1,519 piculs) en 1907, soit une baisse d'environ 25%. Pour les 9 premiers mois de 1908, les ventes n'ont pas dépassé 65,048^k (1,077 piculs), ce qui en supposant que la même moyenne mensuelle se continuât jusqu'à la fin de décembre, ne donnerait que 86,724^k (1,436 piculs) pour l'ensemble de l'année en cours.⁽¹⁾

La Cochinchine consomme à elle seule 55% environ du chandoo vendu en Indo-Chine, grâce ur tout, nous le verrons, à sa clientèle chinoise.

IV^o

FABRICATION DE LA MORPHINE ET AUTRES DÉRIVÉS.

Il n'est pas fabriqué de morphine ni d'autres dérivés de l'opium en Indo-Chine.

V^o

EXTENSION ET POSSIBILITE DE LA CULTURE DU PAVOT À OPIUM.

La culture du pavot à opium est pratiquée sur des surfaces absolument insignifiantes dans l'Indo-Chine française. Sur le plateau du Tran-Ninh et sur quelques autres points du Haut Laos, et sur le plateau de Dong-Van dans le Haut Tonkin.

Sur le plateau du Tran-Ninh, l'Administration locale estime que la production ne dépasse pas de 4 à 600 kilogs (10 piculs, maximum). En doublant ce chiffre pour tout l'ensemble de cette région, cest certainement un grand maximum (20 piculs). L'article 87 de l'arrêté du 7 février 1899 (dont il sera question plus loin) prévoit que les populations montagnardes (Yaos et Méos.) qui se livrent à cette culture, doivent faire une déclaration au Commissaire du territoire et porter le surplus de leur consommation personnelle au bureau de la Régie de Luang-Prabang. Tout colportage autre est considéré comme contrebande.

Au Dong-Van, aucun recensement n'a été fait. Mais on peut juger que la production n'y est guère plus importante par ce fait que l'Administration des Douanes et Régies n'y a acheté que 2,062^k (33 piculs environ) en 1907 et 3,088^k (50 piculs environ) en 1908.

La disposition topographique des lieux et leur nature (montagnes aux flancs souvent abrupts, ou calcaires stériles,) l'absence de population, le voisinage de deux pays, le Tonkin et le Yunnan, où des mesures sévères sont prises contre l'opium, autant de raisons pour que cette culture s'étende peu dans ces régions.

De plus les articles 3 et 88 de l'arrêté du 7 février 1899 (dont il va être question au paragraphe suivant) ont prévu que la culture du pavot ne pouvait avoir lieu qu'en vertu de l'autorisation préalable de l'Administration des Douanes et Régies. Cette autorisation a été accordée à deux ou trois Européens qui ont tenté sur deux ou trois points du Tran-Ninh et du Haut Tonkin des essais de culture qui n'ont jamais réussi.

VI^o

ACTES ADMINISTRATIFS RELATIFS A L'USAGE DE L'OPIMUM ET DE SES DÉRIVÉS.

L'acte administratif fondamental sur le régime de l'opium dans l'Indo-Chine française est l'arrêté du Gouverneur Général du 7 février 1899, approuvé par décret du 30 août de la même année.

Le texte complet en figure aux annexes (pièce No. 8).

Il constitue sur des bases définitives le *monopole* de l'*achat*, de la *fabrication* et de la *vente* de l'opium, monopole dont l'exploitation est confiée à l'Administration des Douanes et Régies de l'Indo-Chine. La culture, comme nous venons de le voir, ne peut avoir lieu qu'avec l'autorisation de cette administration. Des mesures spéciales sont prises pour assurer le contrôle des navires apportant de l'opium, même quand ils ne font que toucher dans un port indo-chinois, ou quand le navire est

* $\frac{2}{3}$ de taels environ.

(1) La baisse des ventes a continué en octobre 1908 en Cochinchine et au Cambodge par rapport au même mois de 1907. Le 4^e Trimestre: 23,802^k—Total 1908: 88,850^k—1,471 piculs.

nafragé ou en avarie (articles 6, et 19 à 23 inclus). Le transit est réglementé (articles 16 à 18 inclus); la vente de l'opium, brut ou en extrait et des préparations pharmaceutiques à base d'opium également (articles 7 à 15). Les pharmaciens au titre européen sont seuls autorisés à en recevoir et à en vendre, en se conformant à toute une série de prescriptions, et en se soumettant à la surveillance et à des vérifications de l'Administration des Douanes et Régies.

La vente de l'opium exclusivement fabriqué par l'Administration peut être confiée à des entreposeurs, à des débitants généraux ou à des détaillants choisis par l'Administration qui fixe les prix et conditions de vente (articles 26 à 49). Les fumeries ne pouvaient être établies qu'après une déclaration à l'Administration (article 50).⁽¹⁾ L'entrée des fumeries est interdite à toute personne portant des armes apparentes ou cachées, aux femmes de tout âge, aux enfants au dessous de vingt ans et aux Européens (article 5).

Le titre II (articles 59 à 86) prévoit des peines généralement très sévères contre les infractions aux prescriptions de l'arrêté.

VII^o

DES MESURES PRISES DEPUIS 1907 EN INDO-CHINE POUR DIMINUER LA CONSOMMATION DE L'OPIMUM ET DE LEUR EFFET PRATIQUE.

Dès le mois de juin 1907 le Gouvernement Général de l'Indo-Chine donna des preuves tangibles de son désir de coopérer dans toute la mesure du possible à la suppression progressive de la consommation de l'opium sur le territoire de la Colonie.

Un arrêté du 19 juin (pièce annexe No. 9) interdisait l'ouverture de fumeries d'opium sur tout le territoire de l'Annam et du Tonkin où elles n'ont d'ailleurs jamais existé, et décidait qu'aucune installation de nouvelles fumeries ne serait autorisée en Cochinchine ni au Cambodge.⁽²⁾

Un autre arrêté de la même date élevait à compter du 1^{er} juillet les prix officiels de vente en Indo-Chine des opiums de luxe, de Bénarès ordinaire, et du Yunnan, par rapport aux prix précédemment fixés par l'arrêté du 10 décembre 1903, dans des proportions variables suivant les sortes et les localités, mais qui atteignait \$5 environ par kilo pour le "Yunnan" en Cochinchine et au Cambodge par exemple (pièces annexes Nos. 10 et 11).

Un arrêté du 23 février 1908 a encore augmenté ces prix (pièce annexe No. 12). Le kilo d'opium du Yunnan était porté, en Cochinchine et au Cambodge (vente par les débitants aux particuliers) de \$77 à 84 \$70; et le kilo de Bénarès de 88 à 96 \$80. Dans le Delta du Tonkin, le prix du Bénarès (kilo) passait aussi de \$88 à 96 \$80 et celui du Yunnan de 63 \$80 à 70 \$18.

Une commission officielle était chargée, par arrêté du 22 août 1907, d'étudier les mesures à prendre pour la suppression progressive de l'usage de l'opium. Elle tenait sa première réunion plénière le 12 septembre, et ne terminait ses travaux que le 7 février 1908, après s'être divisée en trois sous-commissions qui tinrent elles-mêmes de nombreuses séances. Le Gouvernement s'est inspiré de ses recommandations sur plusieurs points.

Dans un autre ordre d'idées, une circulaire du Gouverneur Général du 5 octobre 1907 (pièce annexe No. 13), renouvelant et précisant des mesures antérieures, interdisait de la façon la plus formelle l'usage de l'opium à tous les fonctionnaires, employés et agents européens de tous rangs et de tout services. Ceux qui contreviendraient à cette défense devront être signalés sans retard, et il sera pris à leur égard des mesures de rigueur. Ils seront notamment privés d'une manière absolue de tout avancement jusqu'à amendement complet. A cette sanction s'ajoutera la mise à la retraite d'office de fonctionnaires fumeurs invétérés qui réuniront des droits à la pension, s'il est constaté, au bout de quelques mois, qu'ils sont incorrigibles. Des mesures analogues sont prises contre les fonctionnaires indigènes.

Pour aider l'oeuvre analogue entreprise autour de la Colonie, un arrêté du 19 juillet 1908 a interdit l'exportation de l'opium préparé de l'Indo-Chine sur Hong-Kong, sous peine de confiscation (pièce annexe No. 14).

Enfin la vente de l'opium dit "du Yunnan" a été supprimée en Cochinchine et au Cambodge par arrêté du 26 septembre 1908 (pièce annexe No. 15).

Les mesures prises en vue de la suppression progressive de l'usage de l'opium n'ont donc pas été simplement platoniques; et leur effet réel ressort d'ailleurs des chiffres déjà cités de la diminution des achats et des ventes de la régie en 1907 et 1908 par rapport à 1903 (baisses de 45 et de 25%, etc.), signalée aux paragraphes 1^o et 11^o de la présente note. Elle ressort aussi notamment du zèle apporté dans la répression de la contrebande, même dans les pays, comme le Laos, où les moyens dont dispose l'Administration sont absolument insuffisants. C'est ainsi que 1,233 kilos d'opium de contrebande, venant en majeure partie du Yunnan, ont été saisis au Laos du 1^{er} janvier au 30 septembre 1908 (pièce annexe No. 16).

L'effet de la hausse des prix et des autres mesures dans le sens de la *diminution de la consommation* ressort, nous l'avons vu ci-dessus, des chiffres comparatifs de la consommation en 1903, 1907 et 1908. Cependant il ne faut pas oublier que d'autres facteurs interviennent. De bonnes récoltes de riz comme celles de 1906-7 et 1907-8 en Cochinchine et au Tonkin, en répandant beaucoup d'argent dans les campagnes favorisent la consommation de l'opium. D'autre part, des causes complexes peuvent jouer

(1) Des mesures ont été prises en 1907 pour la fermeture des fumeries—Voir paragraphe suivant.

(2) Le Laos n'est pas visé dans cet arrêté à cause de sa faible population (500,000 habitants au maximum) et parce que la consommation de l'opium y est, de ce fait, peu importante. La surveillance spéciale des fumeurs serait d'ailleurs, sur son immense territoire, (280,000 Km.² environ) une tâche impossible.

quelquefois dans le sens d'une augmentation purement apparente, ou rendre au contraire moins apparente la diminution. C'est ainsi que les ventes de l'opium de régie au Tonkin en 1908 auraient été certainement encore plus faibles si l'augmentation des droits de likin et la cherté de l'opium au Yunnan n'avaient rendu la contrebande *moins avantageuse*. On s'est donc adressé davantage à la régie—mais au fond, la diminution de la consommation est plus forte qu'il n'apparaît, au Tonkin tout au moins.

CONCLUSION.

L'Indo-Chine française se présente donc à la conférence internationale avec le sentiment d'avoir fait tout son devoir dans le sens de l'oeuvre humanitaire entreprise par le gouvernement chinois. Sa situation est d'ailleurs un peu spéciale. Elle ne produit pas d'opium ; ou si peu (400 ou 500 piculs au maximum, voir paragraphe V) que ce n'est pas la peine d'en parler. Elle a, par contre, une énorme frontière commune avec le principal pays producteur d'opium du monde entier : la Chine, et avec la province chinoise qui, jusqu'à ces derniers temps, se classait au second rang comme centre de culture : *le Yunnan*. (Estimations de 50 à 80,000 piculs—ce dernier chiffre étant celui fourni il y a quelques années par un *rapport officiel* du Bureau des revenus de Pékin). Elle est donc particulièrement exposée à la contrebande.

D'autre part, au point de vue de la *consommation*, l'impôt *très élevé* (représenté par les prix de vente officiels) qu'elle prélève sur la drogue en restreint forcément la consommation habituelle, avant tout, à un groupe restreint de riches desoeuvrés. La seule exception notable est la population des coolies (chinois surtout) de Cholon, en Cochinchine. Dans cette ville même, le centre de consommation le plus important, 12,000^k (200 piculs) environ sur une vente annuelle de 50,000^k. (830 piculs) ; ces 12,000^k, répartis entre une population de 180,000 âmes, dont la population adulte mâle peut atteindre environ 1/3—soit 60,000 hommes, cela représenterait une consommation annuelle de 200 *grammes* (5 *taëls* 5 environ) *par tête*, ou, si l'on suppose même que la moitié seulement des hommes fument, une consommation annuelle de 400 gr., un peu plus de 1 *gramme* ($\frac{1}{37}$ de taël) *par jour*. Au Cambodge on estime que les fumeurs atteignent à peine 1 pour cent. de la population : 15,000 fumeurs ; au Tonkin, en tenant compte de la contrebande, peut-être 3 p. 1,000, (18,000 sur 6 millions). Aucun calcul n'a pu être tenté pour le Laos, ni pour l'Annam, mais ces deux derniers pays consomment beaucoup moins que les trois autres. Le prix le plus bas auquel l'opium le meilleur marché (Yunnan) est vendu par les débitants aux particuliers dans les régions du Tonkin le plus exposées à la contrebande est maintenant de \$44 le kilo. (pièce annexe No. 12) ; ce prix atteint \$70 dans le Delta tonkinois et 84 \$70 en Cochinchine. Ramené à la même unité de poids et de valeur, l'opium ne paie (officiellement ; Tung-Shui) en-Chine que 2 \$80 le kilo. (75. 115 le picul). En supposant même que les taxes non officielles soient du double des taxes officielles, et en tenant compte de ce que la taxe porte sur l'opium brut en Chine et sur l'opium *préparé* en Indo-Chine, on voit assez quelle marge il reste.

Et cette très faible consommation indo-chinoise est surtout—cela est à noter—le fait de la population chinoise présente dans la Colonie. Nous venons de noter le fait pour la ville de Cholon, où la population chinoise peut compter au moins pour $\frac{1}{3}$ de la population. En contraste avec ce qui se passe dans la ville, au tiers sinon à moitié chinoise (Population : 180,000 habitants, nombre de fumeries : 97 ; vente d'opium : 11,520^k, environ 200 piculs), on peut précisément citer les chiffres afférents à la province du même nom, où les Annamites sont l'immense majorité (population : 137.000 ; nombre de fumeries : 28 ; vente d'opium : 480^k (8 picul). Partout ailleurs en Cochinchine l'importance des ventes est à peu près régulièrement proportionnelle à l'importance de la population chinoise de la localité. Dans plusieurs provinces, on a pu noter que 70 à 80% des fumeurs étaient chinois. Au Cambodge, on estime leur part à 70%.

Bien que donc les inconvénients de l'opium se fassent sentir surtout sur une population dont elle n'a pas assumé directement la charge, et malgré la répercussion des mesures prises sur son budget, dont le produit net de l'opium constitue au moins 1/6^o (environ 5 millions 1/2 de piastres sur un Budget Général de 32 millions de piastres), l'Indo-Chine a pris, comme on l'a vu, sa large part dans l'ensemble des mesures destinées à la suppression progressive de l'opiomanie.

ARRÊTÉ CONCERNANT LE MONOPOLE DE L'OPIUM EN INDO-CHINE.

LE GOUVERNEUR GENERAL DE L'INDO-CHINE.

Vu le décret du 21 avril 1891;
 Vu les arrêtés des 5 juillet 1883 et 6 septembre 1892 relatifs à la constatation et à la répression de la fraude en matière d'opium en Cochinchine;
 Vu les conventions conclues avec le Roi du Cambodge les 10 septembre 1883 et 17 juin 1884;
 Vu les arrêtés des 6 et 8 juin 1893, réglant la régie et la vente de l'opium au Tonkin;
 Vu l'arrêté du 31 décembre 1894, concernant la vente de l'opium en Annam;
 Vu l'arrêté du 9 décembre 1895, instituant la régie de l'opium au Laos;
 Vu la loi du 11 janvier 1892, portant établissement du tarif général des Douanes;
 Vu le décret du 16 février 1895, rendant applicable aux Colonies diverses lois, arrêtés et décrets relatifs aux Douanes;
 Vu le décret du 31 juillet 1898, portant création du budget général de l'Indo-Chine;
 Vu l'arrêté du 15 septembre 1898, sur la procédure administrative et judiciaire en matière de Contributions indirectes en Indo-Chine;
 Vu le décret du 30 décembre 1898, organisant le service des Douanes et Régies de l'Indo-Chine;
 Sur la proposition du Directeur des Douanes et Régies,

ARRÊTÉ :

TITRE I.

DE L'EXERCICE DU MONOPOLE

ART. 1.—L'achat, la fabrication et la vente de l'opium constituent un monopole dont l'exploitation est confiée à l'Administration des Douanes et Régies de l'Indo-Chine.

ART. 2.—Le monopole d'achat et de fabrication est absolu et ne peut être exploité qu'en régie directe.

Le monopole de vente pourra être exercé soit en régie directe par l'Administration, soit par des tiers autorisés, fermiers ou régisseurs intéressés. Les contrats actuellement en cours en Annam et au Tonkin seront maintenus en vigueur dans leurs formes et conditions actuelles.

ART. 3.—La culture du pavot en vue de son exploitation en opium ne pourra avoir lieu en Indo-Chine qu'en vertu de l'autorisation préalable de l'Administration des Douanes et Régies et dans des conditions qui seront ultérieurement déterminées.

ART. 4.—L'Administration des Douanes et Régies effectuera ses achats d'opium brut partout où elle le jugera convenable et aux prix et conditions qui lui paraîtront les plus avantageux.

ART. 5.—Elle aura seule le droit d'importer de l'opium sur tout le territoire de l'Indo-Chine.

Sont exceptés de cette prohibition les opiums destinés aux usages de la pharmacie européenne ou à la consommation en dehors des territoires de l'Indo-Chine française. Des déclarations spéciales devront être fournies par les importateurs, conformément aux lois et règlements relatifs à l'importation et au transit du prohibé, sous réserve des dispositions spéciales indiquées ci-après.

ART. 6.—Tout capitaine de navire, maître ou patron de jonque ou de barque arrivant dans un port de l'Indo-Chine avec de l'opium à son bord, pour quelque destination que ce soit, devra en faire, de suite et sans tarder, la déclaration à l'Administration des Douanes et Régies, à peine d'être considéré comme contrebandier et puni comme tel.

Il ne devra permettre le débarquement de l'opium ainsi déclaré que sur le vu d'un permis de débarquement délivré par le service des Douanes et ce, sous la même peine que ci-dessus.

Si l'opium ainsi déclaré est destiné à transiter et que le navire ou le bateau importateur se trouve dans un des ports ouverts au transit, le capitaine ou patron, ou le destinataire remplira, auprès de la douane, toutes les formalités prescrites en matière de transit.

Si le navire ou le bateau importateur se trouve dans un port non ouvert au transit, le capitaine ou patron se conformera aux dispositions des articles 19 et 20 ci-après :

ART. 7.—Les pharmaciens au titre européen pourront seuls recevoir de l'opium brut, en extrait ou sous forme de médicaments, en se conformant aux prescriptions suivantes.

ART. 8.—Les opiums bruts ou en extrait et les préparations pharmaceutiques à base d'opium expédiés à ces pharmaciens devront être adressés à Saigon, à Haiphong ou à Tourane, et ne pourront être débarqués ailleurs que dans ces ports, si ce n'est pour cause de fortune de mer.

ART. 9.—Les quantités d'opium brut ou en extrait seront mises dans une caisse spéciale.

Si l'expéditeur omet de faire porter sur le manifeste les opiums bruts ou en extrait expédiés à des pharmaciens, ces derniers, sauf le recours contre lui, seront civilement responsables du préjudice qui pourrait être causé à la Régie par suite de détournement ou du débarquement frauduleux dans la Colonie.

ART. 10.—Le pharmacien destinataire devra, avant de faire opérer le débarquement de la marchandise prohibée, faire au bureau de la douane une déclaration exacte des quantités d'opium brut ou en extrait qui lui seront expédiées, du nom de l'expéditeur et du lieu d'origine des opiums.

Il sera tenu de représenter la facture d'envoi à l'appui de sa déclaration et de remplir toutes les formalités de douane prescrites, en pareil cas, par les règlements.

ART. 11.—Si l'Administration estime que les quantités d'opium brut ou en extrait excèdent un approvisionnement de trois mois, elle aura le droit de faire déposer l'excédent dans son entrepôt, et les opiums ne seront délivrés au destinataire qu'au fur et à mesure de ses besoins.

Aucune réclamation ne sera admise contre les appréciations de l'Administration lorsqu'il sera démontré qu'elle a autorisé la délivrance au destinataire d'une quantité d'opium suffisante pour satisfaire à ses besoins hebdomadaires.

ART. 12.—Un permis de circulation indiquant les quantités d'opium brut ou en extrait sera délivré au pharmacien destinataire et devra accompagner la marchandise jusqu'à l'arrivée dans des magasins.

Ce permis devra, à toute réquisition, être représenté aux préposés des Douanes et Régies ou à tout agent de la force publique.

ART. 13.—L'Administration aura toujours la faculté de faire surveiller l'emploi des quantités d'opium introduites par les pharmaciens.

ART. 14.—Ceux—ci seront tenus de présenter aux employés et préposés des Douanes et Régies les opiums et les préparations à base d'opium existant dans leurs magasins ou dans leurs pharmacies ; ils devront également, si ces employés et agents le demandent, leur communiquer leurs livres ou toutes autres pièces pouvant justifier de l'emploi de l'opium manquant. Les visites et vérifications ci-dessus auront lieu sans l'assistance d'un officier de police judiciaire ; toutefois, elles ne pourront être effectuées que sur ordre spécial d'un employé ayant le grade au moins de contrôleur ou remplissant les fonctions d'entreposeur principal.

ART. 15.—Tout refus de la part d'un pharmacien de laisser procéder aux vérifications prescrites par l'article qui précède constituera une opposition à l'exercice.

ART. 16.—Le transit de l'opium à travers les possessions françaises en Cochinchine et à travers le Tonkin est autorisé

On ne pourra, toutefois, faire transiter des quantités moindres d'une caisse de la dimension usitée dans le commerce (25 à 30 kilos).

ART. 17.—L'opium destiné au transit ne pourra être introduit en Cochinchine et au Tonkin que par les ports de Saïgon et de Haiphong et par les villes de Langson et Laokay, sauf le cas où, par fortune de mer ou toute circonstance de force majeure, il y aurait nécessité de le faire pénétrer sur le territoire par un autre point frontière.

ART. 18.—L'opium en transit pourra être exporté par mer ou par terre, mais par les seuls bureaux de douane suivants :

Saïgon, Phnom-Penh, Haiphong, Laokay et Langson.

ART. 19.—Dans le cas où l'opium embarqué à bord d'un navire ou d'une barque touchant dans un des ports de l'Indo-Chine devra être réexporté par ce navire ou cette barque, l'Administration des Douanes et Régies fera placer cet opium dans un endroit spécial du bâtiment importateur, y apposera les scellés et prendra telles mesures qu'elle jugera à propos pour prévenir tout débarquement en fraude de ce produit.

Elle pourra même, si elle le juge nécessaire, ordonner que l'opium soit entreposé dans ses magasins jusqu'au départ du bâtiment. La mise en entrepôt est indispensable si la réexpédition ne doit pas s'opérer par le même navire ou la même barque et n'a pas lieu immédiatement. Seront, en outre, observées, en cas de réexportation immédiate ou ultérieure, toutes les dispositions prescrites en la matière par les règlements de douane.

ART. 20.—Dans le cas où, par fortune de mer, un bâtiment ayant de l'opium à son bord relâcherait dans un port quelconque de l'Indo-Chine, le capitaine naufragé ou en avarie devra faire aux autorités du lieu la déclaration prescrite par l'art. 6 ci-dessus, et l'opium, mis immédiatement sous scellés, sera déposé au bureau des Douanes et Régies.

Il sera dressé du tout un procès-verbal qui indiquera le nombre et l'état extérieur des caisses ou colis contenant l'opium ainsi débarqué, et un double de ce procès-verbal restera entre les mains du capitaine et vaudra récépissé.

ART. 21.—Les passagers embarqués à bord d'un bâtiment faisant escale dans un port quelconque de l'Indo-Chine ne pourront descendre à terre avec de l'opium sous quelque forme et en si faible quantité que ce soit, sous peine d'être considérés comme contrebandiers et d'être punis comme tels.

ART. 22.—Si un passager est obligé de débarquer pour continuer sa route sur un autre bâtiment ou pour tout autre motif, il devra remettre tout l'opium dont il est détenteur au capitaine qui en fera le dépôt à la douane, en se conformant aux prescriptions énumérées aux articles 6 et 19 précédents.

Cet opium sera remis au passager par la douane lorsqu'il quittera la Colonie.

ART. 23.—Les droits de plombage, de permis de débarquement et de circulation, les frais d'entrepôts seront ceux qui sont déterminés par les règlements spéciaux à chacun des bureaux de douane où auront été effectués le débarquement et le transit ou la réexportation.

L'Administration conservera les opiums jusqu'à l'acquiescement des droits et, s'ils ne sont pas retirés dans un délai de six mois, ils seront confisqués à son profit.

ART. 24.—Tout l'opium livré, sous quelque forme que ce soit, à la consommation, tant en Cochinchine, au Cambodge, et au Laos qu'au Tonkin et en Annam, sera fabriqué, manipulé, ou préparé par les soins de l'Administration des Douanes et Régies.

Il sera fait exception à cette règle en ce qui concerne l'opium brut que les entreposeurs particuliers, gérants des entrepôts ou débitants généraux seront, en vertu de conventions spéciales, autorisés à vendre au nom de la Régie.

ART. 25.—L'Administration des Douanes et Régies pourra livrer à la consommation telle quantité d'opium qui lui conviendra et établir pour son débit autant d'entrepôts de bureaux de vente et de fumeries qui lui paraîtront nécessaire.

ART. 26.—Les entrepôts pourront être administrés directement par le service des Douanes et Régies ou établis chez des particuliers choisis à cet effet.

ART. 27.—Les entreposeurs, à quelque titre que ce soit, ne pourront détenir ni mettre en vente un autre opium que celui de la Régie.

Certains entreposeurs particuliers, gérants d'entrepôts ou débitants généraux du Tonkin, pourront néanmoins mettre en vente de l'opium brut qu'ils auront été autorisés à se procurer à la frontière chinoise, mais sous la réserve que cet opium sera estampillé par la régie qui en établira la poids net et en surveillera la vente.

ART. 28.—Il est interdit aux entreposeurs, agents de l'Administration des Douanes et Régies, de vendre de l'opium au détail, l'opium devra être livré par eux au public en récipients ou paquets cachetés ou revêtus des marques de la Régie.

Les entreposeurs particuliers, étrangers à l'Administration, pourront être autorisés à ouvrir un débit pour la vente au détail, ils devront se munir d'une licence de débitant.

ART. 29.—Les entreposeurs non fonctionnaires publics pourront être autorisés par l'Administration à tenir un autre genre de commerce, en se conformant aux arrêtés en vigueur sur les patentes.

ART. 30.—L'Administration des Douanes et Régies pourra concéder à des particuliers, moyennant certaines conditions et en vertu de contrats spéciaux passés avec eux, le droit exclusif de vente de l'opium dans une région quelconque (arrondissement, province, canton, cercle ou territoire militaire) du Tonkin ou du Laos.

Ces concessionnaires prendront le titre de débiteurs généraux de la Régie.

ART. 31.—Les débiteurs généraux seront soumis au versement d'un fonds de garantie dont le montant sera fixé par l'Administration des Douanes et Régies, selon l'importance des achats qu'ils s'engageront à faire. Il ne pourra, en aucun cas, être inférieur à 500 piastres.

Ce fonds de garantie sera versé dans les caisses locales à titre de dépôt administratif.

ART. 32.—Les amendes administratives encourues par les débiteurs généraux seront prélevées sur ce fonds de garantie, sans autre formalité qu'un simple avis à eux donné par l'Administration des Douanes et Régies, sans qu'il y ait lieu à aucune mise en demeure préalable, ni besoin de la faire sanctionner par un jugement. Les débiteurs généraux seront tenus de renouveler le fonds de garantie dans la forme et les délais qui leur seront indiqués, sous peine de déchéance.

ART. 33.—Les débiteurs généraux seront tenus d'être, approvisionnés de toutes les espèces d'opium que les consommateurs leur demanderont et que la Régie mettra en vente ou dont elle autorisera la vente.

ART. 34.—L'opium sera livré aux débiteurs généraux au comptant, à moins d'arrangement spécial pour un autre mode de paiement entre l'Administration des Douanes et Régies et certains débiteurs généraux.

ART. 35.—Le prix d'achat de l'opium et les bénéfices que les débiteurs généraux seront autorisés à faire sur les ventes de cet opium seront déterminés par des règlements et contrats spéciaux.

ART. 36.—Les débiteurs généraux ne pourront vendre, par eux-mêmes, leurs agents ou débiteurs, aucune quantité d'opium en dehors des limites du ressort territorial qui leur sera concédé, sous peine d'être considérés comme contrebandiers et sans préjudice des dommages à payer aux autres concessionnaires ainsi lésés.

ART. 37.—Ils seront tenus d'ouvrir un certain nombre de débits et de prendre, à cet effet, un nombre correspondant de licences de différentes catégories, suivant un tableau dressé pour chaque province ou région par l'Administration ;

Ils devront également ouvrir de nouveaux débits en cas de demandes acceptées par l'Administration.

Ils auront, néanmoins, la faculté de placer, en outre du nombre qui aura été désigné par la Régie, autant de licences qui leur conviendra, à condition de faire agréer leurs débiteurs au détail par l'Administration.

Celle-ci aura le droit de réserver une certaine quantité de licences à des annamites.

ART. 38.—Les débiteurs généraux seront responsables de toutes les infractions administratives qui pourraient être commises par leurs débiteurs au détail ; mais, dans le cas où ceux-ci se rendraient coupables de faits de fraude sans la complicité des débiteurs généraux, ces derniers seront mis hors de cause et les vrais délinquants seront poursuivis. Leurs licences leur seront retirées si l'Administration le juge convenable.

ART. 39.—La restriction formulée dans l'article précédent, relativement à la responsabilité civile des débiteurs, ne concerne que les actes de fraude commis par leurs débiteurs au détail ; ils continueront à être civilement responsables des actes de toute nature commis par leurs agents autre que les débiteurs spécialement visés dans l'article 38 ci-dessus.

ART. 40.—Les débiteurs généraux seront tenus de contribuer à la surveillance et à la répression de la fraude.

Ils devront avoir, à cet effet, à leur solde le nombre d'agents européens ou asiatique qui leur sera fixé suivant contract avec l'Administration.

Ces agents seront commissionnés et assermentés. Ils seront dirigés par les employés des Douanes et Régies et, dans le cas de saisies faites sur leurs indications et avec leur concours, le concessionnaire aura la part revenant aux indicateurs d'après les règlements.

ART. 41.—En aucun cas, les débiteurs généraux ne pourront céder leurs contrats sans l'assentiment préalable de l'Administration des Douanes et Régies.

ART. 42.—Toutes les contestations entre les débiteurs généraux et la Régie ou entre ces débiteurs et d'autres concessionnaires seront réglées par le Directeur des Douanes et Régies.

ART. 43.—Toute personne voulant se livrer à la vente au détail de l'opium devra se munir d'une licence valable pour une année (du 1^{er} janvier au 31 décembre).

Cette licence dont le prix sera fixé par l'Administration, ne sera valable que dans la localité pour laquelle elle aura été délivrée et pour un seul débit.

Elle sera affichée à l'endroit le plus apparent de ce débit.

Dans les villes, les titulaires de licences au détail ne pourront changer de quartier ou de rue qu'après en avoir obtenu l'autorisation de l'Administration.

ART. 44.—Cette licence pourra être accordée à toute personne majeure dont la moralité et la solvabilité auront été reconnues.

L'Administration, pourra, cependant, si elle le juge nécessaire, exiger de chaque débitant une caution responsable de toutes les condamnations pécuniaires qui pourront être prononcées contre le débitant.

ART. 45.—Les débiteurs au détail pourront vendre l'opium soit en récipients fermés revêtus des marques de la Régie, soit au détail.

Lorsqu'ils ouvriront un des récipients pour en vendre le contenu au détail, ils devront laisser subsister les marques de la Régie et ne pas transvaser le contenu, à moins d'autorisation spéciale.

Il leur est interdit de mélanger ou d'ajouter à l'opium qu'ils sont autorisés à vendre une substance quelconque.

Ils ne pourront faire aucune vente en dehors de leurs débits.

ART. 46.—Ils ne pourront vendre l'opium en boîtes fermées plus de 10 pour 100 plus cher que le prix officiel d'achat à la Régie.

Le prix de l'opium au détail pourra être également fixé par l'Administration dans certains pays de l'Indo-Chine.

ART. 47.—Il sera délivré, à ses frais, à chaque débitant au détail, pour chaque débit, un livret sur lequel l'entreposeur ou les débiteurs généraux inscriront, au fur et à mesure des livraisons, les quantités livrées.

Chaque mention sera signée par la partie qui aura procédé à la vente.

ART. 48.—Les débiteurs au détail ne pourront s'approvisionner qu'aux entrepôts qui leur seront désignés par l'Administration ou les débiteurs généraux. Ils tiendront un compte journalier de leurs ventes.

ART. 49.—Le livret dont il est question à l'article 47 ci-dessus restera en la possession du débitant au détail et lui servira de permis de circulation. Il devra le représenter à toute réquisition de l'autorité.

ART. 50.—Tout débitant au détail aura le droit d'ouvrir une fumerie, sous réserve d'en faire la déclaration préalable à l'Administration.

Le local affecté à la fumerie ne pourra servir à aucun autre usage, même à la vente de l'opium destiné à être fumé. Cet opium sera livré préalablement dans le débit.

ART. 51.—L'entrée des fumeries sera défendue à toute personne portant des armes apparentes ou cachées, aux femmes de tout âge, aux enfants au-dessous de vingt ans et aux Européens, sous peine d'amende contre ces personnes, quand elles persisteront, malgré les observations du débitant, à y consommer de l'opium ou à y séjourner. Le taux de l'amende encourue sera fixé comme pour les contraventions de simple police.

ART. 52.—Il est interdit à tout individu de transporter plus de 20 grammes de dross (détritus d'opium déjà fumé), à moins d'une autorisation spéciale de l'Administration des Douanes et Régies.

ART. 53.—Est interdite également toute vente ou cession de dross pur ou mélangé à d'autres matières à moins d'une autorisation spéciale de l'Administration des Douanes et Régies.

ART. 54.—Tout acheteur d'opium (débitant ou particulier) pourra rapporter à la Régie tout le dross provenant de l'opium qu'il aura acheté.

ART. 55.—La Régie s'engage à acheter ce dross d'après un tarif officiel qui sera affiché et publié. Les entreposeurs donneront un reçu provisoire des quantités qui leur seront remises.

Le prix en sera payé après que la manufacture d'opium aura reconnu que le dross est utilisable.

ART. 56.—Tout acheteur d'opium (particulier ou débitant) devra, au moment où il effectuera son achat, verser, à titre de dépôt de garantie, entre les mains de l'entreposeur, une somme dont le montant sera égal à la valeur officielle du dross contenu dans chaque kilogramme d'opium qui lui sera livré.⁽¹⁾

ART. 57.—Ce dépôt sera définitivement perdu pour tout acheteur qui ne rapportera pas de dross dans le délai d'un mois après l'achat de l'opium.⁽¹⁾

TITRE II.

DE LA REPRESSION.

ART. 59.—Toute importation d'opium faite sans déclaration dans les deux myriamètres des côtes ou dans un port de l'Indo-Chine sera poursuivie et punie conformément aux dispositions des articles 15 de la loi de douane du 27 mars 1817, 1er du titre V de la loi du 22 août 1791 et 10, titre II de la loi du 4 germinal an II.

(1) Dispositions rapportées par arrêté du 10 décembre 1903 (Pièce No. 10).

ART. 60.—Tout versement frauduleux, toute tentative de versement frauduleux d'opium, soit dans l'enceinte des ports, soit sur les côtes de l'Indo-Chine, seront poursuivis et punis conformément aux dispositions des articles 2 et 4 de la loi de douane de 2 juin 1875, 34 et 37 de titre VI de la loi du 21 avril 1818, 51, 52, 53 du titre V de la loi du 28 avril 1816.

L'opium saisi à l'importation sera estimé suivant son prix net officiel de vente à l'entrepôt. Cette valeur, qui servira à déterminer le montant de l'amende lorsqu'elle dépassera le minimum prévu par les lois, servira de base à la durée de la contrainte par corps.

Toutefois, lorsque l'opium saisi sera reconnu inutilisable pour le service de la Régie, il sera détruit. Sa valeur sera fixée à la moitié du prix net de vente à l'entrepôt, pour déterminer le montant de la confiscation à répartir entre les intéressés.

ART. 61.—Les importations d'opium de contrebande par les frontières de terre seront poursuivies et punies selon qu'elles auront été commises par moins de trois individus et plus, jusqu'à six inclusivement, et de trois individus au plus à cheval ou de plus de six à pied, conformément aux dispositions des articles 41, 42, 43, du titre V de la loi du 28 avril 1816 et 4 de celle du 2 juin 1875 s'il y a lieu, dans le premier cas en vertu des prescriptions des articles 41, 42, 44 de la loi du 28 avril 1816, et 4 de celle du 2 juin 1872, dans le second cas, et, dans le troisième cas, par application des articles 48, 51, 52, et 53 de la loi du 28 avril 1816, 37 de celle du 21 avril 1818 et 4 de celle du 2 juin 1875.

ART. 62.—Tout transport par barque, par voiture ou chemin de fer, d'opium de contrebande effectué dans le rayon des douanes donne lieu à l'application des articles 48, 51, 52 et 53 du titre V de la loi du 28 avril 1816, 37 du titre VI de la loi du 21 avril 1818, 3 et 4 de la loi du 2 juin 1875.

ART. 63.—Toute détention d'opium de contrebande constatée dans le rayon des douanes sera poursuivie et punie conformément aux dispositions des articles 38 paragraphe 4, du titre IV, 41, 42 du titre V de la loi du 28 avril 1816, et 3 de la loi du 5 juillet 1836.

ART. 64.—En cas de découverte d'opium de contrebande abandonné dans le rayon des douanes par un inconnu, il sera procédé à la saisie de cet opium ; procès-verbal sera dressé contre inconnu et la confiscation de l'opium ainsi saisi sera demandée aux tribunaux, qui devront toujours la prononcer en faveur de la régie.

ART. 65.—Tout transporteur d'opium de contrebande dont le propriétaire reste inconnu sera déclaré personnellement responsable de la contravention commise.

ART. 66.—Tout particulier qui fabriquera ou aura fabriqué de l'opium, ou aura mêlé à de l'opium de la régie quelque substance de quelque nature que ce soit, sera puni d'une amende de 500 à 2,000 francs et d'un emprisonnement de deux mois à trois ans.

Les opiums saisis en fraude, les ustensiles servant ou ayant servi à la fabrication et les objets contenant l'opium saisi seront confisqués.

En cas de récidive, le maximum de l'amende sera appliqué et le minimum de l'emprisonnement porté à six mois.

ART. 68.—Tout colportage, toute vente ou cession à titre gratuit par un particulier d'un opium autre que celui de la Régie, ou de dross pur ou mélangé sera puni d'une amende de 500 à 2,000 francs et d'un emprisonnement de deux mois à trois ans. L'opium ou le dross sera confisqué.

En cas de récidive, le maximum de l'amende sera appliqué et le minimum de l'emprisonnement porté à six mois.

ART. 69.—Toute vente d'opium de la Régie par une personne non autorisée sera punie d'une amende de 500 à 2,000 francs et d'un emprisonnement de quinze jours à trois ans, ou de l'une de ces deux peines seulement.

En cas de récidive dans la même année, la peine de l'emprisonnement devra être appliquée.

ART. 70.—Dans les cas de fraude prévue aux articles 59 à 69 inclus ci-dessus, la régie aura toujours droit à des dommages-intérêts dont le montant ne pourra pas être inférieur à cinq fois la valeur de la quantité de matière frauduleuse calculée au prix officiel de l'opium de la régie.

ART. 71.—Toute saisie d'opium faite au préjudice d'un inconnu en fuite sera constatée par un procès-verbal contre inconnu, et la confiscation de l'opium sera prononcée par le tribunal sur requête de l'Administration des Douanes et Régies.

ART. 72.—Tout entreposeur, fonctionnaire, qui aura mis en vente de l'opium falsifié, ou du dross pur ou mélangé, ou qui aura contrefait les marques de la Régie, ou qui aura vendu l'opium à un prix supérieur au prix officiel, sera immédiatement révoqué, sans préjudice des poursuites criminelles qui pourront être exercées contre eux en vertu des dispositions du Code pénal.

ART. 73.—Tout entreposeur particulier ou gérant d'entrepôt qui détiendra ou mettra en vente un opium autre que celui de la régie sera puni d'une amende de 5 francs par gramme d'opium saisi, sans que cette amende puisse être inférieure à 200 francs, si faible que soit cette quantité, et d'un emprisonnement d'un mois à trois ans.

Les opiums saisis et leurs contenants seront confisqués.

ART. 74.—Toute vente au détail faite par un entreposeur particulier non muni d'une licence de débitant au détail sera punie d'une amende de 500 à 2,000 francs.

ART. 75.—Tout entreposeur particulier ou gérant d'entrepôt qui omettra ou s'abstiendra de donner récépissé régulier des sommes qu'il aura perçues pour vente d'opium ou ne consignera pas ces ventes sur les livrets des débiteurs sera passible, pour chaque omission ou abstention, d'une amende de 50 à 200 francs.

ART. 76.—Tout entreposeur particulier ou gérant d'entrepôt qui aura décacheté ou ouvert les boîtes, récipients ou paquets contenant l'opium de la Régie et mêlé à cet opium des substances de quelque nature qu'elles soient, ou qui aura contrefait les marques de la Régie, sera puni d'une amende de 500 à 3,000 francs et d'un emprisonnement de trois mois à cinq ans, sans préjudice des poursuites criminelles qui pourront être exercées en vertu des dispositions du Code pénal.

ART. 77.—Les entreposeurs particuliers devront, à peine d'une amende de 25 à 100 francs pour chaque infraction, se conformer aux règlements et instructions du service des régies; ces amendes seront prononcées administrativement par le Directeur des Douanes et Régies, sauf appel devant le Gouverneur Général.

Tout entreposeur particulier qui sera convaincu d'avoir vendu l'opium au-dessus du prix fixé par l'Administration ou qui aura mis en vente du dross pur ou mélangé, sera puni d'une amende de 500 à 2,000 francs et d'un emprisonnement de huit jours à six mois.

ART. 78.—Les débiteurs généraux seront passibles des peines applicables aux entreposeurs particuliers ou gérants d'entrepôts, dans les cas prévus aux articles 73, 74, 75, 76 et 77 ci-dessus, lorsqu'ils se seront rendus coupables des contraventions et délits indiqués dans ces articles.

Des amendes administratives variant de 10 à 500 francs pourront, en outre, leur être infligée pour infractions aux règlements sur le commerce de l'opium ou pour inexécution de leurs contrats, en dehors des dommages—intérêts dont ils seront passibles, le cas échéant, s'il y a préjudice causé par eux ou leurs agents à l'Administration des Douanes et Régies.

ART. 79.—Tout opium de régie qui sera trouvé chez un débiteur dans des récipients autres que ceux de la régie ou dans des récipients non revêtus de la Marque officielle sera confisqué et le contrevenant sera puni d'une amende de 100 à 1,000 francs.

En cas de récidive dans la même année, il sera puni du maximum de la peine et sa licence lui sera retirée.

ART. 80.—Tout débiteur qui aura vendu un opium autre que celui de la régie, ou qui y aura mêlé quelque substance de quelque nature que ce soit, sera puni d'une amende de 500 à 2,000 francs et d'un emprisonnement de quinze jours à trois ans.

Les opiums de contrebande ou altérés seront confisqués, ainsi que leur contenant.

ART. 81.—Le débiteur qui aura contrefait la marque de la régie sera puni des peines indiquées à l'article 76 ci-dessus, la licence lui sera, en outre, retirée.

ART. 82.—Tout débiteur qui se sera approvisionné à un autre entrepôt qu'à celui désigné par la Régie ou par les débiteurs généraux sera passible d'une amende de 100 à 500 francs.

ART. 83.—Dans les cas de fraude prévus aux articles 79, 80, 81 et 82 ci-dessus, la régie aura toujours droit à des dommages—intérêts dont le montant ne pourra pas être inférieur à cinq fois la valeur de la quantité de matière frauduleuse calculée au prix officiel de l'opium de la régie.

ART. 84.—Les maîtres ou patrons de fumeries ou maisons d'opium seront responsables des contraventions au présent arrêté commises dans leur établissement.

ART. 85.—Les débiteurs au détail, les maîtres ou patrons de fumeries ou maisons d'opium devront à peine d'une amende de 25 à 100 francs pour chaque infraction, se conformer aux règlements et instructions du service des régies;

Ces amendes seront prononcées administrativement par le Directeur des Douanes et Régies, sauf appel devant le Gouverneur Général.

ART. 86.—Les entreposeurs particuliers, débiteurs généraux, débiteurs au détail et tenanciers de maisons d'opium de toute catégorie, seront soumis à l'exercice.

TITRE III.

DISPOSITIONS DIVERSES.

ART. 87.—Provisoirement et en attendant l'application d'un régime spécial à la culture de l'opium, les Yaos ou Méos qui se livrent, au Laos, à cette culture auront, après déclaration faite au commissaire du territoire, le droit de fumer l'opium récolté par eux sur leurs terrains, sous réserve, s'il y a un excédent, de le faire parvenir au bureau de la régie de Luang-Prabang, qui le paiera au prix moyen des achats précédemment faits.

Tout colportage ou autre trafic de cet opium sera considéré comme un acte de contrebande.

ART. 88.—Les Européens qui voudront se livrer à cette culture en un point quelconque de l'Indo-Chine devront en obtenir l'autorisation de l'Administration, qui leur fixera, après avis du service des Douanes et Régies, les conditions spéciales à leur exploitation et à la vente de l'opium produit.

ART. 89.—Les clauses et conditions particulières aux contrats actuellement en cours pour la vente de l'opium de la régie en Annam et au Tonkin seront maintenues en vigueur jusqu'à l'expiration de ces contrats, à moins que les intéressés n'en réclament la modification pour les rendre en tout conformes aux règles posées par le présent arrêté.

ART. 90.—Toutes les fois que l'opium mis en vente par les débitants ne paraîtra pas complètement identique à celui de la Régie, les employés des Douanes et Régies devront en prélever des échantillons qui seront mis sous scellés pour être transmis à la manufacture à fin d'expertises.

On procédera de la même façon en cas de saisie quelconque d'opium étranger ou de matière supposée contenir de l'opium autre que celui de la régie, afin de permettre toutes expertises et analyses nécessaires.

ART. 91.—Les condamnations pécuniaires pour un même fait de fraude en matière d'opium contre plusieurs personnes seront solidaires.

ART. 92.—Les ventes d'objets confisqués autres que l'opium seront faites par la Régie.

ART. 93.—Les prix de vente de l'opium par les entreposeurs et débitants, ainsi que le prix des licences et leurs catégories et celui des livrets, seront déterminés par arrêtés spéciaux du Gouverneur Général.

ART. 94.—Sont abrogées toutes les dispositions antérieures contraires au présent arrêté.

Toutefois, les contrats en cours en Annam et au Tonkin resteront en vigueur jusqu'à leur expiration à moins que les intéressés ne réclament le bénéfice de la présente réglementation.

ART. 95.—Le Lieutenant-Gouverneur de la Cochinchine, les Résidents Supérieurs en Annam, au Tonkin, au Cambodge, les Commandants Supérieurs au Laos, le procureur Général et le Directeur des Douanes et Régies de l'Indo-Chine sont chargés, chacun en ce qui le concerne, de l'exécution du présent arrêté.

Saigon, le 7 février 1899.

Signé : PAUL DOUMER.

EXPORTATION.

Opium brut de l'Inde	\$25.00
do. Chine	20.00 (1)
Opium préparé de l'Inde.....	40.00
do. Chine	36.00

ART. 2.—Aucune qualité d'opium autre que celles indiquées aux tableaux ci-dessus ne sera mise en vente sans l'autorisation expresse du Gouverneur Général.

ART. 3.—Le prix de vente aux consommateurs par les débitants et les entreposeurs en Cochinchine, au Cambodge, en Annam, au Tonkin et au Laos, ne pourra pas être supérieur à celui porté aux tableaux 1, 2, 3, et 4 du présent arrêté.

ART. 4.—Il demeure interdit à tout individu de transporter plus de 20 grammes de dross à moins d'une autorisation spéciale de l'Administration des Douanes et Régies.

ART. 5.—Demeure interdite également toute vente ou cession de dross pur ou mélangé à d'autres matières, à moins d'une autorisation spéciale de l'Administration des Douanes et Régies.

ART. 6.—Les infractions en matière de dross, prévues aux articles 4 et 5 ci-dessus, donneront lieu à l'application des peines édictées en l'article 68 de l'arrêté du 7 février 1899.

ART. 7.—La Régie pourra acheter le dross provenant de l'opium vendu par elle d'après un tarif fixé par le Directeur Général des Douanes et Régies et dans les conditions arrêtées par lui.

ART. 8.—Sont rapportées toutes autres dispositions antérieures concernant le régime du dross et la mise en vente de ce produit par la Régie.

ART. 9.—Le Secrétaire Général, le Procureur Général et le Directeur Général des Douanes et Régies de l'Indo-Chine sont chargés, chacun en ce qui le concerne, de l'exécution du présent arrêté.

Hanoï, le 10 décembre 1903.

Signé : BEAU.

EXTRAIT du Bulletin Officiel de l'Indo-Chine Française No. 10 de l'année 1907, page 802.

No. 403.—Circularaire du Gouverneur Général au sujet de l'interdiction aux fonctionnaires de l'usage de l'opium.

Saigon, le 5 octobre 1907.

LE GOUVERNEUR GÉNÉRAL DE L'INDO-CHINE,

À

MESSIEURS LES CHEFS DES SERVICES GÉNÉRAUX ET DES ADMINISTRATIONS LOCALES.

Deux arrêtés en date du 19 juin dernier, approuvés par le pouvoir métropolitain, ont augmenté le prix de l'opium et interdit l'ouverture de fumeries en Indo-Chine. Ces mesures destinées à restreindre l'usage de la drogue, font partie d'un programme dont la réalisation permettra d'arriver progressivement à la suppression de la consommation de l'opium dans la Colonie.

Il n'a pas paru possible d'aller plus loin, avant de connaître les conclusions de l'enquête qui se poursuit actuellement sur la question, par les soins de la commission spéciale que j'ai instituée le 22 août 1907.

Mais si l'on ne peut encore édicter des mesures de prohibition s'appliquant à l'ensemble de la population, le Gouvernement est en droit de le faire immédiatement à l'égard de ses fonctionnaires. Il ne saurait être permis aux représentants du Gouvernement français de donner l'exemple d'une habitude funeste, qui est condamnée à juste titre dans tous les pays civilisés.

J'ai, en conséquence, d'accord avec le Département, arrêté les dispositions suivantes :

L'usage de l'opium est formellement interdit à tous les fonctionnaires, employés et agents européens de tous rangs et de tous services relevant de mon autorité.

Ceux qui contreviendront à cette défense devront m'être signalés sans retard et je n'hésiterai pas à prendre à leur égard des mesures de rigueur. Ils seront notamment privés d'une manière absolue de toute inscription au tableau et, d'une façon générale, de tout avancement, jusqu'à amendement complet.

A cette sanction s'ajoutera la mise à la retraite d'office des fonctionnaires fumeurs invétérés qui réuniront des droits à pension, s'il est constaté, au bout de quelques mois, qu'ils sont incorrigibles.

Je vous laisse le soin d'examiner dans quelles conditions des mesures analogues pourront être prises à l'égard des fonctionnaires et agents indigènes et vous voudrez bien m'adresser, à cet effet, dans le plus bref délai possible, telles propositions que vous jugerez utiles, après entente avec le Gouvernement Annamite, Cambodgien.

J'ai l'honneur de vous prier de m'accuser réception de la présente circulaire et de me rendre compte ultérieurement des conditions dans lesquelles elle aura été appliquée.

Signé : BEAU.

INTERDICTION DE L'EXPORTATION DE L'OPIMUM PRÉPARÉ VERS HONG-KONG.

LE GOUVERNEUR GÉNÉRAL DE L'INDO-CHINE, OFFICIER DE LA LÉGION D'HONNEUR.

Vu le décret du 21 avril 1891 ;

Vu l'arrêté du 7 février 1899, relatif à l'exercice du monopole, à la constatation et à la fraude en matière d'opium ;

Vu le décret du 10 juin 1905, portant réorganisation du Service des Douanes et Régies de l'Indo-Chine ;

Sur la proposition du Directeur Général des Douanes et Régies de l'Indo-Chine.

ARRÊTÉ :

ART. 1.—L'exportation de l'opium préparé de l'Indo-Chine sur Hong-Kong est interdite.

ART. 2.—Toute infraction à la présente disposition entraînera la confiscation de l'opium saisi.

ART. 3.—Le Procureur Général, Chef du Service Judiciaire en Indo-Chine et le Directeur Général des Douanes et Régies de l'Indo-Chine sont chargés, chacun en ce qui le concerne, de l'exécution du présent arrêté.

Hanoï, le 19 juillet 1908.

SUPPRESSION DE LA VENTE DE L'OPIMUM PRÉPARÉ DU YUNNAN
EN COCHINCHINE ET AU CAMBODGE.

LE GOUVERNEUR GÉNÉRAL DE L'INDO-CHINE, OFFICIER DE LA LÉGION D'HONNEUR.

Vu le décret du 21 avril 1891 ;

Vu le décret du 31 juillet 1898, portant création du budget général de l'Indo-Chine ;

Vu l'arrêté du 13 février 1899, fixant les attributions des services généraux et des services locaux de l'Indo-Chine ;

Vu les arrêtés des 5 juin 1903 et 1 août 1907, sur la procédure administrative et judiciaire en matière de contributions indirectes en Indo-Chine ;

Vu l'arrêté du 7 février 1899, approuvé par décret du 30 août 1899, sur le régime de l'opium en Indo-Chine ;

Vu l'arrêté du 23 février 1908, fixant le prix officiel de vente de l'opium en Indo-Chine ;

Sur la proposition du Directeur Général des Douanes et Régies de l'Indo-Chine.

ARRÊTÉ :

ART. 1.—A partir de la promulgation du présent arrêté la vente de l'opium dit du "Yunnan" est supprimée en Cochinchine et au Cambodge.

ART. 2.—Le Directeur Général des Douanes et Régies de l'Indo-Chine est chargé de l'exécution du présent arrêté.

Saigon, le 26 septembre 1908.

Signé : KLOBUKOWSKI.

Pièce Annexe No. 17.

ARRÊTÉ du 16 juillet 1908, promulguant en Indo-Chine des textes relatifs à la vente des substances vénéneuses, et ces textes eux mêmes.

RÉGLEMENTATION.

Sur le commerce et la vente des substances vénéneuses.

Le Gouverneur générale *p. i.* de l'Indo-Chine, Officier de la Légion d'Honneur,

Vu le décret du 21 avril 1894;

Vu les arrêtés des 14 novembre 1871, portant réglementation de la pharmacie en Indo-Chine et 27 février 1886, promulguant en *Annam et au Tonkin* la loi du 22 germinal an XI, l'ordonnance royale du 29 octobre 1846 et le décret du 8 juillet 1850;

Vu le décret du 15 janvier 1853, déclarant exécutoires aux colonies l'article 1 de la loi du 19 juillet 1845 sur la vente des substances vénéneuses et l'ordonnance du 26 octobre 1846, portant règlement sur l'application de la même loi;

Sur la proposition du Procureur général, Chef du Service judiciaire en Indo-Chine et du Directeur général de la Santé de l'Indo-Chine,

ARRÊTÉ :

ART. 1.—Sont promulgués en Indo-Chine l'article 1 de la loi du 19 juillet 1845, l'ordonnance du 29 octobre 1846 et le décret du 8 juillet 1850 sur les ventes de substances vénéneuses.

ART. 2.—Le Procureur général, Chef du Service judiciaire et le Directeur général de la Santé de l'Indo-Chine sont chargés, chacun en ce qui le concerne, de l'exécution du présent arrêté.

Hanoï, le 16 juillet 1908.

BONHOURE.

19 juillet 1845.

Loi sur la vente des substances vénéneuses.

ART. 1.—Les contraventions aux ordonnances royales portant règlement d'administration publique, sur la vente, l'achat et l'emploi des substances vénéneuses, seront punies d'une amende de 100 francs à 3,000 francs et d'un emprisonnement de six jours à deux mois, sauf application, s'il y a lieu, de l'article 463 du Code pénal.—Dans tous les cas, les tribunaux pourront prononcer la confiscation des substances saisies en contravention.

29 octobre 1846.

Ordonnance du Roi portant règlement sur la vente des substances vénéneuses.

TITRE I.**DU COMMERCE DES SUBSTANCES VÉNÉNEUSES.**

ART. 1.—Quiconque voudra faire le commerce d'une ou de plusieurs des substances comprises dans le tableau annexé à la présente ordonnance sera tenu d'en faire préalablement la déclaration devant le maire de la commune, en indiquant le lieu où est situé son établissement. Les chimistes, fabricants ou manufacturiers employant une ou plusieurs des dites substances, seront également tenus d'en faire la déclaration dans la forme. La dite déclaration sera inscrite sur un registre à ce destiné, et dont un extrait sera remis au déclarant; elle devra être renouvelée dans le cas de déplacement de l'établissement.

ART. 2.—Les substances auxquelles s'applique la présente ordonnance ne pourront être vendues ou livrées qu'aux commerçants, chimistes, fabricants ou manufacturiers qui auront fait la déclaration prescrite par l'article précédent, ou aux pharmaciens. Les dites substances ne devront être livrées que sur la demande écrite et signée de l'acheteur.

ART. 3.—Tous achats ou ventes de substances vénéneuses seront inscrits sur un registre spécial, coté et paraphé par le maire ou le commissaire de police. Les inscriptions seront faites de suite et sans aucun blanc, au moment même de l'achat ou de la ventes; elles indiqueront l'espèce et la quantité des substances achetées ou vendues, ainsi que le noms, professions et domiciles des vendeurs ou des acheteurs.

ART. 4.—Les fabricants ou manufacturiers employant des substances vénéneuses en surveilleront l'emploi dans leur établissement, et constateront cet emploi sur un registre établi conformément au premier paragraphe de l'article 3.

TITRE II.**DE LA VENTE DES SUBSTANCES VÉNÉNEUSES PAR LES PHARMACIENS.**

ART. 5.—La vente des substances vénéneuses ne peut être faite, pour l'usage de la médecine, que par les pharmaciens, et sur la prescription d'un médecin, chirurgien, officier de santé ou d'un vétérinaire breveté. Cette prescription doit être signée, datée et énoncer en toutes lettres la dose desdites substances ainsi que le mode d'administration du médicament.

ART. 6.—Les pharmaciens transcriront les dites prescriptions avec les indications qui précèdent, sur un registre établi dans la forme déterminée par le paragraphe 1 de l'article 3. Ces transcriptions devront être faites de suite et sans aucun blanc. Les pharmaciens ne rendront les prescriptions que revêtues de leur cachet, et après y avoir indiqué le jour où les substances auront été livrées ainsi que le numéro d'ordre de la transcription sur le registre. Le dit registre sera conservé pendant vingt ans au moins, et devra être représenté à toute réquisition de l'autorité.

ART. 7.—Avant de délivrer la préparation médicale, le pharmacien y apposera une étiquette indiquant son nom et son domicile, et rappelant la destination interne ou externe du médicament.

ART. 8.—L'arsenic et ses composés ne pourront être vendus, pour d'autres usages que la médecine, que combinés avec d'autres substances. Les formules de ces préparations seront arrêtées sous l'application de notre Ministre secrétaire d'Etat de l'Agriculture et du Commerce, savoir: pour le traitement des animaux domestiques, par le Conseil des professeurs de l'école royale vétérinaire d'Alfort; pour la destruction des animaux nuisibles et pour la conservation des peaux et objets d'histoire naturelle, par l'école de pharmacie.

ART. 9.—Les préparations mentionnées dans l'article précédent ne pourront être vendues ou délivrées que par les pharmaciens, et seulement à des personnes connues et domiciliées. Les quantités livrées, ainsi que le nom et le domicile des acheteurs, seront inscrits sur le registre spécial, dont la tenue est prescrite par l'article 6.

ART. 10.—La vente et l'emploi de l'arsenic et de ses composés sont interdits pour le chaulage des grains, l'embaumement des corps et la destruction des insectes.

TITRE III.

DISPOSITIONS GÉNÉRALES.

ART. 11.—Les substances vénéneuses doivent toujours être tenues, par les commerçants, fabricants, manufacturiers et pharmaciens, dans un endroit sûr et fermé à clef.

ART. 12.—L'expédition, l'emballage, le transport, l'emmagasinage et l'emploi doivent être effectués par les expéditeurs, voituriers, commerçants et manufacturiers, avec les précautions nécessaires pour prévenir tout accident. Les fûts, récipients ou enveloppes ayant servi directement à contenir les substances vénéneuses ne pourront recevoir aucune autre destination.

ART. 13.—A Paris et dans l'étendue du ressort de la préfecture de police, les déclarations prescrites par l'article 1 seront faites devant le préfet de police.

ART. 14.—Indépendamment des visites qui doivent être faites en vertu de la loi du 21 germinal an 11, les maires ou commissaires de police assistés, s'il y a lieu, d'un docteur en médecine désigné par le préfet s'assureront de l'exécution des dispositions de la présente ordonnance. Ils visiteront, à cet effet, les officines de pharmaciens, les boutiques et magasins de commerçants et manufacturiers vendant ou employant les dites substances. Ils se feront représenter les registres mentionnés dans les articles 1, 3, 4 et constateront les contraventions. Leurs procès-verbaux seront transmis au procureur du roi, pour l'application des peines prononcées par l'article 1 de la loi du 19 juillet 1815.

8 juillet 1850.

Décret relatif à la vente des substances vénéneuses.

ART. 1.—Le tableau des substances vénéneuses, annexé à l'ordonnance du 29 octobre 1846, est remplacé par le tableau joint au présent décret.

ART. 2.—Dans les visites spéciales, prescrites par l'article 14 de l'ordonnance du 29 octobre 1846, les maires ou commissaires de police seront assistés, s'il y a lieu, soit d'un docteur en médecine, soit de deux professeurs d'une école de pharmacie, soit d'un membre du jury médical et d'un des pharmaciens adjoints à ce jury désignés par le préfet.

TABLEAU

des substances vénéneuses à annexer au décret du 8 juillet 1850.

Acide cyanhydrique.—Alcaloïdes végétaux, vénéneux et leurs sels.—Arsenic et ses préparations.—Belladone, extrait et teinture.—Cantharides entières, poudres et extrait.—Chloroforme.—Ciguë, extrait et teinture.—Cyanure de mercure.—Cyanure de potassium.—Digitale, extrait et teinture.—Emétique.—Jusquiame, extrait et teinture.—Nicotine.—Nitrates de mercure.—*Opium et son extrait.*—Phosphore.—Seigle ergoté.—Stramonium, extrait et teinture.—Sublimé corrosif.

Pièce No. 18.

EXTRAIT du Journal Officiel de la République Française No. 269 du 3 octobre 1908, p. 6813.

Décret portant règlement d'administration publique pour la vente, l'achat et l'emploi de l'opium et de ses extraits.

LE PRESIDENT DE LA REPUBLIQUE FRANCAISE.

Sur le rapport du Président du Conseil, Ministre de l'intérieur,

Vu la loi du 21 germinal de l'an XI ;

Vu la loi du 19 juillet 1845, et notamment l'article 1 ainsi conçu : "Les contraventions aux ordonnances royales portant règlement d'administration publique sur la vente, l'achat et l'emploi des substances vénéneuses sont punies d'une amende de 100 à 3,000 francs et d'un emprisonnement de six jours à deux mois, sauf application, s'il y a lieu, de l'article 463 du code pénal. Dans tous les cas, les tribunaux pourront prononcer la confiscation des substances saisies en contravention";

Vu l'ordonnance du 29 octobre 1846, rendue pour l'exécution de la loi ci-dessus visée, et le décret du 8 juillet 1850 ;

Vu la loi du 25 juin 1908, modifiant les articles 29, 30 et 31 de la loi susvisée du 21 germinal de l'an XI et le décret en date du 5 août 1908, portant règlement d'administration publique pour l'exécution de la dite loi ;

Vu les avis du Conseil Supérieur d'hygiène publique de France ;
Vu l'avis du garde des sceaux, Ministre de la Justice et des Cultes ;
Vu les avis des ministres des Finances et de l'Agriculture ;
Le Conseil d'Etat entendu.

DÉCRETE :

CHAPITRE I.

DE L'IMPORTATION DE L'OPIMUM.

ART. 1.—Les importateurs d'opium soit brut, soit officinal ou de ses extraits, sont tenus de prendre au bureau de douane par lequel doit avoir lieu l'introduction un acquit-à-caution indiquant les quantités importées ainsi que le nom et le lieu de résidence du ou des destinataires.

Cet acquit-à-caution doit être rapporté dans un délai de trois mois revêtu d'un certificat de décharge de l'autorité municipale du lieu de résidence du ou des destinataires, sous peine de l'application de l'article 1 de la loi du 19 juillet 1845.

ART. 2.—L'importateur doit tenir un registre spécial, exclusivement affecté à la vente de l'opium et de ses extraits.

Il y inscrit, aussitôt après la prise en charge, la quantité reçue.

CHAPITRE II.

DE LA VENTE AUX COMMERCANTS EN GROS, INDUSTRIELS OU CHIMISTES, ET AUX PHARMACIENS, ET DE LA VENTE DE L'OPIMUM OFFICINAL PAR LES PHARMACIENS.

ART. 3.—Aucune quantité ne peut être vendue par l'importateur d'opium exotique ou par le producteur d'opium indigène que soit à des commerçants en gros, à des industriels ou des chimistes pour le transformer en opium officinal ou pour en extraire les alcaloïdes, soit à des pharmaciens pour le traitement des maladies de l'homme ou des animaux, et sous les conditions suivantes :

ART. 4.—Si la vente est faite à un commerçant ou à un industriel, la responsabilité du vendeur n'est dégagée qu'après que : 1° l'acheteur lui aura justifié qu'il a effectué la déclaration prescrite par l'article 1 de l'ordonnance du 29 octobre, 1846 ; 2° que cet acheteur lui aura remis une commande écrite et signée, énonçant en toutes lettres la quantité demandée ; 3° qu'il aura porté cette opération sur son registre en y joignant la commande.

Dans le cas où la commande est faite en vue d'une expédition à l'étranger, il est justifié de la sortie de France par un certificat qui est délivré par la douane et qui demeure annexé au registre prescrit par l'article 2.

ART. 5.—Aussitôt après la livraison, l'acheteur en inscrit l'importance sur le registre spécial à l'opium qu'il doit tenir de la même façon que l'importateur.

Aucune revente ne peut être opérée par lui qu'au profit de l'une des personnes et sous les conditions spécifiées à l'article précédent.

ART. 6.—Est assimilée à la vente faite à un industriel ou à un chimiste, et entraîne de part et d'autre les mêmes obligations, la cession d'opium brut à un pharmacien qui entend fabriquer lui-même l'opium officinal ou les alcaloïdes qu'il emploie. L'opium brut livré dans ces conditions ne peut jamais être revendu par le pharmacien. Si la vente a pour objet exclusif l'opium officinal ou ses extraits, le vendeur n'a, pour sa décharge, à exiger que la commande écrite de la quantité achetée.

Il est immédiatement passé écriture de cette opération sur les registres du vendeur et du pharmacien.

ART. 7.—L'opium officinal et ses extraits ne peuvent être vendus par les pharmaciens que pour l'usage de la médecine.

CHAPITRE II.

DISPOSITIONS GÉNÉRALES.

ART. 8.—En dehors du cas prévu par le précédent article, toute cession d'opium ou de ses extraits, même à titre gratuit, au profit de personnes autres que celles ci-dessus désignées ou à ces personnes, mais pour un emploi autre que l'un de ceux ci-dessus spécifiés, est interdite et entraîne application des peines prévues à l'article 1 de la loi du 19 juillet 1845.

Il est également interdit, sous les mêmes peines, de favoriser la détention et l'emploi prohibés d'opium en consentant l'usage d'un local ou pour tout autre moyen.

ART. 9.—L'opium et ses extraits doivent être tenus par les commerçants en gros, industriels et pharmaciens dans un lieu sûr, placé sous leur surveillance et fermé à clé.
Toute quantité trouvée en dehors sera saisie sur procès-verbal.

ART. 10.—Les registres spéciaux exclusivement affectés à la vente, à l'achat et à l'emploi de l'opium et de ses extraits doivent être cotés et paraphés par le Maire ou le Commissaire de police. Les inscriptions y sont faites de suite, sans aucun blanc, rature ni surcharge.

Les dits registres doivent être conservés pendant dix ans, pour être représentés à toute réquisition de l'autorité.

ART. 11.—Concurremment avec les Inspecteurs qui procéderont aux visites prescrites par les articles 29, 30 et 31 de la loi du 21 germinal de l'an XI, modifiés par la loi du 25 juin 1908, les maires et les Commissaires de police devront veiller à l'exécution des dispositions du présent décret.

Ils visiteront, à cet effet, avec l'assistance soit de l'Inspecteur institué par l'article 2 du décret en date du 5 août 1908, soit, à son défaut, d'un chimiste désigné par le préfet, les officines des pharmaciens, les dépôts de médicaments tenus par les médecins et les vétérinaires, les magasins des commerçants en gros et les laboratoires des industriels et des chimistes vendant ou employant l'opium, et s'assureront que leurs établissements sont régulièrement ouverts en exigeant la présentation de l'extrait de la déclaration prescrite par l'article 1 de l'ordonnance du 29 octobre 1846.

Si cette déclaration n'a pas été faite, ils procéderont à la fermeture immédiate du débit clandestin et à la saisie des quantités d'opium qu'il renferme.

Si la justification est produite, ils s'assureront que les registres prescrits aux articles 2, 4 et 5 sont régulièrement tenus et que leurs énonciations concordent avec les quantités existantes. Ils constateront les déficits ou les excédents. Leurs procès-verbaux seront transmis au Procureur de la République pour l'application des peines prononcées par l'article 1 de la loi du 19 juillet 1845.

ART. 12.—Sont applicables à la vente, à l'achat et à l'emploi de l'opium toutes les dispositions de l'ordonnance du 29 octobre 1846, auxquelles il n'est point dérogé par le présent règlement.

ART. 13.—Les Ministres de l'Intérieur, de la Justice, des Finances et de l'Agriculture sont chargés, chacun en ce qui le concerne, de l'exécution du présent décret, qui sera publié au Journal Officiel et inséré au Bulletin des lois.

Fait à Rambouillet, le 1er octobre 1908.

Signé : A. FALLIÈRES.

Par le Président de la République :

Le Président du Conseil, Ministre de l'Intérieur,
Signé : CLEMENCEAU.

Le Garde des Sceaux,

QUESTIONS PUT BY THE CHINESE DELEGATION.

B.—TO THE FRENCH DELEGATES.

1.—Can the French Delegates supply trustworthy statistics giving the number of opium smokers and the daily average consumption per smoker at Kwangchouwan?

2.—Can the French Delegates supply a table, such as is supplied by the British Memorandum, page 3, giving the amount of opium imported at Kwangchouwan during the past five years and figures showing how the same was disposed of?

Commission Internationale de l'Opium.

Questions posées par la Délégation chinoise à la Délégation française au sujet du Territoire de Kouan-tchéou-ouan.

1°.—Les délégués français pourraient-ils fournir des statistiques sérieuses montrant le nombre des fumeurs et leur consommation journalière moyenne à Kouan-tchéou-ouan?

Reponse.—Les fumeurs n'étant pas enregistrés dans le territoire de Kouan-tchéou-ouan, il est impossible d'obtenir des chiffres absolument certains.

(a) *Nombre et pourcentage des fumeurs*: Il faut estimer à 7,000 au minimum le nombre des fumeurs du Territoire de Kouan-tchéou-ouan, soit 20% environ des 35,000 adultes, ou 5% de la population totale estimée à 140,000 habitants.

(b) *Consommation moyenne journalière*: La consommation moyenne journalière *minima* de l'opium préparé ou chandoo peut être estimée à environ tael (poids) 0.04 par individu: soit pour l'ensemble d'une journée de 7,000 fumeurs une consommation de 280 taels; soit 8,400 taels par mois ou 100,800 par an. Ce total représenterait le rendement de 150,000 taels d'opium brut par an, et si ce chiffre n'est pas atteint par les ventes effectuées par la Société fermière (en 1907 et 1908 elles n'ont pas dépassé 40,000 taels d'opium préparé ou 60,000 d'opium brut), la différence doit être attribuée à la situation géographique du territoire d'où résulte une contrebande intense.

2^e.—Les délégués français pourraient-ils fournir un tableau semblable à celui du Memorandum britannique, page 3, montrant la quantité d'opium importée à Kouan-tchéou-ouan durant les 5 dernières années, et quel en a été l'emploi final?

Réponse:—Tableau établi pour la période du 1 janvier 1904 au 31 décembre 1909:

Annés.	Importation d'opium brut à Kouan-tchéou-ouan par vapeurs	Exportation d'opium brut de Kouan-tchéou-ouan en Chine	Quantité d'opium brut consommée dans le territoire de Kouan-tchéou-ouan
1904	1,050,000 taels	908,000 taels	142,000 taels
1905	605,200 „	507,900 „	97,300 „
1906	178,200 „	149,500 „	28,500 „
1907	374,000 „	314,500 „	60,000 „
1908	394,000 „	334,000 „	60,000 „

The German Empire and Kiaochow.

REPORT OF THE GERMAN DELEGATES TO THE INTERNATIONAL OPIUM COMMISSION.

PART I.—THE GERMAN EMPIRE.

1.—*The Imperial Ordinance of the 22nd of October 1901, regarding the sale of medicines* (see Reichsgesetzblatt 1901, page 380).

According to §1 certain preparations as solid, or liquid extracts, dry and liquid mixtures, solutions, tabloids, pills, plasters, ointments, etc., shall, *for medical purposes*, only be sold by apothecaries. Paragraph 2 provides that opium, its alkaloids and their salts and other derivatives as well as *their* salts shall, *for medical purposes*, only be sold by apothecaries. These provisions do not apply to wholesale dealers nor to sales to apothecaries and public institutes serving scientific research or instructive purposes (§3).

2.—*The Regulations regarding the sale of certain powerful medicines and the condition and designation of receptacles in chemist's shops* (see Veröffentlichungen des Kaiserlichen Gesundheitsamts 1896, page 445 and 1898, page 380) have been approved by the Federal Council (Bundesrat) and were uniformly published by all the Federal States.

According to §1 opium, extractum opii, tinctura opii crocata, tinctura opii simplex, pulvis ipecacuanhae opiatus, morphine and its salts and other preparations containing these drugs and mixtures shall only be delivered on a written prescription showing the date and the signature of a physician, a dental or a veterinary surgeon. In certain cases—if for instance solutions of morphine and its salts are required for subcutaneous injection—a new prescription has to be produced for each individual dose (§4). Without prescription may be dispensed:

(a) opium if contained in plasters and ointments;

(b) opium extract if contained in ointments;

(c) tinctura opii simplex and crocata in liquid mixtures not containing more than 10 per cent. of the tincture.

3.—*The Medicine Code for the German Empire* (Arzneibuch für das Deutsche Reich 4. Ausgabe 1900) contains descriptions of the various medicines and shows the so-called maximum doses for adults. It provides that for medical purposes only opium from Asia Minor containing 10 to 12½ per cent. morphine shall be used. Opium (including extractum opii, tinctura opii crocata, tinctura opii simplex, pulvis ipecacuanhae opiatus) and morphinum hydrochloricum shall, in chemist's shops, be kept separate from other medicines and be handled with care.

4.—*The Regulations regarding the sale of poisons* (see Veröffentlichungen des Kaiserlichen Gesundheitsamts 1894, page 913, 1901, page 598 and 1906, page 259) have been approved by the Federal Council and were uniformly published by all the Federal States. These regulations contain provisions for the sale of opium and morphine and their preparations *for other than medical purposes*. Articles of this kind shall be stored in systematic order and be kept separate from other goods, especially from provisions (§2). The receptacles shall be distinctly labelled with the name of the article and also with the indication "poison." Wholesale dealers may apply other means of designation provided that the articles are rendered distinguishable (§4). Receptacles and utensils used for such articles as scales, mortars, spoons, etc., shall be clearly marked with the name "poison" (§8). Poisons shall be

sold only to reliable persons for lawful purposes. A certificate from the police has to be produced in case of uncertainty as to the purpose of the buyer (§12). Poisons shall be sold only against receipt from the purchaser and shall be entered in the so-called poison book (§11 and §13). Wholesale dealers may effect sales to retail dealers, to manufacturers or to public institutes serving scientific research or instructive purposes *without* such receipts or bookings provided that they are able to prove to whom the articles have been sold (§13 section 4 §11 section 2).

In most of the Federal States the sale of poisons can be carried on only by persons holding a license.

5.—According to §367 of the *Penal Code for the German Empire* any person selling medicines and poisons contrary to the laws and regulations shall be liable to a maximum fine of 150 Marks.

PART II.—KIAOCHOW.

1.—*Ordinance regarding Opium* (See *Amtsblatt für das Deutsche Kiautschou Gebiet* 1902, No. 14).

In substitution of the ordinance of the 23rd of January 1900 regarding the importation and the control of opium and of the regulations made the 23rd of January 1900 and the 15th of September 1900 with regard to the consumption of opium in the German Protectorate, be it enacted to take effect from the 1st of April 1902 as follows:

1. *General Provisions.*

§1

The cultivation of the poppy is prohibited in the protectorate. Any poppy grown contrary to this provision shall be destroyed.

§2

Opium shall only be imported in the original packages. The importation in quantities less than one chest and the importation of prepared opium is prohibited.

Any opium imported by sea shall forthwith be reported to the Custom House upon arrival of the ship. The Custom House officer shall control the removal of the opium to the bonded warehouse and he shall be authorized to stop suspicious goods for examination. The captain is bound to facilitate the examination as far as possible.

Importations by land shall only be made by railway as fast freight covered by a bill of lading. Any other manner of importation of opium by land, especially as personal luggage is prohibited. The railway company shall report any importation of opium to the Custom House officer who shall control the removal of the same to the bonded warehouse.

§3

An Import duty of *Hk.Tls.* 110 per picul shall be collected on foreign opium and of *Hk.Tls.* 60 per picul on native opium* imported for consumption in the German Protectorate. On payment of the duty the packages shall be stamped by the Custom House officer, whereupon it shall be lawful for any importer to retail the opium to licensed keepers of divans, the sale being effected by a delivery order on the bonded warehouse.

For the consumption of those wishing to smoke at their homes (i.e., private smokers) the opium shall, under the supervision of the Government and of the Custom House, be prepared, packed in tins and retailed to dealers holding a special license.

2. *Special Provisions.*

§4

Any person wishing to open an opium divan shall first obtain a license. Any divan keeper holding such license shall be allowed to buy and to prepare opium and to sell it for immediate use. It is unlawful for any divan keeper to sell opium for use outside the divan.

* Since raised to *Tls.* 115 per picul.

§5

Opium from bonded warehouses shall be delivered to divan keepers and to retail dealers producing a license and a delivery order from the importer. The delivery order shall specify the quantity of opium and the name of the divan keeper or the retail dealer.

§6

The delivery order shall be retained at the bonded warehouse and the contents thereof shall be entered in a book showing at any time the number of chests stored at the warehouse and how and to whom they were disposed of. The Custom House officer shall note on the back of the license the quantity removed from the warehouse.

§7

For every license granted for keeping a divan an annual tax shall be collected, the amount of which shall be calculated according to the number of the lamps. The tax up to 10 lamps shall be \$10, up to 20 lamps \$20 and so on. An additional tax of \$0.50 shall be collected for each lamp on the first of every month.

§8

Any divan keeper shall guarantee by two reliable sureties being either shopkeepers or landowners.

- (a) that only opium bought from the bonded warehouse and bearing the official stamp be prepared on his premises;
- (b) that only *prepared* opium for immediate use in the divan be sold on his premises;
- (c) that a register be kept showing the purchases and the consumption.

§9

Opium divans must display a special signboard.

A license shall be granted under the following conditions:—

- (a) that opium shall be prepared under the supervision of the opium official to whom the date fixed for the boiling shall be reported unless special dates for boiling have been fixed;
- (b) that licenses are not transferable and are good only for the locality therein mentioned. Permission shall be first obtained from the opium official in case a change of the location is intended;
- (c) that adulteration of the opium is prohibited;
- (d) that the premises and the divan shall be closed at midnight; that, however, the divan shall not be closed up to that hour as long as guests are in the divan;
- (e) that an opium divan shall be open at all times to the inspection of the opium official and of the police. The divan keeper shall not sell or furnish opium to the Chinese members of the Police force;
- (f) that women and children shall not be admitted;
- (g) that no disturbance or nuisance shall be allowed on the premises;
- (h) that precautions shall be taken against fire. The doors must open outward;
- (i) that lamps and other utensils shall not be removed from the premises for outside use;
- (k) that the stamped wrappers enveloping the opium shall be retained and delivered to inspecting opium official;
- (l) that the instructions of the opium official shall be observed;
- (m) that the divan keeper shall be responsible for the proper management of his divan. In case he should leave or fall sick, he shall appoint a representative and report the same to the Chinese office of the Yamên. The divan keeper is responsible for fines imposed on his representative or other persons in his employ. Special reference shall be made to this responsibility in the judgment or in the summary decision imposing a fine.

§10

Any private smoker, that is a smoker who wishes to smoke at home, shall first take out a license for each lamp. Upon delivery of such license a fee of \$0.50 per lamp shall be collected payable quarterly in advance. It is unlawful for private smokers to buy or to keep or to boil raw opium. They must buy prepared opium only from the retail dealers holding licenses for the sale of opium prepared under official supervision.

§11

Licenses for private smokers shall not be transferable. Private smokers shall not sell any opium or loan either licenses or lamps or other smoking utensils.

§12

Any private smoker when taking out a license shall make known his residence. Any change of residence shall be reported in due time to the Chinese office of the Yamên. The licenses shall be handed in to that office for renewal or extension some days before their expiration.

§13

Whenever a licensee wishes to give up his license he has to return it to the Yamên with a statement to that end.

§14

Every person who wishes to purchase opium at the licensed retail dealer's shall produce his license. The quantity and quality of the opium sold and the date of the sale shall be specified upon the license.

3. *Penalties.*

§15

Any opium imported by land contrary to the provisions of §2 is liable to confiscation. The offender shall, at the same time, be liable to a fine the amount of which shall be five times the value of the opium unlawfully imported; but the amount of said fine shall not be less than \$100. Any opium imported by sea contrary to the provisions of §2 shall be liable to confiscation. The captain shall be liable to a fine the amount of which shall be five times the value of the opium unlawfully imported; but the amount of said fine shall not be less than \$500. The ship shall be liable for the penalty. In default of payment an offender is liable to imprisonment for a term not exceeding three months.

§16

The keeper of a divan or a private smoker or any other person, who shall have in his possession any opium in contravention of §3 shall, if the provisions of §15 do not apply to the case, be liable to the penalties mentioned in §15, excepting that the minimum amount shall be \$50.

§17

Any person filling the opium tins, officially labelled, with other preparations than those sold by the licensed retail dealers, shall be liable to the fine mentioned in §16.

§18

Any license may be revoked by order of the Civil Commissioner, if the holder has been punished for contravention of this ordinance or if he has proved unreliable or if he does not comply with the special regulations contained in this ordinance, or with the orders of the opium official. In lieu of revoking the license the Civil Commissioner may fix a fine not exceeding \$50. No appeal shall be admitted against any revocation of a license or any fine fixed by the Civil Commissioner.

Tsingtau, the 11th of March 1902.

THE IMPERIAL GOVERNOR
Truppel.

2.—Extracts from a *contract between the Governor of Kiaochow and the Chinese firm Kung ho tchang* granting the latter the license for the sale of prepared opium within the protectorate of Kiaochow :

§1

The firm shall not take more raw opium from the bonded warehouse than is required for each individual boiling day.

§2

Three qualities of opium shall be prepared:

(a) pure Indian opium ;

(b) a mixture containing $\frac{2}{3}$ Indian and $\frac{1}{3}$ native opium;

(c) a mixture containing $\frac{1}{5}$ Indian and $\frac{4}{5}$ native opium.

Each mixture may contain the usual amount of dross derived from the corresponding quality of opium.

§3

The boiling of opium and the packing of the tins shall take place under official supervision.

§4

The tins shall be provided with an official label showing the quantity, quality and the price.

Prepared opium shall only be sold to persons holding a license for private smoking or for keeping a divan. The sales shall at any time be specified upon the licenses.

§5

The opium shall be retailed in tins of $\frac{1}{2}$, 1, 2, 5 and 10 liang net. The prices shall not be higher than \$1.50 per liang for 1st quality, \$1.25 per liang for 2nd quality, and \$1 per liang for 3rd quality.

§6

The firm shall keep a register in such form as the Governor may require, showing its sales and its stock.

§7

All receptacles used for the opium shall be adjusted to standard weight. Scales and weights shall first be examined by a Government official.

§8, §9

contain provisions regarding the powers of the opium official and the guarantee of the firm for fulfilment of the contract.

§10

The license is granted for one year ending on the 31st of May 1909. The annual license fee is \$500 payable in advance.

SUPPLEMENT TO THE REPORT OF THE GERMAN DELEGATES TO THE
INTERNATIONAL OPIUM COMMISSION.

PART I.—THE GERMAN EMPIRE.

1. *Regulations.*

THE poppy (*papaver somniferum*) is grown in Germany for the sake of its seed which is used in bakeries, and for the production of oil; but opium is not produced from it to any extent worth mentioning. The fresh capsules are collected and dried and then used for medicinal purposes, but only to a small extent. No special laws exist regarding the cultivation and the manufacture of opium. The importation of opium and morphine is duty free. No taxes of any kind are levied thereon.

The *sale* of opium and morphine is governed by the following laws and regulations:—

(a) The Ordinance of the 22nd of October 1901 regarding the sale of medicines (see Reichsgesetzblatt 1901, page 380);

(b) The Regulations of 1896 and 1898 regarding the sale of certain powerful medicines and the condition and designation of receptacles in chemist's shops (see Veröffentlichungen des Kaiserlichen Gesundheitsamts 1896, page 445 and 1898, page 380);

(c) The Medicine Code for the German Empire (*Arzneibuch für das Deutsche Reich*, 4. Ausgabe 1900);

(d) The Regulations of 1894, 1901 and 1906 (see Veröffentlichungen des Kaiserlichen Gesundheitsamts 1894, page 913, 1901, page 598 and 1906, page 259) regarding the sale of poisons.

The principal provisions of these laws and regulations are—

- 1.—For medical purposes opium and its derivatives shall only be sold by apothecaries.
- 2.—Opium and most of its derivatives can only be obtained through a physician's prescription for each individual dose.
- 3.—For other than medical purposes opium and its derivatives may be sold by any person holding a license. Certain conditions have to be observed.
- 4.—Any person selling opium and its derivatives contrary to the laws and regulations shall be liable to a maximum fine of 150 Marks.

2. *Importations.*

During the years 1901 to 1906 were imported:

	Quantity 1000 kg.	Value 1000 M.
1901	34.7	590
1902	68.2	921
1903	39.5	632
1904	67.6	1,014
1905	68.7	1,305
1906	74.3	1,437

The principal importations are from the following countries:—

	1901	1902	1903	1904	1905	1906
	Quantity in 1000 kg.					
France	0.1	—	0.3	10.8	22.7	7.6
Great Britain	9.0	9.4	8.1	0.1	5.5	4.0
Turkey in Europe . . .	5.5	10.9	9.9	3.2	14.8	3.6
Turkey in Asia	18.9	39.4	13.2	38.1	24.7	40.3

The figures for 1907 and 1908 are not yet at hand.

3. *Exportations.*

During the years 1901 to 1906 were exported:

	Quantity 1000 kg.	Value 1000 M.
1901	3.5	70
1902	3.7	65
1903	11.5	219
1904	11.6	197
1905	13.3	279
1906	22.2	449

From these quantities were exported to
the United States
of America

Austria-
Hungary

Russia

	Quantity in 1000 kg.		
1901	—	0.4	1.5
1902	—	0.4	1.8
1903	7.0	0.3	1.9
1904	6.4	0.4	2.1
1905	7.1	0.9	2.9
1906	12.3	—	1.6

The complete figures for the exportations during 1907 are not yet to hand. The exports to the United States of America amounted in 1907 to 19,600 kg.

PART II.—KIAOCHOW.

1. *Regulations.*

WHEN the territory of Kiaochow came under German administration, the poppy was grown to a considerable extent. Its cultivation, however, has since been prohibited. At present the cultivation, the importation and the sale of opium are governed by the ordinance of the 11th of March 1902 (see *Amtsblatt für das Deutsche Kiautschou Gebiet* 1902, No. 14) and a contract lately renewed with a Chinese retail dealer, the principal provisions of which are:—

1.—The cultivation of the poppy is prohibited.

2.—The importation of prepared opium is prohibited.

3.—Raw opium is to be imported in the original packages and in no smaller quantities than one chest. It shall be imported only by sea or by railway as fast freight and shall be kept in bonded warehouses. Any opium otherwise imported is liable to confiscation.

4.—The import duty on raw opium is collected by the Imperial Chinese Maritime Customs on the basis of the Chinese import tariff, viz., *Tls.* 115 per picul on native opium and *Tls.* 110 on foreign opium.

5.—From bonded warehouses opium shall be delivered only to licensed buyers upon delivery order from the importers. Licenses may be obtained by

(a) keepers of divans

(b) retail dealers.

6.—Keepers of divans holding licenses are allowed to buy and to prepare opium under official supervision and to sell it for immediate use only. It is unlawful for them to sell opium for use outside the divans.

7.—Retail dealers holding licenses are allowed to buy and to prepare opium under official supervision and to sell it to keepers of divans or to smokers for use at home (private smokers). The maximum retail prices are limited.

8.—Private smokers are not allowed to buy opium without licenses. It is unlawful for them to buy raw opium and have it prepared at home.

9.—Opium divans are compelled to close at midnight. Women and children are not admitted.

10.—License taxes for divan keepers are calculated according to the number of lamps. The tax up to 10 lamps is \$10, for more than 10 up to 20 lamps \$20 and so on. An additional tax of \$0.50 monthly is collected for each lamp.

11.—The license tax for private smokers is \$0.50 quarterly for each lamp.

12.—The only retail dealer holding a license at present has to pay \$500 annually.

13.—Any offender against the regulations regarding the importation of opium by land is liable to a fine the amount of which shall be five times the value of the opium unlawfully imported; but the amount of said fine shall not be less than \$100. In case of an unlawful importation by sea the captain of the ship is liable to a minimum fine of \$500.

14.—Any person in unlawful possession of opium is liable to the fine stated under No. 13 excepting that the minimum amount shall be \$50.

2. Importations.

The importations of opium are small and mainly for local consumption. The increasing quantities may be explained by the ever increasing number of the Chinese population. During the years 1904 to 1907 were imported and locally consumed:

	Native Picul.	Indian Picul.	Persian Picul.	Total Picul or kg.	
1904	98	9.57	1.2	108.77	6575.47
1905	122.50	9.12	—	131.62	7956.82
1906	125.42	9.63	—	135.05	8164.17
1907	133.34	10.54	—	143.88	8697.97

3. Use of Opium.

In November 1908 there existed in 37 localities 71 divans with 1,066 lamps; 389 private smokers had taken out licenses. Only one dealer holds a license for the sale of prepared opium. The number of opium smokers may be estimated at 3,150.* The adult Chinese population of the town district of Tsingtao numbers 29,788; the population of the country districts is estimated at 90,000. Therefore about 2.6 per cent would be opium smokers.

The following table shows the total revenue of the Colony and the revenue derived from opium during the years 1904 to 1907:—

4. Revenue.

	Total Revenue Marks.	Revenue derived from Opium Marks.	Percentage of Revenue derived from Opium to total Revenue.
1903/04	436,767	33,166	7.5
1904/05	740,786	40,708	5.4
1905/06	1,204,197	36,250	3
1906/07	1,546,489	20,665	1.3

5. Morphine.

Morphine is not manufactured in the Colony and can only be obtained through a physician's prescription.

* The calculation is based upon the consumption of opium in 1907. Opium is sold in retail by liang (=37.53 g.) 1660 liang are equal to one picul; therefore 230,208 liang were consumed in 1907. The daily consumption would consequently amount to 630.7 liang (=23670.17 g.). Average smokers use at least 0.2 liang (=7.5 g.) opium daily; accordingly 3150 persons would be opium smokers. Actually conditions are probably more favourable, as raw opium loses about 50 per cent. in weight by preparation. On the other hand it should be considered that opium dross is also smoked by the poorer class.

Regulations and Restrictions regarding Opium in Great Britain and its Possessions, etc.

PAPER I.—GREAT BRITAIN.

In Great Britain the importation and exportation of opium is not subject to any restriction under Customs law or departmental regulations and the only provision of the Pharmacy Act, 1868, which affects the exportation of the drug, is that it must be labelled "*Poison.*"

Under Section 17 of the above Act it is unlawful to sell opium either by wholesale or by retail, unless the box, bottle, vessel, wrapper, or cover, in which such opium is contained, be distinctly labelled with the name Opium and the word Poison and with the name and address of the seller of the poison, and any person selling opium otherwise than as above provided is liable to a penalty, on a summary conviction, not exceeding £5 for the first offence, and to a penalty not exceeding £10 for the second or any subsequent offence, and the person, on whose behalf any sale is made by any apprentice or servant, is deemed to be the seller; but the requirement that the label shall contain the name and address of the seller does not apply to opium to be exported from Great Britain by wholesale dealers nor to sales by wholesale to retail dealers in the ordinary course of wholesale dealing; nor do any provisions of Section 17 of the Pharmacy Act apply to any medicine supplied by a legally qualified apothecary to his patient nor to any poison when forming part of the ingredients of any medicine dispensed by a person registered under the Act, provided such medicine be labelled with the name and address of the seller and the ingredients thereof be entered, with the name of the person to whom it is sold and delivered, in a book to be kept by the seller for that purpose.

The non-adulteration of drugs (opium) is provided for by Sections 4-7 of "The Sale of Food and Drugs Act, 1875" and penalties are attached for wilful adulteration.

There are no special Police Regulations regarding the use of Opium in Great Britain. There are a number of Chinese boarding-houses for the accommodation of Chinese sailors; and, so far as London is concerned, they are under the supervision of the London County Council as lodging-houses. The Chinese smoke opium in the bedrooms of these houses, but the practice is rather on the decrease than otherwise.

The following Table gives the import into, the re-export from, and the net import of opium into Great Britain during the years 1904-08:—

Year.	Import.	Re-export.	Net Import.
	lbs.	lbs.	lbs.
1904	588,313	264,294	324,019
1905	542,096	249,277	292,819
1906	825,836	283,133	542,703
1907	850,398	397,383	453,015
1908	514,015	340,420	173,595
Average of 5 years	3,320,658 664,132	1,534,507 306,902	1,786,151 357,230

Appended are copies of "The Pharmacy Act, 1868," an Act to amend "The Pharmacy Act, 1868," and "The Sale of Food and Drugs Act, 1875."

PAPER II.—WEIHAIWEI.

Dealing in prepared opium in the territory of Weihaiwei is regulated by an Ordinance called the "Prepared Opium Ordinance, 1905." The preparation of raw opium for smoking and the sale of prepared opium are let to a "Farmer" for a term of years, and no prepared opium can be imported into the Weihaiwei territory except by the "Farmer," his licensees, or persons authorized in writing by the "Farmer" so to import. Excise officers maintained by the "Farmer" are appointed by the Government of the territory. Divans are licensed by the Government.

During the last five years the total import of foreign opium into Weihaiwei was 97 chests, and of native opium for the last two and a half years 112,000 Chinese ounces, while the quantity prepared annually by the "Farmer" amounted to about 80,000 Chinese ounces. In other words, the average annual import of foreign opium during the last five years was $19\frac{2}{3}$ chests and of native opium for the last two and a half years 44,800 Chinese ounces. The present number of divans in Weihaiwei is 18.

Appended is the Weihaiwei "Prepared Opium Ordinance, 1905."

PAPER III.—HONGKONG.

The trade, etc., in opium in Hongkong is regulated by Hongkong Ordinances, viz:—"The Raw Opium Ordinance, 1887," "The Prepared Opium Ordinance, 1891," and "The Prepared Opium Amendment Ordinances of 1906 and 1908."

The Raw Opium Ordinance of 1887 deals with the question of loose opium and the procedure to be adopted in the case of importation, possession, movement, and exportation of raw opium.

The Prepared Opium Ordinance of 1891 deals with the appointment, duties, offences, etc., of Excise Officers, the importation, preparation and sale of prepared and dross opium, the opening and licensing of opium divans, and the farming of the preparation and sale of prepared and dross opium.

The Prepared Opium Amendment Ordinance, 1908 prohibits the exportation of prepared opium to China and to French Indo-China except in small quantities for the personal use of passengers. The quantity for each passenger is limited to 5 mace for every day of duration of the voyage. The Ordinance repeals Section 41 (1) of "The Prepared Opium Ordinance, 1891" and substitutes the following:—"No person shall bring or have in his possession on board any ship,

(a) Which is bound for or about to proceed to Canton or Macao, any raw opium exceeding two taels in weight;

(b) Which is bound for or about to proceed to Macao, any prepared opium exceeding two taels in weight;

unless the same is entered on the manifest of the ship."

The opium farm was let on the 1st of March 1907 for a term of three years at a rental of \$121,000 a month. By the terms of his Agreement the farmer is allowed to boil a maximum of 5 chests of opium a day. There are 190 opium divans in the Colony, *i.e.*, one for every 1,047 of the Chinese adult male population.

The retail price of prepared opium at the present time per tael of 583.3 grains is to opium divans \$3.23 (say 5s. 6d.) and to the public \$3.48 (say 6s.). The minimum quantities sold to any one person are taels 0.047 of prepared opium and taels 0.07 of dross opium.

Appended are copies of the Ordinances mentioned above and of Regulations regarding divans.

Year.	Revenue of Colony		Per cent. of Opium to Total Revenue.	Opium.		
	Total.	Opium.		Imported.	Boiled by Farmer.	Exported.
	\$	\$		<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>
1904	6,849,048	1,946,830	28.42	45,937	725	43,859
1905	6,918,404	2,041,905	29.51	43,929	858½	42,068
1906	7,035,012	2,041,940	29.02	47,567	496½	47,479

1908	... *	1,453,860	... *	41,821	864	39,609

*Not yet known.

PAPER IV.—THE STRAITS SETTLEMENTS AND FEDERATED MALAY STATES.

In each of the Straits Settlements—Singapore, Penang and Malacca—the preparation, sale, import and export of prepared opium, and the purchase of opium dross are let to a "Farmer" for a term of three years in consideration of a monthly payment of a certain fixed sum. The leases of the three "farms" now current commenced on the 1st of January 1906 and expire on December 31 1909. The rights of the "Farmers" are regulated by Straits Settlements Ordinance No. XX of 1906, which is appended. The quality, sale, and price of prepared opium are controlled by Government by Rules made under Section 83 of this ordinance. A copy of these Rules is annexed. Shops for the retail of prepared and dross opium are licensed by the Government, the cost of a license being \$12 per annum. Opium-smoking divans with a license to retail prepared and dross opium are also licensed by the Government at an annual fee of from \$24 to \$36 according to neighbourhood.

The present price at which Chandu is retailed varies from \$3 to \$3.50 per tael (\$1 = 2s. 4d.; 1 tael = 583.3 grains).

The following tables give the import and export of opium into and from Singapore and Penang during the five years from 1902–06:—

SINGAPORE.

IMPORTS.

Year.	Indian.	Turkey.	Persian.	Total.	Net Import.
	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>
1902	11,508	25	928	12,461	2,022
1903	11,557	6	2,170	13,733	2,837
1904	10,546	15	524	11,085	1,553
1905	10,751	4	260	11,015	1,487
1906	10,003	4	77	10,084	1,352

There were, in addition, imports of $24\frac{1}{2}$ and $23\frac{1}{2}$ chests (each chest = 1,000 taels weight) of prepared opium in 1902 and 1903 respectively.

EXPORTS.

Year.	Indian.	Turkey.	Persian.	Total.
	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>
1902	9,932	21	486	10,439
1903	10,157	11	728	10,896
1904	9,082	17	433	9,532
1905	9,247	4	277	6,528
1906	8,627	4	101	8,732

There were, in addition, exports of 329, $316\frac{1}{2}$, $89\frac{1}{4}$, $68\frac{1}{2}$, and 59 chests (each chest = 1,000 taels weight) of prepared opium in 1902, 1903, 1904, 1905 and 1906 respectively.

PENANG.

IMPORTS.

Year.	Indian.	Turkey.	Persian.	Total.	Net Import.
	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>
1902	4,089	7	116	4,212	814½
1903	3,945	2	144	4,091	954¾
1904	2,506	—	141	2,647	365¾
1905	2,230	6	27	2,263	669½
1906	2,779	4	6	2,789	715

There were, in addition, imports of 3½ and 6½ chests (each chest=1,000 taels weight) of prepared opium in 1905 and 1906, respectively.

EXPORTS.

Year.	Indian.	Turkey.	Persian.	Total.
	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>	<i>Chests.</i>
1902	3,350½	7	40	3,397½
1903	3,117¼	2	17	3,136¼
1904	2,242¼	—	39	2,281¼
1905	1,570½	6	17	1,593½
1906	2,064	4	6	2,074

There were, in addition, exports of 284, 315, 239, 235 and 246 chests (each chest=1,000 taels weight) of prepared opium in 1902, 1903, 1904, 1905 and 1906, respectively.

FEDERATED MALAY STATES.

As regards the Federated Malay States of Perak, Selangor, and Negri Sembilan, the systems obtaining in them regarding opium are identical. Each of these three States is divided into coast and inland districts, and in Negri Sembilan the district contiguous to the Malacca boundary is treated for opium revenue purposes as though it were a coast district. In the inland districts there is an import duty of \$560 (\$1 = 2s. 4d.) per chest of 40 balls on raw opium levied by the Government and the Government issues licenses to prepare and deal in prepared opium.

For a license to manufacture and retail prepared opium for consumption on or off the premises the fee is \$60 per annum; to manufacture and retail prepared opium for consumption off the premises \$60; to retail prepared opium for consumption on the premises \$48; and to retail prepared opium for consumption off the premises \$24.

In the coast districts the revenue derived from opium consists of an import duty of \$560 per chest collected by the Government and the proceeds of a monopoly of prepared opium which is "farmed" for monthly sums to Syndicates known as Coast Chandu Farmers who have the exclusive right of preparing, selling, and licensing others to sell prepared opium within the coast districts of the various States. The maximum price at which prepared opium may be sold within the farm areas is prescribed by law and is at present \$2.30 per tael, *i.e.*, roughly twice the actual cost of the prepared opium and about three-quarters of the price within the Straits Settlements farm areas.

In the Eastern State of Pahang the import duty on opium is \$440 per chest; but, unlike the system which prevails in the Western States, its collection is leased to a Syndicate known as The Opium Import Duties Farmer. The Coast Chandu Farm system and the collection of fees on Chandu shop licenses in the inland districts obtain exactly as in the Western States. The whole of the exclusive rights leased by the Government of Pahang are let together to one Syndicate known as the General Farmer for a monthly farm rent.

All the farms of the Straits Settlements and Federated Malay States expire together on the 31st December 1909.

The following table gives the imports of opium into the Federated Malay States for the years 1902–1907:—

	<i>Chests.</i>		<i>Chests.</i>
1902.....	4,770		1905.....
1903.....	4,529		1906.....
1904.....	4,229		1907.....
			4,883

The various enactments dealing with opium and chandu (prepared opium) in the Federated Malay States are annexed.

Since the 1st of December 1908 the import duty upon opium throughout the Federated Malay States has been raised to \$1,200 per chest.

On the 19th of July 1907 the Governor of the Straits Settlements appointed a Commission of six members for the purpose of inquiring into—

(1) The extent to which excessive indulgence in the smoking of opium prevails in the Straits Settlements.

(2) Whether the smoking of opium—

(a) in moderation

(b) in excess

has increased in the Straits Settlements.

(3) The steps that should, in their opinion, be taken by the Government to minimize and eventually to eradicate the evils arising from the smoking of opium in the Straits Settlements, and the inquiry was later extended to the Federated Malay States.

The conclusions arrived at by the Commission and presented in a report dated the 15th June 1908 were as follows:—

We find that the vast majority of smokers indulge to an extent that may properly be called moderate, and that excessive indulgence occurs only in isolated instances.

We find that there has been no increase in the prevalence of the habit, and in this we include use in moderation and use in excess, during the past decade.

We do not find it proved that the evils arising from the use of opium have in any way increased during the past decade. We consider, however, that the circumstances surrounding the use of opium justify the Government in maintaining a closer and stricter control over it and we therefore recommend that the present system of farming the opium revenue be abolished and that a Government monopoly of the preparation and distribution of chandu be substituted.

We further consider that steps should be taken by the Government to suppress the use of opium in brothels.

We recommend that improvements should be made in the arrangements of existing opium-smoking shops, but we consider there is no necessity or justification for the abolition of such shops.

We recommend that the access of all women to licensed opium-shops be prohibited and we further recommend that the sale of chandu to all women and to children under 18 years of age be made an offence.

We consider that the price of chandu at present obtaining in the Straits Settlements is sufficiently prohibitive, but we are of opinion that the price in the Federated Malay States should be gradually raised to the price obtaining in the Colony.

Bishop Oldham, a member of the Commission, wrote the following note of dissent from the findings of the other Commissioners and the personal note also reproduced below.

Memorandum of Dissent by the Revd. Bishop W. F. Oldham, D.D.

FROM THE MAJORITY REPORT.

“In writing this note of dissent from the finds of the other Commissioners, I do not cite paragraphs or enter into details, but would briefly sum up my finds on the three questions asked:—

1.—Much evidence shows that the course of the opium user is from “playing with the pipe” occasionally, to the steady use, in which the tendency is to an increase of the daily dose. There is, from this time, pressure upon the individual’s money and time to minister to the appetite already fixed. At stated times every day the drug must be used, or the person be utterly unfit for work. Whether the dose be large or small unfitness for the daily task is

the penalty of omitting it. This, with the fact that, circumstances permitting, the dose tends to increase until it reaches large proportions, leads one to conclude that "moderation" in opium smoking does not exist.

2.—The implications of (1)—being noted—no dissent.

3.—I agree with all but the last paragraph, for which I would substitute:—

"We are of opinion that the price of chandu in the Federated Malay States should be gradually raised to the price obtaining in the Colony, and that as public opinion grows, and all classes demand further restriction, the Government department having the matter in charge should be empowered to increase the price of chandu, or adopt such other measures as may lead to the increased restriction and ultimate extinction of the opium traffic. Both in restriction and ultimate prohibition, Government action should not be permitted to lag behind Chinese public opinion.

(Signed) W. F. OLDHAM."

New York, U.S.A.,
27th July 1908.

PERSONAL NOTE BY THE REV. BISHOP W. F. OLDHAM, D.D.

"When asked to accept the appointment to the Commission on opium, I was told the conclusions would be reached in six months. The end of this period left the Commission far from concluding this work. I was therefore unable to meet with the other Commissioners when making their findings.

"I am obliged now, with regret and some hesitation, to express dissent from some conclusions reached, though I agree in the main with the practical measures outlined.

"And while wholly in sympathy with what is called the 'Anti-opium' view, I would earnestly advise against any sudden measures of repression which would outrun public opinion, disorganize the finances of the Colony, and work harm rather than good to a considerable body of users of opium who have acquired the habit and who steadfastly believe that their health would be sacrificed in any attempt to suddenly cease the use of the drug without ample provision for medical help.

"All the parties to the traffic which is now perceived, more or less clearly, not to be conducive to the public good, must patiently and intelligently find their way to better methods of restriction until by successive steps prohibition is reached. Haste and suddenness now are to be deprecated quite as much as lethargy and inaction.

(Signed) W. F. OLDHAM."

New York, U.S.A.,
27th July 1908.

A copy of the report referred to above is annexed.

PAPER V.—CEYLON.

On the 12th of June 1907 a Committee was appointed by the Government of Ceylon to enquire into and report upon the importation, sale, and consumption of opium in the Colony. The Committee reported on the 5th December 1907 and the following recommendations contained in the report were adopted by the Government and put in force from the 1st of January 1909:—

(1) That the present system of renting and licensing (in accordance with the Opium Ordinance 1899) be abandoned.

(2) That all opium-shops be closed on the expiration of existing licenses.

(3) That the importation, distribution, and sale of the crude drug be made a Government monopoly.

(4) That for every opium-shop closed the nearest Government dispensary be made available for the distribution of the drug to all habitual adult smokers of the same who may come forward to register their names for a certain quantity to be periodically given out and paid for in cash.

(The Government have further taken steps to ensure that the retailers of the drug have no interest of any kind in the quantity dispensed.)

(5) That the use of the drug, except for medical purposes, should be entirely prohibited after a definite period.

(6) That a system of careful inspection be introduced by the appointment of special officers under the direction of the principal civil medical officer.

At the time the committee was appointed there were 65 opium-shops in the island. There were no divans and the eating or smoking of opium in the shops was forbidden. Only raw opium was sold.

The imports of opium into Ceylon for the five years from 1902 to 1906 were as follows:—

	lbs.
1902.....	21,278
1903.....	21,500
1904.....	21,692
1905.....	20,082
1906.....	18,885

PAPER VI.—AUSTRALIA.

The Commonwealth of Australia was invited by the Colonial Office to send a delegate to the International Opium Commission at Shanghai, but preferred to send, for the information of the Commission, a report shewing what has been done with regard to the prohibition of the import of smoking opium into Australia. The Report shews that on the 19th of October 1905 a motion, proposed in the House of Representatives, "that in the opinion of this House the importation of opium for other than medicinal purposes should be prohibited" was agreed to unanimously, and in accordance with Section 52 (g) to the Commonwealth Customs Act 1901 which enacts that the following are prohibited imports "all goods the importation of which may be prohibited by proclamation," a proclamation dated the 29th December 1905 was issued by the Governor-General of the Commonwealth proclaiming that, from the 1st January 1906, the importation of opium, suitable for smoking, into Australia shall be prohibited absolutely, and that the importation of opium not suitable for smoking into Australia shall be prohibited unless such opium is imported in accordance with the following conditions and restrictions:—

(1) The opium shall only be imported for medicinal use, and by persons licensed, in accordance with this proclamation, to import opium.

(2) A license to import opium may be granted by the Collector of Customs for a State to any legally qualified medical practitioner or person lawfully carrying on business as a wholesale manufacturing chemist or druggist or pharmaceutical chemist.

(3) A license to import opium shall be for a period of one year, and may be renewed from time to time for a like period.

The Report, copy of which with various papers attached thereto is annexed, recites the steps taken to ensure compliance with the law and the position of the State laws in regard to opium-smoking. The powers of the Commonwealth Government, it asserts, are not sufficient to ensure the suppression of opium dens because the mere possession of the drug is not an offence against Commonwealth law; but it is intended to introduce into Parliament a measure to amend the Customs Act so as to make mere possession of the drug a highly punishable offence.

The position of the State Laws is as follows:—

NEW SOUTH WALES.

A Bill to control the opium traffic in New South Wales has been introduced into the Parliament of that State.

VICTORIA.

The "Opium Smoking Prohibition Act 1905," which came into operation on 1st May 1906, made it a penal offence (1) to smoke opium, or (2) to sell, deal or traffic in opium in any form suitable for smoking, or (3) to prepare or manufacture opium in any form suitable for smoking, or (4) to have in one's possession, order or disposition opium in any form suitable for smoking.

QUEENSLAND.

The question of introducing legislation on the matter is to receive the serious consideration of the Government of this State.

SOUTH AUSTRALIA.

Parliament passed an Act in 1905 similar to the Victorian Act.

TASMANIA.

The "Opium Smoking Prohibition Act 1906," dating from 1st January 1907, is similar to the Victorian Act.

WESTERN AUSTRALIA.

The Government is prepared to introduce a measure in similar terms to the Acts in force in Victoria, South Australia, and Tasmania.

To prevent the production of opium in Australia, the Commonwealth Government proposes to introduce a bill into Parliament to prevent the manufacture of opium by imposing a prohibitive excise duty.

The following Table gives the extent of the import of opium into the Commonwealth prior to the date of the prohibition:—

						lbs.
1901	(including opium for medicinal purposes)...	56,473
1902	do. do.	59,762
1903	(smoking opium only)	42,429
1904	do.	34,369
1905	do.	47,116

Regulations and Restrictions regarding Morphia, Morphine, and other Derivatives and Compounds of Opium in Great Britain and its Possessions, etc.

PAPER I.—GREAT BRITAIN.

Like opium, the import and export of morphia is not subject to any restrictions under Customs law or departmental regulations; but the Pharmacy Act, 1868 provides that on exportation by wholesale dealers it must be labelled "*Poison.*"

The same Act makes it unlawful to sell morphia, either by wholesale or retail, unless the receptacle in which it is contained is distinctly labelled with the name Morphia and the word Poison and to sell morphia to any person unknown to the seller unless introduced by some person known to the seller, and on every sale of morphia it is incumbent on the seller, before delivery, to make or cause to be made an entry in a book to be kept for that purpose giving date of sale, name and address of purchaser, the name Morphia and the quantity sold, and the purpose for which it is stated by the purchaser to be required, to which entry the signature of the purchaser and of the person, if any, who introduced him must be affixed. The penalty for infringement of this provision of the Act is a fine not exceeding £5 for the first offence and £10 for a second or subsequent offence; but the provision of the Act which requires that the label shall contain the name and address of the seller does not apply to exports by wholesale dealers nor to sales by wholesale to retail dealers in the ordinary course of wholesale dealing nor does any provision of the Act apply to any medicine supplied to a legally qualified apothecary to his patient nor to morphia when forming part of the ingredients of any medicine dispensed by a person registered under the Act provided such medicine is labelled with the name and address of the seller and the ingredients and name of the person is entered in the book provided for the purpose.

Adulteration is provided against by "The Sale of Food and Drugs Act, 1875."

PAPER II.—HONGKONG.

On the 23rd of September 1893 an Ordinance (The Morphine Ordinance, 1893) was enacted by the Governor of Hongkong for the suppression of the practice of injecting preparations of morphine by unqualified persons. It provides that any person, who shall administer morphine by injection to any other person, except in cases where the same has been prescribed by some duly qualified medical practitioner, shall, on conviction before a Magistrate, be liable in each case to a fine not exceeding \$50 or to imprisonment with or without hard labour not exceeding two months, and that any person, who shall, except in cases where morphine has been prescribed by some duly qualified medical practitioner, furnish morphine to any person, except to a duly qualified medical practitioner or to a chemist or druggist shall, on conviction before a Magistrate be liable to a like penalty. This is not applicable to morphine furnished for *bonâ fide* exportation. Copy of Ordinance annexed.

On the 28th of September 1904 an Ordinance was enacted making it lawful for the Governor-in-Council to grant licenses to suitable persons to import, prepare, manufacture or deal in compounds of opium and directing the opium farmer, to whom fixed licence fees and certain fixed royalties on imported compounds of opium for sale or use within the Colony were made payable under the Ordinance, to establish a bonded warehouse or warehouses for the use of dealers in compounds of opium imported for exportation from the Colony, and

an order was published in the Government Gazette of the 3rd March 1905 exempting certain named medicines from the provisions of the Ordinance. This Ordinance was repealed by the Prepared Opium Amendment Ordinance, 1906, which took its place, and, in addition to compounds of opium, embraced morphine (including morphia and all salts of morphine and any solution or preparation containing morphine).

The 1906 Ordinance provided for the issue of licences at \$25 each (to be awarded to the opium farmer) to persons importing for sale or use within the Colony, preparing, manufacturing or dealing in morphine and compounds of opium, and made it binding on importers whether for exportation from or for sale or use within the Colony to declare the amounts of their imports before the superintendent of imports and exports. It also fixed royalties payable to the opium farmer of \$30 per tael weight of morphine and \$3 per tael of opium imported for sale or use within the Colony, and it provides for bonded warehouses for the compulsory storage of morphine and compounds of opium intended for exportation from the Colony. Under the Prepared Opium Ordinance 1891, as amended by the Prepared Opium Amendment Ordinance 1906, an Order by the Governor-in-Council exempting named foreign medicines from the provisions of these Ordinances appeared in the Government Gazette of the 5th April 1907. Regulations for these bonded warehouses were published in the Government Gazette of the 8th November 1906, and amended Regulations were gazetted on the 18th January 1907.

On the 26th of June 1908, an Ordinance ("The Pharmacy Ordinance 1908") was enacted by the Governor-in-Council to provide for the registration of chemists and druggists and to regulate the sale of poisons. It is based on the Pharmacy Act of 1868. Nothing in this Ordinance affects the provisions of the Prepared Opium Ordinance 1891, the Morphine Ordinance 1893, and the Prepared Opium Amendment Ordinance 1906. The schedule of poisons annexed to the Ordinance contains "Preparations of Morphine." Various Regulations made under this Ordinance regarding applicants for registration under the Ordinance, the keeping, dispensing, and selling of poisons, issue of licences to wholesale dealers, and penalties for violation of the Regulations were published in the Government Gazette of the 21st August 1908.

Copies of all these Ordinances, Regulations, etc., are appended.

No returns of the import of morphine and compounds of opium were kept prior to 1906. The annexed table shows the quantities imported and exported since a record has existed.

MORPHINE.

Period	Import	Export	Local Consumption
Jan. to Dec. 1906	127,374.0 taels	94,058.2 taels	Nil.
" " 1907	116,335.5 "	113,588.0 "	"
" " 1908	84,641.2 "	109,549.5 "	"

COMPOUNDS OF OPIUM.

Period	Import	Export	Local Consumption
Jan. to Dec. 1906	129,682.90 taels	77,082.0 taels	52,600.9 taels.
" " 1907	184,602.82 "	184,602.82 "	67,759.3 "
" " 1908	128,074.65 "	128,074.65 "	32,508.9 "

PAPER III.—STRAITS SETTLEMENTS AND FEDERATED MALAY STATES.

In the Straits Settlements and Federated Malay States the importation, sale, and consumption of morphine, cocaine and any other drug declared by the Governor-in-Council to be deleterious are dealt with by the Deleterious Drugs Ordinance passed in 1907. A copy of the Straits Settlements Ordinance is attached. The use of these drugs is strictly limited to cases in which it is prescribed by a licensed medical practitioner; importation without the authority of the Principal civil medical officer is illegal as is also the possession of more than twelve doses by any person except a licensed medical practitioner or a licensed chemist and druggist.

PAPER IV.—CEYLON.

The Poisons Ordinance, 1901 regulates the sale of opium and its various preparations; but the Committee appointed to enquire into and report upon the importation, sale, and consumption of opium recommended that "opium and its preparations" should be transferred from the list under Regulation Section 9, Part II. to the list under Part I. of the Ordinance, thus making it obligatory that the purchaser is known to, or is introduced by, some person known to the seller, and that an entry is made of every sale and the purpose for which the drug is required. Again, in the Opium Ordinance, 1899 the word "Opium" is defined to "include any preparation in which opium forms a component part," so that morphia or morphine can be dealt with under the Ordinance.

Report on Opium and Morphia in Canada

OPIUM.

PART I, PAPER VIII.

In Canada the importation, manufacture and sale of opium for other than medicinal purposes is prohibited.

The prohibition Act was passed on July 20th 1908, but six months' grace was given to persons having opium for other than medicinal purposes in their possession, to dispose of the same by export, provided the opium, whether crude or powdered, was deposited in a Customs bonded warehouse for export under regulations established by the Minister of Customs.

Persons violating the provisions of the Act are guilty of an indictable offence and liable to imprisonment for three years, or to a penalty not exceeding one thousand dollars and not less than fifty dollars or to both.

Previous to the enactment of the aforementioned legislation, opium was imported into Canada, where it was prepared, sold and consumed by Chinese and others.

The following table gives the import of opium into Canada during the five fiscal years, 1903-04 to 1907-08, inclusive:—

Fiscal Years	Opium, crude		Opium prepared for smoking		Opium, powdered	
	lbs.	\$	lbs.	\$	lbs.	lbs.
July 1 1903 to June 30 1904	50,652	194,652	1	20	231	698
" 1 1904 " " 30 1905	45,526	185,217	224	574
" 1 1905 " " 30 1906	65,652	285,317	11,548	36,026
" 1 1906 " March 31 1907*	68,938	270,096	206	523
(9 months)						
April 1 1907 to March 31 1908	92,029	355,406	245	1,062
Total—(5 years, less 3 months)...	322,797	1,290,688	1	20	12,454	38,883

*The fiscal year was changed in 1907 so as to end on March 31, instead of on June 30.

The duty on opium at the time of the enactment of the measure to prohibit its importation for other than medicinal purposes was as follows:—

Opium, crude (the outer ball or covering to be duty free), per lb....	\$1.00
„ powdered, per lb.	1.35
„ prepared for smoking, per lb.	5.00

The following table shows the amount of revenue derived from duties on opium imported into Canada, as compared with the total revenue of the country, during the five fiscal years, 1903-04 to 1907-08, inclusive:—

Fiscal Year	Total Revenue	Revenue derived from Opium Imports
	\$	\$
July 1 1903 to June 30 1904	70,669,817	40,992
„ 1 1904 „ „ 30 1905	71,182,772	35,635
„ 1 1905 „ „ 30 1906	80,139,360	47,499
„ 1 1906 „ March 31 1907*	67,969,328	54,895
(9 months)		
April 1 1907 to March 31 1908	96,054,506	88,343
Total—(5 years, less 3 months)...	386,015,783	267,364

Appended are copies of the “Act to prohibit the importation, manufacture and sale of Opium for other than medicinal purposes,” and Regulations established by the Minister of Customs under the provisions of the said Act.

MORPHIA.

PART II, PAPER VI.

The Provinces of the Dominion have enacted measures safeguarding the sale of opium and its derivatives and compounds by classifying opium as a poison, and making it unlawful to sell poisons unless the person making such sale is registered as a licentiate of pharmacy under the provincial legislation respecting the sale of poisons, and unless the box, bottle, vessel, wrapper or cover in which such poison is contained is distinctly labelled with the name and address of the proprietor of the establishment in which such poison is sold. The sale of any such poison to any person unknown to the seller is prohibited unless the purchaser is introduced by some person known to the seller. An entry in a book of such sale is required, setting forth the date of sale, the name and address of the purchaser, the name and quantity of the article sold, the purpose for which it is stated by the purchaser to be required, and the name of the person, if any, who introduced him, and to this entry the signature of the purchaser must be affixed. The provisions in this and other particulars are similar to those of the Pharmacy Act of 1868 of Great Britain.

In addition to the Act to prohibit the importation, manufacture, and sale of opium for other than medicinal purposes, assented to on July 20 1908, the Parliament of Canada enacted on the same date an Act respecting Proprietary or Patent Medicines, which absolutely prohibits the manufacture, importing, exposing, selling, or offering for sale of any proprietary or patent medicine containing (a) cocaine or any of its salts or preparations; (b) alcohol in excess of the amount required as a solvent or preservative, or not containing sufficient medication to prevent its use as an alcoholic beverage, and (c) except under precautions specified

*The fiscal year was changed in 1907 so as to end on March 31, instead of on June 30.

any drug contained in an appended schedule the name of which is not conspicuously printed on, and an inseparable part of the label and wrapper of the bottle, box or other container. This Act further requires the registration of all importers and manufacturers of proprietary or patent medicines in Canada, and the labelling in accordance with the provisions of the Act of all such medicines intended for sale or distribution in the Dominion.

The imports of morphine into Canada during the five fiscal years, 1903-04 to 1907-08, inclusive, were as follows:

Fiscal Year	Quantity
July 1 1903 to June 30 1904	5,210 ounces.
„ 1 1904 „ „ 30 1905	5,949 „
„ 1 1905 „ „ 30 1906	5,441 „
„ 1 1906 „ March 31 1907*	1,523 „
(9 months)	
April 1 1907 to March 31 1908	1,506 „

* The fiscal year was changed in 1907 so as to end on March 31, instead of on June 30.

The export of morphine has been trifling, and is not separately indicated in official returns.

Memorandum on Opium in India

I.—PRODUCTION.

SYSTEM OF REGULATION OF PRODUCTION.

1.—The two main centres of opium production in India are—

(a) Bihar in the Province of Bengal, and the districts of the United Provinces of Agra and Oudh lying along the Gangetic Valley and north of it, the produce of which is termed *Bengal opium*, and

(b) a large number of Native States in the Central India and Rajputana Agencies the chief producing States being Gwalior, Indore and Bhopal in the former and Mewar in the latter.

The produce of these regions is known as *Malwa opium*, a term which is also applied to the produce of the Native State of Baroda and of the small British territory of Ajmer-Merwara.

(a) BENGAL.

2.—The production of Bengal opium is a Government monopoly and is carried on under the superintendence of the Opium Department. The department is divided into two Agencies: one for Bihar with headquarters at Patna, and one for the United Provinces with headquarters at Ghazipore.

3.—The cultivation of the poppy in the Bengal opium tract is regulated by Act No. XIII of 1857. It is permitted only under license, the total area to be sown being fixed by the Government from year to year. The cultivator, who receives advances when required to assist him in production, is bound to sell the whole of his outturn at a fixed rate to the Government. The crude opium so made over to the Opium Department is conveyed to the two Government factories, one at Patna and one at Ghazipore, and there manufactured into the finished article.

(b) MALWA.

4.—Malwa opium, as observed above, is practically entirely produced in Native States, and in those States its production is not under the control of the Indian Government.

AREA UNDER CULTIVATION AND AMOUNT PRODUCED.

(a) BENGAL.

5.—The total area under cultivation in recent years under the Bengal monopoly system is given with certain further particulars in Statement I. In 1906–07 nearly 1½ million cultivators obtained licenses; 564,000 acres were sown and yielded opium; and the produce amounted to more than 7½ million lbs.

(b) MALWA.

6.—The total area under poppy cultivation in the Malwa States cannot be given, as these States have no adequate system of survey and land records, and trustworthy statistics are therefore not obtainable. Certain returns, which must be accepted with reserve, are, however, supplied for the Central India and Rajputana Agencies, and these indicated in 1906–07 a total area under poppy cultivation of about 247,000 acres and a total production of 3¾ million lbs. For 1907–08 the corresponding figures were 192,000 acres and a little over 2½ million lbs. The acreage and production, as returned, and in fact also, are very fluctuating, being much affected by seasonal conditions. The quantity of Malwa opium which leaves Native State territory for consumption in or export beyond British India is known; the figures are given in Statement II.

RESTRICTION OF AREA IN CONNECTION WITH THE REDUCTION OF EXPORT.

(a) BENGAL.

7.—The figures given in paragraph 5 for the area under cultivation under the Bengal system, and the resultant figures for the amount of opium produced, no longer represent the standard area and outturn. A reduction of area was ordered in 1906 in view of the probable agreement with China, and this has been followed by large progressive reductions in succeeding years. This will be seen by comparing, as below, the area producing opium in 1905–06 and the corresponding figures for the two following years. It must be noted that the Bengal cultivation besides supplying China, also provides the opium exported to other countries and the great bulk of that consumed in British India itself:—

	<i>Area yielding Opium.</i>
	(Acres.)
1905–06... ..	613,996
1906–07... ..	564,585
1907–08... ..	488,548

It is believed on the information so far obtainable that the actual area sown in 1908–09 will be about 456,000 acres.

(b) MALWA.

8.—As already stated the cultivation in the Malwa States is not under direct control, and it rests with the States themselves and their cultivators to adjust their output to the reduced demand, the action of the Government of India being confined to limiting oversea exports of Malwa opium within the maxima agreed upon. It may be noted here that the difficult and complex situation in regard to the Native States which arises from the agreement with China is now under the consideration of a Committee appointed by the Government of India.

PRODUCTION OUTSIDE THE BENGAL AND MALWA TRACTS.

9.—The cultivation of the poppy is also permitted in the Punjab, and (to a nominal extent) in one or two other areas within British India, and is carried on in the Hill States of the Punjab, in Afghanistan, in Kashmir, in Nepal and in the Shan States of Burma. The area and production in these States are not known and cannot be estimated. The cultivation in the Punjab in 1906 amounted to 7,355 acres, but will quickly become negligible as it has now been decided within a short period to abolish such cultivation almost entirely, when undertaken for the purpose of producing opium. The existing cultivation is regulated by a licensing system and subject to an acreage duty; and the cultivator is bound to make over the produce to a licensed vendor.

10.—The cultivation of the poppy is prohibited in other British provinces and also, by agreement with the ruling Chiefs and subject to various conditions, in other Native States within the borders of British India.

MODE OF CULTIVATION AND COLLECTION.

(a) BENGAL.

11.—The following brief statement of the mode of cultivating and collecting the drug in the Bengal monopoly area is based on one of the standard accounts of the subject. Sowing takes place between the middle of October and middle of November, the land having previously been carefully prepared. After about a week when germination takes place the soil is prepared for irrigation, which begins as soon as the plants appear above ground and continues at regular intervals until the crop is matured. The seed has again to be sown in those places in which germination has failed, and at a later stage the young plants are thinned and weeded, possibly two or three times. Flowering ordinarily takes place in about 75 to 80 days after germination, and the petals when fully matured are removed one by one, and are purchased in due course by the Opium Department, and used (as "leaf") in the preparation of the outer shell of the opium balls. In another 8 or 10 days the capsules are sufficiently advanced for the extraction of the drug. Each capsule is then perpendicularly lanced, usually on three or four successive occasions at intervals of two or three days, the time selected for the process of lancing being the afternoon and for the collection of the drug the following morning. Collection may begin about the end of January and may extend to the beginning of April according to the locality and other circumstances.

12.—Fresh opium as collected contains an excess of moisture, but by the draining off of a portion of the liquid content of the crude drug, and by other manipulation while it remains in the hands of the cultivator, its consistence is raised more nearly to the standard at which it is desired to manufacture. The fluid thus obtained, which is known as "pasewa," is purchased by Government and used in binding the "leaf" to form the outer shell of the completed opium ball. The finer stalks and the leaves of the poppy plants are also collected and pounded up for "trash" which is purchased by the Government to form the packing of the chest in which the balls are exported.

13.—The whole of the plant is eventually utilised. The young seedlings which are first weeded are said to be eaten, and the thicker parts of the stem, which are unsuitable for breaking up into trash, to be used for fuel or thatching. The seeds are used among other purposes for the production of oil. The value of poppy seeds exported in 1906-7 was £438,482 and in 1907-8 £834,739.

(b) MALWA.

14.—The principal point of difference in the collection of the Malwa drug is the use of linseed oil in its handling at the time of collection as well as during the process of manufacture. The drug is also liable, owing to less careful methods of collection, to contain accidental impurities such as flower stamens, petals and pieces of pod.

(c) GENERAL.

15.—In both Bengal and Malwa the average production is subject to wide variations as the yield is readily affected by the conditions of moisture, heat and wind. Thus in the Bihar Agency the annual average yield per acre has varied in the 20 years ending with 1906-7 from a maximum of 177 ozs. to a minimum of 91 ozs., and in the Benares Agency from 203 ozs. to 108 ozs.; while in the Malwa States the production has in recent years been repeatedly affected adversely by unfavourable climatic conditions,

16.—The soil in which Bengal opium is produced and the conditions in regard to water supply, communications and available markets are such that it is believed that the transition from poppy to other crops can be gradually effected in at any rate a large part of the poppy area, especially in view of the fact that the cultivating profits from poppy are limited under the Bengal system by the obligation to sell the produce to Government at a fixed price. The question is under enquiry by the Committee referred to in paragraph 8. The same Committee is also investigating the case of the Malwa States, in which the substitution of other remunerative crops presents far greater difficulties, and the time for effecting the transition is so limited that, as will be seen from the figures presented in paragraph 30, the alternatives before the Malwa cultivating and trading interests are (a) the almost immediate stamping out of cultivation, or (b) the certainty of finding on their hands after 10 years large surplus stocks for which no licit outlet will exist.

II.—MANUFACTURE.

MANUFACTURE OF BENGAL OPIUM.

(a) CLASSIFICATION OF MANUFACTURED OPIUM.

17.—The opium manufactured at the Government factories may be (a) *provision opium*, *i.e.*, opium manufactured for export or (b) *excise opium* manufactured for local consumption in India. Provision opium again is divided into two classes, namely, "Patna opium" prepared at the Patna factory and "Benares opium" prepared at Ghazipore which is near to Benares.

(b) COMPOSITION OF BENGAL OPIUM BALL OR CAKE.

18.—The main difference between the pure opium contained in the manufactured ball or cake of each class is one of consistence, Patna opium being prepared so as to contain 75 per cent. of solid and non-volatile matter, Benares opium 71 per cent., and Excise opium 90 per cent.

Provision opium and Excise opium also differ in that the former is made up in balls protected by a leafy covering, while the latter being of higher consistence requires no such protection, and is made up into cubes consisting wholly of solid opium.

A ball of provision opium contains—

	lbs.	oz.	grs.
(a) Fine opium at the consistence of 71 or 75, forming the inner content of the ball	3	0	150
(b) Fine opium at the same consistence used in the shell.....		7	312½
(c) "Leaf," "pasewa," and "trash" used in the shell		14	400*
	4	6	425

Thus each ball contains a little over 3½ lbs. of fine opium and a provision chest of 40 balls as made up for export exactly 140½ lbs. in addition to other poppy products.

A cake of excise opium weighs one seer, *i.e.*, 2⅔ lbs. of 90 degrees consistence, and a chest contains 60 cakes.

(c) PROCESS OF MANUFACTURE.

19.—The essential features of the manufacturing process are testing and selection with a view to the elimination of adulterated and damaged opium, and mixing, and also evaporation where necessary, to arrive at the desired consistence. Much manual skill is required in the construction of the shell; and the closest attention to uniformity is paid throughout the different processes down to the details of the packing.

20.—The Bengal opium of a given season's crop [*e.g.*, that grown between November 1906 and March 1907] is ordinarily sold in the following calendar year [*e.g.*, in the case supposed, 1908] subject to the prior disposal of any reserve stocks.

MANUFACTURE OF MALWA OPIUM.

21.—The crude Malwa opium as collected by the cultivator is stored by him in linseed oil without any previous separation of the "pasewa," and eventually sold to the middleman who conveys it to the manufacturing centre in Native State territory and there sells it to the larger dealer and manufacturer. Or the latter and the cultivator may deal together directly. The process of manufacture is simple. After the free oil has been allowed to drain away, the crude drug is kneaded in a succession of copper pans, a treatment which eliminates more of the oil and thus raises the consistence of the drug. The material is then roughly shaped into balls which are allowed to dry on racks on a bed of "trash." In the next few months the balls are opened, kneaded and reshaped several times. Finally they are allowed to dry till about September. The balls then weigh roughly 12 ozs. each, and if intended for immediate export are packed into chests containing 140 lbs., or into half-chests of 70 lbs. The chests used on final export from Bombay are made up, by repacking, to contain the larger amount. The opium may, however, instead of being despatched about six months after production, be retained for a varying period which may extend to several years; and the drug thus matured commands a higher price.

22.—Malwa opium is ordinarily reputed to be of 90 to 95 degrees consistence but there is some reason to believe that the average consistence is lower than this figure; it has been placed by one expert at 85 degrees.

* The Benares ball differs in having about 1½ ozs. less of these constituents.

III.—TRADE.

INTERNAL AND EXTERNAL TRADE IN BENGAL OPIUM.

23.—As any advances required by the Bengal cultivator are supplied by the Indian Government, and the whole of the produce is purchased at a fixed rate and manufactured by Government, the trade element does not enter into the industry until a late stage; and in the case of *excise opium* it will be sufficiently explained by reference to the arrangements for retail sale which will be described as part of the statement of the Indian excise system.

(a) SALES FOR EXPORT.

24.—As regards *provision opium* it is the practice of the Government of India to announce beforehand the amount of Bengal opium which it is intended to offer for sale in the following calendar year, and not to vary the arrangement so notified except after three months notice. The sales are effected by a monthly auction in Calcutta, one-twelfth part of the total quantity announced being offered at each sale. The price obtained at these sales varies very widely according to the circumstances of the China markets and the state of the silver exchanges. The difference between this price and the cost* of manufacture constitutes the direct duty which the Indian Government realize on the export of Bengal opium to foreign countries. The opium remains in the Government warehouse while in Calcutta, and may only be removed therefrom under a system of supervision designed to ensure that a chest shall not be tampered with, or the opium contained in it diverted for illicit consumption in British India.

25.—The quantity of Bengal opium thus sold annually is stated for a series of years in Statement II. In each of the calendar years 1901 to 1905 it amounted to 48,000 chests. This was raised to 52,800 chests in 1906, a figure which would have been repeated in 1907 but for a reduction in the course of the year in the amount previously announced—a step anticipating the definite measures of co-operation with China which came into operation from the 1st January 1908. The total sales for 1907 were thus 50,400.

(b) AMOUNT EXPORTED.

26.—The amounts offered for sale represent the export standard of each year: the amounts actually exported in any period differ slightly from the amount sold. The two sets of figures are compared in Statement II. In this Statement the statistics for Bengal opium and for the export of Malwa opium are given by calendar years.

(c) COUNTRIES TO WHICH EXPORTED.

27.—Two further Statements are appended giving statistics by the official year (1st April to 31st March) by which the details for separate countries are ordinarily compiled in India. These are Statement III (a) distinguishing the exports to China and Hongkong, and to the Straits Settlements, to which countries the bulk of the Indian opium is consigned, and Statement III (b) indicating the other countries which take† opium direct from India.

28.—These other countries and localities are the United Kingdom, Australia, Canada, Ceylon, Natal, Mauritius, and British East Africa; and France, Indo-China, Java, Sumatra, Portuguese East Africa and Siam.‡ To trace completely the destination of Indian opium it is necessary to examine the re-exports from other countries and especially from the Straits Settlements, from which Indian opium is also supplied in substantial quantities to the Federated Malay States, the Netherlands-India, and Siam, and in small amounts to the Philippines, Sarawak and Labuan.

TRADE IN MALWA OPIUM.

29.—The Malwa opium producer cultivates without advances or is financed by a local banker, who in some cases confines his business entirely to opium transactions and is

* The cost of a provision chest, allowing for interest on sums advanced to cultivators is about Rs. 500. The average price realized at the sales, taking both kinds, Patna and Benares, together, was Rs. 1,348 in 1907-8, and Rs. 1,297½ in the ten years ending with 1906-7.

† In some cases nominal amounts only.

‡ In Statement III (b) the countries are differently specified, according to another standard table of Indian statistics: exports to British and Portuguese East Africa being combined, and exports to some of the other countries named being included in the column "other countries."

therefore free to transfer his capital elsewhere on the disappearance of his special occupation. This intermediary will frequently be the first purchaser of the produce to whom reference was made in paragraph 21. From his hands it will pass to the larger dealers and manufacturers at central manufacturing towns such as Indore. The opium trade in these places is one of long standing and great local importance. A large amount of capital is locked up in the stocks of opium, or circulating in connection with the purchase and sale of the drug. The large dealers in the Native States may also be the actual exporters from Bombay, but usually, and especially while conditions remained normal, the bulk of the trade from Bombay (and also from Calcutta) has been in the hands of a few leading firms whose personnel and that of the associate firms in the Straits Settlements, Hongkong and Shanghai are familiar names.

Finally it is understood that opium freights and insurance form valuable branches of business, in the case of the Bengal as well as of the Malwa drug.

30.—The magnitude of the stocks ordinarily kept in hand, to which reference has just been made, arises from the practice of keeping Malwa opium some time to mature, especially when current prices offer no great inducement to immediate exportation. The existence of these stocks has an important bearing on the question of the effect of the progressive extinction of the Malwa export trade on agricultural and commercial interests in the Native States. The aggregate export permissible under the agreement with China in the course of the 10 years preceding the absolute extinction of the trade is 83,500 chests. The stocks existing when the agreement came into effect, including the probable produce of the crop of 1907–1908, have been estimated at a figure between a minimum of 60,000 chests and a maximum of 100,000 chests, and the standard of production for export on which the agreement is based was 19,000 chests a year.

31.—To minimise the risk of smuggling from Native States into British India the use of Malwa opium for excise purposes has been successively prohibited in every province except Bombay. If eventually purchased for consumption in British India it pays a duty of Rs. 700 a chest. Malwa opium intended for export overseas has to be presented at certain weighment centres in the Native States, technically known as “Scales,” where the chests are examined and weighed under the supervision of officers of the Indian Government and the “pass duty” (at present fixed at Rs. 600 a chest) is levied. This constitutes the revenue obtained by the Indian Government from the Malwa drug. The chests are then transported by prescribed railway routes, and under strict supervision, to Bombay, where they are stored in a Government warehouse until actually exported under conditions which, as stated in the case of Bengal opium, are designed to secure that the opium shall not be diverted for consumption in British India.

32.—Practically the whole of the Malwa exports are consumed in China, only a few chests being occasionally sent to other places. The statistics of Malwa opium which has paid duty on weighment at the “Scales” during a series of years and of the actual exports of such opium are contained in Statement II already referred to in paragraph 26.

AGREEMENT WITH CHINA IN REGARD TO THE PROGRESSIVE REDUCTION OF EXPORTS.

33.—With effect from the 1st January 1908 the aggregate volume of exports of opium from India has been limited by an agreement between His Majesty's Government and China to—

61,900 chests in 1908
56,800 „ „ 1909
51,700 „ „ 1910

and it has been further agreed that if during these three years the Chinese Government have duly carried out their arrangements for diminishing the production and consumption of opium in China, His Majesty's Government undertake to continue in the same proportion this annual diminution of the export after the three years in question: the restriction of the imports of Turkish, Persian and other opium into China being separately arranged by the Chinese Government and carried out simultaneously. Thus at the end of 10 years when the agreement will have produced its full intended effect (by extinguishing a portion of the total trade equal to the average imports of Indian opium into China during the period 1901–05, namely 51,000 chests a year), the permissible export of Indian opium to countries other than China will stand at a fixed maximum of 16,000 chests a year.

34.—This agreement was accepted by the Chinese Government in January 1908 with an expression of deep gratitude to His Majesty's Government; and the Wai-wu-pu, after a year's experience, have recently communicated to His Majesty's Minister at Peking their continued and entire satisfaction with the arrangement.

35.—The distribution of the total export permitted by the agreement has been effected as follows:—

Year	Bengal	Malwa	Total
	<i>Chests</i>	<i>Chests</i>	<i>Chests</i>
1908	46,800	15,100	61,900
1909	43,200	13,600	56,800
1910	39,600	12,100	51,700

VALUE OF ANNUAL EXPORTS OF OPIUM.

36.—The average value of the opium exported from India in the last three years before the reductions began to be effective (1904-05 to 1906-07) was over £6½ millions, and the normal Chinese share may be taken roughly at *three-fourths. The export of poppy seed (mentioned in paragraph 13) will also be diminished. The total reduction in the volume of exports which the agreement may ultimately involve thus represents a substantial proportion of the existing balance of exports over imports.

IMPORTS OF OPIUM INTO INDIA BY SEA.

37.—Under Schedule III of the Indian Tariff Act of 1894 a duty at the rate of Rs. 24 a seer ($2\frac{2}{3}$ lbs.) is levied on foreign opium imported into India by sea. The rules regarding such imports vary to some extent in the different maritime provinces. Foreign opium or medicinal preparations containing opium may be imported by sea into Bengal and into Eastern Bengal and Assam for medicinal purposes only. In Bombay foreign opium and its preparations may be imported by sea into the principal ports in unbroken chests or half-chests for the purpose of re-exportation, in which case a small fee only is charged. The import of opium for retention in the province or in broken quantities is allowed only at the port of Bombay, and is subject to any special orders passed by the provincial head of the opium department as to its possession and disposal. In Madras foreign opium and its preparations may be imported by sea only by licensed druggists. In Burma opium and its preparations produced out of India may be imported by medical practitioners—a term which for the purposes of the rules in force in that province means a person with an English or Indian university qualification and practising medicine according to European methods. There are also various subsidiary rules and conditions regulating the manner in which residents in the internal provinces may obtain opium from oversea. The combined effect of these regulations and of the heavy tariff is that imports by sea are negligible. The amount in 1907-08 was 306 lbs. of which the United Kingdom sent 300 lbs.

IMPORTS OF OPIUM INTO INDIA BY LAND.

38.—The duty on imports over the land frontiers of India varies with reference to the excise systems of the provinces through which the opium enters. From the records of the last 10 years it appears that India has received imports from Afghanistan; from Dir, Swat, and Bajaur; from Kashmir; from Nepal; from Western China and from the Northern Shan States; but the total annual amount is small, the imports of 1907-08, namely, 26,320 lbs. representing about the maximum. Substantial quantities, however, have been awaiting admission from Afghanistan in the last few months.

IV.—EXCISE SYSTEM.

PRELIMINARY.

39.—The cultivation of the poppy, the trade in opium and the opium habit existed in India long before the period of British rule, and the system of opium administration as it exists to-day has a basis in historical and political conditions which can only be alluded to in this Memorandum, but should not be overlooked. For practically a century the Indian Government have been engaged in the gradual acquisition of control over the production, transit and sale of the drug throughout the continent: by the practical concentration of

* *i.e.* 51: 67: as in the agreement.

cultivation, so far as British India is concerned, within certain areas in Bengal and the United Provinces; by the discontinuance of cultivation in many of the internal Native States, as the outcome of negotiation, and the introduction into such States of an Excise system on lines more or less closely approximating to that in force in neighbouring British territory; by the taxation and supervision of opium in transit from Central India and Rajputana into and through British territory; and by the inclusion of all the different provinces in the general system as they were successively acquired, or as the necessity for regulation became manifest. This administrative and political task is still in some measure continuing. In the period since the Royal Commission on Opium submitted its report (April 1895) special attention has been paid to the improvement* of internal excise arrangements within the Malwa States, to the more drastic enforcement of the prohibition policy adopted in regard to the Burman population, and to the more adequate taxation of opium consumption in the Punjab, towards which the practical abolition of local cultivation already referred to and the intended increase of the duty on opium introduced from the surrounding Native States are preliminary steps. The British territory of Ajmer-Merwara has been brought under such control as it is possible to exercise over an *enclave* of British territory surrounded by opium-producing Native States. Excise arrangements in the Central Provinces and Berar have also been reorganized as the result of investigation by a special Committee in 1903. In addition the sale of smoking preparations has been wholly † prohibited in response to the recommendations of the Royal Commission, and the possession of such preparations of private manufacture has been confined within the narrowest limits, this step being designed to check the spread of an alternative form of the opium habit which was disapproved by Indian opinion. The facilities for procuring opium have been curtailed by the abolition of shops for the sale of smoking preparations, which previously numbered more than six hundred, and by the reduction of shops for the sale of raw opium from a total throughout British India of 9,531 in 1892-93 to 8,126 in 1907-08. The excise and preventive establishments have been greatly strengthened in almost every province—a fact which is visible in the rapid increase of expenditure chargeable to the head “Excise.”

Finally a new problem, to which reference will be made in a separate memorandum, has presented itself in connection with morphia, and has been dealt with by stringent regulations.

OPIUM ACT OF 1878.

40.—The system thus built up is based upon the principle of restricting the consumption and preventing the abuse of opium by enhancing the price at which the drug comes into the hands of the consumer within such a limit as will not defeat the object in view by the stimulus given to smuggling. It rests from the legislative point of view on the Opium Act of 1878, of which the following are the essential provisions:—

- (1) that the term “opium” where used in the Act shall include also poppy heads, preparations or admixtures of opium and intoxicating drugs prepared from the poppy;
- (2) that except as permitted by the Act or by any other enactment relating to opium for the time being in force or by rules framed under the Act or under any such enactment, no one shall cultivate the poppy, manufacture opium, possess opium, transport opium, import opium or export opium, or sell opium; and
- (3) that any person who contravenes the Act or rules made under it shall be punished for each offence with imprisonment for a term which may extend to one year, or with fine which may extend to Rs. 1,000, or with both, or with a further term of imprisonment not exceeding six months in the event of default in payment of the fine.

Provision is also made for the confiscation of any opium in regard to which an offence is committed. Officers of the Excise, Police, Customs, Salt, Opium or Revenue Departments of the proper rank are given powers of search, seizure and detention. There is also a special rule prescribing that in prosecutions for breaches of the Act it shall be presumed, until the contrary is proved, that all opium for which an accused person is unable to account satisfactorily is opium in respect to which he has committed an offence under the Act.

* The latest reports, however, indicate comparatively little genuine progress in this direction; and in the present position in the Malwa States such progress must inevitably be deferred.

† Except in Burma where there is a Chinese smoking population.

GENERAL RESTRICTIONS ON SALE AND POSSESSION.

41.—Some general restrictions on the use of opium in India are more or less uniformly applicable to all the provinces and need not be recited in the separate description of each provincial system. It should be explained, however, that the statements made do not apply to morphia, which is under special and more prohibitory regulations, or to the possession of opium and its preparations, other than smoking preparations, by licensed medical practitioners and druggists for *bonâ fide* medical purposes which also is specially regulated. The principal general restrictions are—

(1) The consumption of opium in any form on the premises of any shop, licensed for the sale of opium, is entirely prohibited throughout India, and no premises are licensed for consumption as distinguished from sale.

(2) The sale of opium in the form of preparations for smoking is entirely prohibited except in Burma.

(3) The possession by any person of any smoking preparation of opium in a quantity exceeding 180 grains, even though privately manufactured from a larger quantity of opium licitly in his possession, is prohibited except in Burma. Three provinces further restrict the aggregate quantity of a smoking preparation which may be possessed by a party of persons to a maximum of 900 grains.

(4) The possession of crude opium by any person other than a licensed vendor in a quantity exceeding 900 grains in three provinces, or 540 grains in nine provinces, is prohibited, except in certain tracts in Madras and Bombay where a somewhat higher limit is allowed for special reasons.

(5) A limit of possession is also imposed in regard to poppy heads.

(6) Certain further restrictions are imposed by the conditions of the licenses issued to the vendors; *e.g.*,* the licensee is prohibited from receiving wearing apparel or other goods in barter for opium, or selling opium on credit or opening his shop or harbouring any person therein between 9.30 p.m. and sunrise, or permitting persons of notoriously bad character to resort to his shop, or allowing gaming or disorderly conduct therein.

SEPARATE PROVINCIAL SYSTEMS.

The separate excise system of the larger provinces will now be briefly described.

(a) BENGAL.

Area 115,819 sq. miles. Population (1901) 50¾ millions.

42.—In the province of Bengal only Bengal opium may be used. It is supplied to the licensed vendors from district treasuries at a fixed price which is usually Rs. 29† a seer,‡ but is as low as Rs. 17 in the poppy-growing area where opium for illicit consumption is most readily obtained and as high as Rs. 35 a seer in Orissa where the raising of the issue price is one of the measures recently taken or under consideration with a view to checking the opium habit among the Uriyas. The right of retailing opium is separately disposed of for each shop, the general practice being to put the shops up for auction subject to fixed reserved prices. The total taxation a seer in 1906–7 was Rs. 27¾, *i.e.*, the price paid by the consumer had to be large enough to cover (1) the cost price of the opium to Government, namely, Rs. 8½ a seer; (2) an addition on the average of Rs. 27¾ a seer, or more than three times the cost price, representing the taxation levied directly by means of the high price at which opium is issued to the licensed vendor, and indirectly by means of the auction fees obtained for the grant of the right of sale; and (3) a further addition, the amount of which varies from shop to shop, representing the retailer's own expenses and profits.

43.—A special restriction enforced in certain districts where the purchase of licit opium for the purpose of smuggling it into Burma has been found to prevail, is the limitation of the total amount of opium issued to each shop with reference to estimated local requirements.

* The examples are taken from the Bombay rules. † R 1 = £0 1s. 4d. ‡ One seer = 2½ lbs.

(b) EASTERN BENGAL AND ASSAM.

Area 106,130 sq. miles. Population (1901) 31 millions.

44.—Bengal opium is used in Eastern Bengal and Assam and is supplied in the same manner as in Bengal. The issue price is Rs. 37 a seer in Assam and ranges from Rs. 29 to 31 in Eastern Bengal, the higher rate in Assam being rendered possible by its isolation, and desirable in view of the greater prevalence of the opium habit in that province, which was an opium-producing area prior to its absorption in British India. The further enhancement of existing issue rates is stated to be under consideration. The auction system of disposing of the right of retail vend is in force, but is modified in the Assam districts by the application of upset prices. The average incidence of taxation on opium was Rs. 34¾ a seer. The limitation of shop issues referred to under Bengal is also in force in one important district, and in certain localities it is also prescribed that the names and addresses of all purchasers of more than 90 grains at a time shall be registered.

UNITED PROVINCES OF AGRA AND OUDH.

Area 107,164 sq. miles. Population (1901) 47½ millions.

45.—In the United Provinces Bengal opium is used, and is supplied to licensed vendors, as in Bengal, from district treasuries, and in most districts of the province the district treasurers also are permitted to retail the drug subject to the conditions (a) that sales shall take place only during office hours, and (b) that the price charged to the public shall be one rupee a seer above the rate at which opium is issued to licensed vendors. These issue rates (which are charged also to the treasurers themselves) range from Rs. 16 to 18 a seer. The prevalence of lower rates in this province is due to the existence of poppy cultivation.

The right of retail vend (except in the case of the *ex-officio* vendors above referred to), is disposed of by auction, shops being sold singly or in groups. The total incidence of taxation in 1906-7 was 12.3 per seer.

PUNJAB.

Area 97,209 sq. miles. Population (1901) 20½ millions.

46.—The Punjab has hitherto drawn its supplies from its own somewhat lightly taxed production, from neighbouring producing States, and also from Bengal and Malwa. In future,* as already stated, the production of opium in the plains of the Punjab will be prohibited, the use of Malwa opium will be discontinued, and it is intended that imported Native States opium shall be more highly taxed. The ground will then be prepared for a more restrictive policy under which Bengal opium retailed at an increased price will be the chief source of supply. The use of poppy heads for the preparation of a beverage named "post" is common in the Punjab, and cultivation for this purpose will be allowed to a limited extent and under suitable regulations. Licenses for retail vend are now sold separately by auction, monopolies of sale in whole districts or large portions of them having been recently discontinued. The average incidence of taxation on opium in 1906-1907 was Rs. 12 per seer, the measures outlined above not being in full effect.

BOMBAY.

Area 123,064 sq. miles. Population (1901) 18½ millions.

47.—Malwa opium is still the source of supply in the province of Bombay, and in the numerous Native States which form a conspicuous feature of its political system. These States† have come into line with the Indian Government in regard to excise administration, and have engaged under separate agreements to prohibit poppy cultivation in their territories, to supply themselves with opium either from the Government depôts or by purchase in the market subject to the payment of the pass duty of Rs. 700 a chest, and to retail it to their subjects at prices not lower than the retail prices for the time being in force in neighbouring British districts. They have also engaged to exert themselves to prevent the introduction of untaxed opium into their territories. In return for the acceptance of these obligations they receive an eventual remission (varying from one-tenth to the whole of the pass duty) on opium consumed within their territories. Two systems of arrangement for retail vend are in force in the British portion of the province. One is similar to that described in

* Subject to a temporary postponement in one or two localities.

† Except Baroda already mentioned in paragraph 1 as belonging to the Malwa system.

connection with other provinces under which the right of retail vend is auctioned for single shops, or for a group of shops comprised in a single administrative area. Under the other system, a monopoly of retail vend for a specified area, at shops licensed by the excise authorities, is granted year by year to a farmer selected by the local Government. The farmer contributes to the cost of the preventive establishments, but otherwise pays nothing for his vend privileges over and above the duty on the opium. Under both systems minimum and maximum prices are fixed as part of the conditions of the license.

MADRAS.

Area 141,726 sq. miles. Population (1901) 38¼ millions.

48.—Bengal opium has replaced Malwa opium in Madras with effect from the 1st April 1908, a measure designed to facilitate the detection of smuggling directly from Malwa and also through the Native State of Hyderabad. The right of retail vend is auctioned except in certain special tracts, the shops being sold separately. The incidence of taxation on opium in 1906–07 (the Malwa drug being then in use) was about Rs. 20 a seer. The retail selling prices are to be enhanced in certain districts from the 1st April 1909, the general issue price of opium is to be raised from Rs. 20 to 23 a seer, and 53 shops are to be closed to check a recent tendency to increased consumption.

BURMA.

Area 237,738 sq. miles. Population (1901) 10½ millions.

49.—In Burma the right conceded elsewhere to possess and consume opium in limited quantities has been withdrawn from residents of the Burman race.

The rules on the subject are—

- (1) Burmans in Upper Burma may not possess opium except for medical purposes.
- (2) Burmans in Lower Burma who have not been registered may not possess opium except for medical purposes.
- (3) Non Burmans, *e.g.*, Chinese and Indians from the mainland, may possess opium for private consumption.

50.—The sale of opium to Burmans in Upper Burma was prohibited soon after the annexation. As regards Lower Burma the prohibition policy dates from 1893–94. The experiment has passed through various stages to which some reference will be made in dealing with the figures for consumption. In the case of Upper Burma, where the use of opium had been prohibited before the Province was annexed in 1886, no exception was made in favour of existing consumers when prohibition was again enforced under British rule. In Lower Burma the use of opium had previously been permitted under the ordinary excise system though various efforts had been made to limit the growth of the habit. Provision was accordingly made for habitual consumers, and Burmans of 25 years and upwards who desired to continue the use of opium were permitted to register themselves. The registered consumer was then furnished with a certificate of registration and was required to produce it when buying opium.

It was found, however, that the first registration was defective and that the existence of a large number of persons who ought to have registered but did not, and thus could not obtain opium by licit means, promoted smuggling. The registers were therefore reopened during 1900–03 but only on behalf of those originally eligible.

51.—The cultivation of the poppy is prohibited throughout British Burma except in the Kachin villages in four districts where it is subject to an acreage tax. This cultivation is carried on in remote hills seldom visited and beyond the sphere of regular administration. Cultivation also exists in the Shan States, which though subject to control, are also less closely administered.

52.—In Lower Burma Bengal opium is used. In Upper Burma the use of opium locally grown in the districts above referred to or in the Shan States, or imported from China, is also allowed. It would be difficult in any case effectively to prevent its entry.

53.—The ordinary limit of possession is 540 grains. This may be increased by special license under special restrictions in the case of persons who live at long distances from licensed shops, but this provision of the rules is little used.

54.—Except at a few shops opium is issued at the fixed price of Rs. 1 for 180 grains in the case of raw opium, or Rs. 1¼ for the same weight of prepared opium.

55.—The rates at which opium is issued to licensed vendors are fixed with reference to the normal sales in such a way as to leave a margin for a reasonable profit. The retail vendor is a non-official selected by the head of the district subject to the sanction of the next higher authority. He is supervised by a Government officer, known as the resident excise officer, whose duty it is to be present at the shop throughout the whole of the period (10 a.m. to 4 p.m.) during which the shop is allowed to be open, to see that no irregular practices are permitted, that no person is allowed to buy more than 540 grains, that opium is not sold to unregistered Burmans, and that sales are correctly recorded, and to restrict the frequency of sales to each consumer according to his known scale of consumption. He also sees that at closing time the stock of opium in hand is taken from the vendor's possession and placed in the police-station.

56.—The total number of shops is 126.

57.—The sale of opium prepared for smoking is permitted in two forms—(a) *beinsi* that is clarified opium prepared for smoking and (b) *beinchi* a mixture of pure opium and refuse of opium collected from pipes which have been smoked.

58.—The whole system is enforced by preventive establishments, the total cost of which is about £45,000 a year. An application for a further increase has been received.

MINOR ADMINISTRATIONS.

59.—There remain the minor administrations. The principal is the Central Provinces (including Berar) with a population of 12 millions. The others are—

	<i>Population (1901)</i>
North-West Frontier Province	2,125,000
Ajmer-Merwara.....	477,000
Baluchistan	308,000
Coorg	181,000

The extension of the system of regulation to Ajmer-Merwara has already been mentioned; previously there was no control outside a few municipal areas. Baluchistan was not included in the scope of the Opium Act till 1890. Each of these administrations has its separate rules suited to local conditions.

NATIVE STATES.

60.—The provinces making up British India of which some brief account has been given include 12 distinct administrations; they extend over more than one million square miles and they contain a diversified population of 232 millions. In addition there are the Native States with a total* area of 675,000 square miles, the bulk of them wholly contained within British territory, and possessing an aggregate population of 62 millions. Of these, 20 millions are included in the Central India and Rajputana Agencies and Baroda, in which the States producing the poppy constitute the Malwa group.

The Treaties and arrangements with the Native States regarding opium are summarised in an official paper presented to the Royal Commission and recorded in Appendix X of Volume II of their Proceedings. The position there described has undergone little substantial change.

V.—MEDICINAL OPIUM.

MANUFACTURE OF MEDICINAL OPIUM AND OPIUM ALKALOIDS.

61.—Medicinal opium is manufactured in one of the Government factories from selected specimens of the drug, and issued to Government hospitals and dispensaries and to the Medical Department of any Native States requiring it. The other factory also extracts alkaloids for issue to Government medical institutions in India and to European and Indian druggists. The bulk of the morphine hydro-chlorate and of the codeia thus manufactured is, however, sold in London to meet the medicinal demand. The quantities manufactured in 1906–07 were as follows:—

* This includes Kashmir [area 81,000 sq. miles; population 3 millions].

	lb.	oz.
Medicinal opium in cakes	532	0
" " " powder	755	0
Morphine pure	0	2
" hydro-chlorate	346	0
" acetate	12	0
" sulphate		<i>nil.</i>
" tartrate		0—4
Codeia	61	0
Narcotine... ..		<i>nil.</i>

The possibility of finding a wider legitimate market for medicinal opium and opium alkaloids manufactured in India has been frequently under consideration. As regards the alkaloids it is believed that a new method of extraction now under trial will obviate the impurity and discoloration which have hitherto been present in alkaloids of Indian manufacture.

Enquiry is also being made as to the possibility of raising the morphia content of Indian opium, prepared specifically for medicinal purposes, by improved selection of seed, and improved methods of collection. Selected samples of Indian opium have been found by expert examination in England to contain a percentage of morphine well above the demands of the British Pharmacopeia.

POSSESSION OF OPIUM AND ITS PREPARATIONS BY MEDICAL PRACTITIONERS
AND DRUGGISTS.

62.—The excise rules of all the provinces recognise medical practitioners and druggists and permit them under license to possess larger quantities than are allowed to the ordinary consumer. The rules do not in most cases impose definite restrictions in regard to the qualifications of the persons applying for licenses, but licensing officers would presumably refuse applications for which no *bonâ fide* case could be made out. It is stated where enquiry has been made that the privileges thus conferred are not in practice abused, but except in Eastern Bengal and Assam and Bombay where the licenses granted in 1906-07 numbered respectively 551, 467 and 824, the number is not large. Some of the changes in the figures since 1892 are, however, noticeable, *e.g.* :—

	1892-93 <i>No.</i> <i>of licenses.</i>	1906-07 <i>No.</i> <i>of licenses.</i>
Punjab and North-West Frontier Province...	4	176
Madras	19	205
Bombay	389	824
Burma	23	218

VI.—CONSUMPTION.

MODE OF CONSUMPTION.

63.*—The form of the opium habit which presents itself in India is eating, that is the raw drug is swallowed in the shape of pills without being prepared in any way; in some parts it is dissolved in water and drunk. Smoking is a practice foreign to the country and confined so far as the law is concerned by restrictions which in the case of chandu smoking must amount in practice to little less than prohibition. Smoking in one form or another is, however, reported to be actually practiced in several provinces†—but to what extent it is difficult to say now that the habit is withdrawn from observation as the result of the refusal of legal recognition.

The foregoing remarks do not apply to Burma; in that province the law allows the sale of smoking preparations of opium to those whom it permits to use opium at all, and the Chinese in Burma smoke, while the registered Burman or the Burman who consumes opium illicitly either smokes or eats. The Indian ordinarily eats.

DISTRIBUTION OF THE HABIT.

64—The distribution of the habit varies widely in different provinces and in different parts of the same province. The broad facts continue substantially unchanged. The habit is

* It will be seen that paragraphs 63 to 65 closely follow the observations of the Royal Commission on the same branches of the subject. As observed in paragraph 64 the broad facts continue substantially unchanged.

† *e.g.* the latest Bengal report on excise administration states that 'opium smoking though widely prevalent does not appear on the whole to be on the increase except in Calcutta and Orissa.' The continued practice of madak smoking in the Central provinces was noticed by the Committee referred to in paragraph 40. And attention has quite recently been called to the prevalence of smoking among the hill and forest tribes in Assam.

more prevalent in the larger towns. A high-lying tract may be comparatively free from the use of opium, while in a neighbouring damp and low-lying area consumption may be common. In some cases an explanation of the more general use of opium may be found in the previous history of the province under Native rule or by reference to the date at which a restrictive system was introduced under British rule. Again the recorded incidence of illicit consumption is noticeably low in poppy-growing areas or wherever special facilities for smuggling exist. The habit may also be in some measure a matter of racial or social practice. It is common among the Rajputs of Rajputana and to some extent at any rate enters into their ceremonial observances. It is also common among the Sikh community, and it has often been pointed out as a possibly connected fact that their religion debars them from the use of tobacco.

PURPOSES FOR WHICH OPIUM IS USED.

65.—It is among the admitted facts regarding the purposes for which opium is used in India that the habit is frequently adopted about middle age when the general health begins to decline; and also that, whether actually efficient or not as a preventive or permanently curative remedy, it is widely used with the object of relieving pain and bodily discomfort among a population the great bulk of which is unaccustomed to or beyond the reach of medical treatment on European lines, and, indeed, of genuine medical treatment of any school. The practice of administering opium to infants in minute doses is prevalent in Rajputana and in Central India and elsewhere, the habit being discontinued after the first few years of life. To some extent interwoven with the quasi-medical use, or originating in it, and in other cases distinctly separable, is the habit of using the drug as an indulgence.

NORMAL DOSAGE.

66.—Reference must also be made to the question of the normal eating dose; in spite of the wide margin which must be allowed for error in estimates relating to this point, they may serve to give some idea, however rough, of the scope of the habit. The statistics of over 4,000 cases of opium eaters in Rajputana, presented to the Royal Commission by a Government medical officer, indicated an average daily consumption of $21\frac{1}{2}$ * grains. The statistics of 100 other cases, also in Rajputana, presented by a medical missionary, worked out to an average of 21* grains. The statistics of 215 cases recorded by an Indian doctor in Calcutta gave an average of over $26\frac{1}{2}$ * grains, the cases being mainly those of clerks and traders and other persons above the agricultural and labouring status.

67.—Calcutta shop statistics of nearly 3,000 purchases recorded in 1896 indicated that nearly two-thirds of the purchases were for amounts below 45 grains. It may be supposed that the buyers did not make a daily visit to the opium-shop, as the eating habit is not gregarious and does not involve consumption on the premises.

68.—Some later information is obtainable from observations in Burma where, as will be explained later, the normal dosage is a question which is now being closely scrutinised as an essential factor in the maintenance of effective prohibition against the Burman population. The enquiries made by the local authorities into the facts of individual consumption in that province indicate about one-sixteenth of a tola, or $11\frac{1}{4}$ grains a day, as an ordinary daily requirement for Indians who eat opium; about 90 grains a day in the case of Chinese who smoke opium; and a larger eating dose and a smaller smoking dose in the case of Burmans. Shop statistics examined on the spot in November last closely confirmed this conclusion.

69.—None of the data are entirely typical. Rajputana is an area in which the poppy is freely cultivated, and restrictions on possession and sale are understood to have been practically non-existent at the time the statistics above referred to were recorded. The wealth of Calcutta and its known habit of relatively high consumption, as well as the status of the consumers on whose practice the Calcutta statistics were based preclude the acceptance of the results obtained as applicable to India generally. In the case of Burma the price of opium is abnormally high as compared with the rest of India, but the scale of earnings of the Indian immigrant is also very high. In the absence of more definite or complete data it would seem reasonable to take the average which guides the administration in Burma as the closest approach to actual facts to-day. It must, however, be fully recognised that there is a wide range in the dosage of individual habitual consumers, and that there must be a large class of occasional consumers.

* The figures quoted are the averages given on page 356 Vol. VI of the Royal Commission's Proceedings. For those unfamiliar with the grain as a unit of measure in opium statistics it may be mentioned that one mace equals 58·3 grains.

STATISTICS OF PROVINCIAL CONSUMPTION.

70.—The attached statement (No. IV) indicates the consumption of opium (*i.e.*, issues to licensed vendors) by provinces in 1883–84; in 1892–93; and in 1905–06, 1906–07, and 1907–08. Before the Opium Act of 1878 became effective no trustworthy statistics can be supplied. The year 1892–93 marks the end of the period on which the Royal Commission on Opium reported.

The provincial results are somewhat obscured by territorial changes. The Punjab was reduced in area by the formation of the North-West Province with effect from 1901–02, and the figures for these two provinces have consequently been combined. The Eastern districts of Bengal were transferred from Bengal to Assam (which then became the province now known as Eastern Bengal and Assam) in October 1905. The figures of consumption cannot be given for Ajmer-Merwara for 1883–84 and 1892–93 as this small area was previously unregulated. It is also impossible to give figures for Baluchistan for the two earlier years, or the figures for Coorg in 1883–84. Also the Burma figure for 1883–84 does not include the consumption of Upper Burma which was conquered after that date.

INCREASE IN CONSUMPTION FROM 1892–93 TO 1907–08 (EXCLUDING BURMA).

71.—Scarcity, famine and plague gradually reduced the standard of total consumption for all India (*excluding Burma) which had been attained by 1892–93, namely 406,788 seers, till a minimum of 368,051 seers was reached in 1900–01. The subsequent period of recovery is also synchronous with large additions to preventive establishments, the tendency of which is to increase the recorded consumption by substituting taxed opium for the illicit drug. The 1892–93 standard was not however again attained till 1905–06, when the issues reached 412,820 seers, or excluding Ajmer-Merwara and Baluchistan for which the earlier figures of consumption cannot be given, a total of 409,066 seers. Thus 13 years of increase of population still left the consumption standard at practically its original figure. The increase in the last two years mainly occurs in Bengal and Eastern Bengal and Assam. The main facts behind the figures appear to be (*a*) a large† nominal increase of consumption (in Bengal) representing purchases of duty paid opium for smuggling into Burma; (*b*) some real increase of consumption in Orissa (in Bengal); and (*c*) a considerable increase of actual consumption in Assam, associated with the recent improvement in material conditions in that part of the province but requiring and receiving attention. Steps are under consideration or have already been taken by which it is hoped effectively to deal with these three aspects of opium administration in the two provinces named.

72.—The total recorded consumption of British India, excluding Burma, represented in 1907–08 less than 8,000 chests of the weight, opium content, and average consistence of Bengal export opium.

UNRECORDED CONSUMPTION.

73.—There is one qualification which must be applied to all statistics of consumption: that is that they cannot bring to account the undetermined amount of illicit consumption. As regards this it can only be stated, first, that in view of the greatly increased strength of preventive establishments in recent years and other special measures taken to check organised smuggling in the provinces in which the ordinary system is in force it is not probable that the excluded amount of illicit consumption in 1907–08 exceeds the quantity which falls out of view in the statistics for 1892–93 and 1883–84; and, secondly, that whatever opportunities for illicit dealings now exist, will be greatly curtailed when the area under poppy is reduced by the extinction of three-fourths of the export trade.

CONSUMPTION IN BURMA.

	(Seers.)		(Seers.)
1892–93	69,519	1900–01	34,021
1893–94	52,420	1901–02	39,858
1894–95	25,839	1902–03	52,028
1895–96	25,835	1903–04	72,300
1896–97	28,113	1904–05	83,152
1897–98	30,068	1905–06	78,386
1898–99	30,845	1906–07	74,731
1899–1900	32,690	1907–08	70,462

* The figures for Burma are separately examined later.

† The view here stated is supported by (*a*) large seizures of duty paid opium on its way to Burma; (*b*) the actual disclosure of smuggling organisations; (*c*) the known facts about similar smuggling from Chittagong in Eastern Bengal a few years ago; and (*d*) the location of the increased issues, e.g., the increase of 7,751 seers in the issues to Calcutta in a single year.

74.—A fuller analysis of the statistics of consumption in Burma will throw light on the progress of the policy of race prohibition which has been attempted in that province. The figures are given in the margin year by year from just before the extension of the prohibition policy to Lower Burma, with effect from about 1893-94, up to the present day.

75.—As already stated the opium habit is under observation in Burma as exhibited concurrently by three distinct races, the Burman, the Indian and the Chinese. The policy of prohibition was the outcome of the practically unanimous official opinion in Burma that in the case of one of these races, namely the Burmese, the habit was exceedingly injurious. Opium was therefore prohibited for all Burmans except the regular adult consumers the registration of whom has already been referred to. It was held to be impracticable to apply the same procedure to the Indians and the Chinese, in whose case opium eating and opium smoking were not considered to produce the same effects, and their presence side by side with excluded classes is a factor which has complicated the experiment. Also certain conditions subsequently found to be essential to success were not fully provided for at the outset. Shops continued to be sold by auction; retail prices were not fixed; and the preventive establishments employed were inadequate. The shops were also extraordinarily restricted in number, amounting in Lower Burma to about one to every 3,500 square miles, and the issues to shops, that is the maximum amounts of Government opium which they were permitted to sell, were arbitrarily limited, though by that time no sufficient detailed information had been obtained as to the normal requirements of the non-Burmans and the registered Burmans in each locality. The result was a delusive appearance of success. The sales of licit opium fell from 69,519 seers in 1892-93 to 25,839 seers in 1894-95. But later knowledge showed that this reduction represented in the main the substitution of illicit for licit consumption, and that the retail vendors themselves were supplementing their limited sales of licit Government opium by unrecorded sales of untaxed opium. The increasing prevalence of smuggling is shown by the fact that the seizures of illicit opium increased in Lower Burma from 493 seers in 1893-94 to 971 seers in 1898-99, and in Upper Burma from 3 seers to 2,275 seers. The actual position as disclosed by exhaustive enquiry in 1898 was afterwards summed up in the words:—"The attempt to restrict consumption was rapidly and completely breaking down. The registered consumers were too far off the shops to obtain their supplies in a regular manner; there were also unregistered consumers, probably ten times as numerous, whom the prohibitive policy was converting into an outlaw class; opium smuggling from India, China and Upper Burma was rife; and opium could be obtained in almost every village even when there was no shop in the district."

76.—The Government determined to persevere with their experiment in prohibition, but to establish it on a sounder basis without regard to cost. It was expected at that time that the expenditure on improved arrangements would not prove reproductive. In the result it has actually done so, but this is an incidental circumstance which has not in any way affected the policy pursued. The following were the chief measures taken in Lower Burma for making prohibition more effective. The registers were temporarily reopened; the number of shops was increased from 60 to 91, so as to place a supply of opium within reasonable reach of those to whom the law allowed it; the auction system of disposing of the right of sale was replaced by the special arrangement described in paragraph 55, and retail prices were fixed as stated in paragraph 54. Finally a strong excise staff was appointed to suppress smuggling and other illicit dealings. These arrangements came into effect in 1902 and 1903, and similar arrangements were introduced in Upper Burma in 1904, except as regards the procedure for registration which has never been applied in that province.

77.—The effect was immediately observable in an increase of the licit consumption, which rose from 39,858 seers in 1901-02 to 52,028 seers in 1902-03, the first year in which the new arrangements were partially in force, and to 83,152 seers in 1904-05, the year in which they were first fully in force throughout both parts of the province. This marks the maximum figure of consumption attained. Though it would seem to be a high one it will be seen from the facts just stated in regard to seizures of smuggled opium in Burma itself that there was scope for a considerable increase by the mere substitution of licit for illicit consumption. It appears probable, however, that under the new arrangements the consumption passed for a time beyond the legitimate demand under a fully effective system. The revised arrangements did not provide for a growing practice by which a member of the licitly-consuming classes could purchase opium up to a maximum of 540 grains at a time and retail it illicitly to the excluded classes. It is only recently that anything like a satisfactory attempt has been made to deal with this question of "hawking," as the practice is commonly termed.

The method now adopted by the local authorities is to refuse to supply any purchaser who is not known at the shop with more than a minimum dose of opium; to make full enquiries regarding every regular purchaser or any stranger who repeats his purchase, in order to ascertain whether he is actually a consumer up to the extent indicated by his purchases or at all; and to maintain for each individual a complete record of the results of all investigation on this and like points. The amount issued to the consumer about whom such enquiries have been made is then strictly limited to his own personal requirements. The Excise Department believe that the staff at their disposal and some additions for which they have asked can cope with the difficulty of hawking on these lines. In any case they will have accumulated much valuable information about individuals if an extension of the prohibition policy in Burma should ultimately be found to be the only workable system. Meanwhile, on the modified lines now pursued, consumption has fallen from the maximum of 83,152 seers in 1904-05 to 70,462 seers in 1907-08, and the latest figures indicate that it is still falling. The price of smuggled opium has also risen and the unauthorised consumer outside Rangoon has now to pay about Rs. 2, or even as much as Rs. 3 to 4, for 180 grains, as compared with the rate of Rs. 1 charged by the shops to licit consumers.

78.—The modified system is less easy to apply in Rangoon where hundreds of purchases may be made in a single day in a single shop and where the population is very fluctuating. The smuggling from Bengal also forms a serious difficulty. As already mentioned further steps have been taken to deal with it, and it now remains to be seen whether they will prove effective. It is also proposed to take statutory power to require persons reputed to deal habitually in illicit opium to give security for their good behaviour, on pain of imprisonment if such security is not forthcoming; and also to require each regular purchaser, of whatever race, to confine his purchases to a particular shop, a measure which will involve something very like the registration, formal or informal, of all opium consumers throughout the province.

79.—The foregoing remarks apply especially to Lower Burma. In Upper Burma the issues have been comparatively steady or fluctuations have been capable of satisfactory explanation.

80.—Looking at the broad results of this experiment in prohibition, there seems little doubt that in Upper Burma the effect of the prohibition policy as developed in 1902-04 has been to check the spread of the opium habit among the Burman race. In Lower Burma the true result is obscured by the uncertainty as to the extent of illicit consumption. A high rate of consumption prevails, notwithstanding the limited population to whom the use of opium is permitted, but analysis shows that this is explained to a considerable extent by the rapidly growing Chinese population and the relatively large daily dose which a smoker consumes. The best statistical evidence bearing on the question of the success of the repressive policy is perhaps that afforded by jail statistics. In the 10 years preceding the introduction of that policy the average percentage of opium consumers among the persons admitted to jail in Lower Burma was 20.39. In 1893 it was 20.5. In the eight years following, that is the first eight years of prohibition, the average percentage fell to 16.69, the general tendency being downward, though there was a slight rise in the middle of the period. In the four years from 1902-05 which followed the improvement of the original arrangements the average fell to 12.8 per cent. In 1905, the last year for which these particular statistics are available, the percentage (12.12) was little more than half the percentage (23.30) which had been reached in one year (1892) just before the first attempts at prohibition.

VII.—REVENUE.

NATIVE STATES.

81.—In dealing with the question of the revenue derived from opium it will be convenient to refer first to that obtained by the Malwa States from the taxation of opium produced in their territories, the bulk of which will disappear with the extinction of the export trade. The statistics of British India mention 96 States in Central India and Rajputana as opium-producing States, but in many of these the production must be insignificant. There remains a considerable number of States, and not necessarily the largest only, to whom the revenue derived directly or indirectly from opium is believed to be of substantial importance. The exact figures cannot, however, be given, and the whole question is under the consideration of the Committee to which several references have previously been made. The

most important source of revenue connected with opium is the land tax, the assessment by the States being generally or frequently made at a specially high rate on any land which is suited for the production of the poppy.

82.—Direct duties are also levied. Some States tax the opium as it leaves the local area of its production or enters the manufacturing centre; some which have no manufacturing centre levy an export duty when the opium leaves their territory; some possessing manufacturing centres levy a protective duty on the export of opium in the unmanufactured state; others levy an export duty on manufactured opium. Some manufacturing States levy an import duty on crude opium coming into their territory to be made up, and high import duties are sometimes levied by States whose subjects import opium for their own consumption. There are also various taxes on opium transactions. The total revenue derived by the Native States from these miscellaneous taxes is not, however, as large as their number might suggest.

BRITISH INDIA.

(a) CLASSIFICATION OF REVENUE FROM OPIUM.

83.—It will have been seen that the revenue derived by the Indian Government from the sale of opium is made up of two portions:—(a) revenue from the export trade, and (b) revenue from the excise or internal consumption. These are separately recorded in the Indian financial returns under the heads of account “opium” and “excise.” The net revenue treated as appertaining to the head “opium,” *i.e.*, to the export trade, is the balance which remains from the proceeds of the sales of Bengal opium, *plus* the pass duty on Malwa opium, after deducting the cost of producing the Bengal opium manufactured for export. There are also certain minor receipts and charges. The revenue under the head “excise” represents in the main the difference between the prices at which Bengal opium is issued to retail vendors and the cost of producing it (which is calculated to be Rs. 8½ a seer), together with the revenue received from the license fees paid by retail vendors and the duty on Malwa opium consumed in British India. Here again there are some minor receipts and charges.

84.—The statistics of revenue from both sources in recent years are submitted in Statement V enclosed with this Memorandum. It is not possible in the case of excise opium to supply figures for expenditure connected with excise opium as distinguished from other expenditure in connection with excise, opium being, in accounts procedure as well as in administrative fact, an integral part of the excise administration, which is also concerned with intoxicating liquors and hemp drugs. For example, the excise establishments are maintained for excise purposes generally and not solely for preventive and other action in connection with opium. The deduction, however, of a suitable proportion of the total excise expenditure (though it has been largely increased in recent years by the strengthening of the preventive system) would not materially affect the figures quoted in the statement, which are net figures to the extent that the cost of producing the opium used is deducted before the revenue is brought to account.

(a) AMOUNT OF REVENUE FROM INTERNAL CONSUMPTION.

85.—It will be seen that the revenue from excise opium has been steadily increasing till it now stands at close on £1 million a year. This is largely due to the increased revenue in Burma. The figures for revenue cannot, of course, be taken as a correct index to consumption.

(c) AMOUNT OF REVENUE FROM THE EXPORT TRADE.

86.—The revenue from exports stood at £3¾ millions in the last complete year (1906–07) before the intended agreement with China began to take effect. In the previous year it had been £3½ millions and in the year before (1904–05) £4 millions. It varies, directly with the amount offered and the prices realized at the sales, or in the case of Malwa opium with the amount that pays duty with a view to export; and the Malwa cultivation has been depressed for some years past. The prices of Bengal opium also fluctuate very widely even though the amount offered for sale may have remained constant during several years. The annual net revenue derived by the Indian Government from the export trade averaged £3,446,868 in the five years ending with 1905–06, that is, in the period taken as the basis of the calculations involved in the agreement with China. For the three years ending with 1906–07 the average

was £3,792,663. Three-fourths of either amount or in round numbers £2½ millions may be regarded as approximately representing the revenue obtained from the China portion of the trade.

CONCLUSION.

87.—The position of Indian revenues as they stand to-day will be exhibited in the Budget for the coming year to be published at the end of March. The financial situation will not be found to be as satisfactory as it was in March 1907, when the readiness of India to co-operate actively in China's new policy was announced to the Members of the Indian Council and to the public. This memorandum may perhaps be concluded by a quotation from the words in which on that occasion, His Excellency the Earl of Minto, Viceroy and Governor General of India, publicly formulated the attitude of his Government towards the problem which China's decision had raised:—

“At first sight, I grant that China's proposals are very alarming as to their possible effects on Indian revenues. But I am afraid I am unable to follow the sweeping assumption that India is about to be sacrificed for the pleasure of a few faddists. Neither do I think we are entitled to doubt the good faith of the Chinese Government as to the objects of their proposals. Papers which I have had recently before me indicate every intention on the part of China to reduce with a strong hand the consumption of opium, and the growth of the poppy in her own territory. I am no opium faddist. I quite admit the hardship a proscription of opium would entail on those who use it in moderation as many in this country do, and I am well aware of the difficulties surrounding any attempt to reduce its production. But there is no doubt throughout the civilised world a feeling of disgust at the demoralizing effect of the opium habit in excess. It is a feeling in which we cannot but share. We could not with any self-respect refuse to assist China on the grounds of loss of revenue to India I admit that the task China has set herself may be greater than she can accomplish, and that we have a perfect right to require that in agreeing to the reduction of imports from India we should be satisfied of the results of China's efforts to reduce her own internal opium production. But notwithstanding the prospect of a heavy loss in revenue, I hope we may accept (the) view that provided the transition state through which we must pass is spread over a sufficient number of years, we need apprehend no financial disaster.”

STATEMENT I.

CULTIVATION UNDER THE BENGAL MONOPOLY SYSTEM.

Year	Number of cultivators	Area actually cultivated and producing opium	Quantity of opium produced
		<i>(acres)</i>	<i>(lbs.)</i>
1902-03	1,438,982	582,807	10,227,867
1903-04	1,567,682	642,831	9,179,136
1904-05	1,464,569	587,128	8,555,081
1905-06	1,549,536	613,996	8,823,332
1906-07	1,474,532	564,585	7,665,243
1907-08	*	488,548	5,870,263

* The figure for 1907-1908 has not been received. The period covered in each year in the table is that of one season's production and manufacture, e.g., 1st November 1907 to 31st October 1908.

STATEMENT II.

EXPORTS FROM BRITISH INDIA (chests.)

Year.	Bengal Opium.		Malwa Opium.		Total amount exported.*
	Amount sold.	Amount * exported.	† Amount passing the scales.	Amount * exported.	
1901	48,000	47,950	17,586½	17,228	65,178
1902	48,000	47,506	20,345	20,411	67,917
1903	48,000	48,430	26,737½	23,995	72,425
1904	48,000	47,842	20,411½	20,610	68,452
1905	48,000	47,976	15,998	15,078	63,054
1906	52,800	52,595	15,367	13,022	65,617
1907	50,400	48,843	14,844	14,187	63,030

* For the destination of these exports see Statements III (a) and III (b)

† The figures in this column represent amounts passed in each official year (April 1st to March 31st) the figures not being compiled by calendar years; i.e., the entry against the year 1901 refers to the year 1901-02 and so on.

STATEMENT III (a).

EXPORTS FROM BRITISH INDIA (chests).

Year.	Countries to which exported.									Total* exports.	Value exported. £
	China and Hongkong.			Straits Settlements.			Other countries.				
	Bengal.	Malwa.	Total.	Bengal.	Malwa.	Total.	Bengal.	Malwa.	Total.

1905-06	3,008,457	567,882	3,576,339	911,402
1906-07	3,196,818	550,418	3,747,236	932,488
1907-08 (Revised estimate.)	2,962,833*	596,800*	3,559,633	981,537
1908-09 (Budget)	2,754,667*	600,600*	3,355,267	986,245

* The distribution in these years of the total net receipts between Bengal and Malwa is approximate.

Note.—For the explanation of this table see paragraphs 83-84 of the memorandum. The penultimate column represents the net receipts from the export trade; and the last column the revenue obtained from the consumption of opium in India without allowance for the cost of administration.

Memorandum on Morphia in India.

The earlier information regarding morphia in India is somewhat fragmentary. Action was taken in the direction of suppressing the use of the drug, except for strictly medicinal purposes, at first by some of the provinces in which the habit first appeared, and afterwards by all provinces at the instance of the Government of India when their attention was called to the matter in 1904. The following are some of the isolated facts bearing on the subject.

The use of morphia pills was noticed in Akyab in the Burma Province in 1888, and attention was called by the local Government to the illegality of the trade. In 1898 it was found that there was a trade in morphia pills from Calcutta to Burma. The habit of injection appears to have been first observed in Burma in 1902. Numerous morphia dens had sprung into existence whose proprietors have been able to a considerable extent to evade or defy prosecution. It is understood that all the parts of an efficient syringe can be locally made except the needle.

The morphia habit was noticed in Madras in 1904. It was also in existence in Bombay about this time, though not to any large extent. Subsequent correspondence showed that household medicines containing morphia were freely sold in the city, and no doubt to some extent legitimately. It is not clear when the habit first appeared in Calcutta.

A number of authorities have at one time or another expressed the opinion that morphia was actually taking or was likely to take the place of opium, especially in Burma where the price of opium is higher than elsewhere. It is not clear, however, that this aspect of the question has been studied with precision. The general tendency of the facts brought to notice is to indicate that the habit of morphia injection readily takes hold among the dissipated classes in large towns. It does not appear, however, that it spreads in the interior with anything like the rapidity experienced in the case of cocaine, a drug against the importation of which severe repressive action has been taken, though not, it is feared, with complete success.

The most recent information about the situation in regard to morphia is given in the reports on excise administration in 1907-08. The Bengal report remarks that reliable data regarding the use of morphia for other than medical purposes are wanting, but that there seems to be no reason to believe that the habit is spreading; and also that morphia pills have been found in use in nine districts of the province, but only in extensive use in one.

The report from Burma in the same year mentions among other seizures, one of 100 ozs. imported from Calcutta, and states that the use of the drug is at present confined to criminals and diseased persons and others of the lowest classes. It is added that there has been a decrease in the habit of consuming and injecting morphia in Rangoon and that many of the dens have been closed. A few isolated captures have been made in the interior of the province.

As regards the standing rules on the subject of morphia, the restrictions now generally in force throughout India limit possession to the amounts, not exceeding five grains in Burma or ten grains in other provinces, which are required for *bonâ fide* medicinal purposes. Medical practitioners and druggists dispensing morphia must be licensed, and the rules on this point in force in Burma are specially strict in excluding altogether the doctor or chemist who does not possess European qualifications. Experience in India in regard to morphia and cocaine indicates that smuggling, and not the abuse of a license granted for the use of morphia in medical work, is the main difficulty to be met; and particularly smuggling through the agency of the post.

The imports of morphia were not till recently separately classified by the Customs authorities, and figures are only available for the last two years, and even so are approximate, the figures for one port representing imports by calendar years and for the others imports by official years. The amounts are 15,162 ozs. imported in 1906-07 and 14,344 ozs. imported in 1907-08. Import duty is levied at the general rate of 5 per cent. *ad valorem*.

Hongkong.

HONGKONG ORDINANCE NO. 9 OF 1887.*

An Ordinance for the better Regulation of the Trade in Opium.

[1st June 1887.]

Whereas it is expedient to regulate and control the movement of raw opium within the Colony and the waters thereof:

Be it therefore enacted by the Governor of Hongkong, with the advice of the Legislative Council thereof, as follows:—

1.—This Ordinance may be cited as the Raw Opium Ordinance, 1887.

2.—In this Ordinance—

“Opium” means raw, crude, or unprepared opium:

“Chest of opium” means the package, with the opium therein, such as is usually imported by merchants in the Colony:

“Opium Farmer” means the holder for the time being of the exclusive privilege of preparing and selling prepared opium, either inclusive or exclusive of dross opium:

“Loose opium” means all raw opium found or discovered otherwise than in a chest full of one quality of raw opium:

“Ship” includes any steam-vessel, junk, boat, sampan, or any kind of craft used for the conveyance of persons or things by water:

“Steamship” means any vessel propelled by steam.

3.—No person shall bring into the Colony or the waters thereof, or receive therein, any loose opium.

4.—(1.) It shall be lawful for the Colonial Treasurer, on such terms and conditions as may be approved by the Governor-in-Council, to grant* licences for the sale of opium intended for export in quantities less than one chest, and no person, except the holder of such a licence, shall be permitted to sell or barter within the Colony or its waters opium in quantities less than one chest.

(2.) The purchase, sale, or barter of quantities less than one ball of Bengal opium or three catties of Malwa, Persian, or Turkish opium is hereby forbidden.

5.—It shall be the duty of the holder of a licence to attach to all parcels of opium sold by him in quantities less than one chest a certificate in the Form No. 1 in the Schedule to this Ordinance.

6.—No person, except the Opium Farmer or a licensed retail dealer, shall have in his possession or under his custody or control any loose opium without a certificate of purchase from a licensee, unless he can show, to the satisfaction of a Magistrate,—

(1.) that the said opium is covered by a certificate of one of the licensees; and

(2.) that he has received it under an official export permit:

Provided always that it shall be in the absolute discretion of the officer charged with issuing export permits to grant or withhold the same, and that this section shall not apply to samples not exceeding two taels covered by a certificate of the importer.

7.—It shall be the duty of every licensee to keep a register of the particulars of purchase and sale, in such form as the Governor may from time to time order.

8.—(1.) Every person who offends against the provisions of any of Sections 3, 4, and 6 shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding one thousand dollars and the forfeiture of the opium, or the Magistrate may order a period of imprisonment, with or without hard labour, in lieu of a portion of the penalty, provided the whole imprisonment does not exceed six months.

(2.) Notwithstanding the penalty for the breach of conditions to which a licensee is subject, it shall be lawful for a Magistrate to impose on a licensee a penalty not exceeding five hundred dollars for a breach of any such conditions in case it may not be deemed advisable to proceed for the full penalty under the licensee's bond.

* Applies to New Territories,—see Government Notification No. 320 of 1899.

9.—Every person importing into the Colony any opium shall forthwith report the same to an officer to be appointed by the Governor, to be named the Superintendent of Imports and Exports, hereinafter called the Superintendent, giving the number of chests, and shall, before landing such opium or any part thereof, send or cause to be sent to the Superintendent a requisition, in the Form No. 2 in the Schedule to this Ordinance, giving the particulars therein required, whereupon the Superintendent shall furnish a permit, in the Form No. 3 in the said Schedule, authorizing the opium to be landed and stored, and such permit shall be exhibited to the Opium Farmer or his agent, and shall be signed by him or his agent, and shall not be used or acted upon until it has been so signed.

10.—(1.) Every person moving opium for exportation in chests shall, before doing so, send to the Superintendent a requisition, in the Form No. 4 in the Schedule to this Ordinance, furnishing the particulars therein required, whereupon the Superintendent shall grant an export permit, in the Form No. 5 in the said Schedule, authorizing the said opium to be exported.

(2.) The owner or shipper shall cause such permit to be exhibited to the Opium Farmer or his agent, and such permit shall be signed by him or his agent, and shall not be used or acted upon until it has been so signed.

11.—(1.) The Superintendent shall furnish the master of every ship carrying opium for export with a memorandum containing the particulars set forth in the Form No. 5 in the Schedule to this Ordinance, and no vessel carrying opium shall, subject to the provisions of section 13, depart from the Colony without such memorandum.

(2.) The Superintendent shall also, in the case of a steamship, forward a duplicate of such memorandum, by post, to the Commissioner of Chinese Imperial Maritime Customs at the port of destination, and, in the case of a junk or steam launch, he shall forward the said duplicate memorandum to the Hongkong and Shanghai Banking Corporation at Hongkong, for transmission to the Commissioner of Chinese Imperial Maritime Customs controlling the Custom Station through which such opium is to pass.

12.—Every person who moves a chest or chests of opium from one place to another within the Colony or tranships such chest or chests within the waters thereof shall, before doing so, furnish to the Superintendent a requisition properly filled up, in the Form No. 6 in the Schedule to this Ordinance, whereupon the Superintendent shall furnish a permit, in the Form No. 7 in the said Schedule, authorizing the removal or transshipment of the said opium, which permit shall be exhibited to the Opium Farmer or his agent, and shall be signed by him or his agent, and shall not be used or acted upon until it has been so signed.

13.—In the event of the arrival at or departure from the Colony of any steamship carrying opium when the Superintendent's office is closed or may be closed before application for a permit can be made, it shall be lawful for the agent of such steamship to land or ship any opium which is entered on the ship's manifest without a permit, and to deliver any opium so landed to the owner or consignee thereof or to keep the same in his own custody, but, so soon thereafter as the Superintendent's office is opened, the said agent shall apply for the necessary permit and furnish the requisite particulars.

14.—In the event of the departure from the Colony of any steamship carrying opium before application for an export permit can be made (in the circumstances stated in the last preceding section), the Superintendent shall, on receipt of the requisite particulars, telegraph the same to the Commissioner of Chinese Imperial Maritime Customs at the port of destination, and forward, as soon as practicable, the memorandum provided for in Section 11 to the said Commissioner.

15.—The master of any ship departing from the Colony without the memorandum required by Section 11 (except in the case provided for by Section 13) shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding five hundred dollars.

16.—Except as provided in Section 13, no removal or movement of opium whatever under Sections 10 and 12 shall be allowed between the hours of 6 p.m. and 6 a.m. from October to March, inclusive, or between the hours of 7 p.m. and 5 a.m. from April to September, inclusive, unless the requisition mentioned in the said sections so states and unless the Superintendent in his discretion, in and by the permits mentioned in the said sections, so directs.

17.—Every person who offends against or does not comply with any of the provisions of sections 9, 10, 12, 13, and 16 shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding five hundred dollars, and any opium imported, exported, stored, or moved, or attempted to be imported, exported, stored, or moved, contrary to the provisions of any of the foregoing sections shall be seized and may be forfeited.

18.—(1.) Every importer of opium and person storing the same shall keep a register, in such form as the Governor may require, showing the number of chests imported or stored by him and how and to whom they were disposed of.

(2.) Marks and Government numbers in the case of the Bengal drug shall be given, and such other marks or numbers, in the case of other sorts of opium as the Superintendent may require to be placed upon them.

(3.) Every offence for non-compliance with the requirements of this section shall be punishable with a penalty not exceeding five hundred dollars.

19.—(1.) No junk or other Chinese craft, whether licensed or not, shall leave her anchorage, or leave or attempt to leave the waters of the Colony, unless the safety of the vessel (through stress of weather) renders it necessary to do so, between the hours of 6 p.m. and 6 a.m. from October to March, inclusive, or between the hours of 7 p.m. and 5 a.m., from April to September, inclusive, under a penalty, on summary conviction before a Magistrate, not exceeding five hundred dollars or the forfeiture of junk and cargo.

(2.) This section shall not apply to any Hongkong fishing boat licensed under any Ordinance for the time being in force relating to merchant shipping, provided such boat has obtained a permit from the Harbour Master allowing it to leave within the hours aforesaid.

20.—(1.) The Superintendent or his deputy shall be at liberty at any time, and as often as he may think fit, to demand in writing from every person having any opium in his possession, custody, or control an account in writing of the opium so held at the time of such demand, and, in the case of chests, the marks and numbers, and the Superintendent or his deputy shall be at liberty at any time to enter the premises where such opium is and to inspect the same.

(2.) Every person who refuses to give such account or, without reasonable cause shown to permit such entry, or gives a false or incorrect account, shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding five hundred dollars, in addition to any other penalty which may be recoverable under the terms and conditions mentioned in Section 4.

21.—If any opium is found, on a search authorized under this Ordinance, to have been imported contrary to the provisions of this Ordinance, or to be missing from the place in which it was stored on importation or from the place where, according to the permit, it ought to be found stored, the person in whose possession such opium so imported may be found, or in whose name such opium so missing has been so stored, shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding five hundred dollars for every chest of opium which is found to have been so imported or to be so missing.

22.—If the Opium Farmer refuses or neglects, or without sufficient cause unreasonably delays, to do any of the acts or things hereinbefore provided and required to be done by him, he shall, on summary conviction before a Magistrate, be liable to a penalty for each such offence not exceeding five hundred dollars.

23.—Every person who, under the provisions of this Ordinance, makes any application or supplies any particulars, return, or account, or other written statement required by this Ordinance to be made or supplied shall sign the same himself or by his agent thereunto lawfully authorized in writing; and if any such application, particulars, return, account, or other statement is or are false or incorrect, either in whole or in part, to the knowledge of the person so making or supplying the same, whether the same is or are signed by himself or by his agent, such person shall, in every case not otherwise provided for by this Ordinance, on summary conviction before a Magistrate, be liable to a penalty not exceeding one thousand dollars for the first offence and two thousand dollars for every subsequent offence; and such agent shall also and in like manner, if offending, be liable to penalties of the like amount.

24.—(1.) Every person who conceals or secretly places any raw opium in any part of any steamship shall, on summary conviction before a Magistrate, be liable to a penalty not exceeding five hundred dollars.

(2.) Any opium concealed or secretly placed as aforesaid shall be seized, and the Magistrate may, whether any person is charged with or convicted of any offence under this Ordinance or not, order such opium to be forfeited.

25.—Excise Officers duly appointed under any Ordinance for the time being in force relating to prepared opium shall be deemed to be Excise Officers for the purpose of this Ordinance, and shall have the like powers, protection, duties, rights, and liabilities with reference to opium under this Ordinance as they have with reference to prepared opium under the said Ordinance.

26.—(1.) Any Justice of the Peace may, by his warrant directed to any Police or Excise Officer, empower him by day or by night to enter and search any dwelling house, shop, or other building or place, or any ship, not being a ship-of-war or ship having such status, lying or being within the waters of the Colony, in any case in which it may appear to such Justice of the Peace, upon the oath of any person, that there is good and sufficient cause to believe that in such dwelling house, shop, or other building or place, or on board such ship, is concealed or deposited any opium subject to forfeiture under this Ordinance or as to which an offence has been committed against any of the provisions of this Ordinance, and to take possession of any such opium found to be concealed or deposited therein and of the ship in which the same may be found, and to arrest and take any person being in such dwelling house, shop, or other building or place, or on board such ship, in whose possession, custody, or control, any such opium may be found or whom the said officer may have good and sufficient reason to suspect to have concealed or deposited therein or thereabouts any such opium.

(2.) Any officer to whom such warrant is directed may, in case of obstruction or resistance, break open any outer or inner doors of such dwelling house, shop, or other building or place, and enter thereto, and forcibly enter such ship and every part thereof, and remove by force any obstruction to such entry, search, seizure, and removal as aforesaid, and may detain every person found in such place until the said place has been searched.

27.—It shall be lawful for any Police or Excise Officer to arrest without warrant any person within the Colony whom he reasonably suspects to be conveying or to have concealed on his person any opium in contravention of the requirements of this Ordinance, and to take him before a Magistrate to be dealt with according to law.

28.—It shall be lawful for any Police or Excise Officer, having reasonable ground for believing that there is opium in any ship within the waters of the Colony in contravention of the provisions of this Ordinance (such ship not being a ship-of-war or ship having such status), to proceed without warrant on board such ship, and search for such opium, and seize any opium, so found; and it shall be lawful for such officer to take the opium so found, together with the person in whose custody, possession, or control it may be found, before a Magistrate, to be dealt with according to law.

29.—All informations to be laid, and all warrants to be issued, and all arrests and seizures to be made under this Ordinance may be had or done on a Sunday as well as on any other day.

30.—(1.) Except as hereinafter mentioned, no information laid under this Ordinance shall be admitted in evidence in any civil or criminal proceeding, and no witness shall be obliged to disclose the name or address of any informer or to state any matter which might lead to his discovery, and if any books, documents, or papers which are in evidence or liable to inspection in any civil or criminal proceeding contain any entry in which any such informer is named or described or which might lead to his discovery, the Court or Magistrate shall cause all such passages to be concealed from view or to be obliterated so far as may be necessary to protect the informer from discovery, but no further.

(2.) But if, in any proceeding before a Magistrate for any offence against any provision of this Ordinance, the Magistrate, after full inquiry into the case, believes that the informer wilfully made in his information a material statement which he knew or believed to be false or did not believe to be true, or if any other proceeding the Court or Magistrate is of opinion that justice cannot be fully done between the parties thereto without the discovery of the informer, it shall be lawful for the Court or Magistrate to require the production of the original information, and to permit inquiry and require full disclosure concerning the informer.

HONGKONG ORDINANCE NO. 8 OF 1891.*

An Ordinance to amend the Law relating to the Preparation of Opium.

[28th December 1891.]

Be it enacted by the Governor of Hongkong, with the advice and consent of the Legislative Council thereof, as follows:—

1.—This Ordinance may be cited as the Prepared Opium Ordinance, 1891.

2.—In this Ordinance, unless the context otherwise requires,—

“The Colony” includes the waters thereof:

“Excise Officer” means any person appointed under the Ordinances hereby repealed and continued under this Ordinance or any person appointed by the Governor under this Ordinance as an Excise Officer:

“Farm” means any exclusive privilege granted under this Ordinance:

“Farmer” means any holder for the time being of any such exclusive privilege:

“Opium” includes dross and dross opium:

“Prepared Opium,” so far as relates to the infringement of the Opium Farmer’s privilege of preparing opium within the Colony, means opium which has been subjected to any degree of artificial heat for any purpose whatever, and includes dross opium whenever such a construction is consistent with the context:

“Dross” means the refuse produced by smoking opium, and “Dross Opium” means opium prepared wholly or chiefly from such refuse:

“Opium Divan” includes any house, room, or other place—

(1.) used for the sale of prepared opium or dross opium to be smoked on the premises; or

(2.) used by the public for the smoking of prepared opium or dross opium where a fee or its equivalent is charged, or the dross resulting from such smoking is retained by or on behalf of the keeper for his benefit:

* Applies to New Territories,—see Government Notification No. 320 of 1899.

- “Opium Farmer” means the holder for the time being of the exclusive privilege of preparing and selling prepared opium, either inclusive or exclusive of dross opium :
- “Dross Farmer” means the holder, if any, for the time being of the exclusive privilege of collecting and purchasing dross and preparing and dealing in dross opium :
- “Divan Farmer” means the holder, if any, for the time being of the exclusive privilege of opening, carrying on, or licensing any class of opium divans. When there is no opium farmer, or no dross farmer, or no divan farmer, this Ordinance shall be read as if the Governor-in-Council, or any person licensed for the purpose by the Governor-in-Council, were expressly named instead of the opium farmer, or as if the Colonial Secretary, or any person licensed for the purpose by the Colonial Secretary, were expressly named instead of the dross farmer, or the divan farmer, or either of them. And payment or delivery to the Colonial Treasurer, for the use of the public revenue, or to an Excise Officer for the same purpose, shall in all such cases be taken to be payment or delivery to such farmer under this Ordinance :
- “Implement” means any vessel, utensil, instrument, or other thing which has been used, or which is probably intended to be used, for containing prepared opium, or for preparing or aiding in preparing any opium, or for smoking opium :
- Any opium, implement, or other thing shall, for the purposes of this Ordinance, be deemed to be in the possession of any person if he has such opium, implement, or thing in possession, custody, or control, by himself or by any other person :
- The subjecting of opium of any kind to any degree of artificial heat, for any purpose whatever, shall be taken to be the preparing of such opium :
- “Ship” means any steam or sailing vessel, junk, boat, sampan, or any kind or craft used for the conveyance of persons or things by water, or which may be so used :
- “Summary Conviction” means a conviction before a Police Magistrate of the Colony.
- “Compound of Opium” means any substance, not coming within the above definition of prepared opium, which contains opium, or any constituent or alkaloid thereof, however the original form of such opium may have been altered.
- “Morphine” includes morphia and all salts of morphine and any solution or preparation containing morphine.

Excise Officers.

- 3.—(1.) All existing Excise Officers appointed under the Ordinances hereby repealed shall be continued under this Ordinance.
- (2.) The Governor may from time to time appoint, in the Form No. 1 in the Schedule to this Ordinance, such other agents or servants of the Opium Farmer or other persons as may be approved of by him to act as Excise Officers under this Ordinance.
- (3.) Any such appointment may at any time be withdrawn by the Governor.
- 4.—Every person who assumes, without lawful authority, to act as an Excise Officer shall, on summary conviction, be liable to a penalty not exceeding one hundred dollars or, in default, to imprisonment, with or without hard labour, for any term not exceeding three months.
- 5.—The name and address of every Excise Officer shall be posted in a conspicuous place at the Police Court.
- 6.—Every Excise Officer shall be supplied with a badge bearing such sign or mark of office as may be directed by the Governor; and when acting against any person under this Ordinance, every Excise Officer shall declare his office, and produce to the person against whom he acts his said badge.

7.—Every Police officer when acting under this Ordinance, if not in uniform, shall declare his office, and produce to the person against whom he acts such badge as the Captain-Superintendent of Police may direct Police officers to carry when on secret or special service.

- 8.—(1.) Any Excise Officer who takes any bribe shall, on summary conviction, be liable to a penalty not exceeding two hundred dollars or to imprisonment, with or without hard labour, for any term not exceeding six months.
- (2.) Any Excise Officer who does not, on ceasing to be an Excise Officer, return to the Opium Farmer his uniform or accoutrements, badge or licence, shall, on summary conviction, be liable to a penalty not exceeding one hundred dollars.

Importation, etc., of Opium.

- 9.—(1.) No person, except the Opium Farmer, his licensees, and persons duly authorized by him in writing, shall bring into the Colony or have in his possession within the same any prepared opium, not being dross opium without having a valid certificate under Section 11.
- (2.) No person shall bring into the Colony or have in his possession within the same any dross opium without the knowledge and consent of the Dross Farmer.
- (3.) No person, except a Dross Farmer or a duly licensed person under this Ordinance, shall, within the Colony, collect dross or have in his possession, without the knowledge and consent of the Dross Farmer or his licensees, any dross, except such as may be the result of his own smoking or of the smoking of opium on his own premises (the burden of proof whereof shall lie on such person), and such dross shall in no case exceed two taels in weight: Provided that when any person has in his possession any such dross in excess of two taels weight, on giving notice thereof to the Dross Farmer, the Dross Farmer shall purchase the same at a fair and reasonable rate.
- 10.—(1.) No person, except the Opium Farmer, shall prepare opium within the Colony.
- (2.) No person, except the Opium Farmer and any duly licensed person under this Ordinance, shall sell or offer or expose for sale any prepared opium.
- (3.) No person, except the Dross Farmer and any duly licensed person under this Ordinance, shall deal in or prepare dross opium:

Provided that no trader in opium shall be prevented from *bond fide* testing samples or opium obtained in accordance with the provisions of any Ordinance for the time being in force relating to raw opium and keeping the same for the purposes of his trade, the burden of proof whereof shall in each case be upon any person alleging the same in his defence.

Sale of Opium.

- 11.—(1.) Every person selling prepared opium, not being dross opium, shall deliver therewith a certificate, in English or Chinese, in such form as the Governor may from time to time approve, specifying the date of the sale, the name of the purchaser, and the quantity sold.
- (2.) The certificate shall be issued from books provided with counterfoils, and both the certificates and the counterfoils shall bear corresponding and consecutive printed numbers.
- (3.) The certificate shall be stamped by the seller with the stamp used by him in carrying on his business, and shall be evidence of the facts therein stated; and shall not be transferable.
- (4.) If any person is charged with the possession of prepared opium without a valid certificate, he shall not be entitled to produce or put in evidence, or cause to be produced or put in evidence any certificate, as covering the opium in respect of which he is charged, prior in date to the last certificate granted to him, unless he has received permission from the Opium Farmer to keep or store opium, which permission shall appear on the certificate produced or put in evidence.

- (5.) When there is no Opium Farmer the certificate shall be in the Form No. 2 in the Schedule to this Ordinance.

12.—No. certificate so granted by the Opium Farmer or by any licensee under him shall be valid after noon of the third day from the date of the expiration of such Opium Farmer's privilege.

Compounds of Opium.

- 12a.—(1.) It shall be lawful for the Governor-in-Council to grant licences to such persons as he may think fit in such numbers as he may deem suitable and on such conditions as he may consider proper for importing for sale or use within the Colony, preparing, manufacturing, or dealing in morphine and compounds of opium, and any person so importing, manufacturing, or dealing in morphine or any compound of opium without such licence shall be guilty of an offence against this Ordinance.

This sub-section shall not apply to morphine or compounds of opium in transit.

- (2.) Any such licence may be revoked by the Governor-in-Council at his discretion and without assigning cause.
- (3.) There shall be paid for each such licence an annual fee of twenty-five dollars which shall be awarded to the Opium Farmer.
- (4.) If the holder of any such licence does not comply with the conditions he shall be guilty of an offence against this Ordinance.

12b.—Every importer whether for exportation from or for sale or use within the Colony of morphine or any compound of opium shall on the importation thereof truly declare before the Superintendent of Imports and Exports the amount of morphine or opium contained therein and any such importer making a false declaration in this regard shall be guilty of an offence against this Ordinance.

12c.—Every importer of morphine or any compound of opium which is intended for sale or use in the Colony shall pay to the Opium Farmer a royalty thereon calculated at the rate of thirty dollars per tael of morphine and three dollars per tael of opium which royalty shall be paid to the Opium Farmer and may be recovered by the Opium Farmer in a summary way before a Magistrate.

The Governor-in-Council may at his discretion exempt any medicine* containing morphine or opium or any compound of opium manufactured in and imported from Europe, America, or any British Colony from the provisions of this Ordinance: the name and description of any medicine so exempted shall be published in *The Gazette*.

12d.—The Governor shall and the Opium Farmer may establish one or more† bonded warehouses for the use of dealers in morphine and compounds of opium imported for exportation and not for use or sale in the Colony and all such morphine and compounds of opium shall be stored in such warehouse or warehouses.

The Governor-in-Council may from time to time make, vary, and rescind‡ regulations with regard to the storage and removal of morphine and compounds of opium in and from such warehouses, to the payment of charges for storage therein and to such other purposes as the Governor-in-Council may deem desirable and such regulations when published in *The Gazette* shall have the force of law.

Opium Divans.

13.—No person shall open or carry on any opium divan without a valid licence from the Colonial Secretary.

- 14.—(1.) Such licence shall be in the Form No. 3 in the Schedule to this Ordinance and be subject to the conditions which may be indorsed upon it.
- (2.) It may at any time be cancelled by the Colonial Secretary for any failure to comply with the conditions under which it is granted, or for any contravention of the requirements of the law for the time being in force relating to opium, or for any breach of any of the regulations for the time being in force relating to opium divans.

* G. N. 219/07 † G. N. 939 ‡ G. N. 933/06. G. N. 35/07.

- (3.) Such cancellation shall not, however, relieve any offender from any penalty incurred under this or any other Ordinance, or under any sanitary bye-laws, or under any of such regulations.

15.—An opium divan shall be open at all times to the inspection of the Opium Farmer, of all Excise Officers, of officers of the Police not being under the rank of sergeant, and of officers of the Sanitary Board.

16.—Every person who commits any of the following offences shall, on summary conviction, be liable to a penalty not exceeding one hundred dollars or to imprisonment, with or without hard labour, for any term not exceeding three months; that is to say,—

- (1.) opens or carries on an opium divan without a valid licence; or
 - (2.) knowingly permits any person, other than an adult male, to smoke opium or dross opium in an opium divan; or
 - (3.) knowingly permits or suffers any female, not being the opium divan keeper or the wife or child of such keeper, to enter or remain in an opium divan; or
 - (4.) knowingly permits any armed person to be in an opium divan.
- 17.—(1.) It shall be lawful for the Governor-in-Council from time to time to make, and, when made, to alter, add to, or revoke, regulations* with regard to the licensing, management, and classification of opium divans and as to the fees to be paid in respect of such licences, and to prescribe a scale of pecuniary penalties, not exceeding in each case twenty-five dollars, for the breach of any of such regulations.
- (2.) Such regulations shall not come into force until they are notified in *The Gazette*, and thereafter such penalties may be enforced summarily before a Magistrate, and, on conviction for any breach of such regulations, the offender shall be liable, in default of payment, to imprisonment, with or without hard labour, for any term not exceeding one month.

Farms.

- 18.—(1.) The Governor-in-Council may grant to any person, for such considerations, and on such conditions, and for such periods, and in such form as may from time to time be determined by the Governor-in-Council, the sole privilege of preparing opium and of selling within the Colony opium so prepared, and either inclusive or exclusive of the privileges mentioned in this Ordinance in relation to dross opium and opium divans.
- (2.) Such privilege may from time to time be offered for sale either by sealed tender or at public auction, and the time for sending in such tenders or of holding such auction shall be previously notified in *The Gazette*, in English and Chinese, and by advertisement in one or more daily newspapers.
- (3.) The Governor-in-Council may also grant to any person the like privilege as aforesaid by private contract, if it appears desirable in the interests of the Colony to do so.
- (4.) The accepted bidder for or the grantee of such privilege, before he shall become entitled to the benefit thereof, shall give such security as the Governor-in-Council may require for the due performance of the conditions of such privilege and of his stipulations or agreement in respect thereof.
- (5.) The Opium Farmer shall in all cases keep a proper register or record of all opium supplied to him, and shall give such details as to its disposal as the Governor may require.
- 19.—(1.) The Opium Farmer may, in his discretion, grant licences to suitable persons authorizing them to sell prepared opium, but subject to such conditions as may from time to time be approved by the Governor-in-Council.
- (2.) When there is no Opium Farmer the Governor-in-Council may, in his discretion, grant licences to suitable persons authorizing them to prepare and sell opium on such conditions as may from time to time be approved by the Governor-in-Council:

* G.N. 190/02.

Provided that the provisions of section 21 as to fines for breaches of regulations shall apply equally to all breaches of regulations as to the sale or preparation of opium imposed on the licensees under this section.

- 20.—(1.) The Governor-in-Council may from time to time, on such terms as he may think expedient, grant the privilege of collecting dross and of preparing and dealing in dross opium.
- (2.) The grantee thereof may grant licences to persons approved by him to collect dross or to prepare or deal in dross opium.
- (3.) Every such licensee, when collecting, shall carry such badge as the Governor may direct.
- 21.—(1.) The Governor-in-Council may from time to time make, and, when made, alter, add to, or revoke, a scale of fines to be levied for breaches of the regulations under which any privilege is granted under this Ordinance: Provided that such scale shall not come into effect until the same has been published in *The Gazette*.
- (2.) Every fine provided by such scale shall be levied in the same manner as the fines imposed by this Ordinance.

22.—If the consideration money for any privilege granted under this or any Ordinance hereby repealed, or any instalment thereof, is not paid within one month next after the day appointed for the payment thereof, the said privilege shall become null and void, and, over and above all other liabilities under this Ordinance or any Ordinance hereby repealed or any conditions of such privilege, the farmer shall be liable to make good to the Governor all losses or expenses incurred by reason of such default in payment, or by reason of any re-sale or re-grant of such privilege which the Governor-in-Council may thereupon make, and to make which he is hereby authorized.

Transfer of Farm.

- 23.—(1.) The Opium Farmer shall, one month before his privilege expires, give public notice, in the Form No. 4 in the Schedule to this Ordinance, that such privilege is to expire on the day named in such notice, which shall be the last day of his exclusive privilege, and that no prepared opium purchased from such farmer, or from any licensee of such farmer, can be used without the consent of the new farmer after noon of the third day next after such date.
- (2.) Such notice shall be printed in English and Chinese, and the farmer shall supply copies thereof to all persons licensed by him under this Ordinance, and every such licensed person shall exhibit such notice in the place where he sells prepared opium, in a conspicuous position, so as to be plainly visible to every person entering such place.

24.—The Opium Farmer shall not, during the three months preceding the end of his term, prepare more than the usual quantity of opium, and neither he nor his licensees shall, during such three months, sell any prepared opium at less than the average current prices of the day or in greater quantities than is usual at the time of year, and at the end of his term such farmer or his licensees shall not sell, export, or otherwise make away with or dispose of any of his or their stock of prepared opium, but shall make over to the incoming farmer the full and complete stock of raw or prepared opium then in his or their possession, at the marketable value thereof, together with all furniture, fittings, and implements used in or about the Opium Farmer's premises for the purposes of his privilege, and the incoming farmer shall be bound to take over and pay for the same accordingly.

25.—All licensees of the Governor-in-Council under section 19, when there is no Opium Farmer, shall, during the last three months of the period of their licences, be subject to such restrictions as to the quantities of opium they shall prepare and sell as the Governor-in-Council may from time to time determine.

- 26.—(1.) In the event of any difference arising between the incoming and outgoing Opium Farmers as to the quantities of prepared opium produced or sold during the last three months of the term and the value of the same, or as to the nature and quantity of the raw or prepared opium so to be purchased

or made over or the values thereof, or as to the value of the furniture, fittings, and implements aforesaid, such difference shall be determined by three arbitrators, one to be appointed by the incoming farmer, one by the outgoing farmer, and one by the Governor.

- (2.) The majority of the arbitrators may determine, and are hereby empowered to decide in each particular case, what are usual quantities of prepared opium within the meaning of this Ordinance.
- (3.) The award of the arbitrators or of a majority of them shall be final, and the arbitration or such other settlement shall be held at such time after the end of the term of the outgoing farmer as may seem reasonable to the Governor.
- (4.) Any award made may be filed in the Supreme Court pursuant to the Code of Civil Procedure for the time being in force.

27.—In case either the incoming or the outgoing Opium Farmer fails to appoint an arbitrator within ten days from his receiving notice from the Governor to do so, the other two arbitrators may proceed with the award, and, in case of difference of opinion, they shall appoint an umpire, whose award shall be final, and may be filed in the Supreme Court pursuant to the said Code.

28.—The Governor shall fix the time within which the award of the arbitrators is to be completed, and such time shall be specified on the appointment of each arbitrator.

29.—The arbitrators shall have the same powers as if the appointment and reference to arbitration had been made by an order of the Supreme Court under the said Code.

Arrests and Seizures.

30.—All the provisions of this Ordinance as to searches, arrests, possession; the seizure and disposal of opium or implements, penalties and their division, rewards to informers, and penalties for false charges or irregular proceedings shall apply, so far as circumstances will permit, in relation to all cases of any infraction of this Ordinance or of any regulation made thereunder with respect to dross, dross opium, compounds of opium, morphine, or the keeping of opium divans.

- 31.—(1.) Any Police or Excise Officer may arrest without warrant any person within the Colony whom he reasonably suspects to have in his possession any opium in contravention of this Ordinance, and may take such person to a Police Station in order that, if necessary, he may be brought before a Magistrate, to be dealt with according to law.
- (2.) Every such person and his luggage shall be liable to be searched before he is taken to the Police Station, but only under the supervision of an European Police Officer not under the rank of sergeant.

32.—Any Police or Excise Officer, having reasonable ground for believing that there is any opium in any ship within the Colony in contravention of this Ordinance (such ship not being or having the status of a ship of war) may proceed without warrant on board such ship and search for such opium, and may seize any such opium so found, together with all implements connected therewith, and shall take the same, together with the person in whose possession it may be found, to a Police Station in order that he may be brought before a Magistrate, to be dealt with according to law.

33.—Whenever it appears to any Justice of the Peace, upon the oath of any person, that there is reasonable cause to believe that in any dwelling house, shop, or other building or place, or on board any ship (not being or having the status of a ship of war), within the Colony, there is concealed or deposited any opium subject to forfeiture under this Ordinance, or as to which an offence has been committed against this Ordinance, such Justice of the Peace may, by his warrant directed to any Police or Excise Officer, empower such Officer, by day or by night,—

- (1.) to enter such dwelling house, shop, or other building or place, or to go on board such ship, and there to search for and take possession of any such opium and of any implements in such place or ship; and

- (2.) to arrest any person or persons, being in such dwelling house, shop, or other building or place or ship, in whose possession such opium may be found, or whom such Officer may reasonably suspect to have concealed or deposited any such opium in such place or ship or thereabout.

34.—Such Officer may, if it is necessary to do so,—

- (1.) break open any outer or inner door of such dwelling house, shop, or other building or place, and enter thereinto ;
- (2.) forcibly enter such ship and every part thereof;
- (3.) remove by force any obstruction to such entry, search, seizure, and removal as he is empowered to effect ;
- (4.) detain every person found in such place or on board such ship until such place or ship has been searched ;
- (5.) seize and detain any such opium or implements found in such place or ship; and
- (6.) seize and detain any such opium or implements found in the possession of any of the persons against whom his warrant has been issued in any place whatever within the Colony.

35.—(1.) If any ship is used for the importation, landing, removal, carriage, or conveyance of any opium or for exportation to China or French Indo-China of any prepared opium in contravention of this Ordinance, the master, owners, or agents thereof shall be liable to a penalty not exceeding one thousand dollars.

- (2.) An amount of any such opium found on board any such ship and exceeding,—
- (a.) in the case of any steamship of sixty tons burden and upwards, fifty taels in weight ; or,
 - (b.) in the case of any steamship under sixty tons burden, twenty-five taels in weight ; or,
 - (c.) in the case of any other ship, ten taels in weight, shall be deemed evidence of the unlawful use of such ship, unless it is proved, to the satisfaction of the Magistrate, that every reasonable precaution had been taken to prevent the unlawful use of such ship, and that none of the officers or their servants or any of the crew of such ship were implicated therein.

(3.) Where practicable, all, offences under this section shall be inquired into and adjudicated on by two Magistrates sitting together.

36.—All informations to be laid, and all warrants to be issued, and all arrests and seizures to be made under this Ordinance may be had or done on Sunday as well as on any other day.

Forfeitures.

37.—All opium seized with regard to which any breach of this Ordinance, or of any regulation made thereunder, has been committed, together with any implements, may be forfeited by the Magistrate and, in his discretion, adjudged and delivered in whole or in part to the farmer.

- 38.—(1.) Whenever any seizure of prepared opium is made under this Ordinance, or whenever there is reasonable ground to believe that opium is prepared by any unauthorized person or in any unauthorized place, all raw opium found in the possession of such person or in such unauthorized place may be seized by any Police or Excise Officer.
- (2.) If the Magistrate considers that there is reason to believe that the unlawful preparation of opium was carried on by such unauthorized person or in such unauthorized place, or if any implement within the meaning of this Ordinance is found in the possession of such unauthorized person or in such unauthorized place, the Magistrate may order such raw opium to be forfeited, and may, in his discretion, direct that it be delivered to the Opium Farmer.

- 39.—(1.) When any opium or any implement is found without being apparently in the possession of any person, the Magistrate may cause a notice to be affixed at the place where such opium or implement was found, calling upon the owner thereof to claim the same.
- (2.) If no person makes such a claim within one week from the affixing of such notice, such opium or implement shall be forfeited, and may be delivered by the Magistrate, in his discretion, to the Opium Farmer.
- 40.—(1.) Every person who conceals or secretly places any prepared opium in any part of any steamship shall, on summary conviction, be liable to a penalty not exceeding five hundred dollars and, in default of payment, to imprisonment, with or without hard labour, for any term not exceeding six months.
- (2.) Any opium concealed or secretly placed as aforesaid shall be seized, and the Magistrate may, whether any person is charged with or convicted of any offence under this section or not, order such opium to be forfeited.
- 41.—(1.) No person shall bring or have in his possession on board any ship :—
- (a.) which is bound for or about to proceed to Canton or Macao any raw opium exceeding two taels in weight ;
- (b.) which is bound for or about to proceed to Macao any prepared opium exceeding two taels in weight, unless the same is entered on the manifest of the ship.
- (2.) The master of such ship may seize any such opium as aforesaid found on board his ship which is not entered on the manifest, and may retain the same in his possession until he can deliver it to the Police.
- (3.) Notwithstanding anything in this Ordinance, all such opium as aforesaid found on board any such ship which is not entered on the manifest shall be forfeited to the Crown : Provided that if the Opium Farmer, within one week after such forfeiture, proves, to the satisfaction of the Governor-in-Council, that any opium so forfeited was not covered by a certificate under Section 11 and that he was not privy to its being brought on board the ship, the Governor-in-Council may, if he thinks fit, order such opium so forfeited or any part of it to be delivered to the Opium Farmer.
- (4.) Any contravention of this section shall be deemed an offence against this Ordinance.
- 42.—(1.) Any opium forfeited to the Crown under the last preceding section, and not ordered by the Governor-in-Council to be delivered to the Opium Farmer, shall be disposed of as the Governor-in-Council may direct, provided that it be not sold within the Colony during the currency of the farm existing at the time of such forfeiture.
- (2.) No Police officer or other person having any opium seized under the last preceding section in his possession for the purpose of retaining the same until forfeiture or until its disposal is determined upon by the Governor-in-Council, or afterwards for the purpose of giving effect to such order of disposition, shall be liable to any penalty under this Ordinance by reason of such opium not being accompanied by a certificate under Section 11 or otherwise.

Procedure.

43.—The Magistrate may, in his discretion, employ an analyst or other skilled person to report upon any technical point which may be in dispute in any prosecution under this Ordinance, and may, in his discretion, order the payment of such analyst or skilled person by the party in fault, or out of any fine recovered from either party, or out of the proceeds of any forfeiture ordered by such Magistrate.

44.—In dismissing any charge or complaint under this Ordinance on the ground that such charge or complaint is false or frivolous or vexatious, it shall be the duty of the Court to impose on the person bringing such charge or complaint a penalty not exceeding that which the defendant would have incurred if he had been convicted on such charge or complaint, and

such penalty shall be over and above any other penalties or liabilities which the said person may have likewise incurred in respect of his said charge or complaint or of his evidence in support thereof.

45.—Over and above all other liabilities and penalties to which, by this Ordinance or otherwise, any person may become or be subject in respect of his suing out, obtaining, issuing, or executing improperly and without sufficient cause any search warrant under this Ordinance, the said person shall be further liable to the penalties specified in section 52, to be enforced and levied as hereinafter provided.

46.—In any proceedings before a Magistrate or on appeal to the Supreme Court relating to the seizure of any opium, implements, or other articles, the seizure whereof is authorized by any of the provisions of this Ordinance, it shall be lawful for such Magistrate and for the Judges of the said Court, and they are hereby respectively required, to proceed in such cases on the merits only, without reference to matters of form and without inquiring into the manner or form of making any seizure, excepting in so far as the manner and form of seizure may be evidence on such merits.

47.—(1.) Except as hereinafter mentioned, no information laid under this Ordinance shall be admitted in evidence in any civil or criminal proceeding, and no witness shall be obliged to disclose the name or address of any informer or to state any matter which might lead to his discovery, and if any books, documents or papers which are in evidence or liable to inspection in any civil or criminal proceeding contain any entry in which any such informer is named or described or which might lead to his discovery, the Court or Magistrate shall cause all such passages to be concealed from view or to be obliterated so far as may be necessary to protect the informer from discovery, but no further.

(2.) But if, in any proceedings before a Magistrate for any offence against any provision of this Ordinance, the Magistrate, after full inquiry into the case, believes that the informer wilfully made in his information a material statement which he knew or believed to be false or did not believe to be true, or if in any other proceeding the Court or Magistrate is of opinion that justice cannot be fully done between the parties thereto without the discovery of the informer, it shall be lawful for the Court or Magistrate to require the production of the original information, and to permit inquiry and require full disclosure concerning the informer.

Miscellaneous Provisions.

48.—If any person charged with any offence under this Ordinance gives a false name, or, with intent to procure his discharge or acquittal, produces or offers in evidence, or causes to be produced or offered in evidence, any certificate required by this Ordinance which is proved, to the satisfaction of the Magistrate, to have been issued to any other person or to be forged, he shall, on summary conviction, be liable to a penalty not exceeding one hundred dollars, in addition to any other punishment or penalty to which he may by law be liable.

49.—Every person who—

- (1.) attempts to commit any offence in contravention of this Ordinance; or
 - (2.) aids or abets any other person in any such offence or in the attempt to commit any such offence,
- shall, on summary conviction, be liable to the same punishment and penalties as if he had been guilty of the actual offence.

50.—Persons employed in any department of the public service, and persons in their employ, or any of them, are disqualified from becoming or being in any way possessed of or directly or indirectly interested in any privilege or licence under this Ordinance or the profits thereof, whether at law or in equity and whether in their own right respectively or in the right of another, and from suing for or in respect of or in any way enforcing the same.

51.—If any unsuccessful search for opium has been made under section 31 or section 32 by the request or at the instigation of the Opium Farmer, and there is no reason to suppose that any opium in contravention of this Ordinance has been thrown away or otherwise disposed of with a view to avoid detection, the Opium Farmer shall replace and

repack any goods which may have been unpacked by reason of such search, and shall make good any damage which he may have caused thereby; and the amount of money claimed for any such damage shall be adjudicated upon by a Magistrate and shall be recoverable as a civil debt under the provisions of any Ordinance for the time being in force relating to the jurisdiction of Magistrates and the practice and procedure before them in relation to offences punishable on summary conviction.

Penalties.

52.—Every omission or neglect to comply with or act done contrary to the provisions of this Ordinance shall be deemed an offence, and for every offence against this Ordinance or against any regulation made thereunder, not otherwise specially provided for, the offender shall, in addition to any forfeiture of opium and implements provided for by this Ordinance, be liable, on summary conviction, to the following penalties:—

- (1) for every first offence, a penalty not exceeding five hundred dollars or imprisonment, with or without hard labour, for any term not exceeding three months; and
- (2) for every subsequent offence, a penalty not exceeding one thousand dollars or imprisonment, with or without hard labour, for any term not exceeding six months.

53.—A portion, not exceeding one-half, of the pecuniary penalty recovered from any offender against this Ordinance may, in the discretion of the Magistrate, be awarded to the informer, and in every case relating to prepared opium the remainder of any such penalty recovered shall be paid to the Opium Farmer, except in the cases provided for by section 41 or in cases where the Opium Farmer himself or his licensees are convicted of exporting or attempting to export prepared opium from the Colony to China or French Indo-China.

54.—Every person who assaults, resists, or wilfully obstructs any Excise Officer in the due execution of his duty shall be guilty of a misdemeanor, and, being convicted thereof, shall be liable, in the discretion of the Magistrate, to a penalty not exceeding two hundred and fifty dollars or to imprisonment, with or without hard labour, for any term not exceeding one year.

HONGKONG ORDINANCE NO. 9 OF 1893.

An Ordinance for the Suppression of the Pernicious Practice of injecting Preparations of Morphine by unqualified Persons.

[23rd September 1893.]

Whereas it is desirable to forbid, in this Colony, the practice of injecting morphine, except in cases where such treatment has been prescribed by some duly qualified medical practitioner, and to make provision for effectually suppressing such practice:

Be it therefore enacted by the Governor of Hongkong, with the advice and consent of the Legislative Council thereof, as follows:—

1.—This Ordinance may be cited as the Morphine Ordinance, 1893.

2.—For the purposes of this Ordinance,—

“Morphine” includes morphia and all salts of morphine and any solution thereof that can be used as an injection, but not preparations for ordinary internal use containing morphine as an ingredient but not suitable for purposes of injection:

“Duly Qualified Medical Practitioner” means a practitioner registered under any Ordinance for the time being in force relating to the registration of medical practitioners:

“Chemist or Druggist” means a chemist or druggist holding an European or American certificate of qualification.

- 3.—(1.) Every person who administers by injection any morphine to any other person, except in a case where the same has been prescribed by some duly qualified medical practitioner, shall, on conviction before a Magistrate, be liable to a penalty not exceeding fifty dollars or to imprisonment, with or without hard labour, for any term not exceeding two months.
- (2.) The onus of proving the exception shall lie on the person so administering the morphine.
- 4.—(1.) Every person who, except in a case where morphine has been prescribed by some duly qualified medical practitioner, furnishes morphine to any person, except to a duly qualified medical practitioner or to a chemist or druggist, shall, on conviction before a Magistrate, be liable to a penalty not exceeding fifty dollars or to imprisonment, with or without hard labour, for any term not exceeding two months.
- (2.) The onus of proving the exception shall lie on the person furnishing morphine as aforesaid.

Provided that this section shall not apply to the furnishing of morphine for the purpose of *bond-fide* exportation.

5.—It shall be lawful for any officer or constable of the Police, duly authorized by warrant of any Justice of the Peace (which shall be in the form in the Schedule to this Ordinance), with such assistants as may be necessary, to enter and, if necessary, to break into any place which such Justice of the Peace may, from sworn information or of his own knowledge, have reasonable grounds to suspect and believe to be a place kept or used for the injection of morphine contrary to the provisions of this Ordinance or where such injection is carried on, and to arrest any persons who may be found therein and whom he may suspect to have acted or to be acting in contravention of this Ordinance, and to seize all morphine, hypodermic syringes, and other appliances which may be found there and which are capable of being used for the injection of morphine, and, on conviction of the offender, or in any case if the Magistrate, so orders, they shall be forfeited to Her Majesty, her heirs and successors, and be dealt with as the Magistrate may direct.

SCHEDULE.

FORM OF WARRANT.

HONGKONG.

To each and all the Constables and Officers of the Police of the Colony.

Whereas it appears to me (A.B.), one of the Justices of the Peace for the said Colony by the information on oath of (C.D.), of [or of my own knowledge], that the place (*here insert description of the place*) is kept or used for the injection of morphine contrary to the provisions of the Morphine Ordinance, 1893, or that such injection is carried on there: This is, therefore, to require you, with such assistants as may be necessary, to enter and, if necessary, to break into the said place and to arrest all such persons found therein as you may suspect to have acted or to be acting in contravention of the said Ordinance, and to seize all morphine, hypodermic syringes, and other appliances which have been used or are capable of being used for the purpose of injecting morphine, found in the said place or upon the persons of those present in the said place, and the said morphine, hypodermic syringes, and other appliances to bring before a Magistrate, to be dealt with according to the Ordinance; and for so doing this shall be your warrant.

Given under my hand and seal at Victoria, in the said Colony, this
day 1 .

A.B.,
J.P.

[L.S.]

HONGKONG ORDINANCE NO. 12 OF 1908.

*An Ordinance to provide for the Registration of Chemists and Druggists
and to regulate the Sale of Poisons.*

L.S.

F. D. LUGARD,
Governor.

[26th June 1908.]

Be it enacted by the Governor of Hongkong, with the advice and consent of the Legislative Council thereof, as follows:—

1.—This Ordinance may be cited as “The Pharmacy Ordinance 1908.”

2.—In this Ordinance the term “Registered Persons” means all persons registered under this Ordinance.

3.—No person shall sell or keep an open shop for retailing dispensing or compounding poisons or shall take use or exhibit the name or title of Chemist and Druggist or Chemist or Druggist, unless such person is a duly registered Pharmaceutical Chemist or Chemist and Druggist under the Act of the Imperial Parliament styled “The Pharmacy Act 1868” and registered under this Ordinance or shall take, use, or exhibit the name or title of Pharmaceutical Chemist Pharmaceutist or Pharmacist unless such person is a duly registered Pharmaceutical Chemist under the said Pharmacy Act 1868 and registered under this Ordinance or has been duly registered in the manner hereinafter provided.

4.—When any person who at the time of the passing of this Ordinance is in practice as a Chemist and Druggist and has satisfied the Governor of his skill and competency to conduct the business of a Chemist or Druggist or when any person although not duly registered under the said Pharmacy Act 1868 shall prove to the satisfaction of the Governor that he possesses a similar qualification of some legally recognised British or Foreign Pharmaceutical Institution or Examining Body or has passed through a course of study and examination similar to the course of study and examination required for registration under the said Pharmacy Act the Governor may cause such person to be duly registered as a Pharmaceutical Chemist or Chemist and Druggist.

5.—Nothing hereinbefore contained shall extend to or interfere with the business of wholesale dealers duly licensed under this Ordinance in supplying poisons in the ordinary course of wholesale dealing, but subject nevertheless to any condition that may be imposed under their licenses.

6.—The Governor-in-Council may from time to time make, vary, and rescind regulations for any of the following purposes:—

- (a.) Prescribing the character and scope of the course of study and examination required to have been passed by applicants for registration under Section 4.
- (b.) The appointment of examiners for the purposes of such examination and the fees payable by the applicants in respect of such examination.
- (c.) The issue of certificates by such examiners.
- (d.) The amount of the fee (if any) payable on registration.
- (e.) The keeping, dispensing, and selling of poisons by registered persons.
- (f.) The issue of licences to wholesale dealers for supplying poisons in the ordinary course of wholesale dealing together with the conditions on which such licences are granted.
- (g.) The payment of fees in respect of licences granted to wholesale dealers.
- (h.) The imposition of penalties on the violation of any or either of the conditions embodied in such licences or otherwise on breach of any regulation made in pursuance of this section and the mode of recovery of the same.
- (i.) Generally for carrying out this Ordinance.

Such regulations shall be published in *The Gazette* and shall have the force and effect of law in the same manner as if they were incorporated in this Ordinance.

7.—The Colonial Secretary shall keep a register of all persons entitled to be registered under this Ordinance in such form as he may deem proper and from time to time make the necessary alterations therein and a copy of such register shall be published annually in the *Gazette* by the Colonial Secretary.

8.—No registered person shall compound any medicine of the British Pharmacopœia except according to the formularies of the said Pharmacopœia.

9.—The several articles named or described in the Schedule *A* to this Ordinance shall be deemed to be poisons within the meaning of this Ordinance and the Governor-in-Council may from time to time declare by Order published in the *Gazette* that any article shall be deemed to be a poison within the meaning of this Ordinance.

10.—It shall be unlawful to sell any poison, either by wholesale or by retail, unless the box, bottle, vessel, wrapper, or cover in which such poison is contained be distinctly labelled in English and Chinese with the name of the article and the word Poison, and with the name and address of the seller of the poison; and it shall be unlawful to sell any poison of those which are specified in the First Part of Schedule *A* to this Ordinance, or may hereafter be added thereto under Section 9 of this Ordinance, to any person unknown to the seller, unless introduced by some person known to the seller; and on every sale of any such article the seller shall, before delivery, make or cause to be made an entry in a book to be kept for that purpose stating, in the Form set forth in Schedule *B* to this Ordinance, the date of the sale, the name and address of the purchaser, the name and quantity of the article sold, and the purpose for which it is stated by the purchaser to be required, to which entry the signature of the purchaser and of the person, if any, who introduced him shall be affixed.

For the purposes of this section the person on whose behalf any sale is made by any apprentice or servant shall be deemed to be the seller.

11.—The provisions of the last preceding section shall not apply

- (1.) to wholesale dealers in the ordinary course of wholesale dealing who may be licensed by regulation of the Governor-in-Council under Section 6 provided always that poisons sold by such wholesale dealers be labelled with the name of the article and the word Poison in English and Chinese or
- (2.) to any article when forming part of the ingredients of any medicine dispensed by registered persons; or
- (3.) to any medicine supplied—
 - (a.) by a legally qualified medical practitioner to his patient; or
 - (b.) by any duly qualified licentiate of the Hongkong College of Medicine to his patient; or
 - (c.) to his patient by such other person holding such diploma of some legally recognised British or Foreign Medical Institution or Examining Body as may be approved by the Governor; or
 - (d.) for animals under his care by any member of the Royal College of Veterinary Surgeons of Great Britain or by such other person holding such diploma of some legally recognised British or Foreign Veterinary Institution or Examining Body as may be approved by the Governor.

Provided that such medicine is labelled with the name and address of such seller and the ingredients thereof be entered, with the name of the person to whom it is sold or delivered, in a book to be kept by the seller for that purpose.

12.—The Governor-in-Council may direct the name of any person who is convicted of an offence against this Ordinance which in his opinion renders him unfit to be on the Register to be erased from such Register and the Colonial Secretary shall erase the same accordingly and shall publish a notice to such effect in the *Gazette*.

13.—Any person convicted of an offence—

- (a.) against Sections 3 and 10, shall be liable to a penalty not exceeding \$50 for the first offence and to a penalty not exceeding \$100 for the second or any subsequent offence and in default of payment thereof to imprisonment with or without hard labour for any term not exceeding two months.

(b.) against Section 8 shall be liable to a penalty not exceeding \$50.

Such penalties shall be recoverable summarily before a Magistrate; but nothing in this Ordinance shall prevent any person from being liable to any other penalty damages or punishment to which he would have been subject if this Ordinance had not been passed.

14.—The bye-laws relating to Poisons contained in Schedule B of the Public Health and Buildings Ordinance 1903, are hereby repealed.

15.—Nothing in this Ordinance contained shall be construed as affecting the provisions of the Prepared Opium Ordinance 1891, The Morphine Ordinance 1893, and the Prepared Opium Amendment Ordinance 1906.

Passed the Legislative Council of Hongkong, this 25th day of June 1908.

C. CLEMENTI,
Clerk of Councils.

Assented to by His Excellency the Governor, the 26th day of June 1908.

F. H. MAY,
Colonial Secretary.

SCHEDULE A.

The articles herein described are hereby declared to be poisons under Section 9.

SCHEDULE B.

1. Date of sale.
2. Name and address of purchaser.
3. Name and quantity of article.
4. Purpose for which it is required.
5. Signature of purchaser.
6. Signature of person introducing purchaser.

HONGKONG ORDINANCE NO. 13 OF 1908.

*An Ordinance to prohibit the Exportation of Prepared Opium to China
 and to French Indo-China.*

F. D. LUGARD,

Governor.

LS

[3rd July 1908.]

Be it enacted by the Governor of Hongkong, with the advice and consent of the Legislative Council thereof, as follows:—

1.—This Ordinance may be cited as “The Prepared Opium Amendment Ordinance, 1908,” and shall be read and construed as one with The Prepared Opium Ordinance, 1891 (hereinafter called “The Principal Ordinance”) and with The Prepared Opium Amendment Ordinance, 1906, and this Ordinance and the said Ordinances may be cited together as “The Prepared Opium Ordinances 1891-1908.”

2.—From and after the coming into operation of this Ordinance it shall be unlawful for the Opium Farmer, his licensees, or any other persons whomsoever to export or cause to be exported prepared opium from the Colony to China or French Indo-China and any person violating the provisions of this section shall be liable on summary conviction to the penalties imposed under Section 52 of the Principal Ordinance.

Provided always that this section shall not be construed as applying to the possession by a passenger by steamer from Hongkong to China or French Indo-China of a quantity of prepared opium, to be used for personal consumption on the voyage, not exceeding 5 mace for every day of duration of the voyage.

* * * * *

Sections 3, 4 and 5 incorporated with The Prepared Opium Ordinance, 1891 (Ordinance No. 8 of 1891).

Passed the Legislative Council of Hongkong, this 2nd day of July 1908.

C. CLEMENTI,
Clerk of Councils.

Assented to by His Excellency the Governor, the 3rd day of July 1908.

F. H. MAY,
Colonial Secretary.

Government Notification No. 320 of 1899.

Order made by the Governor-in-Council under Section 3 of Ordinance 10 of 1899, this 8th day of June 1899.

The following Ordinances, together with any existing Rules, Regulations, Bye-laws, Orders-in-Council, Notifications, or Proclamations, made under such Ordinances, or any of them, shall apply to the New Territories on the 12th day of June 1899, namely :—

The Raw Opium Ordinance, 1887. (No. 22 of 1887.)

The Prepared Opium Ordinance, 1891. (No. 21 of 1891.)

The Raw Opium Amendment Ordinance, 1891. (No. 22 of 1891.)

An Ordinance to amend the Prepared Opium Ordinance, 1891. (No. 4 of 1894.)

The Prepared Opium (Divans) Ordinance, 1897. (No. 15 of 1897.)

An Ordinance to amend the Prepared Opium (Divans) Ordinances, 1897. (No. 1 of 1898.)

The expression, New Territories, as used in this Order-in-Council shall have the same meaning as in Ordinance No. 10 of 1899.

J. G. T. BUCKLE,
Clerk of Councils.

COUNCIL CHAMBER,
HONGKONG.

Regulations made by the Officer Administering the Government in Council, on the 11th March 1902, under Section 7 of Ordinance 15 of 1897, in substitution for the Regulations made on the 1st March 1898.

(Published in the *Government Gazette* of the 27th March 1902.)

1.—Every licensed keeper of an Opium Divan shall provide at his own expense two photographs of himself, of which one shall always remain affixed to his licence and the other shall be affixed to the counterfoil of the licence.

2.—Every licensed keeper of an Opium Divan shall show his licence at all times to the Opium Farmer, Dross Opium Farmer, any Excise Officer, any Officer of the Police not being under the rank of Sergeant and any Officer of the Sanitary Board who may demand to inspect such licence.

3.—Every licensed keeper of an Opium Divan shall, before opening his divan to the public, enter into a bond with the Colonial Secretary in the sum of \$25 with one surety for the due performance of all conditions endorsed on the Opium Divan Licence, of all Sanitary Bye-laws, and of these Regulations.

4.—Every licensed keeper of an Opium Divan shall pay an annual fee of \$10 payable half-yearly in advance on the 1st March and 1st September; if such fee be not paid within one calendar month from the date when it falls due, the Opium Divan Licence in respect of which the fee is in arrear shall be deemed to have been cancelled unless the Governor shall otherwise direct.

5.—Opium Divans shall be divided into two classes, viz., First Class Divans in which Prepared Opium may be smoked, and Second Class Divans in which Dross Opium alone may be smoked.

6.—The penalty for the breach of any of Nos. 1, 2, and 3 of these Regulations shall be a sum not exceeding \$25.

R. F. JOHNSTON,
Acting Clerk of Councils.

COUNCIL CHAMBER,
HONGKONG, 11th March 1902.

Conditions to be endorsed on an Opium Divan Licence.

1.—Whenever property, of which the owner is not known to the licensed keeper, shall be found in an Opium Divan, the licensed keeper shall forthwith report to the nearest Police Station that such property has been found, shall furnish full particulars of such property to a Police Officer, and shall detain such property in safe custody till it is handed over to a Police Officer.

2.—Every licensed keeper of an Opium Divan shall keep ready for immediate use such number of hand buckets or other like appliance for the extinction of fire as the Superintendent of the Fire Brigade shall consider sufficient in each case.

3.—Any death which occurs in a licensed Opium Divan must be reported at once by the licensed keeper either at the Registrar General's Office or at a Police Station.

4.—All Sanitary Bye-laws in force for the time being must be observed under the penalties therein provided.

The attention of licensees is specially directed to the following requirements of the law :—

- (1.) Any death which occurs in a licensed Opium Divan must be registered at the Registrar General's Office within 48 hours. (Ordinance 16 of 1896, s. 11.)
- (2.) No person other than an adult male is to be permitted to smoke opium or dross opium in an Opium Divan. (Ordinance 15 of 1897, s. 6.)
- (3.) No female, not being the Opium Divan keeper or the wife or child of such keeper, is to be permitted or suffered to enter or remain in an Opium Divan. (Ordinance 15 of 1897, s. 6 as amended by s. 3 of Ordinance 1 of 1898.)
- (4.) No armed person is to be permitted to be in an Opium Divan. (Ordinance 15 of 1897, s. 6.)

Note.—Licensees of Opium Divans must make their own arrangements with the Opium Farmer with regard to any Opium or Dross Opium required by them in their business.

Order made by the Governor-in-Council, under the Prepared Opium Amendment Ordinance, 1904, Section 12C.

(Published in the Government *Gazette* of the 3rd March 1905.)

The following medicines are exempted from the provisions of section 12C. of the Ordinance :—

Battle's Bromidia,
 Battley's Liquor Opii Sedativus,
 Browne's, Collis, Chlorodyne,

S. B. C. ROSS,
Clerk of Councils.

COUNCIL CHAMBER,

HONGKONG, 24th February 1905.

Addition to Bye-law 1 of the Bye-laws governing Opium Divans contained in Schedule
 "B" of Ordinance No. 1 of 1903.
 Made by the Sanitary Board under Section 16 of the said Ordinance.

(Published in the *Government Gazette* of the 26th May 1905.)

Provided that, in the case of any existing licensed opium-smoking divan on an upper
 storey, it shall be sufficient for the floor surface thereof to be paved with non-absorbent cement
 tiles or with encaustic or other approved tiles, such tiles to be laid evenly and bedded and
 jointed in cement, or for the floor to be constructed of smooth and well-jointed hardwood, to
 the satisfaction of the Board.

Made by the Sanitary Board this 18th day of April 1905.

W. BOWEN ROWLANDS,
Assistant Secretary.

Approved by the Legislative Council this 25th day of May 1905.

A. G. M. FLETCHER,
Clerk of Councils.

COLONIAL SECRETARY'S DEPARTMENT.

No. 157.—The Opium Farmer has, under the provisions of Section 12 D of the Prepared Opium Ordinance, 1891, as amended by Ordinance No. 10 of 1904, established his premises at Nos. 36 and 38 Bonham Strand West as a bonded warehouse for the use of dealers in compounds of opium imported for exportation from the Colony and not for sale or use therein.

Until further notice no fee or other charge will be payable in respect of the storage of such compounds of opium in the said premises.

T. SERCOMBE SMITH,
Colonial Secretary.

20th February 1906.

COLONIAL SECRETARY'S DEPARTMENT.

No. 939.—It is hereby notified that His Excellency the Governor has been pleased to establish under Section 12D of the Prepared Opium Amendment Ordinance, 1906 (Ordinance No. 15 of 1906), the Godowns of the Hongkong and Kowloon Wharf and Godown Company, Limited, situate at Kowloon, as a bonded warehouse for the use of dealers in morphine and compounds of opiums imported for exportation and not for use or sale in the Colony.

T. SERCOMBE SMITH,
Colonial Secretary.

8th November 1906.

Regulations made by the Governor-in-Council under Section 12D of the Prepared Opium Amendment Ordinance, 1906 (Ordinance No. 15 of 1906), with regard to the storage and removal of Morphine and Compounds of Opium imported for exportation in and from the Bonded Warehouses established by the Governor and the Opium Farmer under Notification No. 939 of the 8th November 1906, and to the payment of charges for storage therein.

(Published in the *Government Gazette* of the 8th November 1906.)

1.—The bonded warehouses shall be open for the storage and removal of morphine and compounds of opium between the hours of 9 a.m. and 5 p.m., Sundays excepted.

2.—The storage charges shall be such as shall be fixed by the Hongkong and Kowloon Wharf and Godown Company and by the Opium Farmer respectively but shall in no case exceed the charges ordinarily demanded by the Godown Company.

3.—No morphine or compounds of opium shall be removed from the bonded warehouses until all storage charges shall have been paid unless with the consent of the Godown Company or the Opium Farmer as the case may be.

4.—No morphine or compounds of opium shall be stored in any bonded warehouse whatsoever until the importer has made the declaration required by Section 12B of the Ordinance and has obtained from the Superintendent of Imports and Exports a written permit to store such morphine or compounds of opium.

Such permit may be in the Form No. 1 attached to these Regulations.

5.—No morphine or compounds of opium stored in a bonded warehouse shall be removed without a written permit for that purpose having first been obtained from the Superintendent of Imports and Exports.

Such permit may be in the Form No. 2 attached to these Regulations.

6.—All original storage and removal permits shall be delivered to the Godown Company or the Opium Farmer as the case may be and shall be forthwith returned by them to the Superintendent of Imports and Exports.

7.—The Superintendent of Imports and Exports, his staff and Police shall at all times have access to all morphine and compounds of opium stored in bonded warehouses.

A. G. M. FLETCHER,
Clerk of Councils.

COUNCIL CHAMBER,
8th November 1906.

A. G. M. FLETCHER,
Clerk of Councils.

COUNCIL CHAMBER,
 11th March 1907.

Regulations made by the Governor-in-Council under Section 6A of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for prescribing the character and scope of the course of study and examination required to have been passed by applicants for registration under Section 4 of the above-mentioned Ordinance, this 17th day of August 1908.

(Published in the *Government Gazette* of the 21st August 1908,
 Government Notification No. 561.)

1.—The applicant must have attained the full age of 21 years and must produce a certified declaration that for three years he has been engaged practically in the translation and dispensing of prescriptions.

2.—The applicant must be able to pass an examination in Pharmaceutical and General Chemistry and Physics as applied to Chemistry. He must understand chemical theory, the general characters of the non-metals and their methods of preparation, the general characters, classification, and extraction of the metals, and the general methods of forming oxides and salts.

He must have a knowledge of carbon, its oxides, of cyanides, oxalic acid, of the chief methods of preparing methane, ethane, ethylene, acetylene, methyl and ethyl alcohols, formic and acetic aldehydes and acids, glycerol, benzene, phenol, chloral hydrate, chloroform, iodoform, and ether, and of the principal properties, reactions and mutual relations of these compounds.

The applicant must be able to determine the specific gravities of liquids and solids, to analyse a mixture containing not more than two metals and two acid radicles, to recognise by chemical tests the more important non-metallic elements and compounds, and the more important metals and their salts, to recognise by their physical properties those which possess well defined characteristics, and to identify by chemical tests hydrocyanic acid, cyanides, oxalates, acetates, cane sugar, grape sugar, salicin, quinine, morphine, strychnine, and their salts.

He must be able to prepare and use the volumetric solutions described in the British Pharmacopœia.

3.—In Botany and Materia Medica he must have a general knowledge of the external form of plants and a general acquaintance with the elements of plant anatomy, and must be able to recognise specimens of any crude drugs mentioned in the British Pharmacopœia.

4.—In Pharmacy the applicant is required to show a general knowledge of the processes, and understand the principles of the processes by which the official preparations belonging to the following classes are made:—collodions, confections, decoctions, dilute acids, extracts (solid and liquid), glycerines, infusions, juices, liniments, lotions, mixtures, ointments, pill masses, plasters, powders (simple and compound), solutions, spirits, suppositories, syrups, tinctures, vinegars, waters and wines. A knowledge of the proportion of active ingredient or crude material in official preparations containing aconite, antimony, arsenic, belladonna, calabar

bean, cantharides, chloral hydrate, chloroform, caustic potash and soda, colchicum, digitalis, elaterinum, ergot, iodine, iodoform, ipecacuanha, lead, mercury, nux vomica, opium, phosphorus, scammony, stramonium, squill, alkaloids and alkaloidal salts.

He must have also a knowledge of the law relating to the sale of poisons.

5.—In dispensing the applicant must be able to weigh, measure, and compound medicines; to write the directions in concise language in a neat and distinct hand; to finish and properly direct each package.

6.—In prescriptions he must be able to translate autograph prescriptions into English, to detect errors, discover unusual doses, and have a general knowledge of Posology, and to calculate percentages and other quantities occurring in prescriptions.

7.—Applicant may be exempted from examination in any subject provided that he can produce a certificate from some duly recognised examining body that he has passed as thorough and efficient an examination in that subject as is required by these regulations.

Candidates must not take into the Examination Rooms or Laboratories any books or any notes or memoranda, whether written or in print.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6B of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the fees payable by applicants in respect of examination, this 17th day of August, 1908.

(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 562.)

1.—An applicant for registration under Section 4 must forward to the Colonial Secretary with his application the sum of twenty-five dollars, which is payable whether or not the applicant is examined in all or any subject, or submits certificates in lieu of examination. This fee shall cover the cost of registration in case the applicant is approved for such.

2.—In case an applicant is not approved for registration or fails in an examination, a fee of fifteen dollars shall be payable in any subsequent application or examination.

3.—An applicant who for any good and sufficient reason has been unable to attend an examination arranged for him, may sit again on payment of a reduced fee of ten dollars.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6C of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the issue of certificates by examiners, this 17th day of August, 1908.

(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 563.)

1.—The certificate granted to an applicant who has passed in any examination required under this Ordinance shall read as follows:—

INTERNATIONAL OPIUM COMMISSION

GOVERNMENT OF HONGKONG.

This is to certify that.....
has passed an examination in.....
.....

As witness.....
.....
.....

Examiners.

Date.....

2.—The certificate shall be sent by the examiners to the Colonial Secretary who shall forward it to the successful applicant.

3.—If the certificate shows that the applicant has passed in all the subjects required for registration, the following words shall be added to it:—

Approved for registration as a Chemist and Druggist,

.....
Colonial Secretary.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6D of The Pharmacy Ordinance, 1908, (Ordinance No. 12 of 1908), for the amount of fee (if any) payable on registration, this 17th day of August, 1908.

.....
(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 564.)
.....

The fee for registration shall be ten dollars payable to the Colonial Secretary.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6E of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the keeping, dispensing, and selling of poisons by registered persons, this 17th day of August, 1908.

.....
(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 565.)
.....

1.—In the keeping of poisons each bottle, vessel, box, or package containing a poison shall be labelled with the name of the article, and also with some distinctive mark indicating that it contains poison.

2.—In the keeping of poisons, each poison shall be kept on one or other of the following systems:—

- (a.) In a bottle or vessel tied over, capped, locked, or otherwise secured in a manner different from that in which bottles or vessels containing ordinary articles are secured in the same warehouse, shop, or dispensary; or
- (b.) In a bottle or vessel rendered distinguishable by touch from the bottles or vessels in which ordinary articles are kept in the same warehouse, shop, or dispensary; or
- (c.) In a bottle, vessel, box, or package kept in a room or cupboard set apart for dangerous articles.

3.—In the dispensing and selling of poisons, all liniments, embrocations, lotions and liquid disinfectants containing poison shall be sent out in bottles rendered distinguishable by touch from ordinary medicine bottles, and there shall also be affixed to each such bottle (in addition to the name of the article, and to any particular instructions for its use) a label giving notice that the contents of the bottle are not to be taken internally.

4.—In the selling of arsenic and its preparations

- (a.) the poison, if colourless, must be mixed with soot or indigo so as to colour it;
- (b.) the person to whom the poison is sold or delivered must be apparently not less than sixteen years of age;
- (c.) the occupation as well as the name and address of the purchaser, must be entered in the "Poison Book";
- (d.) when the purchaser is not known to the seller and is introduced by some person known to both, this person shall be present as a witness to the transaction, and shall enter his name and address in the "Poison Book";
- (e.) the requirements of Section 10 of the Ordinance must also be carried out as required by such Ordinance.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6F of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the issue of licences to wholesale dealers, this 17th day of August, 1908.

(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 566.)

1.—Applicants for licences to sell poison in wholesale quantity must forward to the Colonial Secretary with their applications particulars of the nature or composition of the poison, or preparation of poison, to be sold, and of the purpose to which it is to be applied, and of the nature and size of the packages, and of the place of storage.

2.—Licences must be renewed annually.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in Council under Section 6G of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the payment of fees in respect of licences granted to wholesale dealers, this 17th day of August, 1908.

(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 567.)

The fee for such licence shall be ten dollars for each poison or preparation of poison sold.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6H of The Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the imposition of penalties on the violation of any or either of the conditions embodied in such licences or otherwise on breach of any regulation made in pursuance of the said section and the mode of recovery of the same, this 17th day of August, 1908.

(Published in the *Government Gazette* of the 21st August 1908,
Government Notification No. 568.)

Any person violating any condition embodied in wholesale licences or otherwise violating the provisions of any regulation made under Section 6 of the said Ordinance shall be liable to a penalty not exceeding twenty-five dollars to be recovered summarily before a Magistrate.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
17th August 1908.

Regulations made by the Governor-in-Council under Section 6F of the Pharmacy Ordinance, 1908 (Ordinance No. 12 of 1908), for the issue of Licences to Wholesale Dealers in Cocaine and its Salts together with the conditions on which such licences are granted, this 23rd day of December, 1908.

(Published in the *Government Gazette* of the 31st December 1908,
Government Notification No. 973.)

1.—Every wholesale licence to deal in Cocaine and its Salts shall be in the form No. 1 attached to these Regulations.

2.—The conditions upon which every such licence is granted shall be as follows :—

- (1.) Every bottle or other receptacle in which Cocaine or its Salts are contained shall be labelled in English and Chinese with the name Cocaine (or the name of the Salt) and the word "Poison" and every outside package in which such bottles or receptacles are packed shall be labelled with the name Cocaine.
- (2.) The licensee shall import Cocaine and its Salts for purposes of export from the Colony only ; and except for purposes of such export the licensee shall not sell or otherwise part with Cocaine or its Salts within the Colony.
- (3.) Cocaine and its Salts shall be exported in the original boxes, cases, or packages in which they are imported, and the breaking bulk of such boxes, cases or packages is strictly prohibited.

- (4.) The licensee shall on the importation of Cocaine or its Salts truly declare before the Superintendent of Imports and Exports the number and marks of the boxes, cases, or packages in which the Cocaine or its Salts are contained; and on the exportation of the Cocaine or its Salts shall truly declare the destination of such Cocaine or its Salts.
- (5.) The licensee shall store any Cocaine or its Salts he may desire to keep in the Colony, in the Bonded Warehouse established with the Hongkong and Kowloon Wharf and Godown Company for the purpose.
- (6.) The storage charges shall be fixed by the Hongkong and Kowloon Wharf and Godown Company, but shall in no case exceed the charges ordinarily demanded by the Godown Company.
- (7.) No Cocaine or its Salts shall be removed from the Bonded Warehouse, until all storage charges shall have been paid, unless with the consent of the Godown Company.
- (8.) No Cocaine or its Salts shall be stored in the Bonded Warehouse until the importer has made the declaration required under condition (4) and has obtained from the Superintendent of Imports and Exports written permit to store such Cocaine or its Salts.
Such permit shall be in the form No. 2 attached to these Regulations.
- (9.) No Cocaine or its Salts stored in the Bonded Warehouse shall be removed without a written permit for that purpose having first been obtained from the Superintendent of Imports and Exports. Such permit may be in the form No. 3 attached to these Regulations.
- (10.) All original storage and removal permits shall be delivered to the Godown Company and shall be forthwith returned by them to the Superintendent of Imports and Exports.
- (11.) The Superintendent of Imports and Exports, his Staff and the Police shall at all times have access to all Cocaine and its Salts stored in the Bonded Warehouse.

C. CLEMENTI,
Clerk of Councils.

COUNCIL CHAMBER,
23rd December 1908.

Clerk of Councils.

The fee for this licence is \$25 payable annually in advance.

Conditions of Licence.

1.—All morphine and compounds of opium as defined by Section 2 of the Prepared
Opium Amendment Ordinance, 1906 (other than such as are exempted by the Governor in
Council under Section 4, 12C, of the Prepared Opium Amendment Ordinance, 1906, and
other than those prepared in particular cases on the prescription of a registered medical
practitioner) shall be kept in receptacles securely fastened and sealed and shall only be sold in
packages of a minimum value of 20 cents each.

2.—The licensee shall keep a book of certificates with counterfoils numbered consecutively, and shall give to each purchaser of any morphine or compound of opium, not exempted under Section 4, 12C, as aforesaid, not prepared on the prescription of a registered medical practitioner, a certificate showing the nature and quantity of the morphine or compound of opium purchased, the name and address of the purchaser and the date of purchase.

3.—The licensee shall enter in the counterfoil of every such certificate particulars of each sale of any morphine or compound of opium (not exempted as aforesaid) including the date of sale and the name and address of the purchaser, and if the morphine or compound of opium is prepared on the prescription of a medical practitioner the name and address of such practitioner.

4.—The licensee shall enter in a stock book a description of, the quantity of, and date of receipt of, all morphine and compounds of opium (not exempted as aforesaid) received by him for the purposes of his business or for any other purpose.

5.—The licensee shall enter in a stock book a description of, and the quantity of morphine and compounds of opium upon which he claims exemption from duty under Section 4 12C, of the above-mentioned Ordinance.

6.—The premises and books of the licensee shall at all times during business hours be open to the inspection of a Government Officer and a representative of the Opium Farmer appointed in that behalf by the Governor.

II.

HONGKONG OPIUM FARM.

Conditions of Tendering.

1.—No tender will be received unless the tenderer produces a receipt from the Treasurer for—

- (i) A deposit of \$30,000, or of Title Deeds, or other approved securities to a like amount, and
- (ii) An agreement, to be executed by him on a form provided by the Treasurer, to the effect that, if he should decline to accept a grant of the Farm on the terms of the tender sent in by him or fail to give the prescribed security for such grant, such deposit or securities shall be forfeited to the Crown.

Such deposit must be completed not later than Noon on the 30th day of August 1906. All deposits will be returned to unsuccessful tenderers.

2.—The tender must state the monthly sum offered for the Farm as rent.

3.—The Government does not bind itself to accept the highest or any tender.

4.—The successful tenderer shall before the 1st day of January 1907, deposit with the Treasurer approved security, either money or title deeds, to the value of three months' rent of the Farm for the due performance of the conditions on which the privilege is granted and of the stipulations or agreement in respect thereof, and the security previously deposited with the Treasurer on the tender being received will be retained until such successful tenderer shall have deposited such security. Particulars of the security offered must be submitted to the Treasurer before the 1st day of November 1906, for the approval of the Government, and the security shall be in such form as the Treasurer may require. Title deeds of land in any British Territory may be submitted for approval.

5.—The Governor-in-Council will execute to the accepted tenderer a Grant in the form, or as near thereto as may be, hereinafter set out, as soon as the security has been completed to the satisfaction of the Governor-in-Council: and the Grantee shall sign a counterpart of such Grant.

6.—During the continuance of the privileges the successful tenderer shall be entitled to the use of a trade mark to be approved by the Governor-in-Council on all Opium prepared by him.

Conditions to be fulfilled by the Grantee of the Opium Farm, and the breach of which will involve liability to the forfeiture of the Grant and of the Security deposited with the Treasurer.

- (1.) To pay the monthly fee regularly in advance, from the 1st day of March 1907, on the first day of each month.
- (2.) To have no Opium in possession except what is reported through the Imports and Exports Office; and, unless the special permission of the Governor to exceed that amount is obtained, to draw not more than 300 chests in any two consecutive months, of which not more than 175 chests are to be drawn in any one month.
- (3.) Not to part with any Opium in the raw state either by sale or otherwise, but only prepared Opium fit for smoking.
- (4.) Not to grant to any person any licence to boil or prepare Opium.
- (5.) To have one establishment only for boiling; such establishment to be approved by the Governor.
- (6.) Not to have loose Opium (as defined by the Raw Opium Ordinance, 1887) elsewhere than in his boiling establishment or any raw Opium other than that covered by removal permit.
- (7.) To supply the licensees of Opium Divans, duly licensed by the Colonial Secretary under the Prepared Opium Ordinance, 1891, with any Opium and dross Opium required by them, at rates not exceeding the market rates at the time.
- (8.) No transfer of the grant will be permitted except with the previous approval of the Governor-in-Council.

FORM OF GRANT.

To all to whom these presents shall come I,

Governor and Commander-in-Chief of the Colony of Hongkong and its Dependencies, and Vice-Admiral of the same, in Executive Council, send Greeting :

Whereas, by the Prepared Opium Ordinance, 1891, it is enacted, amongst other things, that the Governor-in-Council may grant, in the manner provided by the said Ordinance, to any person, for such considerations and upon such conditions and for such periods and in such form as, from time to time, may be determined by the Governor-in-Council, the sole privilege of preparing Opium, and of selling, within the Colony, Opium so prepared, inclusive of the privilege of collecting dross and of preparing and dealing in Dross Opium,—And that the accepted bidder for, or the grantee of, such privileges, before he shall become entitled to the benefit thereof, shall give such security as the Governor-in-Council may require for the due performance of the conditions of such privileges and of his stipulations or agreement in respect thereof; And Whereas the Governor-in-Council has accordingly agreed to grant to _____ (hereinafter referred to as the Grantee) the privileges hereinbefore mentioned, and known as the Opium Farm, established under the said Prepared Opium Ordinance, for the term of three years from the 1st day of March, 1907, (inclusive) for the monthly sum of _____ on the conditions hereinafter contained: And Whereas the Grantee has given the prescribed security for such grant to the satisfaction of the Governor-in-Council.

Know Ye, therefore, that in pursuance of the said agreement and in consideration of the premises and of the payment by the Grantee of the monthly sum of _____ on the first day of each month, in advance, during the term hereby granted, and in pursuance of the said Ordinance, I, the said Governor, by and with the advice of the said Executive Council, have given and granted and by these presents (the form whereof has been determined by me in Council) under the seal of the said Colony for myself and my successors in the Government of the same, do give and grant unto the Grantee his executors and administrators, the sole privilege of preparing Opium and of selling within the said Colony (including the New Territories) Opium so prepared inclusive of the privilege of collecting dross, and of preparing and dealing in dross Opium, for and during the term hereinafter expressed, in conformity with, and subject to the Ordinances in that behalf provided, and to the following conditions and stipulations :—

1.—That the said monthly sum of \$ _____ shall, during the said term, be paid regularly in advance to the Colonial Treasurer and without demand on the first day of each calendar month, the first of such payments being made on the 1st day of March 1907.

2.—That the Grantee shall not transfer this Grant to any other person or corporation unless he shall first have obtained the written permission of the Governor-in-Council to do so; any permitted transfer shall be in such form as the Governor-in-Council may approve.

3.—That the Grantee shall have no Opium in possession except what is reported through the Imports and Exports Office; and, unless the special permission of the Governor to exceed that amount is obtained, shall not draw more than three hundred chests in any two consecutive months, of which not more than 175 chests shall be drawn in any one month.

4.—That the Grantee shall not part with any Opium in the raw state either by sale or otherwise, but only prepared Opium fit for smoking.

5.—That the Grantee shall not grant to any person any licence to boil or prepare Opium.

6.—That the holder of the said privileges shall have only one establishment for boiling and preparing Opium; such establishment to be approved by the Governor.

7.—That the Governor shall be at liberty at any time to depute such person or persons as he may think fit to supervise the boiling and preparation of Opium in the boiling establishment.

8.—That the Grantee shall not have loose Opium (as defined by the Raw Opium Ordinance, 1887), elsewhere than in his boiling establishment, and shall not have in his possession or under his control any raw Opium other than that covered by a removal permit authorizing the conveyance of such raw Opium to such establishment.

9.—That the Grantee will supply the licensees of Opium Divans duly licensed by the Colonial Secretary under the Prepared Opium Ordinance, 1891, with the Opium and Dross Opium required by them at rates not exceeding the market rates at the time.

10.—That the breach of any of the above conditions and stipulations shall involve the liability to a forfeiture of the grant and of the security deposited with the Colonial Treasurer.

And so as that the Grantee his executors, and administrators, subject to such conditions and stipulations, shall and lawfully may have and enjoy the whole profit, benefit, commodity, and advantage, from time to time, during the said term, coming, growing, accruing and arising by reason of the said privileges. To have, hold, use, exercise, and enjoy the premises hereby granted, subject as aforesaid, together with the power to grant licences as in the said Ordinances provided, subject to such conditions as shall from time to time be approved by the Governor-in-Council, and all other powers incident to the said privileges, and all benefit and advantage of the said Ordinances and conditions or any of them, unto the Grantee, his executors, and administrators, for and during and unto the full end and term of three whole years commencing with the 1st day of March 1907: Provided always and these presents are upon this express condition, that if, at any time during the said term hereby granted, the Grantee, his executors, or administrators, shall not, upon his or their part or behalf, pay the said monthly rent at the time appointed or shall fail to observe, perform, and keep any of the said conditions and stipulations, or any of the provisions of these presents, or of the said Ordinances or any of them, then and in any or either of the said cases it shall be lawful for the Governor-in-Council to cancel these presents, and in such case the same shall forthwith cease, determine and be utterly void, save as hereinafter provided: Provided always, and it is hereby expressly declared, that the said _____, executors, or administrators shall be and remain liable to make good to the Governor all losses and expenses incurred by reason of such default in payment or by reason of the non-observance or non-performance of any of the said conditions and stipulations or any of the provisions of these presents or of the said Ordinances, or by reason of any re-sale or re-grant of the said privileges which the Governor-in-Council may thereupon make.

Provided always that in the event of the exportation of Raw Opium from India being so restricted during the term hereby granted, as in the opinion of the Governor-in-Council seriously to affect the business of the Grantee, the onus of proof whereof shall rest on the Grantee, the Governor-in-Council upon the application of the Grantee, shall reduce the rent payable under this grant to such an extent or may modify the terms of this grant in such other manner as to the Governor-in-Council may seem equitable.

Provided also that in the event of the exportation of Raw Opium from India being prohibited during the term hereby granted and the Grantee not being able to procure sufficient opium for boiling the Grantee may give notice to the Governor-in-Council of his desire to surrender this grant, and, if, in the opinion of the Governor-in-Council such prohibition seriously affects the business of the Grantee, the onus of proof whereof shall rest on the Grantee, the Governor-in-Council shall thereupon, or so soon thereafter as he may deem desirable cancel the same. Nothing in the two preceding provisos is to be taken to mean that an alteration in the quantity of opium exported from India is to be accepted as *prima facie* evidence that the Farmer is entitled to a reduction of rent or to a modification of the terms of this grant.

In Witness whereof, I, the said governor, have set my Hand and the Seal of the said Colony to these presents on the _____ day of _____ 190 .

BYE-LAWS GOVERNING OPIUM DIVANS.

Schedule B of the Public Health and Buildings Ordinance, 1903 (No. 1 of 1903).

1.—Every opium-smoking divan shall be adequately lit and ventilated to the satisfaction of the Board and shall be paved with good lime or cement concrete laid down at least six inches thick, and the surface thereof shall be rendered smooth and impervious with asphalt, cement, or such other material as the Board may approve of.

Provided that, in the case of any existing licensed opium-smoking divan on an upper storey, it shall be sufficient for the floor surface thereof to be paved with non-absorbent cement-tiles or with encaustic or other approved tiles, such tiles to be laid evenly and bedded and jointed in cement, or for the floor to be constructed of smooth and well-jointed hardwood, to the satisfaction of the Board.

2.—Every opium-smoking divan shall be so drained as to be in accordance with the requirements of the Public Health and Buildings Ordinance and the bye-laws made thereunder, and all inlets to the drains shall be placed outside the building.

3.—Every opium-smoking divan shall be at all times open to inspection by any officer or member of the Board *or officer of the Sanitary Department.*

4.—The keeper of an opium-smoking divan shall not permit his premises to be occupied between the hours of midnight and 5 o'clock a.m. by a greater number of persons than such as will allow for each adult not less than fifty square feet of habitable floor space or superficial area, and five hundred and fifty cubic feet of clear and unobstructed air space. [*Exemption deleted in effect by Section 13 of Ordinance 23 of 1903.*]

5.—The keeper of an opium-smoking divan shall cause the windows and ventilating openings of his premises to be kept at all times free from obstruction, and shall daily open the windows to such an extent and at such times as any be necessary for the efficient ventilation of the premises unless prevented by inclement weather or by the illness of any person occupying the said premises.

6.—The keeper of an opium-smoking divan shall cause the internal walls and ceilings of every part of his premises to be thoroughly cleansed and lime-washed during the months of January, April, July and October of each year.

7.—The keeper of an opium-smoking divan shall at all times keep his premises in a clean and wholesome condition, and shall cause all filth and house refuse or other offensive matter to be removed from his premises daily.

8.—The keeper of an opium-smoking divan shall, without delay report at the office of the Board, every case of serious illness which shall occur upon his premises, and should such case prove to be of a contagious nature, he shall afford every facility for the removal of the sick person and shall adopt all such precautions as the medical officer of health or other duly authorized officer of the *Sanitary Department* shall direct. For the purposes of this bye-law any officer in possession of instructions in writing signed by the secretary or by the medical officer of health shall be deemed to be duly authorized.

Eighth Session.

QUESTIONS PUT TO THE BRITISH DELEGATION.

A.—BY THE AMERICAN DELEGATION.

Dr. TENNEY:

1.—Referring to the statement concerning the amount of Malwa Opium now on hand (page 6, par. 30 of Report on India): in the opinion of the British Delegation would the fiscal difficulty in India be increased or diminished by shortening the period within which Opium may be exported from India to China, in view of the fact that Opium cultivation is still continuing and the stock of Opium accumulating?

Dr. HAMILTON WRIGHT :

2.—Is it possible for the Government of India to prevent the passage across British Indian Territory to the sea of Opium produced in the Native States ?

3.—With the gradual suppression of poppy growth in the Bengal Agencies to meet the lessened exportation from Calcutta, could any means be taken to prevent an increased growth in Cashmir and Nepal ?

4.—Is there or is there not an Agreement between the British Indian Government and the Nizam of Hyderabad which prevents the growth of poppy in that State, and could not similar Agreements be made by the British Indian Government with other Native States in which the poppy is grown and opium produced for export ?

B.—BY THE CHINESE DELEGATION.

Mr. T'ANG :

According to existing arrangements made between the Chinese and British Governments, will the reduction annually for ten years by 5,100 chests of Opium from the total Indian export mean that a corresponding reduction in the import of Indian Opium into China is assured, irrespective of the conditions of demand in China ?

ANSWERS TO THE QUESTIONS PUT TO THE BRITISH DELEGATION.

A.—BY THE AMERICAN DELEGATES.

1.—The British Delegates are unable to discuss the hypothetical case put in the question, which assumes a departure from the agreement relating to the export of Opium from India which stands accepted by the Governments of Great Britain and China.

2.—The British Delegates are of opinion that the control exercised by the Government of India over their territories in the interior and at their seaports is sufficient to enable them to prevent the irregular export of Native States Opium by sea on any appreciable scale.

3.—The British Delegates regret that they have not the material on which to base a reply to this question.

4.—As regards the first part of the question there is in force an agreement between the Indian Government and His Highness the Nizam of Hyderabad under which the latter prohibits the cultivation of the poppy within his territories. The agreement provides that either of the parties shall be at liberty to withdraw from it after giving to the other party twelve months' notice.

As regards the second part of the of the question, the British Delegates are unable to express an opinion. They have already stated in their Memorandum on Opium in India that the situation in regard to the Native States is at the present moment under consideration.

B.—BY THE CHINESE DELEGATION.

The British Delegates are unable to amplify the evident significance of the diplomatic arrangement to which this question refers.

Tenth Session.

QUESTION PUT BY THE AMERICAN DELEGATION TO THE BRITISH DELEGATION.

Will the Right Hon. the Chief Commissioner for Great Britain please inform the Commission as to the amount of opium prepared for smoking shipped from Hongkong and the Straits Settlements to the Philippine Islands ?

*Eleventh Session.*ANSWER TO THE QUESTION PUT BY THE AMERICAN DELEGATION
TO THE BRITISH DELEGATION.

In Hongkong the preparation of opium for smoking is restricted by law to the Opium Farmer; and an examination of the Opium Farmer's books, made by the Government of Hongkong in May 1908, showed that the Opium Farmer did not ship any opium prepared for smoking to the Philippine Islands.

The exports from the Straits Settlements of opium prepared for smoking is illegal except with the written permission of the Superintendent of Excise. No permission has been granted in recent years to make such exports to the Philippine Islands.

Tenth Session.

QUESTION BY THE AMERICAN DELEGATION.

What is the ultimate destination of the net amount of crude opium retained each year in Great Britain and Ireland?

ANSWER.

The British Delegation has been informed by telegram that the British Board of Trade consider it probable that the whole amount is consumed in the manufacture of morphine, codeine and other chemical preparations.

QUESTIONS PUT BY THE CHINESE DELEGATION.

A.—TO THE BRITISH DELEGATION.

1.—Can the British Delegates supply trustworthy statistics giving the number of Opium smokers and the daily average consumption per smoker for the Colony of Hongkong as well as for the Adjacent Territories?

2.—Can the British Delegates supply trustworthy statistics giving the number of Opium smokers and the daily average consumption per smoker for the Straits Settlements and the Federated Malay States?

3.—Can the British Delegates give details of the Opium exported from Hongkong (see Table on page 3 of the British Memorandum) showing the quantity exported to China and the quantity exported to other countries?

ANSWERS BY THE BRITISH DELEGATION TO QUESTIONS PUT
BY THE CHINESE DELEGATION.

1.—As the registration of opium smokers in Hongkong and the New Territories has never been undertaken, it is impossible to state their precise number; and, without this number, it is impossible to calculate from the known weight of opium consumed in the Colony and the New Territories the daily average consumption per smoker.

2.—As the registration of opium smokers in the Straits Settlements and the Federated Malay States has never been undertaken, it is impossible to state their precise number; and, without this number it is impossible to calculate from the known weight of opium consumed in the Straits Settlements and the Federated Malay States, the daily average consumption per smoker.

3.—In reply to this question, the British Delegates submit the attached table showing the quantity of raw opium exported to various ports in China and to other countries from Hongkong in 1907.

Sixth Session.

ANSWER OF THE BRITISH DELEGATION TO THE FOLLOWING QUESTION
PUT BY THE AMERICAN DELEGATION.

SOUTH AFRICA.

2.—To what extent does Opium smoking exist amongst Chinese coolies on the Rand, and has the habit of Opium smoking spread from the Chinese population in South Africa to the other populations, white and black?

In the Transvaal importation of opium is regulated by the issue of permits from Colonial Secretary's Office, permits only being issued to registered chemists and druggists on receipt of their written applications and when their books have been inspected and the opium in stock found to have been legitimately disposed of.

Penalties for importing without license or contravening terms of a permit range from a fine not exceeding £500, in default of payment imprisonment with or without hard labour for not more than six months or to such imprisonment without option or both fine and imprisonment.

Medical practitioners and chemists can obtain opium on written application from any chemist authorized to import it.

General public, however, can be supplied with opium only on the production of certificate given by medical practitioner to the effect that the opium is necessary.

On the production of such certificate to magistrate or Justice of Peace sale of opium to the possessor of the certificate is authorized.

Not more than 2 lbs., however, can be supplied at one time.

Total amount of opium imported into the Transvaal during calendar year 1908 was 4,697 lbs. which was valued at £2,756.

No opium is exported from the Transvaal.

Sixth Session.

ANSWER BY BRITISH DELEGATION TO QUESTION PUT BY THE
AMERICAN DELEGATION ON FEBRUARY 12 1909.

NEW ZEALAND.

The import of opium in powder and extract amounted in 1907 to 106 lbs. and in 1908 to 28 lbs. There was no export. Opium may be imported only under permit for use as medicine and permits are not issued to Chinese. Tincture of opium, morphia, and alkaloids of opium are classified in import returns as drugs and medicines: separate returns of quantity imported are not kept.

Poppy is not cultivated in New Zealand.

ANSWER BY BRITISH DELEGATION TO QUESTION PUT BY THE
AMERICAN DELEGATION ON FEBRUARY 12 1909.

CAPE OF GOOD HOPE.

The import of opium in 1908 amounted to 1,232 lbs. of the value of £807. The export oversea was *nil*. Importation and use are prohibited except for medicinal purposes and can be sold only by chemists.

Eighth Session.

The Committee on Revenue Statistics, Tariffs, Excise, etc., requests information on the following points:—

1.—Ceylon, Hongkong, India, Federated Malay States, Straits Settlements, and Weihaiwei:—

Revenue derived from Opium (including import duties, license fees, farm rents and taxes of every description) during 1903 to 1907, and total revenue of the respective Colonies in local currency and in pounds sterling, and percentage of Opium to total revenue.

2.—Australia, Canada, New Zealand, and India:—
Tariff Duties, Excise, etc.

HONGKONG.

* The fiscal year was changed in 1907, so as to end on March 31, instead of on June 30.

INDIA.

1.—Statement A attached gives particulars of the Indian opium revenue in recent years. The figures exclude an insignificant amount of revenue derived from the customs duty on imports by sea, for which separate figures cannot be given.

2.—Statement B attached gives the gross revenue of India in recent years.

3.—Attention is also invited to the Memorandum on Opium in India which has been presented to the Commission by the British delegates, and the statements attached thereto.

4.—Revenue figures cannot be given for calendar years as the Indian accounts are compiled by the financial year (1st April to 31st March inclusive.)

5.—The rate of exchange to be taken in the conversion of Indian currency is Rs. 15 = £1.

Memorandum on Opium and Morphine presented to the
International Opium Commission at Shanghai
by the Italian Delegate.

There is no poppy cultivation to speak of in the Kingdom of Italy; from the rare plants, growing here and there, the fresh capules are taken, dried and used for medical purposes.

No opium, morphine, or derivates therefrom, are manufactured in the country which has no export of these drugs.

The statistics for for import show no special return of opium, morphine and derivates, such commodities coming under the heading "Poison"; however, it is roughly estimated that about 2080 kilogrammes of opium were imported during the year 1908, same being for purely pharmaceutical use.

The said quantity of opium in respect to the population of the kingdom, 33 millions inhabitants, gives an average, per head and pro year, of grammes 0.063, or say one grain.

Imports of morphine and derivates may be reckoned at a few hundred kilogrammes as imported during the year 1908.

There are, in Italy, no special laws regarding the importation, or the use, of opium and derivates which are governed by the law of December 22nd 1888, No. 5849, and respective regulations, on the order of Administration and Sanitary Assistance of the Kingdom.

In virtue of this law, the sale and trade of medicines, poison, etc., are strictly under the supervision of the proper authority and any person, other than that duly authorized, manufacturing, selling, or otherwise distributing poison is punished with a fine of 500 lire or with imprisonment extensible to one year.

Chemists, druggists and manufacturers of chemical products, authorized to store poison, and all such persons who, by reason of their profession, or their art, are authorized to use same, are obliged, under the law, to label all such parcels with the distinct specification of "Poison" and to keep them under lock and key.

Any person authorized to sell poison must keep a register, to be presented on request of the authorities, wherein the quantity and quality of poison sold, the date of sale, the name, prefix, and domicile of the buyer, shall be entered.

In concluding this brief report, it may be of interest to mention that com. 3rd. of Article 27 of the law above referred to, contemplates a fine of not less than 200 lire for any one selling or distributing, substances or preparations, advertised as remedies, or secret specifics, without first having submitted same to the approbation of the Superior Council of Health; the same punishment is inflicted to whoever sells, or distributes, remedies attributing to same, on labels or through advertisements to the public, compositions different from thar which they have and having special therapeutic properties not recognized by the Superiot Council aforesaid.

Control of Opium in Japan.

HISTORY OF THE CONTROL OF OPIUM.

The importation of opium had already been prohibited prior to the restoration; and in the treaty concluded by the Shogun Tokugawa Iyesada with Great Britain in 1858, it was stipulated that the importation of opium should be prohibited, that any opium in excess of three pounds found in a merchant vessel should be confiscated, and that any person secretly selling opium or attempting to sell it secretly should be liable to a fine of fifteen dollars for every pound of such opium. With the opening of the Meiji era the prohibition became still more strict. In the fourth month of the first year of Meiji (1868) the Dajokwan ordered the clans and prefectures to put up public notifications setting forth the evils of opium-smoking and, in view of the strict prohibition of not only the smoking, but also the sale, purchase, and transfer of opium, threatening with severe punishment any violation of such prohibition. In the eighth month of the third year (1870) were issued the Raw Opium Control Regulations, which caused druggists and physicians to report to the competent authorities the quantities of opium sold for medicinal purposes, and warned the Chinese residing in the country that not only would any violations of the prohibition against the smoking and transfer of opium be severely punished, but that confirmed smokers would without hesitation be deported from the country. Next, in 1880 the Criminal Code was promulgated and brought into force in January 1882; and in the first section of the fifth chapter of the second book the offences relating to opium-smoking were defined; these offences were the importation, manufacture, and sale of opium and implements for opium-smoking; the providing with a view to profit of a house for the smoking of opium; inducing others to smoke opium; opium-smoking; and ownership and custody of opium and implements for opium-smoking. These offences were comparatively speaking severely punished. (The Criminal Code was revised in 1907, and the provisions respecting the offences above referred to are made in Chapter XIV of the Second Book; see Annexé No. I.)

Thus, the importation and sale of opium was strictly prohibited; but while opium has very deleterious effects when smoked, it is at the same time an indispensable article for medicinal purposes, and if its importation were absolutely prohibited, it would cause serious inconvenience in medical treatment; and accordingly, the Imperial Government recognized the necessity of devising anew a method for its purchase. Although not a small quantity of opium was produced in Japan, its cultivation and manufacture were crude and its quality so ununiform that a great deal of it was unfit for medicinal purposes. And therefore, with a view to increase the production of an article of superior quality, the Government ordered in 1875 an inquiry to be made into the yield of opium in the years 1874-75, the methods of cultivation, extraction, and refinement of opium, and the kinds of poppy in cultivation, and required samples of the manufactured article to be presented at the same time. Over 10 samples of opium thus obtained were analyzed and revealed a great diversity in the quantity of morphine contained therein; the methods of extraction and refinement were found to differ with each locality; and in May, 1876, a description of these methods was given in the Report No. 2 of the Sanitary Bureau in the Department of Home Affairs. Later on, the articles manufactured in the various provinces were analyzed and it was found that while there was improvement in many cases, very inferior articles were also found; and in May, 1877, the results of these analyses were given together with an explanation of the best methods of manufacture in the Journal No. 7 of the Sanitary Bureau, and the copies of it were distributed to encourage the production of superior articles by stimulating further practical experience. But the home production was insufficient to meet the general demand; and it was proposed to devise a method of purchasing the foreign article with the object of making up the deficiency and to cause for that purpose all opium, Japanese or foreign, to be purchased by the Sanitary Bureau, where its quality for medicinal use was to be determined, thence to be distributed in the various provinces, and to appoint specially licensed druggists to sell opium, from whom all persons, Japanese or foreign, were to purchase the drug according to medical

prescriptions; in this way facilities would be given to Japanese and foreigners to purchase opium for medicinal use and at the same time the importation by individuals would be strictly forbidden. In accordance with these proposals the Regulations for the Sale and Manufacture of Opium for Medicinal Purposes were issued in August 1878 and came into force in May following. Again, Regulations for the Sale of Opium were specially established for the convenience of foreign residents; and from October 1878, the drug was specially dealt with at the *shiyakujo* (offices for supervising medicines) in Tokyo, Osaka, Yokohama, and Nagasaki, at the prefectural offices of Hyogo and Niigata, and at the Hakodate branch of the Kaitakushi (Hokkaido Colonization Department).

The home article was then purchased by the Home Department and, together with the opium imported from abroad, was examined and its quality determined at that department, after which it was sold to licensed druggists through the *shiyakujo* under the control of the same department or, where such offices did not exist, through the local administrative authorities. Again, although, for the purpose of procuring the material for the manufacture of opium for medicinal purposes, the Government, as has already been stated, had since 1875 given great encouragement to the home cultivators of poppy, and had even gone so far as to purchase at a suitable price inferior articles which were of no practical use on account of the smallness of the quantity of morphine contained therein, the climate of the country is unsuitable for the cultivation of poppy and the production of opium has dwindled and is now quite insignificant. During the last decade, the average annual yield of the home produce was 41.886 kilogrammes against 996.174 kilogrammes of the foreign article, or less than one-twenty-third of the latter.

The Regulations for the Sale and Manufacture of Opium for Medicinal Purposes of 1878 were replaced in 1897 by the Opium Law which had been approved by the Imperial Diet. Under this law, the opium for medicinal purposes is again made a Government monopoly and its importation and sale by individuals is prohibited; the Government makes an estimate of the quantity required for medicinal purposes and orders the raw material therefor from abroad, while the home article is without exception delivered to the Government which grants compensation at a fixed rate for the opium containing at least five per cent. of morphine and destroys without compensation that which contains less than that percentage; it is then pulverised and the quantity of morphine contained therein determined at the Tokyo Hygienic Laboratory (the former *shiyakujo*) and, after it has been made to conform to the provisions of the Japanese pharmacopœia, it is sent to the local authorities, who sell it to the druggists to whom they have given license to sell opium. This law has been in force ever since and no complaint has yet been heard of any inconvenience being experienced anywhere in the supply of opium for medicinal purposes.

A very strict control having, as has been stated above, been exercised over opium-smoking by the issue of a national prohibition against it before the people at large knew anything of the nature of opium, the country has been able to escape its evils, and it will be seen from one of the annexed tables that during the last 10 years only two Japanese were charged with smoking opium.

With regard to Formosa, the habit which was confirmed under the Chinese rule was not, when the island became Japanese territory, to be immediately got rid of, and the policy of gradual suppression was accordingly adopted.

Annexe No. 1.

CRIMINAL CODE.

(*Law No. 45, of the fortieth year of Meiji [1907].*)

BOOK II. OFFENCES.

CHAPTER XIV.—OFFENCES CONNECTED WITH OPIUM.

ARTICLE CXXXVI.—Any person who imports, manufactures, or sells opium or possesses it with a view to sale thereof shall be condemned to penal servitude for a term of not less than six months nor more than seven years.

ARTICLE CXXXVII.—Any person who imports, manufactures, or sells implements for smoking opium or possesses them with a view to sale thereof shall be condemned to penal servitude for a term of not less than three months nor more than five years.

ARTICLE CXXXVIII.—A Customs officer who imports or permits to be imported opium or implements for smoking opium shall be condemned to penal servitude for a term of not less than one year nor more than ten years.

ARTICLE CXXXIX.—Any person who smokes opium shall be condemned to penal servitude for a term not exceeding three years.

Any person who provides with a view to profit a house for the smoking of opium shall be condemned to penal servitude for a term of not less than six months nor more than seven years.

ARTICLE CXL.—Any person who possesses opium or implements for smoking opium shall be condemned to penal servitude for a term not exceeding one year.

ARTICLE CXLI.—Any attempt to commit the offences specified in the present chapter shall be punishable.

Annexe No. 2.

OPIUM LAW.

(Law No. 27, the 27th March, the thirtieth year of Meiji [1897].)

ARTICLE I.—A person who desires to manufacture opium must obtain the permission of the local Governor.

ARTICLE II.—The manufacturer of opium shall deliver to the Government the opium which he has manufactured not later than the twentieth day of December every year.

The opium mentioned in the preceding clause shall be examined and compensation given for such as shall contain the requisite quantity of morphine; but such as do not contain the said quantity shall be burnt and destroyed without any compensation being given therefor.

ARTICLE III.—Opium shall be sold by the Government solely for medicinal purposes in vessels sealed with the Government stamp.

No opium other than that sold by the Government shall be sold, purchased, given, received, owned, or possessed.

ARTICLE IV.—The requisite quantity of morphine to be contained in opium for which compensation shall be given according to the provision of Art. II, the amount of such compensation, and the price of the opium to be sold by the Government according to the provision of Art. III shall be notified by the Minister for Home Affairs.

In the event of its being proposed to increase the requisite quantity of morphine to be contained in opium for which compensation shall be given or to reduce the amount of such compensation, a previous notice of one year shall be given thereof.

ARTICLE V.—Opium shall be sold by a definite number of competent wholesale dealers who shall be appointed for the purpose by the local Governor from among the pharmacutists and druggists in his jurisdiction.

ARTICLE VI.—When a physician or dealer in medicines is in need of opium, he shall purchase it from the wholesale dealer by presenting a written order stamped with the purchaser's seal, which shall state the quantity required and his name and residence and the date of purchase.

A physician or medicine-manufacturer may purchase opium from a pharmacist or druggist, and pharmacutists and druggists may sell it to or purchase it from one another; in such cases, however, the written order mentioned in the preceding clause is required.

ARTICLE VII.—No opium shall be sold or purchased in any way other than that prescribed in the preceding article, except upon presentation of a medical prescription.

The pharmacist may sell opium in small quantities by opening a vessel which has been sealed by the Government or another pharmacist; in such case the opium shall be put in a suitable vessel which must also be sealed.

The druggist, whether wholesale or not, shall not sell opium in small quantities by opening a vessel which has been sealed by the Government or a pharmacist.

ARTICLE VIII.—Medical prescriptions and written orders mentioned in Art. VI shall be preserved for full 10 years from the date inscribed thereon.

ARTICLE IX.—Any person who manufactures opium without the permission of the local Governor or infringes the provision of the second clause of Art. III shall be liable to a fine of not less than one hundred yen nor more than five hundred yen.

ARTICLE X.—Any opium which has been manufactured without the permission of the local Governor or is other than that sold by the Government shall be confiscated.

ARTICLE XI.—Any person who infringes the provision of the first clause of Art. II shall be liable to a fine of not less than thirty yen nor more than three hundred yen.

ARTICLE XII.—Any person who infringes the provision of Art. VII or Art. VIII shall be liable to a fine of not less than ten yen nor more than one hundred yen.

ARTICLE XIII.—In the event of any manufacturer of opium or wholesale dealer therein infringing the provisions of the present Law or Regulations relating to the enforcement thereof, the local Governor may cancel the permission already given to the offender or his appointment as the case may be.

SUPPLEMENTARY PROVISIONS.

ARTICLE XIV.—The present law shall come into force on the first day of April of the thirtieth year of Meiji (1897).

ARTICLE XV.—A person who has already obtained permission to manufacture opium at the time the present law comes into force shall be deemed to have obtained the permission prescribed in Art. I.

ARTICLE XVI.—Opium which was taken custody of by the local authorities prior to the coming into force of the present law shall be burnt and destroyed.

ARTICLE XVII.—The Regulations for the Sale and Manufacture of Opium for Medicinal Purposes, published by Notification, No. 21, of the eleventh year of Meiji (1878), shall be abolished on the day the present law comes into force.

Annexe No. 3.

REGULATIONS FOR THE ENFORCEMENT OF THE OPIUM LAW.

(Ordinance No. 4, of the Department of Home Affairs, the 30th March, the thirtieth year of Meiji [1897].)

ARTICLE I.—The manufacturer of opium shall, when he proposes to deliver opium, present through the local authorities to the Department of Home Affairs a notice of delivery stating the quantity of opium, together with the article in question. To the article, however, shall be attached a wooden label stating its quantity and the name and residence of the manufacturer.

Upon receipt of the notice of delivery mentioned in the preceding clause, the local authorities shall forward the article to the nearest Hygienic Laboratory and, after recording this fact in the notice of delivery, present the said notice to the Department of Home Affairs.

The Hygienic Laboratory shall, upon receipt of the opium which has been forwarded to it as prescribed in the preceding clause, examine it and report the result to the Department of Home Affairs. The examination, however, shall not be required for an article delivered which is less than 5 *momme** in quantity.

ARTICLE II.—The vessels containing opium, which will be sold by the Government, shall be of three sizes, namely, one of 1 *momme*, one of 10 *momme*, and one of 50 *momme*; and each vessel shall be sealed with the stamp of the Hygienic Laboratory.

ARTICLE III.—The wholesale dealer in opium shall form an estimate of the quantity of opium which he expects to purchase from the Government during each half of a financial year (all years to be mentioned hereafter are financial years), and apply therefor to the local authorities by stating the sizes and numbers of the vessels required, provided, however, that he may make special application when he runs short of the article.

* A *momme* is equivalent to 3.76 grammes.

ARTICLE IV.—The wholesale dealer in opium shall put up over his shop a signboard announcing that opium is there sold wholesale.

ARTICLE V.—In the event of a manufacturer of opium or a wholesale dealer therein changing his social status, domicile, name, or residence, or discontinuing his occupation, or dying, the fact shall be reported within 10 days to the local authorities.

With regard to the opium already manufactured or remaining unsold when the manufacturer thereof or the wholesale dealer therein discontinues his occupation or dies and the occupation is not continued by his heir, such opium shall be delivered to the Government or the repurchase thereof applied for within the period prescribed in the preceding clause; the opium remaining unsold, however, may be transferred within the period prescribed in the present article to persons engaged in the same business.

ARTICLE VI.—The report, delivery, and application mentioned in Art. V shall, in case of death, be made by the head of the family, or by the heir of the deceased if the head of the family has not yet been declared or is absent, or by the person administering his estate if the heir has not yet been declared or is absent.

ARTICLE VII.—In the event of the local authorities appointing a wholesale dealer in opium or cancelling such appointment or of a wholesale dealer changing his name or residence, discontinuing the business, or dying, the said authorities shall notify his name and residence in their district of jurisdiction and at the same time report to the Department of Home Affairs.

ARTICLE VIII.—The pharmacist and the druggist, whether wholesale or not, shall record the quantities of opium sold and purchased, the names and residences of the persons from whom it was purchased and to whom it was sold, and the dates of such transactions, and preserve the records for 10 years. The record prescribed in the present article is not, however, required for opium dispensed by pharmacutists to patients in accordance with medical prescriptions.

ARTICLE IX.—The wholesale dealer in opium shall draw up an account of sales and purchases of opium during each financial year and present it to the local authorities not later than one month from the close of the year in question.

The local authorities shall draw up an account of sales and purchases of opium during each financial year and report to the Department of Home Affairs not later than two months from the close of the year in question.

ARTICLE X.—Any person who infringes the provision of Art. IV or Art. IX shall be liable to a fine of not less than 50 sen nor more than 1.95 yen.

ARTICLE XI.—Any person who infringes the provision of Art. V or Art. VIII shall be liable to a fine of not less than 2 yen nor more than 25 yen.

SUPPLEMENTARY PROVISION.

ARTICLE XII.—The present Regulations shall come into force on the first day of April in the thirtieth year of Meiji (1897).

Annexe No. 4.

QUANTITIES OF MORPHINE CONTAINED IN OPIUM FOR WHICH COMPENSATION SHALL BE GIVEN ACCORDING TO THE PROVISION OF ARTICLE IV OF THE OPIUM LAW, AMOUNTS OF SUCH COMPENSATION, AND PRICES OF OPIUM TO BE SOLD BY THE GOVERNMENT.

(Notification No. 30, of the Department of Home Affairs, the 30th March, the thirtieth year of Meiji [1897].)

The quantities of morphine contained in opium for which compensation shall be given according to the provision of Art. IV of the Opium Law, the amounts of such compensation, and the prices of opium to be sold by the Government are determined as hereunder:—

The amount of compensation for opium containing not less than 9 per cent. of morphine shall, however, up to the 31st day of March in the thirty-first year of Meiji (1898), be calculated at the rate of purchase hitherto in use.

Quantity of morphine in opium for which compensation is to be given :

The quantity of morphine to be not less than 5 per cent. of the opium.

Amounts of compensation of opium :

	<i>Yen.</i>
Opium containing at least 5 per cent. but less than 6 per cent. of morphine	1.00 per 100 <i>momme</i>
Opium containing at least 6 per cent. but less than 7 per cent. of morphine	1.50 " "
Opium containing at least 7 per cent. but less than 8 per cent. of morphine	2.00 " "
Opium containing at least 8 per cent. but less than 9 per cent. of morphine	2.50 " "

For opium containing at least 9 per cent. but less than 12 per cent. 1 yen for every one per cent. in excess of 9 per cent.; for opium containing at least 13 per cent., 50 sen for every one per cent. in excess.

For a delivery of opium which is less than 5 *momme* in quantity compensation shall be given at the rate of 1 yen per 100 *momme* irrespectively of the percentage of morphine contained therein.

Prices of Opium to be sold by the Government:

	<i>Yen.</i>
1- <i>momme</i> vessel	0.10
10- <i>momme</i> vessel	1.00
50- <i>momme</i> vessel	5.00

Annexe No. 5.

REGULATIONS FOR THE SALE AND HANDLING OF MEDICINES.

(Promulgated by Law No. 10, March 1889, and amended by Law No. 6, June 1892, by Law No. 6, February 1899, and by Law No. 35, April 1807).

CHAPTER I.—PHARMACEUTISTS.

ARTICLE I.—By the term "Pharmacist" is meant a person who opens a pharmaceutical office and compounds medicines in accordance with medical prescriptions.

A pharmacist may manufacture and sell medicines.

ARTICLE II.—No person can be pharmacist unless he has passed the theoretical examination therefor, is at least 20 years of age, and has obtained the pharmacist's license from the Minister for Home Affairs.

ARTICLE III.—A person who desires to obtain the pharmacist's license shall present through the local authorities to the Department of Home Affairs an application therefor together with a diploma showing that he has passed the examination.

ARTICLE IV.—The person who obtains the pharmacist's license shall at the time of receipt thereof pay a fee of 3 yen.

ARTICLE V.—The name and domicile of a person who has obtained the pharmacist's license shall be entered in the pharmacist's register at the Department of Home Affairs and be publicly notified.

ARTICLE VI.—In the event of a pharmacist's license being damaged or lost or any alteration in the statements made therein being required by reason of change of name or domicile, application for its renewal, together with the statement of the reason therefor, shall be made through the local authorities to the Department of Home Affairs.

ARTICLE VII.—The person who obtains a new license shall at the time of receipt thereof pay a fee of 1 yen.

ARTICLE VIII.—In the event of a pharmacist discontinuing his business or dying, the fact shall be reported within 10 days to the local authorities.

ARTICLE IX.—No person may, unless he is a pharmacist, open a pharmaceutical office.

ARTICLE X.—When a pharmacist has opened or closed a pharmaceutical office, he shall report the fact within 10 days to the local authorities.

ARTICLE XI.—No single pharmacist may open two or more pharmaceutical offices; if, however, he has established a branch-office, he shall put another pharmacist in charge thereof.

ARTICLE XII.—In a pharmaceutical office the medicines specified in the first table of the Japanese pharmacopœia shall be kept.

ARTICLE XIII.—The balance kept at a pharmaceutical office must be very accurate and capable of weighing at least one centigramme.

ARTICLE XIV.—The pharmacist shall compound medicine only in accordance with the prescription of a physician, written or signed by himself, and stating the name and the age of the patient, the name and quantity of the medicine, the mode of use thereof, the quantity to be used, the date of the prescription, and the name of the physician; if, however, any doubtful point is found in the prescription, he shall not compound the medicine unless he has first made inquiry of the physician and obtained a certificate from him.

The pharmacist shall keep a prescription-book and copy the prescriptions therein.

ARTICLE XV.—The pharmacist shall compound medicine at any time of day or night whenever a prescription is presented, and he cannot without just cause refuse to do so.

ARTICLE XV, 2.—The pharmacist cannot without just cause refuse to sell any specified medicine.

ARTICLE XVI.—The pharmacist shall, in the event of any medicine mentioned in a prescription having run out in his office, communicate the fact to the physician who gave the prescription and ask for his directions; the pharmacist cannot at his own discretion leave out the medicine or substitute another in its place.

ARTICLE XVII.—Every prescription for a poisonous or powerful medicine shall be stamped with the pharmacist's seal and preserved for full 10 years from the date of the prescription.

ARTICLE XVIII.—Poisonous and powerful medicines shall not be compounded more than once in accordance with the same prescription; this rule, however, shall not apply to a case where special instruction to that effect has been received from the physician.

ARTICLE XIX.—On each vessel or paper wrapper in which a medicine is given to a patient shall be stated the use, whether internal or external, of the medicine as directed in the prescription, the mode of use, the quantity to be taken, the date, the name of the patient, the locality of the pharmaceutical office, and the name of the pharmacist.

CHAPTER II.—DRUGGISTS.

ARTICLE XX.—By the term "Druggist" is meant a person who sells medicines.

ARTICLE XXI.—The druggist must obtain a certificate of license from the local authorities.

ARTICLE XXII.—The druggist shall not open a vessel containing a poisonous or powerful medicine which has been closed and sealed at a Hygienic Laboratory or by a pharmacist or medicine manufacturer and sell such medicine in small quantities.

CHAPTER III.—MEDICINE MANUFACTURERS.

ARTICLE XXIII.—By the term "Medicine Manufacturer" is meant a person who merely manufactures medicines and sells the medicines so manufactured.

ARTICLE XXIV.—The medicine manufacturer must obtain a certificate of license from the local authorities.

ARTICLE XXV.—Poisonous and powerful medicines shall be put in suitable vessels which must be closed and sealed; and the medicine manufacturer shall not open such vessels and sell the medicines in small quantities.

CHAPTER IV.—HANDLING OF MEDICINES.

ARTICLE XXVI.—No medicine included in the Japanese pharmacopœia can be manufactured, stored, exhibited, sold, or given unless its nature and quality conform to those prescribed in the said pharmacopœia; this rule, however, shall not apply to cases which are otherwise specially provided for by ordinance.

ARTICLE XXVII.—A medicine which is not included in the Japanese pharmacopœia shall have inscribed thereon the name of the foreign pharmacopœia on which it is based; and it cannot be manufactured, stored, exhibited, sold, or given unless its nature and quality conform to those prescribed in such pharmacopœia; this rule, however, shall not apply to cases which are otherwise specially provided for by ordinance.

ARTICLE XXVIII.—In cases where the method of storage is specially indicated in the pharmacopœia, such indication must be followed.

ARTICLE XXIX.—Poisonous and powerful medicines shall be kept apart from other medicines, and poisonous medicines shall be stored in places which can be locked.

ARTICLE XXX.—No poisonous or powerful medicine shall be sold or given to a person for whom it is deemed necessary in the pursuit of his occupation unless such person presents a certificate stamped with his own seal and stating the name and quantity of the medicine required, the object for which it is to be used, the date, and his own name, residence, and occupation.

The certificate mentioned in the preceding clause shall be preserved for full ten years from the date inscribed thereon.

ARTICLE XXXI.—Poisonous or powerful medicines shall not, even upon presentation of the certificate specified in the preceding article, be handed to a child or any other person to whom it is deemed unsafe to give charge thereof.

ARTICLE XXXII.—The vessel or paper wrapper containing a poisonous or powerful medicine shall have inscribed thereon the name of the medicine and the name and residence of the seller or giver thereof, and shall also be marked "Poison" in the case of a poisonous medicine and "Powerful" in the case of a powerful medicine.

ARTICLE XXXII, 2.—The pharmacist who is employed by a druggist as mentioned in Art. XXXVII, 3, shall certify on the vessel or paper wrapper containing a medicine that it conforms to the provisions of the pharmacopœia and add thereto his own name and residence.

ARTICLE XXXIII.—With respect to a medicine given by a pharmacist in accordance with a medical prescription, the procedure mentioned in Arts. XXX and XXXII is not required.

ARTICLE XXXIV.—The procedure specified in Arts. XXX and XXXII is not required between pharmacists, druggists, and medicine manufacturers; they may sell and purchase among themselves poisonous or powerful medicines upon presentation of a certificate showing that they are pharmacists, druggists, or medicine manufacturers as the case may be.

ARTICLE XXXV.—The list of poisonous and powerful medicines shall be determined by an ordinance of the Department of Home Affairs.

ARTICLE XXXVI.—On the vessel or paper wrapper containing a medicine the name thereof shall be inscribed in *kana* or in Chinese characters; it may, however, be inscribed beside the name in Latin or any other foreign language.

ARTICLE XXXVII.—On the vessel or paper wrapper containing a medicine the name and residence of the manufacturer thereof shall be inscribed and if the medicine has been manufactured abroad, the name and residence of the agent therefor shall be inscribed; in the case, however, of a company for manufacturing medicines, the name of such company and that of the place where it is situated may be inscribed.

ARTICLE XXXVII, 2.—No person other than a pharmacist can sell or give specified medicines; this rule, however, shall not apply to transactions between pharmacists, druggists, and medicine manufacturers.

The provision of the preceding clause shall not apply to the sale or giving of specified medicines by a physician in accordance with the provision of Art. XLIII.

ARTICLE XXXVII, 3.—The druggist who employs a pharmacist in a manner to be determined by ordinance may sell or give specified medicines; this rule, however, shall apply only to cases where the vessels or paper wrappers containing such medicines bear the certification of the pharmacist as provided for in Art. XXXII, 2.

ARTICLE XXXVII, 4.—The local Governor may, according to the condition of a locality, permit a druggist, for a fixed period of time and in a fixed district of business, to sell or give specified medicines; the medicines, however, must be such as are certified to have been obtained from a pharmacist or from the druggist mentioned in the preceding article.

ARTICLE XXXVII, 5.—The provision of Art. XV, 2, shall correspondingly apply to the druggist specified in the preceding two articles.

ARTICLE XXXVIII.—The Minister for Home Affairs may cause inspectors to inspect pharmaceutical offices and places for the sale or manufacture of medicines.

An inspector shall, when he inspects, carry the badge of his office.

ARTICLE XXXVIII, 2.—With regard to a medicine not mentioned in any pharmacopœia, which is considered likely to be injurious to health, the administrative authorities may prohibit the manufacture, storage, exhibition, sale, or giving thereof.

In the case mentioned in the preceding clause the administrative authorities may cause the owner or possessor of the medicine to destroy it, destroy it themselves, or make such other disposition as may be necessary; if, however, its owner or possessor requests permission to dispose of it in a manner that will not prove in any way injurious to health, such permission may be given.

The provision of the preceding clause shall also apply to medicines which do not conform to the provisions of the pharmacopœia.

ARTICLE XXXVIII, 3.—By the term "Specified medicines" in these Regulations are meant the medicines which have been specified by the Minister for Home Affairs.

CHAPTER V.—PENAL PROVISIONS.

ARTICLE XXXIX.—Any person to whom any of the following items is applicable shall be liable to a fine not exceeding four hundred yen:—

- 1.—One who makes a false inscription on the vessel or paper-wrapper containing a medicine;
- 2.—One who infringes the provision of Art. XXVI or Art. XXVII;
- 3.—One who violates the prohibition specified in Art. XXXVIII, 2, Clause 1.

ARTICLE XXXIX, 2.—Any person to whom either of the following items is applicable shall be liable to a fine not exceeding two hundred yen:—

- 1.—One who practises pharmacy without obtaining the pharmacist's license or in violation of a disposition prohibiting or suspending his business;
- 2.—One who infringes the provisions of Art. XXXVII, 2, Clause 1, Art. XXXVII, 3, or Art. XXXVII, 4.

ARTICLE XXXIX, 3.—Any person to whom any of the following items is applicable shall be liable to a fine not exceeding one hundred yen:—

- 1.—A pharmacist who infringes the provision of Art. XIV, Clause 1 or makes a mistake in compounding medicine;
- 2.—A person who infringes the provisions of Art. XVI, Art. XVIII, Art. XXII, Art. XXV, or Art. XXX, Clause 1;
- 3.—A pharmacist who makes an erroneous inscription on the vessel or paper wrapper containing a medicine or without knowledge of the fact, stores, exhibits, sells, or gives a medicine which does not conform to the provisions of the pharmacopœia;

4.—A druggist mentioned in Art. XXXVII, 3, who without knowledge of the fact, stores, exhibits, sells, or gives a specified medicine which does not conform to the provisions of the pharmacopœia.

Any person who gives false answers to the inquiries made by a competent official or one who exercises public functions by order of the administrative authorities, or resists, evades, or obstructs the execution of such public functions shall be liable to a fine of the same amount as that prescribed in the preceding clause; those cases, however, to which the provisions of the Criminal Code are applicable shall be dealt with in accordance therewith.

ARTICLE XXXIX, 4.—Any person to whom either of the following items is applicable shall be liable to a fine not exceeding fifty yen:—

- 1.—One who carries on the occupation of a druggist or medicine-manufacturer without obtaining the license of a druggist or medicine-manufacturer or in violation of a disposition prohibiting or suspending his business;
- 2.—One who, upon receiving the order prescribed in Clause 2 or 3 of Art. XXXVIII, 2, fails to execute it within a specified time.

ARTICLE XL.—Any person who infringes the provisions of Art. XI, Art. XIV, Clause 1, Art. XVII, Art. XIX, Art. XXIX, Art. XXX, Clause 2, Art. XXXI, and Art. XXXII shall be liable to a fine of not less than two yen nor more than twenty yen.

ARTICLE XLI.—Any person who infringes the provisions of Art. VI, Art. VIII, Art. X, Art. XII, Art. XIII, Art. XIV, Clause 2, Art. XV, Art. XV, 2, Art. XXVIII, Art. XXXVI, Art. XXXVII, and Art. XXXVII, 5 shall be liable to a fine of not less than one yen nor more than one yen ninety-five sen.

ARTICLE XLI, 2.—With respect to contraventions of the present Regulations or ordinances issued in conformity therewith, the provisions of the Criminal Code relative to the mitigation, aggravation, and concurrence of offences shall not apply.

ARTICLE XLI, 3.—In the event of a person engaged in a business specified in these Regulations being a minor or adjudged incompetent, the penal clauses which are, according to the provisions of the present Regulations or ordinances issued in conformity therewith, applicable to persons conducting such business, shall apply to his legal representative; this rule, however, shall not apply to a minor who possesses the same capacity as an adult with respect to his business.

ARTICLE XLI, 4.—If a representative of a person conducting a business specified in these Regulations, the head or any member of the family of the person so conducting the business, or any person living in his house, in his service, or otherwise employed in his business, infringes the provisions of the present Regulations or ordinances issued in conformity therewith, the person conducting the business shall not be exempted from the penalty therefor on the ground that such infringement did not take place by his directions.

ARTICLE XLI, 5.—The provisions of the preceding three articles shall correspondingly apply to cases where the provisions of Art. XLIII are infringed by a physician.

ARTICLE XLI, 6.—The provisions of Law No. 52 of the thirty-third year of Meiji (1900) shall correspondingly apply to offences against the present Regulations and ordinances issued in conformity therewith.

ARTICLE XLI, 7.—A competent official or a person who performs public functions by order of the administrative authorities, who acts dishonestly in the execution of these Regulations shall be condemned to major imprisonment for a term not exceeding one year and in addition, be liable to a fine not exceeding forty yen those cases, however, to which the provisions of the Criminal Code are applicable shall be dealt with in accordance therewith.

A person exercising public functions by order of the administrative authorities, who, at the request of another person, accepts or agrees to accept a bribe in the execution of these Regulations, shall be dealt with in accordance with the provision of Art. CCLXXXIV of the Criminal Code.

ARTICLE XLII.—The Minister for Home Affairs shall be responsible for the enforcement of these Regulations and shall issue ordinances and instructions necessary therefor; by-laws, however, relative to the control of druggists and medicine manufacturers shall be determined by the Governor of Hokkaido and Governors of Fu and Ken (Prefectures).

SUPPLEMENTARY PROVISIONS.

ARTICLE XLIII.—The physician may, only with respect to prescriptions for patients under his treatment, compound and sell or give medicines at his own house in accordance with the provisions of Arts. XXVI, XXVII, and XXIX; he must in such cases submit to the inspection prescribed in Art. XXXVIII.

The physician may, by presenting a certificate showing his profession, purchase poisonous or powerful medicines according to the provision of Art. XXXIV from pharmacutists, druggists or medicine manufacturers.

ARTICLE XLIV.—A person who has obtained from the Department of Home Affairs a license to open a drug store prior to the enforcement of these Regulations shall be qualified to be a pharmacist.

ARTICLE XLV.—Matters relative to the sale of opium shall conform to the provisions of Decree No. 21, August of the eleventh year of Meiji (1878).

ARTICLE XLVI.—A person, not less than twenty years of age, who possesses the graduation diploma of the Pharmaceutical Course in the College of Medicine, in a Government or public Special Medical School, or in the Medical Department of a Higher Middle School, may, by presenting such diploma, apply for the grant of the pharmacist's license in accordance with the provision of Art. III of these Regulations; in such case the Minister for Home Affairs may grant the license without requiring previous examination.

A person of not less than twenty years of age, who has graduated at the Pharmaceutical Department of a foreign University or at a foreign Pharmaceutical School or has obtained the pharmacist's license in a foreign country, may apply for the grant of the pharmacist's license by presenting such graduation-diploma or pharmacist's license; in such case the Minister for Home Affairs may, after inspecting the certificate, grant the license without requiring previous examination.

ARTICLE XLVI, 2.—In the event of a pharmacist being guilty of an offence or dishonest act in the conduct of his business, the Minister for Home Affairs may, after deliberation thereon by the Central Board of Health, suspend or prohibit the conduct of his business; the same rule shall also apply to the case of a pharmacist who becomes insane, feeble-minded, or is otherwise deemed unfit to conduct his business.

In the event of a druggist or medicine manufacturer being guilty of an offence or act in the conduct of his business, the local Governor may prohibit or suspend the conduct thereof.

The Minister for Home Affairs may, after deliberation thereon by the Central Board of Health, remove the prohibition or suspension of the business of the pharmacist.

The local Governor may remove the prohibition or suspension of the business of the druggist or medicine manufacturer.

ARTICLE XLVI, 3.—The authority which appertains to the local Governor in the present Regulations shall be exercised in Tokyo-fu (Tokyo Prefecture) by the Commissioner-General of Police.

ARTICLE XLVI, 4.—The provisions relative to physicians in the present Regulations shall also apply to dental and veterinary surgeons.

ARTICLE XLVII.—The present Regulations shall come into force on the first day of March in the twenty-third year of Meiji (1890).

ARTICLE XLVIII.—Decree No. 1, January of the thirteenth year of Meiji (1880), entitled "The Regulations for the Handling of Medicines," shall be abolished on the day the present Regulations come into force.

PROVISIONS SUPPLEMENTARY TO THE AMENDATORY LAW OF 1907.

The present Law shall come into force on the first day of January in the forty-first year of Meiji (1908).

A person who has, after obtaining a license, been a druggist for at least five years and is actually engaged in the business at the time the present Law comes into force, shall, except in the case of a juridical person, be permitted even after the present Law has come into force to sell or give specified medicines, with the proviso, however, that this rule shall apply only to those druggists who give notice to the above effect to the local Governor not later than six months from the date at which the present Law comes into force.

The provisions of Art. XV, 2, and Art. XXXIX, 3, Clause 1, Item 4 shall correspondingly apply to the druggists who have given notice as prescribed in the proviso of the preceding clause.

A druggist who has given the notice prescribed in the proviso of the second clause shall, if he refuses without just cause to sell specified medicines, be liable to the penalty specified in Art. XLI.

Except in the case of those who have given the notice prescribed in the proviso of the second clause, the provision of Art. XXXVII, 2, shall not, only for the period of full three years from the date at which the present Law comes into force, be applicable to druggists who are actually engaged in the business at the time the said Law comes into force.

CHAPTER I.—ORIGIN OF THE GRADUAL SUPPRESSION OF OPIUM IN FORMOSA.

When, as a result of the conclusion of peace between Japan and China in 1895, Formosa and the Pescadores became Japanese territory, the inhabitants of the islands had long been confirmed in the habit of opium-smoking; and the question of their control was one of the difficult problems which presented themselves in the administration of Formosa. As even the population of the new possession was not at the time definitely known and was variously put at between two and three millions, still less was it possible to obtain accurate information respecting the number of opium-smokers, some reckoning it at two hundred thousand and others at three hundred thousand. And with regard to measures to be taken towards them proposals of various sorts were brought forward; many scholars and politicians who had never visited Formosa advocated that now that Formosa had become Japanese territory, an order prohibiting opium-smoking should be immediately issued and all violations of it be severely punished, while many persons who had set foot in the island explained that an absolute prohibition of opium was impracticable, and some even went so far as to declare that compared with alcohol and tobacco, opium was not so highly injurious to health.

The condition of Formosa at that time was such that, the island having but recently come into Japanese possession, the public mind was still agitated and could not feel at ease; and moreover, rebels arose on all sides. Many of the Chinese officers and men who had been garrisoned in the island and were dissatisfied with its cession to Japan joined the rebels; and these induced peaceful citizens to join them by declaring that if Formosa came under Japanese rule, opium-smoking would be strictly forbidden and thus the inhabitants would be permanently deprived of the pleasure of opium-smoking, and therefore they should now all oppose the Japanese Government. The opium question, then, was not merely a question relating to opium only, but one with great influence on the subjugation of the rebels; and this only added to the difficulty of its solution.

The Imperial Government, hereupon, took into consideration the facts (1) that the use of opium being a matter of habit, it would be difficult by law or ordinance to cause persons long addicted to it to give it up immediately, (2) that it would be difficult to break of the habit all at once the opium-smokers of Formosa who numbered nearly two hundred thousand, and (3) that if it were to be strictly prohibited, not only would many sacrifices be required in its control, but such prohibition would alienate the people who had only recently come under Japanese rule and also cause great difficulties in the subjugation of the rebels and in the general administration of the island. It was, then, decided to adopt the policy of gradually suppressing opium-smoking and to establish a system which would grant only to those who had been too long addicted to opium to be cured of the habit a license permitting them to purchase and smoke opium paste; and as this policy of gradual suppression could not be rendered effective unless the importation of raw opium and manufacture of opium paste were made Government enterprises, it was at the same time decided to establish an opium monopoly system. Thus, the private importation and manufacture of raw opium and opium paste would be strictly prohibited, and the smoking habit prevented from spreading, and it was expected that as the licensed smokers died or were cured of the habit, their number would gradually diminish until they were finally extinguished altogether. At the same time, means were to be devised for preventing children and young men by means of education from falling into this vicious habit; and efforts were to be made, by police control and effective organs of medical treatment, to carry out the object of the system in question.

Previously to the decision just referred to, while the island was still under military administration in 1895, an ordinance prohibiting opium-smoking was issued as a provisional measure; but as it was subsequently decided to put into effect the gradual suppression system, the Governor-General of Formosa declared in February, 1896, when peace had almost been restored in the island and also the treaties of commerce and navigation with the various Powers were to take effect, that the importation of opium would be prohibited and the use of opium would be permitted for medical reasons only to habitual smokers; and in April of the same year, after the civil administration had been established, various investigations were commenced at the Civil Administration Department of the Government of Formosa in connection with the carrying into effect of the system of gradual suppression of opium.

CHAPTER II.—ISSUE OF THE FORMOSA OPIUM ORDINANCE AND MANUFACTURE
AND SALE OF OPIUM PASTE.

The Formosa Opium Ordinance was promulgated by Ordinance No. 2 in January 1897 and the Regulations for the Enforcement of the Formosa Opium Ordinance were issued

by Administrative Ordinance No. 6 in March of the same year. The ordinance was first put in force in April of the same year in the city of Taihoku, and then gradually enforced in other cities and country places until it was in operation throughout the island in December of that year.

Previously to the promulgation of the ordinance and as preparatory to it, the organization of the Opium Factory was published in March, 1896, and provisions were made for the management of opium business; and investigations were made under the supervision of the Sanitary Bureau of the Civil Administration respecting the manufacture of opium paste, the demand for it, customs connected with opium, and other matters. It was ascertained that the importation of opium into the island up till then averaged about 400,000 lbs. (one pound is equivalent to 453 grammes) per annum, and by taking one *momme* (3.76 grammes) as the daily consumption per smoker, the total number of chronic smokers in the island was calculated to be 170,000 or 180,000; and these figures were made the basis for the operation of the opium administration. Further, over 287 cases¹ of raw opium which were held at the time by foreign merchants in the island were purchased from them; and the physicians required for examining and certifying chronic smokers were, under the title of Formosa official physicians,² summoned from Japan Proper and distributed in various localities where they also served as an organ for the promotion of the public health of the island.

Great difficulties were especially encountered in the manufacture of opium paste as it was the first time that such manufacture was attempted in the Empire; and after many investigations and experiments, considerable skill was finally acquired in it, and the paste was manufactured and sold at the Opium Factory until 1901, when upon the establishment of the Monopoly Office,³ the enterprise was brought under the direct control of that office.

The license fee for the purchase and smoking of opium paste varied at first with the grade of the paste, which was divided into three grades, the monthly fee for the first grade being three yen, for the second one yen fifty sen, and for the last twenty sen. The price of the paste which was sold in tins holding one pound (453 grammes) each, was twelve yen for the first grade, nine yen for the second, and seven yen for the last; and the first-grade license permitted its holder to purchase any grade of paste, the second grade to purchase either that or the third grade, and the third grade license was confined to that grade. This system, however, was found to be unsuited to the condition of the people and also entailed great trouble in the collection of the license fees; and as it caused considerable inconvenience to both the government and the people, Regulations for the Enforcement of the Opium Ordinance were revised in March, 1898, whereby the license fee was altered to thirty sen for all grades and made payable once for all at the time the certificate of license was granted, but, on the other hand, the weight of the paste tin was reduced from one pound (equivalent to 120 *momme* or 453 grammes) to a hundred *momme* (376 grammes).

The sale price of opium paste was subsequently revised in April and July of 1901; and the present price per tin of a hundred *momme* is fourteen yen for the first grade, eleven yen for the second, and seven yen for the third, while the powdered opium for medicinal purposes is sold at ten sen per *momme*.

CHAPTER III.—LICENSED OPIUM SMOKERS.

A.—Licenses Granted to Formosan Chinese.

When a Formosa-Chinese⁴ desires to obtain an opium-license he is, after he has applied for it, examined by a Formosa official physician to ascertain if he is a chronic smoker or not, and only when full and sufficient reason is found for the grant, is the license delivered to him. In this manner the examination of smokers was commenced in Taihoku on the 1st April, 1897 with the intention of carrying it on throughout the island; and it was expected that the registration of all the opium-smokers of the island would be completed within five months from its commencement. But the insular administration was in everything still in its initial stage, and the population was not yet restored to perfect peace and tranquillity, the rebels, above all, still made their appearance in large forces in

(1) One case contains a hundred pounds.

(2) An official physician is a licensed physician who discharges official duties under appointment of the Government of Formosa.

(3) The Monopoly Office has charge of the monopolies in camphor, opium, table salt, and tobacco.

(4) The Formosan Chinese are the Chinese inhabitants of Formosa who became Japanese subjects by the cession of that island.

various parts of the island, and the power of the police could not yet fully assert itself, so that everywhere one delay followed another, and it was not until September 1900, that the registration was completed when the total number of smokers was found to be 169,064, which was not far from the estimated number. It was then decided to issue no more licenses except to chronic smokers who had full and sufficient reason for the grant of the licenses or had been prevented by circumstances from being registered at the time of general registration; and thus every effort was made to confine the opium habit to those already under its influence.

At the time under consideration, however, as the system of registration of domiciles was not yet fully established, reliable returns could not be obtained regarding changes by death or in other ways in the number of smokers. A steady increase was also noticed in the circulation of licenses which had been rendered invalid by the loss or destruction of the certificates accompanying them; and accordingly, in February 1902, the licenses were changed, and those which had been granted were withdrawn and replaced by new ones; and the register of licensed smokers was readjusted. And thenceforward, as the police organization became more complete and the *paochia* system¹ was developed, every endeavour was made to prevent the spread of the opium habit. The habit of opium-smoking, however, is of long standing; and the main cause of the acquirement of the habit is that it is the custom in time of illness to resort to opium instead of medical treatment for temporary escape from pain; and, as it is considered an act of hospitality to offer the drug to guests, this vicious habit readily spreads in a family and among friends. In course of time, therefore, secret smoking began to prevail and this produced many chronic smokers; and unless license to smoke were again granted, a large number of offenders would have to be taken at once into custody, and also, as it was most difficult for those who had once fallen into the habit of opium-smoking to get out of it, such persons would be repeatedly committing offences which, if punished each time, would entail intolerable trouble upon the police and judiciary. Accordingly, during the period from October 1904 to March 1905 licenses were specially granted to those who had clandestinely acquired the opium habit; and Art. VI of the Regulations for the Enforcement Opium Ordinance was so altered that the system of purchase pass-books was adopted, whereby purchasers were required to bring their pass-books and the quantity of paste purchased was each time entered therein in order to facilitate the control of the smokers. Again, in February 1908, it was discovered that the number of secret smokers was on the increase; and strict search was made simultaneously throughout the island for those suspected of secret smoking, and those guilty of the offence were severely punished, while licenses were granted to those only, in whom the habit was, upon medical examination, pronounced to be too deeply rooted to be readily cured.

Thus, it was found necessary to grant licenses on two occasions subsequently to the general registration of chronic smokers, which was completed in September 1900; but there have been through death, by abandonment of the habit, and from other causes, an average annual diminution of about 8,000 and the total number of licenses at the end of 1907 was 113,165.

The following tables give the number of opium smokers among Formosa-Chinese at the end of each year, the rate of their decrease, and their classification according to age at the end of each year since 1902:—

(1) The *paochia* system is one in which ten houses are made into one *chia* with a head over it named *chiachang* and ten *chia* form one *pao* under a *paocheng*. The *paochia* is an auxiliary organ of the police.

LICENSED OPIUM SMOKERS (FORMOSAN CHINESE).

Actual number at the end of each Year.

Year.	Males.	Females.	Total.	Compared with preceding year.		Number per 100 of the Population.	Index-number of Licensees.
				Increase.	Decrease.

1908 (March) ...	111,049	15,684	126,733	13,568	—	—	—

NOTES.—The number of new licensees from October, 1904 to March, 1905 was 30,543, and that of new licensees in March, 1908 was 15,849.

The large number of female smokers is attributable to the discovery of new smokers due to the readjustment of the Register of Licensed Smokers when the licenses were exchanged in February of that year.

The annual increase in the number of licensed smokers from 1897 to September 1900 was due to the steady progress of the work of registering the smokers.

The increase of licensees in 1904 and March 1908 was due to the granting of licenses to secret smokers.

The net decrease during the seven years and six months from September 1900 to March 1908 was 42,331.

CLASSIFICATION ACCORDING TO AGE OF LICENSED OPIUM SMOKERS (FORMOSAN CHINESE).

Actual number at the end of each Year.

Year.	Not less than 20 years.	Not less than 30 years.	Not less than 40 years.	Not less than 50 years.	Not less than 60 years.	Not less than 70 years.	Total.

B.—Death of Licensed Opium Smokers and breaking off of the Smoking Habit among Formosan Chinese and gradual Decrease of their Number.

The gradual decrease in the number of opium smokers among Formosan Chinese is mainly due to death and the abandonment of smoking. Their death-rate is nearly double the rate for the whole island; and the causes of this high mortality are that most of the smokers had taken to the drug through sickness and that long addiction to the habit undermines the smoker's health. The abandonment of smoking is due to the smoker himself becoming convinced of the evils of the habit and successfully breaking from it by gradually decreasing the quantity smoked or by suspending his indulgence in the habit, to his being cured by

medical treatment, and to his continuing to refrain from smoking after serving a term in prison. The average rate during the ten years from 1897 to 1907 of deaths and abandonment of smoking per thousand smokers was about 52 of the former and 13 of the latter.

In addition to those who die or abandon the habit, there are other licensees who have of their own will changed their residences or gone abroad without giving notice to the authorities so that their whereabouts and even whether they are living or dead have for several years been unknown; and there are also those whose licenses were, when the licensees' register was readjusted, found to be invalid. The names of such persons are being struck off the register.

If, against the number of those to whom licenses were granted for full and sufficient reasons or for the control of secret smokers subsequently to the general registration which was completed in September 1900, we set off the number of those who have died, abandoned smoking, or have otherwise had their names struck off the register as stated in the preceding paragraph, we shall find the actual net decrease in the number of licensed smokers during the seven years and three months from October 1900 to the end of 1907 to be 55,899, which would give an average annual decrease of 7,986. This average annual decrease is equivalent to 7.06 per cent. of the total number of licensed smokers at the end of 1907, which was 113,165.

The following tables give the numbers of deaths and abandonment of smoking of licensed smokers and their classification according to age in each year :

LICENSED OPIUM-SMOKERS WHO HAVE DIED OR ABANDONED SMOKING
(FORMOSAN CHINESE).

YEAR.	DEATHS.			ABANDONMENT OF SMOKING.			NO. PER THOUSAND OF LICENSED SMOKERS.	
	Males.	Females.	Total.	Males.	Females.	Total.	Death.	Abandonments of smoking.
1897.....	—	—	1,181	—	—	1,136	23.34	22.45
1898.....	1,532	150	1,682	848	42	890	17.62	9.32
1899.....	2,476	289	2,765	269	20	289	21.11	2.21
1900.....	6,632	766	7,398	227	17	244	44.63	1.46
1901.....	7,193	735	7,928	695	26	721	50.30	4.58
1902.....	12,883	1,059	13,942	2,996	81	3,077	97.16	21.44
1903.....	7,403	722	8,125	1,555	158	1,713	61.13	12.90
1904.....	7,343	722	8,065	2,187	293	2,480	58.47	17.98
1905.....	6,815	912	7,727	4,148	557	4,705	59.22	36.06
1906.....	6,512	798	7,310	548	86	634	60.26	5.23
1907.....	6,528	810	7,338	293	60	353	64.84	3.12

NOTES.—The average death-rate during the 10 years from 1897 to 1906 was 52.05 and the average rate of the abandonment of smoking was 12.54.

The high rate of deaths and abandonment of smoking in 1902 was due to the large numbers discovered when the licenses were exchanged and readjusted; and the high rate of abandonment of smoking in 1905 was due to the large number of those who had suspended smoking taking steps to report its abandonment when licenses were granted to secret smokers.

The ages of those who have died since 1902 as stated in the above table may be classified as follows :—

Year.	Not less than 20 years.	Not less than 30 years.	Not less than 40 years.	Not less than 50 years.	Not less than 60 years.
1902..	80.9	85.1	80.7	104.4	185.8
1903.....	41.1	43.9	59.4	80.2	118.9
1904.....	29.7	42.2	60.7	75.2	120.4
1905.....	35.1	42.8	56.7	79.8	117.3
1906.....	33.9	42.4	57.3	82.6	116.3
1907.....	36.1	44.7	51.1	83.2	135.2

C.—Licenses for Opium-Smoking granted to Chinese Subjects.

When the Opium Ordinance was first put in force, licenses to smoke opium were not granted to Chinese subjects but by the year 1904 the opium system had been placed on a firm

basis so that it was believed the general control would now be in no way hampered by the grant of such licenses to Chinese subjects residing in Formosa. Moreover, as the demand for labour increased with the rise of productive enterprises throughout the island and it was proposed to bring over labourers from that part of South China which faced Formosa across the strait, it was feared that the labourers would refuse to come unless there were facilities for opium smoking; and accordingly, the Regulations for the Control of Labourers were established and it was decided to grant from January of the following year licenses valid for a period of twelve months only and renewable every year, for the purchase and smoking of opium paste, on condition that such licensees shall, when they leave the island, surrender the licenses even before the expiration of their term of validity.

The number of Chinese subjects who obtained licenses in this manner in each year was as follows:—

LICENSED OPIUM SMOKERS (CHINESE SUBJECTS).

	Number licensed.			Licenses rendered invalid by death, abandonment of smoking, return to China, or expiration of term.	Actual number the end of year.
	Males.	Females.	Total.		
1905	1,282	11	1,293	498	795
1906	1,330	10	1,340	493	847
1907	1,301	12	1,313	541	772

D.—General Condition of Licensed Opium Smokers.

On the 1st October 1905, an extraordinary census of the population of Formosa (the national census for one portion of the Japanese Empire) was taken, as the result of which the population of the island was found to be as follows:—

Race.	Males.	Females.	Total.
Japanese	34,624	22,711	57,335
Formosan natives	1,567,548	1,405,732	2,973,280
Formosan Chinese	1,527,012	1,363,473	2,890,485
Fuhkien	1,319,966	1,172,818	2,492,784
Kwangtung	206,699	190,496	397,195
Others	347	159	506
Sinicized aborigines	22,708	33,724	46,432
Savages	17,828	18,535	36,363
Foreigners	8,644	492	9,136
Chinese subjects	8,527	446	8,973
Others	117	46	163
Total population... ..	1,610,816	1,428,935	3,039,571

A brief account is given hereunder of the condition as regards race, age, marital status, and occupation, of the licensed opium smokers according to the information which was obtained from the census above referred to.

(I.)—LICENSED OPIUM SMOKERS AND RACE.

Upon classifying licensed opium smokers according to race, we find that the great majority are the Formosan Chinese who originally came from Fuhkien, for they constitute 88 per cent. of the total number, the remaining 12 per cent. being made up of Formosan Chinese from Kwangtung and elsewhere, the savages, and resident Chinese subjects. The preponderance of the inhabitants from Fuhkien may be inferred from the fact that they form about 83.8 per cent. of the Formosan natives (the resident Japanese not being included in the number); and they are more strongly addicted to the opium habit than the other races.

The following is a classification of opium smokers according to race, together with the ratio of those of each race to the total number:—

Classification of Opium Smokers according to Race and Sex on the 1st October 1905.

Sex.	Formosan natives.							Chinese Subjects.	Total.
	Formosan Chinese				Sinicized Aborigines.	Savages.	Total.		
	Fuhkien.	Kwan-tung.	Others.	Total.					
Males	90,441	10,154	76	100,671	1,240	9	101,920	864	102,784
Females	13,095	399	—	13,494	194	64	13,752	13	13,765
Total	103,536	10,553	76	114,165	1,434	73	115,672	877	116,549
Number of each race per 100 of the total	88.83	9.06	0.07	97.96	1.23	0.06	99.25	0.75	—
Number of opium smokers per 100 of the population	Total								
	Males								
	Females								
Number of female smokers per 100 of male	14.5	3.9	—	13.4	15.6	711.1	13.5	1.5	13.4

(2.)—CLASSIFICATION ACCORDING TO AGE OF LICENSED OPIUM SMOKERS AND POPULATION.

Upon dividing the licensed opium smokers into groups of 10 years each we find the most numerous to be those in the thirties who constitute 31.65 per cent. of the total number and those in the forties who make up 30.68 per cent. Those in the twenties are only 11.32 per cent. If we compare the smokers and the population in the same sets of 10 years, we shall find the number of the former for every hundred of the latter to be greatest in the forties, being 13.11, next in the fifties 11.72, the third in the thirties 8.74, and only 2.23 in the twenties.

The fact that the number of licensed opium smokers is very small under the age of thirty while it is great above that age may, it is true, be partly accounted for by the consideration that among the secret smokers who were detected subsequently to the completion of the general registration of confirmed smokers, there were probably many who, having at about the age of thirty, found means of livelihood and being in a position to indulge in the luxury of opium smoking, became addicted to it and were finally compelled to apply for a license; but it may also be conjectured that as about ten years have already passed since the issue of the Opium Ordinance, a majority of the smokers who are now in their thirties had obtained the licenses while they were in their twenties.

The following table gives a classification of the smokers according to age, together with the ratio of the number in each period to the total:—

Classification according to Age of Licensed Opium Smokers on the 1st October 1905.

Sex.	20 years.	From 21-30 years.	From 31-40 years.	From 41-50 years.	From 51-60 years.	From 61-70 years.	Above 70 years.	Age unknown.	Total.
Males	241	11,627	32,979	31,709	18,887	6,250	1,090	1	102,784
Females	49	1,561	3,914	4,048	2,804	1,121	268	—	13,765
Total	290	13,188	36,893	35,757	21,691	7,371	1,358	1	116,549
Number for each period per 100 of the total	0.25	11.32	31.65	30.68	18.61	6.32	1.17	—	100.00
Number of smokers per 100 of population	Total								
	Males								
	Females								
Number of female smokers per 100 of male	20.3	13.4	11.9	12.8	14.8	17.9	24.66	—	13.4

(3.)—MARITAL STATUS OF LICENSED OPIUM SMOKERS.

Upon looking at the marital status of licensed opium smokers, we find that married men and women constitute 68.25 per cent. and widows and widowers 19.30 per cent. of the total number; and upon comparing the figures with those of the population in

the same marital status, the highest ratio is that of widows and widowers, which is 7.85 per cent., followed by that of married persons at 6.64 per cent., the lowest being the unmarried, whose percentage is only 0.82. It appears to be indisputable that leaving out of consideration those wealthy families which can readily afford the luxury of opium smoking, it is in most other cases only when one has a livelihood, has married and supports a family, and has more than enough to meet the household expenses that this opium habit can be indulged in and maintained. As regards the unmarried persons mentioned in the following table, they have little reference to age, for they are mostly day-labourers and coolies who are not yet in a position to support a family.

The marital status of opium smokers and their ratios are given in the following table:—

Classification according to Marital Status of Licensed Opium Smokers on the 1st April 1905.

Sex.	Married persons.	Unmarried persons.	Divorced persons.	Widows and widowers.	Total.
Males	72,168	11,904	2,135	16,577	102,784
Females	7,377	293	168	5,927	13,765
Total	79,545	12,197	2,303	22,504	116,549
Number in each status per 100 of the total ...	68.25	10.47	1.98	19.30	—
Number of opium smokers per 100 of population.					
Total	6.64	0.82	11.51	7.85	3.91
Males	12.06	0.34	15.72	22.69	6.52
Females	1.23	0.05	2.61	2.78	0.98
Female smokers per 100 of male	10.2	2.5	7.9	35.8	13.4

(4.)—OCCUPATIONS OF LICENSED OPIUM SMOKERS.

Upon looking at the classification according to occupation of licensed opium smokers, we find that the great majority are engaged in agriculture and cattle-breeding, comprising 40.57 per cent. of the total number, and that next to them stand those engaged in commerce and transportation business. But a comparison with the population having the same occupations gives the percentage of those in public service or in professions as 11.63, followed by those who live mostly upon their incomes and those engaged in commerce and industry, while those engaged in agriculture and cattle-breeding have the lowest percentage, being no more than 2.21. It appears, then, that this vicious habit is not much practised by simple agriculturists and cattle-breeders, but is widely spread among professional men, men of means, merchants, and industrialists, that is, principally among those who live in cities, and that it prevails in a great degree in families of the upper and middle classes.

Opium smokers are, in the following table, classified according to occupation and their numbers compared:—

Classification according to Occupation of Licensed Opium Smokers on the 1st October 1905.

Sex.	Agriculture, cattle-breeding, forestry & fishery.	Industry.	Commerce & transportation business.	Public service & professions.	Other occupations.	Living upon dividends or interest upon capital.	Without occupation & not reported.	Total.
Males	44,127	12,975	23,386	5,093	13,787	2,860	556	102,784
Females... ..	3,157	2,648	3,981	814	1,656	1,436	73	13,765
Total	47,284	15,623	27,367	5,907	15,443	4,296	629	116,549
Number per 100 of the total	40.57	13.40	23.48	5.07	13.25	3.69	0.54	—
Number of smokers per 100 of population.								
Total	2.21	8.68	9.37	11.63	5.76	9.76	9.24	3.91
Males	3.92	13.76	14.79	17.77	9.47	15.33	12.06	6.52
Females... ..	0.31	3.09	2.97	3.68	1.35	5.66	3.32	0.98

The following are a few of the highest in percentage, compared with the population having the same occupations, of the subdivisions of the occupations mentioned in the above table :—

Items in the above table.	Subdivisions.	Per 100 of those engaged in the same occupation.
Public service and professions.	Liberal professions.	39.81
Public service and professions.	Professions connected with arts and amusements.	36.20
Commerce and transportation business.	Letting and hiring of articles, warehousing, and commission agency.	36.02
Industry.	Manufacture of machines, tools, and instruments.	30.51

CHAPTER IV.—LICENSED MERCHANTS AND OTHERS LICENSED TO ENGAGE IN OPIUM BUSINESS.

The term "Opium Business" provided for in the Opium Ordinance includes (1) retail business in opium paste, (2) manufacture and sale of implements used in opium smoking; (3) retail business in implements used in opium smoking; (4) opening of places for smoking opium; and (5) wholesale trade in powdered opium. Licensed merchants are appointed from among persons of means and reputation in their several localities; they are made to sell opium paste at a fixed price to retail dealers and receive for it one and a half per cent. of that price. The license to engage in the various businesses above mentioned is granted only to the Formosan Chinese, and not to any Japanese resident in the island.

As, unless the control of the retail business in opium paste is made very strict, it would immediately be the means of spreading the opium habit, the great care was at the outset exercised in the selection of retail dealers, and no serious evils were at first detected in that direction. But when the lucrative nature of the business became generally known, the number of retail dealers steadily increased throughout the island until, in March 1900, it exceeded 3,200 which was at the rate of one dealer for every fifty smokers. This great increase only served to reduce the profits of the dealers themselves and finally led for the sake of dishonest gain to the adulteration of the Government paste, which thereupon suffered great discredit for the while in the market. Officers were then sent to various districts to inspect the paste and the dishonest dealers were discovered and severely punished, and soon after, this evil practice was entirely suppressed. Since then, the number of retail dealers has gradually decreased and stood at the end of 1907 at 889, or at the rate of one dealer for every 127 licensed smokers.

As the number of persons engaged in the manufacture and sale of implements used in opium smoking and in retail business in them was at no time great, poorer smokers often made the implements for themselves out of the stems of the sugar-cane and such-like substances and so infringed the law; accordingly, special attention was given in 1905 to the supply of the necessary implements, and since then there has been a great increase in the number of those engaged in the business. The opium-dens show a tendency to decrease steadily in number; and the wholesale business in powdered opium is licensed only to pharmacutists and druggists and does no more than supply the quantity needed for medical treatment.

The following table gives the actual numbers at the end of each year of licensed merchants and others licensed to engage in opium business :—

*Licensed Merchants and Others licensed to engage in Opium Business—
Actual numbers at the end of each Year.*

Year.	Persons licensed to engage in opium business.						Total.	Number of licensed opium smokers per retail dealer in opium paste.
	Licensed merchants.	Retail business in opium paste.	Manufacture and sale of implements used in opium smoking.	Retail business in implements used in opium smoking.	Places for smoking opium.	Wholesale business in powdered opium.		
1897	36	1,979	7	45	258	5	2,294	21
1898	49	2,695	6	49	259	4	3,013	35
1899	64	3,045	8	40	242	4	3,339	43

CHAPTER V.—DIFFICULTIES ENCOUNTERED IN CARRYING OUT THE OPIUM ORDINANCE.

A.—Temptations to Opium Smoking.

There are various causes by which the inhabitants of the island fall into the habit of opium smoking. When over 15,800 secret smokers were discovered as was stated in a former chapter, inquiry was made into the temptations to which they had yielded; and it was found that by far the largest number had in time of sickness resorted, instead of undergoing medical treatment, to temporary remedy by smoking or swallowing opium paste in order to remove the pains of disease by the medicinal power of opium. Others were induced to smoke by their friends and acquaintances in the course of their social intercourse, or took to it from taste for it, or were persuaded or initiated in the habit by a smoker in the family. Those who took opium as substitute for medicine made up nearly 93 per cent. of the entire number.

Although there are already on the island, as organs of medical treatment, many Government and private hospitals, official physicians stationed in various localities, and licensed private physicians, in addition to numerous Chinese physicians among the Formosan Chinese, the natives of the island still remain very superstitious and make invocations to deities, or resort to charms and divination; and as they find it cheaper to obtain opium paste or its ashes which are handy and readily available than to go for treatment to a physician, Japanese or Chinese, and also as opium is believed to be efficacious for all diseases, it is the custom with them in time of sickness to turn to it as their only infallible medicine. And therefore, although every means of control has been tried with a view to the prevention of the spread of the opium habit, it must be confessed with deep regret that this custom being as deeply rooted as opium smoking itself, attempts to reform or check it have not so far been crowned with success.

B.—Anti-opium Medicines and Morphine.

It has from old times been the custom with confirmed opium smokers when they are travelling, find it inconvenient to purchase the paste, or wish to cure themselves of the opium habit, to take anti-opium medicines which contain an opium compound. These medicines are of many kinds and are known by various names. Most of them were formerly manufactured in China and imported into Formosa; but as the result of strict control after the Opium Ordinance was brought into force, they gradually disappeared. Lately, however, when the policy of opium prohibition was announced in China, anti-opium pills came into great vogue, and as an incidental result, anti-opium pills manufactured by the Kuotushe of Shanghai were secretly imported. Whenever it was detected, such importation was severely punished, and the Custom houses also kept very strict watch in order to prevent the importation.

Among the smokers of the lower classes are some who cannot afford to buy the paste and use morphine instead of smoking opium. As an hypodermic injection of the drug does not cost more than three or four sen, it was practised in one or two localities in the northern section of the island, and occasionally a few who resorted to it were also discovered in the central and southern sections. But as they were strictly admonished whenever they were detected, and those who were confirmed in the habit were made to change it for opium smoking, nowhere is this practice now prevalent to any appreciable extent.

C.—Opium Ashes.

Although it is the general custom among smokers to mix and smoke with a new dose of opium paste the ashes remaining from paste that has been smoked, a paste is sometimes secretly made by taking the ashes as the principal ingredient and boiling them with other mixtures. Again, as the ashes are the most suitable substitutes for medicines in the treatment of diseases, it need hardly be stated that as long as they remain in the smokers' hands, the ashes will have every opportunity, like the distribution of paste, of becoming agents for the propagation of the opium habit. At present, for the purpose of coping with this evil, the local authorities are made to take at their discretion suitable measures within their own jurisdiction; and in some localities police officers collect from time to time and destroy in a suitable manner the ashes which remain in the smokers' hands and reduce as much as possible the quantity in their possession.

CHAPTER VI.—OFFENCES CONNECTED WITH OPIUM.

The principal offences connected with opium are (1) the smuggling of opium, (2) the secret smoking of opium paste; and (3) the secret manufacture of the paste; and other offences are the adulteration of opium paste or mixture of different grades of the paste and the sale thereof, the use of morphine or medicines prepared from opium with the object of substituting them for opium, the transfer of paste to other than smokers, and lending of houses or implements for secret smoking.

Prosecutions for these offences number on an average about 2,000 per annum and of these the most numerous are, it need hardly be said, cases of secret smoking. As to the smuggling of opium, not a few projected in former times the importation of raw opium and secret manufacture of paste; and when the control of the island grew gradually strict, cheap paste manufactured in China began to be imported by very ingenious methods such as suspending the tins of paste in water or stowing them in the hollows of bamboo-rafts; but as all these contrivances were detected by Customs inspectors or police officers, the offences became fewer and fewer. As regards the secret manufacture of opium also, the strictness of the control of the coasts has cut off all means of obtaining the material, so that the only offence of the kind at the present time is the manufacture by poor smokers of paste by mixing opium ashes as the principal ingredient with other substances. The transfer of paste and lending of houses and implements, being from their character intimately connected with secret smoking which is the greatest in number of all the offences, form a large majority of the offences in the item marked "Other offences" in the accompanying table.

With regard to the prosecution of offences connected with opium, it is being carried on with the greatest vigour at the same time that every effort is made by the local authorities by controlling the coasts and the interior to prevent the propagation of the opium habit. With the same object in view, encouragement was given by Imperial Ordinance No. 455, of 1899, to the person who should bring information against those guilty of offences connected with the Opium Ordinance and four other Regulations by entitling him to one half of the price of the goods so confiscated, and suitable rewards are given to police officers who prosecute for violations of the Opium Ordinance.

The following tables give, classified by years, the descriptions and quantities of opium smuggled and numbers of prosecutions for offences connected with opium:—

Descriptions and Quantities of Opium and other Articles smuggled, in Respect of which Prosecution was instituted.

Year.	Raw opium		Prepared opium.		Medicines prepared from opium (Anti-opium pills).		Smoking implements.	
	Cases.	Quantities, grammes.	Cases.	Quantities, grammes.	Cases.	Quantities.	Cases.	Quantities.
1899... ..	18	465,188	12	29,263	2	{ In tins 1 In cases 399	3	{ Smoking pipe 1 Pipe bowls 186
1900... ..	10	31,180	14	87,669	—	—	1	Smoking pipes 25

1904.....	1	3,346	10	8,083	—	—	—	—
1905... ..	1	1,805	12	12,391	2	In tins 17	—	—
1906... ..	—	—	16	19,579	—	—	2	Pipe bowls 94

NOTE.—Figures for 1898 and the years preceding are unobtainable.

The disagreement between the figures for smuggling in the number of offenders prosecuted in the following table and the number of cases in the above table is due to a difference in the periods for investigation in and prior to 1902, and also to the fact that whereas in the following table the number of offenders is made the basis, the numbers of cases are given in the above table classified according to the articles to which they refer.

Numbers of Persons prosecuted for Offences connected with Opium.

Year.	Offences relating to smuggling.	Offences relating to secret manufacture.	Offences relating to secret smoking.	Offences connected with medicines prepared from opium or connected with morphine.	Other offences.	Total.
Apr. 1897—Mar. 1898	30	64	232	4	165	495
„ 1898— „ 1899	40	145	223	13	226	647
„ 1899— „ 1900	28	78	251	20	230	607
„ 1900— „ 1901	23	85	327	27	426	888
„ 1901— „ 1902	77	159	415	113	668	1,432
„ 1902— „ 1903	70	178	698	190	965	2,101
1903	52	234	1,247	92	930	2,555
1904	20	264	1,306	75	1,103	2,768
1905	11	248	386	101	719	1,465
1906	20	242	677	84	1,073	2,096

NOTES.—The figures up to 1902 cover the twelve months from April of each year to March following.

No prosecutions were instituted up to 1900 for offences connected with the use of morphine.

The smallness of the numbers of prosecutions for various offences up to 1900 was due to the fact that as the registration of opium smokers was still going on, no positive efforts were made to investigate such offences.

In the above table concurrent offences are not included.

Note.—In this connection it may be noted that the total number of offenders in the island and the number and percentage of those offenders who are licensed opium smokers, during 1905 and 1906 were as follows :—

	Total number of offenders.	Number of offenders who were licensed opium smokers.	Percentage of smokers to total number.
1905	10,515	2,664	25.34
1906	12,419	2,826	22.75

CHAPTER VII.—OPIUM SUICIDES.

Among the natives of the island who attempt suicide, not a few make use for that purpose of opium paste and ashes. This is probably owing to the general knowledge of the highly poisonous nature of opium and the readiness with which it can be obtained everywhere from the family or friends. And the average ratio during 10 years of opium suicides to the total number of suicides is 6.73 per cent. These suicides are all of them Formosan Chinese; and there has been no case of attempted suicide by opium among the Japanese who do not come in contact with the drug.

The following table gives the number of persons who attempted suicide by means of opium, that of those who died in consequence, and the ratio of the latter to the total number of suicides in each year:—

(Formosan Chinese).

Persons who attempted Suicide by Use of Opium Paste or Ashes.

	Persons who attempted suicide.			Persons who died in consequence thereof.			Total number of suicides among Formosan Chinese.	Number of opium suicides per 100 of total suicides.
	Males.	Females.	Total.	Males.	Females.	Total.		
1897.....	44	10	54	7	3	10	62	16.13
1898.....	29	19	48	2	5	7	59	11.86
1899.....	7	9	16	2	6	8	134	5.97
1900.....	6	13	19	6	7	13	142	9.15
1901.....	8	10	18	4	6	10	252	3.97
1902.....	9	12	21	4	9	13	369	3.52
1903.....	14	18	32	8	11	19	332	5.72
1904.....	27	24	51	20	15	35	443	7.90
1905.....	21	39	60	12	25	37	456	8.11
1906.....	24	52	76	11	20	31	471	6.79
1907.....	30	49	79	20	31	51	—	—

NOTES.—The ratio for 1907 is not given as the returns of the total number of suicides for that year are not yet complete.

The average ratio for the 10 years from 1897 to 1906 is 6.73 per cent.

CHAPTER VIII.—TREATMENT OF CHRONIC SMOKERS.

The Government recognised long ago the necessity of studying the medical treatment of chronic smokers, which was taken up for investigation by a special committee of the Central Board of Health; but upon the appointment of a Committee for the Investigation of Endemic and Infectious Diseases in 1901, the study of medical treatment above referred to was made over to that committee. Orders were also given to the principal Government hospitals and local official physicians to study the treatment; and although numerous cures had already been effected, many of those under treatment found the pains resulting from suspension of smoking so unbearable that they gave up the treatment, while not a few, from the weakness of their will-power, yielded to outside temptations and, after their cure, relapsed into their former habit.

The method which has hitherto been mostly adopted for the treatment of chronic opium smokers is that of the gradual diminution of doses of opium or morphine; but it cannot be called a suitable treatment. Lately, however, the study of treatment with a mixture which has Heroinum muriaticum for its principal ingredient has been commenced, and this treatment which is still under careful investigation promises to prove comparatively efficacious.

In the following tables are given the results of the treatment of chronic smokers tried at the Taichu Hospital and of those who have been treated by Formosan official physicians:—

*Results of Trial Treatment of Chronic Opium Smokers at the Taichu Government
Hospital from July 1903 up to Spring of 1907.*

	Males.	Females.	Total.
Number of smokers treated...	478	43	521
Number who permanently abandoned smoking after treatment	81	8	89
Number who recommenced smoking after treatment	339	28	367
Number of smokers who abandoned smoking per 100 of those treated...	—	—	19.52

NOTE.—The persons given in the above table as having been treated for the opium habit were all in-patients who had either come for the purpose of being treated for that habit only or, being opium smokers who had entered hospital for treatment of other diseases, were treated at the same time for the opium habit: and therefore, among the patients of the latter class there were some who, when they were on a fair way to recovery from the disease for which they had entered hospital, insisted upon leaving before the treatment for opium was completed. There were also many whose power of self-control was so feeble that, after leaving hospital, they recommenced smoking. These, then, considerably lowered the ratio of those who gave up smoking. Of those who were treated for opium smoking 26 died after leaving hospital and there were 39, into whose condition after leaving hospital there were no means of inquiring.

Although the methods of treatment are being studied in other Government hospitals, the numbers of smokers treated in them are so small that they are here omitted.

II.—NUMBERS OF CHRONIC SMOKERS TREATED BY FORMOSAN OFFICIAL PHYSICIANS.

	Number treated.			Number completely cured.			Number suspending treatment.			Number of persons cured per 100 treated.
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	
Apr. 1900–Mar. 1901	—	—	48	—	—	9	—	—	39	18.75
„ 1901– „ 1902	—	—	170	—	—	123	—	—	47	72.35
„ 1902– „ 1903	31	5	36	7	3	10	18	2	20	27.78
„ 1903– „ 1904	113	10	123	37	2	39	25	3	28	31.79
„ 1904– „ 1905	248	27	275	84	11	95	142	14	156	34.55
„ 1905– „ 1906	67	7	74	30	2	32	23	2	25	43.24
„ 1906– „ 1907	75	7	82	18	4	22	27	2	29	26.83
„ 1907– „ 1908	88	15	103	30	5	35	47	8	55	33.98

NOTES.—The figures given in the above table cover the 12 months from April of each year to March following.

The disagreement between the number treated and the sum of the numbers of those completely cured and those who suspended treatment is due to the fact that there were some whose treatment was continued in the following year.

In the figures for the two years from April 1900 to March 1902, no distinction of sex was made.

CHAPTER IX.—AMOUNT OF RAW OPIUM IMPORTED, AND AMOUNT OF OPIUM PASTE MANUFACTURED, DELIVERED TO LICENSED MERCHANTS, AND SOLD BY RETAIL DEALERS.

A.—Amount of Raw Opium imported.

The varieties of raw opium are the Benares, Patna, Persian, Turkish, Chinese, and others; and the amounts imported from 1896 to 1907 were as follows:—

Year.	lbs.
1896	241,372.87
1897	146,123.02
1898	248,665.44
1899	390,923.80
1900	330,410.35
1901	243,517.40
1902	219,146.10
1903	222,443.10
1904	203,043.60
1905	392,310.96
1906	364,912.89
1907	321,794.85
TOTAL	<u>3,324,564.38</u>

B.—Amount of Opium Paste manufactured, delivered to Licensed Merchants, and sold by Retail Dealers.

The opium paste manufactured by the Government is of three grades; and the method of preparation and the raw material differ with each grade. As the cultivation of poppy is prohibited in Formosa, the raw material is wholly imported by the Government from abroad; and for the first-grade paste the Indian opium ("large ball") is used as the principal ingredient, while for the other two grades the principal ingredient is the Persian, Chinese, or other opium ("small ball"); and they were at first manufactured and sold by the Opium Factory, but are now under the control of the Monopoly Office.

As regards the procedure for the sale of paste, the paste is forwarded by the Monopoly Office to the local authorities and delivered according to demand to licensed merchants, who sell it at a price fixed by the Government to retail dealers in opium paste.

The following table gives the amount of opium paste manufactured, and the quantity and value of the paste delivered to licensed merchants since 1897:—

AMOUNT OF OPIUM PASTE MANUFACTURED, AND QUALITY AND VALUE OF PASTE DELIVERED TO LICENSED MERCHANTS.

	Amount of Paste manufactured.				Amount of Paste delivered to Licensed Merchants.	
	First grade. kilogrms.	Second grade. kilogrms.	Third grade. kilogrms.	Total. kilogrms.	Quantity. kilogrms.	Value. Yen.
Apr. 1896—Mar. 1897	16	33	162	211	—	—
" 1897— " 1898	3,974	18,157	101,861	123,992	101,877	1,540,272
" 1898— " 1899	2,220	30,955	155,608	188,783	177,094	3,438,834
" 1899— " 1900	4,450	56,036	156,427	216,913	212,405	4,222,321
" 1900— " 1901	18,643	49,156	139,919	207,718	205,877	4,236,687
" 1901— " 1902	19,512	14,201	85,915	119,628	118,773	2,802,390
" 1902— " 1903	25,631	4,430	83,674	113,735	131,182	3,011,440
" 1903— " 1904	52,565	1,273	98,539	152,377	149,572	3,624,327
" 1904— " 1905	56,348	—	91,929	148,277	145,524	3,614,239

" 1906— " 1907	95,456	—	61,916	157,372	151,728	4,395,497
" 1907— " 1908	104,935	—	34,003	138,938	141,947	4,461,486

C.—Quantity and Value of Opium Paste sold.

It would appear at first sight that the quantity of opium paste sold to smokers by retail dealers should gradually fall off with the annual decrease in the number of licensed smokers; but smokers, as they sink deeper into the opium habit, gradually increase the amount which they smoke, their purchasing power with respect to the drug varies with the condition of the year's crops, and, moreover, there will always be more or less clandestine smoking, so that the sale cannot be kept proportional to the decreasing number of licensed smokers. And as to the demand for the various grades of opium paste, the sale of the third grade was at first about two-thirds of the whole; but the demand for the other two grades gradually increased and, since 1903, the demand for the first grade has exceeded one-half of the total demand; the second grade lost favour in course of time, and of late only the other two grades have been sold and their proportion is about seven of the first to three of the third. This increasing demand for the highest grade of opium paste is a phenomenon which accompanies the development of the island by the rise of enterprise in all parts of it, the perfection of the organs of communication, and the augmentation of social wealth; and such phenomenon is not confined to the demand and supply of opium paste.

The most remarkable fluctuation experienced hitherto in the sale of opium paste was, as may be seen in the following table, the diminution in 1901-02 in the quantity sold, which was in those two years only 60 per cent. of the quantity in the year preceding. The causes of this diminution were:—

- (1.) The rise of a sect which called itself the Feiluan-Chiangpihui and worshipped the god Kuantí. It pretended, by means of an incantation, upon hearing which the god was claimed to write down his will with a peach branch, to be able to cure its believers of their opium habit; it gave them to drink water mixed with the ashes of the censer in front of the shrine, which it called holy water, and in this manner it led astray many superstitious people. Its influence soon spread throughout the island, and a large number suspended or abandoned smoking.
- (2.) The great increase, in consequence of the rise in the price of opium paste, of the quantities of raw opium and paste made in China which were smuggled in the years 1901-02, as may be seen from the table of the descriptions and amounts of smuggled opium given in Chapter VI.

Although the Feiluan-Chiangpihui might appear to be worthy of warm welcome, great difficulties were as a matter of fact experienced on its account in the control of opium. For all persons who had once entered the Chiangpihui and given up opium smoking, found their former passion for the drug return after some days or months; but having taken oath before the god that they would abandon the habit, they feared that if they smoked again, they would be struck dead, and so, to avoid this divine punishment, they took instead to morphine injection. But as morphine injection is strictly prohibited by the Government, these people, with the exception of the fortunate few who had permanently given up smoking, finally resumed their former habit.

In the following table are given the quantity and value of opium psste sold in each year from 1897:—

QUANTITY AND VALUE OF OPIUM PASTE SOLD.

	Quantity of Paste sold.				Index-number with quantity sold in 1900 as 100.	Value of Paste sold. Yen
	First grade. kilogrms.	Second grade. kilogrms.	Third grade. kilogrms.	Total. kilogrms.		
1897	1,014	7,331	42,845	51,190	—	930,316
1898	2,370	23,051	134,102	159,523	—	3,434,776
1899	3,047	43,584	151,242	197,873	—	4,480,122
1900	11,194	51,160	138,573	200,927	100	4,673,868
1901	17,876	24,088	95,528	137,492	68	3,542,952
1902	22,881	10,919	92,894	126,694	63	3,191,763
1903	41,862	2,222	95,146	139,230	69	3,730,923
1904	54,106	166	93,247	147,519	73	4,129,901
1905	66,965	65	90,834	157,864	79	4,627,786
1906	84,126	49	70,914	155,089	77	4,914,742
1907	95,639	1	45,482	141,122	72	4,852,890

NOTE.—The rise in the value of paste sold in recent years is due to the increase in the sale of the first-grade paste.

CHAPTER X.—AVERAGE DAILY CONSUMPTION OF PASTE BY AN OPIUM SMOKER.

The consumption of opium, it need hardly be stated, varies with each smoker; a heavy smoker will consume from seven to ten *momme* (from 26.3 to 37.6 grammes) at a day, while a light one will take no more than three or four *fun* (1.1 to 1.5 gramme), and in rare cases is as much as 15 or 16 *momme* (56.4 or 60.2 grammes) smoked. These great variations in the consumption of opium is attributable to differences in the pecuniary circumstances of its smokers; persons of the middle and higher classes who have property and live in affluence are prone to increase gradually their consumption of the drug, while those of the lower classes, especially the day labourers and coolies, have perforce to be satisfied with the quantity that they can daily afford to purchase. Although, therefore, the consumption of opium may appear to be governed by the degree of addiction to the habit, one who has been long accustomed to smoking can by no means, even if his daily consumption is small, be said to be only slightly addicted to it. In short, it would seem to be more proper to consider the degree of addiction to depend not upon the quantity consumed, but upon the length of time for which the habit has been continued; and in the medical treatment of chronic smokers also, the difficulty of cure is enhanced not by the amount of consumption, but by the past duration of the habit.

Upon glancing at recent local statistics of the consumption of a smoker, we find that in the northern section the first-grade paste is mostly in favour and its average consumption is seven *fun* (2.6 grammes), while in the southern both the first and third are in demand and their average consumption is 1.1 or 1.2 *momme* (4.1 or 4.5 grammes). Again, during the 11 years from 1897 to 1907 the average daily consumption was 9.4 *fun* (3.5 grammes) per smoker.

The following table gives the average daily consumption per smoker in each year, obtained by dividing the quantity of opium paste sold by the actual number of smokers (i.e., licensed smokers after deducting therefrom those who had suspended or abandoned smoking or whose whereabouts were unknown):—

AVERAGE DAILY CONSUMPTION PER SMOKER OF OPIUM PASTE.

Year.	Average Consumption. grms.	Year.	Average Consumption. grms.
Apr. 1897—Mar. 1898	2.782	1903	3.419
" 1898— " 1899	4.550	1904	3.910
" 1899— " 1900	4.662	1905	3.572
" 1900— " 1901	3.316	1906	3.722
" 1901— " 1902	2.068	1907	3.647
" 1902	3.008		

NOTE.—The average consumption for the 11 years from 1897 to 1907 was 3.534 grms.

CHAPTER XI.—CONTROL OF OPIUM FOR MEDICINAL PURPOSES AND MORPHINE SALTS.

The control of opium for medicinal purposes and morphine salts in Formosa does not differ from that in force in Japan proper. Opium for medicinal purposes is entirely transported from Japan proper and sold by the Government of Formosa. The same is the case with powdered opium.

The quantities of powdered opium and morphine transported from Japan proper and consumed for medical purposes in Formosa in 1900 and prior thereto are not known; but their consumption from 1901 onward was as follows:—

CONSUMPTION OF MORPHINE.		CONSUMPTION OF POWDERED OPIUM.	
Year.	grms.	Year.	grms.
1901	2,830.82	1901	898.50
1902	3,733.08	1902	1,199.25
1903	2,620.68	1903	1,695.49
1904	4,969.93	1904	1,048.87
1905	5,213.00	1905	4,292.29
1906	8,305.80	1906	7,281.24
1907	7,028.42	1907	4,764.92

Morphine was partly transported from Japan proper and partly imported from abroad. There was at one time a tendency to use the imported morphine as substitute for opium; but from 1904 the importation ceased altogether on account of the strictness of the control. The quantities of morphine salts imported were as follows:—

Year.	Quantity. grammes.
1898	2,368.400
1899	14,342.800
1900	59,085.720
1901	24,452.820
1902	1,571.430
1903	8.000

CHAPTER XII.—POPULAR ATTITUDE TOWARDS THE OPIUM HABIT.

Great anxiety was felt when the opium administration was first established regarding the attitude of the natives of Formosa towards the opium habit; but while the island was under military control, especially strict laws were enforced as it was feared that the opium habit might spread to the army, civilians attached to it, and others from Japan proper. Upon seeing this, the islanders were filled with consternation as they then felt sure that the policy of the Imperial Government towards opium would be its absolute prohibition; but when the declaration respecting the grant of license for smoking for medical reasons was issued and followed by the Opium Ordinance, it was received with great joy not only by the old confirmed smokers themselves, but also by the general public, and when the registration of chronic smokers was commenced throughout the island, they came in throngs to the Government offices and applied for registration.

In order to check the propagation of the opium habit while, on the one hand, smoking was being licensed and opium paste monopolized, official instructions were issued from time to time dwelling upon the deleteriousness of the opium habit and its injurious effects upon the human body; and the same subject was similarly treated in public school textbooks; and various other means were resorted to for warning the people of the evil. And as a result, also of their intellectual progress in the course of time, men of intelligence became conscious of the baneful effects of the habit, and labourers began to fear its sapping of their strength and energy. There plainly appeared in time a general tendency to regard opium smoking with aversion; and among the smokers themselves not a few attempted by medical treatment and other methods to abandon the habit. Moreover, in regard to the detection of secret smokers also, they show an annually decreasing rate; thus, whereas in 1904–05 the number of new licensees was 24 per cent. of the total number of licensed smokers, its ratio on a similar occasion in March 1908 was no more than 14 per cent. This is a practical proof on the part of the islanders of the steady decline of their taste for opium, their consciousness of its evils, and the gradual growth of a feeling of repugnance for it; and it will, together with the suppression policy of the Government, expedite the eradication of this deleterious habit of opium smoking.

CHAPTER XIII.—ADMINISTRATION AND ORDINANCE AND REGULATIONS

RELATING TO OPIUM.

A.—Administration Relating to Opium.

The affairs of the opium administration are attended to, in the central office of the Government of Formosa, by the Sanitary Section of the Civil Administration Department and in local Government offices, by their respective sections of Police Affairs.

B.—Ordinance and Regulations Relating to Opium.

I.—FORMOSA OPIUM ORDINANCE.

This Ordinance was promulgated by Ordinance No. 2 in January 1897, and after being twice revised and added to, namely, in August 1898 and February 1902, the text, as it now stands, runs as follows:—

ARTICLE I.—By the term "Opium" in the present Ordinance is meant raw opium, opium paste, and powdered opium.

ARTICLE II.—Opium paste and powdered opium shall be sold solely by the Government.

Preparations made to contain ingredients of opium for the purpose of causing them to produce the same effects as opium or opium paste shall not be imported, manufactured, or without license therefor, be bought, sold, transferred, or owned.

ARTICLE III.—The purchase and smoking of opium paste shall be licensed and a certificate therefor granted only to such persons as shall be deemed to have become chronic opium smokers.

ARTICLE IV.—The following kinds of business shall be licensed and a certificate granted therefor:—

1. Retail business in opium paste ;
2. Manufacture and sale of implements used in opium smoking ;
3. Retail business in implements used in opium smoking ;
4. Opening of places for opium smoking ;
5. Wholesale business in powdered opium ; such business, however, shall be limited to pharmacutists and druggists.

ARTICLE V.—Only physicians, pharmacutists, druggists, and medicine manufacturers may, without Government permission, own, sell, or transfer powdered opium.

ARTICLE VI.—A person who has obtained any of the licenses specified in Art. III and Art. IV shall pay a license fee therefor, the amount of which shall be determined by Government ordinance.

ARTICLE VII.—A person who has obtained license to purchase and smoke opium paste or to open a place for smoking opium may purchase and own implements for smoking opium.

ARTICLE VIII.—Any person who imports or manufactures opium paste or sells, transfers, exchanges, or lends opium paste which has been imported or manufactured shall be condemned to major imprisonment for a term not exceeding five years or to a fine not exceeding five thousand yen.

Any person who mixes together opium paste of different grades sold by the Government or compounds opium paste sold by the Government with other substances, or sells, transfers, exchanges, or lends such mixtures or compounds shall be condemned to major imprisonment for a term not exceeding three years or to a fine not exceeding three thousand yen.

Any person who owns, possesses, or smokes the opium paste specified in either of the preceding clauses shall be condemned to major imprisonment for a term not exceeding one year or to a fine not exceeding one thousand yen.

If any person sells, transfers, exchanges, or lends opium paste without obtaining the license specified in Art. IV, Item 1 or without being appointed a licensed merchant, if any person who has obtained the license specified in Art. IV, Item 1 sells, transfers, exchanges, or lends opium paste to one who does not possess a certificate of license for the purchase and smoking of opium paste, or if any person who sells opium paste wholesale by Government appointment sells, transfers, exchanges, or lends opium paste to one who does not possess a certificate of license for retail business in opium paste, he shall be condemned to major imprisonment for a term not exceeding four years or to a fine not exceeding four thousand yen.

ARTICLE IX.—Any person who imports or manufactures any medicine which has the same effect as raw opium, powdered opium, or opium paste shall be condemned to major imprisonment for a term not exceeding four years or to a fine not exceeding four thousand yen.

Any person who sells, transfers, exchanges, or lends a medicine which has the same effect as raw opium or opium paste or any person other than a physician, pharmacist, druggist, or medicine manufacturer, who, without obtaining the license specified in Art. IV, Item 5, sells, transfers, exchanges, or lends powdered opium shall be condemned to major imprisonment for a term not exceeding three years or to a fine not exceeding three thousand yen.

ARTICLE IX, 2.—In the case of a person who attempts to manufacture or import a medicine which has the same effect as opium or opium paste but has not yet accomplished the offence, the penalty prescribed for the consummated offence shall be reduced by one or two degrees.

ARTICLE IX, 3.—Any person who uses morphine or a medicine containing morphine with the object of substituting it for opium smoking shall be condemned to major imprisonment

for a time not exceeding one year or to a fine not exceeding one thousand yen; the same rule shall apply in the case of a person who uses it in compliance with the request of another person.

ARTICLE X.—Any person who, with the object of manufacturing opium, cultivates opium poppy or owns opium poppy capsules, shall be condemned to major imprisonment for a term not exceeding two years or to a fine not exceeding two thousand yen.

ARTICLE XI.—Any person who imports implements for use in opium smoking or, without obtaining the license specified in Art. IV, Item 2, manufactures such implements shall be condemned to major imprisonment for a term not exceeding three years or to a fine not exceeding three thousand yen.

If any person sells, transfers, exchanges, or lends implements used in opium smoking without obtaining the license specified in Art. IV, Item 2 or 3, or any person who has obtained the said license sells, transfers, exchanges, or lends such implements to one who does not possess a certificate of license for the purchase and smoking of opium paste or for opening a place for smoking opium, he shall be condemned to major imprisonment for a term not exceeding two years or to a fine not exceeding two thousand yen.

ARTICLE XII.—In the case of a Customs officer who himself undertakes, or permits, the importation specified in Art. VIII, Art. IX, or Art. XI, the penalty prescribed for each offence shall be increased by one degree.

ARTICLE XIII.—Any person who, without obtaining the license specified in Art. IV, Item, 4, provides a place or implements for the purpose of smoking opium shall be condemned to major imprisonment for a term not exceeding four years or to a fine not exceeding four thousand yen.

In the case of a person who has obtained the license specified in Art. IV, Item 4, providing a place or implements for smoking opium for one who does not possess a certificate of license for the purchase and smoking of opium paste, the penalty prescribed in the preceding clause shall apply.

If, in the cases mentioned in the preceding two clauses, the offence was not committed with a view to profit, the penalty prescribed for such offence shall be reduced by one degree.

ARTICLE XIV.—Any person who smokes opium without obtaining the license specified in Art. II shall be condemned to major imprisonment for a term not exceeding three years or to a fine not exceeding three thousand yen.

In the case of a person who entices one who has not obtained the license specified in Art. III and causes him to smoke opium, the penalty prescribed in the preceding clause shall be increased by one degree.

ARTICLE XV.—If any person other than one who, by Government appointment, sells opium paste wholesale, owns or possesses opium paste without obtaining the license specified in Art. III or Art. IV, Item 1, or if any person owns or possesses implements used in smoking opium without obtaining the license specified in Art. III or Art. IV, Item 2, 3, or 4, he shall be condemned to major imprisonment for a term not exceeding one year or to a fine not exceeding one thousand yen.

In the case of any person who owns or possesses a medicine which has the same effect as raw opium or opium paste or any person other than a physician, pharmacist, druggist, or medicine manufacturer, who owns or possesses powdered opium without obtaining the license specified in Art. IV, Item 5, the penalty prescribed in the preceding clause shall apply.

ARTICLE XVI.—In the cases mentioned in Arts. VIII–XV, the materials specified therein shall be confiscated; but if such materials have already been consumed, a fine corresponding to the value thereof shall be imposed.

ARTICLE XVII.—A person who has been condemned under the present Ordinance to a term of major imprisonment may commute such imprisonment into a fine by paying it at the rate of two yen for every day of the term; if, however, the fine has been paid in part, the number of days corresponding to the amount paid shall in such case be deducted from the total term.

In the case mentioned in the preceding clause the order for commutation shall be given without formal trial by the judge after he has heard the opinion of the public procurator.

ARTICLE XVIII.—In the event of a person failing to pay a fine, he shall, in lieu of such payment, be confined in prison for a term not exceeding five years; labour may also be imposed upon him.

The term of confinement of a person who is to be confined in prison shall, without formal trial, be fixed upon application of the public procurator by the judge, who shall accordingly pronounce the sentence.

If a person who has been sentenced to pay a fine has paid part thereof, his term of confinement shall be reduced by the number of days corresponding to the amount paid according to the ratio between the amount of the fine to which he has been sentenced and the length of the term of confinement.

If the fine is paid during the term of confinement, it shall, in the manner described in the preceding clause, be applied for the remission of the remaining days of the term.

ARTICLE XIX.—In case a member of the family or an employee of a person to whom a certificate of license has been granted under Art. IV or of a person who sells opium paste wholesale by Government appointment infringes the provisions of the present Ordinance in the pursuit of the business, the penalty therefor shall be inflicted upon the person so licensed or the wholesale dealer as the case may be.

ARTICLE XX.—The provisions of Book II, Chapter V, Section 1 of the Criminal Code shall not apply to the present Ordinance.

The present Ordinance shall come into force on the tenth day of September of the thirty-first year of Meiji (1898).

2.—REGULATIONS FOR THE ENFORCEMENT OF THE FORMOSAN OPIUM ORDINANCE.

These Regulations were issued by Administrative Ordinance No. 6 of the Governor-General of Formosa, in March 1897 and revised by similar Ordinance No. 10 in the same month of the following year, and were subsequently revised in certain portions on two occasions, namely, in 1900 and 1904. Their full text, as it now stands, runs as follows:—

CHAPTER I.—OPIUM PASTE AND SMOKING.

ARTICLE I.—The opium paste manufactured and sold by the Government shall be of the following three grades:—

First-grade opium paste; Second-grade opium paste; Third-grade opium paste.

ARTICLE II.—Opium paste shall be sold wholesale by licensed merchants appointed by the local authorities to retail dealers in opium paste.

ARTICLE III.—A person who desires to obtain a license for the purchase and smoking of opium paste in accordance with the provision of Art. III of the Formosan Opium Ordinance on the ground that he is a chronic smoker must present to the local authorities an application therefor, accompanied by a certificate drawn up by a physician to be appointed by the same authorities and obtain a certificate of license for the purchase and smoking of opium paste.

ARTICLE IV.—The person who obtains the certificate of license mentioned in the preceding article shall, at the time of delivery of such certificate, pay a license fee of thirty sen.

ARTICLE V.—At the time a person purchases or smokes opium paste he shall carry with him the certificate of license for the purchase and smoking of opium paste and a pass-book in which he shall require the retail dealer to enter the grade, quantity, and price of the paste which he has purchased from him, the date of such purchase, and the name of the dealer.

CHAPTER II.—BUSINESS IN OPIUM AND HANDLING THEREOF.

ARTICLE VI.—The licensed merchant shall sell opium paste wholesale at prices fixed by the Government.

ARTICLE VII.—Opium paste shall be delivered to the licensed merchant at a reduction of one and a half per centum of the fixed price.

Opium paste shall be delivered upon payment of the price thereof.

ARTICLE VIII.—The quantity of opium paste to be delivered at a time to the licensed merchant shall be not less than one case.*

* A case of opium paste consists of thirty-six tins, each of which contains 100 *monme* (376 grammes) of paste.

ARTICLE IX.—The licensed merchant shall not sell opium paste to any person who does not possess a certificate of license for retail business in opium paste.

ARTICLE X.—The licensed merchant shall not sell opium paste in quantities smaller than one tin.

ARTICLE XI.—The licensed merchant shall not sell opium paste in retail nor keep a place for smoking opium paste.

ARTICLE XII.—The licensed merchant shall keep an account-book and enter therein the grades, quantities, and prices of the opium paste which has been delivered to him and of the paste which he has sold every day, and the names and residences of the retail dealers to whom he has sold it.

ARTICLE XIII.—The licensed merchant shall, not later than the fifth day of every month, report to the police office of his district or to an office designated for the purpose the grades, quantities, and prices of opium paste which were, according to the provision of the preceding article, entered during the preceding month.

ARTICLE XIV.—A person who desires to sell opium paste in retail must apply to the local authorities and obtain therefrom a certificate of license for retail business in opium paste.

ARTICLE XV.—The person who has obtained the certificate mentioned in the preceding article shall pay a license fee of three yen per annum.

ARTICLE XVI.—The retail dealer in opium paste shall, when he is about to sell paste, enter in the pass-book carried by the purchaser the grade, quantity, and price of the paste, the date of the sale, and his own name.

ARTICLE XVII.—The retail dealer in opium paste shall keep an account-book and enter therein the grades, quantities, and prices of the opium paste which has been sold to him and of the paste which he has sold every day.

ARTICLE XVIII.—The retail dealer in opium paste shall, not later than the fifth day of every month, report to the police office of his district or to an office designated for the purpose the grades, quantities, and prices of opium paste which were, according to the provision of the preceding article, entered during the preceding month.

ARTICLE XIX.—A person who desires to open a place for smoking opium must apply to the local authorities and obtain therefrom a certificate of license for a place for smoking opium.

ARTICLE XX.—The person who has obtained the certificate mentioned in the preceding article shall pay a license fee of three yen per annum.

ARTICLE XXI.—A pharmacist or druggist who desires to obtain license to sell powdered opium wholesale must apply to the local authorities and obtain therefrom a certificate of license for wholesale business in powdered opium.

ARTICLE XXII.—The person who has obtained the certificate mentioned in the preceding article shall pay a license fee of one yen per annum.

ARTICLE XXIII.—A physician, pharmacist, or medicine manufacturer shall not use powdered opium except for the purpose of dispensing or compounding medicines.

ARTICLE XXIV.—Powdered opium shall not be sold or delivered except upon receipt of a medical prescription or of a certificate signed and sealed by the purchaser and stating the quantity of opium required and his name, residence, and occupation.

ARTICLE XXV.—The person who has obtained a license for wholesale business in powdered opium shall keep an account-book and enter therein the quantities of the powdered opium which has been sold to him by the Government or which he has purchased from other persons who have obtained license for wholesale business and of the opium which he has every day sold to physicians, pharmacists, druggists, and medicine manufacturers, together with the names, residences, and occupations of such sellers and purchasers.

ARTICLE XXVI.—The physician, the pharmacist, and the medicine manufacturer shall each keep an account-book and enter therein the quantities of the powdered opium which he has purchased, the dates of such purchases, and the names, residences, and occupations of the persons from whom he has purchased it and also the quantity of opium which he has used every day.

CHAPTER III.—IMPLEMENTS USED IN SMOKING OPIUM.

ARTICLE XXVII.—A person who desires to manufacture and sell implements used in smoking opium must apply to the local authorities and obtain therefrom a certificate of license for the manufacture and sale of implements used in smoking opium.

ARTICLE XXVIII.—The person who has obtained the certificate mentioned in the preceding article shall pay a license fee of six yen per annum.

ARTICLE XXIX.—A person who desires to sell in retail implements used in smoking opium must apply to the local authorities and obtain therefrom a certificate of license for retail business in implements used in smoking opium.

ARTICLE XXX.—The person who has obtained the certificate mentioned in the preceding article shall pay a license fee of three yen per annum.

ARTICLE XXXI.—The license fee specified in Chapters II and III shall be paid not later than the twenty-fifth day of December of the preceding year; a person, however, who has newly commenced business shall pay, when he obtains the certificate of license, the license fee for the current year, and a person who obtains the certificate on or after the twenty-sixth day of December shall pay at the same time the fees for the current and the next succeeding year.

ARTICLE XXXII.—The manufacturer of and dealer in, and the retail dealer in, implements used in smoking opium shall each keep an account-book and enter therein the descriptions, numbers, and prices of the implements which he has manufactured, sold, or purchased every day and also the names and residences of the sellers or purchasers thereof.

CHAPTER IV.—MISCELLANEOUS PROVISIONS.

ARTICLE XXXIII.—In the event of any certificate of license being damaged or lost or of any alteration being required in the statements made therein by reason of change of name or residence, application for the renewal or regrant of such certificate must be made to the local authorities through the police office of the district or a Government office designated for the purpose; the application, however, must be accompanied by the certificate except in the case where it has been lost.

In case of change of residence to a district under the jurisdiction of other authorities, the fact must be reported to the authorities of the former district and application for the renewal of a certificate be made to the authorities of the district to which the residence has been changed.

ARTICLE XXXIV.—At the time the certificate is renewed or regranted in the case mentioned in the preceding article, a fee of 50 sen shall be paid if the applicant is a person engaged by license in business connected with opium and a fee of 15 sen shall be paid if he is a person licensed to purchase and smoke opium paste.

ARTICLE XXXV.—In the case mentioned in Art. XXXIII the police office or the Government office designated for the purpose may, pending the regrant of the certificate of license, grant a provisional certificate: such provisional certificate shall have the same validity as the certificate of license.

ARTICLE XXXVI.—In the following cases the fact shall be reported and the certificate of license returned to the local authorities: in case of death, however, the certificate shall be returned by the heir of the deceased or by the person administering his estate:—

- 1.—When a person who has obtained a certificate of license for the purchase and smoking of opium paste dies or discontinues the purchase and smoking thereof;
- 2.—When a retail dealer in opium paste, a keeper of a place for smoking opium, a wholesale dealer in powdered opium, or a manufacturer of and dealer in, or a retail dealer in implements used in smoking opium dies or discontinues his business.

ARTICLE XXXVII.—A person who has obtained a license for retail business in opium paste, for the manufacture and sale of or retail business in, implements used in smoking opium, for keeping a place for smoking opium, or for wholesale business in powdered opium shall carry on the business only in the place stated in the certificate of license.

ARTICLE XXXVIII.—In the event of a licensee dying or discontinuing his business, the opium paste, powdered opium, or implements used in smoking opium actually in stock at the time shall, not later than thirty days thereafter, be sold and delivered to a person engaged

by license in the same business with the sanction of the police office of the district or the Government office designated for the purpose; in the case of death, however, the procedure prescribed in this article shall be followed by the heir of the deceased or by the person administering his estate.

ARTICLE XXXIX.—A person engaged by license in business connected with opium shall, when application for such purchase is made to him according to the provision of the preceding article, purchase at a fair price the opium paste, powdered opium, or implements used in smoking opium.

ARTICLE XL.—In the event of a person engaged by license in business connected with opium committing an offence connected therewith or acting dishonestly in the conduct of his business, such business may be suspended or prohibited.

ARTICLE XLI.—In case of failure to pay the license fees specified in Chapters II and III within the period prescribed therefor, such license shall become invalid.

ARTICLE XLII.—The local Governor may establish by-laws for the control of opium.

CHAPTER V.—PENAL PROVISIONS.

ARTICLE XLIII.—Any person who infringes the provisions of Art. XVI or Art. XXXVII shall be condemned to major imprisonment for a term not exceeding one year or to a fine not exceeding two hundred yen.

Any person who infringes the provisions of Art. VI or Art. X, or transfers any certificate of license by sale or in any other manner shall be condemned to major imprisonment for a term not exceeding six months or to a fine not exceeding one hundred yen.

Any person who infringes the provisions of Art. V, Art. XXIII, or Art. XXIV shall be condemned to major imprisonment for a term not exceeding 25 days or to a fine not exceeding 25 yen.

ARTICLE XLIV.—Any person who infringes the provisions of Art. XII, Art. XIII, Art. XVII, Art. XVIII, Art. XXV, Art. XXVI, Art. XXXII, or Art. XXXVIII, or, in violation of the provision of Art. XXXIX, refuses without cause to purchase shall be condemned to detention for a term not exceeding 10 days or to a fine not exceeding one yen ninety-five sen.

PART II.

QUESTIONS SUBMITTED ON FEBRUARY 10TH BY MR. LAIDLAW, M.P., ONE OF THE BRITISH DELEGATES WITH REFERENCE TO THE REPORTS OF THE JAPANESE DELEGATES.

May I ask H.E. the Chief Commissioner for Japan :—

- (1.) If he or any member of his delegation can inform us if there are any regulations regarding the trade and consumption of opium or its derivatives in Korea and the Liaotung Peninsula. If not, can he obtain the information by cable within a few days?
- (2.) What revenue has been derived from opium in Formosa in each of the last 10 years respectively, and what percentage does such revenue bear to the total revenue?
- (3.) Is it true, as currently reported, that in the Formosan budget for the current year a considerable increase is expected from opium?
- (4.) The table on page 43 shows 143-492 licensed smokers in 1902 and 113-165 in 1907 while on page 60 it is stated that 219,140 lbs. of opium were imported in 1902 and 321,794 lbs. in 1907. How is it that while the number of smokers diminished the quantity consumed greatly increased?
- (5.) Is there any limit to the quantity of opium that may be supplied daily to a licensed consumer?

REPLIES TO QUESTIONS BY THE JAPANESE DELEGATION SUBMITTED ON FEBRUARY 10TH,
BY MR. LAIDLAW, M.P.

Questions (1) and (3) have been referred to the Imperial Government by telegraph. It is expected that we shall shortly be in a position to give the desired information.

In reply to question (2):—The question calls for statistics for the last 10 years; but as the system of giving licenses to opium smokers in Formosa was inaugurated in 1897, the figures for the last 12 years (1897–1908) may appropriately be given. The value of opium paste delivered to licensed merchants during the 11 years April 1897 to March 1908, which is given in the tabular statement on pages 60 and 61 of our Report, constitutes the revenue from opium. In other words, the total amount realized by the Government of Formosa from the sale of opium paste to licensed merchants is accounted for as part of the general revenue.

The total revenue of the Government of Formosa and the revenue derived from opium, during the twelve fiscal years April 1 1897–March 31 1909, and the percentage the latter bears to the former as follows:—

Fiscal year.	Total revenue of the Formosan Government. Yen.	Gross income from opium. Yen.	Percentage.
1897–98	11,283,265	1,540,272	13.6
1898–99	12,281,960	3,438,834	27.9
1899–1900	17,426,618	4,222,321	24.2
1900–01	22,269,695	4,236,687	19.0
1901–02	19,766,333	2,802,390	14.1
1902–03	19,497,579	3,011,440	15.4
1903–04	20,037,532	3,624,327	18.0
1904–05	22,333,115	3,614,239	16.1
1905–06	25,414,145	4,205,835	16.5
1906–07	30,692,173	4,395,497	14.3
1907–08	29,257,171	4,461,486	15.2
1908–09	33,871,328	4,300,824	12.6

N.B.—The figures for the fiscal years 1907–08 and 1908–09 are from the respective budgets. The others are from the final accounts.

From 1896 to 1901 a special factory for the manufacture of opium existed; but in that year the opium factory was abolished and its business merged in that of the State Monopoly Office, which as now constituted carries on the manufacture of camphor, table salt, opium and tobacco. Taking, therefore, the total expenditure of the State Monopoly Office from more recent accounts, no correct estimate can be made as to the percentage of expenditure properly chargeable to the manufacture of opium. It would be more useful to compare the net income derived from the manufacture of opium with the expenses of the opium factory during the five years of its separate existence.

The gross income from opium, the expenditure of the opium factory, the net profit or loss accruing to the Government of Formosa from the manufacture of opium, and the percentage the net income from this source bore to the total revenue of Formosa in the years referred to, were as follows:—

Fiscal year.	Gross income from opium. Yen.	Expenditure of opium factory. Yen.	Net profit or loss accruing from manufacture of opium. Yen.	Percentage the net income bears to the total revenue.
1896–97	—	1,801,585	—	—
1897–98	1,540,272	1,216,232	– 1,477,545	—
1898–99	3,438,834	1,993,520	+ 1,445,314	11.7
1899–1900	4,222,321	3,325,076	+ 897,245	5.1
1900–01	4,236,687	3,337,150	+ 899,537	4.0

In considering the ratio of the nett income to the total revenue in the above statement it should be borne in mind that the total revenue of Formosa increased from Yen 22,269,695 in the fiscal year 1900–01 to Yen 33,871,328 in 1907–08.

In reply to question (4):—

In 1902 there were 143,492 licensed opium smokers, and 219,146 10 lbs. of raw opium were imported by the Government of Formosa. In 1907, the amount of raw opium imported into Formosa was 321,794.85 lbs. while the number of licensed opium smokers decreased to 113,165.

Those seemingly contradictory figures may be explained by the following facts:—

(*a.*) In 1901 a fanatical sect called “Feiluan-Chiangpihui” described on pages 61 and 62 of our Report, came into existence, and for a time had such influence that in the fiscal years 1901–02 and 1902–03 the amount of opium paste sold to licensed merchants decreased to 118,773 and 131,182 kilograms respectively; whereas, in the fiscal year 1900–01 the amount of paste sold by the Government of Formosa was 205,877 kilograms (*vide* page 60 of our Report). The sudden decrease in the amount of opium paste sold to licensed merchants in 1901 and 1902 was thus largely due to a temporary decrease in the number of smokers in consequence of the religious convictions of the sect referred to.

(*b.*) The years 1901 and 1902 were remarkable for the prevalence of the smuggling of opium and the illicit manufacture of opium for smoking. In this connection two tabular statements given on page 56 of our Report may be referred to, and, considering that those statements deal only with cases in respect to which prosecutions were instituted, the magnitude of the total amount of opium smuggled into Formosa during those two years may well be surmised. It follows that, other things being equal, the amount of opium purchased by licensed merchants will decrease in proportion to the quantity that is smuggled into the island.

(*c.*) Owing to the improvements introduced in recent years in various directions both in the Customs and Police Services of Formosa, their efficiency has been greatly increased, the result being that smuggling and illicit manufacture and sale of opium have practically become impossible. Opium smokers are, therefore, now cut off from all sources of supply other than what is manufactured by Government and sold through licensed dealers.

In reply to question (5):—

There is no legal limitation to the quantity of opium that may be supplied to a licensed consumer; but he is precluded from purchasing opium paste unless he presents to a retail dealer a pass-book in which the latter enters the grade, quantity and price of paste sold to him, as well as the name of the retail dealer himself, and the date of purchase. (Article 5: Regulations for the enforcement of the Formosan Opium Ordinance). The fluctuation in the average amount of opium paste daily consumed by licensed smokers will be observed by referring to the tabular statement on page 64 of our Report.

Ninth Session.

REPLY OF THE JAPANESE DELEGATION TO QUESTIONS SUBMITTED TO THEM

BY MR. R. LAIDLAW, M.P., AT THE FIFTH SESSION

(FEBRUARY 10TH 1909).

When replying, during the seventh Plenary Session held on the 15th February, to some of the questions submitted by Mr. Laidlaw, I (Monsieur MIYAOKA) stated on behalf of the Japanese Delegation that questions 1 and 3 had been referred to the Imperial Government by telegram.

With reference to question 1, I am glad to say that, so far as it relates to the opium question in the leased territory of Kwantung or Liaotung Peninsula, the required information has already been received from the Imperial Government and will be presented to you on Monday. Information relating to Korea will also be laid before you as soon as it is received from the Residency General in Seoul.

I now beg to present the reply of the Japanese Delegation to Question 3, which reads as follows:—“Is it true, as currently reported, that in the Formosan Budget for the current year a considerable increase is expected from Opium?”

REPLY:—The gross income from Opium for the fiscal year 1908–09, which forms part of the general revenue of the Government of Formosa, is estimated, as stated in our reply to Question 2, in the current Budget at Yen 4,300,824. The Budget which was before the House of Representatives of the Imperial Diet at the time Mr. Laidlaw presented his Question is for the fiscal year commencing April 1st 1909 and terminating March 31st 1910. In that Budget the Revenue from Opium to be derived by the Government of Formosa is put at Yen 4,121,692, so that, as compared with the Budget for the current fiscal year, there is a decrease of Yen 179,132. The rumour alluded to by Mr. Laidlaw is therefore entirely unfounded.

FURTHER REPLY TO QUESTION NO. 1 SUBMITTED ON FEBRUARY 10TH

BY MR. LAIDLAW, M.P., TO THE JAPANESE DELEGATION.

The question, so far as it relates to the regulations covering the trade and consumption of opium in Kwantung, has already been answered in my statement of February 22nd.

As regards morphia and other opium alkaloids and their derivatives, I am now able to say that their manufacture, sale, storage, etc., are governed in that territory by the Governor General's Ordinance No. 38 of 1908, the provisions of which are similar to those contained in the regulations for the sale and handling of Medicines, a translation of which is given on pages 16-26 of our Reports.

I may add, for the information of the Commission, that the quantity of morphia imported into Kwantung in 1907 was 70 ounces, and 250 ounces in 1908.

Extract from the proceedings of the Fourteenth Session.

H.E. Monsieur MIYAOKA.—“I wish to reply to some of the questions which are still unanswered. During the Twelfth Session, Mr. T'ANG presented the following question:—‘What is the amount of Import Duty on Morphia entering the leased territories of Kwantung?’ I take it for granted that Mr. T'ANG'S question relates to the rate of Import Duty on Morphia which is brought into Kwantung for the purpose of consumption, and not for the purpose of re-export into China. If so, there is no Import Duty as the whole territory of Kwantung is a free district from the point of view of duties.”

Continuing, Monsieur MIYAOKA said.—“There was another question, from Mr. Laidlaw, a portion of which has remained unanswered. That question was to whether there existed any regulations governing the sale, etc., of opium and its derivatives in Korea. Before that question was presented, Dr. TENNEY enquired whether the Japanese Delegation had it in mind to present a statement regarding the opium question in Korea. At that time we answered that we hoped to be able to present a statement by the end of this month. Subsequently came Mr. LAIDLAW'S question. I am very happy to announce that although this will be the last Session of the International Opium Commission, we are now in receipt of a long telegram, giving full particulars regarding practically all the points on which Dr. TENNEY desires to receive information, and beg to say that a statement on the subject of Opium in Korea will be handed later on to the Secretary, and embodied in the proceedings of the Commission.”

STATEMENT OF THE JAPANESE DELEGATION ON THE OPIUM AND MORPHIA
QUESTION IN KOREA.

(Filed with the Secretary on March 2 1909, for incorporation in the minutes of the proceedings of the International Opium Commission.)

Upon receipt of a telegram from this Delegation asking for information regarding the opium and morphia question in Korea, His Imperial Japanese Majesty's Residency-General referred the matter to the authorities concerned of the Korean Government. It is regretted that the administrative system of that country has not yet attained that degree of proficiency which is necessary for gathering reliable returns of statistical data. The following statement, incomplete as it is, is presented in the hope that it will give a sufficiently clear idea of the general situation of the opium and morphia question in that country.

It may be recalled that the Commission in all the stages of its proceedings took the eminently wise position that all questions forming a subject of diplomatic negotiation between the Governments concerned should be excluded from its deliberations. Similarly in the following statement, the Japanese Delegation has deemed it proper to leave Kanto or Chientao out of consideration. The word Korea, as used in this report, therefore, is to be understood not to include any part of that disputed territory.

1.—There is nothing to justify the assumption that opium is produced at all in any part of Korea.

2.—According to the Treaties concluded between Korea and the Powers, importation of opium other than for medicinal purposes is prohibited.

3.—In 1908, 1,990 kilogrammes of medicinal opium valued at Yen 360, and 7,806 ounces of morphia valued at Yen 36,048 were imported into Korea from Japan. During the same year 280 ounces of morphia valued at Yen 1,063 was imported from Germany.

4.—The opium habit prevails extensively among the Koreans in the north; but the prevalence of the habit gradually decreases toward the south. The total Chinese population of Korea is estimated at a little over 5,800. There being no system in operation of registering opium smokers, their exact number cannot be ascertained.

5.—According to Article 659 of the Penal Code of Korea, a person found guilty of importing, manufacturing, selling or smoking opium, is liable to imprisonment with hard labour for a term of three years.

The same article provides that in case of persons who have imported, manufactured, or sold implements used for smoking opium, the penalty shall be mitigated by one degree; and that in case of persons who are found only guilty of secretly possessing such implements, the penalty shall be mitigated by two degrees. It is further provided that no criminal proceedings shall be instituted against persons, who, though originally opium smokers, have completely reformed themselves.

6.—There is no specific provision in the Penal Code as regards the importation and the injection of morphia. The Courts have, however, held that the provisions of the Penal Code above referred to were applicable to these offences as well.

7.—The Governors of Provinces and other officers charged with local administration are under instructions to use all administrative means at their disposal to prevent the commission of any of the offences described above. The Police Medical Officers are instructed to make careful examination of persons addicted to opium habit; and as a result of such examination opium smokers are compelled to break off the habit immediately, if deemed possible by those officers. In case such drastic measures are regarded impracticable, gradual cessation of the opium habit is enforced according to the varying condition of each particular case.

8.—During the year 1908 such administrative measures were taken against 813 opium smokers and 1,433 persons addicted to the use of morphia, all of Korean nationality. As the result of such administrative action, 2,106 Koreans were compelled to break off the habit immediately, and the remaining balance are being required to gradually give up the use of the drug.

Memorandum concerning the Opium Régie Service in Netherlands-India.

The Opium Régie was first established as an experiment on the island of Madura, where the system was introduced since the 1st of September 1894, and is now prevalent throughout the island of Java and in several residencies of the outer possessions (=the Colony except Java and Madura). Within four or five years the Régie will probably have been extended all over the Colony.

This management of the opium revenue in own hands takes the place of the Farm system. The change of system never affects the so-called "forbidden areas," which are districts where of old the importation and sale of opium are prohibited altogether. Only when it turned out to have been impossible for the farmer to prevent smuggling on a large scale, the Régie had to make exceptions on the prohibitive rules in general, and so in a few Chinese quarters situated in forbidden areas the consumption of opium is now allowed either to the whole Chinese population or to some of the Chinese inhabitants especially licensed.

With regard to those forbidden areas Government at present entertains the opinion that they will be conducive to the promotion of the general good when in the regions concerned there are no smokers at all or such a few of them that the evil may be eradicated without much trouble. If on the contrary the vice has taken root in such a way that suppressing thereof is quite impossible, it is desirable to meet the *bona-fide* demand of opium by means of the Régie. To be sure it is obvious that dealing of the drug at the shop of the official seller, which is easy to control, is preferable to purchase from smugglers and the frequent infliction of punishments on possessors of illegal opium as a sequel of it.

Different measures are in view to make the forbidden areas, already increased of late, greater in number or in circumference by combining prohibitive measures with the license system. Such regulations are only to be established in regions where the number of smokers is not great indeed but where absolute prohibition would fail for all that. And as after a fixed date no licenses will be issued to new applicants although those who have licenses prior to that date have the privilege of renewal as long as they desire, Government expects the number of licensees to grow less and less on account of removals and deaths of habitual smokers till at last no licensee is left and the use of opium in the region concerned is totally annulled.

Besides by increasing the places where the use of opium is prohibited, under the Régie the opium consumption is checked by limiting if feasible the use to special categories of the inhabitants in some places and excluding other categories from the same.

The opium sold by the Régie is manufactured in a factory especially built for the purpose. The raw opium wanted has to be imported from elsewhere, the growing of the poppy being prohibited throughout the Colony. The Benares opium is bought at Calcutta and the Turkish opium is purchased through the medium of the mother country. Some years hence the use of Turkish opium will be abolished.

The chandu from the factory consists of a mixture of both kinds of opium mentioned, a small percentage of dross and a most trifling quantity of sugar. Dross is bought up from smokers.

It is apparent from what has been stated higher up that the opium manufactured by the Régie is of superior quality, no unwholesome ingredients being added as the farmers were in the habit of doing, *inter alia* with a view to counteract any effort to discontinue the taking of the drug.

Chandu is put up in metallic tubes, the length and diameter of which depend upon the amount of contents. At the bottom of each tube a number is stamped indicating the quantity in matas which it contains. The tube is filled to the proper level with chandu, and the portion

remaining empty is then flattened and, after a small letter has been stamped on either of the two upper corners, folded twice. The six thicknesses of metallic plate thus obtained are then riveted by means of a metallic ring-fastener, around the edge of which are stamped in small letters, on one side of the tube the date on which it has been filled and closed, and on the other side the words "Opium Régie N.I." The metallic tubes are of different sizes according to the quantities contained therein, viz., $\frac{1}{2}$, 1, 2, 5, $12\frac{1}{2}$, 25 and 50 matas.

Besides chandu the Régie sells tikee, *i.e.*, chandu mixed with crushed awarawar leaves (*ficus septica*) and moreover, although exceptionally, raw opium and pills. Tikee is put up in hermetically soldered metallic capsules of very thin metal (so-called composition sheet); pills and raw opium in large quantities (100 matas) are packed in tubes like chandu, raw opium in small quantities (3 matas) is packed in capsules like tikee.*

The method of packing, brought about by intricate machines, has the great advantages that imitating is prevented and that a tube or capsule cannot be opened and closed again without it being visible.

Likewise the opium put up for sale is mixed with a secret identifying mark by which the Régie opium can be recognized.

The factory of the Opium Régie is managed by a chemist as director, who is assisted by two colleagues, an engineer as deputy-director and further by a technical and administrative staff.

The Régie proper belongs to the Department of Finance, the manufacturing and packing of opium has been transferred lately with other works in own hands to the Department of Government Works. This disposition is made in concert with the prevailing opinion of Government that as far as the working of the factory is concerned, the treasury's interest should continually be taken into consideration and the carrying on of the business should be as economical as possible. In regard of the Régie proper, however, though the revenue from this source is of great importance, the economical side of the question ought not to be drawn too much attention to, lest political and moral principles should be lost sight of.

Tubes are packed in boxes, which are themselves put up in little chests; capsules, sheeted in quantities of one hundred so-called "geleng," are packed in little chests only. The opium from the factory is forwarded to the depot-holders (keepers of a godown). They are European officials, who have regular stipends varying from 175 frs. to 300 frs. a month. As a rule in each residency there is one depot-holder. If the sale of opium in any residency is of little moment, no special depot-holder is appointed but the business is entrusted as a secondary function to another official who is allowed extra salary for the purpose varying from 50 frs. to 75 frs. a month. When necessary the depot-holder is assisted by a European clerk. He distributes the opium according to the demand to the mantri-sellers, lower native officials, who, disregarding the quantity of opium they sell, have regular salaries of 30, 40 and 50 guilders a month.

Besides distributing opium, the depot-holder collects the proceeds of the opium sale from the mantri's, which money he has to pay himself at the collector's (paymaster's).

In case some mantris' dwelling places should be too far away from the depot-holder's place of residence, there are other native officials appointed: "assistant collectors" who act as intermediaries for the dealing out of opium and the receiving of money. These officials draw a salary of 100 frs. a month and are usually at the same time charged with the retail sale in a shop with a ready turnover. Their bookkeeping is of two kinds: one for the registering in the quality of assistant collector, the other in that of deputy mantri-seller. Likewise a depot-holder has two sorts of bookkeeping, one as depot-holder and the other as an intermediate person for the paying of money. In the outer possessions, where the opium shops are not seldom situated at a great distance one from another which frequently necessitates an intermediary between mantri and depot-holder only for one or two shops at a time, a European official is often charged with mere assistant collector's duties without drawing any extra salary.

The officials mentioned are severally assisted by so-called "helpers," native clerks, with stipends of 15 frs. and 20 frs. a month.

As a matter of course the depot-holders are the proper men to assist the Residents at the office duties with regard to the Régie Service.

The houses appropriated for the accountable Régie officials (all of them save the helpers) are rented for the greater part; if no premises to be let are available, houses have to be built at Government's expense for the purpose.

* For each Delegation a small chest containing capsules and the various sizes of tubes—in a finished and in an unfinished state—and a box containing empty tubes of one mata are offered herewith in order to demonstrate the packing system of the Régie.

Every Resident is manager of the Régie business in his own precinct. The depot-holders, the assistant collectors, the mantri's and further staff are under his command. He has to attend to the periodical examining of the officials' books of account by his inferiors, namely the lower officials of the Covenanted Civil Service. If these inferiors have already too much business in hand and cannot bear increasing thereof as a sequel of the establishment of the Régie, the Resident is aided by a special European official: "a Controleur of the Régie"; and assistant collectors, on purpose not charged with seller's duties, are commissioned to examine the account-books.

The whole native staff of the Régie is entered on the same promotion list as the officials of the Native Civil Service, which favourable disposition enhances its worth.

As aforesaid every Resident is manager of the system's working in his territory. The general leading of the service is put into the hands of the Inspector-in-Chief, whose hints and indications are to be acted upon by the Resident. Should this functionary in respect of any question not agree with the Inspector-in-Chief's opinion, then he may apply to the Governor-General for a final decision.

The Inspector-in-Chief is assisted by two Inspectors and two Adjunct-Inspectors and an additional staff.

None of the officials mentioned has any interest in the amount of sale. A mantri-seller, suspecting contraband being spread about, never acts of his own accord but gives the Police notice of his suppositions and lets the matter rest there.

Pushing of the sale in any way, which during the period of the Farm was a great abuse, under the prevailing system never occurs. On the contrary, Government has laid down as a principle that in case any so-called anti-opium medicine should be spread abroad, which contains neither morphia nor any other unwholesome substance, that remedy should be made generally known and be offered for sale at cost price. Another principle, not to encourage the use of opium and to meet the *bona-fide* demand only, has urged the Régie to penalize hawking or resale of opium as an offence against the law. Moreover the sale and use of the drug are wholly separated; the consumption of opium in consequence may only take place either at home or in licensed private smoking places, which divans as a rule are situated in the vicinity of opium shops. To those smoking places only to grown-up people access is given for the purpose of consuming the opium brought there to that end, and the proprietor of such a place, who in any way provides his customers with opium, is liable to punishment. The licenses for smoking places either for men or for women are granted free of charge. The total number of smoking places in the residencies where the Régie is established up to this time, is 747 at present; only 9 of them are intended for women.

Yet another rule is practised by the Régie to check the use of opium. Seeing from experience that to all appearance the extent of smuggling in some places may be kept within proper bounds, Government takes enhancing of the price of opium into consideration.

At land smuggling is checked by the ordinary Police. Under the Farm system Government had a special service to prevent smuggling. This special police being of little use, it was done away with when the system changed, while at the same time the ordinary police force was increased. At sea a number of five steamers, put at the disposal of the Chief of the Service, have to cruise along the coast for examination and convoy purposes. Till now these steamers together formed a service apart but before long they will be joined to the Government Marine.

Besides by increasing the police at land as aforesaid, the Régie is able to prevent smuggling in a more satisfactory way than the farmers did, owing to the identifying mark mentioned higher up. By means of this quite reliable ingredient licit opium can be told from illicit. Immediately after the seizure of opium, the same is forwarded to the Director of the factory of the Opium Régie together with a copy of the report of seizure. This official returns the opium seized with a statement made on the oath of office as to the result of his examination. Under the Farm system each farmer had his own way of manufacturing; hence the opium seized had to be tested by a commission of experienced opium smokers, residents of the farmer's area, who as a rule were under the latter's influence and of course the evidence given by them was anything but reliable.

The examination of the dross, bought from smokers and intended to be mixed with the chandu, often brings the spreading about of contraband to light. The buying of dross is a serious head of expenditure, a pretty high price being paid for it. This measure, however, not only facilitates the detecting of clandestine sale but has also the moral advantages of checking as well the eating of dross as the reboiling of it with a view to turn it into chandu and to smoke it again. Both practices are looked at as more harmful than the smoking of pure chandu; even the preparation of chandu from dross is penalized.

In conclusion of this memorandum it should be emphasized that Government does not aim at entirely suppressing the importation and use of opium, as for the time being measures to that purpose could not be put into practice, but that the Régie has set itself the end to effectually check the opium consumption and to gradually decrease the same. To attain that end, from the very beginning several means have been used, as already appears from what is mentioned before. But now that in many residencies the Régie service has been acting for years and may be supposed to have the business pretty well under command, a more general practice of some of those means is held possible. Moreover of late some new means (for the greater part indirect ones) have been taken into earnest consideration.

In order to give a complete survey of the Régie's actual standing point in the question of the decrease of the consumption, a summary of the divers means used or to be used with that aim may follow. Behind each of them will be mentioned in parenthesis whether it is old, new, in future to be practised more generally or still in consideration.

(a.) INDIRECT ONES.

- 1°. to pay fixed salaries to the Régie officials lest any person should be interested in the amount of sale (old);
- 2°. to sell for ready money only, never on credit (old);
- 3°. to prohibit the resale and hawking of opium (old);
- 4°. to settle the opinion with the European and native officials, who are able to influence the consumption, that Government is in earnest to check it (old, but of late reminded by circular letter);
- 5°. to impress pupils at school and grown-up people ever and anon with the evils accruing from the use of opium, in short to instruct national opinion to the purpose by suitable means; in order to develop this anti-opium tendency perhaps the aid of "Boedi Oetomo," "Tiong Hwa Tsong Hwee" and other societies of the same kind whether native or Chinese, should be called in, if they intend to promote the moral concerns of special categories of the population and their objects and methods are found satisfactory (in consideration);
- 6°. to practice without any hesitation the rule laid down of old, according to which a user of opium is never allowed to enter upon any office in the Government Civil Service and to practice the same rule with regard to the Army and Navy (for the Army partly practised, for the Navy still in consideration);
- 7°. to prohibit the sale of opium to children (in consideration);
- 8°. to restrain the offering of opium to guests as a matter of hospitality especially at festivals (in consideration);
- 9°. to set forth publicly and to offer for sale at cost-price any anti-opium medicine, in case such a medicine should be spread abroad, which contained neither morphia nor any other unwholesome ingredient (new).

(b.) DIRECT ONES.

- 1°. to prevent smuggling in a satisfactory way in order to restrain the use of illicit opium by a reinforcement of the ordinary police, a first-rate packing system, an identifying mark, etc. (old);
- 2°. to maintain the forbidden areas in their present compass and if feasible to increase them, whether or no attended with granting licenses to habitual smokers (the system of forbidden areas is old but will be practised more generally; the combination with a license system has been taken into consideration);
- 3°. to exclude special categories of the population from the use of the drug (old, but will be practised more generally);
- 4°. to register the habitual smokers by the mantri-sellers, *inter alia* with a view to prepare measures which in the future should be enacted with the intention of decreasing the use of opium (old as far as the registering is concerned, the mentioned purpose is new);
- 5°. to enhance the price of opium in the outer possessions (old; on the islands of Java and Madura the prices are as yet at their maxima);
- 6°. to decrease the number of places of sale and divans and to diminish the hours during which these places and divans may remain open (old, but will be practised more generally);

7°. to prohibit the sale and use of morphia and other intoxicating medicines of the same kind and likewise to forbid the sale and the applying of instruments used for hypodermic injections of such medicines except for medical purposes (partly old, partly new; the evil of subcutaneous injections by non-physicians is new).

Particulars of the cost of the Régie in Netherlands-India, the comparative profits under the Régie and Farm systems and the decrease in the opium consumption on the islands of Java and Madura and in the Lampong districts since 1889 are contained in the appendices I, II, and III.

I.—DETAILED STATEMENT SHOWING THE COST OF THE RÉGIE IN
NETHERLANDS-INDIA IN 1907.

VARIOUS HEADS.	Cost (round numbers).	Cost per tahil chandou.
	<i>frs.</i>	<i>frs.</i>
1. Central Bureau and Officials for the inspection	79,000	0.07
2. Factory :—		
<i>a.</i> Raw opium { 1. issued as raw opium ...	28,000	—
{ 2. „ as chandou	1,255,000	1.02
<i>b.</i> Staff	204,000	0.17
<i>c.</i> Store-goods { 1. used for chandou	330,000	0.27
{ 2. „ for raw opium ...	9,000	—
3. Expenses in the various residencies (salaries, rent and repair of houses, transport, stationery, etc.)... ..	1,267,000	1.15
4. Loss owing to the purchase of djitjing (dross) ...	448,000	0.41
5. Marine Police	173,000	0.16
6. Reinforcement of the Police at land (estimated)	315,000	0.29
7. Interest (4%) and depreciation (6%) of the Régie's capital inclusive the factory (estimated) ...	400,000	0.37
8. Expenses for salaries-on-leave, halfpay, cost of passages, pensions (estimated)	145,000	0.13
TOTAL	<i>frs.</i> 4,653,000	4.04

II.—STATEMENT SHOWING THE NET PROFITS OF THE RÉGIE IN NETHERLANDS-INDIA
IN 1907 BY COMPARISON WITH THOSE UNDER THE FARM.

<i>A.</i>	Cost and profits of the Régie in 1907:—	<i>frs.</i>
1.	Cost (cf. Statement I)	4.653.000
2.	Gross profits	17.970.000
3.	Net profits of the Régie	<u>13.317.000</u>
<i>B.</i>	Cost and profits under the Farm system:—	<i>frs.</i>
4.	Expenses to prevent smuggling at land and at sea	427.000
5.	Gross profits (average amount of rent and profits owing to the sale of opium to the farmers c.q. import duties in the last three years previous to the introduction of the Government Monopoly)	13.683.000
6.	Net profits under the Farm system	<u>13.256.000</u>
<i>C.</i>	Régie and Farm compared:—	<i>frs.</i>
7.	Net profits of the Régie (cf. 3)	13.317.000
8.	„ under the Farm (cf. 6)	13.256.000
9.	Credit balance	<u>61.000</u>

III.—STATEMENT SHOWING THE AVERAGE ANNUAL CONSUMPTION OF CHANDU ON THE ISLANDS OF JAVA AND MADURA AND IN THE LAMPONG DISTRICTS FOR THE YEARS 1889 TO 1908 PER CAPITA OF THE WHOLE POPULATION.

Periods.	Average annual sale of chandu in tahils.	Average population.	Average annual consumption of chandu per head in tahils.
1889-93	1,012,081	24,119,136	0.042
1894-98	923,141	25,707,905	0.036
1899-1903	764,458	28,277,591	0.027
1904-08*	759,928	29,969,176	0.025

* The sale of chandu in 1908 is taken as $\frac{1}{11}$ the sale from 1st January to 30th November of that year.

Netherlands-India.

INFORMATION IN BEHALF OF THE INTERNATIONAL COMMISSION AS REFERRED TO IN THE NOTE OF THE AMERICAN LEGATION AT THE HAGUE TO THE MINISTER OF FOREIGN AFFAIRS OF JULY 14TH 1908 (NO. 15 IN MR. A. M. BEAUPRÉ'S SERIES).

(a.) The Importation of Crude Opium, its Derivatives and Chandu.

A. Crude opium may be imported into Netherlands-India in behalf of

- (1) the Government, to be used as raw material in the factory of the Régie;
- (2) the Farms still in operation in the government of Acheen and in the residencies Sumatra's East coast, Rhio, Billiton, Borneo's western division, Amboina and Timor (in the residencies Borneo's western division and Billiton the Régie will be established in the course of this year);
- (3) persons authorized to practice pharmacy and physicians, for medical purposes and in limited quantities only.

1. The annual need of crude opium, intended for the factory of the Régie, may be put at present at 1,265 chests of Bengal and 167 chests of Turkish opium;

2. The annual need of the residencies, where up to this time the Farm system still prevails, is estimated according to recent informations at 1,300 chests of Bengal and 25 chests of Turkish opium;

3. For medical purposes no crude opium is imported.

B. It is not allowed to import chandu except for medical purposes in behalf of persons authorized to practice pharmacy and of physicians.

It is forbidden to import so-called opium and anti-opium pills, powders and solutions and in general all other substances pretended to serve the purpose of giving up the habit of opium smoking, whenever such substances contain opium or morphia; the importation of other derivatives of opium is not allowed except for medical purposes.

The quantity of imported chandu or substances classified with the same does not exceed 70 kg. a year.

Making allowance for eventual increase of sale, the total annual need of opium for the whole colony may be put at a maximum of 3,000 chests.

(b.) The Internal Consumption of Crude Opium, Licit and Illicit.

The quantities annually used as licit crude opium are as follows:—

- (1) in the Régie area eight chests of Bengal and 23 chests of Turkish opium;
- (2) in the Farmers' areas 28 chests of Bengal opium.

The illicit use of crude opium is of no importance.

(c.) The Internal Manufacture and Use of Chandu.

The prepared opium for the Régie area is issued by the factory as—

- (1) chandu;
- (2) tikee, *i.e.*, chandu mixed with crushed leaves of the ficus septica, especially for some residencies on the island of Java;
- (3) pills in a most trifling quantity (0.132 per cent. of the total Régie sale) in behalf of the Chinese miners on the island of Banka.

The still existing farmers prepare their opium themselves and put up for sale chandu only.

Both Régie and Farm chandu are not seldom mixed by the natives with crushed leaves of various kinds in order to procure a cheap stimulant.

(d.) The Manufacture of Morphia and other Derivatives.

Morphia and other derivatives of opium are manufactured only by persons authorized to practice pharmacy or by physicians.

(e.) Use of the Crude Drug and Preparatives.

Crude opium is eaten or smoked.

(f.) The Licit and Illicit Use of Morphia and other Derivatives.

Morphia and other derivatives are sold either upon a prescription signed by a physician or upon a request in writing signed by a private person, known to the pharmacist applied to, stating the purpose for which the substance will be used; so-called anti-opium medicines which contain opium or morphia, are delivered only if prescribed by a physician (compare Appendix I).

Some years since here and there a trifling illicit use of morphia has been observed, to wit the applying of hypodermic injections.

(g.) The Extent of Poppy Cultivation in Netherlands-India and the Possibilities of its Cultivation.

The growing of the poppy and other species of papaver is prohibited throughout the Colony (compare Appendix II).

Some years ago the question has been raised as to the advisability of cultivating the poppy locally, but after serious consideration Government has decided that even no trial should be made.

(h.) The Laws regarding Importation and the Municipal Laws governing the Use of Opium and Derivatives.

Municipal laws concerning opium do not exist, all measures to the purpose being contained in ordinances or executive orders of the Governor-General.

Appendix III contains a translation of the Opium Régie ordinance for Java and Madura. The similar ordinances for the Outer possessions differ with that for Java and Madura according to local conditions and in matters of small importance only, so that producing of the relative translations is not necessary. This remark applies not only to the Régie ordinance but also to some other opium regulations, those for Java and Madura to be considered as typical.

Appendix IV is a translation of the executive order with regard to the packing and sale of opium in the whole Régie area, and Appendix V concerns the storing of opium in bonded warehouses in Java and Madura and the government of Sumatra's west coast. Ordinances bearing on the divers Farm regulations are not brought before the Commission as within a few years the Farm system everywhere will have been superseded by direct Government control.

SHANGHAI, *January 1909.*

Appendix I.

(TRANSLATION.)

Ordinance of the Governor-General of January 8 1892, amending the regulations concerning the importation of opium for medical purposes (State Gazette 1892, No. 14).

In the name of the Queen!

The Governor-General of Netherlands-India,

The Council of Netherlands-India assembled;

Unto all who shall see and hear this,

Greeting!

Be it known:—

That he, wishing to amend and to complete the Regulations concerning the importation of opium for medical purposes, enforced by the Ordinance of October 8 1872 (*State Gazette* No. 170), in a part of Netherlands-India, and

referring to Articles twenty (20), twenty-nine (29), thirty-one (31) and thirty-three (33) of the Regulations concerning the Administration of the Government of Netherlands-India, to Article twenty-six (26) of the Regulations concerning the Opium Farm in Java and Madura, enforced by Paragraph one (1) of the Ordinance of July 14 1890 (*State Gazette* No. 149, and to Article six (6) of the Ordinance of December 23 1890 (*State Gazette* No. 254);

has found it right and reasonable:—

to substitute, in place of the Ordinance of October 8 1872 (*State Gazette* No. 170), in as far as it applies to Java and Madura, as well as to the provinces and the districts situated in the outer possessions mentioned in the Ordinance of July 28 1890 (*State Gazette* No. 155) the following regulations:—

ARTICLE 1.

The importation, the ownership, the possession, the transference and the sale of opium, prepared or unprepared, intended for medical purposes, are forbidden, except to persons authorized to practice pharmacy and to physicians, as mentioned respectively in Articles fifty-six (56) and forty-nine (49) of the Regulations concerning the Civil Medical Administration of Netherlands-India, enforced by Article one (1) of the Ordinance of March 30 1882 (*State Gazette* No. 97).

ARTICLE 2.

A chemist or a physician, as mentioned in the preceding Article, shall not be allowed to import for his own use more than ten (10) kilos of raw opium or six (6) kilos of prepared opium annually.

These quantities may be increased to a maximum of twenty-five (25) kilos of raw opium or fifteen (15) kilos of prepared opium, whenever the need thereof shall be certified by a written declaration signed by the chief medical officer of the province or division in which the place of importation of said opium is situated.

ARTICLE 3.

A written notice of each intended importation of raw or prepared opium, to be made by a person authorized for that purpose by Article one (1), shall be submitted by him to the Custom House or, where no such office exists, to the head of the local government.

This notice shall consist of a declaration, to be sworn to if desired, that the opium is intended exclusively for medical purposes, and a statement showing the quality and the weight of said opium; and in the case mentioned in Section two (2), Article two (2), it shall be accompanied by the certificate therein described.

The quality and the weight of the opium thus imported shall be registered at the Office of Imports or by the head of the local government.

ARTICLE 4.

It is forbidden to import so-called opium and anti-opium pills, powders and drinks, and in general all other substances intended to serve the purpose of giving up the habit of opium smoking, whenever such substances contain opium or morphine.

It is forbidden to prepare, to own, to have in possession, to transfer or to sell any of the substances mentioned in the preceding section, except in the case of the persons mentioned in Article one (1) and the exception made in the last section of the following article.

ARTICLE 5.

The persons mentioned in Article one (1) shall not sell any raw or prepared opium in their legal possession, or any of the substances mentioned in the preceding article, to any one except:—

- (a.) Each other; and
- (b.) Others, as far as the substances mentioned in the preceding Article are concerned and provided that these substances have been prescribed in the regular manner by a licensed physician.

The possession of the substances mentioned in Article four (4) by the persons specified under (b.) shall be legal only when said persons are able to prove that said substances have been prescribed and procured to them, in the manner heretofore indicated.

ARTICLE 6.

In the public sale of a chemist's, the raw and prepared opium on hand and imported for medical purposes, and the substances mentioned in Article four (4) may be put up to auction also.

For this purpose the afore-mentioned substances shall be classified as poisons, and are so considered in the provisions of Article eighty-two (82) of the Regulations concerning the Civil Medical Administration of Netherlands-India, enforced by Article one (1) of the Ordinance of March 30 1882 (*State Gazette* No. 97).*

ARTICLE 7.

The importation, the ownership, the possession, the transference, and the sale of raw and prepared opium intended for medical purposes, and of the substances mentioned in Article four (4), except in conformity with the provisions of this ordinance, shall be treated in the same manner and be punished as a violation of the ordinance concerning opium and other substances therewith classified, not intended for medical purposes.

The similarity of treatment shall extend to the provisions regarding the confiscation of the articles involved in the violation, to the distribution of the rewards and to the division of the fines incurred and paid.

ARTICLE 8.

The provisions of this ordinance shall not apply to the importation, the ownership, the possession, the transference, and the sale of raw and prepared opium intended for medical purposes and of the substances mentioned in Article four (4) for the use and by or on account of the Government.

Appendix II.

(TRANSLATION.)

Ordinance of the Governor-General of April 24 1872, prohibiting the Cultivation of the Poppy (State Gazette 1872, No. 76.)

In the name of the King!

The Governor-General of Netherlands-India,
The Council of Netherlands-India assembled;
Unto all who shall see and hear this,
Greeting!

Be it known:—

That he, considering it necessary to generally prohibit the cultivation of the poppy in Netherlands-India;

referring to Articles twenty (20), twenty-nine (29), thirty-one (31) and thirty-three (33) of the Regulations concerning the Administration of the Government of Netherlands-India;

has found it right and reasonable—

to prohibit each and every person whomsoever from cultivating the poppy, under penalty of paying a fine of one thousand (1000) florins and the confiscation of the poppy thus cultivated or planted.

* This article runs as follows:—

In the public sale of a chemist's the poisons may be sold only to chemists, to physicians who are allowed to prepare medicines and to veterinarians.

Such public sale may not take place unless at least five days beforehand there has been given a written notice of it to the head of the local government.

Appendix III.

(TRANSLATION).

Regulations concerning the Opium Régie in Java and Madura

(State Gazette 1898 No. 227, 1901 No. 62, 1902 No. 174 and 1906 No. 317).

In the name of the Queen!

The Governor-General of Netherlands-India,
 The Council of Netherlands-India assembled;
 Unto all who shall see and hear this,
 Greeting!

Be it known:—

That he, wishing to fix in a definite form the Regulations concerning the Opium Régie in Java and Madura; and referring to Articles twenty (20), twenty-nine (29), thirty-one (31) and thirty-three (33) of the Regulations for the Administration of the Government of Netherlands-India, as well as to the Ordinance of February 18 1898 (*State Gazette* No. 77);

has found it right and reasonable:—

First: By putting out of force the Regulations, established by the Ordinance of July 27 1894 (*State Gazette* No. 161), and amended and completed by the Ordinances of November 20 1895 (*State Gazette* No. 241) and January 9 1897 (*State Gazette* No. 19), to establish the following Regulations for the Opium Régie in Java and Madura:—

ARTICLE 1.

- (1.) The importation and the sale of opium, prepared or unprepared, within the area of the Opium Régie in Java and Madura, except by the Opium Régie, is forbidden.
- (2.) For the purposes of the prohibition in the foregoing section there shall be classed with opium the following: morphine, preparations of opium, solid substances and liquids containing opium or mixed therewith, so-called opium pills, opium powders, anti-opium pills and anti-opium powders, and all other substances of this nature which contain morphia or opium or are mixed therewith.

ARTICLE 2.

- (1.) Prepared opium shall be sold at retail by the Régie, in such places as designated for the purpose, and which have been indicated as such, through the persons appointed and in the containers adopted for that purpose.
- (2.) The opium shall be prepared in a factory of the Régie established for that purpose.
- (3.) The Governor-General shall determine the regulations for the sale of prepared opium by the Régie and for the packing of said opium.

ARTICLE 3.

- (1.) Persons to whom written licenses for that purpose have been granted by the head of the provincial government, are authorized to equip and to use as places for the consumption of opium such buildings as may be designated by him, and which shall be known as "kits," and to which access shall be given to the public in general for the purpose of consuming the prepared opium brought there to that end. These licenses shall be granted for places for the consumption of opium, either for men or for women, with the condition that such licenses may at any time be revoked in writing by the head of the provincial government. Licenses for the opening of more than one "kit" for men, or of more than one "kit" for women, where places for the sale of opium exist, as well as licenses for the opening of one or more than one "kit," where places for the sale of opium do not exist, shall not be granted, until advice

has been taken with the head official, the Chief of the Opium Régie. In case of a difference of opinion, the decision of the Governor-General shall be final.

(2.) Except holders of licenses in their "kits," nobody is allowed to open to the public in general any place for the purpose of consuming opium.

(3.) The violation of the foregoing section shall be punishable:—

in the case of Europeans and all others classified as such, with a fine of one hundred (100) florins, or with imprisonment for a term varying from three (3) to eight (8) days;

in the case of natives and all others classified as such with manual labor on the public works, with subsistence, but without wages, for a period varying from one (1) to three (3) months.

ARTICLE 4.

Holders of the written licences mentioned in Article three (3), shall place in front of the buildings designated therein, in a conspicuous place, a wooden sign, upon which shall be written in the Dutch, the local native and the Chinese languages, in such a manner as to be easily legible, in the case of "kits" for women, the words "Opium Kit for women," and in the case of all other "kits," the words "Opium Kit," under penalty of a fine of twenty-five (25) florins for each violation of this section.

ARTICLE 5.

(1.) Young persons, in the case of whom it is not known with sufficient certainty whether they have reached the age of eighteen (18) years, as well as persons who are armed or intoxicated, shall not be admitted to the "kits," whether for men or for women. No men shall be allowed access to the "kits" for women, neither shall women be allowed to enter those intended for men.

(2.) Dice or other games, by whatever name they may be known, shall not be permitted in the "kits."

(3.) Likewise all persons are forbidden, while in an "Opium Kit" or its appurtenances, to purchase or to take in pawn, in exchange for ready money, any goods whatsoever.

(4.) The head of the provincial government, in conjunction with the head official, the Chief of the Opium Régie, shall determine for each "kit" the hours during which it shall be accessible to the public; provided that in all cases "kits" shall remain closed from eleven (11) o'clock at night until half-past five (5.30) o'clock in the morning.

(5.) If any act in violation of Sections one (1), two (2) or four (4) of this article is committed, or if the proprietor of a "kit" shall in any way provide or cause to provide his customers with opium, even though such act does not partake of the nature of a sale, or if he shall permit his customers in any way to supply each other with opium in the kit, he shall be punished with a fine of from ten (10) to one hundred (100) florins. A similar penalty shall be imposed upon any person who has been guilty of violating Section three (3) of this article above and in addition to such penalty as may be imposed upon the holder of an illegal pawnshop.

ARTICLE 6.

(1.) All persons, excepting officials of the government, while acting *ex officio*, are prohibited from owning, storing, having in possession or conveying:—

(a.) raw opium;

(b.) prepared opium, which has not been bought from the Régie at a shop authorized to sell opium in Java and Madura;

(c.) more than one (1) tael of prepared opium, from whomsoever bought or obtained;

(d.) the articles mentioned in Section two (2) of Article one (1), which cannot be considered as prepared opium bought from the Régie at a shop authorized to sell opium in Java and Madura, or as the dross of such opium smoked;

(*e.*) the dross of opium, mentioned in Paragraph (*d.*) in quantities larger than one-half ($\frac{1}{2}$) tael;

(*f.*) instruments which, as a rule, are used exclusively for the preparation of opium, or which bear evidence of having been used for that purpose.

(2.) Nevertheless, any person, purchasing in behalf of a third person and provided with a written permit for that purpose issued by the head of the provincial government, is authorized to convey more than one (1) tael of opium, said opium being prepared by the Régie and packed in the containers adopted by the Régie, to a maximum quantity to be specified in the permit, but in no case to exceed five (5) taels, from a shop authorized to sell opium to another place, the names of both to be specified; and to have in possession at the last-named place the quantity of opium thus conveyed; with such conditions as may be set forth in the permit.

(3.) Said permits shall be granted for a period not to exceed one (1) year, provided that they may at any time be revoked in writing by the head of the provincial government.

(4.) The transference by the holder of such a permit, to a third person, of opium prepared by the Régie and packed in the containers adopted by the Régie, at the prices fixed for the shop authorized to sell opium at which the aforesaid opium is bought, shall not be considered as a sale.

(5.) The following shall be considered and treated as opium not bought from the Régie in Java and Madura:—

(*a.*) Opium packed in containers other than those of the Régie in Java and Madura as determined by the Governor-General;

(*b.*) Opium found in the containers originally used by the Régie in Java and Madura or in others of a similar kind, but which has been proved to be illegal.

ARTICLE 7.

It is forbidden:—

(*a.*) to prepare the dross of smoked opium in order to turn it into chandu again;

(*b.*) to dispose of the dross of smoked opium, except by turning it over to the Régie.

ARTICLE 8.

Any person who shall order to sell or to convey illegal opium or to act in any other way contrary to Section one (1) of Article six (6), and Article seven (7) of these regulations or who shall be concerned in or in any way whatsoever shall promote advisedly any such act, shall be punished with the same penalties as those provided in Article eleven (11) for the violator himself.

ARTICLE 9.

Any person who, with the object of making another person liable to the penalties provided in this ordinance for the importation of opium or of any of the other substances enumerated in Article one (1), or for having in possession or conveying, opium which has not been bought from the Régie in Java and Madura, of opium or the dross of smoked opium in larger quantities than permitted by law, or the other substances enumerated in Article one (1), or any instruments which, as a rule, are used exclusively for the preparation of opium or which bear evidence of having been used for that purpose, shall place or conceal among the goods, in the house or on the premises of said other person, any opium, any dross of smoked opium, any of the other substances enumerated in Article one (1), or any of the instruments mentioned above, or shall cause the same to be placed or concealed in said manner, shall be punished, in the case of a European or any other person classified as such, in accordance with Article three hundred and twenty-six (326) of the Penal Code now in force for Europeans, and in the case of a native or any other person classified as such, in accordance with Article three hundred and twenty-eight (328) of the Penal Code now in force for natives.

ARTICLE 10.

(1.) Immediately after the seizure of opium—and for the purpose of this section all of the substances enumerated in Section two (2) of Article one (1) are counted as opium—even

if the owners are not known, or if the prosecution for violation of this Ordinance is not instituted on account of any other reason, the opium shall be forwarded, under the official seal of the head of the local government, and together with a copy of the report of seizure, in which shall be set forth the reasons why it is supposed that said opium whether or no has been purchased from the Régie in Java and Madura, to the Director of the factory of the Opium Régie. He or the chemist of the factory shall return the opium thus seized, unless it has already been decided that no prosecution can be instituted, sealed, to the head of the local government, with a statement made on the oath taken by him when entering upon his office to the effect that said opium has been examined by him for the purpose of determining its ingredients, whether or no the ingredients of opium have been found, and, if they have been, whether or no his examination has established the presence of the identifying marks essential in opium prepared by the Régie for Java and Madura, whether or no the said opium may be considered as originating from the Régie in Java and Madura, and the statement shall also indicate at what quantity of raw opium of good quality it may be valued. If it has already been decided that no prosecution can be instituted, then the Director of the factory of the Opium Régie or the chemist of that factory shall be required to transmit only the above-mentioned statement.

(2.) The statement mentioned in the preceding section, shall be added to the writs to be used in the prosecution. It has in cases of violation of this ordinance a conclusive force as far as the object of the examination is concerned.

(3.) An amount of money corresponding to the value of the opium thus seized, reckoning one (1) catty of raw opium at twenty (20) florins, shall be drawn from the Treasury and distributed in the manner prescribed in Article twelve (12). No money shall be drawn for said purpose, unless the sum to be drawn amounts to one (1) florin or more.

(4.) All articles which shall be confiscated in accordance with this ordinance, with the exception of worthless instruments and packing material, which shall at once be destroyed, shall be forwarded, under the official seal of the head of the local governments, to the factory of the Opium Régie, where such part of said articles as may be of any use to the government shall be entered on the books and the remainder destroyed. Opium or instruments, the owners of which are unknown, or against whom for any other reason no prosecution on account of a violation of the law can be instituted, shall be disposed of in the same manner.

ARTICLE II.

(1.) All violations of the regulations set forth in this ordinance, for which no specific penalties have been fixed, shall be punishable—in addition to imprisonment, for the first offense, for a term varying from one (1) month to three (3) years, and for a subsequent offense, for a term varying from three (3) months to five (5) years:—

in case the quantity of opium concerned in the violation does not exceed one hundred (100) catties, with a fine varying from one thousand (1000) to ten thousand (10,000) florins;

in case said quantity exceeds one hundred (100) catties, with a fine varying from one thousand (1000) to ten thousand (10,000) florins for the first hundred (100) catties, and one hundred (100) florins for each additional catty.

(2.) The imprisonment mentioned in the preceding section, in the case of natives and persons classified as such, is substituted by manual labor without chains for a period corresponding to the term of imprisonment.

(3.) In determining the amount of fine, the quantity of raw opium of a good quality at which the opium seized is valued, in accordance with the statement mentioned in Article ten (10), Section one (1), shall be taken as a basis.

(4.) The opium seized—and for the purposes of this section all of the substances enumerated in Article one (1), Section two (2), are understood—and the instruments described in Article six (6), Section one (1), Paragraph (f.), used in violation of the regulations of this ordinance, shall be confiscated.

(5.) Vessels, vehicles and beasts of burden, which have been used in violation of the regulations set forth in this ordinance, may be attached and sold by auction, if the judge trying the case shall deem it proper, in payment of the fine imposed and of the costs of the prosecution.

(6.) The penalties heretofore mentioned shall not apply to:—

- (a.) any person who—simply by having in his possession, selling or conveying any quantity of raw opium not exceeding two (2) catties or any quantity of other opium of like value, or the instruments mentioned in Article six (6), Section one (1), Paragraph (f.)—shall for the first time violate the regulations set forth in this ordinance.

In such case, the violators, in addition to forfeiting the opium or the instruments thus seized, shall be punished:—

in the case of Europeans and all other classified as such, with a fine of one hundred (100) florins, or with imprisonment for a term varying from three (3) to eight (8) days;

in the case of natives and all others classified as such, with manual labor on the public works, with subsistence, but without wages, for a period varying from eight (8) days to three (3) months.

- (b.) any person who—simply by having in his possession, selling or conveying any quantity of raw opium not exceeding two (2) taels or any quantity of other opium of like value, or the instruments mentioned in Article six (6), Section one (1), Paragraph (f.)—shall otherwise than for the first time violate the regulations set forth in this ordinance.

In such case the violators, in addition to forfeiting the opium or instruments thus seized, shall be punished:

in the case of Europeans and all others classified as such, with a fine of one hundred (100) florins, or with imprisonment for a term of eight (8) days;

in the case of natives and all others classified as such, with manual labor on the public works, with subsistence, but without wages, for a period of three (3) months.

(7.) The penalties inflicted in accordance with the repealed regulations for the opium farm in Java and Madura, contained in the *State Gazettes* 1874 No. 228 and 1890 No. 149, as since amended and completed, moreover the penalties inflicted in accordance with the Provisional Regulations for the Opium Régie in the provinces Madura, Besuki, Probolinggo and Pasuruan (*State Gazettes* 1894 No. 161, 1895 No. 241 and 1897 No. 19), put out of force by this ordinance, shall be taken into consideration to determine whether a violation has been committed for the first time or repeatedly.

(8.) If more than ten (10) years shall elapse between two offences, the first shall have ceased to have any influence on the degree of culpability of the subsequent offence.

ARTICLE 12.

(1.) The money to be drawn from the Treasury in accordance with Article ten (10), as well as the fines incurred and paid for the violation of this ordinance (immediately after the penalty inflicted for such violation has become effective, or, in the cases mentioned in Article four hundred and ten (410) of the Regulations concerning Penal Proceedings and Article four hundred and fifteen (415) of the "Native Regulation," after the fine has voluntarily been paid and declared, that the confiscation has been submitted to) shall be distributed as follows:—

- (a.) to the informer or informersthree-sevenths;
 (b.) to the apprehender or apprehenders.....two-sevenths;
 (c.) to all others who have aided in the discovery of
 the offence or in the seizureone-seventh.

The remaining one-seventh (1/7) to be available for the purpose of giving special rewards to persons who, in the judgment of the head official, the Chief of the Opium Régie, have been particularly diligent in aiding in the discovery of offences.

(2.) The head of the provincial government shall determine who are to be considered the informers, the apprehenders and the co-operators concerned in the discovery of the offence.

(3.) Any person who shall render services in more than one capacity shall be entitled to the proper proportion of the different rewards merited by virtue of the services thus rendered.

(4.) The distribution of the rewards among several informers, apprehenders or co-operators in the discovery of the offence, shall be made by the head of the provincial government within whose jurisdiction such offence has been committed, according to the value of the service thus rendered.

(5.) Any remaining portion of such money, to which no one shall be legally entitled, shall be available for the purpose of giving special rewards in the same way as described in Section one (1) in fine.

(6.) The provisions of Article two (2) of the Resolution of September 16 1833, No. 6 (*State Gazette* No. 56), and of Article one (1), Paragraph (b.) of the Resolution of September 18 1853, No. 5 (*State Gazette* No. 73), as well as of the Resolution of April 11 1874, No. 14 (*State Gazette* No. 106), shall remain in force.

(7.) Whenever, in the judgment of the head of the provincial government, it appears certain that the opium seized will be declared confiscated by the judge, or whenever the owners of the opium thus seized—and for the purposes of this section are included the substances mentioned in Article one (1), Section two (2)—are not known, or whenever for other reasons no prosecution can be instituted, the payment (of the above-mentioned rewards) shall be made in the manner prescribed in the foregoing sections, within eight (8) days after the statement mentioned in Article ten (10), Section one (1) has been received from the Director of the factory of the Opium Régie or from the chemist of that factory.

ARTICLE 13.

The provisions of this ordinance shall not be applicable to persons importing, owning, having in possession, transferring or selling opium, or any of the other substances mentioned in Article one (1), for medical purposes; excepting such regulations relative thereto as exist or may hereafter be adopted.

Transitional measure.

ARTICLE 14.

Prepared opium originating from the farmer for the retail of opium in a province of Java and Madura, where the Régie has been established and obtained previous to the date of establishment, shall remain legal in that province during the first eight (8) days after said date.

Second: etc.

Appendix IV.

(TRANSLATION.)

Provisions concerning the packing of opium by the Régie and the sale thereof within the

Régie area (*State Gazettes* 1898 No. 279, 1902 No. 306, 1905 No. 188,
1906 No. 90 and 1908 No. 201).

Executive order of the Governor-General of Netherlands-India of October 15
1898 No. 15 (as since amended and completed).

Considering, etc.

The Council of Netherlands-India assembled ;

has found it right and reasonable :

First: etc.

Second: By repealing Article two (2) of the Resolution of July 27 1894 No. 1 (*State Gazette* No. 163), as amended and completed by the Resolutions of November 20 1895 No. 2 (*State Gazette* No. 243), June 17 1896 No. 11 (*State Gazette* No. 111) and January 9 1897 No. 23 (*State Gazette* No. 20), to adopt the following regulations in regard to the packing of opium by the Régie and the sale thereof within the Régie area :—

ARTICLE 1.

(1.) Opium shall be retailed in such places as may be designated by the head of the provincial government in conjunction with the head official, the Chief of the Opium Régie, in the following provinces:—

<i>a.</i>	in Bantamat any number of places not to exceed	2
<i>b.</i>	„ Batavia	„ „	49
<i>c.</i>	„ Preanger Regencies	„ „	6
<i>d.</i>	„ Cheribon	„ „	13
<i>e.</i>	„ Pekalongan	„ „	56
<i>f.</i>	„ Semarang	„ „	146
<i>g.</i>	„ Rembang	„ „	58
<i>h.</i>	„ Surabaya	„ „	92
<i>i.</i>	„ Madura	„ „	32
<i>j.</i>	„ Pasuruan	„ „	56
<i>k.</i>	„ Besuki	„ „	40
<i>l.</i>	„ Banjumas	„ „	16
<i>m.</i>	„ Kedu.... ..	„ „	50
<i>n.</i>	„ Djokjakarta	„ „	85
<i>o.</i>	„ Surakarta	„ „	145
<i>p.</i>	„ Madiun	„ „	80
<i>q.</i>	„ Kediri	„ „	134
<i>r.</i>	„ Lampong districts	„ „	6
<i>s.</i>	„ Sumatra's west coast	„ „	22
<i>t.</i>	„ Ternate and its dependencies	„ „	2
<i>u.</i>	„ Benkulen	„ „	8
<i>v.</i>	„ Tapanuli	„ „	7
<i>w.</i>	„ Banka and its dependencies	„ „	9
<i>x.</i>	„ Palembang	„ „	12
<i>y.</i>	„ Djambi	„ „	2
<i>z.</i>	„ Menado	„ „	9
<i>aa.</i>	„ Celebes and its dependencies	„ „	50
<i>bb.</i>	„ Borneo's southern and eastern division	„ „	25
<i>cc.</i>	„ Bali and Lombok excepting the division of Lombok	„ „	127

(2.) The maximum number of shops for the retail of opium fixed by Section one (1) of this article shall not be exceeded except with the authorization of the government.

(3.) The buildings to be used as shops for the retail of opium shall be designated by the head of the provincial government.

(4.) All shops for the retail of opium shall be indicated by placing in front of the buildings designated for that purpose, in a conspicuous place, a wooden sign, on which shall be written in the Dutch, the local native, and the Chinese languages, in such a manner as to be easily legible, the words "Shop for the retail of opium."

ARTICLE 2.

(1.) Prepared opium shall be sold in the following quantities, according to the local needs as determined by the head of the provincial government:

one-half	($\frac{1}{2}$) mata,
one	(1) mata,
two	(2) matas,
five	(5) matas,
twelve and one-half	($12\frac{1}{2}$) matas,
twenty-five	(25) matas,
fifty	(50) matas,

and wherever, in the opinion of the head official, the Chief of the Opium Régie, it shall be unavoidable, also in quantities of one-third ($\frac{1}{3}$) mata.

(2.) In districts where on the part of the Régie, opium pills or crude opium are offered for sale, pills shall be sold in quantities of one-half ($\frac{1}{2}$) tael (containing one and three-quarters ($1\frac{3}{4}$) matas of prepared opium), and crude opium in quantities of three (3) matas and one (1) tael, in such places where in the opinion of the head official, the Chief of the Opium Régie, it shall be unavoidable.

(3.) Each quantity (with the exception of one-third ($\frac{1}{3}$) mata and three (3) matas) shall be put up in metallic tubes, the length and diameter of which will depend upon the amount of contents. At the bottom of each tube a number is stamped, indicating the quantity in matas which it contains. The tube is filled to the proper level with opium or opium pills, and the portion remaining empty is then flattened and, after a small letter has been stamped on either of the two upper corners, folded twice. The six thicknesses of metallic plate thus obtained are then riveted by means of a metallic ring-fastener, around the edge of which are stamped in small letters, on one side of the tube the date on which the tube has been filled and closed, and on the other side the words "Opium Régie N. 1." Quantities of one-third ($\frac{1}{3}$) mata are mixed with crushed awar-awar leaves and worked into "tikee" and then, just as quantities of three (3) matas crude opium, put up in metallic capsules hermetically soldered along the sutures. The metallic ring-fastener above mentioned, is made of red copper exclusively for the tubes to be sold in the provinces:—

- a. Bali and Lombok;
- b. Sumatra's west coast;
- c. Ternate and its dependencies, especially the divisions Ternate and Batjan;
- d. Benkulen;
- e. Tapanuli;
- f. Banka and its dependencies;
- g. Palembang;
- h. Djambi;
- i. Menado;
- j. Celebes and its dependencies;
- k. Borneo's southern and eastern division.

(4.) (Applies to the island of Bali only):

ARTICLE 3.

(1.) Sales of opium shall be made at the prices for the first time fixed for each shop by the head of the provincial government, with the approval of the Governor-General.

(2.) The head of the provincial government, in conjunction with the head official, the Chief of the Opium Régie, is authorized to raise or to reduce the original prices by twenty (20) per cent.

(3.) Every shop for the sale of opium shall exhibit in a place easily seen by the public its tariff of prices.

(4.) Whenever the head of the provincial government, in conjunction with the head official, the Chief of the Opium Régie, shall remove, close up or establish a shop for the sale of opium, or shall fix for the first time, raise or reduce the prices for the sale of opium, notice thereof shall be given to the Director of Finance and to the General Bureau of Accounts.

(5.) (Applies to the island of Bali only.)

ARTICLE 4.

The head of the provincial government, in conjunction with the head official, the Chief of the Opium Régie, shall determine for each shop the hours during which it may remain open.

ARTICLE 5.

(1.) The dross of smoked opium (djitjing) shall be brought up at the shops for the sale of opium at a price per tael corresponding to the local price of one-half ($\frac{1}{2}$) tael of prepared opium.

(2.) The head of the provincial government, in conjunction with the head official, the Chief of the Opium Régie, is authorized to reduce by not more than fifty (50) per cent. the prices for the purchase of djitjing mentioned in Section one (1) of this article.

ARTICLE 6.

In cases where the head of the provincial government is ordered to act in conjunction with the head official, the Chief of the Opium Régie, and no agreement is arrived at, the decision of the Governor-General shall be final.

Third, etc.

Appendix V.

(TRANSLATION.)

Ordinance of the Governor-General of July 11 1879 as since amended, enforcing new Regulations concerning the storing of opium in bonded warehouses and the arrivals of that article in Java, Madura and the Government of Sumatra's west coast (State Gazette 1879 No. 224 and 1907 No. 408).

In the name of the King!

The Governor-General of Netherlands-India,
The Council of Netherlands-India assembled;
Unto all who shall see and hear this,

Greeting!

Be it known:

That he, considering it desirable to enforce new Regulations concerning the storing of opium in bonded warehouses and the arrivals of that article in Java and Madura and the government of Sumatra's west coast:

referring to Articles twenty (20), twenty-nine (29), thirty-one (31) and thirty-three (33) of the Regulations concerning the Administration of the Government of Netherlands-India;

has found it right and reasonable:

by repealing the Ordinance of November 12 1872 (*State Gazette* No. 195) October 23 1873 (*State Gazette* No. 203) and July 11 1877 (*State Gazette* No 133) to establish the following regulations:—

ARTICLE 1.

The storing of opium in bonded warehouses in Java, Madura and the government of Sumatra's west coast, except for the use or on account of the Government of Netherlands-India, shall not be permitted, save in the cases and in conformity with the provisions set forth in the following articles:—

ARTICLE 2.

Vessels having opium on board are prohibited from approaching—in the case of vessels registered by the Government of Netherlands-India, within a distance of six (6) English leagues, and in the case of other vessels within a distance of three (3) English leagues—the coasts of Java, Madura, the Government of Sumatra's west coast and the islands pertaining thereto.

Vessels rigged in European style and of more than seventy-five (75) cubic meters or twenty-six and one-half ($26\frac{1}{2}$) tons are excepted from this prohibition; provided that said vessels shall not approach within the distances mentioned in Section one (1) of this article of the indicated coasts, either to trade or to cast anchor, but in the roads of Batavia, Cheribon, Tegal, Pekalongan, Semarang, Surabaya, and Padang.

ARTICLE 3.

The prohibitions of the preceding article shall not apply to vessels on board of which there is no opium other than such as is carried for the use and on account of the government, or for the use of private chemists and physicians, when such carriage takes place in conformity with the regulations in force relative thereto, or opium intended for the Opium farmers in the provinces Timor and its dependencies and Amboina.

The provisions of Section one (1) of the preceding article and the prohibition of casting anchor shall not apply to the Straits of Sunda or to the Straits of Bali; and said provisions shall be waived in cases of accident or danger at sea, if in the judgment of the provincial or local government such action is warrantable.

ARTICLE 4.

A master whose vessel touches at any place situated within the parts of Netherlands-India mentioned in Article two (2), shall give notice to the Harbour Master's Office, or, if there be no Harbour Master at the port put in, to the highest local authority thereof, immediately after his arrival, of any opium which he may have on board, whether it forms a portion of his cargo or whether it is the property of his passengers or sailors.

ARTICLE 5.

Any opium which is not carried for the use and on account of the government, or for private chemists, in conformity with the provisions relative thereto, or does not proceed from the farm of the port of destination or from the government stores, shall be landed, in the cases mentioned in Section two (2), Article three (3), as soon as possible, and in other cases within twenty-four (24) hours after the arrival of the vessel, under the surveillance of officers to be designated for that purpose by the head of the provincial or local government, and shall be stored in a public bonded warehouse or other secure godown.

It is forbidden to unpack or to pack differently the opium thus stored.

The head of the provincial or local government may, in conjunction with the farmer or his agent, allow to act in contravention to the provisions of this Article.

If he allows the opium to remain on board the vessel, he shall place said vessel under the surveillance of officers to be designated by him for that purpose.

ARTICLE 6.

The opium which has been stored in a warehouse in conformity with the preceding article shall be returned to the vessel by which it has been carried.

The head of the provincial or local government may for special reasons allow said opium to be placed on board another vessel.

The head of the provincial or local government shall cause the reshipment of said opium to take place within such time as to occasion no delay in the departure of the vessel.

The opium shall so be stored on board the vessel that its presence can easily be perceived.

ARTICLE 7.

Said opium shall be exported by the vessel on board of which it has been allowed to remain by virtue of permission granted in conformity with the last Section of Article five (5), or on board of which it has been shipped in conformity with Article six (6), within a period to be fixed by the head of the provincial or local government.

The head of the provincial or local government may set a watch over the opium on board till the vessel departs or till another moment fixed by him. Within that period the farmer may do the same.

ARTICLE 8.

The costs of unloading, of transfer to and from the warehouses and of reshipment of said opium shall be charged to the master.

Warehouse rent and other similar charges shall not be collected.

If in the judgment of the head of the provincial or local government the packing of the opium leaves be desired, said packing shall be restored or changed at the expense of the master.

He shall also be charged with an amount, to be determined by the authorities mentioned, which shall serve as remuneration for the services of the watchmen.

ARTICLE 9.

Persons violating the prohibitions of Article two (2) shall be treated and punished in like manner as those violating the regulations concerning the importation of opium.

Persons violating the provisions of Article four (4), of Section two (2) of Article five (5), and of Section one (1) of Article seven (7), shall be punished with a fine varying from one thousand (1000) to ten thousand (10,000) florins, and with confiscation of the opium, the presence of which caused the violation of said provisions or which was not exported within the period of time specified.

Said fine shall be chargeable to the vessel on board of which the opium concerned is found.

ARTICLE 10.

The proceeds of the opium seized and confiscated, and the fines incurred and paid for violation of the regulations set forth in this Ordinance, shall be distributed in the manner provided in the regulations concerning the Opium farms in Java, Madura and the Government of Sumatra's west coast.

The following questions were put by the German Delegation:—

1.—Which class of the population in Netherlands-India is mainly consuming opium, natives or Chinese?

2.—What is the average dose of opium taken for daily consumption?

The answers were:—

1.—Among the Chinese population opium consumers may be found in all parts of the Archipelago; but among the native population some races are entirely free from the fascinations of the drug, *e.g.*, the Sundanese in the western part of Java, the proper Malay inhabitants of Sumatra and of some surrounding islands, and the native tribes of Borneo and of North Celebes. Generally speaking, the Chinese, being more well-to-do, consume individually a greater quantity of opium than the natives. As, however, the latter are 66 times more numerous in the whole of the colony than the former, the greater portion of the total quantity of opium sold is consumed by natives.

2.—The price of Régie Opium in Java being very high the average individual consumption there is light and does not exceed one half *hun* (0.19 gramme or about 3 grains). In the other islands the retail prices of opium are much lower and the average quantity taken by natives for daily use may be put at four times as much as in Java, that is about 12 grains. As already mentioned, the average individual consumption is higher amongst the Chinese than amongst the natives; only in a few cases, however, is the quantity used more than 20 *hun* (7.72 grammes or about 119 grains).

MR. R. LAIDLAW, M.P., put the following question:—

What amount of revenue was derived from opium in Java during each of the last ten years, and what was the proportion of such to the total revenue?

The answer to this was:—

The figures for Netherlands-India during the last three years for which statistics are available are—

	1905.	1906.	1907.
<i>A</i> Opium Revenue ...	G.20,250,000	G.20,484,000	G.21,640,000
<i>B</i> Total Revenue...	G.128,152,000	G.137,188,000	G.151,588,000
Proportion <i>A</i> to <i>B</i> ...	15.8%	14.9%	14.3%

DR. TENNEY asked what proportion of the revenue derived from opium is disbursed in preventing smuggling.

The answer given was—

	1907.	G.
Cost of manufacture, etc.	3,000,000
Expenses connected with special measures...	...	137,000
General expenditure for Police, Customs, etc.	1,037,000
		<u>Total G. 4,210,000</u>

This is 19 per cent. of the total revenue (G. 21,640,000) derived from opium for the same year.

Seventh Session.

QUESTIONS RECEIVED AND ANSWERED BY THE NETHERLANDS-INDIA DELEGATION.

What part of the Opium revenue of the Dutch East Indies is consumed in the cost of administration and in the cost of the measures taken to prevent smuggling?

The Netherlands Delegation begs to state that—

- (a.) The gross profits of the Opium Monopoly in Netherlands-India in 1907 amounted to G.21,640,000;
- (b.) The cost of administration of the Monopoly and the preparing of opium in the same year were G.3,620,000;
- (c.) The cost of the measures taken to prevent smuggling in that year was G.488,000.
(b.) and (c.) being respectively 16.7 and 2.3% of (a.), and together G.4,108,000 or 19% of the total gross opium revenue.

Tenth Session.

According to the desire of the International Opium Commission expressed in its session of the 15th February 1909, the Netherlands Delegation begs to present the following telegraphic information relative to opium in the Netherlands:—

1.—The sale of opium, morphia and its derivatives is governed by the Pharmaceutic Law of June 1st 1865 (*State Gazette* No. 16). No copy is at hand, but probably it contains similar regulations on the subject as in Appendix I to the report on Netherlands-India.

2.—In the years 1905, 1906, and 1907 respectively 292, 278, and 410 hectares have been under poppy cultivation, chiefly for the winning of seeds, the crops of which amounted to 393,000, 348,000 and 706,000 kilogrammes. The poppy is not grown for the purpose of opium manufacturing.

3.—*Import* of opium, morphia and its derivatives (not specified) in kilogrammes:

	1905.	1906.	1907.
From Belgium	—	—	132
„ France	—	45	—
„ Germany	161	846	51
„ Great Britain	—	890	—
„ Turkey	10,046	5,544	17,363
TOTAL	<u>10,207</u>	<u>7,325</u>	<u>17,546</u>

4.—*Export* as under 3.

	1905.	1906.	1907.
To America... ..	6,662	—	4,383
„ Germany	—	1,360	5,038
„ Great Britain... ..	—	—	10

„ Sweden	273	176	—
TOTAL	<u>6,035</u>	<u>1,536</u>	<u>15,443</u>

Memorandum on Opium produced in Persia.

Owing to the unsettled state of politics at present existing in Persia and the frequent changes taking place in the Persian Ministry, the Government of that country has not been able to prepare a really comprehensive and detailed report on Persian Opium in time for presentation to this Commission. This Memorandum, therefore, must be somewhat brief in comparison with the exhaustive statements submitted by the representatives of other countries participating in the Commission, but a conscientious endeavour will, nevertheless, be made to ensure that it shall indicate the principal aspects of the question treated and furnish whatever statistics are available thereon.

PRODUCTION OF OPIUM.

Persia, it need scarcely be stated, is an opium-producing country. The Government does not attempt to monopolise the cultivation or sale of the drug in any way. The total production for the whole country is estimated to amount to about 200,000 monds in the year, or say, the equivalent of 10,000 piculs. Of this total 25 per cent. or 2,500 piculs are consumed in Persia partly for medicinal purposes and partly for indulgence in the smoking habit: smoking, however, it may be mentioned accounts for the bulk of Persia's domestic consumption. The balance or let us say 7,500 piculs is exported to foreign countries, in Europe and Africa but by far the greatest proportion goes to Hongkong and the Straits Settlements, as the following figures will show. Of the annual production Great Britain takes 20 per cent. or 2,000 piculs: other countries in Europe and Africa take 5 per cent. or 500 piculs, and the balance of the total annual output, after allowing as we have said 25 per cent. for domestic consumption goes to Hongkong and the Straits Settlements, which thus receive 50 per cent., the equivalent of 5,000 piculs, of all the opium produced every year throughout the length and breadth of the Persian Empire. It is important to point out to this Commission that there is no opium whatever imported directly into China from Persia, and that of the 5,000 piculs just mentioned, and which is exported directly from Persia to Singapore and Hongkong, by far the largest proportion is consigned and sent to Formosa, where it is consumed. The quantity thus re-exported every year from Hongkong to Formosa amounts to between 3,000 and 3,500 piculs or 35 per cent. of Persia's total annual production, while only 1,500 piculs, the equivalent of 15 per cent. of Persia's annual production is re-exported to China.

The following table is self-explanatory:—

Estimated total annual production of opium in Persia	
in 1907, monds 200,000	10,000 Piculs.
Accounted for as follows:	
Estimated annual export to Straits Settlements and	
Hongkong	5,000 Piculs.
Estimated annual export to Great Britain	2,000 "
Estimated annual export to Continent of Europe	
and Africa	500 "
Opium consumed in Persia	2,500 "

These figures, it must be remembered, are approximate only.

Opium-smoking is not prohibited in Persia but the habit is not by any means popular. In fact it is indulged in only by the poorest, lowest classes of the population and is may be added that the crimes which are traceable to the practice are insignificant in number and character.

QUALITY OF PERSIAN OPIUM.

The Persian Opium consumed in China is next in excellence of quality to Indian opium. It is somewhat oily, has a slight odour and is cheaper than the Indian drug. A general practice in this country is to mix Persian with Indian opium for the use of smokers.

PERSIA'S OPIUM REVENUE.

The Persian Government derives a yearly income of about 350,000 toomans or, say, £70,000, from the production of opium, and the total value of the quantity annually exported is about £600,000, sterling.

The following table will show the amount of Persian Opium imported in Hongkong between the years 1895 and 1900:—

Tenth Session.

QUESTIONS PUT BY THE AMERICAN DELEGATION TO THE PERSIAN DELEGATION.

1.—Will the Persian Delegate please state for the benefit of the Commission the method by which his Government obtains a yearly income of—say—£70,000 from the production of opium?

2.—Are there any laws of Persia that govern the import or export of opium?

ANSWERS TO ABOVE.

1.—The Government of Persia derives a provincial tax from the output of the poppy of 5 toomans per picul, or 50,000 toomans on the yearly production of 10,000 piculs mentioned in the Persian Report: to which must be added the Export Duty of 40 toomans per picul, or 300,000 toomans on 7,500 piculs yearly export, making in all a total of 350,000 toomans at Exc. 5 toomans per £ sterling, *i.e.*, £70,000.

2.—It has already been mentioned in the Persian Report that the Persian Government does not monopolize the cultivation or sale of the drug, and consequently there are no special laws in Persia that govern the Import or Export of opium.

QUESTION PUT BY THE JAPANESE DELEGATION IN REFERENCE TO THE
MEMORANDUM OF THE PERSIAN DELEGATION.

According to the Memorandum presented by the Honourable Delegate from Persia 4,000 piculs of Opium are annually exported from Persia to Singapore and Hongkong, and of this amount by far the largest proportion, ranging from 3,000 to 3,500 piculs a year is consigned and sent from the latter port to Formosa where it is consumed.

There is a wide divergence between this statement and the statistical returns of the Government of Formosa, according to which the amount of Persian opium imported into that island during the seven years 1901–07 was as follows:—

	<i>lbs.</i>	<i>Piculs.</i>
1901	197,409, or approximately	1,480
1902	139,146	1,043
1903	106,443	798
1904	105,045	788
1905	66,782	500
1906	58,568	431
1907	151,419	1,135

Will our esteemed colleague from Persia have the goodness to present for the information of this Commission statistical data upon which his statement is based?

Memorandum on the Opium Question presented to the International Opium Commission by the Portuguese Delegates.

The opium vice is neither known in Portugal, nor in her adjacent islands, nor in her African possessions, or in the State of India, but in the colony of Macao the vice is spread throughout the Chinese population established there. Therefore the Portuguese Commission, specially appointed to study the opium question in its different phases and ramifications, has limited its labour to the area of the colony of Macao in its study, and in its collection of points and facts which directly or indirectly affect the question.

Under these circumstances, therefore, the present memorandum aims chiefly on the interest of the colony of Macao more than that of other Portuguese colonies or possessions which, no doubt, will not be affected by any measures which may be taken to suppress the vice of opium smoking in China.

It is a well-known fact that the use of opium in China dates back to very ancient time, and from this remote period it was used as a therapeutic product.

The Dutch, who ruled the trade of Formosa from 1624 till 1662, brought over from Java the habit of smoking tobacco in which were mixed arsenic and opium, to combat malarial fever which was most dangerous in that island at that time as it still is this day. It is presumed that opium smoking was introduced some time during the 17th century in this way in China, having its origin in Formosa, from thence the habit passed on to Amoy and then spread throughout the Empire of China.

At that period no mention was made of foreign opium, which was naturally not yet known, and the opium used was the native drug which was not then an article of contraband, for it is stated in the book of Hopu (See Morse on Trade, page 328) that in the Tariff of 1687 and 1733, then prevailing, opium is mentioned as paying three silver taels per picul, each picul of opium being valued at fifty taels.

The first Imperial Decree prohibiting the use of opium was published in 1729 by the Emperor YUNG CHENG, son of the Emperor KANG HI who conquered the Island of Formosa.

It was naturally during the course of this conquest that the Chinese authorities came into contact with opium smokers and learnt the havoc worked by the evil, hence the prohibition.

At that time (1729), the quantity of opium imported from abroad did not exceed 200 chests which the Portuguese brought over from Goa.

It was in the 18th century that the importation of foreign opium began and in 1781 the "East India Company" obtained the monopoly of its trade.

Till the year 1820 Macao was the principal depot of opium and the total number of chests imported did not exceed 5,000 per annum. From this year, however, the storage of opium was removed on to vessels anchored at Lintin, an island a few miles from Macao. The drug was sold at Canton and buyers took delivery of it at Lintin. The opium trade was carried on with the full cognisance of the local officials, without which, the foreigners could not possibly enter into the trade nor carry it on in such a large scale.

In 1839, there came Viceroy Lio, who, on 18th March of the same year, issued a proclamation summoning the foreigners at Canton to hand over, under the penalty of death, all the opium stored in the depot and to bind themselves unconditionally never to import any more opium.

The aftermath of this proclamation is well known as it belongs to the History of the political and commercial relations between the Empire of China and the Foreign Powers.

It was in the year 1858 that the opium traffic became legalized, when the drug was included in the Tariff annexed to the Anglo-Chinese Treaty, being subject to a tax of Tls. 30 per picul.

In 1878, the industry of boiling opium started in Macao; but the preparation of opium was not superintended by a special Government Department, as it has been done later on.

The Portuguese Government, in 1887, negotiated a Treaty of Amity and Commerce with the Chinese Empire, and among other agreements, therein contained, that of Opium also figured. But the clause relating to it is not for the suppression of its vice, but calls for the co-operation of the Portuguese Government to prevent a contraband trade being carried on. After this Treaty was ratified and the Convention and Agreement appended to the Treaty being approved, the Portuguese Government resolved to create in Macao a Special Government Department called, "Superintendencia da fiscalisação da Importação e Exportação do opio cru." (Superintendency for the control of Importation and Exportation of Raw Opium), which had the control of the importation and re-exportation of raw opium and the exportation and consumption of all opium boiled in Macao. Through the existence of this special Government Department, not a single ball of raw opium could enter or leave Macao without previous knowledge of its officials, who are also cognisant of all the sales of boiled opium, whether for local consumption or exportation. In order to facilitate the control of boiled opium, the Government granted to a Chinese syndicate the sole right to prepare opium, to sell it as such in Macao, Taipa and Colowane, and to export it from Macao. The said syndicate, which maintain an establishment, the only and special one of its kind for the purpose of working the industry, have signed a contract with the Macao Government to pay the Government the sum of \$334,000 per annum for the right of the monopoly. This contract was signed on the 4th May 1903 for a period running from the 1st of September 1903 to 30th June 1913. Therefore, it requires four years and four months before this contract will terminate.

The opium trade carried on in Macao not only brings in a large part of the revenue of that colony, but also is instrumental in helping other branches of commerce and industry.

In order to give the Commission a rough idea of the extent and movement of the opium trade in Macao, appended to this memorandum are a few statistics of the trade during the year 1905 to 1908, both inclusive.

DATA.

1.—THE IMPORTATION OF CRUDE OPIUM ITS DERIVATIVES AND CHANDU.

(a.) The importation of opium in Portugal and her colonies, except Macao, is restricted to medical purposes.

(b.) The importation of raw opium in Macao during the last 4 years (from 1905 to 1908) was:—

<i>Year.</i>	<i>Chests.</i>	<i>Value.</i>
1905	4,375	\$4,898,670
1906	3,899	4,366,980
1907	3,464	3,878,560
1908	3,249	3,638,880

(c.) The re-exportation from Macao to the various ports of China of raw opium during the four years (from 1905 to 1908) was:—

<i>Year.</i>	<i>Balls.</i>	<i>Value.</i>
1905	59,288	\$1,886,614
1906	55,145	1,765,040
1907	47,735	1,527,200
1908	43,637	1,396,384

(d.) The importation of opium in Macao is made through Hongkong, and all the drug comes from British India. The importation of opium in Macao is duty free, but is subject to the control of a special Government department called, "Superintendencia da fiscalisação da Importação e Exportação de opio." (Superintendency for the control of Importation and Exportation of raw opium).

The importers of raw opium are the Chinese syndicate and the merchants licensed to sell raw opium.

The raw opium imported into Macao is partly destined for re-exportation and partly to be prepared for local consumption and exportation after its preparation.

The exportation of raw opium is exclusively made to Chinese ports and the exportation of prepared opium has been made to California and Australia, but the trade with the latter ceased in the year 1905.

The exportation of opium, prepared in Macao, by the syndicate into the Chinese Empire is not possible in consequence of the prepared drug being heavily taxed by the large contribution made by the syndicate to the Macao Government and it cannot therefore compete with the native prepared opium.

(e.) The cost of each chest of opium is \$1,150 laid down in Macao, each chest contains 40 balls, being at the rate of \$28.75 each ball. Each ball of raw opium, after being boiled, produces only twenty-one taels and six mace weight in pulp, ready for consumption by the smokers. Each tael weight of the pulp is sold for \$1.80. We have then :—

1 ball of raw opium costs	\$28.75
1 ball of raw opium reduced to pulp costs	\$38.88
Gross profit	\$10.13
Deducting expenses for preparing the raw opium according to condition 9 of the contract, which come to	\$2.00
Net profit of the syndicate on each ball	<u>\$8.13</u>

2.—THE INTERNAL CONSUMPTION OF CRUDE OPIUM, LICIT OF ILLICIT.

The consumption of raw opium in Macao is divided into :—

- (i.) Raw opium to be prepared for consumption in Macao and its dependencies.
- (ii.) Raw opium to be prepared for exportation.

(a.) The quantity and value of raw opium prepared for consumption in Macao and its dependencies during the last 4 years (from 1905 to 1908) were :

Year.	Balls.	Value.
1905	27,114	\$867,648
1906	26,363	843,616
1907	18,509	592,608
1908	22,455	718,560

(b.) The quantity and value of raw opium prepared for exportation during the last four years (from 1905 to 1908) were :—

Year.	Balls.	Value.
1905	88,290	\$2,825,280
1906	73,620	2,355,840
1907	72,740	2,327,680
1908	64,620	2,067,840

3.—THE INTERNAL MANUFACTURE, USE AND EXPORTATION OF CHANDU.

The sole right to prepare opium in Macao was granted to the present syndicate for a period of nine years and ten months—from 1st September 1903 to 30th June 1913. The termination of this contract will not take place until the lapse of four years and four months.

The amount which the syndicate pays the Government for the sole right to prepare opium, to sell it as such in Macao, etc., comes to \$334,000 per annum.

According to the Budget of Macao for the year 1908–09, the total revenue from all sources amounts to \$1,297,000, 38.8 per cent. of which comes from the opium monopoly.

(a.) Local Sale.

The sale of opium, prepared in Macao, is carried on as follows :—

- (i.) By 10 licensed shops, where no smoking is allowed.
- (ii.) By 34 licensed public houses where opium is smoked.
- (iii.) By 50 opium dens where workmen and the coolie class congregate to chat, pass their time, and smoke.

(b.) Local Consumption.

The price of prepared opium is \$1.80 per each tael weight and the daily average consumption of opium per smoker is about 2 mace, and the daily cost per smoker is \$0.36.

Taking 100,000 individuals as forming the Chinese population of Macao, Taipa and Colowane, the number of smokers does not come to 5 per cent. of the number of inhabitants, according to the calculation made by the Commission specially appointed in Macao to study all the matters concerning the opium question.

(c.) Exportation.

Regarding prepared opium for exportation, statistics prove that the quantity exported is three times more than the amount consumed in Macao and its dependencies.

As already mentioned, the exportation of prepared opium to foreign ports is now made exclusively to California.

The quantity and value of opium prepared in Macao and exported during the last 4 years (from 1905 to 1908) were:

TO TAI'PA AND COLOWANE.

<i>Year.</i>	<i>Tael weight.</i>	<i>Value.</i>
1905	6,310	\$12,320
1906	4,975	9,950
1907	5,350	10,700
1908	5,980	11,960

TO FOREIGN PORTS.

<i>Year.</i>	<i>Tael weight.</i>	<i>Value.</i>
1905	1,975,000	\$3,950,000
1906	1,656,500	3,393,000
1907	1,721,000	3,442,000
1908	1,790,500	3,581,000

4.—THE MANUFACTURE OF MORPHIA AND OTHER DERIVATIVES.

In Portugal and her colonies there are no establishments for the manufacture of morphia and other derivatives. These are only made up at the dispensaries and chemical laboratories for medical purposes.

5.—USE OF CRUDE OPIUM AND PREPARATIVES.

Raw opium is used only in Portugal and her colonies for medicinal purposes, while in Macao it is prepared for local consumption and exportation.

There is no cultivation of the poppy in Portugal and her colonies, and therefore there is no industry of the extract of opium from the poppy.

6.—THE LICIT AND ILLICIT USE OF MORPHIA AND OTHER DERIVATIVES.

In Portugal and her colonies, the use of morphia is limited to medicinal purposes.

7.—THE EXTENT OF POPPY CULTIVATION IN PORTUGAL AND HER COLONIES AND THE POSSIBILITIES OF ITS CULTIVATION.

There is no cultivation of the poppy in Portugal and her colonies, but the plant is found here and there, grown wild, both in Portugal and adjacent islands.

8.—THE LAWS REGARDING IMPORTATION AND THE MUNICIPAL LAWS GOVERNING THE USE OF OPIUM AND DERIVATIVES.

There are no special laws in Portugal and her colonies governing the commerce and use of opium and derivatives, except certain restrictions and by-laws imposed on pharmacists for the sale to the public of toxicological medicaments.

In Macao, however, the opium trade and the preparation of raw opium are subject to the terms of the Contract between the Government and the syndicate, and the stipulations contained in the Opium Convention annexed to the Treaty of Amity and Commerce between China and Portugal of the 1st December 1887.

APPENDIX A.

COPY OF OPIUM CONVENTION FOR THE SUPPRESSION OF CONTRABAND
OF OPIUM SIGNED BY PORTUGAL AND CHINA.

*(Convention appended to the Treaty of Amity and Commerce concluded between
Portugal and China on the 1st December 1887.)*

It having been stipulated in the Article IV of the Treaty of Amity and Commerce concluded between Portugal and China on the first day of the month of December 1887, that a Convention shall be arranged between the Two High Contracting Parties, in order to establish a basis of co-operation in collecting the revenue of opium exported from Macao to Chinese ports, the undersigned, THOMAZ DE SOUZA ROZA, Envoy Extraordinary and Minister Plenipotentiary of His Most Faithful Majesty the King of Portugal and the Algarves, in Special Mission to the Court of Peking, and His Highness the Prince CH'ING, President of the Tsungli Yamên, and SUN, Minister of the Tsungli Yamên, and Senior Vice-President of Board of Public Works, Ministers plenipotentiaries of His Imperial Majesty the Emperor of China, have agreed on the following Convention in Three Articles :

ARTICLE I.

Portugal will enact a law subjecting the opium trade of Macao to the following provisions :—

- 1.—No opium shall be imported into Macao in quantities less than one chest.
- 2.—All opium imported into Macao must, forthwith on arrival be reported to the Competent Department under a public functionary appointed by the Portuguese Government to superintend the importation and exportation of opium in Macao.
- 3.—No opium imported into Macao shall be transhipped, landed, stored, removed from one store to another, or exported, without a permit issued by the Superintendent.
- 4.—The importers and exporters of opium in Macao must keep a register, according to the form furnished by the Government, showing with exactness and clearness the quantity of opium they have imported, the number of chests they have sold, to whom and to what place they were disposed of, and the quantity in stock.
- 5.—Only the Macao opium farmer, and persons licensed to sell opium at retail, will be permitted to keep in their custody raw opium in quantities less than one chest.
- 6.—Regulations framed to enforce in Macao the execution of this law will be equivalent to those adopted in Hongkong for similar purpose.

ARTICLE II.

Permits for the exportation of opium from Macao into Chinese ports, after being issued, shall be communicated by the Superintendent of opium to the Commissioner of Customs at Kung Pac Uan.

ARTICLE III.

By mutual consent of both the High Contracting Parties, the stipulations of this Convention may be altered any time.

In faith whereof, the respective Plenipotentiaries have signed and sealed this Convention.

Done in Peking, this first day of December in the year of our LORD JESUS CHRIST one thousand eight hundred and eighty-seven, corresponding with the Chinese date the seventeenth day of tenth moon of thirteen year of KUANG HSÜ.

(signed) THOMAZ DE SOUZA ROZA.

Signatures of the Chinese Plenipotentiaries:

Prince CH'ING.

SUN IU UEN.

APPENDIX B.

AGREEMENT.

Appended to the Treaty of Amity and Commerce concluded between Portugal and China on the 1st December 1887.

The basis of the co-operation to be given to China by Portugal in the collection of duties on opium conveyed from Macao to Chinese ports, having been fixed by a Convention appended to the Treaty of Amity and Commerce concluded between China and Portugal on the 1st December 1887, and it being now convenient to come to an understanding upon some points relating to the said co-operation as well as to fix rules for the treatment of Chinese junks trading with Macao, BERNARDO PINHEIRO CORREA DE MELLO, Secretary of the Special Mission of His Most Faithful Majesty in Peking, duly authorized by His Excellency THOMAZ DE SOUZA ROZA, Chief of the said Mission, and SIR ROBERT HART, K.C.M.G., Inspector-General of the Chinese Imperial Maritime Customs, provided with the necessary instructions from the Chinese Government, have agreed on the following:—

1.—An office under a Commissioner, appointed by the Foreign Inspectorate of the Chinese Imperial Maritime Customs, shall be established at a convenient spot on Chinese territory, for the sale of opium duty certificate, to be freely sold to Macao merchants, and for such quantities of opium as they may require. The said Commissioners will also administer the Customs' stations near Macao.

2.—Opium accompanied by such certificates, at the rate of not more than one hundred and ten taels per picul shall be free from all other imposts of every sort, and have all the benefits stipulated for by the additional article of the Chefoo Convention between China and Great Britain, on behalf of opium on which duty has been paid at one of the ports of China, and may be made up in sealed parcels at the option of the purchaser.

3.—The Commissioner of Customs, responsible for the management of the Customs' stations, shall investigate and settle any complaint made by Chinese merchants of Macao against the Customs' stations or revenue cruisers.

The Governor of Macao, if he deems it advisable, shall be entitled to send an officer of Macao to be present and assist in the investigation and decision. If, however, they do not agree, a reference may be made to the Authorities at Peking for a joint decision.

4.—Junks trading between Chinese ports and Macao, and their cargoes, shall not be subject to any dues or duties in excess of those leviable on junks and their cargoes, trading between Chinese ports and Hongkong, and no dues whatsoever shall be demanded from junks proceeding to Macao from ports in China, or coming from Macao to ports in China, over and above the dues paid, or payable, at the ports of clearance or destination. Chinese produce which has paid Customs duties and likin tax, before entering Macao, may be re-exported from Macao to Chinese ports without paying Customs' duties and likin tax again, and will only be subject to the payment of the tax named "Siao-hao."

In witness whereof, this agreement has been written in Portuguese and English and signed in duplicate at Peking this the first day of December, 1887.

(signed) BERNARDO PINHEIRO CORREA DE MELLO,
Secretary of the Special Mission of H. M. F. M.

(signed) SIR ROBERT HART,
Inspector General of Chinese I. M. C.

APPENDIX C.

COPY OF CONTRACT MADE BETWEEN THE MACAO GOVERNMENT AND THE CHINESE SYNDICATE FOR THE SOLE RIGHT TO PREPARE OPIUM, TO SELL IT AS SUCH IN MACAO, TAIPA AND COLOWANE AND TO EXPORT SAME FROM MACAO.

(*Published in the Boletim Official do Governo da Provincia de Macau, No. 20 dated Macao, 16th of May 1903.*)

For the information of the public, we publish below the terms of the contract "For the sole right to prepare opium, to sell it as such in Macao, Taipa and Colowane and to export same from Macao," granted at the price of \$334,000 annually, for a period running from the 1st September 1903 to the 30th June 1913, to the Chinamen CHAN AO HIN, LI FONG CHI, LI CHING VENG, SI COC SAN and CHAN I CONG, who are together to be considered as the responsible concessionaries.

TERMS.

1.—The period of this concession is of nine years and ten months from the 1st of September 1903 to the 30th June 1913.

2.—The price at which the said concession is granted is (\$334,000) three hundred and thirty-four thousand dollars annually, to be paid in advance by monthly instalments at an exchange of seven mace and two candareens per dollar; the due date of each instalment to be the last day of the month preceding that in which the instalment falls due.

3.—The syndicate are allowed three days grace for the payment of the instalments referred to in the preceding clause.

On the expiration of the days of grace, should the payment not be forthcoming, the syndicate are liable to a fine according to the number of days the payment is delayed at the rate of two per cent. per month on the amount due; the Inspector of Revenue may propose the rescision of the contract to the Governor of Macao and the latter may annul same if payment is not made within the month following the due date of the instalment.

4.—The present sole right to boil opium and to sell boiled opium is confined to the city of Macao from "Portas do Cerco" to "Barra," and to the villages of Taipa and Colowane.

5.—All those who are not duly authorized by the syndicate are prohibited from boiling opium or selling boiled opium in Macao, Taipa and Colowane, and the offenders shall be under penalty of a fine of \$50 in addition to which all the opium found in their possession shall be confiscated; the fine and the opium shall be divided into equal parts between the syndicate and the State Revenue.

A like penalty shall be imposed on the owners of vessels coming from whatever point to the ports of Macao, Taipa and Colowane carrying the said articles for sale.

6.—The importation to Macao, Taipa and Colowane of boiled opium without authority from the syndicate is prohibited.

The violation of this condition renders the offenders liable to the same penalty as laid down in clause 5.

7.—The syndicate are bound to keep open in Macao, Taipa, and Colowane a number of houses or opium shops sufficient to supply the wants of consumers; these to be on account of the syndicate themselves or of such persons as are authorized by them to open same, under penalty of a fine from \$50 to \$500 for any infringement of this clause.

8.—The opium intended for consumption shall always be of the best quality, any default of this condition renders the syndicate liable to a fine of \$100 which reverts to the benefit of the State Revenue.

9.—The syndicate shall not charge in Macao more than \$2.00 for each ball of opium, Patna or Benares, or for each bundle containing three catties of Malwa, which they are requested to boil. An exception is made for opium which is to be boiled for export and for which \$1.00 only for each ball shall be charged.

10.—At Taipa and Colowane the syndicate shall not charge more than \$0.75 to boil every ball of opium or every bundle of three catties of Malwa.

11.—In the event of the syndicate demanding prices above those agreed to in the foregoing clause they shall have to pay into the State Revenue a fine of from \$100 to \$500, in addition to which they are bound to repay to the injured party double the amount illegally collected.

12.—The exportation of opium to Taipa and Colowane is strictly prohibited.

If the exportation is done by the syndicate, they shall have to pay into the State Revenue a fine of from \$100 to \$500 and suffer the loss of all the opium that may be found.

If the exportation is done by any other person, he will, besides the confiscation of all the opium, suffer a fine of from \$50 to \$500, one half of which and of the opium confiscated shall go to the State Revenue, and the other half to the syndicate.

13.—The syndicate are prohibited from exacting from consumers of boiled opium anything beyond a reasonable price according to circumstances and to the market value of this article in Macao and also from in any way oppressing or annoying consumers.

The infringement of this clause will be punishable by a fine of \$100 to \$500 which will revert to the benefit of the State Revenue.

14.—The syndicate shall be bound over to prevent whatever fraud or adulteration being practised in the boiling of opium.

The infringement of this clause is subject to the same penalty as laid down in the foregoing clause.

15.—This Contract may be transferred to another party by the actual syndicate when duly authorized to this effect by the Macao Government, on the same terms and under the same guarantee as laid down in this Contract.

16.—The syndicate shall send daily a written statement to the Opium Superintendent of the quantity boiled for local consumption in Macao and of the quantity boiled for export, separate registers are to be kept for both purposes.

17.—The syndicate shall boil for local consumption only such quantity of opium as will suffice for consumption at Macao, Taipa and Colowane.

18.—When the syndicate export boiled opium to any non-Chinese ports, they are bound to supply such information to the Opium Superintendent, declaring the quantity intended for export, the date of shipment and the name of the vessel the drug is going by.

19.—When the syndicate desire to export boiled opium to Chinese ports they must obtain from the Opium Superintendent an export permit in the same way as is done for the export of raw opium to the same ports.

20.—When the syndicate sell boiled opium for export, they shall have to inform the opium Superintendent of their intention and declare the quantity of the drug sold, the name of the purchaser and the name of the vessel in which the opium is to be shipped, this communication shall have to be made before the drug is delivered to the purchaser.

21.—The syndicate shall furnish every purchaser of boiled opium with a certificate of sale, declaring that the same is made for export. Without this certificate, no exportation of boiled opium will be allowed unless the exporters be the syndicate themselves.

22.—The infringement of Clauses 16, 17, 18, 19 and 20 is punishable by a fine of from \$100 to \$500 to be inflicted on the syndicate; the said fine reverts to the benefit of the State Revenue. The infringement of Clause 21 will be subject to a fine of from \$50 to \$500, and the loss of the opium seized, one half of the fine and of the proceeds of the opium to go to the State Revenue and the other half to the syndicate.

23.—The concessionaries are responsible for the strict and faithful carrying out of this contract and shall answer with their persons and belongings for any difference, in case of rescision, between the price paid for the concession and that of the one to be obtained, as well as for all loss and damage caused by them, the concessionaries besides being liable to any penalty imposed by law.

24.—The syndicate are bound to carry on either themselves, or by other persons in Macao, the industry of preparing opium; the failure of this compact shall render the syndicate not only liable to the penalty laid down in this Contract, but also the reversion to the State Revenue of the building wherein is set up the manufactory, without any right of their claiming any indemnity on any account.

25.—All disputes which may arise regarding the meaning of the clauses in the present Contract shall be settled by the Inspector of the Bureau of Revenue, and those bearing on any other matters must be submitted to the competent Courts.

26.—It is prohibited to establish special houses for opium smoking in Macao, Taipa and Colowane without permission from the syndicate under penalty of confiscation of all opium and personal effects found in them, besides a fine of Reis \$20, one-half the value of the articles and of the opium seized reverts to the State Revenue and the other half to the syndicate.

27.—The Government guarantees the Concessionaries all the advantages to which they are entitled under the present Contract, giving them all possible aid and protection against frauds which may be perpetrated to their prejudice.

Bureau of Revenue of the Province of Macao, 4th May 1903.

(signed) JERONYMO FONTOURA DE CARVALHO,

Inspector of Revenue.

Statement by the Siamese Delegates to the International Opium Commission.

THE IMPORT OF CRUDE OPIUM, ITS DERIVATIVES AND CHANDU.

Opium is now and for a long time has been a Government monopoly formerly administered through an Opium Farm, but since January 1907 it is controlled directly by the Government Opium Régie.

By the treaty between Siam and the United States of America signed in 1833 very broad rights of importation into, and trade within, Siam were granted to American citizens, but particular—exception was made of opium, the words being “neither is permission granted to import opium, which is contraband!” but by the treaties with Foreign Powers signed in 1855 and after, opium may be imported by their subjects under the condition that it should be sold to the Opium Farm or re-exported.

Under these circumstances, practically no opium is imported into Siam except the supplies for the Government Factory.

The Siamese Government claims, under the treaties, the right to exercise the same amount of control over morphia as over opium itself. In view, however, of the legitimate uses to which morphia may be put in the practice of medicine, the Royal Government has permitted the importation of reasonable amount by reputable chemists under certain safeguards, but its importation by other persons is not permitted.

Siam is not an opium-producing country, and whatever opium is consumed in Siam is imported from abroad.

In the Appendix is found the table of customs return showing the quantity of opium imported into Siam for the last decade (Annexe No 1.)

The import of Chandu is prohibited except for medicinal purposes, it is also not allowed to import pills or other drugs that purport to cure the opium habit, when those so-called medicines contain opium or other derivatives.

INTERNAL MANUFACTURE AND USE OF CHANDU.

Opium is prepared by the Government Factory in Bangkok for smoking purposes: there are two grades of opium, the first grade is made from Indian opium whereas the inferior quality is more diluted and composed of Indian and Chinese opium.

USE OF MORPHINE AND OTHER DERIVATIVES, LICIT AND ILLICIT.

The licit use of morphine and other derivatives is confined to medicinal purposes.

The illicit use of morphine in the form of hypodermic injection is rarely met with and the habit is not spreading.

EXTENT OF POPPY CULTIVATION.

As stated above Siam does not produce opium because it does not cultivate the poppy.

LEGISLATION ON OPIUM AND ITS DERIVATIVES.

The Laws, Decrees, and Regulations on the importation, sale and use of opium and its derivatives are found translated in the Appendix: it is deemed not necessary to reproduce certain Regulations, which have been abrogated or which present little interest. (Annexes No. 2, 3, 4, 5, 6, 7).

In conclusion the attitude of the Royal Siamese Government regarding the opium question as it affects Siam is clearly defined in His Majesty the King's speech of the 21st September 1908 (Annexe No. 8). From its perusal it will be seen that it is the aim of the Government to ultimately suppress the use of opium but to attain the desired end the line of policy to be followed must be carefully considered and very thorough investigation made into the matter, before venturing on experiments that might prove disastrous to the revenue of the State without making any progress towards the suppression of the vice.

For as shown elsewhere, the opium consumed in Siam is wholly imported and controlled by the Government where by its sale can be kept within reasonable limits, if however, any sudden and spasmodic attempt at suppression of the traffic were to be made, it would only result in a vast increase of smuggling! Consequently His Majesty's Government has decided to suppress the trade by gradual steps: it has begun already by making the monopoly as complete and effective as possible in taking over the Farms under the old system (January 1907). It has also placed in some districts salaried officials to supervise the sale of opium and it is hoped that in the near future this system will be generalized. It is worth while mentioning that the number of opium shops in Bangkok since 1907 has been reduced from 900 to 700 and it is the intention of the Government to issue a Decree limiting the maximum number of opium shops to that existing on the 16th November 1908. When the new system is in force, it is expected that the number of opium shops in Bangkok will be reduced to 200.

The final step will be, in the mind of His Majesty's Government, the registration of habitual smokers and the prevention of new ones as well as the establishment of hospitals for curing these habitual smokers; naturally this step will be taken only when the Royal Government has satisfied itself of the best method of procedure. Much also depends on the information given to the International Commission by representatives of such countries that have a fuller knowledge and wider experience of the subject.

The revenue derived from opium compared with the total revenue of the kingdom is shown in Annexe No. 9 (1902-08).

Annexe No. 1.

APPENDIX.

RETURN SHOWING OPIUM IMPORTED INTO BANGKOK, 10 YEARS 1898-1907.

Year	Quantities in Chest	Value in Ticals
1898	1,520	1,729,957
1899	1,304	1,675,497
1900	1,567	2,377,240
1901	1,472	2,163,277
1902	1,445	2,091,578
1903	1,539	2,590,928
1904	2,389	4,612,366
1905	1,506	2,574,890
1906	641	1,022,738
1907	1,385	1,901,004

As explained in the beginning of the statement the various Opium Farms have been taken over by the Royal Government from January 1907 therefore the reference made in the Laws and Decrees to the Opium Farms now applies to the Opium Régie.

The Government Opium Administration has, however, in contemplation the issue of new Rules and Regulations more in consonance with modern requirements.

Annexe No. 2.

(Translation.)

LAW RELATING TO THE OPIUM MONOPOLY, *Year 1233 (21st March 1871).*

CHAO PHYA SRI SURYAWONGSE, Administrator of the Kingdom, has humbly reported to His Most Gracious Majesty the King that the Opium Monopoly which has been established for many years has yielded much profit to the Metropolis of the Kingdom, but during the past two years the influx of contraband opium has been so considerable that the sales of the drug by the Opium Farm have been greatly diminished and the Farmer, who has suffered loss thereby, has applied to be relieved of the Farm; and no one has been found willing to farm the monopoly in his place. Under the circumstances, it has been decided, after consultation with the Principal Minister and Ministers of State, that the Monopoly should be operated by officers of the government from the 1st day of the year 1233 (21st March 1871); and it is humbly prayed that Royal Sanction may be granted for the enactment of an Opium Monopoly Law, to contain regulations concerning Siamese and Chinese traders in Bangkok, persons under foreign Consular jurisdiction, traders entering Siam by land by way of the North and those coming by sea into southern and west coast provinces, in order to enable the Government authorities and Opium Farmers to deal with and decide all cases of offence in connection with contraband opium.

His Most Gracious Majesty the King has taken note of the matter, and has been pleased to command that an Opium Monopoly Law, as agreed upon by the Ministers of State in council, be enacted as follows:—

OPIUM MONOPOLY LAW: REGULATIONS AFFECTING SIAMESE AND
CHINESE TRADERS IN BANGKOK (6 SECTIONS).

1.—When the outgoing Farmer, on the date of his retirement from the Farm, shall have delivered over his stock of opium to the Government officers charged with the execution of this law, every person being in possession of opium must submit, within 15 days, a true statement of the quantity, whether belonging to himself or entrusted to him by others. If the authorities desire to examine the opium, they may do so between the hours of 7 a.m. and 5 p.m. and the owner of opium must allow the examination to be made. If the authorities examine and find the quantity of opium greater than that mentioned in the statement submitted by the owner, they shall confiscate the excess quantity and shall inflict upon that person a fine not exceeding 400 Ticals.

If any person fails to submit a statement of opium in his possession within 15 days and conceals the opium, the authorities shall, on detection, confiscate such opium and inflict upon such person a fine not exceeding 1,000 Ticals.

2.—Whenever any person licensed by the authorities to sell opium makes a sale of opium to any one he must furnish the purchaser with a certificate of the sale. Whenever the authorities desire to examine his stock of opium, he must allow them to do so. If he refuses, the authorities shall inflict upon him a fine not exceeding 1,000 Ticals. If the authorities discover that any quantity of opium reported by a licensed seller of opium as having been sold by him is less than the quantity which he had actually sold, they shall punish him with a fine not exceeding 50 Ticals.

3.—When any person imports opium by way of the mouth of the Chao Phya River, or has opium on board ship for the use of the crew, he shall, on arrival at the guard station in Paknam, report to the Governor and officials of Paknam the quantity and the brand of such opium and the names of the owners and of the ship. After receiving these particulars, the Governor and the officials of Paknam will cause the opium to be sent for and taken charge of till the officials in Bangkok shall have bought it at any price that may be agreed upon. In the event of the opium not being purchased by the officials at Bangkok, it may be re-exported after a pass for the vessel has been obtained from the authorities. If after the receipt of the pass anything happens to prevent the vessel from sailing, the opium must be given into the custody of the officials at Paknam. Failure to give the opium into the charge of the officials, or to be provided with a pass for the vessel, shall subject the offender to a fine not exceeding 800 Ticals, and the opium shall also be confiscated.

4.—If any person disobeys this law and continues to secretly trade in contraband opium, the authorities will send forth three detectives to buy illicit opium from him. If each of them was able to purchase no less than one Tael's weight of opium, the authorities shall send all three of them to be interrogated by the judges who, after having had the facts sworn to by the said detectives, shall then have the seller of the opium arrested, tried, and punished with a fine not exceeding 2,000 Ticals, according to the law concerning the monopoly on opium.

5.—If any informer offers to procure the arrest of any person secretly buying or selling contraband opium in a Prince's palace, or in a house, boat, floating-house, pack caravan, sleigh or cart, in any locality, the officials shall communicate with the Chiefs of the Right and Left Divisions of the Police and apply for Nai-Amphurs and Kamnans to control the carrying out of the arrest. When arrested, the offender shall be fined in accordance with the Opium Monopoly Law an amount not exceeding 5,000 Ticals, and the opium shall also be confiscated.

6.—If an informer and a party of officials, Kamnan or Nai-Amphur, conducted by him, effect the seizure of any raw or prepared opium, and the owner thereof should protest that the opium was introduced into his premises for the purpose of seizure by the informer and the party of officials themselves, the Judges shall inquire into the case and procure the evidence of persons living in the locality. If such evidence, given on oath, shows that the person arrested is a seller or purchaser or smoker of opium, he shall be fined an amount not exceeding 1,000 Ticals, and the opium shall be confiscated. But if the evidence shows that the person arrested is a man of good character and does not sell, buy or smoke opium, then let the informer be fined an amount not exceeding 1,000 Ticals, which shall be paid to the person arrested.

LAW RELATING TO THE MONOPOLY ON OPIUM: PROVISIONS CONCERNING PERSONS
UNDER THE JURISDICTION OF THE FOREIGN CONSULS (12 SECTIONS).

1.—Any person desiring to import cake opium (*i.e.*, raw) or prepared opium into Siam should do so by way of the mouth of the Chao Phya River, and should present a detailed statement of the same to the officials of the guard station (*i.e.*, Customs) and apply for a pass for the vessel having the opium on board, before she can enter. If any person imports opium in contravention of this law, he shall be fined an amount not exceeding 800 Ticals, and the opium shall be confiscated. If it is found, upon investigation, that the vessel, big or small, which carried that opium was herself really at fault, she may, in the utmost, be confiscated. If opium be imported by other ways than by the mouth of the Chao Phya River, the offence, when detected, will be punished with a fine not exceeding 800 Ticals, and the opium shall be confiscated; and if it be found, upon investigation, that the vessel, big or small, which carried that opium was herself really at fault, she may, in the utmost, be confiscated.

2.—If any person enters into partnership with persons who bring raw or prepared opium in vessels into Siam, and with sellers of contraband opium, he shall, on conviction, be punished in proportion to the quantity of opium seized, with a fine not exceeding 2,000 Ticals for the first offence, and 10,000 Ticals for a subsequent offence.

3.—If opium is imported in accordance with Par. 1, and the owner presents a statement of the quantity to the Governor of Paknam, or reports to the Custom House at Bangkok, and it is afterwards found on examination that the opium is deficient in quantity according to the statement, or that some of the opium declared is missing, the owner of the opium and the person presenting the statement shall be fined an amount not exceeding 1,000 Ticals a chest (of opium) on the total number in the statement.

4.—If any person imports opium by way of the mouth of the Chao Phya River, or has opium on board for the use of the crew, he shall, on arriving at the (Customs) Station at Paknam, report to the Governor and officials of Paknam its quantity, the marks it bears, the owner's name, and the name of the vessel. After recording these particulars, the Governor and officials of Paknam will cause the opium to be sent for and taken charge of till the officials in Bangkok shall have bought it at any price that may be agreed upon. In the event of the opium not being purchased by the officials at Bangkok, it may be re-exported after a pass for the vessel has been obtained from the authorities. If after the receipt of the pass anything happens to prevent the vessel from sailing, the opium must be given into the custody

of the officials at Paknam. Failure to give the opium into the charge of the officials, or to be provided with a pass for the vessel, shall be punished by a fine not exceeding 800 Ticals, and the opium shall be confiscated.

5.—Any person importing opium and failing to report to the officials within half an hour after anchoring in front of the (Customs) Station at Paknam, shall, if the officials on examination discover opium in the vessel, be fined an amount not exceeding 500 Ticals, and the opium shall be confiscated.

6.—Any person intending to export opium who has obtained for that purpose a permit from the authorities, and not exporting it, must at once return the opium to the authorities. Any infraction of this rule will be punished by a fine not exceeding 8,000 Ticals, and the confiscation of the opium. If the authorities or the Commanders of men-of-war, or the Customs officials at Paknam, should ascertain that a vessel is exporting a larger quantity of opium than that stated in the permit, the authorities or Customs officials shall be permitted to go on board and search, or if the vessel should be outside the mouth of the River, the Commander or officers of a man-of-war may board her and make an examination. If the opium is found to exceed the quantity stated in the permit, the excess shall be confiscated and a fine inflicted of an amount not exceeding 400 Ticals. The offender shall be handed over to the authorities for trial, and if necessary, the vessel shall be detained until the case is settled.

7.—If any person makes raw or prepared opium and buys raw or prepared opium from any person not provided with a license from the authorities, the buyer and the seller of the opium shall be punished with a fine not exceeding 2,000 Ticals, and the opium shall be confiscated.

8.—A person licensed to sell opium must, when selling, furnish the purchaser with a certificate of the sale. The authorities shall be allowed to examine the opium of a person licensed to sell opium, whenever they may desire to do so. In case of refusal to permit the examination, the authorities shall punish such person with a fine not exceeding 1,000 Ticals. If any person licensed to sell opium makes an under-statement of the quantity of the opium actually sold by him, he shall, if discovered, be punished by the authorities with a fine not exceeding 50 Ticals.

9.—If it is known that opium has been smuggled into Siam, or that any opium is missing under suspiciously fraudulent circumstances, the offence, if discovered, will be punished with a fine not exceeding 1,000 Ticals. Any person concerned who is examined with regard to the sale or purchase of contraband opium must give truthful evidence. If his statement is discovered to be false, he shall be punished with a fine not exceeding 2,000 Ticals.

10.—When the outgoing Opium Farmer, on the date of his retirement from the Farm, shall have delivered over his stock of opium to the Government officials charged with the execution of this law, every person being in possession of opium must submit, within 15 days, a true statement of the quantity, whether belonging to himself or entrusted to him by others. If the authorities desire to examine the opium, they may do so between the hours of 7 A.M. and 5 P.M. and the owner of the opium must allow the examination to be made. If the authorities examine and find the quantity of opium to be greater than that mentioned in the statement submitted by the owner, they shall confiscate the excess quantity and shall inflict upon that person a fine not exceeding 400 Ticals. If any person fails to submit a statement of opium in his possession within 15 days and conceals the opium, the authorities shall, on detection, confiscate the opium and inflict upon such person a fine not exceeding 1,000 Ticals.

11.—Any one being fined, and having no money to pay, shall be punished in proportion to the amount of the fine. If the fine is 50 Ticals, he shall suffer one month's imprisonment; if from 400 up to 1,000 Ticals, six month's imprisonment; if from 1,400 up to 2,000 Ticals, one year's imprisonment; if from 2,000 Ticals upwards, two years' imprisonment. In the case of a foreign subject, after the infliction of the fine, the Consul will be requested to expel him from the country.

12.—*This Law has been printed and impressed with the Great Seal of the State on Tuesday the 1st day of the 5th moon in the year Mamee, 2nd of the Decade; corresponding to the 21st day of March, 1871 of the Christian Calendar; and it shall come into force from the said date, both in the Metropolis and throughout the Dominions of the Kingdom of Siam.*

THE LAW RELATING TO THE MONOPOLY ON OPIUM: PROVISIONS CONCERNING
TRADERS IN THE NORTHERN AND EASTERN PROVINCES (5 SECTIONS.)

1.—Traders importing raw or prepared opium by land shall, on arriving at the frontier stations of any province, present a full statement thereof to the station officers; the chief of the station shall then escort the opium to the Opium Farmer of the district. The traders shall sell the opium to the Farmer at any price that may be agreed upon; and if the Farmer does not buy it, the opium shall be re-exported outside the frontier free of charge, but a pass from the Opium Farmer must first be obtained. If after a pass is obtained anything should happen to prevent the holder thereof leaving, the opium shall be given into the custody of the Farmer. Failure to report to the frontier officers when importing, or to give the opium into the charge of the Farmer, or to be provided with a pass, shall be punished by a fine not exceeding 800 Ticals, and the opium shall be confiscated.

2.—If any person enters into partnership with persons who bring raw or prepared opium into Siam by land, and with sellers of contraband opium, he shall, on detection by the Opium Farmer, be punished, in proportion to the quantity of opium seized, with a fine not exceeding 2,000 Ticals for the first offence, and not exceeding 10,000 Ticals for a subsequent offence; and the opium shall be confiscated.

3.—If any trader who brings in raw or prepared opium surreptitiously buys and sells the same in the country, and is arrested by the Opium Farmer, he shall, if subject to the jurisdiction of a foreign Consul, be delivered up, together with the opium seized, to the provincial authorities, to be sent down to Bangkok. If he be the subject of a foreign State not having Treaty relations with Siam, he shall be punished according to this law, with a fine not exceeding 2,000 Ticals, and the opium shall be confiscated.

4.—If an informer offers to procure the arrest of any person surreptitiously buying or selling contraband opium in any house, boat, floating-house, porter or pack caravan, sleigh or cart, in any locality, the Opium Farmer shall report the matter to the Governor and officials of the province and apply for a high official and a Kamnan to accompany and cannot the search party in every instance. When arrested, the offender shall be punished according to this law, with a fine not exceeding 2,000 Ticals; and the opium shall be confiscated.

5.—If an informer and the party of the Opium Farmer and provincial officials conducted by him effect the seizure of any raw or prepared opium, and the owner thereof should protest that the opium was introduced into his place for the purpose of the seizure by the informer and the Opium Farmer's people themselves, the Governor and officials of the province shall inquire into the case and procure the evidence of persons living in the locality. If such evidence, given on oath, shows that the person arrested is a seller, or purchaser or smoker of opium, he shall be fined an amount not exceeding 1,000 Ticals, and the opium shall be confiscated. But if the evidence shows that the person arrested is a person of good character and does not sell, buy or smoke opium, then let the informer be fined an amount not exceeding 1,000 Ticals, which shall be paid to the person arrested.

THE LAW RELATING TO THE MONOPOLY ON OPIUM: PROVISIONS CONCERNING
TRADERS IN THE SOUTHERN AND WEST COAST PROVINCES (5 SECTIONS.)

1.—The southern and west coast provinces have rivers which open on the sea. When any vessel belonging to traders of this country or to those under the jurisdiction of foreign Consuls is importing raw or prepared opium, on the vessel's arrival at the Duty Station, a report stating the total quantity of opium must be made to the chief of the station, who shall then accompany the vessel and deliver it to the Opium Farmer. The opium should be sold by the traders to the Farmer, at any price that may be agreed upon. If the Farmer does not buy it, it shall be re-exported free of charge; but a pass for the vessel must be first obtained from the Farmer before the vessel can leave. If, after having obtained the pass, anything happens to prevent the vessel leaving, the opium shall be given into the custody of the Farmer until she leaves. Failure to report to the Duty Station on arrival, or to deliver the opium into the charge of the Farmer, or to be provided with a pass for the vessel, shall be punished by a fine not exceeding 800 Ticals, and the opium shall be confiscated.

2.—If any person enter into partnership with persons who bring raw or prepared opium into Siam by boat, and with sellers of contraband opium, he shall, on detection by the Opium

Farmer, be punished, in proportion to the quantity of opium seized, with a fine not exceeding 2,000 Ticals for the first offence, and not exceeding 10,000 Ticals for a subsequent offence; and the opium shall be confiscated.

3.—If any trader who brings in raw or prepared opium surreptitiously buys and sells the same in the country, and is arrested by the Opium Farmer, he shall, if subject to the jurisdiction of a foreign Consul, be delivered up, together with the opium seized, to the provincial authorities, to be sent up to Bangkok. If he be the subject of a foreign State not having treaty relations with Siam, he shall be punished, according to this law, with a fine not exceeding 2,000 Ticals, and the opium shall be confiscated.

4.—If an informer offers to procure the arrest of any person surreptitiously buying or selling contraband opium in any house, boat, or floating-house, in any locality, the Opium Farmer shall report the matter to the Governor and officials of the Province and apply for a high official and a Kamnan to accompany and control the carrying out of the arrest. When arrested, the offender shall be punished, according to this law, with a fine of from 2,000 Ticals; and the opium shall be confiscated.

5.—If an informer and the party consisting of the Opium Farmer and the Provincial officials, conducted by him, effect the seizure of any raw or prepared opium, and the owner thereof should protest that the opium was introduced into his place for the purpose of the seizure by the informer and the Opium Farmer's people themselves, the Governor and officials of the province shall investigate the case and procure the evidence of persons living in the locality. If such evidence, given on oath, shows that the person arrested is a seller, purchaser, or smoker of opium, he shall be fined in accordance with this law, an amount not exceeding 1,000 Ticals, and the opium shall be confiscated. But if the evidence shows that the person arrested is of good character and does not sell, buy or smoke opium, then let the informer be fined an amount not exceeding 1,000 Ticals, which shall be paid to the person arrested.

Persons fined for dealing in contraband opium, whether in Bangkok or in southern, northern, eastern, or western provinces, and not having money to pay the fine, shall all be punished alike, namely: if the fine be 50 Ticals, the offender shall undergo one month's imprisonment; if between 400 and 1,000 Ticals six months' imprisonment; if between 1,000 and 2,000 Ticals, one year's imprisonment; if from 2,000 Ticals upwards, two years' imprisonment.

This law relating to the Opium Monopoly which concerns the palaces of princes, the residence of titled officials, the houses, sheds, shops, boats, floating-house, pack caravans, carts, and porters' packs, in general, and all persons concerned in seizures of contraband opium, has been printed, and impressed with the Great Seal of the State, on Tuesday 1st day of the 5th moon, in the year Mamee, 2nd of the Decade, corresponding to the 21st of March 1871, of the Christian Calendar; and shall come into force from this date, both in the Metropolis and in every province of the Kingdom of Siam.

Annexe No. 3.

(Translation.)

SUPPLEMENTARY LAW RELATING TO THE OPIUM MONOPOLY, 1st April 1890.

HIS MOST GRACIOUS MAJESTY THE KING deems the practice of opium smoking a great evil, but realises at the same time that its total suppression could not be effected without causing great suffering among certain sections of the people, notably the Chinese, who have become too deeply addicted to the opium habit. Nevertheless, the existing facilities for procuring the drug, if allowed to continue, constitute such a standing temptation to the viciously inclined and so likely to further spread the vice among the population of Siam, that His Majesty considers that a scheme for preventing the propagation of this evil, and at the same time for realising some additional legitimate revenue for the State, could be realised by the institution of more complete and stringent regulations for the administration of the monopoly on opium; and, animated by a generous desire to promote alike the prosperity of the State and the happiness of His people, His Majesty, after consultation with His Ministers of State, has been most graciously pleased to command that a Supplementary Opium Monopoly Law, divided into chapters and Sections, shall be enacted as follows:—

CHAPTER I.

APPOINTMENT OF GOVERNMENT OFFICERS AND OPIUM FARMERS.

1.—There will be appointed by the Throne a Director and a Deputy Director of the Opium Revenue whose duties shall be:—(1) to keep the accounts relating to opium, (2) to receive the revenue from the Opium Farmers for paying in to the Royal Treasury in accordance with the law, (3) to keep an account of the Government funds used as capital for the purchase of raw opium, and to receive payments for prepared opium issued by the Government, (4) to act as judges in all legal proceedings which may arise in connection with the Opium Monopoly, (5) to give attention and direct measures for the arrest and punishment of offenders guilty of manufacturing illicit opium, and (6) to take care of the interest of the State and see that the laws concerning the Opium Monopoly are properly observed.

2.—There will be appointed by the Throne a Director and a Deputy Director of the Government Opium Factory who shall be responsible for the affairs of the Opium Factory and shall superintend the manufacture of prepared opium from raw opium and issue opium to the Opium Farmers in accordance with the regulations.

3.—There will be appointed by the Throne Opium Farmers for different provinces for conducting the sale to the public of opium received from the Government, and to make inspections and arrest offenders against this law.

CHAPTER II.

DUTIES OF THE GOVERNMENT AUTHORITIES.

4.—The Minister of Finance shall submit to His Majesty the King a list of the provinces where he considers the Opium Monopoly should be farmed out and those where the monopoly should be managed by special Government officers, and a list of the provinces which should be allowed to manufacture prepared opium locally and those that should draw their supplies of the same from Bangkok; and when His Majesty's approval is made known, he shall appoint the Opium Farmers and determine the estimated amount of opium which each Farm ought to take from the Government, and shall fix the selling price of the same and the periods for the payments to be made by the Farmers. He shall generally control the affairs of the Opium Monopoly, fix the staff of officers, clerks, and employés of the Opium Factory and the general expenditure of that establishment. He shall consider all disputes and appeals at law and render assistance to the Opium Farmers in the detection and arrest of offenders against the law. He shall be responsible for the interest of the State and for the proper observance of the law. He shall draw up and submit monthly and annual reports of the working of the Opium Monopoly to the Throne and shall issue such rules and regulations as may be necessary under, and in interpretation of, the old and new laws relating to the Opium Monopoly.

5.—When the time, publicly notified by the Minister of Finance, for the public bidding for Opium Farms arrives, it shall be the duty of the Director of the Opium Revenue to examine every person applying to compete in the bidding, as well as his guarantor and surety, as to their ability to meet the obligations required by the Government. When any person has succeeded in becoming an Opium Farmer, the Director of the Opium Revenue shall require him to deposit property with the Government as guarantee, and to submit an estimate of the quantity of opium he will be required to buy for the year, the address of the chief office of the Opium Farm and opium store, and the number of Opium Inspectors to be employed by him. These particulars are to be submitted to the Minister of Finance, and upon being approved, the Director of the Opium Revenue shall file the estimate of the amount of opium to be issued to the Opium Farmer and shall issue to the latter the licenses for the retail opium shops and the badges for the Opium Inspectors.

When an instalment on an Opium Farm falls due, it shall be the duty of the Director of the Opium Revenue to press for payment of the same to be made to the Royal Treasury by the Opium Farmer. If the instalment is not paid on due date, he shall cause the Opium Farmer, or his guarantor or surety, to be arrested, and shall, after reporting the matter to the Minister of Finance, issue a public notice for a public auction of the Farm, in accordance with the law. If the Director of the Opium Revenue neglects to perform

his duty according to this law, he shall be personally responsible for every sum which has failed to be paid into the Royal Treasury.

6.—The Director of the Opium Revenue shall keep an account of the capital fund for the purchase of raw opium for the Opium Factory. Whenever an Opium Farmer applies for a supply of opium in accordance with the amount fixed to be issued to him, the Director of the Opium Revenue shall, after receiving payment for the same at the price prescribed by the Minister of Finance, deliver to the Farmer an order instructing the Director of the Opium Factory to issue the amount of opium required. In the event of any Opium Farmer applying for a supply of opium in excess of the quantity prescribed for being issued to him, the reason must first be inquired into and reported to the Minister of Finance, and only upon his sanction can the quantity of opium applied for be issued to the Farmer.

The capital for the purchase of raw opium and all sums received in payment for opium issued by the Factory shall be kept together in one account and on it will be charged all expenditures for the purchase of raw opium and for the salaries and general expenses of the Opium Factory. At the end of the year an annual statement showing a balance of profit, if any, shall be submitted to the Minister of Finance, and the profits shall be paid into the Royal Treasury. The unexpended moneys of the capital fund should be deposited with a Bank or in any place of safety, where it may also produce interest. If any of that money be lost or misappropriated, the Director of the Opium Revenue shall be responsible for its refund.

7.—The Director of the Opium Factory shall keep an account, and take good care, of all raw opium received by him, and shall use the same for the manufacture of the different brands of prepared opium which may be required from time to time. Separate accounts shall be kept showing the amounts of raw opium taken up for manufacture and the amounts of manufactured opium produced therefrom. It shall be his duty to issue prepared opium, of any brand which may be required, to the Opium Farmers according to the orders received from the Director of Opium Revenue, and shall record the same in his register of manufactured Opium. In the case of opium intended for a provincial Opium Farm, the drug must be securely packed in cans stamped with the seal of the Director of the Opium Factory, to prevent tampering on the journey, and addressed to the care of the Governor of the province, before it can be issued to the Opium Farmer concerned. Every consignment of opium issued to provincial Opium Farmers must be notified in detail to the Opium Farmer of Bangkok.

8.—If any opium in the Opium Factory be missing, the Director of the Opium Factory shall be liable to pay the Government the purchase price of the missing quantity and to pay the Opium Farmer of Bangkok a sum representing the Farm's probable profit on the same.

Great care must be exercised in weighing all prepared opium to be issued from the Opium Factory. If opium issued to any person be short in weight or of a different brand from that ordered, the Director of the Opium Factory shall, on conviction, be made to pay a "double fine" to that person. (*N.B.*—A fine equivalent to twice the volume of the deficiency or of the substituted brand is probably meant here.)

9.—In the general management of the Opium Factory, the Director of the Opium Factory shall abide by the regulations of the Minister of Finance. He shall submit monthly and yearly detailed reports to the Director of the Opium Revenue, who will submit the same, together with a report of his own Department, to the Minister of Finance.

10.—If the Minister of Finance sees fit to authorize the Opium Farmer of any province, or any other person, to visit the Opium Factory, the Director of the Opium Revenue shall issue an order for that purpose and the Director of the Opium Factory, upon receipt of such order, shall allow all the accounts and the opium to be freely inspected. If the order be for any of such visitors to remain and watch the business he shall be allowed to observe every branch of the work during all times that the Opium Factory is open for business.

CHAPTER III.

OPIUM FARMERS.

11.—If the Minister of Finance sees fit that opium monopoly in any province should be worked directly by the Government, he shall report to the Throne and appoint a Government officer for the purpose. Such Government Opium Officer will be remunerated either by a monthly salary or by commission (on the sales of opium).

12.—If the Minister of Finance sees fit that the Opium Monopoly in any province should be farmed out, he shall issue a public notice with regard to the same not less than 15 days before the date fixed for putting up the Farm for public bidding. Every person wishing to compete for the Farm must first present an application, signed by himself as the would-be Farmer and by his guarantor and a surety, to the Ministry of Finance according to the prescribed form. The guarantor or surety must be changed, if objected to as unsatisfactory by the Director of the Opium Revenue. The applicant must take part in the biddings on the appointed date. The Farm will be knocked down to the highest bidder.

13.—Every successful bidder for an Opium Farm is required to deposit property as guarantee in advance, in the proper time, according to the rules issued by the Minister of Finance and after a list of the successful bidders has been submitted to, and approved by, the Throne, he must present himself before the Director of the Opium Revenue to execute an agreement binding himself to observe all the rules and regulations, and also receive his official Letter of Appointment as Opium Farmer and an official Letter of Introduction to the provincial authorities, on payment of a fee of 160 Ticals. The Letter of Introduction should be delivered to the Governor of the province; but the Letter of Appointment shall be retained by the Opium Farmer as long as he continues to hold the Farm.

Every provincial Governor is strictly forbidden to allow any Opium Farmer, provided with a Letter of Appointment, who does not present his Letter of Introduction, to carry on the sale of opium.

14.—The Opium Farmer must pay every monthly instalment regularly on its due date until the same, taken together with the amounts already paid in advance, shall cover the total amount at which the monopoly was farmed. If any instalment is not paid on the appointed date, the authorities shall arrest the Farmer and put up his Farm to public auction. In such case, arrears due by the offending Farmer shall be recovered from the moneys already paid by him in advance on the Farm, and should that be insufficient, pressure shall be brought on him to make good the deficiency. Should the advanced payments more than cover such arrears, the balance remaining will be returned to him. In the meanwhile, a new Opium Farmer is to be appointed to take up the Farm for the rest of the year.

15.—Every Opium Farmer must take the oath of allegiance to the Throne on the usual occasions when that ceremony is held.

16.—For any offence against the regulations not punishable with a severer penalty, an Opium Farmer may be punished with a fine not exceeding 800 Ticals.

17.—Where an Opium Farmer intends to work his Farm by a representative, he must notify the same to the Director of the Opium Revenue in order that an official letter of instructions relating thereto may be issued to him for delivery to the Governor of the province concerned. The fee for such document is the same as for an ordinary official letter of instructions to provincial authorities.

18.—In legal proceedings, every Opium Farmer as well as his guarantor and surety may sue and be sued through duly appointed representatives.

CHAPTER IV.

DELIVERY AND SALE OF OPIUM.

19.—Every provincial Opium Farmer must submit an estimate of the stock of opium required for his district during the year for the consideration of the Minister of Finance, who may either approve or reduce the same if he sees fit. In the case of a large estimate satisfactory explanations must be given by the Farmer before the same can be allowed, and no penalty will be imposed even if the whole of the quantity applied for is not taken out by the Farmer. If any sanctioned estimate of opium turns out to be insufficient, the Farmer must give substantial explanations to satisfy the Minister of Finance that opium has not been or is being smuggled into other districts, before the supplementary stock applied for can be granted.

20.—When the issue of opium to any Opium Farm falls due, the Farmer must present a written application to the Director of the Opium Revenue stating the quantities he wishes to take away at each time and the price which he has to pay for the same according to the

tariff prescribed by the Minister of Finance. When the order for the opium to be issued is handed to him, he shall present it to the Director of the Opium Factory and take delivery of the opium, after it has been accurately weighed and checked by that official. If the opium is for a provincial Farm, the Farmer must take it, packed in cans, to its destination with great care. On arriving at each inland duty station, he must submit to official inspection and allow the cans to be opened for examination, which should be done only in the presence of the Governor or a high official of the province, by whom a report of such inspection shall be sent to the Ministry of Finance within seven days.

21.—Every provincial Opium Farmer must submit a list of retail opium shops which he wishes to have in his district for the approval of the Director of the Opium Revenue, by whom the licenses for the same will be issued. Every retailer of opium must take out a license; and the situation of the chief establishment of the Opium Farm must also be notified to the Director of the Opium Revenue.

Every person who sells opium without a license shall be deemed guilty of the same offence as that of dealing in contraband opium.

22.—For every supply of opium taken from an Opium Farm by a sub-Farmer a certificate, stating clearly its quantity and description, and the date, must be obtained from the Opium Farmer. When any quantity of opium is to be removed from one place to another, a removal permit must be obtained from the Opium Farmer. A certificate must also be issued for every quantity of opium sold to consumers by the retail opium shops. Every quantity of opium found unaccompanied by a certificate will subject the possessor to the same penalty as for dealing in contraband opium.

23.—When an Opium Farm changes hands, the outgoing Farmer must sell whatever stock of opium he may have remaining to the new Farmer at the same price at which he had purchased the same, and shall do so in the presence of the Governor and high officials of the province. If the opium is found to be adulterated, the new Farmer shall file an attachment to have the same brought down for investigation in Bangkok. If the adulteration be proved, the opium shall be confiscated and the offence shall be punished with the same penalty as for that of dealing in contraband opium. With regard to the opium previously sold by the outgoing Farmer, the new Farmer shall issue a public notice requiring every person being in possession of opium to declare the same and take out a new certificate within 15 days. The aggregate quantity of such opium shall be ascertained and the outgoing Farmer shall pay the amount of the profits derived by him therefrom to the new Farmer. These transactions should take place in the presence and under the control of an official deputed by the Governor of the Province, and must be attended by both the outgoing and the new Farmers, either in person or by deputy. If, at the transfer of the business of the Opium Farm, the outgoing Farmer fails to attend personally or by deputy, or attends but leaves before the appointed time, the inventory taken in his absence by the new Farmer in conjunction with the high provincial official shall be conclusive. Every person having purchased opium from the late Farmer who fails to make a declaration and take out a new certificate for his opium, within 15 days, shall be arrested as a dealer in contraband opium.

24.—An ordinary opium certificate is valid for seven days only. Except where a longer term is allowed and specified on its certificate by the Farmer, every retail opium shop which has not sold all its stock of opium in seven days must take out a fresh certificate for the remaining quantity. Every person is forbidden to buy more opium from a retail opium shop than what is enough for seven days' consumption; any opium remaining after the seventh day, when the certificate is no longer valid, will be considered as contraband. A private person may buy opium direct from the Farmer who may, at discretion, grant him a certificate for a longer term than seven days; and any of such opium remaining after the expiration of that term may also be declared and a fresh certificate taken out for it by the purchaser in the same manner as opium purchased by the retail opium shops.

25.—If the opium certificate of a retail opium shop is lost, a new one may, on application, be granted by the Opium Farmer; and if the certificate of a private purchaser is lost, a new one may be given by the keeper of the retail opium shop; but the latter must report the matter to the Opium Farmer. If the reported loss of any opium certificate is proved to be false, an arrest on suspicion shall be made and the opium seized as contraband.

26.—Every Farmer, retail opium shop, or sub-Farmer is strictly forbidden to adulterate opium. If any one is guilty of the offence, the opium shall be confiscated as contraband.

27.—It is forbidden to the Opium Farmer to sell opium on credit to sub-Farmers and retail opium shops; and retail opium shops are forbidden to sell opium on credit to private persons. No complaints arising from the sale of opium on credit will be recognized.

28.—Payment for opium sold must only be accepted in silver ticals or copper coins, or in the currency of the part of the kingdom where the opium is being sold. Infraction of this rule will be punished with a fine not exceeding 320 Ticals.

29.—If the Opium Farmer of any province, where it is not allowed to manufacture opium locally, manufactures opium or brings in contraband opium for disposal therein, shall, on conviction, be punished with a fine not exceeding 10,000 Ticals for the first offence, and for a subsequent offence the same fine coupled with dismissal from the Farm. A new Farmer will then be appointed in his place, and any arrears found due to the Government will be dealt with in the same manner as in the case when the Farm of a defaulting Opium Farmer, is put to auction.

30.—The Opium Farmer shall submit a list giving the names and personal description of the persons he intends to appoint as Inspectors of the Opium Farm to the Director of the Opium Revenue, who will issue the official badges for such persons. Such inspectors as well as the police, the soldiers, the provincial officials, and the Amphurs and Kamnans, shall have power to act as inspectors for the detection and seizure of contraband opium.

31.—If a manufacturer of contraband opium is arrested in Bangkok he shall be delivered to the Director of the Opium Revenue, together with a statement of the charge preferred against him; if in a province, he shall be delivered to the Governor and provincial officials; and if the offender be a foreign subject, he shall be delivered to his Consul.

32.—Whenever an Opium Farmer finding it beyond his powers to effect any arrest, he shall, if in Bangkok, apply for assistance to the Director of the Opium Revenue, and if in a province, to the Governor and officials of the province; but every such arrest can only be undertaken on a properly sworn information of an informer. No such restrictions is, however, necessary where only inspections are to be made.

33.—Neither the Opium Farmer or any one else is allowed to bring opium from one district to sell in another. Such offence shall be punished with the same penalty as for contraband opium. And if it be proved that the Opium Farmer of the district concerned had acted in collusion or had knowingly permitted the sales to be made, he shall be punished with a fine not exceeding 10,000 Ticals for the first offence, and for a subsequent offence the same fine coupled with instant dismissal from his Opium Farm; and in such case, if any arrears be found owing to the Government by that Farm, the same will be dealt with in the same manner as when a defaulting Opium Farmer's business is put up to auction.

34.—If any person buys opium from a retail opium shop for consumption in another district, he must, on arriving at the duty station of that district, deposit the opium with the duty station and take out a receipt for the same, and can reclaim his opium, on his return, upon presenting that receipt. If any person wilfully takes opium into another district, he shall be punished in the same manner as for the offence of dealing in contraband opium. When a person is going to travel in several provinces, and purchases a supply of opium for consumption from the Opium Farmer of a certain province, that Farmer shall deliver to him a certificate clearly stating where the opium was sold and in what districts it is to be taken for consumption. When arriving at any province on the way this certificate must be shown to the Opium Farmer of that province, who will, after satisfying himself to the same being correct, allow the traveller to continue on his journey. On arrival at his destination, the traveller must deliver the certificate to the local Opium Farmer, who will exchange it for another certificate of his own, and keep the original certificate for claiming compensation in respect to the opium from the Farmer who had issued it. It is strictly forbidden for opium dross to be taken from one province into another; and if any person be found guilty of doing so, the Farmer shall confiscate his opium dross.

35.—All opium confiscated shall belong to the Government; but the fines and other things shall become the property of the Opium Farmer. When opium is confiscated in a province, it shall be handed over by the Governor of the province to the Opium Farmer, and a report shall be sent to Bangkok giving the quantity, description, and weight of the opium, in order that the authorities may be able to calculate and claim the value of the same from the Opium Farmer.

CHAPTER V.

LEGAL PROCEEDINGS.

36.—The Court of the Local Government Department shall be competent to try all cases in connection with the Opium Monopoly in Bangkok; but when a trial has reached the point of awarding penalties, the case must be transferred to the Director of the Opium Revenue. Legal proceedings may also be instituted direct with the Director of the Opium Revenue. In the provinces the provincial officials and the Amphurs and Kamnans are competent to try such cases, but when a trial reaches the stage when penalties are to be awarded the case must be sent to the Governor of the province. Proceedings may also be instituted direct with the Governor of the province; but when punishment is to be awarded or imprisonment to be decreed in lieu of a fine, or if any difficulty in settling the result occurs, the case must be sent to the competent Department in Bangkok.

37.—All legal proceedings concerning the Opium Monopoly must be investigated with every despatch. The prosecutor must state his case in the clearest manner, specifying the accused's offence in connection with contraband opium and the evidence which the prosecution can adduce. The accused must answer the interrogations of the judges, giving his denial of the charge against him, and naming his witnesses and other evidence in support of the denial. When the evidence in the case has been heard, the judgment must be given as soon as possible. If the prosecutor wilfully delays the case more than 15 days, the case shall be dismissed. If the defendant cannot pay the fine adjudged against him within one month, he must be committed to prison in lieu of the same. If in the provinces, he must be sent down to Bangkok at once. It is strictly forbidden to judges, both in Bangkok and in the provinces, to keep any person in prison without trial for more than 15 days.

38.—The Judges shall have power to require the prosecutor and the defendant to pay the usual Court fees; but the Opium Farmers need not be required to pay the fee for bail. If the charge brought by an Opium Farmer is not proved, he shall be ordered to pay the costs and also to pay damages according to law. All fines payable to the Opium Farmer shall be subject to deduction of 10 per cent. for the judges.

39.—The Court of the Opium Revenue Department is competent to try offences in connection with contraband opium only; cases of assault and other crimes must be tried by the competent Court.

40.—Prosecution against any person under foreign jurisdiction will be referred to the proper Consul through the Director of the Opium Revenue; the Opium Farmer shall appoint an attorney to act for him in the case. If he experiences any difficulty he shall refer the matter to the Director of the Opium Revenue, who will give his attention and assistance in the matter, in accordance with justice. The Opium Farmer must report the result of the case to the Director of the Opium Revenue, even if he is already quite satisfied with the judgment passed by the Consul.

41.—Appeals against the judgment of the provincial authorities of the Director of the Opium Revenue may be made to the Minister of Finance, and appeals against the judgment of the Minister of Finance may be made to the Throne.

CHAPTER VI.

GENERAL.

42.—The Minister of Finance may, during his absence, delegate his powers with regard to the Opium Monopoly to the Deputy Minister or the Chief Secretary of the Finance Department. In the provinces, where the Governors have to take charge of the execution of the Opium laws, a Governor may, during his absence, delegate his powers to the Palat, the Yokrabat and the other provincial officials.

43.—The provisions relating to the Opium Monopoly contained in all old and new laws which do not contradict the provisions of the present law shall remain in full force. But the Opium Monopoly Law of the year 1233 (1871) shall remain in full force in all its particulars.

44.—The price at which opium may be sold by the Opium Farmers in Bangkok and in the provinces shall be prescribed by the Minister of Finance in the Letter of Appointment of each Opium Farmer. If any Farmer or any retail opium shop sells opium above or below the prescribed price, the offence shall be punished with a fine not exceeding 2,000 Ticals. If the Governor and officials of any province knowingly omit to inflict punishment for such offence, or to report the offence to Bangkok, they shall be liable to the same penalty as the persons guilty of the offence.

This Law is enacted on the 1st day of April 109 (1890), being the 7812th day of the Present Reign.

Annexe No. 4.

(*Translation.*)

REGULATIONS CONCERNING THE OPIUM MONOPOLY.

Issued by the Minister of Finance with the sanction of His Majesty the King,

1st March, 111 (1893).

1.—Opium Farmers shall not sell prepared opium higher or lower than the following prices:
For Opium of the "Sieng Hoon" (Superior) quality, price per Tael: maximum, Ticals 3.75; minimum, Ticals 2.50.

For Opium of the "See Hoon" (Inferior) quality, price per Tael: maximum, Ticals 3.50; minimum, Ticals 2.25.

2.—The quantity of raw opium (reckoned by the number of balls) or of prepared opium (reckoned at so many tael's weight) which the Opium Farmer of a province has to take out for each year's supply will be specified in his Letter of Appointment. The High Commissioner (including the Commissioner, Governor, or acting Governor) of the province shall instruct the Amphurs and Kamnans to examine the opium accounts and shall, at the end of each year, send a report of the same to the Ministry of Finance in Bangkok. If the Opium Farmer has not been selling, in all honesty, more opium in his province than the prescribed quantity, the High Commissioner shall report and send an account of the same to the Ministry of Finance during the year.

3.—If any raw opium, packed in chests or in braided balls, or any Shan, or Yunnan, opium, not being opium purchased and consigned by the Ministry of Finance or by any person acting under its authority, is brought by any person into any provincial district, the Opium Farmer of that province shall stamp each piece of opium with his seal and issue certificates for the same; after this the High Commissioner of the province shall issue a passport, containing mention of the quantity of the said opium, to the owner thereof, and shall order him to take the opium out of the country. On the outward journey, the opium must be inspected by the High Commissioner and Opium Farmer of each province on the way, and the order for it to be taken out of the country repeated. If such opium is not provided with a passport as here mentioned, it shall be dealt with as contraband.

4.—All contraband opium seized by the Opium Farmer or by the provincial authorities must be delivered to the High Commissioner of the province. In the case of raw opium, it will, if there is an authorised local opium factory, be made over to the Opium Farmer and a report shall be sent to the Ministry of Finance to have a similar amount written off the prescribed amount of raw opium which the Opium Farmer has to take from Bangkok. If there is not a local opium factory, the raw opium seized must be sent down to the Ministry of Finance. In the case of prepared opium seized, it shall be delivered over to the Opium Farmer, and a report about the same sent to the Ministry of Finance.

The High Commissioner may, however, if he sees fit, send all the opium seized directly to the Ministry of Finance in Bangkok.

(signed) NARA DHIPRABANDBHONGSE

Deputy Minister.

The Ministry of Finance,

1st March, 111 (1893).

REGULATIONS CONCERNING THE OPIUM MONOPOLY.

Issued by order of the Minister of Finance, 8th January, 117 (1899).

By order of His Royal Highness Prince Mahisra Rajharudhay, Minister of Finance, it is hereby notified to all concerned that owing to the laxity on the part of Opium Farmers, dealers, and consumers of opium, in the observance of the provisions of the Opium Laws of the years 1233 and 109 and of the rules and regulations relating to opium, it has been found necessary, in order to remind and explain to those concerned their duties under the said laws, to issue the following rules:—

1.—When any person desires to keep a shop where opium may be retailed or consumed on the premises, he must first apply for a license to the Opium Farmer, and can establish the shop only after such licence has been issued to him. The application must state the name, nationality and jurisdiction of the applicant, the class of license required, and the locality of the shop. The application, together with others of the same kind, will then be submitted by the Opium Farmer, if in Bangkok, to the Director of the Opium Revenue, if in a province, to the Government official duly appointed on that behalf by the Minister of Finance; and only upon the approval of any of these authorities can a license, entitling the holder to keep only one opium shop, be issued.

If any person wilfully keeps an opium shop without a license, he will be punished, on conviction, with the same penalty as for dealing in contraband opium.

The fee for a licence is one Tical.

2.—The license for the sale of opium are of two kinds: 1st Class and 2nd Class. The 1st Class licenses are only for the “Yi Kongsì,” or wholesale, opium shops, each of which is allowed to hold a maximum stock of 2,000 taels weight of opium, but must not make single sales of less than 10 taels’ weight or allow opium to be retailed for consumption on the premises. The 2nd Class licenses are for retail opium shops, each of which is allowed to keep a maximum supply of 10 taels’ weight of opium, and must not make any single sales of over 10 taels’ weight.

If any person holds in stock more opium than the prescribed maximum, or makes single sales above or below the prescribed limits, mentioned in this rule, he will, on conviction, be punished with the same penalty as for dealing in contraband opium. His opium will be confiscated; and his license will be cancelled.

Every opium shop must display a signboard bearing the registered number of the license and the name of the shop, and also the stamps of the Opium Farmer and the competent authorities.

3.—The prices at which opium is to be sold by Opium Farmers to licensed dealers, and by the latter to the retail opium shops and consumers, must not be higher or lower than the prices prescribed by the Minister of Finance in the Schedule attached to these regulations. As long as this Schedule is in force, every person who sells opium differently from the tariff prescribed therein will be punished according to law.

4.—Opium Farmers must buy their raw opium only from the Government, at a place where they are sold by the proper authorities at the price fixed by the Government when the monopoly was farmed out. If any Opium Farmer introduces, sells, or makes use in any way of, opium not supplied to him by the proper authorities, he will, on conviction, be punished with the same penalty as prescribed in Section 29 of the Opium Law of 109 (1890).

5.—When an Opium Farmer is going to take out any raw opium purchased from the proper authorities to his revenue district, he must first obtain a pass, or removal permit, for the same from the proper authorities. This pass must accompany the opium, and must state clearly the name of the person in charge of the opium, its quantity and destination, the route to be followed and the date of departure. On the journey, the opium must be allowed to be examined and compared with the description on the pass by the local authorities, who will duly endorse the pass, if everything is found to be correct. Upon reaching its destination, the opium must be shown to the Treasury Officer of the Monthon who, after examining and finding everything correct, will endorse the opium pass and forward it to the Ministry of Finance, and also make an official record of the opium.

6.—All contraband opium seized by the Opium Farmers shall belong to the Government; but the fines shall belong to the Opium Farmers, who will have to pay for the rewards and the expenses of the arrests as assessed by the authorities.

All opium seized by the Opium Farmer (in Bangkok) must be delivered over to the proper authorities. In the provinces such opium must be delivered to the charge of the Monthon Government, and the Commissioner of the Monthon shall forward the same, together with a report to the Ministry of Finance for further steps to be taken by the authorities in Bangkok.

7.—Each Monthon shall have one opium factory. It is strictly forbidden to take any manufactured opium in transit through a Monthon without the authority of the local Opium Farmer. When it is desired to establish an opium factory in any Monthon, the matter must be first submitted for the approval of the Director of the Opium Revenue, who will give permission to do so if he sees fit.

8.—Opium factories and opium shops must make their accounts public. If the Minister of Finance or any official empowered by him wishes to permit any person to inspect the business or to be attached to any opium factory, the Opium Farmer as well as the keeper of the opium shop concerned shall allow him to make the inspection without any hindrance.

9.—The manner in which the raw opium is to be manufactured (or boiled) will be determined by the proper authorities, who will decide what consistency, according to the result of technical experiments, opium for consumption should be prepared.

10.—The supplementary Opium Regulations of the year 114 shall be hereby abrogated from the 1st of April, 118 (1899).

(signed) Mom Chao PIYA-BHAKDINARD.

Minister of Finance,

8th January, 117 (1899).

SCHEDULE TARIFF OF PRICES FOR OPIUM.

MONTHON AND MUANGS.	SIENG HOON QUALITY PRICE PER TAEI.				SEE HOON QUALITY PRICE PER TAEI.			
	MINIMUM.		MAXIMUM.		MINIMUM.		MAXIMUM.	
	<i>Tcs.</i>	<i>Ats.</i>	<i>Tcs.</i>	<i>Ats.</i>	<i>Tcs.</i>	<i>Ats.</i>	<i>Tcs.</i>	<i>Ats.</i>
1. Pitsanuloke	4	00	6	00	3	48	5	48
2. Nakon Savan	4	00	6	00	3	48	5	48
3. Nakokrajsima	4	00	6	00	3	48	5	48
4. Rajburi	4	00	6	00	3	48	5	48

12. Chantaboon (including Rayong, Kratt and Prachabkirikhan) ..	4	00	6	00	3	48	5	48

The above prices are no more in force: in order to check the habit of opium smoking and to hinder its propagation the Government has raised the price to Ticals 7 for first grade, and to Ticals 6.48 ats. for second grade opium.

Annexe No. 6.

(Translation.)

DECREE

Prohibiting the Importation and Sale of "Ya Ee" Pills and any other Kinds of Medicine mixed with Opium, within the Kingdom of Siam.

Whereas a considerable quantity of pills mixed with opium, known as "Ya Ee" is imported into the kingdom as a kind of medicine beneficial to health; and

Whereas the said pills have been found, on medical examination by doctors and chemical experts, to contain a great deal of opium capable of injuring lives of those who are not in the habit of smoking opium; and

Whereas it has also been found that opium contained in the said pills is not of a pure quality fit to be taken as medicine; and

Whereas it is further known that these pills are bought and sold exclusively among opium smokers, on account of their low value, for opium used in medicine pays lower duties than any other kinds of opium; and

Whereas the sale of this medicine must be regarded as a sale of illicit opium, the sole object of which is to defraud the revenue of the State.

Therefore it is hereby enacted as follows:—

ARTICLE 1.—From the date of promulgation of the Decree, no medicine containing either raw, boiled, or any other kinds of opium shall be imported into the country, except those which bear distinctive marks and possess a universal reputation of being a cure for disease such as those prescribed by doctors, provided always that sanction from the Ministry of Finance must be obtained before being imported into the country.

ARTICLE 2.—Sale of "Ya Ee" pills mixed with opium of any description whatsoever is strictly prohibited, except under the following conditions:—

- (a) Recommendation by doctors appointed by the Government for the purpose of examining the medicine;
- (b) Opium used in medicine must be licit, *i.e.*, the sale of which is sanctioned by the Government;
- (c) Prescription of, and proportion of opium to be mixed in, medicine must be clearly shown in order that State doctors may examine them.

ARTICLE 3.—Whoever smuggles opium of any kind into the kingdom, or trades in medicine mixed with opium without permission of the Spirit and Opium Department of the Ministry of Finance shall be considered as smuggling or trading in illicit opium. The law on Opium Monopoly of Chul-Sakaraj 1233 Chap. 2 Sec. 9 shall apply.

Decreed on the first day of March, Ratana Kosindre Sok. 120 (1902).

Annexe No. 7.

(Translation.)

A DECREE FIXING THE PENALTIES FOR OFFENCES IN CONNECTION WITH ILLICIT OPIUM, R.S. 125, BY THE KING'S MOST EXCELLENT MAJESTY.

Whereas, in spite of the laws promulgated in the year 1233 of the old era and on the 1st April, R. S. 109, concerning the Opium Monopoly, opium smuggling has become more and more prevalent:

And whereas such state of affairs is likely to prove detrimental to the revenue of the State;

It is hereby decreed that a law to define the penalties for dealing in illicit opium be enacted as follows:—

1.—This law may be cited as "A Decree fixing the Penalties for Offences in connection with Illicit Opium, R. S. 125."

2.—It shall come into operation on the date of its promulgation in the *Government Gazette*.

3.—Any person committing any offence of importing, buying, selling, or being in possession of illicit opium or opium dross, contrary to the laws of the years 1233 (old era) and R. S. 109, shall be punished in the manner hereinafter described, that is to say:—

- (a) If the quantity of illicit opium (in respect of which the offence is committed) is not over 100 taels in weight, the offender shall be punished with fine, amounting to treble the value of the said opium, or with imprisonment of from eight days to three months, or with both.
- (b) If the quantity of illicit opium (in respect of which the offence is committed) is over 100 taels in weight, the offender shall be punished with fine, amounting to treble the value of the said opium, and imprisonment of from one month to three years.

The value of opium to be used as a basis for determining the amount of the fine shall be the current price at which opium is sold by the Opium Farmer to the public.

4.—Any person being an accessory in any offence described in Section 3 shall be liable to the same punishment, reduced by one-third.

5.—Whenever several persons have participated in the commission of one and the same offence against the Opium Law, either as principals or accessories, the fines inflicted upon each of them may be adjusted so that their aggregate amount be not less than treble the value of the illicit opium (in respect of which the offence was committed), provided that in no case may a principal be fined less than 100 taels and an accessory less than 66 taels.

6.—Whoever, having been convicted of an offence under Sections 3 or 4 of this Decree, commits any subsequent offence under either of these sections before three years have elapsed from the date of the completion of the punishment inflicted for such prior offence shall be liable to fine, as provided in Sections 3 to 5, and to imprisonment of from three months to five years.

7.—In the above-mentioned laws of the years 1233 (old era) and R.S. 109, an informer means any person, whether belonging to the Opium Farm or not, who shall swear before the proper authorities that he has good and reasonable grounds to believe that any of the offences against the Opium Laws has been or is being committed.

8.—The Ministers of Finance, of the Interior, of Justice and of Local Government are charged with competency to execute the provisions of the present law.

Decreed this 23rd day of August, R.S. 125 (1906), being the 13,799th day of the present reign.

Annexe No. 8.

(Translation.)

HIS MAJESTY'S SPEECH OF 21ST SEPTEMBER 1908 ON THE OPIUM QUESTION.

There remains yet another matter which has been occupying Our thoughts for a long time past; it is that of opium. It is unquestionable that the drug has evil effects upon its consumers; and casts degradation upon every country where the inhabitants are largely addicted to the habit of opium smoking. There is no reason to doubt that the most earnest desire of nearly every country in the world is to suppress this noxious habit among its population. But unfortunately there are many obstacles in the way of the attainment of this object. Briefly speaking there is the considerable shrinkage in the State revenues to be faced, then there is the difficulty of compelling people already addicted to the use of the drug to throw off the habit at once of their own will. Even prohibited, it is not to be expected that such persons will refrain from seeking surreptitious means to gratify their craving for opium; and therefore if a Government, unable to execute measures whereby surreptitious traffic and consumption of the drug can be effectively prevented, were to attempt the suppression of the opium habit, it would only be a considerable loss of revenue to the State without any adequate realisation of its good intentions. It is this great hindrance to the proper attainment of their object that has prevented Governments from immediately suppressing the vice. Notwithstanding these great obstacles which We see standing in Our way, it is nevertheless Our bounden duty not to neglect Our people and allow them to become more and more demoralized by indulgence in this noxious drug. We have carefully considered the subject and find that ways of carrying out Our great desire are not altogether wanting; and We have accordingly decided upon executing special measures in the administration of the Opium Monopoly whereby the spread of the opium habit among Our people shall become gradually lessened until it shall be entirely suppressed.

Correspondence.

SHANGHAI, *le 1er février 1909.*

MONSIEUR LE PRÉSIDENT,—La délégation française ayant jugé utile de s'adjoindre un secrétaire, j'ai l'honneur de porter à votre connaissance que j'ai désigné pour remplir ces fonctions M. DE LAFORCADE, Consul suppléant attaché au Consulat-Général de France.

Veillez agréer, Monsieur le Président, l'assurance de ma haute considération,

J. RATARD.

BISHOP BRENT,

*Président de la Commission internationale de l'opium,
Shanghai.*

February 1st 1909.

SIR,—In answer to your favor of this date, announcing that you appoint M. DE LAFORCADE, Deputy Consul attached to the Consulate-General of France, as secretary, I have the honor to say that it would appear to be the recognized rule that each delegation should attach to itself one *bona fide* secretary, and the Chair will recognize your appointee as such.

Assuring you of my high esteem,

I have the honor to be,

Sir,

Your obedient servant,

(Signed) C. H. BRENT,

President of the International Opium Commission.

M. JULES RATARD, ETC.,

*Senior Commissioner of the French Delegation
to the International Opium Commission,
Shanghai.*

SHANGHAI, *January 30th 1909.*

DEAR SIR,—I have the honor to inform you that Mr. B. A. SOMEKH will act as Secretary to our Commission, and he will accompany me in all the meetings, which will take place for the International Opium Commission.

I remain,

Dear Sir,

Yours faithfully,

M. D. RIZAIN.

The Chairman,

THE RT. REV. C. H. BRENT,
Palace Hotel.

SHANGHAI, *February 8th* 1909.

SIR,—I have the honor to inform you that Mr. KEIZO YOKOYAMA, Chancellor of H.I.J.M.'s Consulate-General at Shanghai, has been appointed to be Secretary to the Japanese Delegation to the International Opium Commission.

I am,

Sir,

Your obedient servant,

T. MIYAOKA.

THE RT. REV. C. H. BRENT,

President of the International Opium Commission.

From the Shanghai Missionary Association.

January 27th 1909.

*To the Members of the International Opium Commission,
Shanghai.*

GENTLEMEN,—The Shanghai Missionary Association, which consists of about 300 members from many nationalities, desires to express its interest in the great work which is being undertaken by your Commission.

We believe that your disinterested labours will result in substantial good to the peoples of the East and therefore take this opportunity of expressing our deep sympathy with the object for which you have assembled in Shanghai.

We remain,

Sirs,

Yours faithfully,

S. I. WOODBRIDGE,

Chairman. } *Shanghai*
Missionary
Association.

GEORGE HOWELL,

Hon. Sec.

Reply to Above.

February 3rd 1909.

SIR,—I have the honor to acknowledge the receipt of your favor of the 27th of January, containing an expression of interest in the great work undertaken by the International Opium Commission. I beg to thank you for this expression of interest in our work and of sympathy with its object.

I have the honor to be,

Sir,

Your obedient servant,

(Signed) C. H. BRENT,

President of the International Opium Commission.

THE REV. S. I. WOODBRIDGE,

*Chairman of the Shanghai Missionary Association,
Shanghai.*

From the President of S. L. Baldwin School of Theology, Foochow, to the Secretary of the International Opium Commission (dated the 13th January 1909).

I am requested by the members of the Methodist Episcopal Mission at Foochow to write you regarding the progress that has been made in the Fukien Province in the suppression of the opium traffic. We wish to bear testimony to the sincere and determined effort that is being made by the Chinese in this part of the Empire to do away with this evil. They have taken hold of this problem with a firm and strong hand and have been employing the most vigorous methods possible to carry out the Edicts that have been issued regarding the production and sale of opium.

As regards the production of opium, so successful have their efforts been that throughout the whole extent of the Province scarcely a single plant remains to be seen, whereas a few years ago wide tracts of ground were devoted to the cultivation of the poppy.

All of the opium dens in this region have been closed, and the drug is now only sold to persons having a certificate. Vigilance committees are at work continually to detect any who may be using or selling opium illicitly. A strong sentiment has been created and the people are enthusiastic in the support of the anti-opium movement.

If the importation of foreign opium can be stopped we are confident that within one or two years time the opium traffic in this Province can be completely suppressed.

In behalf of the Methodist Missionaries at Foochow,

(Signed) W. A. MAIN.

From the Representative of the World's Woman's Christian Temperance Union, Shanghai, to the Members of the Opium Commission (dated the 6th February 1909).

When the gathering of your august body was first discussed in the public press the wide-spread impression prevailed that it was to be a Conference of the different nations to which organizations would be entitled to send delegates. Acting upon that supposition I was appointed by the officers of the World's Woman's Christian Temperance Union to represent that society.

Since my arrival in Shanghai I have learned that my appointment was on a mistaken basis, since the gathering is a Commission and not a Conference, and, therefore, I have not presented my credentials.

I could not, however, be true to the half million of women, organized in fifty nations, whom I all too unworthily represent, if I did not memorialize you on their behalf.

One of the great objects of our work through the years has been the "overthrow of the opium trade," because we have realized its blighting effects upon all that is best in man. Our members, all over the world, are praying for your Commission that the "wisdom which cometh from above" may be granted to you in all your deliberations.

We realize that there are many and weighty problems involved and that the subject must be viewed from many standpoints, but we know also that no question can be permanently settled until it is settled in harmony with the great principles of righteousness and justice.

The very appointment of your Commission is a tribute to the moral and religious forces of the nations which have for long years been agitating this subject. That your deliberations may be guided by the broadest and most disinterested desire for the moral welfare of all mankind is my earnest prayer.

Pardon me if I have taken a liberty in addressing you.

Very sincerely yours,

(Signed) KATHARINE LENT STEVENSON,

From the Young Men's Christian Association, Tokyo, Japan.

February 1st 1909.

DEAR SIR,—I am enclosing you herewith a copy of the telegram* which we are sending you. We are also sending you through our Shanghai office an Anti-Opium Resolution†

* See Telegrams (Annex Vol. I.)

† Not received.

which has been endorsed by the Chinese students here upon two separate occasions and also by the representatives of the different Churches working among the Chinese students here.

Praying for the blessing of God upon your work,

I am,

Most sincerely yours,

J. M. CLINTON.

Anti-Opium Commission, Shanghai.

February 12th 1909.

SIR,—I have the honor to submit for your consideration the following resolution passed at the plenary session of the International Opium Commission this morning :—

“RESOLVED, That the President of the International Opium Commission communicate with the Senior Consul at Shanghai (The Consul-General for Belgium) and request him to furnish all data concerning opium in the International Settlement.”

In accordance with the terms of this resolution, I beg hereby to ask your aid in this matter.

Trusting that you will be able to secure for us the necessary information at your early convenience,

I have the honor to be,

Sir,

Your obedient servant,

(Signed) C. H. BRENT,

President of the International Opium Commission.

THE HON. DANIEL SIFFERT,
*Consul-General for Belgium, and Senior Consul,
Shanghai.*

From The Charles B. Towns Institute.

SHANGHAI, February 25th 1909.

SIR,—I have the honor to place in your hands a formula which for some years has been in my possession and used as a cure for victims of the opium habit. The cure has proved to be of such value that it is my desire to extend its use. As the formula itself declares, it is free from opium or any of its derivatives, and experience has shown that there are no deleterious effects on the patient. Accompanying the formula are full directions for use.

It is my desire to place this formula in your hands in order that, in accordance with action taken by the Commission relative to anti-opium remedies, the various Delegations may if they so desire secure it from you in order to place it before their respective Governments for examination.

I hold myself in readiness to confer with any of your honorable Commission as individuals or as Delegations, providing them with such information relative to the use of this cure as they may desire to secure. I also hold myself ready to make such demonstrations of the cure in my hospital, as may be desired. The time necessary to complete the cure is from three to five days.

I have the honor to be,

Sir,

Your obedient servant,

CHARLES B. TOWNS.

*The President of the International Opium Commission,
Shanghai.*

Reply to Above.

February 24th 1909.

SIR,—I am in receipt of your letter of the 24th of February, and have the honor to say that I shall be interested to present your communication to the members of the International Opium Commission, and I trust that there will be a response as generous as is your offer.

Speaking in behalf of the American Delegation, I would say that we shall be glad to have your formula and its accompanying directions, to the end that it may be of use as it is your manifest desire for the benefit of victims of the opium habit.

Thanking you for your letter and for the offer that it embodies.

I have the honor to be,

Sir,

Your obedient servant,

(Signed) C. H. BRENT,

President of the International Opium Commission.

MR. CHARLES B. TOWNS,
5 *Hongkong Road, Shanghai.*

H.B.M. CONSULATE-GENERAL,
SHANGHAI, *March 6th 1909.*

DEAR MR. T'ANG,—In one of your later speeches during the sittings of the International Opium Commission you quoted me as stating or as being of the opinion that China would be unable to eradicate the production of opium in 10 years. On the contrary, what I hold and have always held is that China will be able to eradicate the production of opium in China, but that the period of 10 years laid down in the Imperial Decree of September 20th 1906 will most certainly be required to accomplish the task.

Yours sincerely,

A. HOSIE.

MR. T'ANG KUO-AN, ETC.,
SHANGHAI.

APPENDIX.

Copies of Telegrams received by the International Opium Commission.

Telegram from the Commercial Association in Soochow to the International Opium Commission at Shanghai:—

“Our association sends sympathy and greetings to the International Opium Commission which has assembled for mutual deliberations for the suppression of the opium evil.”

31st January 1909.

Telegram from the Association for the investigation of opium suppression on behalf of the Local Government Bureau in Soochow to the International Opium Commission at Shanghai:—

“The steps taken for the suppression of opium with the view of securing the absolute eradication of the evil have our deepest sympathy and best wishes for their success.”

31st January 1909.

Telegram from the Anti-Opium Society in Soochow to the International Opium Commission at Shanghai:—

“All classes of people welcome the International Opium Commission who have met together for deliberating measures for the suppression of opium. Our Society entreats that measures will be taken to reduce the period for the suppression of the opium evil so that its poisonous effects may be eradicated as soon as possible.”

31st January 1909.

Telegram from two branch Anti-Opium Societies and two charitable institutions in Chuenchow (Fukien Province) to the International Opium Commission at Shanghai:—

“The efforts to get rid of the opium evil have our deepest sympathy, and their success will bring blessings to the whole world. We therefore telegraph hearty greetings.”

31st January 1909.

Telegram from the Central Anti-Opium Association of Canton and 74 branch associations in Kwantung Province to the International Opium Commission at Shanghai:—

“The poisonous effects of the opium evil are indeed pernicious. Cultivation of opium in this province has already been suppressed, and all classes of society have mutually pledged themselves to get rid of opium entirely. We beg you will reduce the period for the suppression of opium so that the whole world may be rid of the evil once for all.”

31st January 1909.

Telegram from nine Anti-Opium Associations and 12 Philanthropic Associations in Foochow to the International Opium Commission at Shanghai:—

“The desire of all Powers of the world to suppress opium is now known to all and affords us the highest gratification. The cultivation of opium in our country is being everywhere reduced. Our Government desires that opium shall be entirely suppressed by the 2nd year of HSUAN TUNG. We entreat you will pass a resolution prohibiting the importation of opium from the 2nd year of HSUAN TUNG, so that our people may be freed from the opium curse and the cause of civilization may be advanced.”

1st February 1909.

Telegram from the Anti-Opium Society of Chuenshi near Foochow to the International Opium Commission at Shanghai:—

“The righteous object of the International Opium Commission is known all over the world and we are extremely gratified. We entreat you will reduce the period fixed for suppressing the importation of Indian opium in order that the evil effects of its use may be speedily got rid of, and the cause of civilization may be advanced.”

1st February 1909.

Telegram from the Girls' School of the Methodist Mission at Foochow to the International Opium Commission at Shanghai:—

“All our women and children send greetings and best wishes to the International Opium Commission. We entreat that you will adopt measures to shorten the period for abolishing the opium trade, in order that we may forever rid ourselves of the opium evil.”

1st February 1909.

Telegram from the Educational Societies in Soochow to the International Opium Commission at Shanghai:—

“We send hearty greetings to the International Opium Commission whose efforts for the suppression of opium have our best wishes. Our Societies regard with horror the curse of opium and are eagerly looking forward to its abolition.”

1st February 1909.

Telegram from representatives of the Anti-Opium Societies of the districts Chuen and Tseung in Fukien Province, to the Commissioners of all Powers to the International Opium Commission at Shanghai:—

“In the districts of Chuen and Tseung of this province numerous Anti-Opium Associations have been established, and within the period of two years the habit of smoking in these districts has been reduced to a great extent. The efforts for the suppression of opium cultivation mutually enforced by the officials and the people, have gained great progress, but judging from the reports of the other provinces, their results have been even more successful. We entreat you will memorialize the Throne to issue instructions to the officials strictly ordering them to push forward with their utmost energy, the prohibition of opium cultivation within the present year, in order that the evil results of the opium habit may be entirely eradicated. We also entreat you will mutually pass a resolution for prohibiting the importation of opium and morphia to our country before the 2nd year of HSUAN TUNG.”

1st February 1909.

Telegram from Amoy to the President, International Opium Commission, Shanghai:—

“Presidents, members, Anti-Opium Societies Changchou, Chuanchou, Amoy, South Fukien, send greetings, within two years number smokers greatly reduced, dens closed, and by end 1908 poppy cultivation completely interdicted. Tungan military force destroyed crops. We believe opium habit, owing stringent laws and united efforts officials and people, will be eradicated by end 1910. We therefore pray your Excellencies recommend prohibition of importation of opium and morphine and cessation of poppy cultivation from this year. Chenkang, Lintzechien, Linchyunghao, Hwangtingyuan, Yangchingwen, Luwenchi.”

17th February 1909.

Translation of Telegram from the Advisory Bureau in Shansi.

“To the International Opium Commission, Shanghai.”

“We send congratulations to the International Opium Commission which, actuated by philanthropic motives, has met together for the object of eradicating the opium evil from the world, and for assisting China to combat the same evil. Such action has our highest admiration and respect.”

“The opium evil in our province is most widespread. Last autumn our officials and gentry met together and decided that poppy cultivation must cease. Accordingly the crops that were growing in the usual centres of poppy cultivation were pulled up. The time for the spring sowing having come, however, it was feared that attempts might be made at clandestine plantation in the remote districts. A large number of officials and gentry has, therefore, been sent to various localities for the purpose of thorough investigation, in order that the evil may be totally eradicated in our province.

19th February 1909.

Report of Committee on Trade Statistics.

I.

The Committee on Trade Statistics have, as instructed by the Commission, reduced all values to sterling money and all weights to kilogrammes, and beg to present herewith in tabulated form the imports and exports of opium and its derivatives as given in the reports submitted by the various Delegations to the Commission.

SHANGHAI, *February 26 1909.*

The Committee { R. LAIDLAW.
DR. TAKAKI.
J. WETTUM.

NOTE.—The rates of exchange at which the various currencies have been taken are as follows:

1 Straits Dollar	=	2s. 4d.	20 Marks	=	£1
1 Indian Rupee	=	1s. 4d.	13 Tical	=	£1
1 Mexican Dollar	=	2s.	1 Yen	=	2s.
1 Haikwan Tael	=	3s.	24 Kronen	=	£1

12 Gulden	=	£1	4500 Reis	=	£1

II.

REPORT OF THE COMMITTEE APPOINTED TO REPORT ON POPPY CULTIVATION AND THE PRODUCTION OF OPIUM AS GIVEN IN THE REPORTS PRESENTED TO THE INTERNATIONAL OPIUM COMMISSION AT SHANGHAI, FEBRUARY 1909.

I.—*America, United States of.*

(1) America.—No opium is produced, but the poppy has been grown experimentally by the Agricultural Department and 9,000 lbs. or 4,082 kilos. of dry capsules were harvested in 1908.

(2) The Philippine Islands.—The cultivation of the poppy is prohibited.

II.—*Austria-Hungary.*

The cultivation of the poppy is insignificant and there is no production of opium.

III.—*China.*

The poppy is widely cultivated and the following Table of opium production in China is taken from the Chinese Memorandum. The figures given are estimates and the estimates for 1906 and 1908, based on Customs Reports, were compiled together in the autumn of 1908.

PRODUCTION PER PROVINCE.

IV.—France.

- (1) France.—The poppy is cultivated for its seed-oil only.
- (2) Indo-China.—The cultivation of the poppy in Indo-China is carried on on an insignificant scale. The places of production are the Tran-ninh plateau, a few spots of Upper Laos, and the plateau of Dong Van which is conterminous with Yunnan in Upper Tonkin. The estimated production of opium on the Tran-ninh plateau is 400 to 600 kilos. The production of the Dong Van plateau is unimportant and the purchases made by the Customs and "Régies" were 2,062 kilos. in 1907 and 3,088 kilos. in 1908.

V.—Germany.

- (1) The poppy is grown in Germany for its seed and oil extracted therefrom, while the capsules are used to a small extent for medicinal purposes. No opium is produced.
- (2) Kiaochow.—The cultivation of the poppy is prohibited in Kiaochow.

VI.—Great Britain.

- | | | |
|--|---|---|
| (1) There is no cultivation or production in the United Kingdom. | } | No cultivation
and
no production. |
| (2) Canada. | | |
| (3) Ceylon | | |
| (4) Weihaiwei | | |
| (5) Hongkong | | |
| (6) Straits Settlements and Federated Malay States | | |
| (7) Australia | | |

The Report from Australia states that to prevent the production of opium in Australia the Commonwealth Government proposes to introduce a bill into Parliament to prevent the manufacture of opium by imposing a prohibitive excise duty.

- (8) India.—The poppy is cultivated in British India and in the Native States.
 - (a) British India. Under the Bengal Monopoly System the production of opium has been as follows:—

YEAR.	QUANTITY.		
	<i>Lbs.</i>	=	<i>Kilos.</i>
1902-03	10,227,867	=	4,638,804
1903-04	9,179,136	=	4,163,156
1904-05	8,555,081	=	3,880,074
1905-06	8,823,332	=	4,001,783
1906-07	7,665,243	=	3,476,537

- (b) As regards the Native States* the following paragraphs are taken from the Report on India:

—

“The total area under poppy cultivation in the Malwa States cannot be given, as these States have no adequate system of survey and land records, and trustworthy statistics are therefore not obtainable. Certain returns, which must be accepted with reserve, are, however, supplied for the Central India and Rajputana Agencies, and these indicated in 1906-07 a total area under poppy cultivation of about 247,000 acres (99,959 hectares) and a total production of 3¾ million lbs. (or 1,700,796 kilos.). For 1907-08 the corresponding figures were 192,000 acres (77,701 hectares) and a little over 2½ million lbs. (1,133,864 kilos.). The acreage and production, as returned, and in fact also, are very fluctuating, being much affected by seasonal conditions.”

* It should be noted that in the Native States which are mentioned as producing opium, poppy cultivation is not controlled by the Government of India who accordingly do not maintain statistics of production for such areas.

The following figures give the exports of Malwa opium for the calendar years 1902-07:—

1902.	1903.	1904.	1905.	1906.	1907.
<i>Chests.</i> 20,411	<i>Chests.</i> 23,995	<i>Chests.</i> 20,610	<i>Chests.</i> 15,078	<i>Chests.</i> 13,022	<i>Chests.</i> 14,187
<i>Kilos.</i> 1,234,308	<i>Kilos.</i> 1,451,042	<i>Kilos.</i> 1,246,342	<i>Kilos.</i> 911,807	<i>Kilos.</i> 787,475	<i>Kilos.</i> 857,926

“The cultivation of the poppy is also permitted in the Punjab, and (to a nominal extent) in one or two other areas within British India, and is carried on in the Hill States of the Punjab, in Afghanistan, in Kashmir, in Nepal and in the Shan States of Burma. The area and production in these States are not known and cannot be estimated. The cultivation in the Punjab in 1906 amounted to 7,355 acres (2,976 hectares), but will quickly become negligible as it has now been decided within a short period to abolish such cultivation almost entirely, when undertaken for the purpose of producing opium. The existing cultivation is regulated by a licensing system and subject to an acreage duty; and the cultivator is bound to make over the produce to a licensed vendor.”

“The cultivation of the poppy is prohibited in other British provinces and also, by agreement with the ruling Chiefs and subject to various conditions, in other Native States within the borders of British India.”

VII.—Italy.

The cultivation of the poppy is insignificant. Capsules are used for medical purposes. No opium is produced.

VIII.—Japan.

- (1) Japan.—The poppy is cultivated on a small scale in Japan for medicinal use only. During the last decade the average annual yield of opium was 41,886 kilos.
- (2) Formosa.—The cultivation of the poppy is prohibited.

IX.—Netherlands.

- (1) In the Netherlands the poppy is grown for its seed and oil only.
- (2) Netherlands India.—Cultivation is prohibited.

X.—Persia.

The poppy is cultivated in Persia and the estimated annual production of opium is estimated to amount to 10,000 piculs or 604,727 kilos.

XI.—Portugal.

- (1) Portugal.—There is no cultivation of the poppy in Portugal or her Colonies.
- (2) Macao.—There is no cultivation of the poppy in Macao.

XII.—Russia.

XIII.—Siam.

The poppy is not cultivated and there is no production of opium.

III.

REPORT OF THE COMMITTEE ON REVENUE STATISTICS, TARIFFS, EXCISE, ETC.

During its sixth session the International Commission of Opium adopted a Resolution, moved by Dr. HAMILTON WRIGHT, to the effect that a Committee of three members should be appointed to co-ordinate the statistics of revenues derived from opium, as contained in the various reports submitted to the Commission, and to report on this subject.

In conformity with this Resolution a Committee was appointed by the President of the Commission, the members of same being Mons. CORNILLON, Dr. ROESSLER, and LUANG VISUTR KOSA.

The said Committee has drawn up and begs to present the following report, in which the various countries represented, and their possessions, have been classified under three headings, viz. :—

- (1.) Countries which derive revenue from the production and the consumption of opium as well as from the import of the same drug.
- (2.) Countries which derive revenue from opium through Customs duties only.
- (3.) Countries which derive no revenue from opium.

I.

COUNTRIES WHICH DERIVE REVENUE FROM THE PRODUCTION AND THE CONSUMPTION OF OPIUM AS WELL AS FROM THE IMPORT OF THE SAME DRUG.

A.—CHINA.

(a) *Rates.*—Areas under poppy cultivation are not submitted to any other taxation than land-tax, the rate of which has not been furnished.

Opium, as circulating inside the boundaries of China is submitted to a tax of "likin," the rate being £13/20 per 60 kilos.

Import duty on opium is £3/15 per 60 kilos. In addition to this tax and at the same time another duty, representative of likin duty, is levied at the rate of £3/5 per 60 kilos.

The rate of *Export* duty, levied chiefly at Mengtsh on opium sent to Tonkin and at Chungking, on opium sent to Ichang, is £2/10 per 60 kilos. Before the introduction of the Kaochuan Regulations in 1906, the opium exported from Chungking to Ichang paid also at the latter port on arrival duty of £1/15 per 60 kilos.

(b) *Revenue.*—The taxes levied by provincial authorities, likin, licences for sale, etc., amount annually to about £3,000,000.

Here below is a table showing the amount of taxes levied on opium by the Imperial Maritime Customs during the five years 1903–07.

DUTY AND LIKIN COLLECTED ON NATIVE AND FOREIGN OPIUM, 1903–07.

YEAR.	NATIVE OPIUM.		FOREIGN OPIUM.		TOTAL.
	<i>Duty</i> £	<i>Likin</i> * £	<i>Duty</i> £	<i>Likin</i> £	
1903	70,186	44	264,664	705,716	1,040,590
1904	138,063	27	246,482	657,286	1,041,858
1905	171,820	10	233,658	623,098	1,028,586
1906	107,209	5	243,589	649,507	1,000,310
1907	22,529	2	245,861	655,629	924,021

(c) *Proportion to total Revenue.*—The Committee has not been supplied with any figures showing the total yearly revenue of China and, therefore, cannot undertake to establish the percentage of opium to general revenue.

* Under Likin is entered the additional duty levied at the rate of £2/10 per 60 kilos, on opium which at the time of exportation cannot be shown to have paid inland dues. This levy in recent years has been confined to Mengtsh where the Tungshui Regulations are not operative. Before the introduction of these Regulations the levy was occasionally made at other ports.

B.—FRANCE. (*Indo-China*).

Opium can be imported into French Indo-China only by the official administration of "Customs and Excise (Régies)" who buys it only as crude opium.

The manufacture of chandu, or prepared opium, is a Government Monopoly, entrusted to the administration of Customs and Régies, which has but a single boiling factory at Saigon.

The sale of opium, exclusively manufactured by the Government, may be entrusted to bonded store-keepers, wholesale and retail dealers, chosen by the Government which also determines prices and conditions of sale.

Sales prices are different according to localities, but, as an average, the duty levied may be valued at £4/10 per kilo.

	1903	1904	1905	1906	1907
	£	£	£	£	£
Revenue derived from opium	418,548	515,412	425,412	442,800	579,120
Total Revenue.....	3,156,000	3,130,000	3,049,200	2,722,900	3,382,000
Percentage of opium Revenue to total Revenue.	13.26	16.46	13.95	16.25	17.11

C.—GERMANY (*Kiaochow*).

The opium shops and divans are licensed by the Government.

The only shop holding a license has to pay \$500 annually.

Licenses are also issued to persons wishing to smoke at home.

The import duty on raw opium is collected by the Imperial Chinese Maritime Customs on the basis of the Chinese import tariff. Of the duty thus collected 20 per cent. is handed over to the Government.

The following table shows the Total Revenue of the Colony and the Revenue derived from opium :—

	1903-04	1904-05	1905-06	1906-07
	£	£	£	£
Revenue derived from opium	1,658	2,035	1,812	1,033
Total Revenue	21,838	37,039	60,209	77,324
Percentage.....	7.5	5.4	3	1.3

D.—GREAT BRITAIN.

1°. CEYLON.

Up to 1st January 1909 opium has been sold by licensed shops. The Customs duty was Rs. 3 per pound.

According to the "Correspondence relating to the consumption of opium in Ceylon" (presented to both Houses of Parliament) the Revenue derived from opium in 1906 was Rs. 122,187 for licenses and Rs. 37,770 for import duties making a total of Rs. 159,957 or £10,663, 16s.

No other figures have been reported.

2. HONGKONG.

The exclusive right of preparing opium and of selling it within the Colony is leased to a farmer for a term of three years ending the 28th of February 1910 at a rental of \$121,000 a month.

	1903	1904	1905	1906	1907
	£	£	£	£	£

Percentage of Opium Revenue to total Revenue	14.35	28.42	29.51	29.02	23.51

1 Dollar Mexican equal to 2s.

3°. INDIA.

The production of BENGAL OPIUM is a Government monopoly. The cultivation of the poppy is permitted only under license and the cultivator is bound to sell the whole of his outturn at a fixed rate to the Government. The opium is manufactured in Government factories either for export or for local consumption in India. The opium for export is sold by auction in Calcutta and the difference between the price and the cost of manufacture constitutes the direct duty which the Indian Government realize on the export of Bengal Opium to foreign countries. The cost of a chest containing 59.86 kg. (135 lbs.) Opium is about Rs. 500 or £35, 16s. 8d. and the average price realized in the last 10 years at the sales was Rs. 1297½ (£86, 70s.)

The opium manufactured for local consumption is supplied to licensed vendors at a fixed price and the right of retail vend is usually disposed of by auction, shops being sold singly or in groups. The cost price is calculated at Rs. 8½ or 11s. 4d. a seer (0.93 kg.) and the issue prices to retail vendors varies between Rs. 16 and 37 (£1, 1s. 4d. and £2, 9s. 4d.) a seer (0.93 kg.).

MALWA OPIUM is used in the numerous Native States and in the province of Bombay; its use in other provinces is prohibited. If purchased for consumption in British India it pays a pass duty of Rs. 700 or £46, 13s. 4d. a chest (59.86 kg.) and if intended for export it pays Rs. 600 or £40 a chest.

The import duty on foreign opium is Rs. 34 or £2, 5s. 4d. a seer (0.93 kg.).

The annual net Revenue derived by the Indian Government from the export trade averaged £3,446,868 in the five years ending with 1905-06; £2¾ millions may be regarded as approximately representing the revenue obtained from exports to China. The Revenue from excise on local consumption stands now at close on £1 million a year.

To a considerable number of Native States the Revenue derived directly or indirectly from opium is believed to be of substantial importance. The figures, however, have not been reported

Total Revenue (gross)	70,967,579	71,107,293	70,841,869	73,144,554	70,989,200
Percentage of Opium Revenue to total Revenue	6.1	6.9	6.3	6.3	6.4

1 Rupee equal to 1s. 4d.

- 1.—The figures are given for the fiscal years (1st April to 31st March).
- 2.—The figures of Revenue derived from opium are composed by—
 - (a) the net Revenue from the export trade and
 - (b) Revenue from the excise on internal consumption.

4°. THE STRAITS SETTLEMENTS.

In each of the Straits Settlements—Singapore, Penang, and Malacca—the preparation, sale, import, and export of prepared opium and the purchase of opium dross are let to a farmer for a term of three years. Shops for the retail of prepared and dross opium are licensed by the Government, the cost of a license being \$12 per annum. Opium-smoking divans with a license to retail prepared and dross opium are also licensed by the Government at an annual fee of from \$24 to \$36.

FEDERATED MALAY STATES.

In the Federated Malay States of Perak, Selangor, and Negri Sembilan an import duty of \$560 (£65, 6s. 8d.) per chest of 40 balls on raw opium is collected in the inland districts by the Government and the Government issues also licenses to prepare and deal in prepared opium. For a license to manufacture and retail prepared opium for consumption on or off the premises the fee is \$60 per annum; to manufacture and retail prepared opium for consumption off the premises \$60; to retail prepared opium for consumption on the premises \$48; and to retail prepared opium for consumption off the premises \$24.

In the coast districts the revenue consists of an import duty of \$560 (£65, 6s. 8d.) per chest collected by the Government and the proceeds of a monopoly of prepared opium which is farmed to syndicates who have the exclusive right of preparing, selling, and licensing others to sell prepared opium.

In the Eastern State of Pahang the import duty on opium is \$440 (£51, 6s. 8d.) per chest, but its collection is leased to a syndicate. The monopoly of prepared opium is also farmed to a syndicate as in the coast districts of the Western States.

5°. STRAITS SETTLEMENTS.

	1903	1904	1905	1906	1907
	£	£	£	£	£
Revenue derived from Opium	337,110	741,734	626,376	597,975	?

Revenue to total Revenue ...	—	—	—	—	—

1 Dollar Straits Currency equal to 2s. 4d.

6°. FEDERATED MALAY STATES.

	1903	1904	1905	1906	1907
	£	£	£	£	£
Revenue derived from Opium	309,529	262,031	268,002	335,224	321,776
Total Revenue.....	2,592,992	2,541,738	2,734,226	3,100,155	3,286,770
Percentage of Opium Revenue to total Revenue	11.9	11.9	12.2	10.8	9.8

1 Dollar (Straits Currency) equal to 2s. 4d.

The figures do not include the Revenue of the State of Pahang.

As the annual average import for the five years in question was about 200 chests the amount of revenue derived from import duties would be about £10,266.

7°. WEIHAIWEI.

The preparation of raw opium for smoking and the sale of prepared opium are let to a farmer for a term of years. Divans are licensed by the Government.

The figures showing the revenue derived from opium have not been reported.

E.—NETHERLANDS-INDIA.

The opium sold by the Régie is manufactured in a factory built especially for the purpose. The necessary raw opium has to be imported from abroad, as the growing of the poppy is prohibited throughout the colony. The Benares opium is bought at Calcutta and the Turkish opium is purchased through the medium of the mother country. Some years hence the use of Turkish opium will be abolished.

The chandu from the factory consists of a mixture of both kinds of opium mentioned, a small percentage of dross and a most trifling quantity of sugar.

The cost and profits of the Régie have been in 1907—

Cost.....	£387,750
Gross profits	1,497,500

Nets profits of the Régie 1,109,750

	1905	1906	1907

II.

COUNTRIES DERIVING FROM OPIUM ONLY BY WAY OF CUSTOMS DUTIES.

A.—United States of America.

The duty on opium is as follows:—

Crude Opium	\$1 (4s.) per pound.
Smoking Opium	\$6 (£1, 4s.) per pound.

Moreover, an internal revenue tax of \$10 or £2 is imposed on smoking opium manufactured in the United States of America.

The average annual revenue derived from opium has been \$1,425,134 or £285,027 during the last eight years.

Austria-Hungary.

The import duty for opium and its derivatives is 36 Kronen or £1, 12s. per 100 kg.

B.—*Great Britain—1° Australia.*

No statement as to tariffs, excise, etc., has been submitted.
The revenue derived from opium has not been reported.

2°. *Canada.*

The duty on opium previous to the enactment of the prohibition Act of the 20th of July, 1908 was as follows:—

Opium crude (the outer ball or covering to be duty free) per lb. \$1 or 4s.
 „ powdered per lb. \$1.35 or 5s. 8d.
 „ prepared for smoking „ \$5 or £1

The following table shows the amount of revenue derived from duties on opium:—

—	1903-04	1904-05	1905-06	1906-07	1907-08
Revenue derived from Opium..	\$ 8,435	\$ 7,332	\$ 9,773	\$ 11,314	\$ 18,178

C.—*France.*

The import duty for opium for medicinal purposes is £4 per 100 kg.

D.—*Italy.*

The import duty for opium for medicinal purposes is £4, 16s. od. per 100 kg.

E.—*Netherlands (in Europe).*

The import duty on opium for medical purposes is 6 per cent. *ad valorem*.

III.

COUNTRIES DERIVING NO REVENUE FROM OPIUM.

IV.

REPORT OF COMMITTEE ON "EXISTING INTERNATIONAL AGREEMENTS COVERING THE TRAFFIC IN OPIUM AND ITS DERIVATIVES."

Your Committee reports the following extracts from Treaties and other International Agreements bearing on the traffic in opium and its derivatives. In cases where such texts were unobtainable, the summaries given in official documents of arrangements in question are presented.

The Committee desires to add that their report does not claim to be an exhaustive presentation of all the clauses that may be contained in existing International Acts. It is quite possible that some such compacts bearing on the subject have escaped its attention, and the Committee, therefore, begs your indulgence for such omissions as may have occurred.

(1.) The American Treaty with China of the 17th of November 1880, Article II of which reads:—

"The Governments of China and of the United States mutually agree and undertake that Chinese subjects shall not be permitted to import opium into any of the ports of the United States; and citizens of the United States shall not be permitted to import opium into any of the open ports of China, to transport it from one open port to any other open port, or to buy and sell opium in any of the open ports of China. This absolute prohibition, which extends to vessels owned by the citizens or subjects of either power, to foreign vessels employed by them, or to vessels owned by the citizens or subjects of either Power, and employed by other persons for the transportation of opium, shall be enforced by appropriate legislation on the part of China and the United States; and the benefits of the favored nation clause in existing Treaties shall not be claimed by the citizens or subjects of either Power as against the provisions of this article."

(2.) The Treaties of Korea with the United States of America, Austria-Hungary, Belgium, China, Denmark, France, Germany, Great Britain and Italy. Article VII of the American Treaty with Korea of the 22nd of May 1882, is worded like Article II of the Treaty with China just quoted and need not be repeated. By the Treaties of Korea with Austria-Hungary, Belgium, China, Denmark, France, Germany, Great Britain and Italy, the importation of opium into Korea is prohibited "except for medicinal purposes."

Article XXXVI of the Agreement between Japan and Korea of 1905 reads:—

"The importation of opium is strictly prohibited. All opium smuggled or attempted to be smuggled shall be forfeited, and in addition to this forfeiture, a fine of 7,000 mon shall be paid for every catty so smuggled or attempted to be smuggled. Opium, imported under the guarantee of the Japanese Consul for the use of the Korean Government, or for the medical purposes of Japanese residents in Korea, is not included in this regulation."

(3.) The Agreement concerning the Land Trade between Russia and China, of 1881.

"Article 15.—Sont prohibés tant pour l'importation que pour l'exportation, et sont sujets à confiscation dans le cas de transport en contrebande, les articles suivants :
.....L'opium."

(4.) The Burma Frontier and Trade Convention between Great Britain and China, 1894:—

"Article XI:—

"The exportation from Burma into China of salt is prohibited.

"The exportation from China into Burma of cash, rice, pulse, and grain of every kind is prohibited.

"The importation and exportation across the frontier of opium and spirituous liquors is prohibited, except in small quantities for the personal use of travellers. The amount to be permitted will be settled under Customs Regulations.

"Infractions of the conditions set forth in this and the preceding article will be punishable by confiscation of all the goods concerned."

(5.) The Additional Commercial Convention between France and China of 1887:—

“Article V. Le Gouvernement chinois autorise l'exportation de l'opium indigène au Tonkin par la frontière de terre, moyennant un droit d'exportation de vingt tael par picul ou cent livres chinoises. Les Français ou protégés français ne pourront acheter l'opium qu'à Longtcheou, Mongtseu et Manhao. Les droits de likin et de barrières que les commerçants indigènes auront à payer sur ce produit, ne dépasseront pas vingt tael par picul.

“Les commerçants chinois qui auront apporté l'opium de l'intérieur, remettent à l'acheteur en même temps que la marchandise, les reçus constatant que le likin a été intégralement acquitté, et l'acheteur présentera ces reçus à la Douane, qui les annulera au moment où il effectuera le paiement du droit d'exportation.

“Il est entendu que cet opium, dans le cas où il rentrerait en Chine, soit par la frontière de terre soit par un des ports ouverts, ne pourra être assimilé aux produits d'origine chinoise réimportés.”

(6.) The additional Article to the Chefoo Convention, 1885:—

“2.—In lieu of the arrangement respecting opium proposed in clause (iii) of Section III of the Chefoo Agreement, it is agreed that foreign opium, when imported into China, shall be taken cognizance of by the Imperial Maritime Customs, and shall be deposited in bond, either in warehouses or receiving hulks which have been approved of by the Customs, and that it shall not be removed thence until there shall have been paid to the Customs the tariff duty of 30 tael per chest of 100 catties, and also a sum not exceeding 80 tael per like chest as likin.

“3.—It was agreed that the aforesaid import and likin duties having been paid, the owner shall be allowed to have the opium repacked in bond under the supervision of the Customs, and put into packages of such assorted sizes as he may select from such sizes as shall have been agreed upon by the Customs authorities and British Consul at the port of entry.

“The Customs shall then, if required, issue gratuitously to the owner a transit certificate for each such package, or one for any number of packages, at the option of the owner.

“Such certificate shall free the opium to which it applies from the imposition of any further tax or duty whilst in transport in the interior, provided that the package has not been opened, and that the Customs seals, marks and numbers on the packages have not been effaced or tampered with.

“Such certificate shall have validity only in the hands of Chinese subjects, and shall not entitle foreigners to convey or accompany any opium in which they may be interested into the interior.

“4.—It is agreed that the regulations under which the said certificates are to be issued shall be the same for all the ports, and that the form shall be as follows:—

“OPIUM TRANSIT CERTIFICATE.

“This is to certify that tariff and likin duties at the rate of tael per chest of 100 catties have been paid on the opium marked and numbered as under; and that, in conformity with the Additional Article signed at London the 18th July 1885, and appended to the Agreement between China and Great Britain signed at Chefoo the 13th September 1876, and approved by the Imperial Decree printed on the back hereof, the production of this certificate will exempt the opium to which it refers, wherever it may be found, from the imposition of any further tax or duty whatever, provided that the packages are unbroken, and the Customs seals, marks, and numbers have not been effaced or tampered with.

“ Mark.	No.	
X	—	oo packages.

“ Port of entry,

“ Date

“ Signature of Commissioner of Customs.

“5.—The Chinese Government undertakes that when the package shall have been opened at the place of consumption the Opium shall not be subjected to any tax or contribution, direct or indirect, other than or in excess of such tax or contribution as is or may hereafter be levied on native opium.

“In the event of such tax or contribution being calculated *ad valorem* the same rate, value for value, shall be assessed on foreign and native opium, and in ascertaining

for this purpose the value of foreign opium the amount paid on it for likin at the port of entry shall be deducted from market value.

"6.—It is agreed that the present additional article shall be considered as forming part of the Chefoo Agreement, and that it shall have the same force and validity as if it were inserted therein word for word.

"It shall come into operation six months after its signature, provided the ratifications have then been exchanged, or if they have not then on the date at which such exchange takes place.

"7.—The arrangement respecting opium contained in the present additional article shall remain binding for four years, after the expiration of which period either Government may at any time give twelve months notice of its desire to terminate it, and such notice being given, it shall terminate accordingly.

"It is, however, agreed that the Government of Great Britain shall have the right to terminate the same at any time, should the transit certificate be found not to confer on the opium complete exemption from all taxation whatsoever whilst being carried from the port of entry to the place of consumption in the interior.

"In the event of the termination of the present additional article the arrangement with regard to opium now in force under the regulations attached to the Treaty of Tientsin shall revive."

(7.) The Treaties of Siam with other countries. Article VIII of the Treaty of Friendship and Commerce between Siam and Great Britain (signed at Bangkok on April 18th 1855) reads :—

"Opium may be imported free of duty, but can only be sold to the opium farmer or his agents. In the event of no arrangement being effected with them for the sale of the opium, it shall be re-exported, and no impost or duty shall be levied thereon. Any infringement of this regulation shall subject the opium to seizure and confiscation."

(8.) The Commercial Treaty between Great Britain and China of 1902 :—

"Article VIII. Section 4.

"Foreign opium duty and present likin—which latter will now become a surtax in lieu of likin—shall remain as provided for by existing Treaties.

"Section 5.—The British Government have no intention whatever of interfering with China's right to tax native opium, but it is essential to declare that, in her arrangements for levying such taxation, China will not subject other goods to taxation, delay, or stoppage.

"China is free to retain at important points on the borders of each province—either on land or water—offices for collecting duty on native opium, where duties or contributions leviable shall be paid in one lump sum; which payment shall cover taxation of all kinds within that province. Each cake of opium will have a stamp affixed as evidence of duty payment. Excise officers and police may be employed in connection with these offices; but no barriers or other obstructions are to be erected, and the excise officers or police of these offices shall not stop or molest any other kinds of goods, or collect taxes thereon.

"A list of these offices shall be drawn up and communicated to the British Government for record."

(9.) The Agreement between Great Britain and China regarding the trade in Prepared Opium between Hongkong and China. This Agreement is summarized on page 5 of the British "Parliamentary Papers," China No. 2 (1908) in the following language :—

"In regard to the trade in prepared opium between China and Hongkong, it was decided that each country should take steps to prevent smuggling into its own territory, and that the trade in prepared opium should be prohibited. The Chinese Government have issued the necessary instructions in the matter, and the Government of Hongkong are now preparing the legislation required for the purpose."

Article 2 of the Hongkong Ordinance No. 13 of 1908, dated the 3rd of July, 1908, reads as follows :—

"From and after the coming into operation of this ordinance it shall be unlawful for the Opium Farmer, his licensees or any other persons whomsoever, to export or cause to be exported prepared opium from the Colony to China or French Indo-China and any person violating the provisions of this section shall be liable on summary conviction to the penalties imposed under Section 52 of the Principal Ordinance. Provided always that this section shall not be construed as applying to the possession

by a passenger by steamer from Hongkong to China or French Indo-China of a quantity of prepared opium to be used for personal consumption on the voyage, not exceeding five mace for every day of duration of the voyage."

(10.) The Agreement between Great Britain and China in regard to the trade in opium between India and China. This Agreement is summarized on page 4 of the British "Parliamentary Papers" China No. 2 (1908) in the following language:—

"The Indian Government reduce the gross export from India, taken on the basis of 67,000 chests, of which 51,000 chests only were exported to China by 5,100 per annum, being one-tenth of the latter amount, to commence from 1908, an arrangement which continues for three years, and will be proceeded with until the export trade from India to China thus extinguishes itself automatically within the ten years' limit prescribed by the Chinese Government for the abolition of opium in China, provided always that China during these three years has proportionately reduced the production and consumption of Chinese opium, and has similarly arranged for the reduction of the importation of Turkish and other opium. The good-will of the Indian Government was manifested by the practical application of the proposed annual reduction of export without waiting for the conclusion by the Chinese Government of arrangements for the reduction of the import of Turkish, Persian, and other opium, which chiefly finds its way to China via Hongkong. This latter question has been settled in the following just and reasonable manner by the Chinese Government, neither Turkey nor Persia being Treaty Powers, the system adopted being similar to that now in force in regard to Indian opium.

"From the 1st January, 1909, any merchant wishing to import into any open port in China any Persian or Turkish opium must apply to the Commissioner of Customs at Kowloon for a special permit—one for each chest of opium. This permit shall state that the opium may be shipped to any open port in China, and that, on its arrival, duty and likin will be paid in accordance with the regulations. Any Persian or Turkish opium shipped to China for which this special permit cannot be produced shall be confiscated.

"Taking 1,125 piculs as the mean annual import of Persian and Turkish opium, this quantity shall be reduced every year by one-ninth, *i.e.*, 125 piculs. Thus in 1909 special permits will only be issued for 1,000 piculs, and by making a similar reduction annually the import will entirely cease in nine years.

"After 1916 no more special permits will be issued, and the import into China of Persian and Turkish opium, as well as that of Indian opium will be completely suspended.

"The special permits will only be issued to merchants who have hitherto, to the knowledge of the Imperial Maritime Customs, been engaged in the trade in Turkish and Persian opium. In fixing the number of special permits to be issued annually to each merchant, the total import during the two years 1906-07, and the quantities imported by each merchant during those years, will be taken as a basis, the number of permits being annually decreased."

(11.) The Agreements in regard to the trade in Morphia.

These Agreements are embodied in Article XI of the Commercial Treaty between Great Britain and China of the 5th of September 1902, and in Article XVI of the Commercial Treaty between China and the United States of America of the 8th of October 1903. Article XI of the British Commercial Treaty of 1902 reads:—

"His Britannic Majesty's Government agree to the prohibition of the general importation of morphia into China, on condition, however, that the Chinese Government will allow of its importation, on payment of the tariff import duty and under special permit, by duly qualified British medical practitioners and for the use of hospitals, or by British chemists and druggists who shall only be permitted to sell it in small quantities and on receipt of a requisition signed by a duly qualified foreign medical practitioner.

"The special permits above referred to will be granted to an intending importer on his signing a bond before a British Consul guaranteeing the fulfilment of these conditions. Should an importer be found guilty before a British Consul of a breach of his bond, he will not be entitled to take out another permit. Any British subject importing morphia without a permit shall be liable to have such morphia confiscated.

"This Article will come into operation on all other Treaty Powers agreeing to its conditions, but any morphia actually shipped before that date will not be affected by this prohibition.

“The Chinese Government on their side undertake to adopt measures at once to prevent the manufacture of morphia in China.”

American Commercial Treaty of 1903 :—

“Article XVI. The Government of the United States consents to the prohibition by the Government of China of the importation into China of morphia and of instruments for its injection, excepting morphia and instruments for its injection imported for medical purposes, on payment of tariff duty, and under regulations to be framed by China which shall effectually restrict the use of such import to the said purposes. This prohibition shall be uniformly applied to such importation from all countries. The Chinese Government undertakes to adopt at once measures to prevent the manufacture in China of morphia and of instruments for its injection.”

The consent of all the Treaty Powers having been obtained, the following notification was issued by the Imperial Maritime Customs of China :—

“MORPHIA REGULATIONS.

“On and after the 1st January 1909, the manufacture in China by Chinese and foreigners of morphia, and of syringes, needles, and such-like instruments for its use, is absolutely prohibited; and the importation of the same into China by Chinese and foreigners is likewise prohibited, except in the case of duly qualified foreign medical practitioners and foreign chemists and druggists complying with the following conditions :—

- “1°. Duly qualified foreign medical practitioners desiring to import morphia and/or instruments for its use must sign a Bond before their Consul stating the quantities to be imported and their values, the place whence arriving and the method of importation, whether by steamer (the name of which must be given), rail, or post, and guaranteeing that these articles will be employed for medicinal purposes only, either in their private practice or in some specified hospital. Upon the Consul forwarding the Bond to the Custom House a special landing permit will be issued after payment of duty.
- “2°. Foreign chemists and druggists desiring to import morphia and/or instruments for its use must sign a Bond before their Consul stating the quantities to be imported and their values, the place whence arriving and the method of importation, whether by steamer (the name of which must be given), rail, or post, and guaranteeing that these articles will be used exclusively in the compounding of prescriptions or sold in small quantities only on the requisition of a duly qualified foreign medical practitioner. Upon the Consul forwarding the Bond to the Custom House a special landing permit will be issued after payment of duty.
- “3°. Any such importer of morphia and/or instruments for its use found dealing with—or selling—such, otherwise than in accordance with the terms of his Bond, will not be permitted to make any further importation.
- “4°. All morphia and/or instruments for its use landed without Customs Special Permit will be confiscated.
- “5°. Duty on morphia and instruments for its use imported under the above provisions will be levied at the reduced rate of 5 per cent. *ad valorem*.

(12.) The Agreement between Great Britain and China regarding the consumption of opium in the Foreign Settlements.

This is summarized in British Parliamentary Papers, China No. 2, 1908, in the following language :—

“In regard to the suppression of opium in foreign Concessions, no dens exist in any British Concession, and the few opium shops which still exist in the British Concession at Chinkiang have only received their licenses for this year; they will not be renewed, and are revocable with compensation at any moment.

“ At Shanghai the question of the opium dens in the International Settlement has been at last settled, and both the Viceroy and the Shanghai Missionary Association have expressed their satisfaction with the solution. They are to be reduced by a quarter, commencing from the 1st July 1908, this being part of a programme of periodical reductions which will extend over a term of two years, or possibly less.”

(13.)—The Agreement between China and Portugal regarding the Opium Trade at Macao.

AGREEMENT.

Appended to the Treaty of Amity and Commerce concluded between Portugal and China on the 1st December 1887.

The basis of the co-operation to be given to China by Portugal in the collection of duties on opium conveyed from Macao to Chinese ports, having been fixed by a Convention appended to the Treaty of Amity and Commerce concluded between China and Portugal on the 1st December 1887, and it being now convenient to come to an understanding upon some points relating to the said co-operation as well as to fix rules for the treatment of Chinese junks trading with Macao, BERNARDO PINHEIRO CORREA DE MELLO, Secretary of the Special Mission of His Most Faithful Majesty in Peking, duly authorized by his Excellency THOMAZ DE SOUZA ROZA, Chief of the said Mission, and Sir ROBERT HART, K.C.M.G., Inspector-General of the Chinese Imperial Maritime Customs, provided with the necessary instructions from the Chinese Government, have agreed on the following:—

1.—An office under a Commissioner, appointed by the Foreign Inspectorate of the Imperial Maritime Customs, shall be established at a convenient spot on Chinese territory, for the sale of opium duty certificate, to be freely sold to Macao merchants, and for such quantities of opium as they may require. The said Commissioners will also administer the Custom stations near Macao.

2.—Opium accompanied by such certificates, at the rate of not more than one hundred and ten taels per picul shall be free from all other imposts of every sort, and have all the benefits stipulated for by the Additional Article of the Chefoo Convention between China and Great Britain, on behalf of opium on which duty has been paid at one of the ports of China, and may be made up in sealed parcels at the option of the purchaser.

3.—The Commissioner of Customs, responsible for the management of the Custom stations, shall investigate and settle any complaint made by Chinese merchants of Macao against the Custom stations or revenue cruisers.

The Governor of Macao, if it deems it advisable, shall be entitled to send an officer of Macao to be present and assist in the investigation and decision. If, however, they do not agree, a reference may be made to the Authorities at Peking for a joint decision.

4.—Junks trading between Chinese ports and Macao, and their cargoes, shall not be subject to any dues or duties in excess of those leviable on junks and their cargoes, trading between Chinese ports and Hongkong, and no dues whatsoever shall be demanded from junks proceeding to Macao from ports in China, or coming from Macao to ports in China, over and above the dues paid, or payable, at the ports of clearance or destination. Chinese produce which has paid Customs duties and likin tax, before entering Macao, may be re-exported from Macao to Chinese ports without paying Customs duties and likin tax again, and will only be subject to the payment of the tax named “Siao-hao.”

In witness whereof, this agreement has been written in Portuguese and English and signed in duplicate at Peking this the first day of December 1887.

(Signed) BERNARDO PINHEIRO CORREA DE MELLO,
Secretary of the Special Mission of H.M.F.M.

(Signed) SIR ROBERT HART,
Inspector General of Chinese I.M.C.

SUMMARY OF REPORT.

- 1.—China and the United States, 1880.

Agreement concerning the publication of the Minutes and Reports of the International Opium Commission.

This Agreement made at Shanghai, this Ninth day of March, One thousand nine hundred and nine, between Fred. W. Carey, Secretary of the Opium Commission of the one part and Harry L. Giller, Secretary of the "North-China Daily News & Herald, Limited" of the other part WITNESSETH and it is hereby mutually agreed as follows:—

1.—The "North-China Daily News & Herald, Limited" agrees to print the Minutes and Reports of the Opium Commission and present the members thereof with one hundred and fifty copies of the Minutes and one hundred and fifty copies of the Reports (with Minutes incorporated) printed on good paper and bound in paper covers in two volumes.

2.—The Opium Commission agrees to purchase outright and pay locally for eight hundred and fifty copies of the said Reports (with Minutes incorporated) at the rate of Mexican dollars five per copy and further agrees to the unrestricted sale by the "North-China Daily News & Herald, Limited" on its own account and entirely for its benefit in China, Great Britain and the United States of America and elsewhere of an unlimited number of copies of the same at a price retail to the public not exceeding Mexican dollars five in China, ten shillings in Great Britain, and Gold dollars two and a half in the United States of America.

3.—The Opium Commission reserves to itself the right of translation and publication of these Reports (with Minutes incorporated) in French or any other language.

4.—This Agreement does not in any way prejudice or alienate any rights of publication of these Reports and Minutes which the Opium Commission may possess or hereafter acquire.

OPIUM PROBLEM.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

TRANSMITTING

FROM THE SECRETARY OF STATE A REPORT ON THE INTERNATIONAL OPIUM COMMISSION AND ON THE OPIUM PROBLEM AS SEEN WITHIN THE UNITED STATES AND ITS POSSESSIONS, PREPARED BY MR. HAMILTON WRIGHT ON BEHALF OF THE AMERICAN DELEGATES TO THE SAID COMMISSION, HELD AT SHANGHAI IN FEBRUARY, 1909.

FEBRUARY 21, 1910.—Read; referred to the Committee on Foreign Relations and ordered to be printed.

To the Senate and the House of Representatives:

I transmit herewith a communication from the Secretary of State transmitting a report on the International Opium Commission and on the opium problem as seen within the United States and its possessions, prepared by Mr. Hamilton Wright on behalf of the American delegates to the said commission, held at Shanghai in February, 1909. In reference to this report the Secretary of State makes certain recommendations regarding an appropriation and other legislative action, which I commend to the Congress with my approval and the request that action should be taken accordingly.

WM. H. TAFT.

THE WHITE HOUSE, *February 21, 1910.*

The PRESIDENT:

I have the honor to transmit herewith a report by Mr. Hamilton Wright on behalf of the American delegates to the International Opium Commission of 1909, submitting the proceedings and resolutions of the commission, which was held at Shanghai, China, from February 1 to February 26, 1909, the American delegates being the Right Rev. Charles H. Brent, Protestant-Episcopal bishop of the Philippine Islands, Mr. Wright, and Mr. Charles D. Tenney, Chinese secretary of the American legation at Peking; and reviewing exhaustively the opium problem as seen within the United States and its possessions.

The document sets forth and discusses the act of Congress creating the commission, and the instructions to the American delegates; the treaties and other laws internationally restricting the opium traffic; the tariff, internal revenue, and other statutes covering the trade in opium, its derivatives, and other habit-forming drugs in the United States and its possessions; the great increase in the importation of opium into the United States compared with the increase in population; the action of the United States in regard to the domestic opium problem before the assembling of the commission, resulting in the opium-exclusion act of February 9, 1909, by which the importation of opium into the United States except for medicinal purposes was absolutely prohibited; the resolutions adopted by the International Opium Commission; the proposed international conference for the purpose of carrying these resolutions into an international convention; together with a tentative programme of legislation to regulate the importation, manufacture, and distribution in interstate commerce of habit-forming drugs, to impose additional internal-revenue taxation, and incidental regulation on the manufacture of smoking opium within the United States, and to extend the present pharmacy act of the District of Columbia, in substance, to the consular districts of the United States in China.

Summarizing the report as to our previous international relations and the domestic problem in regard to opium and other habit-forming drugs, it is to be observed that the opium traffic in the Far East has been steadily discountenanced by the United States through treaties made which restrict or prohibit American citizens from engaging in that traffic, and by a comparatively recent law to prevent the sale of opium and other illicit articles to the unprotected natives of certain of the Pacific Islands. On the other hand, by permitting the importation of opium prepared for smoking into this country under the dutiable schedules or at times upon the free list, this Government had for half a century unwittingly encouraged the use of this form of opium to the great detriment of Chinese immigrants and to the growing danger not only of the criminal and defective classes, but of the higher ranks of society. Incidental to the unrestricted importation of medicinal opium, the manufacture of morphia had come to be a monopoly of American manufactures with an enormous growth in production, so that as a notorious fact large numbers of people in all social ranks had become debauched by the misuse of it. Although nearly every State in the Union, and many municipalities, had from time to time passed stringent pharmacy or police laws to control the misuse of the different forms of opium, those laws were largely ineffective because the Federal Government had made no attempt to control the importation and manufacture or distribution of the drug in interstate commerce. A new drug problem appeared about twenty years ago, growing out of the discovery and surgical use of cocaine, which has proved to be a creator of criminals and of unusual forms of violence and has been a potent incentive in driving the primitive classes of the community all over the country to abnormal crimes. Thoughtful persons, including the importers and manufacturers of these habit-forming drugs, have reached the conclusion that the time has arrived for a strict federal control of the traffic. As a result of these facts, elicited by the preliminary investigations of the opium commission, the act of February 9, 1909, "to prohibit the

importation and use of opium for other than medicinal purposes," was passed, and the regulations authorized thereby define the various terms used and enforce the purpose and intent of the law.

Expressing the view that the lack of general and uniform state laws to prohibit the manufacture as well as the use of opium prepared for smoking and the proper use of other forms of opium is a question for the urgent attention of the States, the report submits that "until uniform and effective state legislation is an accomplished fact it would seem to be the duty of the National Government to devise measures to supplement and complete the law of February 9, 1909," and thereupon proposes tentative drafts of acts to govern interstate traffic in habit-forming drugs and to tax the manufacture of smoking opium out of existence. The commission illustrate their position and recommendation by suggesting that the opium problem in the United States needs to be confined by a triangle, one side of which has been laid down by the act prohibiting importation except for medicinal use, another side of which would be formed by the proposed act to control interstate traffic, and the third side of which would consist of an internal-revenue law placing a high tax upon the manufacture of smoking opium.

The resolutions adopted by the Shanghai commission looking to international action were unanimous and to the following effect: That the sincerity of the Government of China in its efforts to eradicate the production and consumption of opium throughout the Empire is fully recognized, and that in view of the action taken by that Government to suppress the practice of opium smoking, and by other governments to the same end, the commission recommends that each delegation move its own government to take measures for the suppression of opium smoking in its own territories and possessions; that the use of opium in any form, except for medicinal purposes, is generally held to be a matter for prohibition or careful regulation aiming at progressively increasing stringency; that it is the duty of all countries to adopt reasonable measures to prevent the shipment of opium and its derivatives at ports of departure to another country which prohibits entry; that the unrestricted sale and use of morphine constitute a grave danger, and that it is highly important for all governments to take measures to control the manufacture, sale, and distribution of this drug and of other derivatives of opium liable to similar abuse; that opium resorts in the foreign concessions or settlements in China should be closed and the trade in so-called anti-opium remedies containing opium or its derivatives therein be prohibited, and that each government should apply its pharmacy laws to its subjects in the consular districts of China.

The countries participating in the commission beside the United States were: China, France, Germany, Great Britain, Japan, the Netherlands, Portugal, Russia, Austria-Hungary, Italy, Siam, and Persia.

No formal declaration was made by the commission as to further international action, but it was tacitly understood that a subsequent conference, with full powers, would be proposed in order to conventionalize the propositions upon which the commission agreed. Accordingly this Government has now proposed such a conference through diplomatic correspondence, and the replies already received from the interested governments give ground for the confident

belief that this conference will be held at The Hague without any great delay, and that the outcome will probably be to give to the main salutary propositions of the Shanghai commission and the essential corollaries derived therefrom the force of law and international agreement. In this connection it is appropriate to say that by the act of Congress of March 3, 1905, revising and amending the tariff laws of the Philippine Islands, and under Philippine laws passed in obedience to that act, the importation of opium into the Philippine Islands in any form except for medicinal purposes is forbidden, and the use of opium except for such purposes by any person is also prohibited. It is obvious, therefore, that as respects both the United States and the Philippine Islands it is most important to obtain, if possible, an international agreement preventing or restricting the shipment of opium from ports of export to countries prohibiting its importation.

This Government has suggested a tentative programme for the conference, not intending, however, to prescribe its scope or present proposals which might not be varied nor enlarged, but believing that its suggestions would properly serve as a basis for discussion and in aid of final action. The report states that programme (pp. 200-202) in the form of concrete propositions which it is advisable to consider, lettered from a to n. I quote as follows from the conclusion of the report, epitomizing the policy and action of this Government:

Thus since our Government entered the Philippines, and thereby came into direct contact with the opium problem, it has made a sustained effort not only to put its own house in order, but, by inviting the powers to coordinate action, raised the problem from a national to an international plane. On the latter the opium problem has been studied, discussed, and roundly condemned.

In continuation of its policy, our Government has invited the powers to such further cooperation as will place the production, trade in, and use of opium under the control of international law. It has been historically demonstrated that no nation working alone, that no two nations working together, are able to destroy the opium vice. It was a hopeless task. To-day, as the result of the international efforts initiated by this Government, the world is well on its way to see the thorough solution of not only China's oppressive opium problem, but that of other countries not so heavily burdened.

It can not be doubted, I think, that in consideration of its international relations and duties this Government is called upon to proceed with the work which it has initiated, and to support and pursue the project of a conference which shall effectuate as fully as possible by international agreement the recommendations of the Shanghai commission. The interests of the Government of the United States in and its obligations to the Philippine Islands and their inhabitants forcibly emphasize this duty. No less clear appears to be the domestic duty of supplementing the restrictions upon illicit traffic in opium and other habit-forming drugs and abuse of the same contained in existing federal and state laws by additional legislation of Congress providing for enlarged control through the power over interstate commerce and the power of taxation.

I therefore have the honor to recommend:

That the accompanying report shall be transmitted by you to Congress for its information and appropriate legislative action.

That, the original appropriation of \$20,000 for the Shanghai commission having been exhausted now for some months, Congress should be asked to appropriate the sum of \$25,000, or so much

thereof as may be necessary, so that this Government may be enabled to continue its efforts to mitigate if not entirely stamp out the opium evil through the proposed international conference and otherwise by further investigations and proceedings.

That, without the Executive undertaking to pass upon the constitutionality or the legal advisability of the particular measures of legislation proposed by this report, the attention of Congress should be especially drawn to that subject, in order that appropriate measures may be enacted for the suppression and control of the opium and allied evils.

And finally, that Congress should be asked by you to take steps promptly to apply and extend to our consular districts and the federal judicial jurisdiction in China the provisions of the so-called pharmacy act of the District of Columbia, with such changes as may be necessary and desirable to adapt it to those localities.

Respectfully submitted.

P. C. KNOX.

REPORT.

DEPARTMENT OF STATE,
January 1, 1910.

SIR: The necessity for an American Opium Commission was clearly set forth in House Document No. 926, Sixtieth Congress, first session. That document contains a letter from Secretary Root to President Roosevelt, in which the foreign aspect of the opium question is shortly reviewed, and particular mention made of the recent determination of China to finally rid herself of the evils of opium smoking. But, though particular attention was called to the Chinese aspect of the opium question, it was not lost sight of that there was within the United States itself an opium problem which had to be exposed and solved. As to the latter phase of the question, Secretary Root noted the extraordinary fact that in the year 1907 there was imported into the United States 728,530 pounds of opium, and that—

While the international investigation now proposed relates to opium in the Far East, an incidental advantage of the investigation may be to point out the necessity, and the best method of restricting the use of opium in the United States.

Secretary Root's letter was transmitted by President Roosevelt to the Senate and House of Representatives. It will be seen by the following document that there was an immediate appropriation of \$20,000 to meet the expenses of the American delegates to the International Opium Commission which was to meet at Shanghai, January 1, 1909.

[H. R. 21260—Public, No. 141.]

AN ACT Making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and nine, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and the same are hereby, appropriated, for the objects hereinunder expressed, for the fiscal year ending June thirtieth, nineteen hundred and nine, namely:

International investigation of opium evil: To enable the President to appoint not more than three commissioners to collate and complete on behalf of the United States information bearing on the opium question, and a secretary, who shall act as disbursing officer, and for traveling expenses, stationery, printing, and other incidental expenses connected with the investigation and the meeting of the commissioners for the purpose of finding common ground for joint and several recommendations and reports to their respective governments with a view to the suppression of the opium evil, twenty thousand dollars, or so much thereof as may be necessary.

Under the appropriation thus made three commissioners were appointed, the original commissioners being Judge Thomas Burke, of Seattle, Wash., Dr. Hamilton Wright, of Washington, D. C., and Dr. Charles D. Tenney, Chinese secretary to the American legation at Peking. Judge Burke found it impossible to serve on the commission and declined his appointment, his place being taken by Bishop Charles H. Brent, of the Philippine Islands.

In the letter of instructions from the Secretary of State, June 20, 1908, I was directed to—

make a general study of opium in the Far East, from the foreign and American point of view, in the light of the material available here and otherwise attainable. Your attention should be directed to the commercial and humanitarian aspects of the question, and your work should include the collection of information on opium in the United States, as well as a review of the manner in which the evil has been suppressed in the Philippine Islands.

Bishop Brent, shortly after accepting his commission, returned to the Philippine Islands, while Doctor Tenney remained at Peking. The commission, as thus constituted, was a scattered one and did not assemble as a whole until January 23,^a a few days before the opening of the international commission at Shanghai.

The work of the American Opium Commission would have been much more effective, so far as the strictly American aspect of the problem is concerned, had it been able to obtain information at first hand by holding sittings in different parts of the country. However, this defect was minimized by the cordial manner in which nearly all engaged in the importation, manufacture, and distribution of opium, and those state and municipal officials responsible for the enforcement of local antipoinson laws, cooperated in throwing light on the subject.

Following the instructions of your predecessor, a careful survey has been made of the opium and allied problems as they appear in the United States, and there is now submitted for your consideration the following report on the subject, and the drafts of proposed bills based on the study of the intra and interstate traffic in opium and other habit-forming drugs. A third-draft bill is submitted, which it is hoped will meet the moral obligation entailed by Resolution IX of the International Opium Commission, which reads as follows:

RESOLUTION IX. That the International Opium Commission recommends that each delegation move its government to apply its pharmacy laws to its subjects in the consular districts, concessions, and settlements in China.

PART I.

In the discussion on the opium exclusion act of February 9 last it was objected by some that Congress was being asked by the Department of State to forward an important measure without adequate information being laid before it as to existing treaties, tariff, and other laws then in force. It seems wise, therefore, before submitting a report on the misuse of habit-forming drugs in the United States, and evidence in favor of the passage of a federal act to control the interstate traffic in them, that a review should be taken of the treaties, tariff, excise, and other acts under which the general traffic in these drugs was conducted by citizens of the United States at the time of the appointment of the American Opium Commission, under the act of Congress approved May 27, 1908.

^a Meeting of international commission postponed from January 1 to February 1, 1909.

TREATIES GOVERNING CITIZENS OF THE UNITED STATES IN OPIUM TRAFFIC.

In this part will be submitted treaties, tariff, excise, and other laws under which the trade in and distribution of opium and other menacing drugs has been carried on in the continental United States and its possessions, and their effect on such trade and distribution.

The United States has at present three treaties in force with other countries which place certain restrictions on its citizens who engage in the opium trade, or which prohibit that trade to its citizens. They are as follows:

SIAM.

Our second treaty with Siam was negotiated in 1856. Under a section of Article VIII of that treaty, citizens of the United States were to a stated extent restricted as to the trade in opium. The treaty was a "Treaty of amity and commerce," concluded May 29, 1856, and proclaimed August 16, 1858. The third section of Article VIII is as follows:

Opium may be imported free of duty, but can only be sold to the opium farmer or his agents. In the event of no arrangement being effected with them for the sale of opium, it shall be reexported and no impost or duty levied thereon. Any infringement of this regulation shall subject the opium to seizure and confiscation.

That is, by the above article, American citizens are permitted to carry opium to Siamese ports; they may not, however, dispose of it to private parties, but to the "opium farmer" only or his agents who represent the Siamese Government and people in all opium transactions. No arrangement being effected with the opium farmer for the sale of American-carried opium, it is to be reexported without levy of impost or duty. Infringement of the regulations subjects the opium to seizure or confiscation.

The treaty of 1856 is still in force, but the American trade in opium from India and other opium-producing countries to Siam has been a casual and unimportant one. This treaty superseded an earlier American-Siamese treaty negotiated in 1833, under which Americans were forbidden to engage in the opium traffic under penalty of losing the countenance of the United States Government and at the risk of being dealt with by the Siamese authorities.

CHINA.

On November 17, 1880, a "Treaty as to commercial intercourse and judicial procedure" was concluded with China and proclaimed October 5, 1881. By Article II of this treaty United States citizens were prohibited the importation of opium into China or its transportation from one open port to another. The article is as follows:

ART. II. The Governments of China and of the United States mutually agree and undertake that Chinese subjects shall not be permitted to import opium into any of the ports of the United States; and citizens of the United States shall not be permitted to import opium into any of the open ports of China, to transport it from one open port to any other open port, or to buy and sell opium in any of the open ports of China. This absolute prohibition, which extends to vessels owned by the citizens or subjects of either power, to foreign vessels employed by them, or to vessels owned by the citizens or subjects of either power, and employed by other persons for the transportation of opium, shall be enforced by appropriate legislation on the part of China and the

United States; and the benefits of the favored-nation clause in existing treaties shall not be claimed by the citizens or subjects of either power as against the provisions of this article.

It will be seen by this article that citizens of the United States are absolutely forbidden to traffic in opium in China. On the other hand, Chinese subjects residing in the United States are forbidden to import opium into the United States. It will be seen also that the article was to be enforced by appropriate legislation on the part of China and the United States.

Unfortunately, such appropriate legislation was not passed by Congress until 1887. In the intervening seven years our Government was open to reproach, for American citizens continued to trade in opium in Chinese waters. However, on May 19, 1886, Mr. Thomas H. Bayard, the then Secretary of State, transmitted to President Cleveland a recommendation that the necessary and appropriate legislation should be passed by Congress to make this treaty effective. He stated:

A bill (S. 1158) to carry into execution the provisions of Article II of the treaty of 1880 between the United States and China for the suppression of the opium traffic was introduced in and passed the Senate during the Forty-eighth Congress, first session, June 2, 1884, but no action appears to have been taken upon the proposed measure by the House of Representatives.

The necessity of some such legislation has heretofore been suggested to the Committee on Foreign Relations and Foreign Affairs of the Senate and House of Representatives, respectively, and in the absence of appropriate legislation on the part of this Government, as provided by the said Article II, to enforce the provisions of the treaty the department often finds itself embarrassed in instructing United States ministers at Peking and the consuls in China in given cases.

The result of this communication from the Department of State was that Congress, in February, 1887, passed the following act to effectuate the treaty:

[Act of February 23, 1887, ch. 210, 24 Stat. L., 409.]

AN ACT To provide for the execution of the provisions of article two of the treaty concluded between the United States of America and the Emperor of China on the seventeenth day of November, eighteen hundred and eighty, and proclaimed by the President of the United States on the fifth day of October, eighteen hundred and eighty-one.

SECTION 1. [Importation of opium by Chinese prohibited.] That the importation of opium into any of the ports of the United States by any subject of the Emperor of China is hereby prohibited. Every person guilty of a violation of the preceding provision shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not more than five hundred dollars nor less than fifty dollars or by an imprisonment for a period of not more than six months nor less than thirty days, or by both such fine and imprisonment, in the discretion of the court.

SEC. 2. [Forfeiture.] That every package containing opium, either in whole or in part, imported into the United States by any subject of the Emperor of China, shall be deemed forfeited to the United States; and proceedings for the declaration and consequences of such forfeiture may be instituted in the courts of the United States as in other cases of the violation of the laws relating to other illegal importations.

SEC. 3. [Citizens of United States prohibited from traffic in opium in China: Punishment, jurisdiction, forfeiture.] That no citizen of the United States shall import opium into any of the open ports of China, nor transport the same from one open port to any other open port, or buy or sell opium in any of such open ports of China, nor shall any vessel owned by citizens of the United States, or any vessel, whether foreign or otherwise, employed by any citizen of the United States, or owned by any citizen of the United States, either in whole or in part, and employed by persons not citizens of the United States, take or carry opium into any of such open ports of China, or transport the same from one open port to any other open port, or be engaged in any traffic therein between or in such open ports or any of them.

Citizens of the United States offending against the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by

a fine not exceeding five hundred dollars nor less than fifty dollars, or by both such punishments, in the discretion of the court.

The consular courts of the United States in China, concurrently with any district court of the United States in the district in which any offender may be found, shall have jurisdiction to hear, try, and determine all cases arising under the foregoing provisions of this section, subject to the general regulations provided by law.

Every package of opium or package containing opium, either in whole or in part, brought, taken, or transported, trafficked or dealt in contrary to the provisions of this section, shall be forfeited to the United States, for the benefit of the Emperor of China; and such forfeiture, and the declaration and consequences thereof, shall be made, had, determined, and executed by the proper authorities of the United States exercising judicial powers within the Empire of China.

The treaty of 1880, as it bears upon opium, was preceded by the treaty of Tientsin, of 1858, a "treaty of peace, amity, and commerce," concluded June 18, 1858, proclaimed January 26, 1860. Under the trade regulations appended to the treaty of 1858 Americans as well as others could carry opium into China on the payment of the specified duty of 30 taels per 100 catties.^a

A later treaty with China, one article of which affects an important aspect of the opium trade, is the "treaty as to commercial relations," concluded October 8, 1903, proclaimed January 13, 1904. Article XVI of this treaty aimed at the morphine habit, which, having taken root in the Far East in recent years, rapidly spread over China and added a new terror to her opium problem. Article XVI of the treaty of 1903 is as follows:

The Government of the United States consents to the prohibition by the Government of China of the importation into China of morphia and of instruments for its injection, excepting morphia and instruments for its injection imported for medical purposes, on payment of tariff duty, and under regulations to be framed by China which shall effectually restrict the use of such import to the said purposes. This prohibition shall be uniformly applied to such importations from all countries. The Chinese Government undertakes to adopt at once measures to prevent the manufacture in China of morphia and of instruments for its injection.

Thus by this article the United States consented to the prohibition by the Government of China of the importation into China of morphia and implements for its injection, except for medicinal purposes, and on payment of a tariff duty. By this same article the Chinese Government pledged itself to at once adopt measures to prevent the manufacture in China of morphia or instruments for its injection. It was stipulated that, to effectuate this article all treaty powers should accede to it. This they did by the autumn of 1908, and the article prevailed on the 1st of January, 1909.

KOREA.

As pertinent to the subject of treaties it should be recorded that there was negotiated with Korea in 1882 a treaty similar to the treaty of 1880 with China—that is, a "treaty of peace, amity, commerce, and navigation," concluded May 22, 1882, proclaimed June 4, 1883. Article VII of the American-Korea treaty is as follows:

The Governments of the United States and of Chosen mutually agree and undertake that subjects of Chosen shall not be permitted to import opium into any of the ports of the United States, and citizens of the United States shall not be permitted to import opium into any of the open ports of Chosen, to transport it from one open port to another open port, or to traffic in it in Chosen. This absolute prohibition, which extends to

^a One hundred catties equal 133½ pounds avoirdupois.

vessels owned by the citizens or subjects of either power, to foreign vessels employed by them, and to vessels owned by the citizens or subjects of either power and employed by other persons for the transportation of opium, shall be enforced by appropriate legislation on the part of the United States and of China, and offenders against it shall be severely punished.

This article is practically the same as Article II of the above-mentioned treaty of 1880 with China. It was necessary, as in the case of the 1880 treaty with China, that the United States should enact appropriate legislation to enforce it. That was not done. Owing to the altered political status of Korea, it does not now seem to be necessary for Congress to act in the matter.

LAWS OTHER THAN TREATIES RESTRICTING THE OPIUM TRAFFIC.

Although not an international agreement, the following statute may be noted as showing the spirit of the United States in regard to the opium traffic amongst unprotected peoples:

[Act of February 14, 1902, ch. 18, 32 Stat. L., 33.]

AN ACT To prevent the sale of firearms, opium, and intoxicating liquors in certain islands of the Pacific.

SECTION 1. [Sale of arms and intoxicants to Pacific Islands aborigines forbidden.] That any person subject to the authority of the United States who shall give, sell, or otherwise supply any arms, ammunition, explosive substance, intoxicating liquor, or opium to any aboriginal native of any of the Pacific Islands lying within the twentieth parallel of north latitude and the fortieth parallel of south latitude, and the one hundred and twentieth meridian of longitude west and the one hundred and twentieth meridian of longitude east of Greenwich, not being in the possession or under the protection of any civilized power, shall be punishable by imprisonment not exceeding three months, with or without hard labor, or a fine not exceeding fifty dollars, or both. And in addition to such punishment all articles of a similar nature to those in respect to which an offense has been committed found in the possession of the offender may be declared forfeited.

SEC. 2. [Medical use excepted.] That if it shall appear to the court that such opium, wine, or spirits have been given bona fide for medical purposes it shall be lawful for the court to dismiss the charge.

SEC. 3. [Deemed an offense on high seas.] That all offenses against this act committed on any of said islands or on the waters, rocks, or keys adjacent thereto shall be deemed committed on the high seas on board a merchant ship or vessel belonging to the United States, and the courts of the United States shall have jurisdiction accordingly.

EFFECT OF OUR TREATIES ON THE TRAFFIC IN OPIUM TO THE UNITED STATES.

What has been the effect of these treaties on the traffic in opium to the United States? As the treaty negotiated with Siam in 1856 and that with Korea in 1882 have no bearing on the question of the importation of opium into and its use in the United States, they may be neglected. The treaty of 1880 with China is, however, pertinent to the question.

It was pointed out above that, until the treaty was effectuated by the passage of the necessary statute of Congress, Americans freely engaged in the opium trade in Chinese waters. It will have been observed that the treaty did not prohibit the importation of opium into the United States, but only prohibited such importation to Chinese subjects. The result under the treaty has been that, though Chinese subjects resident in the United States are prohibited the

the drug in a form prepared for smoking, and have immediately handed it over to Chinese subjects, who have distributed it throughout the country, not only to Chinese, but to any and all who have become addicted to the opium smoking habit. The extent of the importation of smoking opium and the evil consequences that have arisen from it will be dilated upon shortly.

In regard to the morphia section in the commercial treaty of 1903, in which the Government of the United States consents to the prohibition by the Government of China of the importation into China of morphine and instruments for its injection, etc., the treaty has not been in force long enough to report whether American traders have engaged in smuggling operations to defeat the intention of the treaty. So far as our statistics of export show, there does not appear to have been a large export of morphia from this country to China, certainly nothing in comparison with the large amounts that were shipped to China from the morphia manufacturing countries of Europe.

The important fact about the morphia clause of the treaty of 1903 is that it is a direct recognition of the fact that the use of morphia had supervened, and was becoming a part of, the long-established abuse of opium in China. Morphia being the chief and effective alkaloid of opium, the use of it had spread like wildfire during the last ten years, not in China alone, but amongst the Chinese in the Malay Peninsula and other parts of the Far East. It had even become a menace to the population of the large cities of India. It had been found to be a cheap substitute for opium, that it could be administered conveniently and secretly to produce the same effects as opium, and for these reasons it tended to displace the use of the original drug by large sections of the urban population of far eastern countries.

TARIFF, INTERNAL-REVENUE STATUTES AND OTHERS GOVERNING THE
TRADE IN OPIUM IN THE UNITED STATES AND ITS POSSESSIONS.

The admission of opium into the United States was governed by paragraph 43 of the tariff act approved July 24, 1897, which is as follows:

43. Opium, crude or unmanufactured, and not adulterated, containing nine per centum and over of morphia, one dollar per pound; morphia or morphine, sulphate of, and all alkaloids or salts of opium, one dollar per ounce; aqueous extract of opium for medicinal uses, and tincture of, as laudanum, and other liquid preparations of opium, not specially provided for in this act, forty per centum ad valorem; opium containing less than nine per centum of morphia, and opium prepared for smoking, six dollars per pound; but opium prepared for smoking and other preparations of opium deposited in bonded warehouses shall not be removed therefrom without payment of duties, and such duties shall not be refunded.

Thus it will be observed that, in addition to crude or gum opium containing 9 per cent and over of morphia imported ostensibly for medicinal purposes, opium containing less than 9 per cent of morphia and opium prepared for smoking were admitted to the United States on payment of \$6 per pound.

Just what effect this and previous tariff laws had on the importation, distribution, and abuse of opium in the United States is considered later.

In the meantime there follows the act of October 1, 1890 (26 Stat., 567), which provided for the manufacture of smoking opium in the United States:

SEC. 36. That an internal-revenue tax of ten dollars per pound shall be levied and collected upon all opium manufactured in the United States for smoking purposes; and no person shall engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue.

SEC. 37. That every manufacturer of such opium shall file with the collector of internal revenue of the district in which his manufactory is located such notices, inventories, and bonds; shall keep such books and render such returns of material and products; shall put up such signs and affix such number to his factory, and conduct his business under such surveillance of officers and agents as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may, by regulation, require. But the bond required of such manufacturer shall be with sureties satisfactory to the collector of internal revenue and in a penal sum of not less than five thousand dollars; and the sum of said bond may be increased from time to time and additional sureties required at the discretion of the collector or under instructions of the Commissioner of Internal Revenue.

SEC. 38. That all prepared smoking opium imported into the United States shall, before removal from the custom-house, be duly stamped in such manner as to denote that the duty thereon has been paid; and that all opium manufactured in the United States for smoking purposes, before being removed from the place of manufacture, whether for consumption or storage, shall be duly stamped in such permanent manner as to denote the payment of the internal-revenue tax thereon.

SEC. 39. That the provisions of existing laws governing the engraving, issue, sale, accountability, effacement, cancellation, and destruction of stamps relating to tobacco and snuff, as far as applicable, are hereby made to apply to stamps provided for by the preceding section.

SEC. 40. That a penalty of not more than one thousand dollars, or imprisonment not more than one year, or both, in the discretion of the court shall, be imposed for each and every violation of the preceding sections of this act relating to opium by any person or persons; and all prepared smoking opium whenever found within the United States without stamps required by this act shall be forfeited, and may be sold to the highest bidder, pursuant to the provisions of section thirty-four hundred and sixty, Revised Statutes; if not valued as therein provided at over five hundred dollars the sale shall be made pursuant to the judgment of the court in the proceedings for condemnation or forfeiture.

It will be seen by section 36 of this act that only citizens of the United States could engage in the manufacture of this form of opium—that is, the Chinese, who were most likely to engage in the manufacture, were excluded just as in the treaty of 1880 with China, they were excluded from the privilege of importing smoking opium. Nothing further need be said in regard to this internal-revenue measure than that the Commissioner of Internal Revenue reports that no license was ever taken out under it. This seems to have been owing to the fact that the \$10 per pound to be levied and collected upon all such opium manufactured in the United States was prohibitive, in view of the fact that the contemporary tariff duty on such opium was but \$12 a pound.

As bearing on the opium problem within the United States the national food and drugs act (June 30, 1906) should be noted here. That part of the food and drugs act which affects the present subject is contained in section 2 of the act, which states:

SEC. 2. That the introduction into any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia, or from any foreign country, or shipment to any foreign country of any article of food or drugs which is adulterated or misbranded, within the meaning of this act, is hereby prohibited.

And then the act goes on to define adulterated and misbranded drugs, and states fines, punishments, etc.

In regard to adulteration, section 7 states:

That for the purposes of this act an article shall be deemed to be adulterated, in the case of drugs [and this includes opium]: First. If, when a drug is sold under or by a name recognized in the United States Pharmacopœia or National Formulary, it differs from the standard of strength, quality, or purity, as determined by the test laid down in the United States Pharmacopœia or National Formulary Official at the time of investigation. *Provided*, That no drug defined in the United States Pharmacopœia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality, or purity be plainly stated upon the bottle, box, or other container thereof, although the standard may differ from that determined by the test laid down in the United States Pharmacopœia or National Formulary.

In regard to misbranding, section 8 of the act states as follows:

That the term "misbranded," as used herein, shall apply to all drugs or articles of food or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

That for the purposes of this act an article shall also be deemed to be misbranded, in the case of drugs:

First. If it be an imitation of or offered for sale under the name of another article.

Second. If the contents of the package as originally put up shall have been removed in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any * * * morphine, opium, * * * thereon, * * * or any derivative or preparation of any such substances contained therein.

It will be sufficient to state at this point that since the national food and drugs act was passed nearly all of our States have remodeled or passed state food and drugs acts based on the provisions of the national act. The effect of this act in diminishing the use of proprietary or patent compounds containing opiates has been extensive.

Another federal statute in force at the time of the appointment of the American Opium Commission, relating to the use of habit-forming drugs, is the "Act to regulate the practice of pharmacy and the sale of poisons in the District of Columbia, and for other purposes, approved May 7, 1906, Public, No. 148." It is as follows:

[Public—No. 148.]

AN ACT To regulate the practice of pharmacy and the sale of poisons in the District of Columbia, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be unlawful for any person not licensed as a pharmacist within the meaning of this act to conduct or manage any pharmacy, drug or chemical store, apothecary shop, or other place of business for the retailing, compounding, or dispensing of any drugs, chemicals, or poisons, or for the compounding of physicians' prescriptions, or to keep exposed for sale, at retail, any drugs, chemicals, or poisons, except as hereinafter provided; or, except as hereinafter provided, for any person not licensed as a pharmacist within the meaning of this act to compound, dispense, or sell, at retail, any drug, chemical, poison, or pharmaceutical preparation upon the prescription of a physician, or otherwise, or to compound physicians' prescriptions, except as an aid to and under the proper supervision of a pharmacist licensed under this act. And it shall be unlawful for any owner or manager of a pharmacy, drug store, or other place of business to cause or permit any person other than a licensed pharmacist to compound, dispense, or sell, at retail, any drug, medicine, or poison, except as an aid to and under the proper supervision of a licensed pharmacist: *Provided*, That nothing in this section shall be construed to interfere with any legally registered practitioner of medicine, dentistry, or veterinary surgery in the compounding of his own prescriptions, or to prevent him from supplying to his patients such medicines as he may deem proper; nor with the exclusively wholesale business of any dealer who shall be licensed as a pharmacist, or who

shall keep in his employ at least one person who is so licensed, except as hereinafter provided; nor with the sale by others than pharmacists of poisonous substances sold exclusively for use in the arts, or as insecticides, when such substances are sold in unbroken packages bearing labels having plainly printed upon them the name of the contents, the word "poison," when practicable the name of at least one suitable antidote, and the name and address of the vendor: *Provided further*, That such person, firm, or corporation has obtained a permit from the board of supervisors in medicine and pharmacy, which grants the right and privilege to make such sales, such permit to be issued for a period of three years, and that each sale of such substance be registered as required of a licensed pharmacist, and it shall be unlawful for any person under the age of twenty-one years to sell such substances, and in no case shall the sale be made to a person under eighteen years of age except upon the written order of a person known or believed to be an adult: *And provided further*, That persons other than registered pharmacists may sell household ammonia and concentrated lye, in sealed containers plainly labeled, so as to indicate the nature of the contents, with the word "poison," and with a statement of two or more antidotes to be used in case of poisoning, and may sell bicarbonate of soda, borax, cream of tartar, olive oil, sal ammoniac, and sal soda; and persons other than registered pharmacists may, furthermore, sell in original sealed containers, properly labeled, such compounds as are commonly known as "patent" or "proprietary" medicines, except those the sale of which is regulated by the provisions of sections eleven and thirteen of this act.

SEC. 2. That every person now registered as a pharmacist in the District of Columbia, under an act to regulate the practice of pharmacy in the District of Columbia, approved June fifteenth, eighteen hundred and seventy-eight, shall be entitled to be licensed under this act without examination or payment of fee: *Provided*, That he make application therefor on or before the thirty-first day of December next ensuing after the passage of this act. Any person registered as aforesaid shall, until said date, by virtue of such registration be entitled to all the rights, privileges, and immunities to which pharmacists licensed under this act are entitled, and be subject to all the obligations and duties of such licentiates.

SEC. 3. That every person not registered under an act to regulate the practice of pharmacy in the District of Columbia, approved June fifteenth, eighteen hundred and seventy-eight, who shall desire to be licensed as a pharmacist shall file with the board of supervisors in medicine and pharmacy an application, duly verified under oath, setting forth the name and age of the applicant, the place or places at which he pursued, and the time spent in, the study of pharmacy, the experience which the applicant has had in compounding physicians' prescriptions under the direction of a licensed pharmacist, and the name and location of the school or college of pharmacy, if any, of which he is a graduate, and shall submit evidence sufficient to show to the satisfaction of said board that he is of good moral character and not addicted to the use of alcoholic liquors or narcotic drugs so as to render him unfit to practice pharmacy; and said applicant shall appear at a time and place designated by the board of supervisors aforesaid and submit to an examination by the board of pharmaceutical examiners as to his qualifications for license as a pharmacist: *Provided*, That applicants shall be not less than twenty-one years of age, and shall have had at least four years' experience in the practice of pharmacy or shall have served three years under the instruction of a regular licensed pharmacist; and any applicant who has been graduated from a school or college of pharmacy recognized by said board as in good standing shall be entitled to examination upon presentation of his diploma: *Provided further*, That any applicant intending to limit his practice to compounding and dispensing homeopathic remedies and prescriptions may be licensed, if otherwise qualified. Any applicant intending to compound and dispense homeopathic remedies and prescriptions shall so state in his application for license as a pharmacist, and it shall thereupon become the duty of the board of supervisors aforesaid to appoint a committee of three physicians or pharmacists, or both, adherents to the homeopathic system of medical practice, to examine said applicant in homeopathic materia medica and pharmacy, and to report the result thereof to said board. Every such applicant, however, shall be subjected in all respects to the same examinations by the board of pharmaceutical examiners as are applicants generally, except that an applicant intending to limit his practice to the compounding and dispensing of homeopathic remedies and prescriptions shall not be examined by said board of pharmaceutical examiners in materia medica and pharmacy. But the license issued to any applicant after a limited examination as aforesaid shall permit him to compound or dispense homeopathic remedies and prescriptions only. No person shall compound or dispense homeopathic remedies or prescriptions who has not been licensed so to do, nor shall any person who has been licensed to compound and dispense homeopathic remedies and prescriptions alone compound or dispense other remedies or prescriptions, except "patent" or "proprietary" remedies in original packages.

SEC. 4. That if the applicant for license as a pharmacist has complied with the requirements of either of the two preceding sections, the board of supervisors in medicine and pharmacy shall issue to him a license which shall entitle him to practice pharmacy in the District of Columbia, subject to the provisions of this act.

SEC. 5. That the board of supervisors in medicine and pharmacy shall issue licenses to practice pharmacy in the District of Columbia without examination, or after limited examination, as said board may determine, to such persons as have been legally registered or licensed as pharmacists in States, Territories, or foreign countries: *Provided*, That the applicant for such license present satisfactory evidence of qualifications equal to those required of licentiates examined under this act, and that he was registered or licensed after examination in such State, Territory, or foreign country not less than one year prior to the date of application; that the standard of competence required in such State, Territory, or foreign country is not lower than that required in the District of Columbia; and that such State, Territory, or foreign country accords similar recognition to licentiates of the District of Columbia, all of which shall be determinable by the board of supervisors aforesaid. Applicants for license under this section shall forward with their application a fee of ten dollars.

SEC. 6. That the license of any person to practice pharmacy in the District of Columbia may be revoked if such person be found to have obtained such license by fraud; or to be addicted to the use of any narcotic or stimulant, or to be suffering from physical or mental disease, in such manner and to such an extent as to render it expedient that in the interests of the public his license be canceled; or to be of an immoral character; or if such person be convicted in any court of competent jurisdiction of any offense involving moral turpitude. It shall be the duty of the major and superintendent of police of said District to investigate any case in which it is discovered by him, or made to appear to his satisfaction, that any license issued under the provisions of this act is revocable, and to report the result of such investigation to the board of supervisors in medicine and pharmacy, which board shall, after full hearing, if in their judgment the facts warrant it, revoke such license.

SEC. 7. That in the month of November of each year every licensed dealer in poisons for use in the arts or as insecticides, whose permit has been issued not less than three years prior to the first day of such month, shall apply to the board of supervisors in medicine and pharmacy for the renewal of such permit. And said board is hereby authorized, upon the payment of such fees as are hereinafter provided, to renew such permit in the month of November for a period of three years from the thirty-first day of October immediately preceding the date thereof. And every permit not renewed within the month of November as aforesaid shall be void and of no effect unless and until renewed. Any license, permit, or renewal obtained through fraud, or by any false or fraudulent representation, shall be void and of no effect. No person shall make any false or fraudulent representation for the purpose of procuring a license, permit, or renewal thereof, either for himself or for another.

Every license to practice pharmacy, and every permit to sell poisons for use in the arts or as insecticides, and every current renewal of such permit shall be conspicuously displayed by the person to whom the same has been issued in the pharmacy, drug store, or place of business, if any, of which the said person is the owner or manager.

SEC. 8. That there shall be in and for the District of Columbia a board of pharmaceutical examiners, consisting of five licensed pharmacists, appointed by the commissioners of said District, each of whom shall have been for the five years immediately preceding, and shall be during the term of his appointment actively engaged in the practice of pharmacy in said District. All appointments shall be made in such manner that the term of office of one examiner shall expire on the thirtieth of June of each year, but every examiner shall hold office after the expiration of the term for which he has been formally appointed until his successor has been appointed and qualified. No appointee shall enter upon the discharge of his duties until he has taken oath fairly and impartially to perform the same. Said commissioners may remove, after full hearing, any member of said board for neglect of duty or other just cause.

That annually the board of pharmaceutical examiners shall organize by the election of a president and a secretary, both of whom shall be members of said board, who shall hold office for one year and until their successors shall have been elected and qualified. Said board shall hold meetings for the examination of candidates and for the discharge of such other business as may come before it, commencing on the second Thursday in January, April, July, and October of each year and at such other times as the board of supervisors in medicine and pharmacy shall direct; and said board of pharmaceutical examiners shall examine all applicants for license to practice pharmacy certified to it for that purpose by the board of supervisors in medicine and pharmacy, and shall report the results of such examination to said board of supervisors as speedily as practicable.

SEC. 9. That from and after the passage of this act the board of medical supervisors of the District of Columbia shall be known as the board of supervisors in medicine and pharmacy of the District of Columbia; and the president of the board of pharmaceutical examiners shall be ex officio a member of said board of supervisors in addition to the members now provided for by law; and said board of pharmaceutical examiners shall bear in all respects the same relations to the board of supervisors aforesaid as each of the boards of medical examiners of said District now bears to the board of medical supervisors thereof; and said board of supervisors shall have all such rights, powers, and duties with respect to the examination of applicants for license as pharmacists and with reference to the issue of licenses to practice pharmacy and of permits to sell poisons for use in the arts or as insecticides as said board now has with reference to the examination of applicants for license to practice medicine, surgery, and midwifery, and with reference to the issue of licenses to such persons, except in so far as may be inconsistent with the provisions of this act. Said board shall elect from its membership a secretary and treasurer, respectively. The treasurer of said board shall give such bond for the proper performance of his duties as the Commissioners of the District of Columbia shall deem proper, and shall render to said commissioners accounts of his receipts and disbursements from time to time as said commissioners shall direct. All licenses issued by said board of supervisors shall be countersigned by the president of the examining board by which the candidate was examined. Said board of supervisors shall keep records of its proceedings, and such records shall be prima facie evidence of all matters contained therein in all courts in the District of Columbia. Said board of supervisors shall, in the month of July of each year, make to the Commissioners of the District of Columbia a written report of its proceedings, of its receipts and disbursements, and of all licenses and permits issued. All records, funds, and other property in the possession of the commissioners of pharmacy of the District of Columbia at the time of the passage of this act shall be delivered to such officer or officers of the board of supervisors in medicine and pharmacy as may be designated by said board. And such funds may be used for the payment of such necessary expenses as said board of supervisors may incur in the execution of the provisions of this act during the twelve months immediately following the passage thereof, and any balance which remains on hand at the expiration of that time shall be deposited with the collector of taxes in said District and by him deposited in the Treasury of the United States to the credit of the District of Columbia.

SEC. 10. That applicants for license to practice pharmacy and for permits to sell poisons for use in the arts or as insecticides shall pay the following fees: For examination for license as pharmacist, ten dollars; for a permit for the sale of poisons for use in the arts or as insecticides, one dollar, and for each renewal thereof, fifty cents.

And hereafter all fees for licenses to practice medicine and surgery and all fees aforesaid shall be paid to the treasurer of the board of supervisors in medicine and pharmacy of the District of Columbia before any applicant may be admitted to examination and before any license or permit, or any renewal thereof, may be issued by the said board. And all expenses of said board and of the boards of examiners incident to the execution of the provisions of this act and of an act to regulate the practice of medicine and surgery, to license physicians and surgeons, and to punish persons violating the provisions thereof in the District of Columbia, approved June third, eighteen hundred and ninety-six, shall be paid from the fees collected by the board of supervisors aforesaid. If any balance remain on hand on the thirtieth day of June of any year, the members of said board appointed as such shall be paid therefrom such reasonable amounts as the Commissioners of the District of Columbia may determine. And the balance then in hand, or so much thereof as said board of supervisors may deem proper, shall be divided among the several boards of examiners in proportion to the number of candidates examined by each, each member of such board of examiners to receive such part of the entire amount paid to that board as that board itself may determine.

SEC. 11. That it shall be unlawful for any person, by himself or by his servant or agent, or as the servant or agent of any other person, or of any firm or corporation, to sell, furnish, or give away any cocaine, salts of cocaine, or preparation containing cocaine or salts of cocaine; morphine, salts of morphine, or preparation containing morphine or salts of morphine; or any opium, or preparation containing opium; or any chloral hydrate, or preparation containing chloral hydrate, except upon the original written order or prescription of a lawfully authorized practitioner of medicine, dentistry, or veterinary medicine, which order or prescription shall be dated and shall contain the name of the person for whom prescribed, or, if ordered by a practitioner of veterinary medicine, shall state the kind of animal for which ordered, and shall be signed by the person giving the order or prescription. Such order or prescription shall be, for a period of three years, retained on file by the person, firm, or corporation

who compounds or dispenses the article ordered or prescribed, and it shall not be compounded or dispensed after the first time, except upon the written order of the original prescriber: *Provided*, That the above provisions shall not apply to preparations containing not more than two grains of opium, or not more than one-quarter grain of morphine, or not more than one-quarter grain of cocaine, or not more than two grains of chloral hydrate in the fluid ounce, or, if a solid preparation, in one avoirdupois ounce. The above provisions shall not apply to preparations sold in good faith for diarrhea and cholera, each bottle or package of which is accompanied by specific directions for use and caution against habitual use, nor to liniments or ointments sold in good faith as such when plainly labeled "for external use only," nor to powder of ipecac and opium, commonly known as Dover's powder, when sold in quantities not exceeding twenty grains: *Provided further*, That the above provisions shall not apply to sales at wholesale by jobbers, manufacturers, and retail druggists to retail druggists, hospitals, colleges, and scientific or public institutions.

Sec. 12. That no physician in the District of Columbia, knowing, or when he might by reasonable inquiry know, that any person is addicted to the use of cocaine, morphine, opium, or chloral hydrate, shall furnish to or for the use of such person, or prescribe for such person, the drug aforesaid, to the use of which such person is addicted, or any compound thereof, or any preparation containing the same, except as it may be necessary to furnish or prescribe such drug, compound, or preparation aforesaid for the cure of drug addiction aforesaid, or for the treatment of disease, injury, or deformity: *Provided*, That no physician shall be convicted under the provisions of this section who shows to the satisfaction of the court before which he is tried that, having exercised due diligence and acting in good faith, he furnished or prescribed such drug, compound, or preparation aforesaid believing the same to be necessary for the cure of drug addiction aforesaid, or for the treatment of disease, injury, or deformity, and for no other purpose whatsoever. No dentist shall furnish or prescribe any drug, compound, or preparation aforesaid to, or for the use of, any person not under his treatment in the regular course of his professional work, nor in any case otherwise than may be required by such work. No practitioner of veterinary medicine shall furnish or prescribe any drug, compound, or preparation aforesaid for the use of any human being, or when he has reasonable ground for believing that the drug, compound, or preparation aforesaid is desired or intended for the use of any human being: *Provided further*, That nothing in this section contained shall be construed to give to dentists or to practitioners of veterinary medicine the right to furnish or prescribe any drug, compound, or preparation whatsoever otherwise than as is usual and customary in the practice of dentistry and veterinary medicine, respectively.

Sec. 13. That it shall be unlawful for any person to sell or deliver to any other person any of the following-described substances, or any poisonous compound, combination, or preparation thereof, to wit: The compounds of and salts of antimony, arsenic, barium, chromium, copper, gold, lead, mercury, silver, and zinc; the caustic hydrates of sodium and potassium, solution or water of ammonia, methyl alcohol, paregoric, the concentrated mineral acids, oxalic and hydrocyanic acids and their salts, yellow phosphorus, Paris green, carbolic acid, the essential oils of almonds, pennyroyal, tansy, rue, and savin; croton oil, creosote, chloroform, cantharides, or aconite; belladonna, bitter almonds, colchicum, cotton root, cocculus indicus, conium, cannabis indica, digitalis, ergot, hyoscyamus, ignatia, lobelia, nux vomica, physostigma, physolacca, strophanthus, stramonium, veratrum viride, or any of the poisonous alkaloids or alkaloidal salts derived from the foregoing, or any other poisonous alkaloids or their salts, or any other virulent poison, except in the manner following, and, moreover, if the applicant be less than eighteen years of age, except upon the written order of a person known or believed to be an adult.

It shall first be learned, by due inquiry, that the person to whom delivery is about to be made is aware of the poisonous character of the substance, and that it is desired for a lawful purpose, and the box, bottle, or other package shall be plainly labeled with the name of the substance, the word "poison," the name of at least one suitable antidote when practicable, and the name and address of the person, firm, or corporation dispensing the substance. And before delivery be made of any of the foregoing substances, excepting solution or water of ammonia, and sulphate of copper, there shall be recorded in a book kept for that purpose the name of the article, the quantity delivered, the purpose for which it is to be used, the date of delivery, the name and address of the person for whom it is procured, and the name of the individual personally dispensing the same; and said book shall be preserved by the owner thereof for at least three years after the date of the last entry therein. The foregoing provisions shall not apply to articles dispensed upon the order of persons believed by the dispenser to be lawfully authorized practitioners of medicine, dentistry, or veterinary surgery: *Provided*, That when a physician writes upon his prescription a request

that it be marked or labeled "poison," the pharmacist shall, in the case of liquids, place the same in a colored glass, roughened bottle of the kind commonly known in trade as a "poison bottle," and, in the case of dry substances, he shall place a poison label upon the container. The record of sale and delivery above mentioned shall not be required of manufacturers and wholesalers who shall sell any of the foregoing substances at wholesale to licensed pharmacists, but the box, bottle, or other package containing such substance, when sold at wholesale, shall be properly labeled with the name of the substance, the word "poison," and the name and address of the manufacturer or wholesaler: *Provided further*, That it shall not be necessary, in sales either at wholesale or at retail, to place a poison label upon, nor to record the delivery of, the sulphide of antimony, or the oxide or carbonate of zinc, or of colors ground in oil and intended for use as paints, or calomel, or of paregoric when sold in quantities not over two fluid ounces; nor, in the case of preparations containing any of the substances named in this section, when a single box, bottle, or other package, or when the bulk of one-half fluid ounce, or the weight of one-half avoirdupois ounce, does not contain more than an adult medicinal dose of such substance; nor in the case of liniments or ointments, sold in good faith as such, when plainly labeled "for external use only;" nor in the case of preparations put up and sold in the form of pills, tablets, or lozenges, containing any of the substances enumerated in this section and intended for internal use, when the dose recommended does not contain more than one-fourth of an adult medicinal dose of such substance.

For the purpose of this and of every other section of this act no box, bottle, or other package shall be regarded as having been labeled "poison" unless the word "poison" appears conspicuously thereon, printed in plain, uncondensed gothic letters in red ink.

SEC. 14. That no person seeking to procure in the District of Columbia any substance the sale of which is regulated by the provisions of this act shall make any fraudulent representations so as to evade or defeat the restrictions herein imposed.

SEC. 15. That every proprietor or manager of a drug store or pharmacy shall keep in his place of business a suitable book or file, in which shall be preserved, for a period of not less than three years, the original of every prescription compounded or dispensed at such store or pharmacy, or a copy of such prescription, except when the preservation of the original is required by section eleven of this act. Upon request, the proprietor or manager of such store shall furnish to the prescribing physician, or to the person for whom such prescription was compounded or dispensed, a true and correct copy thereof. Any prescription required by section eleven of this act, and any prescription for, or register of sales of, substances mentioned in section thirteen of this act shall at all times be open to inspection by duly authorized officers of the law. No person shall, in the District of Columbia, compound or dispense any drug or drugs, or deliver the same to any other person, without marking on the container thereof the name of the drug or drugs contained therein or directions for using the same.

SEC. 16. That it shall be unlawful for any person to sell or offer for sale by peddling, or to offer for sale from house to house, or to offer for sale by public outcry, or by vending in the street, any drug, medicine, or chemical, or any compound or combination thereof, or any implement, appliance, or other agency for the treatment of disease, injury, or deformity. That, except as may be otherwise authorized by law, no person shall throw, cast, deposit, drop, scatter, or leave, or cause to be thrown, cast, deposited, dropped, scattered, or left, any drug, medicine, or chemical, or any compound or combination thereof, upon any public highway or place, or, without the consent of the owner or occupant thereof, upon any premises in the District of Columbia.

SEC. 17. That it shall be unlawful for any person not legally licensed as a pharmacist to take, use, or exhibit the title of pharmacist, or licensed or registered pharmacist, or the title of druggist or apothecary, or any other title or description of like import.

SEC. 18. That all persons licensed under this act as pharmacists; and actively engaged in the practice of their profession, shall be exempt from jury duty in all courts of the District of Columbia.

SEC. 19. That any person violating any of the provisions of this act shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine not exceeding two hundred dollars or by imprisonment not exceeding six months, or by both such fine and imprisonment, in the discretion of the court, and if the offense be continuing in its character, each week or part of a week during which it continues shall constitute a separate and distinct offense. And it shall be the duty of the major and superintendent of police of the District of Columbia and of the corporation counsel of said District to enforce the provisions of this act.

SEC. 20. That all acts and parts of acts inconsistent with the provisions of this act be, and the same are hereby, repealed.

Approved May 7, 1906.

As this act is considered a model act and will be referred to later in connection with the proposed legislation to effectuate Resolution IX of the Shanghai Commission, it is recorded here.

ALASKA.

A special act relating to Alaska was passed by Congress in 1899, (429 R. S.) "An act to define and punish crimes in the District of Alaska, and to provide a code of criminal procedure for said district." Sections 145 to 149 of that act are as follows:

SEC. 145. That it shall be unlawful to sell or give away opium, or any preparation of which opium is the principal medicinal agent, to any person except druggists and practicing physicians, except on the prescription of a practicing physician, written in the English or Latin language; and the druggist filling the prescription shall keep the same on file for one year subject to be inspected by any public officer of the district.

SEC. 146. That no person shall sell any opium, or preparation of which opium is the principal agent, to be smoked on or about the premises where sold.

SEC. 147. That any building where opium is sold for the purpose of being smoked on or about the premises, or where the same is smoked, shall be considered an opium den.

SEC. 148. That it shall be unlawful for any person to frequent any opium den for the purpose of purchasing or smoking opium, or any preparation in which opium is the principal medicinal agent.

SEC. 149. That any person violating any of the four sections last preceding shall be punished by imprisonment in the penitentiary not less than six months nor more than two years, or by imprisonment in the county jail not less than one month nor more than six months, or by fine not less than fifty dollars nor more than five hundred dollars.

As to the effect of this act on the misuse of opium in Alaska, no reliable information is at hand, since Alaska has no board of health or other organization capable of reporting on the subject.

CANAL ZONE.

The importation of the various forms of opium into the Canal Zone is covered by the tariff laws of the Panama Republic, but figures as to the amount of opium imported are not available.

Within the Canal Zone itself the sale of opium is covered by section 29 of Sanitary Laws and Regulations, being act No. 9 of the Laws of the Canal Zone. Section 29 is as follows:

SEC. 29. [Sale of poisonous drugs.] No strychnine, opium, arsenic, or other poisons shall be sold, except on prescription or requisitions signed by a physician, except that carbolic acid, sulphate of copper, and similar materials may be sold for use as disinfectants without such certificate.

GUAM.

The admission of opium into the island of Guam is governed by the revised regulations as to customs tariff of the Navy Department, issued August 12, 1909.

Regulations 24 is as follows:

24. All persons are prohibited from importing into the island of Guam * * * adulterated foods and drugs; smoking opium and opium in any form, or any preparation or derivative thereof other than for medicinal purposes.

TUTUILA.

In 1904 the Secretary of the Navy issued regulations in regard to the importation of opium into Tutuila. The regulations imposed the same duty on all forms of opium as provided in the Dingley tariff act. Under these regulations smoking opium was admitted

to the islands on payment of a tax of \$6 per pound. The Secretary of the Navy proposes now to forbid the importation of this form of opium into Tutuila and to have regulations issued to control the importation and use of crude or medicinal opium.

THE OPIUM PROBLEM IN THE PHILIPPINES.

Opium traffic in the Philippines is governed by Philippine act No. 1761, which in turn is based on an act of Congress of March 3, 1905, entitled, "An act to revise and amend the tariff laws of the Philippine Islands, and for other purposes."

SEC. 11. [Rates on imports.]

CLASS III.—Substances employed in pharmacy and chemical industries, and products composed of these substances.

So. opium;

(a) Crude, N. W. kilo, four dollars;

(b) The same manufactured or prepared for smoking or other purposes, N. W., kilo, five dollars: *Provided, however*, That the Philippine Commission or any subsequent Philippine legislature shall have the power to enact legislation to prohibit absolutely the importation or sale of opium, or to limit or restrict its importation and sale, or adopt such other measures as may be required for the suppression of the evils resulting from such sale and use of the drug: *And provided further*, That after March first, nineteen hundred and eight, it shall be unlawful to import into the Philippine Islands opium, in whatever form, except by the Government, and for medicinal purposes only, and at no time shall it be lawful to sell opium to any native of the Philippine Islands except for medicinal purposes. (33 Stat. L., 944.)

Philippine act No. 1761 was, as has just been stated, based on the above act of Congress. That part of No. 1761 which is pertinent to the present state of the opium question in the Philippines is as follows:

SEC. 32. On and after March first, nineteen hundred and eight, it shall be unlawful for any person in the Philippine Islands to inhale, smoke, chew, swallow, inject, or otherwise use or permit to be used in or on his body any opium, except for medicinal purposes, and then only upon prescription of a duly licensed and practicing physician.

Any person violating any of the provisions of this section shall be punished by a fine not exceeding ten thousand pesos, or by imprisonment, in the discretion of the court: *Provided, however*, That in the case of the commission of a second offense under the provisions of this section any person so convicted, if other than a citizen of the United States or a citizen of the Philippine Islands, may, by order of the court, be deported.

The opium problem of the Philippines was restudied by the American commission. There follows the report on that problem as laid before the International Opium Commission, by Bishop Brent:

The Philippine Islands ceded by Spain to the United States in 1898.

Total population, 7,635,426; Chinese population, 55,000.^a

The Chinese exclusion act was applied to the Philippines in 1902 and has since been rigorously enforced.

Opium traffic prior to 1898.

From 1843 to 1898 opium was farmed out by the Government. There are but few available statistics for this period. The revenue rose from \$81,532.60 Mexican in 1863 to \$250,463.20 Mexican for the first half of 1897. Smoking was confined by law to the Chinese, but the law was not strictly enforced, and an increasing number of natives contracted the habit.

There has never been any growth of the poppy in the Islands, nor has there been any export of opium to other countries. The chief sources of supply of imports have been Singapore and Hongkong.

^a These figures are the estimate of the bureau of internal revenue of the Philippine Islands. The immigration records give the number as 49,000.

Period from 1898-1901.

During the transition period between the American occupation and the establishment of civil government the importation of opium was placed under the provisions of the Dingley tariff of the United States of America, which called for a duty of \$1 per pound on the crude commodity and \$6 per pound on opium prepared for smoking. During this period there was no organized attempt made to control the use of the drug. The imports were:

	Pounds.	Value.	Duty.
1899.....	91,823	\$255,310	^a \$64,586
1900.....	155,672	477,027	132,392

^a United States currency is meant unless otherwise stated.

Period from 1901 to 1905.

By the tariff revision law of 1901 a duty of \$3 per kilo ^a for crude opium and \$3.50 for manufactured was imposed. During this period the import rose to 268,128 pounds in 1905. The highest figure reached was 285,443 pounds in 1902. There was an epidemic of cholera this year and opium venders used the opportunity to increase the sale of opium among Filipinos as an antidote or cure for the disease. In 1893 there were 190 opium shops in Manila alone where opium was sold and used. At this time a bill was framed and considered in the Philippine Commission for getting control of the traffic and regulating the use of the drug. Discussion ensuing upon its public presentation eventuated in the appointment of a committee to investigate the use of opium and the traffic therein, and the rules, ordinances, and laws regulating such use and traffic in various countries in the Orient before determining the best kind of law for reducing and restraining the use among the Filipinos. This committee presented its report in June, 1904. (Report of the committee appointed by the Philippine Commission to investigate the use of opium and the traffic therein.) It advocated:

- (1) To become immediate government monopoly.
- (2) Prohibition, except for medical purposes after three years or, if at the expiry of this period it seemed expedient, a longer time of preparation.
- (3) A system of individual licenses until prohibition was made law.
- (4) Making salaried government officials the sole venders or dispensers.
- (5) (a) An educational campaign among the young; (b) treatment for victims of the opium habit; (c) punishment, deportation, if necessary, of incorrigible offenders.

Period from 1905 to March 8, 1906.

On the 3d of March, 1905, in the Philippine tariff revision act, the duty on crude opium was increased by Congress to \$4 per kilo, and on prepared opium to \$5 per kilo. It was further enacted that the Philippine government should have the power to prohibit the importation and sale of opium, or to adopt such measures as might be required for the suppression of the evils resulting from the sale and use of the drug; and that after the 1st of March, 1908, there should be a law prohibiting all importation except for medicinal purposes only. The Philippine government did not feel that it could carry out all the details of the propositions made by the investigating committee. Congress by the act just referred to precluded the possibility of an extension of time in preparation for prohibitory measures.

Period from 8 March, 1906, to 1 March, 1908.

A high-license system was inaugurated as a temporary expedient (act No. 1461 of the Philippine Commission) on the 8th of March, 1906, placing the administration of the law in the hands of the bureau of internal revenue. This law became effective the 1st of April. By its provisions only adult male Chinese were permitted to use opium, and then on the expressed condition that they took out an habitual user's license. About 12,700 licenses were issued, though a conservative estimate of Chinese smokers placed the number at more than 20,000. Filipinos and foreigners were not eligible for licenses. As the normal import exceeded, on an average, 10 tons per

^a One kilo equals 2.204 pounds.

annum, obviously there were many users among those not eligible for licenses, as well as Chinese who secured opium from secret sources or otherwise evaded the law.

Under this act all opium in hand at the time of its passage was required to be declared, and opium afterwards imported had to be stored or withdrawn under government surveillance; wholesale and retail dealers, being placed under bonds, had to pay an annual license tax of \$500 and \$100, respectively; an internal-revenue tax was levied of \$1.25 per kilo on crude and of \$3.75 per kilo on prepared opium; severe penalties were provided for the transgression of the law; moneys accruing from the license and internal-revenue tax were to constitute a special fund for an antiopium educational campaign, hospital treatment for victims of the drug, the payment of informers, and school purposes.

During this period the imports fell from 268,128 pounds in 1905 to 150,292 pounds in 1906.

In order to prepare as far as possible for the prohibitory law, act 1761 was passed by the Philippine Commission on the 12th of October, 1907. The provisions of this act allowed of the continuance of licenses, with a monthly permit increasing in price until the date of the prohibitory period, four months later. A decreasing amount each month could be sold to the licensee. The sale of opium was placed under most rigorous government supervision, which required that internal-revenue officers be constantly on duty in opium dispensaries. The internal-revenue tax was increased each month by 20 per cent of the original tax. Special effort was made to induce opium addicts to take hospital treatment. When the prohibitory law came into effect it was estimated that not more than 5,000 persons were using opium.

Period beginning 1 March, 1908.

A strict prohibitory law came into effect on this date, since which the importation of opium has been 38 pounds. All importation of opium and its derivatives is made through the Government.

Smoking still continues, but it is estimated that it has been reduced from 50 to 60 per cent. The fact that contraband opium has sold at the rate of \$90 per pound (one case was reported where the rate per pound touched \$125) indicates that a large portion of the smoking population is protected from the drug owing to its inability to purchase so expensive a luxury. The poorer people are those who most need protection, for not only have they the least stamina, but they smoke dross, the cheaper, but most vicious, form of the drug. There is no morphia abuse in the Philippine Islands, and consequently but little effort to smuggle.

Our chief difficulties thus far are two in number:

(1) Inadequate facilities. Neither sufficient money nor men are provided for the vigorous enforcement of the law. The Filipino officials at best only afford passive aid. The customs officers and the internal-revenue agents, who are Americans, are meeting the situation with moderate effectiveness and hopefulness.

(2) The ease with which opium is smuggled makes it impossible to cut off the supply without international cooperation. There is a constant supply of contraband opium introduced at different points in the islands from Hongkong, Singapore, and British North Borneo. Our coast line is so extended—approximately 1,500 miles in Mindanao and the Sulu Archipelago alone—that, without an expense beyond the power of the Government to incur, the territory could not be properly policed by revenue cutters and similar agencies. Two efficient employees of the Government closed a recent report in the following words: "It suggests itself to our minds that if a perfect arrangement be made with the neighboring governments whereby our Government could station officials at various points of the East for the purpose of checking and reporting the movements of opium there would very soon result a firm grasp and control of smuggling. We think the suggestion on its face is plain. We are grappling in darkness with an unknown quantity of opium floating in the East and which is ready to spurt into the Philippine Islands at any time, like a flow of quicksilver; this in direct defeat of our" endeavor, and "in partial defeat of the customs law and the opium law."

Two important facts should be noted. Under our prohibitory legislation: First, an additional outlay is required by our Government; second, our revenue is seriously decreased.

As has already been stated, conditions being as they are, it would tax the insular treasury beyond its capacity to organize and maintain an effective service against contraband opium. Even with such facilities as we are employing, additional expense is incurred, and this at a moment when our exchequer is least able to bear it. The revenue from opium for the last complete fiscal year (1907)^a prior to prohibition

amounted to \$600,417.85 out of a total revenue of \$17,445,489.49, being 3½ per cent of the total revenue. This fact is presented as indicating the strength of the conviction of the Government regarding the necessity of the legislation enacted.

It has been pointed out in the above report that there were two chief difficulties in the way of making Philippines act 1761 wholly effective: First, inadequate facilities and a lack of money and men for the vigorous enforcement of the law. These difficulties were laid before the governor-general before the commission left the islands in December, 1908. Since then a new bill has been passed that amends act 1761, that is, act No. 1910, first Philippines legislature, second session. Section 26 of act 1761 has been amended so as to provide that 25 per cent of all fines imposed for violation of the act shall be paid to the person who furnishes the original evidence leading to the detection of the offense. Another difficulty has been cleared away. It was learned by the commission that many trial judges were inclined under Philippines act 1761 to impose small fines for violation of the act. Under this lenient procedure such fines were regarded by violators of the act as a license to smuggle and use opium. Section 32 of act 1761 provided that offenses against the act—

shall be punished by a fine not exceeding ten thousand pesos, or by imprisonment not exceeding five years, or by both such fine and imprisonment, in the discretion of the court.

Section 4 of act 1910 amends section 32 of act 1761 as follows:

Any person violating any provisions of this section shall be punished by a fine not exceeding ten thousand pesos nor less than three hundred pesos or by imprisonment for not exceeding five years nor less than three months, or by both such fine and imprisonment, in the discretion of the court.

Act 1910 was enacted May 19, 1909. It is hoped that the penal sections of act 1761 as now amended will do much toward obviating the difficulty met with in enforcing that act.

But the real difficulty in the way of enforcing act 1761 is found in the impossibility of preventing smuggling. A constant supply of contraband opium is introduced at different points in the islands from Hongkong, Singapore, and British North Borneo, and this can not be stopped without incurring great expense for an enlarged and efficient preventive service. It seems unlikely that this difficulty will be wholly solved by the Philippine government without international aid.

Later it will be shown that in the international commission at Shanghai the difficulties of the Philippine government were urged on the commission as a whole in favor of a resolution which called upon opium-producing countries to prevent at ports of departure the shipment of opium to countries which prohibit its entry. That resolution was passed, and should be conventionalized in the international conference that has been called by our Government to finally deal with the production and international traffic in opium and its products.

TARIFF LAWS OF THE UNITED STATES ON OPIUM UP TO 1861, AND THEREAFTER ON CRUDE OPIUM FOR MEDICINAL PURPOSES.

The first mention of opium in our tariff acts was in that of July 14, 1832, section 3, where, amongst other articles, it was exempt from duty. In the tariff act of March 2, 1833, section 5, opium is again mentioned, and placed in the free list.

In the tariff acts that followed, the duty on opium frequently changed. These changes may be seen at a glance by consulting the accompanying table. This table is concise as to the amount of our importations of the different forms of opium and morphia since 1860, and the various duties imposed from time to time on each of them, the value of the importations, and the duty totals. In columns 16-21 there will be found census returns of our Chinese and total population and calculations as to the per cent increase in the importations of opium, collated with calculations as to the per cent increase in our Chinese and total population, per decade. The significance of these calculations and collations will be referred to later.

In the tariff act of August 30, 1842, opium for the first time is made to pay a duty. In section 8, paragraph 2, of that act an impost of 75 cents per pound was placed on the drug. It will be noticed in the accompanying table, column 1, that, in anticipation of the change of opium from the free list to the dutiable list, there was, during the year 1841, a large speculative importation of the drug. In the tariff act of July 30, 1846, Schedule E, opium, amongst other articles, was put in the ad valorem list and made to pay 20 per cent. The price of the drug about that time was in the neighborhood of \$5 a pound, and there seems to have been some difficulty in regard to invoicing under an ad valorem tax, so that by the tariff act of March 3, 1857, a specific tax of \$1 a pound was placed on the drug. In the year 1861 there were two tariff acts—that of March 2, imposing a duty of \$1, and that of August 5, imposing a tax of \$2 a pound on the drug. By the tariff act of June 30, 1864, the impost on crude opium was raised to \$2.50 a pound. This increase in the rate on crude or medicinal opium appears to have been for revenue purposes. The duty of \$2.50 per pound remained in force until the tariff act of July 14, 1870, when the impost on this form of the drug was reduced to \$1 per pound. The latter rate was retained in the tariff act of March 3, 1883; but in the tariff act of October 1, 1890, the drug was again placed in the free list. It remained in the free list in the tariff act of August 27, 1894; but on the passage of the tariff act of July 24, 1897, it was again made to pay \$1 a pound.

The taking of crude or medicinal opium from the free list of the immediately preceding tariffs and the imposition of \$1 a pound upon it in the Dingley Act seems to have been due to the fact that the manufacturers of morphia had succeeded in securing a duty of \$1 an ounce on this alkaloid, a duty that was practically prohibitive.

It will be noticed that, in anticipation of the transfer of crude or medicinal opium from the free to the dutiable list, there was in 1897 a large speculative importation of the drug. This speculative importation has slightly changed the relative values of the totals of importations in ten-year periods, as set down in the table.

TARIFF LAWS ON SMOKING OPIUM.

It became clear in the early fifties that a large percentage of the opium imported in previous years was not crude opium for medicinal purposes, but smoking opium imported into San Francisco and other Pacific ports with the primary intention of supplying the Chinese. Several volumes have since been published on the misuse of opium in this country, and in them it has been stated on what appears to be

good authority that the habit of smoking opium began about 1860 to spread from our Chinese to the vicious elements of our white and black population. This was more particularly true of the Pacific coast.

In the accompanying table the importations of smoking opium from 1860 onward are separately enumerated (column 6). But it should be borne in mind that the importations for the years 1860-1863 are estimated. During these years, although smoking opium was not separately enumerated in the tariff acts, yet collectors of customs made some attempt to classify the various forms of opium entering the country. In the tariff act of July 14, 1862, smoking opium was taken from the general opium schedule and placed in a schedule by itself and taxed 80 per cent ad valorem.

Since 1860 it may be said that we have a fairly complete record of the importations of this form of the drug, and in some measure it may be calculated what the effect of the admission of it to this country has had on our population as a whole.

Just what the object was in placing a heavy ad valorem tax on smoking opium has not been determined. It was known in the early sixties that the use of the drug was demoralizing even to the Chinese, and it is probable that the heavy ad valorem taxation was with the object of excluding it from the country. Be this true or not, the heavy tax had one effect—the customs returns for this form of opium began to decline, and the collectors of customs on the Pacific coast found themselves confronted with serious smuggling operations. In spite of this, a still heavier ad valorem tax (100 per cent) was placed on it by the act of June 30, 1864. The customs returns for this form of the drug continued to recede, and smuggling operations were extended to a vast scale.

Taking into consideration the cost of producing and carrying to our shores a pound of smoking opium, it was concluded by the collectors of customs that the drug could not bear a higher rate of taxation than \$6 a pound; so that in the tariff act of July 14, 1870, it was taken from the ad valorem list and for the first time taxed specifically at \$6 a pound (column 9). Under this rate it was admitted until the tariff act of March 3, 1883, when the specific tax was raised to \$10 a pound. In the tariff act of October 1, 1890, the rate of smoking opium was increased to \$12 a pound.

It will be observed in the table (column 6) that as the result of the high specific rate of \$10 and \$12 a pound the importation of smoking opium apparently fell off. But this was only apparent, for again collectors of customs on the Pacific coast were confronted with huge smuggling operations. In addition a large quantity of crude medicinal opium was turned into smoking opium in all parts of the country where Chinese had settled. The result of all this was a considerable correspondence between the Treasury Department and the collectors of customs as to the rate that smoking opium would bear without leading to clandestine operations.

So vital had this question become that, on the 12th of January, 1888, Mr. C. S. Fairchild, the then Secretary of the Treasury, was impelled to write to the then Speaker of the House of Representatives, Mr. Carlisle, recommending the passage of a bill to prohibit the importation of the drug. (Ex. Doc. No. 79, House of Representatives, 50th Cong., 1st sess.)

However, no effective action to prohibit importations of this form of opium resulted from the recommendation of Secretary Fairchild. On the contrary, the duty rate was raised to \$12 per pound in the tariff act (October 1, 1890). Smoking opium continued to be imported through the customs-houses, but in decreasing amounts as the result of the higher impost. The larger part of the market was now supplied by clandestine smoking opium or the same form surreptitiously manufactured from high-grade medicinal opium.

By the Dingley Act of July 24, 1897, the duty on smoking opium was again placed at \$6 a pound, experience having at last taught that it could not bear a higher rate without begetting an extensive surreptitious manufacture or serious smuggling operations. The amount that passed through the custom-houses under the latter act progressively increased from the time the act went into effect to the period we are reviewing.

The internal-revenue act of October 1, 1890 (26 Stat., 567), is recorded above. It has been stated that the passage of this act to permit the manufacture of smoking opium in the United States had some relation to the high duty of \$12 a pound imposed on the imported drug by the tariff act of October 7, 1890; that there was in fact an attempt under a high tariff to exclude smoking opium from the United States for the benefit of American citizens who wished to engage in the manufacture of the product.

TARIFF ON MORPHIA AND ITS SALTS.

We need not go into the details in regard to the tariff on morphia and its salts, as shown in the accompanying table (column 11). It suffices to state that the importations shown in the table from 1860 to 1890 were not beyond the medicinal needs of the country. About 1890, however, our manufacturers began to produce morphia profitably. Since then practically no morphia has entered the United States. The drugs classified as "morphia and its salts" are the rarer and more recently precipitated derivatives of opium and morphia, such as codeia and heroin. Nevertheless, each ounce of morphia or its salts may be taken to represent a pound of crude or medicinal opium and will be so considered in some later calculations that are to be made.

TARIFF AND OTHER LAWS GOVERNING THE IMPORTATION, MANUFACTURE, AND DISTRIBUTION OF COCAINE.

Mention has been made that in the study of the opium problem as it affected the United States the American opium commission found it necessary to take account of the new cocaine evil which threatens this country. A vast amount of reliable evidence has been furnished by the importers and manufacturers, pharmacy and police officials in this country on the evils that result from the misuse of this drug.

In the recent hearings before the Ways and Means Committee of the House and the Finance Committee of the Senate importers and manufacturers of this drug testified their desire that the importation and distribution of it should be strictly controlled by federal legislation. There follows a table showing our estimated importa-

tions of coca leaves to 1905 in dollars, and from that year onward the number of pounds of coca leaves imported per annum, with the rate of duty and the value. It will be noticed that there was a large importation of both coca leaves and cocaine in 1909 in anticipation of the duty changes made in the last tariff act.

Imports of coca leaves and cocaine since the first years of their separate enumeration in the customs returns.

Fiscal year.	Coca leaves.	Rate of duty.	Value.	Cocaine.	Rate of duty	Value.	Duty.
	<i>Pounds.</i>			<i>Ounces.</i>	<i>Per cent.</i>		
1898.....		Free.....	\$53,752.00		25	\$59,660	\$14,915.00
1899.....		Free.....	28,388.00		25	40,141	10,035.25
1900.....		Free.....	501.00		25	112,375	28,093.75
1901.....		Free.....	483.00		25	176,948	44,237.00
1902.....		Free.....			25	254,704	63,576.00
1903.....		Free.....	249,798.00		25	224,453	56,113.25
1904.....		Free.....	323,405.00		25	74,446	18,611.50
1905.....		Free.....	342,518.00		25	10,391	2,597.75
1906.....	2,650,141	Free.....	488,545.00		25	10,782	2,695.50
1907.....	1,515,616	Free.....	212,424.00		25	37,585	9,396.25
1908.....	633,121	Free.....	76,109.00	3,792	25	4,108	1,025.00
1909.....	1,109,649	Free.....	126,881.00	32,272	25	48,343	12,086.00

There was no enumeration of the number of ounces of cocaine imported into this country until the fiscal year 1908, in which year, as the table shows, 3,792 ounces were imported. For the years previous to 1908 the value in dollars of imported cocaine is shown, and the rate of duty. Coca leaves, until the recent tariff was enacted, were admitted free, and cocaine paid 25 per cent ad valorem. The admission of coca leaves to this country was governed by paragraph 528 of the tariff act of July 24, 1897. Under this paragraph coca leaves were confounded with cacao leaves and were in the free list. The admission of cocaine was governed by paragraph 3 of section A of the same act, which placed a 25 per cent ad valorem duty on alkaloids amongst other things.

In the discussions and hearings on the food and drugs act the attention of Congress was called to the growth of the interstate traffic in cocaine, and in the act of May 27, 1908, making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1909, there appeared a provision to the effect that—

No part of the appropriation herein made shall be used for the carrying in the mails of any malt, vinous or intoxicating liquors, or intoxicating liquors of any kind, or any cocaine or derivative thereof.

This provision was not repeated in the appropriation act of the following year. The provision in the act of June 30, 1909, does not seem to have been of much service in preventing the passage of cocaine through the mails.

Just how the cocaine evil has sprung into existence in the United States, how it has spread, and the best means for combating it by federal legislation will be dilated upon in later pages.

PART II.

THE RESULTS OF THE INVESTIGATION OF THE OPIUM PROBLEM AS IT AFFECTS THE UNITED STATES.

The preceding pages show in as concise a manner as possible the treaty, tariff, excise, and other laws under which the opium traffic was conducted by citizens of the United States up to the appointment of the American opium commission July 1, 1908. The opium problem of the Philippines has been treated as special and by itself.

It seems clear as it concerns the continental United States that neither treaty, tariff, excise, nor other laws bore so heavily on the opium traffic, or on those engaged in it, as to regulate the importation and confine the use of crude or medicinal opium to legitimate medical channels. On the contrary, vast amounts of this form of the drug have poured in ever-increasing quantities into the United States, while the opium-smoking habit, outlawed by nearly every State and municipality in the Union, appears to have been encouraged by the tariff and excise laws permitting its importation and manufacture.

In addition to the steady growth of the misuse of opium, an unforeseen and almost strictly American vice had sprung into existence during the last twenty years, adding its terrors to the drug problem which confronts the American people to-day. This has been brought about by the unrestricted importation of coca leaves and the unregulated manufacture and distribution of cocaine, a substance of no real use whatever except in the hands of the surgeon.

It has been stated that it was found impossible to study the opium problem of the United States without taking into consideration the collateral vices of cocaine and other habit-forming drugs, so that the discussion which follows covers not only the opium problem of the continental United States, but those other drug vices that have shown head in recent years.

The facts about to be presented were arrived at by consultation with officials in Washington who had made a previous study and had a special knowledge of the drug habit. Collectors of customs have added their store and offered advice as to the best means to control the importation and interstate traffic in habit-forming drugs. Reports have been received from time to time from the state boards of pharmacy and public health; also from the police departments in most of our cities and from state and municipal organizations of a semipublic character interested in the suppression of the use of these drugs. Advice was sought from over 1,200 of our most learned physicians and surgeons; also from the heads of our national medical associations and its state branches.

But in many ways the most important guides to securing facts were those gentlemen who for many years have been engaged in the importation of opium and coca leaves and the manufacture and distribution of their products throughout the country. Though at first there may have been some suspicion of the attempt on the part of the Department of State to study the opium question at such close quarters, later experience demonstrated that none in our community is more anxious to see the illegal use of opium and other habit-forming drugs suppressed than those who have a financial stake in the business. Sales books were examined and the records of the annual output of

A tribute is due to the police departments of our large cities. At first there was a feeling that the information desired by the Department of State might be regarded as a test of the efficiency of that part of the police whose especial business it was to watch the sale and use of smoking opium in the Chinese communities of our large cities. But when the police officials were assured that the Department of State proposed to urge the immediate exclusion of this form of drug from the country they were relieved. It became apparent to them that one of the greatest evils they had had to contend with for thirty years would be obviated, for it had been found well-nigh impossible to check the sale and use of smoking opium in view of the fact that the Federal Government was legalizing its importation. It will be shown that since the passage of the opium law of February 9, 1909, the suppression of the use of smoking opium in this country is now a lighter police problem than it was.

THE EFFECT OF OUR TREATIES, TARIFFS, AND OTHER STATUTES ON THE IMPORTATION AND DISTRIBUTION OF OPIUM AND OTHER HABIT-FORMING DRUGS WITHIN THE UNITED STATES.

Whatever may have been the intention of our Government in imposing the various duties on the different forms of opium imported into the United States, it did not result in the production of opium in this country. The poppy (*Papaver somniferum*) from which opium is derived is grown extensively in some parts of the country, but almost solely for its seed. This is more especially true of the State of California, where there is a large annual production of the seed, used as a food by the Syrian and other near eastern members of our population. The seed is also produced for its light oil, much used in the making of artists' colors. Except in a few instances, where physicians have experimentally endeavored to grow the poppy for opium, no attempt has been made to grow the plant for this purpose.

Our Department of Agriculture has within the last few years grown the poppy, the object in view being to ascertain the practicability of obtaining direct from the dried capsules morphia and the other alkaloids of opium. The total amount grown in the year 1907 covered 6 acres and yielded 9,600 pounds of dried capsules.

In the United States there is the proper soil, and were it economically profitable there is no doubt that the opium-yielding poppy could be grown in this country and that amount of opium needed for home consumption produced within our own borders. But it is unlikely that an attempt will be made in the near future to produce opium in the United States. The cheapness of labor in the present opium-producing countries from which we obtain our crude or medicinal opium (Turkey and Persia) precludes such a venture.

Nor have the tariff duties imposed on the various forms of opium prevented an unnecessary and largely increasing importation of the drug to this country. It will be seen by consulting the accompanying table that since 1840, in ten-year periods, there has been a large and progressive increase in our importations of not only smoking opium (column 6) but also of crude or gum opium intended for medicinal purposes. Be it under a small ad valorem tax, a high specific tax, or in the free list, opium has poured into the country to supply, as will be shown later, a large illicit demand for the drug.

The accompanying table is largely self-explanatory; but it should be stated that for the decade 1840-1849 the imports, as shown in the table (column 1), are largely estimated. From reports made by the collectors of customs, it is certain that we may add another 20 per cent to the importations of that decade. In the third decade of the table, reading from below upward—that is, 1860-1869—it may be said again that the importations of crude or medicinal opium, as tabulated, are largely estimated, especially for the years 1861-1865, when our civil war was on. Our federal customs returns of that time did not record the amount of this or any other form of opium that entered southern ports. Undoubtedly the amount of crude or medicinal opium was large and would considerably swell the total importation of 1,103,054 pounds for the decade 1860-1869. On account of the war there was a large demand for opium to meet medical necessities, and the increased importations of this decade over the previous decade may be regarded as normal. From 1870 to the present time the importations, as shown in the table of crude or medicinal opium, may be accepted as representing the actual amount of this form of opium which has entered and been consumed within the United States. They are net figures, for but little crude or medicinal opium has ever been exported from this country.

PER CENT INCREASE IN THE IMPORTS OF CRUDE OR MEDICINAL OPIUM
COMPARED WITH THE PER CENT INCREASE IN POPULATION BY
DECADES.

The accompanying main table has its columns numbered for convenience of reference. It will be seen in columns 16 and 17 that our population since 1860 has been tabulated by census periods, Chinese in column 16 and all others in column 17; also that in columns 18 and 19 the per cent increase in our Chinese and total population per census period has been calculated and compared to the per cent increase per decennial period in our importations of crude or medicinal opium (column 21) and opium prepared for smoking (column 20). It is hoped that this method of demonstrating the growth of our American opium problem will be more effective than pages of opinion.

Dealing first of all with the question of the per cent increase in our importations of crude or medicinal opium per decade; it will be seen that importations of this form of the drug have not grown *pari passu* with our growth in population, but are far in excess of the latter.

As has been pointed out above, the various forms of opium imported into this country were not separately classified in our customs returns until 1864, so that for the decades 1840-1849 and 1850-1859 all forms of opium—smoking opium, aqueous preparations of opium, morphine, its salts, etc.—are all recorded in column 1 simply as importations of opium. But to assist in calculating the percentages of increase in importation of the later decennial periods, certain deductions have been made to show what proportion of the total imports for the decade 1850-1859 was crude opium for medicinal purposes or opium prepared for smoking.

From 1860 onward we have fairly accurate customs returns as to the per annum amount of smoking opium imported into the continental United States. It would seem from these returns, shown in column 6, that opium prepared for smoking represents about 25 per cent

of the total imports of all kinds of opium. Therefore, 25 per cent of the totals of importation for the decades 1840-1849, 1850-1859, as tabulated in column 1, have been deducted and placed to the credit of opium prepared for smoking (column 6). By this deduction it would seem that in the decade 1840-1849 we imported 338,194 pounds of crude or medicinal opium, and in the decades 1850-1859, 741,663 pounds. The per cent increase in the importations of this form of opium of the decade 1850-1859 over that of the decade 1840-1849 is shown in column 21 to be about 119 per cent, the per cent increase in our total population, as shown in column 19, being but 34.

The importations of all forms of opium for the decades we are reviewing are largely estimated, for undoubtedly during them a large amount of smoking opium was smuggled into the country to satisfy the needs of the Chinese, and is not recorded in our customs returns. Judging from the material at command, 20 per cent may be added to the recorded importations of both forms of opium for the decades 1840-1849, 1850-1859. But, taking the available returns as they are, it is an undoubted fact that in the decade 1850-1859 our importations of opium for medicinal purposes increased at least 119 per cent, as against a 34 per cent increase in our total population.

In the decade 1860-1869 the customs returns of importations of crude or medicinal opium are again largely estimated. As has been stated, during 1861-1865, the civil-war period, there was no federal record of the amount of opium that entered southern ports. It must have been large, and if these importations could be determined they would considerably swell the federal customs record of importations for this decade, which now stands in column 1 at 1,103,054 pounds. But taking the customs returns of importations of crude or medicinal opium for this decade, as they stand in column 1, it is found that as against 22 per cent increase in total population (column 19), there was a 48.7 per cent increase in the importations of this form of opium (column 21).

The per cent increase in our importations of crude or medicinal opium for the decade under review may, however, be looked upon as normal; for undoubtedly there was during 1861-1865 a large and legitimate demand for crude or medicinal opium to meet the medical requirements of the civil-war period.

For the decade 1870-1879, the total importation of crude or medicinal opium, as shown in column 1, was 1,926,023, as against 1,103,054 for the preceding ten-year period. The per cent increase in importations of this decade over the former was 74.6 (column 21), as against a 30 per cent increase in our total population (column 19).

There is nothing to show that up to 1860 there was a serious misuse of opium or other habit-forming drugs in this country, bar the practice of opium smoking by the Chinese; but following our civil war an abuse of crude or medicinal opium and its chief derivative, morphia, set in and spread over the entire country.

Since the civil-war period there has been a persistently larger per cent increase in our importations of crude or medicinal opium than in our population.

As against an importation of 1,926,023 pounds in the decade 1870-1879, we find an importation of 3,283,923 pounds for the decade 1880-1889 (column 1); that is, a 61.9 per cent increase in importations

(column 21), as against a 26 per cent increase in total population (column 19).

The decade 1890-1899 shows a 57.4 per cent increase in the importation of crude or medicinal opium (column 21) over the previous decade, as against a 21 per cent increase in total population (column 19). But the per cent increase in the importations of crude or medicinal opium for the decade 1890-1899, as shown in column 21, is somewhat artificial. For, during part of this decade, this form of opium was on the free list, and in anticipation of an impost of \$1 a pound by the Dingley tariff act, there was an unusual speculative importation of the drug in the year 1897.

When we examine the customs returns of the decade 1900-1909, as recorded in column 1, we find an importation of 4,800,088 pounds, as against 5,130,704 pounds for the previous decade. Now, and for the first time since 1850, it is found that the per cent increase of population exceeds the per cent increase in the importations of crude or medicinal opium. The estimated per cent increase in total population for the last decennial period is 15.9 per cent (column 19), as against a 6.4 per cent decrease in our importations of crude or medicinal opium (column 21).

An act (which will be found further on) governing the importation of opium went into effect on the 1st of last April, but it can not be said to have any marked effect on the importations of crude or medicinal opium for the fiscal year 1909. Therefore, the per cent decrease in the importation of crude or medicinal opium for the last decade over the decade 1890-1899 can not be regarded with too much gratification. Undoubtedly a large amount of the crude or medicinal opium speculatively imported during the decade 1890-1899 is still being held by the importers, and is being released when it can be sold profitably in competition with the importations of the decade 1900-1909.

The per cent increase in the importation of crude or medicinal opium for comparison with the per cent increase in population (estimated) for the census year 1910 is more truly ascertained by combining the importations of the last two decades. If we do this, it is found that the per cent increase in importations of this form of opium is 39, as against an 18 per cent increase in total population. So that it may be said with truth that, beginning with the year 1860, we have had an importation of crude or medicinal opium out of all proportion to the increase in our total population, or the needs of the country.

PER CENT INCREASE IN THE IMPORTATION OF SMOKING OPIUM COMPARED WITH THE PER CENT INCREASE IN POPULATION.

What has been said about the per cent increase in our importations of crude or medicinal opium as compared to the per cent increase in our total population may be repeated as regards our importation of opium prepared for smoking. Deducting 25 per cent from the importations classified as opium for the decades 1840-1859 (column 1), and crediting it to the account of smoking opium (column 6) we find that there was for the decade 1850-1859 a 119 per cent increase

The next decade, 1860-1869, shows an increase of 28.1 per cent in our importations of smoking opium (column 20) as against a 22 per cent increase in total population (column 19). But this 28.1 per cent increase in importations of smoking opium is too small; for whereas the calculation of the per cent increase in total population is based on census returns and is correct, the importations of smoking opium for the decade 1860-1869 are estimated. During the whole of this decade there was a high ad valorem tax on the drug, 80 per cent at one time and 100 per cent later (column 9). Large smuggling operations resulted, as has been previously pointed out. There would be no error therefore in adding 25 per cent to the total importations of smoking opium for this decade.

In the next decade, 1870-1879, there was an importation of 487,050 pounds of smoking opium as against an importation of 316,240 pounds for the previous decade (column 6). The recorded importations for the former decade may be taken as fairly correct; for the drug was taxed at but \$6 a pound (column 9), all that it could bear without inducing smuggling on a large scale. There was undoubtedly some smuggling and surreptitious manufacture even during the decade of 1870-1879, but taking the customs returns as they stand, there appears to have been a 54.8 per cent increase in the importation of smoking opium (column 20) as against a 30 per cent increase in our total population (column 19).

In the following decade, 1880-1889, the recorded importation of smoking opium was 859,889 pounds (column 6). During part of this decade, the drug was under an impost of \$6, but later was taxed at the rate of \$10 per pound (column 9). Neglecting the smuggled opium of this decade, there appears to have been a 76.4 per cent increase in the importations of it (column 20), as against a 26 per cent increase in our total population (column 19).

When we come to the next decade, 1890-1899, the table shows a 7.5 per cent increase in the importations of smoking opium (column 20), as against a 21 per cent increase in our total population (column 19). But here again we have to take under consideration the immense amount of this form of opium smuggled into the country or surreptitiously manufactured while the customs rate of \$10 and \$12 a pound prevailed (column 9).

Collectors of customs on the Pacific coast are of the opinion that the customs returns for the decade 1890-1899 represent only about 60 per cent of the amount of this form of opium which actually entered the country. Taking this under consideration, a 7.5 per cent increase in the importations of smoking opium for the decade under review should more properly stand as 75 per cent increase as against a 21 per cent increase in our total population. The greater per cent increase per decade in importations of smoking opium as against per cent increase in total population holds good for the decade 1900-1909. As against a 59.1 per cent increase in the former (column 20), there was but a 15.9 per cent increase of the latter (column 19). This per cent increase in smoking opium is remarkable, considering that the imports for 1909 are for nine months only.

Whatever errors must be allowed for in these calculations, there has nevertheless been a per cent increase in our importations of smoking opium out of all proportion to our per cent increase in total population; this, too, of a form of opium the entry of which should never have been legalized.

PER CENT INCREASE IN THE IMPORTS OF SMOKING OPIUM COMPARED WITH THE PER CENT INCREASE IN OUR CHINESE POPULATION BY DECADES.

The per cent increase in our importation of smoking opium is instructive when compared to the per cent increase in our Chinese population from 1850 onward. It shows beyond a doubt the extension of the habit of opium smoking from the Chinese to Americans. This extension began about 1865, and from that year onward there was an enormous increase in the importations of the drug compared to the increase in our Chinese population. The census returns make no mention of our Chinese population until 1860, when it was returned as 34,933. Assuming that our Chinese population in 1850 was 10,000, and comparing it with the recorded Chinese population of the census year 1860 (column 16), there appears to have been a 249.3 per cent increase in our Chinese population (column 18), as against a 119 per cent increase in our importations of smoking opium (column 20). The calculation up to 1860 is not exact, but is based on deductions. But, allowing for all errors, there was undoubtedly a large importation of smoking opium between 1850 and 1859 to meet the demands of the newly arriving Chinese on our Pacific slope, but this importation was not in excess of the growth of our Chinese population. It will be shown immediately that the habit of smoking opium was contracted by large numbers of Chinese after arriving in the United States.

In the next decade, 1860-1869, we are on more solid ground, and it will be seen that there was an 80 per cent increase in our Chinese population (column 18), as against a 28.1 per cent increase in our importations of smoking opium (column 20). But, as pointed out above, the recorded importation of 316,240 pounds of smoking opium for this decade (column 6) was quite under the mark. It was probably in the neighborhood of 400,000 pounds. Even in that case the per cent increase in the importations of smoking opium for the decade 1860-1869 was considerably less than the per cent increase in our Chinese population for the same decade.

In the decade 1870-1879 there was a 66.7 per cent increase in our Chinese population (column 18), as against a 54.8 per cent increase in our recorded importations of smoking opium (column 20). But here again 25 per cent of smuggled smoking opium should be added to the 487,050 pounds of smoking opium imported and recorded during this decade (column 6). That being so, the per cent increase in the importations of smoking opium for the decade 1870-1879 was much larger than the per cent increase in Chinese population. In the decade 1870-1879 we see for the first time the importations of smoking opium keeping pace with the growth of our Chinese population. No doubt this marks the wider use of the drug by the Chinese, but, more than that, it indicates what is now known as fact, the beginning of the use of smoking opium by Americans.

Since the year 1880, when the American-Chinese treaty limited the ingress of Chinese subjects to this country, the Chinese population of the continental United States has remained practically stationary. The accretions, as shown in column 16 of the table, have come to us on the purchase of Alaska and the annexation of Hawaii. It has been pointed out above that Chinese subjects were prohibited from importing smoking opium into the United States by the American-

Chinese treaty of 1880; nevertheless the per cent increase in the importations of the drug, which in the decade 1870-1879 caught and kept pace with Chinese immigration, now began to outstrip all accretions to our Chinese population.

For the decade 1880-1889 the per cent increase in our total Chinese population was but 4 (column 18), while the per cent increase in the importation of smoking opium was 76.4 (column 20). The per cent increase in the importation of smoking opium for this decade as compared to the per cent increase in our Chinese population is enormous, and occurred when the drug was admitted under a normal impost of \$6 a pound, and undoubtedly, as mentioned above, marks the more active spread of the habit of opium smoking from our Chinese to our white and negro population.

In the next decade, 1890-1899, the per cent increase in Chinese population stands in the table as 8.1 (column 18), the importations of smoking opium for this decade, as against the former decade, standing at 7.5 (column 20). But the latter per cent is altogether too small, as undoubtedly under the large duty of \$10 or \$12 a pound imposed during this decade (column 9) there was a large amount of the drug smuggled into the country. Twenty-five per cent at least can be added to the importations of smoking opium for the decade 1890-1899, as against the decade 1880-1889, thus giving us a 32.5 per cent increase in our importations of smoking opium for the former decade as against the 8.1 per cent increase in our total Chinese population.

This deduction is confirmed when we look at the importations of smoking opium for the decade 1900-1909. In this decade, under a normal tariff rate of \$6 a pound, there was an importation of 1,481,686 pounds, in spite of the fact that the importations for 1909, as shown in the table (column 6), represent the importation for nine months only; for, on April 1 last, it may be recalled, the law excluding this form of opium from the country went into effect. However, working out the percentages on the importations as shown in column 6, there appears to have been a 59.1 per cent increase in importations of smoking opium (column 20), as against a 1.2 per cent increase in our Chinese population (column 18). Thus, as in the case of our importations of crude or medicinal opium, there has been in nearly every decade a higher per cent increase in our importations of smoking opium than of our Chinese population.

In certain reports on the opium problem in the British Crown colonies, it has been shown that from 60 to 75 per cent of the Chinese immigrant coolies arrive from China free of the habit of opium smoking, but that they immediately, on their arrival, contract the habit, owing to the larger wage secured and the accessibility of opium and the divans in which it may be smoked. From inquiry amongst the leading Chinese in this country, it would seem that during the period of active Chinese immigration to the United States a great majority of the coolies arrived on our shores as nonsmokers, but that soon after arrival they contracted the habit, the same causes operating to this end as in the British Crown colonies. This, together with the spread of the habit to our own people, explains the enormous per cent increase in our importations of smoking opium as against the declining per cent increase in our Chinese and total population since 1860.

SUMMATION OF PER CENT INCREASE IN IMPORTATIONS
OF OPIUM COMPARED WITH PER CENT INCREASE IN
TOTAL POPULATION.

This whole question of the per cent increase in our importations of the various forms of opium, their derivatives and preparations, as compared with the per cent increase in our different populations, may be summed up in a few words. Taking an ounce of morphia and its salts to represent a pound of opium, and totaling up the importations of all forms of opium for the decade 1860-1869, we find that there was imported in that decade 1,425,196 pounds, as against 6,435,623 pounds for the decade 1900-1909, an increase of 351 per cent in our importations of all forms of opium for the five decades since the various forms of opium were separately enumerated in our customs returns. In this calculation the amount of smoking opium smuggled into the country in the last five decades is entirely neglected.

Turning to population, we find that our total population in 1870 was 38,558,371, and in 1909, as estimated in the table, 90,120,000, a per cent increase of 133. Thus against the 351 per cent increase in our importations of all forms of opium for the last five decades we find a 133 per cent increase in our total population. These figures speak louder than words.

DISPOSITION WITHIN THE UNITED STATES OF OUR IMPORTED OPIUM.

SMOKING OPIUM.

In view of the comparison just made of the per cent increase in our importations of smoking opium and the per cent increase in our Chinese population for the last seven decades, it may be thought that the use of smoking opium is confined to Chinese subjects in the United States. That is not so, however. It may be demonstrated by figures, as it has been by close inquiry in all our large Chinese communities, that much of our imported smoking opium is consumed by American habitués.

Last year a careful survey was made of the Chinese quarters of Philadelphia, New York, Boston, San Francisco, Portland, and other cities. From this inquiry it was learned that the following percentage of Chinese then resident in the United States smoke opium:

OPIUM SMOKED IN THE UNITED STATES BY CHINESE.	
[2 mace ^a per diem=73 taels ^b per annum=6 pounds per annum.]	
	Per cent.
Heavy smokers (2 mace), 6 pounds per annum; total number of heavy smokers, 12,000.....	10
Light smokers ($\frac{1}{2}$ mace), 1 $\frac{1}{2}$ pounds per annum; total number of light smokers, 18,000.....	15
Social smokers, 1 ounce per annum; total number of social smokers, 12,000..	10
Total.....	35
Nonsmokers.....	65
Total Chinese population, 120,000.	
	Pounds.
Average importation of opium for ten years, per annum.....	148,168
Heavy smokers (10 per cent) 12,000, at 6 pounds per annum.....	72,000
Light smokers (15 per cent) 18,000, at 1 $\frac{1}{2}$ pounds per annum.....	27,000
Social smokers (10 per cent) 12,000, at 1 ounce per annum.....	750
Total.....	99,750
	48,418

^a Mace=58.3 grains avoirdupois.

^b Tael=583.3 grains avoirdupois.

In the report submitted on behalf of the United States to the International Opium Commission at Shanghai, a somewhat different estimate was made as to the number of opium smokers among our Chinese population and the total amount of the drug consumed by them. But this estimate was found to be too high, on comparison with the scientific data submitted by the Japanese in regard to Formosa and our own delegation in regard to the Philippines; also on comparison with data submitted by the Chinese delegation.

The latter claimed, and the claim was accepted by the commission as a whole, that 27 per cent of the adult male population of the Chinese Empire were opium smokers. But we have other and more scientific data to proceed on. By a provision of Act No. 1461 of the Philippine Commission, which became effective on the 1st of April, 1906, adult male Chinese in the Philippines were permitted to smoke opium on the express condition that they took out a habitual user's license; 12,700 licenses were issued, but a conservative estimate of Chinese smokers themselves placed the total number of all classes of smokers at about 20,000, out of a total Chinese population of 55,000; that is, 36 per cent. The Japanese, who have a strict license and registry system in Formosa, submitted figures showing that 32 per cent of the Chinese male adult population of that island were smokers. So that if we allow for 35 per cent of smokers among our Chinese population—which is almost wholly adult male—we are well within the mark.

From careful inquiry, the Chinese smokers in this country have been classified as in the above table. That is, of our total Chinese population of 120,000, 10 per cent are heavy smokers, who consume a total of 72,000 pounds of opium per annum; 15 per cent are light smokers, who consume a total of 27,000 pounds per annum, and 10 per cent are social smokers, who consume a total of 750 pounds per annum, or a grand total of 99,750 pounds consumed by Chinese addicts. This leaves for the ten years 1900-1909 a per annum average of 48,418 pounds of smoking opium that must be accounted for. To this remainder of 48,418 pounds there must be added a large estimated amount of this form of opium smuggled into the country, or surreptitiously manufactured by the Chinese from crude or medicinal opium, which it has been their practice to purchase from importers. Just what the amount of smuggled or surreptitiously manufactured smoking opium is, can only be estimated.

The Hon. McKenzie King, now minister of labor in the Canadian cabinet, found in the course of his investigation of the opium question in Canada that in the coast cities of Vancouver, Victoria, and New Westminster, that there were at least seven factories carrying on an extensive business in the manufacture of smoking opium. He has stated in his published report that it was estimated that the annual gross receipts of these combined concerns amounted for the year 1907 to between six hundred and six hundred and fifty thousand dollars. Crude opium he found was imported from India and then manufactured into smoking opium; that these factories were owned, and the manufacture of smoking opium carried on by Chinese; and that it was asserted by owners of the establishments that all of the smoking opium manufactured is consumed in Canada by Chinese and whites. But Mr. King himself concluded that there was strong reason for believing that much of the opium produced was smuggled over the northwestern border of the United States.

Mr. King's conclusion has been confirmed by investigation and by reports of our collectors of customs on the Pacific slope. It has been known to the collectors for years that extensive smuggling operations were initiated by the Chinese opium manufacturers of Canada, and that it was next to impossible to combat them. A conservative estimate is that at least 20,000 pounds a year of this form of opium was smuggled from Canada into the United States. Accepting this estimate and neglecting entirely the amount of smoking opium surreptitiously manufactured in the United States, there remains to be accounted for 68,000 pounds of smoking opium consumed in the United States by others than Chinese.

It would be extremely unwise to state in figures the number of Americans who are addicted to the practice of opium smoking. There are no census returns on the subject, and the practice being a secret one, it is impossible to arrive at a definite conclusion except by deduction. In estimating the per cent of our Chinese population who are habitual smokers, we are on very solid ground, for we not only have the estimates made by the Chinese themselves in the United States, but the formal figures in regard to China, Formosa, and the Philippines. Further, opium smoking with the Chinese is a social, regular, and open custom. With Americans it is often social, seldom open and not regular, those of our people who indulge in it being largely of the outlaw classes, or others with irregular incomes and opportunities.

But by comparison of census and customs returns with established facts in China, Formosa, and the Philippines—that is, by working from the head of the problem tailward—it may be fairly deduced that Americans, in the continental United States, consume at least 68,000 pounds of smoking opium per annum. As just stated, the American smoker is largely of the outlaw classes, frequently in jail or workhouse. He smokes, therefore, only when free and in funds. His per annum consumption is never as large as that of the heavy Chinese smoker. But, allowing half a pound a year to each American smoker, it would seem that there are at least 150,000 Americans who are victims of the habit.

By working from the tail of the problem headward, this deduction is confirmed. In the course of investigations, inquiries were made of the police departments, physicians, wardens of jails, educated and intelligent Chinese opium habitués themselves, and of other reliable sources, in regard to the number of Americans who indulge in the habit of opium smoking. The highest estimate had in regard to such large cities as New York, Chicago, and San Francisco was 15,000 for each city; the lowest 5,000. If 7,000 is taken as the average of these three cities, and applied to our other larger and smaller northern, eastern, and western centers of population, it seems certain that the above deduction is correct.

It is gratifying to note that the habit of opium smoking has not affected the personnel of our army and navy, in spite of their ten years close contact with the Far East.

For the last forty years the public press of this country has teemed with accounts, sometimes highly colored, sometimes trivial, but nearly always quick with the truth in regard to the spread of the vice of opium smoking from Chinese subjects of our own population. It would serve no good purpose to submit that form of evidence here.

But it is an undoubted fact that about 1860 the opium-smoking habit began to spread from our Pacific coast over the Rockies and through our middle and eastern centers of population. Primary infection was from the Chinese, but it soon spread from white to white and from black to black. Nearly every State in the Union at once awoke to the peril of this vice, and state and municipal laws have been passed from time to time to counteract the evil; but it has come out quite clearly by investigation that it was impossible to effectually enforce state and municipal ordinances against opium smoking or the opening of opium divans in the face of the fact that the Federal Government by tariff laws permitted the importation, and by excise laws permitted the manufacture of the drug. It has been pointed out that this phase of the question is materially changed since the Federal Government prohibited the importation of this form of the drug.

It developed in course of inquiry that the great majority of the Chinese resident in the United States, even though they were openly smokers, recognized the moral and economic effects of the habit of opium smoking; that it emasculated and depraved them, and in the majority of cases led to economic disaster. The Chinese war on opium, begun in China by the Emperor's edict of September 20, 1906, was well known to the better classes, and numerous associations had been formed to impose the spirit of that edict on Chinese subjects in the United States. Hospitals had been established in which to treat the confirmed opium smoker. Considerable literature had been distributed, and nearly all classes were interested in the antiopium war in China, as read of in the native Chinese newspapers. Many Chinese druggists had even gone so far as to import antiopium remedies, much lauded in China, and where they had been used it was found that they were to a certain extent effective. Unfortunately, it has since proved that all of these remedies contain opium or morphine, so that the habitu  who was endeavoring to abandon opium smoking accomplished his purpose only by taking opium in some form internally. There was a consensus of opinion among the Chinese that the Federal Government should no longer legalize the importation of smoking opium.

One of the most unfortunate phases of the habit of opium smoking in this country is the large number of women who have become involved and were living as common-law wives of or cohabiting with Chinese in the Chinatowns of our various cities.

CRUDE OR MEDICINAL OPIUM.

General statement.—A canvass has been made of some 2,000 of the leading physicians and surgeons of the country, also of many of the large hospitals; the opinion of the medical profession is unanimous that the use of medicinal opium and its derivatives and preparations by the profession is much less than it was ten years ago. Medical opinion is also unanimous that there has been for many years a much heavier import of crude or medicinal opium into the United States than could be used in legitimate medical practice. The lowest estimate made, as to the number of pounds per annum, of this form of opium that should suffice for the licit needs of the American people was 50,000; the highest 100,000. Yet the average per annum importation of this form of the drug has been over 400,000 pounds for

the last ten years—that is, for a population estimated as between eighty-five and ninety millions—we are unnecessarily importing and using at least 300,000 pounds of this form of opium.

The estimates of the American medical profession as to the amount of opium that should suffice the United States are confirmed on looking to those countries where the use of opium is restricted by efficient national laws. Italy, with a population of about 33,000,000, imports and uses only six thousand and odd pounds of medicinal opium per annum; Spain, with a population of about 19,000,000 imports so small a quantity that it is not separately entered in her customs returns; Austria-Hungary, with a population of 46,000,000, imports and consumes between 3,000 and 4,000 pounds per annum; Germany, with a population of about 60,000,000, imports about 17,000 pounds for home consumption; Holland, with a population of about 6,000,000, imports and uses about 3,000 pounds per annum. All of these countries have strict national laws regulating the prescribing of opium, morphine, and other habit-forming drugs. Owing to efficient government regulation and the good sense of their people they are not confronted with the problem that confronts us to-day.

The opinion of the medical profession in regard to the amount of opium that should suffice for the American people must be regarded as the most valuable opinion that can be had. In conjunction with what has been stated in regard to the use of opium in European countries, it is conclusive that there is an enormous abuse of opium and its preparations in the continental United States. However, to make assurance doubly sure, another source of information was tapped. Both by letter and by personal interview it has been learned from the importers of opium and the manufacture of morphia, that from 70 to 80 per cent of the crude or medicinal opium imported into the United States is manufactured into morphia and that at least 75 per cent of such morphia is used by habitués. The remainder of the crude opium imported into this country is manufactured into other preparations, such as laudanum, Dover's powder, etc., while a large proportion of the morphia is used in the manufacture of proprietary and patent medicines.

In the course of this inquiry some difficulty was at first encountered in obtaining reliable information from the importers and manufacturers of opium and its preparations. But on the whole the importers and manufacturers have been most frank in supplying information and in their expressions against the growing misuse of habit-forming drugs in this country. Much of the information on which this report is based was obtained from business men who have a large economic interest in the drug trade. But, almost without exception, they have aided in gathering facts, and the common feeling among them is that an efficient federal measure must be devised to control the importation and distribution of these drugs in interstate commerce.

Now, as to what becomes of the excess of crude or medicinal opium over and above the amount used for legitimate medical purposes: Reports have been received from the boards of pharmacy, boards of health, police commissioners; in fact from every state and municipal organization concerned in enforcing state and municipal laws against the use of habit-forming drugs. The federal departments concerned in the enforcement of the food and drugs act have also been consulted,

It will be realized how great was the difficulty in gathering data in regard to drug abuse. Habitues could not be counted, and those physicians and druggists who were known to be selling large quantities of habit-forming drugs unlawfully in every case promptly denied the practice; so that in enumerating the classes of our population who are addicted to the use of opium and its products one has had to depend almost altogether on estimates. One of the most reliable sources of information was reports from state prisons, jails, and houses of correction throughout the country. From these sources fairly reliable estimates could be made as to the per cent of the outlaw classes who are drug addicts. Estimates about to be made are based on the average of data collected from all parts of the country.

Before making a general statement, it is gratifying to note that in the case of our colleges and universities the use of habit-forming drugs is practically unknown. In regard to the larger question of the general distribution and final destination of opium, its derivatives and preparations, the average of reports from 25 of our States seems to show that about 6 per cent of prisoners who enter our large jails and state prisons are addicted to the opium habit in some one of its forms, and that of the general criminal population 45.48 per cent are habitues. The average of reports from these States shows that 21.6 of unfortunate women and their hangers-on are addicts. In the medical profession of this same territory there appears to be an average of 2.06 per cent who use opium in some one of its forms; of trained nurses, 1.32 per cent. Of the other professional classes in the 25 States that have been used as a basis of calculation, it would seem that there is 0.684 per cent of opium addicts, and that among the general adult population—that is, including all our adult population outside of those already enumerated—0.18 per cent. Of course, these are all average percentages, and apply wholly to our adult population. Statistical statements made by reliable manufacturers show that the use of morphine in the rural districts of some of our Eastern States has increased 100 per cent in the last ten years. An estimate made from the sales book of one firm would show that in one or two of these States it has increased 150 per cent. As has been said before, these percentages are but estimates, and must be so taken.

One gratifying result of this investigation was the finding that since the passage of the national food and drugs act, and the state and municipal laws modeled upon it, there has been an average reduction of 30 per cent in the sale of proprietary and patent medicines containing opiates.

It has been pointed out that following the civil war the abuse of medicinal opium and its chief derivative, morphia, set in and spread thickly, or thinly, but over almost the entire country. There are few families some member of which has not become an addict. There is abundant evidence that one of the prime causes of the misuse of opium and morphia in the United States was the physical and mental overstrain or breakdown of a large number of our population during or immediately following the civil war. Opium and morphine habits contracted at that time by those who had some real use for the drugs too often extended as an unnecessary and pernicious habit to younger members of families or associates.

The careless prescribing of physicians, the complaisant selling of druggists, did not work for restriction; patent and proprietary medi-

cines containing opium and morphia flooded the country, and undoubtedly some unscrupulous manufacturers have studied to defeat well-meant but defective state laws. No federal laws controlled the importation, manufacture, and interstate commerce in the drugs. A certain amount of ignorance as to the danger in the use of opiates, a certain amount of daring or disregard of consequences by large numbers of people, all these have been factors in bringing this country to the position where it may be accused, on some basis of fact, of being an opium-consuming country.

DISPOSITION OF COCAINE WITHIN THE UNITED STATES.

It is a generally known fact that during the last twenty years cocaine has been diverted from its original use by the surgeon to pander to the supposed needs of large numbers of our population. It is estimated, after wide consultation, that 15,000 or 20,000 ounces of this drug are sufficient to satisfy the demands of surgery in the United States. To-day there are manufactured at least 150,000 ounces of this drug, the larger part of which is put to improper uses.

Twenty years ago there was some use of this drug internally, but it was found that the anæsthetic effect of the drug on the mucous membrane of the stomach led to loss of appetite, and finally great emaciation and death, if the habit was not conquered. The ingenuity of certain pharmacists overcame the objection to the internal use of cocaine, and it was not long before various proprietary and patent preparations, catarrh remedies, etc., were put on the market which contained a large percentage of the drug. Those who had fallen to the habitual use of cocaine found that they could get the stimulating effect of the drug by snuffing it, and so absorbing it through the nasal mucous membrane. There is no doubt that the widespread abuse of cocaine is largely due to the fact that it was made accessible to those who wished to use it, in the form of catarrh powders and liquids. It was not long after the essential quality of the patent nostrums became known that disreputable physicians, druggists, and other dealers defied state and municipal laws by selling the drug pure or adulterated, more or less openly.

It is the unanimous opinion of every state and municipal body having to do with the enforcement of state and municipal antipoison acts that the misuse of cocaine is a direct incentive to crime, that it is perhaps of all factors a singular one in augmenting the criminal ranks. Quite apart from the criminal classes it converts the useful, orderly citizen who has become a habitué into a dangerous character. It wrecks him individually and jeopardizes the position of all who depend on him, and in the end drives him to crime. The illicit sale of the drug is the most difficult to cope with, and the habitual use of it temporarily raises the power of a criminal to a point where in resisting arrest there is no hesitation to murder. It is more appalling in its effects than any other habit-forming drug used in the United States.

In the report of the President's Homes Commission, 1909, Senate document No. 644, this question of the misuse of cocaine has been partially discussed and brought to the attention of the Government. But there is a phase of it that has not received due attention; that is the encouragement of the use of the drug among the humbler ranks of the

negro population of the South. It has been stated on very high authority that the use of cocaine by the negroes of the South is one of the most elusive and troublesome questions which confront the enforcement of the law in most of the Southern States; and that it seems almost impossible to get at the facts when prosecutions are undertaken. Even after the police feel certain that they have facts on which to proceed they find it next to impossible to prove them by reliable witnesses. The cocaine seller and buyer are equally anxious to conceal their transaction; and, as the vendors of the drug usually put it up in small amounts, it is an easy matter to distribute it without detection. It would seem on first sight that much of what is known about the abuse of cocaine by the negroes of the South is based on gossip or irresponsible statements. But this is largely because of the difficulty experienced in tracing the sources of the drug.

It is certain, however, that the use of cocaine among the lower order of working negroes is quite common. This class of negro is not willing, as a rule, to go to much trouble or send to any distance for anything, and, for this reason, where he is known to have become debauched by cocaine, it is certain that the drug has been brought directly to him from New York and other Northern States where it is manufactured. It is current knowledge throughout the South that on many public works, levee and railroad construction, and in other working camps where large numbers of negroes congregate, cocaine is handled among them by some method largely obscure. Undoubtedly many irresponsible local druggists are to blame, but the main supply of the drug for a particular construction camp is procured from wholesale dealers and jobbers in another State and distributed to the working gangs by peddlers, commissary clerks, and even contractors. There is an enormous profit by this method of handling the drug. It can be bought for from \$2.25 to \$2.75 an ounce, and it is the custom of the panderers to this vice to dispense it in 1 or 2 grain packages, for which they charge 25 cents. When divided into small packages, it can be carried without detection and sold from the pocket of a vagrant negro man or woman who passes among the construction camps and other places where negroes are employed.

Attempts have been made to send special officers among the construction camps for the express purpose of buying the drug; but it has been found that juries are reluctant to convict on evidence submitted by a known spy or informer. In the South the drug is commonly sold in whisky dives, and it seems certain that a large quantity of the liquor sold in these illicit places is laced with cocaine. The combination of low-grade spirits and cocaine makes a maddening compound. Inquiries have been made as to whether or not cocaine is forced by contractors on the humble negro worker. There is some evidence that they do so under the impression that they can get more and better work from their employees.

Looking at the wider aspect of the use of cocaine throughout the United States, there is absolutely trustworthy information that the use of this drug has spread widely among the criminal classes of our large cities, that it is used by those concerned in the white-slave traffic to corrupt young girls, and that when the habit of using the drug has been established it is but a short time before the latter fall to the ranks of prostitution.

As an example of the free manner in which cocaine was distributed, it may be stated on reliable authority that it is only a short time since the drug was freely sold in the neighborhood of Mott street, in New York City, a conservative estimate being that at least a thousand ounces of the pure or adulterated drug were disposed of monthly, not only to habitués of that neighborhood, but to others from all over the city, who learned of the easy manner in which it could be procured. Here, again, as is the common practice, the drug was put up in small packages of from 1 to 5 grains and sold by the vendors from their pockets. These receptacles were at one time as common as cigarette stubs in the streets of certain sections of New York. Stringent laws have been passed by the State of New York and other States to meet the abnormal use of cocaine and prevent the sale of the drug except on a physician's prescription. These state laws have been partially successful, but they can not be made really effective until there is interstate control of the traffic. It has been authoritatively stated that cocaine is often the direct incentive to the crime of rape by the negroes of the South and other sections of the country.

Apart from the outlaw population, the use of cocaine threatens to creep into the higher social ranks of the country. It was stated in discussing the habit of smoking opium that no sign of this habit had appeared in the rank and file of the navy or army, in spite of the close contact of the services with the Far East. But there seems to be no doubt that an ever-increasing number of our soldiers and sailors are falling to the use of cocaine. This has grown out of the evil practice of lacing the alcoholic beverages sold to them in the lower class of saloons resorted to by the men.

The misuse of cocaine is undoubtedly an American habit, the most threatening of the drug habits that has ever appeared in this country, and there is no uncertain feeling in every State and municipality of the country that the habit will continue to spread unless there is some coordination of state laws and federal control of the manufacture and interstate commerce in the drug by the Federal Government.

CONCLUSIONS IN REGARD TO THE FOREGOING.

Such, then, was the state of the opium question and the use of other habit-forming drugs in the United States at the time of the appointment of the American Opium Commission.

The entire matter may be summed up in a few words: The opium traffic in the Far East has been steadily discountenanced by the United States through treaties made with far eastern countries resisting or prohibiting American citizens engaging in the traffic. Chinese subjects resident in the United States were excluded by the American-Chinese treaty of 1880 from the privilege of importing smoking opium into this country, and a statute had been passed to prevent American citizens from forcing opium on unprotected peoples of certain of the Pacific islands.

On the other hand, our Government had for half a century legalized the importation of opium prepared for smoking, which not only debauched the young, robust Chinese immigrant coolies who arrived on our Pacific slope before 1880, but the use of which had steadily spread to a large part of our outlaw population, and even into the

higher ranks of society. A statute had been passed permitting the manufacture of this form of opium by American citizens; but, fortunately, the tax imposed had been sufficiently high to prevent American citizens attempting such manufacture. From the first scheduling of crude or medicinal opium there had been a continuous unrestricted import of it. The manufacture of morphia from this form of opium to supply our own population had come to be a monopoly of American manufacturers, and the production of it had grown enormously; large numbers in all social ranks had become debauched by the misuse of it. Nearly every State in the Union and nearly every large municipality had, from time to time, passed stringent pharmacy or police acts to control the misuse of the different forms of opium and its products; but these laws were largely ineffective because the Federal Government made no attempt to control the importation or manufacture and distribution of the drugs in interstate commerce. The police departments of our large cities had found it next to impossible to suppress the sale and use of smoking opium by Chinese to Chinese and to depraved Americans who frequented the resorts of the Chinese sections of our large cities.

A new drug problem appeared about twenty years ago, and had grown with a rapidity that marked the avidity of our criminal classes in acquiring a new vice; latterly it had exhibited a strong tendency to spread, corrupt, and ruin many who belonged to the higher ranks of society. This new vice, the cocaine vice, the most serious that has to be dealt with, has proved to be a creator of criminals and unusual forms of violence, and it has been a potent incentive in driving the humbler negroes all over the country to abnormal crimes. Thoughtful persons in every walk of life, not the least important of whom are the importers and manufacturers of these habit-forming drugs, had come to the conclusion that the time had arrived for a strict federal control of the importation, manufacture, and distribution of such drugs in interstate commerce.

NECESSITY OF ACTION BEFORE THE ASSEMBLING OF THE INTERNATIONAL OPIUM COMMISSION.

Another aspect of the opium question loomed large and was most important to our Government, considering that it had convened an International Opium Commission to study and report on the opium problem as it is seen in the Far East. While the diplomatic correspondence proceeded it became apparent to the Department of State that there was a large misuse of opium in the continental United States. When this had been sufficiently demonstrated by the opium commission, it became the bounden duty of our Government to take some steps to clear up the home problem before the American delegates to the International Opium Commission should be brought face to face with the delegations of the other powers. Otherwise the American people stood to be accused of living in a glass house that no doubt would have been shattered on their heads.

Based on investigations made in the United States during the summer and autumn of 1908, a letter was addressed to the department on October 26, 1909, calling attention to the two main facts that had been disclosed: First, that the Federal Government was legalizing the importation and manufacture of smoking opium in spite of

the fact that nearly every State and municipality in the Union had a law against its sale and use, and that it was absolutely necessary that this anomalous position should be cleared by prohibitory legislation before the meeting of the International Commission at Shanghai; second, that state and municipal laws would continue to be to a large extent ineffective as long as there was an unrestricted importation of crude or medicinal opium, its manufacture into morphine, and the uncontrolled distribution of both drugs in interstate commerce. The conclusion in regard to crude or medicinal opium as expressed in that letter was that the manufacture and distribution of it and of its products in interstate commerce should be controlled by the Federal Government acting through the Bureau of Internal Revenue.

As a result of these researches and recommendations, a bill was drafted based on the investigations of the opium commission. It aimed to absolutely prohibit the importation of smoking opium and to restrict the importation of other forms of opium to medicinal purposes. Congress promptly acted, and by February 9, 1909, the following act was approved:

[Public—No. 221; H. R. 27427.]

AN ACT To prohibit the importation and use of opium for other than medicinal purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That after the first day of April, nineteen hundred and nine, it shall be unlawful to import into the United States opium in any form or any preparation or derivative thereof: *Provided,* That opium and preparations and derivatives thereof, other than smoking opium or opium prepared for smoking, may be imported for medicinal purposes only, under regulations which the Secretary of the Treasury is hereby authorized to prescribe, and when so imported shall be subject to the duties which are now or may hereafter be imposed by law.

SEC. 2. That if any person shall fraudulently or knowingly import or bring into the United States, or assist in so doing, any opium or any preparation or derivative thereof contrary to law, or shall receive, conceal, buy, sell, or in any manner facilitate the transportation, concealment, or sale of such opium or preparation or derivative thereof after importation, knowing the same to have been imported contrary to law, such opium or preparation or derivative thereof shall be forfeited and shall be destroyed, and the offender shall be fined in any sum not exceeding five thousand dollars nor less than fifty dollars, or by imprisonment for any time not exceeding two years, or both. Whenever, on trial for a violation of this section, the defendant is shown to have, or to have had, possession of such opium or preparation or derivative thereof, such possession shall be deemed sufficient evidence to authorize conviction unless the defendant shall explain the possession to the satisfaction of the jury.

Approved, February 9, 1909.

REGULATIONS.

1. The term "opium" shall cover all forms of opium known to the trade, such as gum opium, powdered opium, denarcotized opium, granular opium, smoking opium, cooked opium, etc. The terms "smoking opium" and "opium prepared for smoking" have one and the same meaning.

2. The term "preparation" shall mean any product, mixture, or compound containing or representing opium.

3. The term "derivative" shall include the following alkaloids, their salts or combinations, obtained either directly or indirectly, and such other derivatives obtained from opium as it may be found necessary to include in the future: Morphine, codeine, dionine, diacetyl morphine, heroine, peronine, their chlorides, sulphates, phosphates, etc., and all mixtures, compounds, or preparations containing any of the foregoing.

4. The term "for medicinal purposes only" shall mean the use of opium, or preparations or derivatives thereof, for the treatment, mitigation, or prevention of disease of man or other animal.

5. Delivery of opium in any form or any preparation or derivative thereof shall not be permitted, unless for medicinal purposes, and smoking opium or opium prepared for smoking shall be seized forthwith as an illegal importation and shall be destroyed according to law.

6. Opium (other than smoking opium) and the preparations and derivatives thereof, imported for medicinal purposes, may be entered for immediate transportation in bond to and for consumption, or for warehouse, at the following-named ports and at no others: Baltimore, Boston, Chicago, Detroit, Honolulu, New Orleans, New York, Philadelphia, San Juan, San Francisco, Seattle, and St. Louis. Delivery will be made only in accordance with the following regulations, and upon entry thereof shall be detained by the collector until such regulations have been complied with. The collector of customs in all cases shall be satisfied that the importations are for medicinal purposes only. If the collector is not so satisfied, the importation shall be seized and disposed of as in the case of smoking opium.

7. Upon every importation of crude or unmanufactured opium, and the preparations and derivatives thereof, there shall be filed with the collector, at the time of entry, a declaration of the owner or ultimate consignee of the merchandise in the following form:

I, [name of representative], of the [name of firm or corporation], manufacturing chemists or dealers in drugs, do solemnly and truly declare that the [number] cases or packages of opium, preparations, or derivatives thereof, more particularly described in the invoice and entry herewith submitted and imported at [port], per [steamship], on the _____ day of _____, are expressly imported and are intended in good faith to be used by [name of firm or corporation] in the preparation of medicines or are to be sold by [name of firm or corporation] for medicinal purposes only, and such opium, preparations, or derivatives thereof are not intended to be used for smoking, as contemplated by the act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909, and the regulations of the Secretary of the Treasury prescribed thereunder.

8. The entire number of packages of opium or preparations or derivatives thereof offered for importation shall be ordered into the appraiser's warehouse for examination, and no delivery shall be made of crude or unmanufactured opium in quantities or packages containing less than 100 pounds; nor of morphine or its salts, either singly or assorted, in quantities or packages containing less than 50 ounces; nor of codeine, heroine, dionine, diacetyl morphine, their salts, or any other derivative of opium or its salts not otherwise provided for, either singly or assorted, in quantities or packages containing less than 25 ounces, and then only upon the report of the appraiser as to their quality, purity, and fitness for medicinal purposes, and upon compliance with the existing laws and regulations governing the importation of drugs and medicines.

9. Opium or preparations thereof deposited in bonded warehouse shall not be removed therefrom without payment of duties, and such duties shall not be refunded. (Par. 43, tariff act of July 24, 1897.)

10. Importers shall keep separately from other records a record of all sales of imported opium and derivatives or preparations of opium, showing the names of purchasers, their place of business, date of sale, and the name and quantity of the article sold, which record shall be open to the inspection of the proper customs officers.

The approval of this act occurred at a most opportune moment, for, on the 9th of February, 1909, the American delegation, after laying its report on the opium question in the United States and its possessions before the International Opium Commission at Shanghai, was able to announce that a new era had dawned in the United States while the International Opium Commission had been gathering. The above act as approved was read, and it undoubtedly had a marked effect on the proceedings and unanimous conclusions of the International Opium Commission.

PART III.

In the preceding pages there have been recorded the treaties, tariff, excise, and other acts under which the traffic in opium and cocaine has been carried on by citizens of the United States and the effects of these laws on the spread of the use of habit-forming

drugs in this country. It has been shown that none of the federal enactments up to the time of the passage of the opium-exclusion law of February 9, 1909, controlled in any way the importation and use of habit-forming drugs in the United States. That, on the contrary, there had been for the last fifty years an enormous growth in our importations of various forms of opium and cocaine, the uncontrolled transmission of them in interstate commerce, with a resultant abuse that had demoralized a large section of our population. It has been shown, also, that state and municipal laws alone are not sufficient to control intrastate traffic in habit-forming drugs, and that such laws will not be truly effective until there is a large measure of interstate aid.

Looking at the question broadly, it may be said in regard to the traffic in habit-forming drugs that each State in the Union in its relation to other States is much in the position that China found herself in her relations with opium producing and trafficking countries; for, historically and otherwise, it had been demonstrated that China could not control her internal production and abuse of opium without a large measure of interstate or international assistance. In three years more has been accomplished in the suppression of China's intraprovincial opium traffic than was accomplished in the preceding two centuries, this being entirely due to the interstate or international effort now being made in her favor for the control of her opium traffic and her abuse of the drug. In ever-increasing proportion our several States have for fifty years, from lack of interstate aid, been reproducing within themselves the opium problem as it appeared until quite recently in China. Studying by state and municipal laws to control intrastate traffic in opium, morphia, and other drugs; they have had to face the fact that the Federal Government by tariff law legalized the entry of a vicious form of opium, as well as an abnormal amount of medicinal opium, for which a market was found by the importers and manufacturers.

It is a developed opinion that no local law is sufficient to control the abuse of opium and other habit-forming drugs in this country, and that there must sooner or later be a superior federal law to assist the States in defending themselves from the menace. That the United States was able to assemble an International Opium Commission, and that it has proposed an International Opium Conference, with full powers to complete the work of the commission, is sufficient evidence that there is a developed world opinion that the production and traffic in opium should be subject to international law.

It is now time to examine the effects of recent federal legislation to control the importation of opium and cocaine and the limitations of such legislation.

RESULTS OBTAINED FROM THE OPIUM-EXCLUSION LAW OF FEBRUARY 9, 1909—ITS LIMITATIONS.

It has been pointed out above that the opium act of February 9, 1909, was an urgent and necessary act if the American Government was to appear in the International Opium Commission at Shanghai with fairly clean hands. That act especially aimed at and has been almost effective in excluding from this country opium prepared for smoking. It expressly provides for that, and that none but medicinal

opium may be imported into the United States; but it has not and can not effectively exclude the unnecessarily large amounts of the latter form of the drug that continue to pour into the country. Nor can it, except to a slight extent, affect the interstate traffic in medicinal opium and its preparations.

Reference to section 2 of the act will show that a heavy penalty is imposed on any person fraudulently or knowingly importing opium or any preparation or derivative thereof, or who shall receive the same by sale, or in any manner facilitate the transportation, concealment, or sale of such opium, etc., knowing the same to have been imported contrary to law—that is, for other than medicinal purposes. By regulations 5 and 7, issued under the act by the Secretary of the Treasury, it will be seen that an attempt has been made to prevent the delivery, and so, to a certain extent, the distribution of crude or medicinal opium in interstate commerce.

In the practical working of this act and the regulations issued under it, legally imported opium is almost immediately lost sight of on leaving the custom-house; for, although the importer may import in good faith and sell to the manufacturer or jobber in equally good faith, it is not possible for any of them to guarantee that the ultimate receiver or seller of the drug in interstate commerce is handling it for strictly medical purposes. Importers have made a genuine attempt to comply with the provisions of the act and the regulations issued under it, but there can be no doubt that the regulations impose too heavy a responsibility on those who in good faith import the drug for the declared purposes. A proposed bill to supplement this defect in the act by placing the interstate traffic in opium and other habit-forming drugs under federal control will be submitted in a moment. But the glaring defect of the February act is that it contains no provision against the possible intrastate manufacture of smoking opium. It does no more than exclude this form of the drug from the United States. If all of the States had uniform laws, which, in addition to forbidding the sale and use of smoking opium, also prohibited its manufacture, and if such laws were effective, there would seem to be no need for action on the part of the National Government to prevent the manufacture of this form of the drug in the United States. But only a minority of the States have such laws, and they are not always effective. This lack of general and uniform state laws to prohibit the manufacture as well as the sale and use of opium prepared for smoking is a question for the urgent attention of the States and the national conference of commissioners on uniform state laws. But until uniform and effective state legislation is an accomplished fact, it would seem to be the duty of the National Government to devise a measure to supplement and complete the law of February 9, 1909, which governs the importation and the proposed measure about to be submitted to govern the manufacture and interstate traffic in this and other habit-forming drugs.

The opium problem in the United States as it now stands needs to be confined by a triangle. One side of that triangle has been laid down by the act of last February. The importation of opium prepared for smoking and of other forms of opium except for medicinal purposes is prohibited by that act. If the proposed act about to be submitted, or some other act of Congress to control the manufacture and interstate traffic in the drug passes and is approved, the second

side of the triangle will have been laid down. The third side may be made from an internal-revenue act that will prohibitively tax the manufacture of smoking opium within the United States. It would seem that this third side could be had by amending the act of Congress of October 1, 1890 (26 Stat., 567), governing the manufacture of smoking opium in the United States. (Vide supra.) For instance, section 36 of that act, which imposes an internal-revenue tax of \$10 per pound on all opium manufactured in the United States for smoking purposes, might be so amended as to impose an internal-revenue tax of \$1,000 per pound. That part of section 36 which provides for the stamping of all smoking opium imported into the United States might be struck out, as this form of the drug is now a prohibited article under the act of February 9. Section 40 of the act, which provides for a penalty of not more than \$1,000, or imprisonment for not more than one year, or both, in the discretion of the court, might be amended by imposing penalties that would deter any citizen of the United States from entering on the manufacture of this form of the drug, and the requirement of section 40, in regard to the disposition of illegally manufactured opium, might be so amended as to provide for the destruction of the drug rather than for its sale to the highest bidder.

A proposed act amending along these lines the internal-revenue act of October 1, 1890, is appended to this report.

However these proposals may appeal, there can be no doubt on one point, namely, that the act of February 9 last accomplished the purpose for which it was primarily designed. No smoking opium has been legally imported since the 1st of last April, when the act went into effect, and any of the drug that was left on the hands of dealers on the latter date is now sold surreptitiously.

The collectors of customs at our large eastern seaports report that there has been no attempt to smuggle this form of opium into the eastern United States, but the western collectors report that attempts, some of them successful, have been made at Pacific ports and along the Mexican border.

In the northwestern collection districts little or no trouble has been experienced by the customs authorities. This is largely due not only to the effectiveness of the act itself, but to the action of the Canadian government, which in July, 1908, prohibited the importation and manufacture of smoking opium. It has been stated under a former heading that until the Canadian government so acted, the customs authorities at Port Townsend and other northwestern ports were confronted by large smuggling operations, initiated by Chinese and other importers and manufacturers of the drug in Canada.

Prosecution under the February act is effective because of the provision that possession of the drug shall be deemed sufficient evidence to authorize conviction unless the defendant shall explain the possession to the satisfaction of the jury. Several States are either attempting or have already succeeded in modifying their laws so as to make them more effective against the sale and use of smoking opium. The most noteworthy result has been obtained in the State of California.

The legislature of that State remodeled the pharmacy act of the State, April 21, 1909. In consequence there has been a most effective

forming drugs. Under the new act many complaints have been sworn to, and defendants brought to justice. Out of some 119 prosecutions there have been 98 convictions. The sale of cocaine has been reduced 40 per cent, of medicinal opium over 71 per cent, of morphine 57 per cent, and the sale and use of smoking opium has been reduced to a minimum.

The pharmacy board of California, in a recent report to the governor, stated:

The importation of smoking opium is now absolutely prohibited by federal statute, hence can not be imported, sold, or, as under the amended state law, kept in one's possession. That there may be some smoking opium smuggled into the State is possible, but the federal authorities, as well as the board of pharmacy, are keeping a very close watch upon it, and energetic measures will be taken to eradicate this evil. We are informed that the price of this commodity has risen from \$16 to \$80 a pound, which would indicate a great scarcity of the drug. We are also informed that a marked decrease has been noted in the number of Asiatic immigrants, and that many Chinese are returning to the Orient because of their inability to secure the opium necessary to satisfy their cravings. Hence we are in this manner instrumental in ridding the community of this class of undesirable citizens. It is also noted that many of those addicted to the use of narcotics are seeking admission to the asylums and other institutions with the hope of becoming cured of their desire for this class of drugs, and, as it is this class that eventually become criminals, we feel that the State is being materially benefited both morally and financially by the rigid enforcement of the narcotic laws. We believe we may assert without fear of successful contradiction that opium dens, as they existed in this State prior to the enactment of the present stringent opium laws, are a thing of the past, and the temptation offered to the young of our State to become habitués of the pipe and allied vices has been reduced to a minimum. As your excellency signed assembly bill 26 passed at the 1909 session of the legislature, you are aware that section 8 of that law was greatly strengthened by making possession of narcotic drugs a crime. This is proving a very excellent feature, and is enabling this board to reach parties who were carrying on a nefarious traffic in opiates, but against whom it was almost impossible to secure satisfactory evidence when sale of the drug had to be proven.

Thus it will be seen that the mere passage of a federal law to exclude all but medicinal opium from this country has stimulated at least one of the States to amend its laws, and, by making possession sufficient evidence for conviction, markedly decreased the traffic in narcotics.

RECENT TARIFF REGULATIONS IN REGARD TO OPIUM AND COCAINE.

In the tariff act of 1909 the duty on crude or medicinal opium has been raised, as well as that on coca leaves and cocaine. In admitting opium under the new schedule it is provided that nothing contained in the section shall be so construed as to repeal or in any manner impair or affect the provisions of the opium-exclusion law of February 9, 1909.

Section 41 of the new tariff act is as follows:

41. Opium, crude or unmanufactured, and not adulterated, containing nine per centum and over of morphia, one dollar and fifty cents per pound; opium of the same composition, dried, powdered, or otherwise advanced beyond the condition of crude or unmanufactured, two dollars per pound; morphia or morphine, sulphate of, and all alkaloids of opium, and salts and esters thereof, one dollar and fifty cents per ounce; cocaine, ecgonine, and all salts and derivatives of the same, one dollar and fifty cents per ounce; coca leaves, five cents per pound; aqueous extract of opium, for medicinal uses, and tincture of, as laudanum, and other liquid preparations of opium, not specially provided for in this section, forty per centum ad valorem; opium containing less than nine per centum of morphia, six dollars per pound; but preparations of opium deposited in bonded warehouses shall not be removed therefrom without payment of duties, and such duties shall not be refunded: *Provided*, That

nothing herein contained shall be so construed as to repeal or in any manner impair or affect the provisions of an act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February ninth, nineteen hundred and nine.

RECENT FEDERAL LAWS IN REGARD TO COCAINE.

The activity of the Department of State in the international opium business and the passage of the act of February 9 last has caused considerable stir throughout the country in scientific, humanitarian, medical, and other societies. Boards of trade of our large cities have, by resolution, called the attention of the Federal Government not only to the widespread use of opium and its products, but also cocaine. On February 26, 1909, the Committee of One Hundred of the American Association for the Advancement of Science on National Health passed the following resolution:

We favor a prohibitory tariff, internal-revenue tax, and other means which will restrict the use of cocaine, its substitutes and derivatives to medical purposes.

This resolution sums up views of nearly every authority consulted.

Attempts made by the Federal Government to control cocaine traffic are as follows: In the act of May 27, 1908, making appropriation for the service in the Post-Office Department for the fiscal year ending June 30, 1909, and for other purposes, a rider was added to the effect that no part of the appropriation should be used for the transmission of cocaine through the mails. But this provision does not seem to have been effective, and it did not reappear in the act of 1909 making appropriation for the service of the Post-Office Department. It would seem, however, that the Postmaster-General now has power to prevent the passage of cocaine and other drugs through the mails under the act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," which was effective January 1, 1910. It contains the following provisions:

SEC. 217. All kinds of poison, and all articles and compositions containing poison, and all poisonous animals, insects, and reptiles, and explosives of all kinds, and inflammable materials and infernal machines, and mechanical, chemical, or other devices or compositions which may ignite or explode, and all diseased germs or scabs, and all other natural or artificial articles, compositions, all materials of whatever kind which may kill, or in any wise hurt, harm, or injure another, or damage the face, or otherwise injure the mails, or other property, whether sealed as first-class matter or not, are hereby declared to be nonmailable matter, and shall not be conveyed in the mails or delivered from any post-office or station thereof, nor by any letter carrier; but the Postmaster-General may permit the transmission in the mails, under such rules and regulations as he shall prescribe as to the preparation and packing, of any articles herein before described which are not outwardly or of their own force dangerous or injurious to life, health, or property: *Provided*, That all spirituous liquors of any kind are hereby declared to be nonmailable and shall not be deposited in or carried through the mails. Whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, unless in accordance with the rules and regulations hereby authorized to be prescribed by the Postmaster-General, shall be fined not more than one thousand dollars, or imprisoned not more than two years, or both; and whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section

or purpose to kill, or in any wise hurt, harm, or injure another, or damage the face, or otherwise injure the mails or other property, shall be fined not more than five thousand dollars, or imprisoned not more than ten years, or both.

During the Senate and House hearings on the recently enacted tariff law, pressure was brought to bear by the American manufacturers of cocaine to have a prohibitory duty placed upon it. It is the view of such manufacturers that the interstate traffic in cocaine can to some extent be controlled if the entry of the drug into this country is prohibited, for they contend it would be impossible for the illicit dealer under a prohibitory tariff to import his supplies from abroad, and they have expressed their willingness under law to account for the sale of their product. There can be no doubt of the earnestness of the American manufacturers of cocaine to control the illicit traffic. The leading manufacturer of the drug in this country is at the head of a serious movement to prohibit the use of the drug except for strictly surgical purposes.

Consonant with these views and as the result of the hearings on the last tariff act, what may prove to be a prohibitory impost was placed on cocaine. As shown under a former heading, section 41 of the last tariff act provides, amongst other things, that there shall be paid on "Cocaine, ecgonine, and all salts and derivatives of the same \$1.50 per ounce (and on) coca leaves 5 cents per pound."

WHAT REMAINS TO BE DONE TO CONTROL THE INTERSTATE TRAFFIC IN HABIT-FORMING DRUGS.

Before examining this phase of the subject, it should be pointed out that many state pharmacy laws now in force are defective, in that habit-forming drugs may be bought without the prescription of a physician. All that is required by such laws is that the dealer shall keep a record of sale, and the name of the person to whom, and the amount sold. The result is that it is possible in many grocery stores, as well as in pharmacies, for even children to buy small quantities of laudanum and other drugs. Under such laws even scrupulous dealers are apt to look with complaisance on the sale of laudanum and paregoric—that is, the milder preparations of opium—forgetting that the unwise use of these forms inevitably leads to a confirmed opium habit, generally ending in the habitual use of morphine secured from unscrupulous dealers. Again, many state laws are defective in that they do not make illegal possession of habit-forming drugs evidence for conviction. They require that there shall be no sale except on a physician's prescription. Such laws are easily evaded, for many pharmacists are themselves registered physicians and prescribe their own stocks freely, while every community has its dishonorable physicians, dentists, or veterinarians, who regard their license to practice as a license to prescribe large quantities of these drugs for illicit use. It is no uncommon practice for a disreputable druggist to combine with a physician of that ilk, the latter being in attendance at the drug store during those hours when habitués swarm. Further, many unscrupulous physicians have fallen into the habit of dispensing habit-forming drugs in large quantities from their offices. It is almost impossible for state and municipal authorities to obtain reliable evidence in regard to illegal sales. If, as provided in the federal act of February 9 last, the

States would make possession except for medical purposes evidence for conviction, there would be destroyed to a large extent the present enormous intrastate traffic in habit-forming drugs.

Judging by what followed on the passage of the national food and drugs act, there is no doubt that on the passage of a federal act to control the interstate traffic in habit-forming drugs defective state laws will be gradually amended to meet abnormal intrastate conditions. Several States have within the last few years so amended their laws—notably, as has been pointed out, the State of California—and an effort to make municipal laws more stringent is under way, with the result that the sale of narcotics in some of our large cities has been reduced to a minimum.

With an unfettered interstate commerce in these drugs such as now exists, it is possible and is a common practice for illicit dealers, disreputable physicians, and pharmacists in one State to send to neighboring or distant States for large supplies—many ruses being resorted to to accomplish their purpose. One of the commonest is for an illicit dealer to have a false letter head printed, having on it the name of a person and a legend stating that the person is a registered pharmacist. On such letter heads are written orders for large amounts of opium, morphine, or cocaine, and sent, say, from Boston to a reputable or disreputable dealer in New York, or vice versa, with a request that the order be filled. Reputable wholesalers and jobbers are frequently deceived by such orders and fill them. But the suspicion of a reputable house is soon aroused, and on investigation it is generally found that the address to which the drugs have been sent is that of a saloon, or a dressmaking or millinery establishment, and that from such centers the drugs are sold at enormous profit to regular patrons.

The practice just mentioned is no uncommon one. It obtains in several sections of the country, and it reduces the state and municipal authorities oftentimes to despair, for although they can, under state laws, detect and prosecute for the illicit sale of these drugs procured within the State, it is almost impossible for them to detect buyers who send outside of the state limits for their supplies.

After wide consultation with those interested in the control of the production and distribution of habit-forming drugs, the conclusion has been reached that there should be a federal act placing the interstate traffic in such drugs under the control of the Bureau of Internal Revenue of the Treasury Department, and that such an act should be based on the following general principles:

First. That such an act should demand the registration of every person who imports, produces, manufactures, compounds, distributes, or otherwise handles habit-forming drugs in interstate or foreign commerce.

Second. That importers, wholesale compounding pharmacists, and wholesale dealers should pay a small per-annum tax of \$10, and that retail pharmacists and other retail dealers, including physicians who buy in interstate commerce and who carry large supplies of the drugs, should pay a tax of from \$1 to \$3 per annum; that every one engaged in handling drugs should register and pay a tax.

Third. That, without attempting to derive a revenue beyond the amount necessary to administer the act, all of the habit-forming drugs should have imposed upon them an internal-revenue tax of, say, 1

cent an ounce, and that such tax should be paid by affixing to packages or other receptacles containing the drugs, an engraved stamp, to be affixed and canceled according to law.

Fourth. That all compounds or preparations manufactured from the original tax-paid drugs should be marked or branded in such a manner as to show the payment of the tax on the original drug.

Fifth. That every person concerned in the importation, manufacture, remanufacture, or compounding, selling, or dispensing of habit-forming drugs and their preparations, should keep such books, render such returns, and give such bonds as may be determined by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

Sixth. That it should be unlawful for any person to sell, give away, or otherwise dispose of in interstate commerce, any of the habit-forming drugs, their salts, derivatives, or preparations to any person other than a person who has registered and paid the special tax, public hospitals and scientific and public institutions excepted.

Seventh. That all of such drugs, their derivatives and preparations imported should pay an internal-revenue tax equal to that imposed on the home-produced drugs.

Eighth. That on trial for violation of such an act, illegal possession of such drugs should be deemed as sufficient evidence of such violation, unless the defendant shall explain the possession to the satisfaction of the jury.

Ninth. That all returns required by such an act should be filed and recorded in the office of the Commissioner of Internal Revenue, under such regulations as may be approved by the Secretary of the Treasury, and that these returns should be open to the inspection, and certified copies should be made to the proper officials of any State, Territory, or district under the jurisdiction of the United States who are charged with the enforcement of local laws regulating the prescribing, dispensing, sale, or use of such drugs.

Tenth. That heavy penalties, either by fine or imprisonment, or both, should be imposed on the violator of such an act.

A proposed bill embodying these principles has been drafted in consultation with those officials of the Treasury Department who would be charged with its enforcement should the bill pass and be approved. The draft of the proposed bill is appended to this report.

In drafting the suggested bill to control the interstate traffic in habit-forming drugs, it has been kept steadily in mind that state and municipal laws are now or can be made effective to control the intrastate relationship that should subsist between the physician who prescribes these drugs, the person he prescribes for, and the filling of such prescriptions by licensed pharmacists, if the importation, manufacture, and distribution of the drugs in interstate commerce is brought under effective federal control. This bill, as the others submitted, are offered as suggestions only.

It has been stated in the third principle laid down that no attempt should be made to derive a revenue from any opium act beyond the amount necessary to administer such an act. The reason for this should be apparent; the greatest obstacle to the solution of the opium problem as seen in the Far East is the practice that has obtained there of producing and distributing opium for revenue purposes. Could the present opium revenue of far eastern countries be imme-

diately replaced, either by economy or by developing other sources of revenue, there is not the slightest doubt that the opium problem would be short lived. All the countries concerned have now pledged themselves to curtail the production and misuse of opium, and as a consequence the revenue derived therefrom. As the United States has taken the lead in this international movement, it would be both unseemly and impolitic for this Government to attempt to derive a revenue from any opium measure beyond the exact needs of administration.

In the suggested opium measure (Appendix I of this report) a special tax of \$10 is imposed on the wholesaler, importer, and jobber, and \$1 on the retail druggist, or anyone dealing at retail, which would include large numbers of physicians, dentists, and veterinarians, who at present make it a practice to send outside their own States, where there are no large drug manufacturers, to other States where such manufacturers are located. There are in the United States about 500 houses importing, manufacturing, or dealing in drugs at wholesale, from which, under the special tax of \$10 per annum, a revenue of \$5,000 would be derived, and about 40,000 retail druggists who, under the special tax of \$1 as provided for in the act, would yield a revenue of from \$30,000 to \$40,000. The number of ounces of the drugs named in the measure imported or manufactured in this country amounts at the present time to about 15,000,000. Under an efficient federal act to control the manufacture and interstate traffic in these drugs, and under the improved state laws being enacted, the number of ounces of such drugs imported or manufactured would be reduced at least one-third, leaving about 10,000,000 ounces to bear the special stamp tax of 1 cent an ounce, as provided for in the proposed bill, thus producing a revenue of about \$100,000, or a total revenue from the projected measure of about \$140,000. It may appear at first sight that a tax of 1 cent an ounce on the named drugs imported or manufactured in this country is merely nominal; but together with the special tax imposed by section 1 of the proposed act sufficient revenue would be derived to efficiently administer the act. The Commissioner of Internal Revenue is of the opinion that \$125,000 is sufficient for this purpose.

Finally it should be pointed out that section 9 of the proposed act, Appendix 1, calling for an appropriation of \$150,000 for the purpose of carrying into effect the provisions of the act is a necessary one, should the act be favorably considered during the coming fiscal year. The Commissioner of Internal Revenue has pointed out that the estimates of the Treasury Department for the next fiscal year have been made up, and that therefore it would be necessary to make a provision for carrying out the act.

THE INTERNATIONAL OPIUM COMMISSION AND ITS RESULTS.

As this report on the problem of habit-forming drugs in the continental United States is a direct issue of the attempt on the part of our Government to solve the international problem, it is proposed to concisely outline the origin of the International Opium Commission, the part played by the United States therein, and the results attained.

There can be no doubt that the wider interest of the United States in the international opium problem was one of the results of the

occupation of the Philippines. In taking over the Philippines this Government found itself confronted by a very serious problem. It was found that large numbers of the Chinese in the Philippines were confirmed opium smokers, but as those who were in charge of the early administration of the islands were aware that little or no effort had been made to restrict the use of the drug among Chinese in the United States, no attempt seems to have been made to control the importation or the use of any form of the drug in the islands. However, when the civil government was established, it was soon determined that the vice of opium smoking was spreading rapidly to the native Philippine population, with the result that whole communities were becoming impoverished and rendered unfit for any part in the life of the islands. In the report on opium in the Philippines laid before the International Opium Commission by Bishop Brent (quoted above), there is a review of the opium traffic in the Philippines prior to the American occupation. It is stated therein that, from the period 1898-1901—that is, during the transition between American occupation and the establishment of civil government—the importation of opium into the islands was under the provisions of the general tariff act of 1897. During this transition period no organized attempt was made to control the importation of the drug by anyone in the islands. The result was that the importation doubled and undoubtedly marked the spread of the habit from the Chinese to the native population.

In 1903 a bill was framed and considered in the Philippine Commission for getting control of the opium traffic and regulating the use of the drug. After considerable popular discussion of this bill, it was found that it would be impossible to arrive at a sane conclusion until there had been a study of the opium problem as it presented itself in neighboring countries. Consequently a committee was appointed by the Philippine government to investigate the use of opium and the traffic therein throughout the Orient. This committee presented its report in June, 1904, making certain recommendations which were aimed to gradually reduce and finally prohibit the use of opium in the Philippine Islands except for medicinal purposes. Congress intervened, however, and by the act of March 3, 1905, provided for the prohibition of the importation of opium in any form except for medicinal purposes on and after the 1st of March, 1908.

The report of the Philippine opium committee was widely distributed throughout China. It undoubtedly had a profound influence on those Chinese statesmen who were convinced that the Chinese Government could and ought to destroy the vice of opium smoking in China. They considered it a friendly act that a neighboring Government should pronounce so firmly against the use of opium for other than medical purposes.

There resulted a new antiopium movement in China, out of which grew a direct appeal to President Roosevelt from representatives of missionary societies there and from commercial institutions in this country, to the effect that the United States Government, considering its historical attitude in regard to the opium traffic in the Far East, should take the initiative in assisting China to secure the prohibition of that traffic.

The matter was referred to Secretary Hay, who, on November 10, 1904, granted a hearing to representatives of those missionary and

other organizations which were interested in the movement. The opium problem as it existed in the Far East was very ably presented to Secretary Hay by officials of reform societies, representatives of the missionary bodies of China, and representatives of those American chambers of commerce which had previously memorialized President Roosevelt on the question.

Secretary Hay, in responding to the addresses presented to him, promised to present the whole case to President Roosevelt, and intimated that the mightiest force for this crusade was wrapped up in the watchword of our Declaration of Independence, "A decent regard for the opinion of mankind."

(See S. Doc. 135, 58th Cong., 3d sess., "Report of hearing by the American State Department on petitions to the President to use his good offices for the release of China from treaty compulsion to tolerate the opium traffic, with additional papers.")

An acute observer of moral movements in the Far East since the publication of the Philippine report on the opium traffic had been the Right Rev. Charles H. Brent, Bishop of the Philippine Islands. As the result of his observations, on July 24, 1906, he addressed a letter to President Roosevelt, in which he said:

From the earliest days of our diplomatic relations with the East, the course of the United States of America has been so manifestly high in relation to the traffic in opium that it seems to me almost the duty of our Government, now that we have the responsibility of actually handling the matter in our possessions, to promote some movement that would gather in its embrace representatives from all countries where the traffic in and use of opium is a matter of moment.

Bishop Brent's letter was referred to the then Secretary of War, President Taft, who heartily indorsed it. Referred to the Department of State on September 6, Bishop Brent's proposition met with favor, and on September 27 Secretary Root initiated a correspondence with those powers having possessions in the Far East, the objective being an international commission to study the opium problem as it then appeared in the Far East and to report the wisest measures for its solution. Thus, in continuation of our pronounced antiopium policy in the Philippines, as developed by President Taft when governor-general, and of Mr. Hay's sympathetic attitude, the calling of an International Opium Commission fell to Secretary Root, who, as Secretary of War, was largely responsible for the fixed determination of the United States not to tolerate the misuse of opium in the Philippines by any class of their inhabitants.

The diplomatic correspondence begun in the autumn of 1906 extended over a period of some eighteen months, when it was cordially agreed by the governments concerned that there should be an International Opium Commission, and that it should meet at Shanghai, in China, on the 1st of January, 1909.

The powers originally invited to the commission were those having territorial possessions in the Far East, namely, China, France, Germany, Great Britain, Japan, the Netherlands, Portugal, Russia, and Siam. Further consideration of the subject showed that the opium question could not be thoroughly studied and reported unless the large opium-producing countries were represented in the commission, even though they had no territorial possessions in the Far East. Therefore, an invitation was extended to Persia and Turkey, and finally, because of their large commercial interests in the Far East, to Austria-

Hungary and Italy. It followed that, including the United States, thirteen countries sent delegates to the International Opium Commission. Turkey was not represented, owing to the political upheaval that had just occurred in that country.

Before the international commission met it had developed that the opium problem was not confined to the Far East, but that, through the misuse of morphine and other opium preparations, several of the large western countries, including the United States, had become contaminated. It was agreed, therefore, on the suggestion of this Government, that the opium problem, in all of its moral, economic, scientific, and political aspects, not only as seen in the Far East but also in the home territories of those participating, should be brought under discussion in the commission.

The International Opium Commission was to have met on the 1st of January, 1909, but, owing to the recent deaths of the Emperor and Empress Dowager of China, the meeting was postponed until the 1st of February, 1909.

A thorough study of the opium question was made by the international commission, and, before adjourning on the 26th of February, 1909, it unanimously adopted the following resolutions:

Be it resolved:

1. That the International Opium Commission recognizes the unswerving sincerity of the Government of China in their efforts to eradicate the production and consumption of opium throughout the Empire; the increasing body of public opinion among their own subjects by which these efforts are being supported; and the real, though unequal, progress already made in a task which is one of the greatest magnitude.
2. That in view of the action taken by the Government of China in suppressing the practice of opium smoking, and by other Governments to the same end, the International Opium Commission recommends that each delegation concerned move its own Government to take measures for the gradual suppression of the practice of opium smoking in its own territories and possessions, with due regard to the varying circumstances of each country concerned.
3. That the International Opium Commission finds that the use of opium in any form otherwise than for medical purposes is held by almost every participating country to be a matter for prohibition or for careful regulation; and that each country in the administration of its system of regulation purports to be aiming, as opportunity offers, at progressively increasing stringency. In recording these conclusions the International Opium Commission recognizes the wide variations between the conditions prevailing in the different countries, but it would urge on the attention of the Governments concerned the desirability of a reexamination of their systems of regulation in the light of the experience of other countries dealing with the same problem.
4. That the International Opium Commission finds that each Government represented has strict laws which are aimed directly or indirectly to prevent the smuggling of opium, its alkaloids, derivatives, and preparations into their respective territories; in the judgment of the International Opium Commission it is also the duty of all countries to adopt reasonable measures to prevent at ports of departure the shipment of opium, its alkaloids, derivatives, and preparations, to any country which prohibits the entry of any opium, its alkaloids, derivatives, and preparations.
5. That the International Opium Commission finds that the unrestricted manufacture, sale, and distribution of morphine already constitute a grave danger, and that the morphine habit shows signs of spreading; the International Opium Commission therefore desires to urge strongly on all governments that it is highly important that drastic measures should be taken by each government in its own territories and possessions to control the manufacture, sale, and distribution of this drug, and also of such other derivatives of opium as may appear on scientific inquiry to be liable to similar abuse and productive of like ill effects.
6. That as the International Opium Commission is not constituted in such a manner as to permit the investigation from a scientific point of view of antiopium remedies and of the properties and effects of opium and its products, but deems such investigation to be of the highest importance, the International Opium Commission desires that

OPIUM PROBLEM.

ation shall recommend this branch of the subject to its own government for such action as that government may think necessary.

The International Opium Commission strongly urges all governments possessing concessions or settlements in China, which have not yet taken effective action in closing of opium divans in the said concessions and settlements, to take such steps as soon as they may deem it possible, on the lines already adopted by other governments.

The International Opium Commission recommends strongly that each delegation urge its government to enter into negotiations with the Chinese Government with a view to effective and prompt measures being taken in the various foreign consular settlements in China for the prohibition of the trade and manufacture of opium in places which contain opium or its derivatives.

The International Opium Commission recommends that each delegation urge its government to apply its pharmacy laws to its subjects in the consular districts, concessions, and settlements in China.

In the view of the American delegation, accepted by the commission as a whole, that the conclusions of the international commission should be voiced in this series of short and concise resolutions rather than in a long report on the pros and cons of the data laid before the commission. Before discussing the significance of these resolutions it will be proper at this place to outline the reports made by the commission in plenary session by the different delegations.

The Austro-Hungarian delegation showed that its Government had no special problem to deal with, but that it had assisted China in her modern war by closing all opium-smoking divans in the Austro-Hungarian concessions and settlements in that country.

The Chinese delegation demonstrated that there had been an opium problem in China since the beginning of the eighteenth century, and although many efforts had been made by the Emperors to suppress it, they had signally failed. This appeared to be largely due to the fact that at the critical moment when China was putting forth her best efforts to suppress the evil—that is, at the end of the eighteenth and in the early part of the last century—the vice was hereditary because of her inability to contend against or control the constant import of Indian opium smuggled or otherwise introduced into the country.

As a result of the clandestine introduction of Indian opium and the legalization of the opium traffic by the Tientsin treaties negotiated after the Arrow war, general indifference prevailed throughout China, and the internal production of the drug, which had for many years been large, now assumed huge proportions. When the international commission assembled it was found that China was importing over 52,000 piculs^a of foreign opium each year, chiefly from India, and that her yearly internal production amounted to 367,250 piculs.

Overwhelming evidence was adduced to show that the moral and social effects on China of the use of this large amount of opium were incalculable. Further evidence was laid before the commission to the effect that during the last ten years the morphine habit had increased and that large numbers of the urban population, especially at the coast ports, had become addicts to a new form of the vice.

The encouraging side of the Chinese opium problem was the report of the results achieved since China's modern war on opium was declared.

^a Picul equals 133½ pounds avoirdupois.

opened by the imperial decree of September 20, 1906. That decree is as follows:

Since the restrictions against the use of opium were removed the poison of this drug has practically permeated the whole of China. The opium smoker wastes time and neglects work, ruins his health, and impoverishes his family, and the poverty and weakness which for the past few decades have been daily increasing amongst us are undoubtedly attributable to this cause. To speak of this arouses our indignation, and, at a moment when we are striving to strengthen the Empire, it behooves us to admonish the people, that all may realize the necessity of freeing themselves from these coils, and thus pass from sickness into health.

It is hereby commanded that within a period of ten years the evils arising from foreign and native opium be equally and completely eradicated. Let the government council (Chêng-wu-Ch'u) frame such measures as may be suitable and necessary for strictly forbidding the consumption of the drug and the cultivation of the poppy, and let them submit their proposals for our approval.

Since the above decree was issued others have gone into effect—more specific in character—and stringent regulations have been drawn, providing for the ultimate obliteration of the opium vice in China. It was claimed by the Chinese—and their claim was accepted by most of the delegations present—that since the edict of September 20, 1906, the internal production of opium had been reduced from 584,800 piculs in 1906 to 367,250 piculs in 1908. The Chinese delegates made a fervent appeal to the other delegations that they should advise their governments to continue to assist China by further international action.

The French delegates, in submitting their report, made it plain that their Government fully recognized the evils of the vice of opium smoking as seen in the Far East; that it had made considerable effort, under new laws, to reduce the vice in French Indo-China, with the object of ultimately suppressing it. In France itself a new and strict law had been passed aimed at the abuse of morphine in the large cities of that country.

The German delegates submitted evidence to show that in the colony of Kiaochow every effort was being made to restrict the opium vice and to prevent the use of the port of Kiaochow for the introduction of foreign opium into China.

The British delegates presented data showing that their Government, supported by powerful public opinion and parliamentary declarations, was making a sincere effort to reduce the production of opium in India and its exportation; that it had entered into a ten-year agreement with China to reduce the total production and per annum export of opium from Calcutta (67,000 chests) by one-tenth per annum of the then Chinese import of Indian opium (52,000 chests), China on her part agreeing to a *pari passu* reduction of her internal production; further, that the opium question in the crown colonies was being reviewed; that in the colony of Ceylon a commission had recently reported against the opium vice, and that the opium farm would shortly be discontinued; that in the crown colony of the Straits Settlements and in the protected Federated Malay States a commission recently appointed had reported on the opium vice as seen there, the report being somewhat favorable to the continuance of the opium farm, by which the Government disposed of opium and acquired a large revenue; that in the crown colony of Hongkong the opium question had been much agitated, and that it was likely, in the face of considerable financial loss, that that colony would make some effort to bring the use of the drug under stricter control.

The authorities of Hongkong, as the result of parliamentary pressure, had forbidden the exportation of opium prepared for smoking to the Chinese mainland. Australia, by a proclamation of her governor-general, had excluded the importation of opium prepared for smoking, and regulations had been issued for the control of the importation of opium intended for medicinal purposes. Canada had recently passed a law forbidding the importation of opium except for medicinal purposes, and had passed other laws regulating the distribution of medicinal opium within the country. It was shown by the British report that morphine and cocaine had made their appearance in the larger cities of India, and that stringent measures were being taken to control the use of these drugs. As further evidence of good-will toward China, the British Government had ordered the closing up of all opium divans in the British settlements and concessions in that country.

The Italian delegates were in the happy position of being able to report that Italy had no opium problem, but that their Government was in full sympathy with the international movement for the final control of the vice in China and elsewhere, and that opium dens in the Italian concession at Tientsin had been closed.

The Japanese delegates reported that from the day when opium first menaced the Far East the Japanese Government had sternly set its face against the introduction of the opium habit into Japan; that Japan had a prohibitory law against it that was effective, and that the importation and sale of opium for medicinal purposes was strictly controlled by the Government. Further, that in the island of Formosa, where on occupation large numbers of the Chinese and others were found to be addicted to the opium habit, a government monopoly had been established which, while bringing the use of opium under control, had as its main object the ultimate extinction of the opium-smoking vice. They also reported that efforts were being made to prevent in the future the smuggling of morphine into China and Korea by Japanese subjects.

The Netherlands delegation presented a report showing that for many years past the distribution and use of smoking opium in the Netherlands East Indies had been under strict government control through a monopoly; that a large revenue was derived from it, but that measures would be taken to reduce it, and that the ultimate object of the monopoly was to suppress the opium vice in those islands.

The Persian report exhibited the fact that there is a large internal production of low-grade opium; that there is a large consumption of it by the native population, and that a smaller part was exported to China. A higher grade opium for medical purposes is also produced and exported to Europe. No attempt had been made to control production, quality, consumption, or exportation.

The Portuguese delegates showed that in the Portuguese colony of Macao on the Chinese coast the manufacture of raw opium into opium prepared for smoking was a government monopoly, which furnished a large part of the revenues of that colony. The larger part of the opium so manufactured was exported, chiefly to the United States.

The Russian delegate, through some delay, the cause of which did not appear, was unable to submit a report. He nevertheless heartily

The Siamese delegation submitted a report showing that the importation and sale of smoking opium was a government monopoly, but that it was the intention of the Siamese Government to bring the importation and sale under stricter government control, with the immediate object of reducing the vice to a minimum and the ultimate object of stamping it out entirely.

A bare outline only has been given of the different reports laid before the international commission by the governments represented. The full report of the commission has been laid before the department.

It should be emphasized that, beginning with the initial letter of the Department of State proposing the international commission, each government was animated by a desire to appear in the commission with hands as clean as possible. Much of the recent legislation reported by the delegations to the international commission was made with that purpose in view. Our own Government did not lag, as witnessed by the passage of the opium-exclusion act of February 9, last.

Turning for a moment to the resolutions adopted by the international commission, it will be readily appreciated that, quite apart from their condemnation of the opium vice, they are of great importance in that they were passed unanimously. Had seriously opposing views in regard to the moral, economic, and other aspects of the opium problem developed, the commission might have had to issue a majority and minority report. As the American delegation stood for the principle of immediate and effective prohibition of the abuse of opium, it would probably have had to head the minority report. Had that been the event, the whole question would have been once more in the melting pot, where it had been thrown by nearly every national commission that had sat on it, and the way to further proposals for international action would have been blocked to the United States.

The international commission having unanimously agreed that the opium vice must cease, it was open to our Government to propose further international cooperation for the placing of the production and traffic in opium under international law.

The first resolution expressed the sincere feeling of every government represented in the international commission. There can be no doubt that China deserves the sympathy of all other peoples in her antiopium war, and that she is making an heroic effort to eradicate the production and consumption of the drug in the Empire. Evidence is accumulating day by day that China's effort is not only sincere but effective, and that her progress toward the end she has set for herself is greater than was expected even by her most ardent sympathizers.

Resolution 2 recognizes not only the action taken by the Government of China in suppressing the practice of opium smoking, but also the efficient action to the same end made by our own Government in the Philippines and in the continental United States by the passage of the Philippines act 1761, and the American opium-exclusion law of February 9 last. The American delegation was the first to recognize that other governments had large revenue interests at stake in their opium farms and monopolies, and that it would be impossible for them to attempt to suppress the opium vice by a stroke of the pen, as had been done in the case of the continental United States

and the Philippines. For that reason the American delegation joined with others in recommending that so far as these countries are concerned measures should be taken for the gradual suppression of the practice of opium smoking. There can be no doubt that this resolution will be acted upon, for, since the commission adjourned, Great Britain has shown her determination in the matter by ordering the Hongkong opium divans closed by March 1, 1910, while the Netherlands Government has recently announced that the opium revenue of her East Indies would be curtailed.

Resolution 3 practically denounces the use of opium for other than medical purposes and urges that there should be a reexamination of all government systems by which opium is produced or handled, to the end that opium shall be relegated to its proper place in medicine.

Resolution 4 was the most difficult to carry. Proposed by the American delegation, it was urged in its favor that it would be impossible for the Philippine government to fully suppress the practice of opium smoking in the islands because of the large coast line that had to be protected against the clandestine introduction of the drug. Further, in the case of the Philippines, that 3½ per cent of the total revenue of the islands had been sacrificed, so that it would tax the insular treasury beyond its capacity to organize and maintain an efficient preventive service. It was urged again that our Government had in the national food and drugs act imposed the same penalties on shippers of misbranded and adulterated drugs or foods abroad as on shippers in our interstate commerce, and, therefore, that the time had arrived for the general recognition of the principle that those countries engaged in the production of opium on a large scale should adopt measures to prevent at ports of departure the shipment of opium to any country prohibiting its entry.

It may be seen that in the event of China securing a revision of the opium sections of the Tientsin treaties so that she may prohibit outright the importation of opium, the principle of suppressing exportations from opium-producing to opium-prohibiting countries would apply to her. This was recognized by several of the delegations, and was perhaps the single reason for the opposition to the resolution. However, the appeal of the American delegation broke the opposition, and resolution 4 was passed unanimously.

Resolution 5 met with no opposition. Whatever divergence of opinion there may have been in the commission in regard to the effects of opium smoking on the individual and nation as a whole, the delegations were as one that the unrestricted manufacture, sale, and distribution of morphine was a grave danger, that the morphine habit had shown signs of spreading throughout the Orient, and that to several western countries, including the United States, it was a serious menace.

Resolution 6 was unfortunate in that it declared that the international commission was not constituted in such a manner as to permit the investigation from a scientific point of view of antiopium remedies, and the properties and effects of opium, for there were several delegates in the commission who were competent to pronounce on the subject. The Japanese Government anticipating such an investigation had sent as part of its delegation two eminent scientists who for many years have been in charge of the Japanese Government mono-

cine. However, it developed that the principles of the moral and economic dangers of the misuse of opium were not to be endangered by this resolution, and opposition was waived for the sake of harmony.

Resolution 7 was necessary in view of the neglect of one of the governments represented to close out entirely the opium-smoking divans in its concessions and settlements in China. But in the discussion on the resolution an assurance was given by the representatives of the government concerned that such action would be taken in the near future.

Resolution 8 was aimed at an abuse that had recently appeared in China. It had been found that large numbers of Chinese, sincerely anxious to rid themselves of the habit of opium smoking, were being debauched in another way; that is, by the use of antiopium remedies containing opiates. It was apparent to all the delegations that the cure would become quite as serious as the disease. Americans in China have had little or no part in the manufacture and distribution of such opium or morphine containing antiopium remedies.

Resolution 9 was aimed at this new phase of the opium problem, and by it each government is called upon to apply its pharmacy laws to its subjects in the consular districts, concessions, and settlements in China. It was felt by the commission that if such laws were applied as urged the sale of antiopium remedies containing morphine and opium would be brought under the same control as in western countries.

Resolution 1 was introduced by the British delegation. The American delegation had introduced a strict resolution in regard to unrestricted manufacture, sale, and distribution of morphine. The British delegation introduced one not quite so strict; but on their accepting certain modifications at the suggestion of the American delegation the American morphine resolution was withdrawn in favor of the British, the British resolution passing as the No. 5 of the series.

Resolutions 2, 3, and 6 were compromise resolutions of the American and British delegations, based on four original resolutions introduced by the American delegation.

Resolutions 7 and 8 were introduced by the Chinese delegation, while resolutions 4 and 9 were introduced by the American delegation, and were passed in their original form.

Although no formal declaration was made as to further international action in regard to opium production, traffic, and misuse, it was nevertheless recognized that such action was necessary before the powers could congratulate themselves on having solved the problem that has loomed so large and so long in the Far East, causing war and other evil consequences not outstripped by the evil consequences of slavery.

The American delegation introduced a resolution to the effect that further international action be advised. But as there was a feeling on the part of some of the delegations that this was carrying advice too far and might lead to separate and confusing proposals, it was withdrawn. It had served to develop the fact that the other governments would look to the United States for further proposals for international action to control the production, trade in, and abuse of opium.

Looking broadly at the results achieved by the International Opium Commission, and considering that the United States has now pro-

posed an international conference, this time with full powers to conventionalize the Shanghai resolutions and minor questions arising from them, it may be said that the International Opium Commission was a credit to this Government and a success, and that it will be recorded as the first great step taken by the powers together to put an end to an evil—no longer a Chinese or far eastern evil, but one that has made its appearance in and threatens the social fabric of many western nations.

An immediate need growing out of the international commission—and this refers more particularly to our own Government—is the effectuation of resolution 9, which calls for the application of our pharmacy laws to American citizens in our consular districts in China.

Resolution 9 was proposed by the American delegation as the best method to stifle the uncontrolled sale by foreign pharmacists in China of antiopium remedies containing opiates. There is not a large pharmacy business carried on by Americans in China, nevertheless it is incumbent upon our Government to make the first move to effectuate this resolution. This may be done by slightly modifying the District of Columbia pharmacy act, which is the most complete federal pharmacy act in force. The pharmacy act of the District of Columbia (Public—No. 148, approved May 7, 1906) has been modified to meet conditions that have to be faced by American officials in China, the chief modification being that our consular representatives are held responsible that no American pharmacist engages in business in China who has not the qualifications required by the District or state pharmacy acts. The suggested act is attached to this report.

It has been pointed out that Congress did not for seven years pass appropriate legislation to effectuate the opium article of the American-Chinese treaty of 1880. Hence this Government laid itself open to criticism. Prompt action on the part of our Government to effectuate resolution 9 would meet with approval in China, be regarded as a friendly act and an earnest of our continued interest and sympathy for that country in her war on the misuse of opium.

It has been stated above that, as the result of the unanimity of the international commission, as expressed in its resolutions, the way was opened to the United States to propose an international conference with full powers to complete the work of the commission.

Such a proposal was made by our Government on September 1, 1909. To those countries represented in the International Opium Commission was conveyed an expression of the satisfaction of our Government with the results achieved by the International Opium Commission. Further, that in the opinion of the leaders of the antiopium movement in this country much had been accomplished by the commission, and that by both the Government and people of the United States it was recognized that the results achieved were largely due to the generous spirit in which the representatives of the governments concerned approached the subject. It was declared that the United States appreciated the magnitude of the opium problem and the serious financial interests involved in the production of and trade in the drug; that it was deeply impressed by the friendly cooperation of the powers financially interested and in the desire, as expressed in the resolutions of the commission, that the opium evil should be eradicated not only from far eastern countries, but also from their home territories and possessions in other parts of the world.

It was pointed out that during the investigation of the opium problem in the United States by the American commissioners, it became apparent that quite apart from the question as it affects the Philippine Islands, a serious opium evil obtained in the United States itself; that this was in a measure due to the large Chinese population in the country, to the intimate commercial intercourse with the Orient, and to the unrestricted importation of opium and manufacture of morphia. Therefore, the interest of the United States in the opium problem was material as well as humanitarian, and that as the result of the investigations made before the meeting of the commission at Shanghai, the Congress of the United States passed the opium exclusion act of February 9, 1909. As an important factor it was pointed out that the United States is not itself an opium-producing country, and to make its laws fully effective and stamp out the opium evil, there should be control of the amount of opium shipped by opium-producing countries to the United States and its possessions; to this end it would be necessary to secure international cooperation and the sympathy of opium-producing countries. Note was made that it was a matter of discussion, and was recognized by the commission as a whole that the resolutions passed by the international commission, however important morally, would fail to satisfy enlightened public opinion unless by subsequent agreement of the powers they and the minor questions involved in them were incorporated in an international convention.

It was stated that this Government was deeply impressed by the gravity of the general opium problem and the desirability of divesting it of local and unwise agitation, as well as the necessity of maintaining it upon the basis of fact, as determined by the Shanghai commission. For this reason the United States considered it important that international effect and sanction should be given to the resolutions of the International Opium Commission. To this end our Government proposed that an international conference be held at a convenient date, at The Hague or elsewhere, composed of one or more delegates of each of the participating powers, and that the delegates should have full powers to conventionalize the resolutions adopted at Shanghai and their necessary consequences. The Government of the United States suggested as a tentative programme based upon the resolutions and proceedings of the international commission the following:

(a) The advisability of uniform national laws and regulations to control the production, manufacture, and distribution of opium, its derivatives, and preparations.

(b) The advisability of restricting the number of ports through which opium may be shipped by opium-producing countries.

(c) The means to be taken to prevent at the port of departure the shipment of opium, its derivatives, and preparations to countries that prohibit or wish to prohibit or control their entry.

(d) The advisability of reciprocal notification of the amount of opium, its derivatives, and preparations shipped from one country to another.

(e) Regulation by the Universal Postal Union of the transmission of opium, its derivatives, and preparations through the mails.

(f) The restriction or control of the cultivation of the poppy so that the production of opium will not be undertaken by countries

which at present do not produce it, to compensate for the reduction being made in British India and China.

(g) The application of the pharmacy laws of the governments concerned to their subjects in the consular districts, concessions, and settlements in China.

(h) The propriety of restudying treaty obligations and international agreements under which the opium traffic is at present conducted.

(i) The advisability of uniform provisions of penal laws concerning offenses against any agreements that the powers may make in regard to opium production and traffic.

(j) The advisability of uniform marks of identification of packages containing opium in international transit.

(k) The advisability of permits to be granted to exporters of opium, its derivatives, and preparations.

(l) The advisability of reciprocal right of search of vessels suspected of carrying contraband opium.

(m) The advisability of measures to prevent the unlawful use of a flag by vessels engaged in the opium traffic.

(n) The advisability of an international commission to be intrusted with the carrying out of any international agreement concluded.

It was conveyed to the powers interested that our Government did not wish to prescribe the scope of the conference or present a programme which might not be varied nor enlarged, but that it believed that the foregoing suggestion might properly serve as the basis at least for preliminary discussion. A formal expression of opinion and exchange of views was invited, not merely upon the topics outlined but upon other aspects of the opium problem which might seem of peculiar importance to any participating nation, the exchange of views and expressions of opinion to take place as early as possible.

This course was suggested as likely to facilitate the work of the conference and materially shorten its labors, in that it would enable the Government of the United States to prepare in advance a definitive programme based upon the suggestions and views of the participating governments.

As stated above, these proposals were made on the 1st of last September to those powers which cooperated with the United States in the international commission that met at Shanghai. Replies have been received from several of the governments that the proposals of the United States are receiving consideration. China has adhered to the proposals, also Russia and Portugal, the latter having already appointed a distinguished commission to prepare for the conference. The Netherlands Government very promptly accepted the proposals of this Government and the tentative programme submitted with them. Further, it has expressed a desire that the prospective conference be held at The Hague, and that when this Government communicates the names of the powers that are to participate the Government of the Queen will issue the necessary invitations to such powers to meet at The Hague.

Thus, since our Government entered the Philippines and thereby came into direct contact with the opium problem, it has made a sustained effort not only to put its own house in order, but by inviting the

international plane. On the latter the opium problem has been studied, discussed, and roundly condemned.

In continuation of its policy, our Government has invited the powers to such further cooperation as will place the production, trade in, and use of opium under the control of international law. It has been historically demonstrated that no nation working alone, that no two nations working together are able to destroy the opium vice. It was a hopeless task. To-day, as the result of the international efforts initiated by this Government, the world is well on its way to see the thorough solution of not only China's oppressive opium problem, but that of other countries not so heavily burdened.

I have the honor to be, sir, your obedient servant,

HAMILTON WRIGHT.

The SECRETARY OF STATE.

APPENDIX I.

Proposed bill imposing a tax upon and regulating the production, manufacture, and distribution of certain habit-forming drugs.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That every person who imports, exports, produces, or manufactures opium, morphia, coca leaves, cocaine, alpha and beta eucaine, chloral, canabis, their salts, derivatives, or preparations; and every person who further manufactures, compounds, deals in, or distributes the aforesaid drugs, or [3233 R. S.] either of them, shall, before engaging, or if he is already engaged, in said business, register with the collector of internal revenue of the district his name or style, place of residence and place where such business is to be carried on, and at the time of such registry, and on or before the first day of July in each year, every [3237 R. S.] importer, exporter, producer, manufacturer, wholesale manufacturing pharmacist, wholesale dealer or jobber, shall pay to said collector a special tax at the rate of ten dollars per annum, and every retailer or distributor at retail shall pay to said collector a special tax at the rate of one dollar per annum. That the word person as used in this act shall be construed to mean and include [3140 R. S.] a partnership, association, company, or corporation, as well as a natural person; and all provisions of existing law relating to special taxes, so far as applicable, including the provisions of section thirty-two hundred and forty of the [3240 R. S.] Revised Statutes of the United States, are hereby extended to the special tax herein imposed.

Sec. 2. That there shall be levied and collected upon all of the aforesaid original drugs now held by any such person, or hereafter produced or received, an internal-revenue tax of one cent per ounce or fraction of an ounce, fluid or solid, and said tax shall be paid by affixing to each package or other receptacle containing such original drugs, before removal of the same from a customs warehouse, their place of manufacture or storage, and before [being?] offered for sale, an engraved stamp to be affixed and canceled in such manner as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe. That all provisions of existing law relating to internal-revenue stamps, including all penalties imposed for the reuse of such stamps, so far as applicable, are hereby extended to the stamps provided for in this act, and all such original drugs, and all packages and receptacles containing the same, not stamped as herein provided shall be forfeited to the United States, and may be sold, subject to the provisions of existing law, to any person who has paid the special tax imposed by this act: *Provided*, That where such original drugs, after payment of the tax thereon, are further manufactured or compounded by any duly registered and bonded manufacturing chemist or manufacturing pharmacist, the packages or receptacles containing the same may, under regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, have affixed thereto, in lieu of the prescribed tax-paid stamps, such labels or marks as will show the payment of the tax on the original drugs before the same were further manufactured or compounded. And every person making application to register under the provisions of this act shall file with his application for registry a sworn statement showing to the best of his knowledge and belief the number of ounces of the aforesaid original drugs, whether such drugs are in their original

shape or in preparations, in his possession at the date this act goes into effect, and the collector with whom such application is filed shall collect the tax on such original drugs at the rate of one cent per ounce.

SEC. 3. That every person importing, manufacturing, remanufacturing, compounding, or offering for sale any such drugs, their salts, derivatives, or preparations, shall keep such books, render such returns, and give such bonds as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may from time to time prescribe.

SEC. 4. That it shall be unlawful for any person to sell, or give away, in interstate commerce, any of the aforesaid drugs, or any of their salts, derivatives, or preparations, to any person other than a person who has registered and paid the special tax as required by this act; but that nothing contained in this section shall apply to public hospitals, or to scientific or public institutions.

SEC. 5. That under such regulations, and upon the filing of such notices, entries, and bonds as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, any of the aforesaid drugs, their salts, derivatives, or preparations may be removed from a customs warehouse or from the place of manufacture or storage for export, free of tax; but upon the reimportation of any such drugs, their salts, derivatives, or preparations, the same shall be held in the custody of the collector of customs until the required internal-revenue stamps in payment of the tax and labels and marks imposed by this act have been placed thereon.

SEC. 6. That any person who purchases, receives, or sells, transfers, or gives away any of the aforesaid drugs, their salts, derivatives, or preparations on which the tax or labels or marks imposed by this act has not been paid, or who violates or fails to comply with any of the requirements of this act, or any regulation issued thereunder, shall, on conviction, be fined not less than five hundred nor more than five thousand dollars; or be imprisoned not less than one year nor more than five years, or both, in the discretion of the court.

SEC. 7. Whenever on trial for a violation of this act the defendant is shown to have, or to have had, possession of the aforesaid drugs, salts, derivatives, or preparations thereof, such possession shall be deemed sufficient evidence of such violation unless the defendant shall explain the possession to the satisfaction of the jury.

SEC. 8. That all returns required by this act shall be properly filed and recorded in the office of the Commissioner of Internal Revenue, and under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may make. These returns shall be open to inspection and certified copies furnished to the proper officials of any State or Territory or district, or other territory under the jurisdiction of the United States, or any organized municipality thereof, any or all of whom may be charged with the enforcement of State, district, territorial, municipal, or other local laws or ordinances regulating the prescribing, dispensing, sale, or use of the aforesaid drugs, their salts, derivatives, or preparations.

SEC. 9. That the sum of one hundred and fifty thousand dollars, or so much thereof as may be necessary, be, and hereby is, appropriated for the purpose of carrying into effect the provisions of this act, and the Commissioner of Internal Revenue is authorized to appoint such agents, deputy collectors, inspectors, chemists, assistant chemists, clerks, and messengers in the field and in the Bureau of Internal Revenue as may be necessary to enforce the provisions hereof.

SEC. 10. Nothing in this act shall be construed as modifying or revoking any of the provisions of the act of Congress approved June thirtieth, nineteen hundred and six, known as the "Pure food and drugs act," or any amendments thereof, or of the act of Congress approved February ninth, nineteen hundred and nine, entitled "An act to prohibit the importation and use of opium for other than medicinal purposes."

[Revised Statutes referred to in proposed bill.]

"SEC. 3233. Every person engaged in any trade or business on which a special tax is imposed by law shall register with the collector of the district his name or style, place of residence, trade or business, and the place where such trade or business is to be carried on. In case of a firm or company the names of the several persons constituting the same and their places of residence shall be so registered.

"SEC. 3237. All special taxes shall become due on the first of May, in each year, or on commencing any trade or business on which such tax is imposed. In the former case the tax shall be reckoned for one year, and in the latter case it shall be reckoned proportionately from the first day of the month in which the liability to a special tax commenced to the first day of May following.

"SEC. 3140. The word 'State,' when used in this title, shall be construed to include the Territories and the District of Columbia, where such construction is

necessary to carry out its provisions. (And where not otherwise distinctly expressed or manifestly incompatible with the intent thereof the word 'person,' as used in this title, shall be construed to mean and include a partnership, association, company, or corporation, as well as a natural person.)

"Sec. 3240. Each collector of internal revenue shall, under regulations of the Commissioner of Internal Revenue, place and keep conspicuously in his office, for public inspection, an alphabetical list of the names of all persons who shall have paid taxes within his district, and shall state thereon the time, place, and business for which such special taxes have been paid."

APPENDIX II.

Proposed amendments to the act of October 1, 1890 (26 Stat., 1567), regulating the manufacture of smoking opium within the United States.

SECTION 1. That an internal-revenue tax of dollars per pound shall be levied and collected upon all opium manufactured in the United States for smoking purposes; and no person shall engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue.

SEC. 2. That every manufacturer of such opium shall file with the collector of internal revenue of the district in which his manufactory is located such notices, inventories, and bonds, shall keep such books and render such returns of material and products, shall put up such signs and affix such number to his factory, and conduct his business under such surveillance of officers and agents as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may, by regulation, require. But the bond required of such manufacturer shall be with sureties satisfactory to the collector of internal revenue, and in a penal sum of not less than dollars; and the sum of said bond may be increased from time to time and additional sureties required at the discretion of the collector or under instructions of the Commissioner of Internal Revenue.

SEC. 3. That all prepared smoking opium manufactured in the United States shall be duly stamped in such a permanent manner as to denote the payment of the internal-revenue tax thereon.

SEC. 4. That the provisions of existing laws covering the engraving, issue, sale, accountability, effacement, cancellation, and the destruction of stamps relating to tobacco and snuff, as far as applicable, are hereby made to apply to stamps provided for by the preceding section.

SEC. 5. That a penalty of not less than dollars or imprisonment for not less than years, or both, in the discretion of the court, shall be imposed for each and every violation of the preceding sections of this act relating to opium or any person or persons; and all prepared smoking opium wherever found within the United States without the stamps required by this act shall be forfeited and destroyed.

SEC. 6. That nothing in this act shall be construed as modifying or revoking any of the provisions of the act of Congress approved February nine, nineteen hundred and nine, entitled "an act to prohibit the importation and use of opium for other than

APPENDIX III.

Proposed bill to regulate the practice of pharmacy and the sale of poisons in the consular districts of the United States in China.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled: That on and after the first day of nineteen hundred and ten, it shall be unlawful in the consular districts of the United States in China for any citizen of the United States not licensed as a pharmacist within the meaning of this act to conduct or manage any pharmacy, drug or chemical store, apothecary shop, or other place of business for the retailing, compounding, or dispensing of any drugs, chemicals, or poisons, or for the compounding of physicians' prescriptions, or to keep exposed for sale, at retail, any drugs, chemicals, or poisons, except as hereinafter provided; or, except as hereinafter provided, for any citizen of the United States not licensed as a pharmacist within the meaning of this act to compound, dispense, or sell, at retail, any drug, chemical, poison, or pharmaceutical preparation upon the prescription of a physician, or otherwise, or to compound physicians' pre-

scriptions, except as an aid to and under the proper supervision of a pharmacist licensed under this act. And it shall be unlawful for any citizen of the United States who is an owner or manager of a pharmacy, drug store, or other place of business to cause or permit any person other than a licensed pharmacist to compound, dispense, or sell, at retail, any drug, medicine, or poison, except as an aid to and under the proper supervision of a licensed pharmacist. *Provided*, That nothing in this section shall be construed to interfere with any legally registered practitioner of medicine, dentistry, or veterinary surgery, in the compounding of his own prescriptions, or to prevent him from supplying to his patients such medicines as he may deem proper; nor with the exclusively wholesale business of any citizen of the United States who is a dealer and who shall be licensed as a pharmacist, or who shall keep in his employ at least one person who is so licensed, except as hereinafter provided; nor with the sale by citizens of the United States other than pharmacists of poisonous substances sold exclusively for use in the arts, or as insecticides, when such substances are sold in unbroken packages bearing labels having plainly printed upon them the name of the contents, the word "poison," when practicable the name of at least one suitable antidote, and the name and address of the vender.

SEC. 2. That every citizen of the United States now practicing as a pharmacist in the consular districts in China shall file with the consul an application, duly verified under oath, setting forth the name and age of the applicant, the place or places at which he pursued, and the time spent in, the study of pharmacy, the experience which the applicant has had in compounding physicians' prescriptions under the direction of a licensed pharmacist, and the name and location of the school or college of pharmacy, if any, of which he is a graduate, and shall submit evidence sufficient to show to the satisfaction of said consul that he is of good moral character and not addicted to the use of alcoholic liquors or narcotic drugs so as to render him unfit to practice pharmacy: *Provided*, That applicants shall be not less than twenty-one years of age and shall have had at least four years' experience in the practice of pharmacy or shall have served three years under the instruction of a regular licensed pharmacist, and any applicant who has been graduated from a school or college of pharmacy recognized by the proper board of his State, Territory, District of Columbia, or other possession of the United States as in good standing shall be entitled to practice upon presentation of his diploma.

SEC. 3. That if the applicant for license as a pharmacist has complied with the requirements of the preceding section, the consul shall issue to him a license which shall entitle him to practice pharmacy in the consular districts of the United States in China, subject to the provisions of this act.

SEC. 4. That the license of any citizen of the United States to practice pharmacy in the consulate districts of the United States in China may be revoked by the consul if such person be found to have obtained such license by fraud; or be addicted to the use of any narcotic or stimulant, or to be suffering from physical or mental disease, in such manner and to such an extent as to render it expedient that in the interests of the public his license be canceled; or to be of an immoral character; or if such person be convicted in any court of competent jurisdiction of any offense involving moral turpitude. It shall be the duty of the consul to investigate any case in which it is discovered by him, or made to appear to his satisfaction, that any license issued under the provisions of this act is revocable and shall, after full hearing, if in his judgment the facts warrant it, revoke such license.

SEC. 5. That every license to practice pharmacy shall be conspicuously displayed by the person to whom the same has been issued in the pharmacy, drug store, or place of business, if any, of which the said person is the owner or manager.

SEC. 6. That it shall be unlawful for any citizen of the United States, by himself or by his servant or agent, or as the servant or agent of any other person or of any firm or corporation, to sell, furnish, or give away any cocaine, salts of cocaine, or preparation containing morphine or salts of morphine; or any opium, or preparation containing opium; or any chloral hydrate, or preparation containing chloral hydrate, except upon the original written order or prescription of a lawfully authorized practitioner of medicine, dentistry, or veterinary medicine, which order or prescription shall be dated and shall contain the name of the person for whom prescribed, or, if ordered by a practitioner of veterinary medicine, shall state the kind of animal for which ordered, and shall be signed by the person giving the order or prescription. Such order or prescription shall be, for a period of three years, retained on file by the person, firm, or corporation who compounds or dispenses the article ordered or prescribed, and it shall not be compounded or dispensed after the first time, except upon the written order of the original prescriber: *Provided*, That the above provisions shall not apply to preparations containing not more than two grains of opium, or not more than one-quarter grain of morphine, or not more than one-quarter grain of cocaine, or

not more than two grains of chloral hydrate in the fluid ounce, or, if a solid preparation, in one avoirdupois ounce. The above provisions shall not apply to preparations sold in good faith for diarrhea and cholera, each bottle or package of which is accompanied by specific directions for use and caution against habitual use, nor to liniments or ointments sold in good faith as such when plainly labeled "for external use only," nor to powder of ipecac and opium, commonly known as Dover's powder, when sold in quantities not exceeding twenty grains: *Provided further*, That the above provisions shall not apply to sales at wholesale by jobbers, manufacturers, and retail druggists, hospitals, and scientific or public institutions.

SEC. 7. That it shall be unlawful for any citizen of the United States to sell or deliver to any other person any of the following-described substances, or any poisonous compound, combination, or preparation thereof, to wit, the compounds of and salts of antimony, arsenic, barium, chromium, copper, gold, lead, mercury, silver, and zinc; the caustic hydrates of sodium and potassium, solution or water of ammonia, methyl alcohol, paregoric, the concentrated mineral acids, oxalic and hydrocyanic acids and their salts, yellow phosphorus, Paris green, carbolic acid, the essential oils of almonds, pennyroyal, tansy, rue, and ravin; croton oil, creosote, chloroform, cantharides, or aconite, belladonna, bitter almonds; colchicum, cotton root, cocculus indicus, conium, cannabis indica, digitalis, ergot, hyosyamus, ignatia, lobelia, nux vomica, physostigma, phytolacca, strophantus, stramonium, veratrum viride, or any of the poisonous alkaloids or alkaloidal salts derived from the foregoing, or any other poisonous alkaloids or their salts, or any other virulent poison, except in the manner following, and, moreover, if the applicant be less than eighteen years of age, except upon the written order of a person known or believed to be an adult.

It shall first be learned, by due inquiry, that the person to whom delivery is about to be made is aware of the poisonous character of the substance, and that it is desired for a lawful purpose, and the box, bottle, or other package shall be plainly labeled with the name of the substance, the word "poison," the name of at least one suitable antidote when practicable, and the name and address of the person, firm, or corporation dispensing the substance. And before delivery be made of any of the foregoing substances, excepting solution or water of ammonia, and sulphate of copper, there shall be recorded in a book kept for that purpose the name of the article, the quantity delivered, the purpose for which it is to be used, the date of delivery, the name and address of the person for whom it is procured, and the name of the individual personally dispensing the same; and said book shall be preserved by the owner thereof for at least three years after the date of the last entry therein. The foregoing provisions shall not apply to articles dispensed upon the order of persons believed by the dispenser to be lawfully authorized practitioners of medicine, dentistry, or veterinary surgery: *Provided*, That when a physician writes upon his prescription a request that it be marked or labeled "poison" the pharmacist shall, in the case of liquids, place the same in a colored glass, roughened bottle, of the kind commonly known in trade as a "poison bottle," and, in the case of dry substances, he shall place a poison label upon the container. The record of sale and delivery above mentioned shall not be required of manufacturers and wholesalers who shall sell any of the foregoing substances at wholesale to licensed pharmacists, but the box, bottle, or other package containing such substance, when sold at wholesale, shall be properly labeled with the name of the substance, the word "poison," and the name and address of the manufacturer or wholesaler: *Provided further*, That it shall not be necessary, in sales either at wholesale or at retail, to place a poison label upon, nor to record the delivery of, the sulphide of antimony, or the oxide or carbonate of zinc, or of colors ground in oil and intended for use as paints, or calomel, or of paregoric when sold in quantities not over two fluid ounces; nor, in the case of preparations containing any of the substances named in this section, when a single box, bottle, or other package, or when the bulk of one-half fluid ounce, or the weight of one-half avoirdupois ounce, does not contain more than an adult medicinal dose of such substance; nor in the case of liniments or ointments sold in good faith as such, when plainly labeled "for external use only;" nor in the case of preparations put up and sold in the form of pills, tablets, or lozenges, containing any of the substances enumerated in this section and intended for internal use, when the dose recommended does not contain more than one-fourth of an adult medicinal dose of such substance.

For the purpose of this and of every other section of this act no box, bottle, or other package shall be regarded as having been labeled "poison" unless the word "poison" appears conspicuously thereon, printed in plain, uncondensed gothic letters in red ink.

SEC. 8. That no citizen of the United States seeking to procure in the consular districts of the United States in China any substance the sale of which is regulated by the provisions of this act shall make any fraudulent representations so as to evade or defeat the restrictions herein imposed.

shall be preserved, for a period of not less than three years, the original of every prescription compounded or dispensed at such store or pharmacy, or a copy of such prescription, except when the preservation of the original is required by section six of this act. Upon request, the proprietor or manager of such store shall furnish to the attending physician, or to the person for whom such prescription was compounded or dispensed, a true and correct copy thereof. Any prescription required by section six of this act, and any prescription for, or register of sales of, substances mentioned in section six of this act shall at all times be open to inspection by duly authorized consular or diplomatic officers in the consular districts of the United States in China. No citizen of the United States shall in the consular district compound or dispense any drug or medicine, or deliver the same to any other person, without marking on the container the name of the drug or drugs contained therein, or directions for using the same.

10. That it shall be unlawful for any citizen of the United States not legally qualified as a pharmacist to take, use, or exhibit the title of pharmacist, or licensed or registered pharmacist, or the title of druggist or apothecary, or any other title or designation of like import.

11. That any citizen of the United States violating any of the provisions of this act shall be deemed guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not less than one hundred and not more than five hundred dollars, or by imprisonment for not less than three months and not more than one year, or by both such fine and imprisonment, in the discretion of the court, and if the offense shall be continuing in its character, each week or part of a week during which it continues shall constitute a separate and distinct offense. And it shall be the duty of the consular, diplomatic, consular, and judicial officers of the United States in China to enforce the provisions of this act.

12. Nothing in this act shall be construed as modifying or revoking any of the provisions of the act of Congress of February twenty-third, eighteen hundred and seven, entitled "An act to provide for the execution of the provisions of article 17 of the treaty concluded between the United States of America and the Empire of China, on the seventeenth day of November, eighteen hundred and twenty-five, and proclaimed by the President of the United States the fifth day of October, eighteen hundred and eighty-one."

OPIMUM PROBLEM.

APPENDIX IV.
 Importations into the United States of various forms of opium, showing per cent of increase in imports compared with per cent increase in population, per decade.

^a This form of opium prohibited April 1, 1909.
^b Includes Alaska, 3,116, and Hawaii, 25,767.
^c Owing to the heavy duty of \$10 and \$12 per pound imports were restricted, but large amounts were smuggled into this country.
^d Excess due to anticipated tariff.
^e Estimated.

OPIUM PROBLEM.

APPENDIX IV—Continued.

Importations into the United States of various forms of opium, showing per cent of increase in imports compared with per cent increase in population, per decade—Continued.

Year.	Opium, crude.					Smoking opium.					Morphine or its salts.					Population.		Population compared with opium imports—Per cent of increase.
